(1) A resolution which (*a*) stressed the "very serious problems" to which new industrial techniques, including automation, could give rise, (*b*) supported the nationalization of basic industries as "a step towards the realization of the principles of socialism"; (*c*) instructed the General Council, in conjunction with the Labour Party executive and the trade unions concerned, to prepare plans for the nationalization of certain sections of the engineering, chemical, building, and building materials industries (Moved by Mr. W H. Bradley, A E U.)

(2) A resolution which (*a*) asserted that the nationalized industries were handicapped by the compensation paid to former owners and by "undemocratic organization", (*b*) demanded that the basis of compensation should be re-examined and that plans for further nationalization should be "founded on the principles of industrial democracy", (*c*) expressed concern at the increasing power of private finance corporations (especially in relation to hire-purchase), and called for their nationalization and for the establishment of government finance corporations to grant loans "on a fair and equitable basis." (Moved by Mr. R Edwards, Chemical Workers' Union)

Transport Finances. An N U R resolution (moved by Mr Campbell) designed to improve the financial position of the British Transport Commission was remitted to the General Council for further consideration The resolution (*a*) regretted the Government's refusal to provide any financial aid for the B T C except a Treasury guarantee on borrowings, (*b*) declared that the Commission's financial position, the burden of compensation, arrears of maintenance, the Government's transport policy, and increasing costs (including interest charges on fresh borrowings) would all "react to the detriment of transport users and employees"; (*c*) urged the Government to examine the Commission's financial position in conjunction with the T U.C., "with a view to reaching stability and avoiding an increase in fares" The resolution proposed that the State should either take over all capital charges, less the amount which the industry could reasonably be expected to earn, or else "introduce a block grant scheme to protect the Commission, transport workers, and transport users against increased costs outside their control" It also called for exemption of public service vehicles from fuel tax, the removal of all restrictions on the Commission's power to manufacture rolling-stock and equipment, and the re-nationalization of long-distance road haulage.

Mr Campbell pointed out that £800,000,000 of the £1,200,000,000 to be spent on railway modernization would have to be found at high interest rates in the open market, besides which the industry would have to find at least £57,000,000 during the next 15 years for central charges. The N U R. proposed that the Government should either take over part of these central charges or else assist the Commission by a block grant.

Mr Douglas Houghton, M P, for the General Council, explained that the Labour Party had invited it to discuss the whole structure of nationalized industries He added that the T U Congress would be ill-advised to commit itself in the meantime to detailed proposals.

Trade Union Organization. A resolution (moved by the National Union of Sheet Metal Workers) condemning the "victimization" of shop stewards by employers, and reaffirming the "right of all trade unionists to appoint shop officials and works committees of their own choosing", was carried against the General Council's advice The following motions were, however, defeated (1) a motion by Mr. Bryn Roberts urging the creation of integrated trade unions for each of the nationalized industries, (2) a motion re-affirming the trade unions' right to negotiate with employers on behalf of their members

Relations with Foreign Trade Unions. A motion urging the "initiation of discussions with the appropriate organizations with a view to securing the utmost solidarity of the workers in all countries" was moved by Mr Arthur Horner (National Union of Mineworkers) He argued that the choice between war and peace lay largely with the working classes, and that the cost to the nation of private profits and monopolies was "trifling" compared with the cost of preparations for war or the maintenance of a state of "cold war." After Mr. W. Padley, M P. (Union of Shop, Distributive, and Allied Workers) had warned the Congress that the motion "might be interpreted as the beginning of a united front with the 'stooge' unions of the Communist countries," the motion was defeated by 4,457,000 votes to 3,431,000

Atomic Weapons. Unanimous assent was given to a motion by Mr. J. S Campbell (N.U.R.) calling for international agreement on the abolition of hydrogen and atomic weapons and on the prohibition of their manufacture or use, and urging the Government to try to obtain agreement to end further tests of atomic weapons

German Rearmament. A resolution (moved by Mr J Horner, Fire Brigades Union) opposing German rearmament, and urging the Government to use its influence with the Governments of the U.S.A., France, and the U S.S.R. to secure "the creation of a united peaceful Germany with a Government based on free elections," was defeated by 4,402,000 votes to 3,212,000.

Monopolies. A motion by the Post Office Engineering Union endorsing the majority conclusions of the Monopolies Commission's report on collective discrimination, and urging the need for effective action to counter all monopolies which were detrimental to the public interest, was adopted unanimously.

National Service. Congress unanimously approved a resolution (moved by Mr W E. Packwood, United Patternmakers' Association) calling for immediate steps to reduce the National Service period, in view of "the serious effects of the present term on the industrial and economic life of the country"

The "Colour Bar," etc. The following motions on "colour bar" and similar questions were approved: (1) condemning "all manifestations of racial discrimination or colour prejudice, whether by Governments, employers, or workers"; (2) welcoming workers from undeveloped Commonwealth areas into employment in British industry, opposing "all attempts based on the colour bar to deny accepted rights to Commonwealth citizens," and urging immediate steps to develop the resources of Colonial and Commonwealth territories so as to establish balanced economies and make it unnecessary for the native populations to seek employment elsewhere, (3) regretting the deterioration of race relations in South Africa, condemning the *apartheid* policy, and urging the British Government to use its influence in the United Nations and elsewhere "to obtain civilized treatment for the non-white population of South Africa"

Miscellaneous. The Congress also approved resolutions which (1) affirmed belief in equality of educational opportunity, and called for the raising of the school-leaving age to 16 not later than 1960 (moved by Miss Anne Godwin, Clerical and Administrative Workers' Union), (2) expressed concern at "the continued denial to professional footballers of proper conditions of employment, including the right to make or terminate contracts," and calling upon the Football Association to arrange a conference of interested parties to "arrange a new deal" for professional footballers (moved by Mr. James Guthrie, Association Football Players' and Trainers' Union); (3) deploring the "low standard of houses now being built," and demanding improved standards

The elections for the General Council resulted in only two changes, namely, the election of Mr. A. Hallworth (Associated Society of Locomotive Engineers and Firemen) in place of Mr. J. Baty (of the same union), who had retired, and of Mr. A. E. Tiffin (general secretary, Transport and General Workers' Union) to replace the late Mr. Arthur Deakin (see 14336 C). Mr. W. B. Beard, secretary of the United Patternmakers' Association, was elected chairman of the General Council of the T.U C. for the ensuing year, in succession to Mr. Geddes.—(Times - Manchester Guardian - Daily Herald)

(Prev. rep. 1954 T.U. Congress, 13814 A.)

Note. The number of trade unions represented at the Congress was 183, with a total membership of 8,106,958. The number of unions and members in each of the 18 trade groups represented was as follows. Mining and Quarrying, 4 (719,170 members); Railways, 3 (530,948); Transport (except railways), 10 (1,355,889), Shipbuilding, 5 (122,761); Engineering, Founding, and Vehicle Building, 27 (1,388,445), Iron and Steel and Minor Metal Trades, 17 (198,588); Building, Woodworking and Furnishing, 19 (592,562), Printing and Paper, 13 (305,546), Cotton, 6 (170,166); Textiles (except cotton), 21 (99,000), Clothing, 6 (175,165), Leather, Boot and Shoe, 6 (110,020); Glass, Pottery, Food, Chemicals, etc., 15 (470,502); Agriculture, 1 (135,000); Public Employees, 4 (248,447), Civil Service, 8 (457,061), Non-Manual Workers, 14 (233,839); General Workers, 4 (793,849).—(Ministry of Labour Gazette)

A. EASTERN EUROPE. — Reduction in Polish, Hungarian, Bulgarian, and Albanian Armed Forces.

Following the similar action recently taken by the Soviet Union, Czechoslovakia, and Rumania, the Polish, Hungarian, Bulgarian, and Albanian Governments announced that their armed forces would be reduced as follows by the end of 1955: Poland, by 47,000 men; Hungary, by 20,000 men; Bulgaria, by 18,000 men; Albania, by 9,000 men. Announcements to this effect were made by the Polish and Albanian Governments on Sept. 8, by the Hungarian Government on Sept. 7, and by the Bulgarian Government on Sept. 20.

The present strength of the Polish armed forces is estimated at about 277,000, and of the Albanian armed forces at 30,000. The armed forces of Hungary and Bulgaria were fixed at 70,000 and 65,500 respectively under the peace treaties with those countries (see 8513 B, 8494 A), but are believed to be considerably in excess of those figures.—(Polish Embassy, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 14393 B; 14384 C; 14384 D.)**

B. SOUTH AFRICA. — Increase in Bank Rate.

The South African bank rate was raised from 4 to 4½ per cent on Sept. 29 by the South African Reserve Bank.

(Financial Times) **(Prev. rep. 12130 A.)**

A. EUROPE. — Road Construction Programmes.

A survey of post-war road construction programmes in a number of European countries—primarily in Western Europe, excluding Great Britain—was given in *The Times* on Sept. 14 and is summarized below. It was pointed out that the programmes had been undertaken partly to make good the damage suffered during the war, and partly in view of the growing importance of road transport in modern communications.

Belgium. Belgian plans envisage two 15-year development schemes providing for the construction of 562 miles of autoroutes, the modernization of 1,187 miles of the most important existing routes, and improvements to 1,625 miles of other main roads. Major road and bridge works carried out since 1949 include: a 75-mile motor-road between Brussels and Ostend, half built before the war and now almost completed, by-passes at Louvain and Tirlemont, on the Liège road, and at Genappe, on the Charleroi road; improvements on the roads from Brussels to Antwerp, Liège, Namur, Charleroi, Mons, Ghent and Ostend; a new 4½-mile motor-road from Brussels to Melsbroek Airport; and a new one-span bridge over the Meuse at Namur, on the Brussels-Namur-Arlon road

France. Much progress has been made in repairing war damage to the French road system, in which connexion 5,110 road bridges have been rebuilt out of 7,550 destroyed during the war. In the Paris area important new motor-roads are either completed or building, including the *Autoroute de l'Ouest* (now complete) and the *Autoroute du Sud* (under construction) The latter road will have three branches one joining the road to Orléans southward, a second linking up with the road to Fontainebleau south-eastward, and a third to Orly Airport. An *Autoroute du Nord* will be built on the completion of the *Autoroute du Sud*, and will link up with a new motor-road near Lille. Several new traffic "flyovers" are projected for Paris, of which one—at the Pont d'Alma, on the right bank of the Seine—is under construction, others are planned in the near future at the Pont de la Concorde and the Pont de Change Altogether 12 new flyovers have been built in different parts of the country, with nine under construction. In addition, 49 by-passes on main traffic arteries have been built and are in use, with 37 others under construction.

One of the principal new post-war schemes is a tunnel (the *Tunnel Routier de la Croix Rousse*) opened in 1952 to relieve traffic congestion in the centre of Lyons. The construction of a seven-mile tunnel through Mont Blanc (see 13783 C) is also in progress, with the co-operation of the Italian Government; when completed, it will save 140 miles on the Paris-Rome route and make possible an all-the-year road service between the French and Italian capitals

German Federal Republic. In addition to major post-war reconstruction programmes, the Federal Republic has constructed 25 miles of new *Autobahnen* and 62 miles of other Federal roads. Further new *Autobahn* construction is to be undertaken under legislation passed in April, 1955, whilst the *Land* Governments have been invited to submit programmes for the development and improvement of roads within the next ten years The Federal Government is authorized to commission by contract a private company to finance the construction of *Autobahnen*, and available funds—including Federal subsidies—are believed to be sufficient to carry out a programme for the construction of some 360 miles of *Autobahnen* during the next seven years

Italy. Between 1945 and 1953 nearly 22,000 miles of war-damaged roads were reconstructed or repaired, whilst 6,554 bridges were rebuilt and 263 new bridges built during the same period. Among important new projects are a new motor-road from Rome to the sea (the *Cristoforo Colombo* expressway), which is already open to traffic, and a 17-mile expressway between Genoa and Savona, another between Formia and Terracina (the *Via Flacca*), and a third between Marina and S. Eufemia Marina (the *Strada dei Due Mari*), all of which are under construction. Other important new roads planned are the Milan-Serravallo-Ponte Chiasso highway, which will cost over £10,000,000; a Milan-Bologna-Florence-Rome-Naples through route; and a new 90-mile road linking Brescia, Verona, and Padua.

Netherlands. Some 190 miles of roads have been built under a programme adopted in 1948, including a new Amsterdam-Utrecht motor-road. Out of a planned network of 400 miles of motorways, 200 miles have already been constructed, whilst 44 of the country's leading highways have been or are being extensively improved Apart from reconstruction of war damage, expenditure on road construction and development has more than doubled since 1948. An important contribution to the reduction of congestion in the cities has been the building in Rotterdam of a five-mile through road, which is sunken at congested points to allow traffic crossing the city in the other direction to pass overhead This dual carriageway passes under the River Maas in a twin tunnel constructed on the tube principle proposed for the Firth of Forth, in Scotland (see 14075 A). It carries an average of 45,000 vehicles every 24 hours.

Commenting on the Dutch road programme, *The Times* said: "In view of the especial difficulties arising from the fact that the country has a subsoil which is, in places, among the worst in Europe for constructional purposes, it ranks as one of the most impressive performances of all"

Norway. Over 2,400 miles of new roads were built between 1948 and 1953, bringing Norway's total road mileage to 30,169 miles. During this period 132 miles of new main roads were built, and 760 miles of new roads in rural districts.

Sweden. The Swedish road network has grown from 43,750 miles in 1925 to 56,250 miles in 1955 A new ten-mile motor-road between Malmö and Lund is in operation, with a further eight miles under construction.

Spain. A general highway improvement programme was adopted in 1950 and has since been greatly expanded. Reconstruction work is in progress over most of the national highway system, some 35 per cent having been completed.

In Austria, a ten-year plan for modernizing the most important highways was begun in 1947, and a new motor-road is to be built between Vienna and Salzburg; in Finland, 3,300 miles of national and local roads were constructed or improved between 1948 and 1953; in Greece, a five-year programme (to be completed in 1958) is in progress for the construction of 750 miles of new roads and improvements to 950 miles of existing roads; whilst a 15-year programme for building 1,125 miles of new roads has recently been adopted in Portugal.—(Times)

(Prev. rep. British Road Programme, 14075 A.)

B. UNITED STATES. — Foreign Aid, 1948-55.

The report of the Foreign Operations Administration dated May 27 showed that in the seven years from the start of the Marshall Plan on April 3, 1948, to March 31, 1955, the United States had made allotments for foreign aid totalling $19,444,737,000, comprising $14,516,049,000 to Europe, $2,386,453,000 to the Far East, $2,246,140,000 to the Near East, Africa and South Asia, $100,613,000 to Latin America, and $195,482,000 for a variety of non-regional programmes. Division of the aid between the principal recipient countries is shown below.

Europe. United Kingdom, $3,800,019,000, France, $3,198,424,000, Italy, $1,617,304,000, Western Germany (excluding West Berlin), $1,491,082,000; Netherlands, $988,800,000, Austria, $725,227,000, Belgium-Luxemburg, $560,659,000, Yugoslavia, $316,688,000, Denmark, $280,907,000, Norway, $277,064,000; Spain, $202,572,000, Irish Republic (Eire), $146,525,000, Sweden, $106,937,000, Portugal, $51,175,000; West Berlin, $41,397,000; Iceland, $35,220,000, Trieste, $31,927,000. In addition, $101,426,000 was allotted to Indonesia before that country achieved independence from the Netherlands; $361,622,000 was allocated to the European Payments Union; and $100,000,000 went to the European Coal and Steel Community.

Asia. Nationalist China (Formosa), $672,129,000; Korea, $400,567,000, Vietnam (now South Vietnam), $181,747,000; Philippines, $108,302,000, Siam, $63,769,000, Indonesia (see also under Europe, above), $30,328,000; Cambodia, $22,470,000; Burma, $21,238,000; Laos, $15,720,000; Japan, $10,350,000. A further $857,799,000 had been allocated to South Vietnam, Laos and Cambodia, but had not yet been distributed between them

Near East, Africa, and South Asia. Greece, $836,393,000; Turkey, $400,306,000; India, $274,090,000; Israel, $223,002,000; Persia, $205,538,000; Pakistan, $146,023,000, Egypt, $60,034,000; Jordan, $21,352,000, Lebanon, $15,473,000, Libya, $9,745,000, Ethiopia, $8,612,000; Iraq, $7,011,000; Afghanistan, $6,629,000.

Latin America. Bolivia, $20,126,000; Brazil, $11,046,000; Peru, $8,130,000, Guatemala, $5,594,000; Chile, $5,326,000; Paraguay, $4,976,000; Ecuador, $4,953,000; Haiti, $4,471,000; Mexico, $4,077,000.

Non-Regional Programmes. Refugees, migration, and voluntary agencies, $45,356,000; Christmas food packages, $21,500,000; escapee programme, $17,125,000.

The amount of aid allotted each year fell from $6,180,300,000 in the 15 months to June 30, 1949, to $3,510,000,000 in 1949-50, $2,644,900,000 in 1950-51, and $1,823,800,000 in 1951-52. This fall, due to the sharp reduction in aid to Europe, was reversed in 1952-53 owing to the increase in aid to the Far East, and the amount rose to $1,836,200,000 in 1952-53 and $2,140,300,000 in 1953-54. In the nine months July, 1954 - March, 1955, the value of such aid totalled $1,113,100,000. (Foreign Operations Administration, Washington) **(12551 A.)**

C. AUSTRALIA. — Federal By-election.

A by-election was held on May 21 for the Cook (New South Wales) seat in the Federal Parliament made vacant by the death on March 26 of Mr. T. Sheehan (Labour). It resulted in a victory for Mr. J. F. Cope (Labour), who received 21,411 votes against 3,248 votes for Mr. J. S. Smith (Australian Labour Party, Anti-Communist), his sole opponent—a majority of 18,163.—(Australian News and Information Bureau)

(Prev. rep. Elections, 13652 A; Labour Party Split, 14178A

D. LONDON. — New Lord Mayor.

Mr. Cuthbert Lowell Ackroyd, Alderman of Cordwainer Ward, was elected Lord Mayor of London at Guildhall on Sept. 30 for the municipal year 1955-56 (beginning on Nov. 8) in succession to Sir Seymour Howard. Mr. Ackroyd (63), a Yorkshireman, has spent the whole of his business life in the City as a wool merchant.—(Times - Daily Telegraph) **(13876 E.)**

A. **SHIPPING. — World Construction Figures. - P. & O. Group to build Tanker Fleet.**

Lloyd's Register returns of merchant shipbuilding for the second quarter of 1955, published on July 20, gave the gross tonnage under construction throughout the world (excluding the U.S.S.R., Poland, and China, as well as vessels under 100 tons, barges, etc.) as 6,100,534 tons, of which 34.12 per cent was building in the U.K. and 65.88 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 338 of 2,081,534 tons (steamers 1,227,638 tons, motorships 853,896 tons), including 2 steamers of over 30,000 tons, 2 of 25,000-30,000 tons, 21 of 20,000-25,000 tons, and 10 steamers and 3 motorships of 15,000-20,000 tons Of the total, 237 ships (1,317,028 tons) were building for Great Britain and N. Ireland, 27 (45,732 tons) for other British Commonwealth countries, 24 (319,065 tons) for Norway, 11 (169,380 tons) for Panama, 4 (85,000 tons) for the U S A , 5 (37,820 tons) for Greece, 3 (24,670 tons) for Liberia, 2 (13,800 tons) for the Irish Republic, 2 (13,000 tons) for Honduras, 12 (4,220 tons) for Burma, 1 (4,000 tons) for France, 5 (3,375 tons) for the U.S.S.R., 2 (1,744 tons) for Brazil, and 3 (42,700 tons) for unspecified countries Principal shipbuilding centres were : the Clyde (107 ships of 659,956 tons), the Tyne (37 ships of 391,570 tons), Belfast (18 ships of 223,690 tons), the Tees (19 ships of 211,417 tons), Sunderland (28 ships of 202,760 tons), Liverpool (19 ships of 153,462 tons), and Barrow (4 ships of 86,000 tons)

Ships building abroad numbered 1,011 of 4,019,000 tons (steamers 1,646,265 tons, motorships 2,372,735 tons), divided as follows . Germany 255 (752,030 tons), the Netherlands 151 (583,957 tons), Japan 79 (536,135 tons), Sweden 70 (396,122 tons), France 56 (350,806 tons), Italy 86 (340,520 tons), Norway 57 (217,457 tons), Spain 59 (157,463 tons), the U.S A. 14 (144,610 tons), Belgium 24 (127,360 tons), Denmark 31 (126,358 tons), British Commonwealth countries 42 (100,141 tons), Finland 42 (83,739 tons), Yugoslavia 18 (78,211 tons), Portugal 5 (12,905 tons), Turkey 11 (6,759 tons), Indonesia 9 (3,477 tons) and 1 small vessel each for the Irish Republic and Iceland. The total included 1 steamer of over 30,000 tons in Japan, 3 steamers of 25,000-30,000 tons in Japan and 1 motorship of this size in the Netherlands, and 9 steamers of 20,000-25,000 tons in Japan, 6 in France, 4 each in Germany and the Netherlands, 2 each in Sweden and the U S A., 2 motorships of this size in Norway, and 1 each in France, Italy, and Sweden.

Tankers of over 1,000 tons gross building throughout the world numbered 229 of 2,954,341 tons, including 80 (1,011,031 tons) in the U.K., 16 (337,900 tons) in Japan, 26 (336,961 tons) in the Netherlands, 17 (233,650 tons) in Sweden, 21 (224,961 tons) in Germany, 11 (241,025 tons) in France, 15 (153,939 tons) in Norway, 17 (127,287 tons) in Italy, and 7 (126,600 tons) in the U S A

Ships launched during the quarter included the Canadian Pacific liner *Empress of Britain* (24,000 gross tons), launched by H.M. the Queen on June 22 from the Govan (Glasgow) yard of the Fairfield Shipbuilding and Engineering Co. Ltd.; the *Reina del Mar* (19,000 gross tons), built by Messrs. Harland and Wolff, Belfast, for the Liverpool-Chile-Peru service of the Pacific Steam Navigation Co. Ltd.; and the ore-carrier *Sept Iles* (31,000 tons deadweight), launched on June 22 from the Haverton Hill (Tees) shipyard of the Furness Shipbuilding Co. Ltd. for the Iron Ore Transport Company of Canada.

Sir Donald Anderson, deputy-chairman of the P. & O. group, which owns one of the largest shipping fleets in the world, announced on Sept. 12 that the group proposed to establish a " substantial " tanker fleet over the next ten years, beginning with 25 ships to be built by 1960. These ships, which would cost about £37,000,000 at present prices, would be owned in small numbers by the various companies in the group ; probably most of them would be of about 18,000 tons deadweight, with a few in the region of 32,000 tons. Sir Donald added that no upper limit to the size of the fleet had been fixed, and that whereas world tanker tonnage had increased since 1939 by 111 per cent (from 11,570,000 tons to 24,480,000 tons), British tanker tonnage had gone up by only 66 per cent (from 3,030,000 tons to 5,050,000 tons).

It was announced on Sept. 22 that Shell Tankers Ltd. had placed orders for 34 new tankers (17 of 32,000 deadweight tons each and 17 of 18,000 tons each), and that the Esso Petroleum Co. Ltd. had ordered six ships of 36,000 tons each. Of the Shell order, 20 ships will be built in British yards and 14 in Holland, whilst two of the Esso vessels will be built on the Tyne and four in Germany.—(Lloyd's List and Shipping Gazette) **(Prev. rep. Shipping, 14198 A.)**

B. **UNITED KINGDOM. — July Trade Figures.**

Imports into the United Kingdom in July totalled £338,800,000, exports £223,000,000, and re-exports £7,900,000, the adverse visible balance thus amounting to £107,900,000. This compared with an adverse balance of £128,900,000 in June and a monthly average of £75,600,000 in the first half of the year.—(Board of Trade Journal) **(Prev. rep. 14384 A.)**

C. **SOUTH AFRICA. — The Hillbrow By-election. - Dr. Friedman expelled from United Party. - Mr. Strauss's Statement on U.P. Attitude to Coloured Voters.**

A by-election in the Hillbrow (Johannesburg) parliamentary constituency was held on Sept. 14 and resulted in a victory for the United Party candidate, Dr. Louis Steenkamp, who received 3,299 votes against 2,658 votes for his Independent opponent, Dr. Bernard Friedman—a majority of 641 votes. Only 57 per cent of the electorate went to the polls. The by-election was caused by the resignation from Parliament of Dr. Friedman, who had previously sat as United Party member for the constituency, and his expulsion from the party after differences with the U.P. leader, Mr. Strauss, over the question of restoring the Coloured voters to the electoral roll.

The dispute originated in a statement made by Mr. Strauss on June 13 in which he said that it would be " premature " for the United Party to answer at present the question of whether it would restore the Coloured people to the common roll when it was returned to power. " It would also be basically defeatist for us to do so now," he declared, " for surely, when the United Party has succeeded in keeping the Coloured vote intact for five years in the face of every conceivable attempt by a ruthless and determined Government, it ill becomes us to presuppose defeat on the eve of the next phase of the struggle. My advice to the party is therefore not to allow our singleness of purpose in the coming struggle to be undermined by premature decisions based on defeat as a foregone conclusion. . . . The question is at present hypothetical. And unfortunately we have far too many real and urgent problems claiming our attention to allow of our becoming involved in advance with hypothetical questions . . But I want to give the assurance that when the problem does arise, the United Party will not hesitate to decide its course in the light of the new situation which will then have arisen. . . ."

Mr. Strauss's statement was strongly attacked by Mr. Hepple, the leader of the Labour Party, who described it as a " bitter blow to all those who vigorously and faithfully supported the United and Labour Parties in their uncompromising defence of the Coloured vote " It was also criticized by seven members of the U P caucus (among them Dr. Friedman), who drew up a statement dissociating themselves from Mr. Strauss's remarks Six of these members, however—Dr Jan Steytler, Mr R. Butcher, Mrs. Helen Suzman, Mr T. O. Williams, Mr John Cope, and Mr. Ray Swart—subsequently withdrew their opposition and expressed themselves " perfectly satisfied " after a further explanatory statement by Mr. Strauss, leaving only Dr. Friedman still critical.

Mr Strauss's second statement said (in part) that whilst " it is better that the Coloured voter should be able to exercise his vote as an ordinary citizen . . than that he should be forced to become a member of an anti-European racial block " it was necessary " to distinguish between the principle itself of retaining the common roll franchise and, on the other hand, its retention as an entrenched right " At the moment it was impossible to see a clear path through the " legislative jungle " created by the Government's measures tampering with the Constitution " All we can promise," he declared, " is that on our return to power we will, in consultation with the Coloured people, set right the grave injustice done to them in the best way open to us at that time, and in a form which will serve the best interests of South Africa as a whole."

On the same day (June 14) Dr Friedman issued over his own name the dissenting statement which had originally been agreed to also by the other six M P.s " The question has been put squarely to the United Party," the statement declared, " whether, on being returned to power, it would restore the Coloured voters to the common roll should the Nationalist Government succeed in removing them by fraudulent means In my opinion the only possible answer on such a fundamental question of principle is a clear and unequivocal 'yes' The statements issued earlier by Mr. Strauss on behalf of the United Party will inevitably be interpreted as a serious departure from the strong stand which has hitherto been maintained by the United Party, and will deprive the struggle the party has waged over the constitution issue of its moral basis "

The Hillbrow divisional committee of the United Party passed a vote of confidence in Dr Friedman on June 23. Their request that he should delay his proposed resignation from Parliament (which he had announced earlier) was, however, rejected by Dr. Friedman, who tendered his resignation on the following day On July 4 he was expelled from the United Party by its Transvaal committee

Dr. Steenkamp, the new member, was first elected to the House of Assembly in 1943 when he defeated the present Governor-General of South Africa, Dr. E. G. Jansen, at Vryheid (Natal). He lost the seat to an Afrikaner candidate in 1948, but in October 1949 was returned unopposed for Drakensberg. In 1953 he unsuccessfully contested the marginal seat of Newcastle, and later in that year became a Natal senator. (Cape Times - The Star, Johannesburg) **(Prev. rep. By-elections, 14099 B ; United Party, 13431 D ; Coloured Voters, 13672 A.)**

D. **UNITED STATES - PERSIA. — Friendship Treaty.**

A treaty of friendship, economic relations, and consular rights between Persia and the United States was signed in Teheran on Aug. 15. Negotiations for the conclusion of such a treaty had started in 1948. (New York Herald Tribune)

A. UNITED KINGDOM. — B.B.C. - Report and Accounts for 1954-55. - New Television Stations. - Permanent T.V. Link with Continent. - First Regular V.H.F. Broadcasts. - Changes in Board of Governors.

The report and accounts of the British Broadcasting Corporation for the year ended March 31, 1955, published on July 28, showed an excess of income over expenditure of £3,024,875, compared with a deficit of £9,595 in 1953-54. After adding a balance of £1,326,284 brought forward from 1953-54, and transferring £2,967,725 to capital account for future capital expenditure, the net balance carried forward amounted to £1,383,434.

Total income for the year reached the record figure of £20,804,987 (compared with £14,553,688 in 1953-54), the increase being attributed principally to the raising of the combined TV and sound licence from £2 to £3, although the net revenue from publications also rose by £417,515 to £1,775,205. Expenditure on revenue account amounted to £17,780,112 (sound services £10,018,779, television £5,043,908, tax adjustments and payments £2,717,425), compared with £14,563,283 in 1953-54

Licences in force at March 31, 1955, totalled 13,980,766, including 4,503,766 combined sound and television licences and 267,794 licences for sets fitted in cars. Over 1,250,000 new television sets were licensed during the year, and, for the first time, the television service became self-supporting. The report noted as a "striking fact," however, that the increase in combined sound and television licences had not been matched by a commensurate decline in licences for sound alone, showing that "alongside newcomers to television there were also many newcomers to sound."

Salient points from the report are summarized below:

Television Programmes. Estimating that, on the average, viewers watched two out of every five programmes televised in the evenings, the report pointed out that the "magnetic effect" of television was reflected, not only in the rapid increase of licences, but also in the hours spent in viewing. It added that the British "consumption" of programmes appeared to be on a level with that in the U.S.A., and was "much higher" than for sound broadcasting, the evening television programmes at the end of 1954 having an adult audience estimated at about 5,000,000, or roughly the same as the average evening audiences for the three sound programmes combined

The most popular television programmes, such as "What's My Line?", attracted an average of 9,000,000 viewers, whilst on special occasions, such as "Christmas Party," the audience rose to nearly 12,000,000 adults, or nearly one-third of the total adult population Programmes of general interest, such as "Viewfinder," "Panorama," and "Animal, Vegetable, and Mineral," attracted audiences of up to 5,000,000.

Sound Broadcasting. Although large audiences had been attracted to television programmes at the expense of sound broadcasting, many "sound only" programmes still commanded audiences as large or larger, e.g. the home audience for the two-way "Family Favourites" programme (broadcast simultaneously at home and on the British Forces network in Germany) was estimated at 12,500,000 daily, "The Archers" was heard daily by 9,000,000 people, and the weekly play in the "Curtain Up" series by 8,000,000. The report added "In terms of 'box office' results, sound broadcasting and television are at present running neck and neck"

Competition for Staff. The approach of commercial television had been signalled by "a severe struggle for staff," the inducements offered by competing organizations to B.B.C. staff in essential categories during the spring of 1955 having been "on such a scale that the effective continuance of operations seemed to be jeopardized in the immediate future" In view of "its over-riding obligation to maintain services at full effectiveness," the Corporation had been compelled to suspend its policy of maintaining even treatment for all staff, and had found it necessary "to offer special contracts outside the scope of the B.B.C.'s normal policy to a number of staff in the categories most immediately concerned." In this connexion, the report recorded the Corporation's satisfaction at finding "abundant evidence of the unwillingness of staff to leave its service even when approached from outside with offers on a lavish scale"

The report added that although the effects of competition on B.B.C. services were "bound to be considerable," and the Corporation's tasks would be made more difficult by the rise in costs which competition for artistes, sporting events, and other programme requirements was bringing about, there would be "no departure from the B.B.C.'s purposes, nor from the standard which it has set itself"

Colour Television. The report stated that experiments had been carried out during the year in colour television transmitted by a system which would also give satisfactory pictures in black and white on existing receivers. Further tests would be undertaken later in 1955, but it would be "a serious mistake to introduce colour transmissions before thoroughly satisfactory results can be made available to viewers at a reasonable cost"

Other developments in connexion with B.B.C. radio and television during recent months are summarized below:

New Television Stations. The B.B.C.'s new television station at Rowridge, Isle of Wight, the first of five medium-power stations to be equipped with permanent transmitters, and part of the 18-station plan to provide television for 97 per cent of the United Kingdom, came into operation on Nov. 12, 1954. Situated 3½ miles from Newport (I.O.W.) and 450 feet above sea-level, the Rowridge station serves the whole of Hampshire and parts of Dorset, Wiltshire, and West Sussex.

On Sept 22 it was announced that the seventh of the B.B.C.'s permanent television transmitting stations, at Meldrum, 20 miles north-west of Aberdeen, would be opened on Oct 12, when 90 per cent of the population of Scotland would be within range of B.B.C. television

A temporary low-power television station to serve Norwich and the immediately surrounding area was opened at Tacolneston (near Norwich) early in 1955 It will be replaced by a permanent medium-power station in 1956-57, when it is expected that the whole of East Anglia (outside the range of the London television station) will be able to receive programmes.

On April 15, 1955, it was announced that the B.B.C. had acquired a site for its projected North of Scotland television station at Rosemarkie, 11½ miles north-east of Inverness The new station is expected to be ready for service by the end of 1956.

"Eurovision." Sir George Barnes, the B.B.C.'s Director of Television Broadcasting, announced on Jan. 12, 1955, that in view of the success of the European television programme exchanges in 1954, the B.B.C. would establish a permanent two-way television link between London and the Continent "as a step towards making such exchanges a regular feature" The first section of the link, consisting of coaxial lines between London and St Margaret's Bay (Dover), would be ready for use before the end of 1955, but the next section—a two-way radio link across the English Channel—would take about three years to complete In the meantime, the permanent coaxial cables would be temporarily extended from St Margaret's Bay to Swingate, near Dover, where the B.B.C. and French services would provide and operate a temporary two-way link between Swingate and Cassel, in northern France. Sir George Barnes added that programmes had already been exchanged with France, Italy, Switzerland, Western Germany, Holland, Denmark, and Belgium, and that there was no reason why Yugoslavia, Norway, and Sweden should not soon be added to the list.

The first regular "Eurovision" programme was inaugurated during September, 1955

Increased Television Transmission Time. The B.B.C. announced on July 28 that from Sept. 19 television transmission time would be increased from 36 hours weekly to approximately 49 hours, whilst the number of separate programmes would be increased by about 20 a week From Sept 4 evening programmes would begin at 7.0 p.m. (weekdays) and 7.30 p.m. (Sundays) and would finish at between 10.30 and 11 p.m., whilst from Sept 19 afternoon programmes would last from 3 to 5 p.m. on Mondays-Fridays, from 2.30 to 5.0 p.m. on Saturdays, and from 2 to 5 p.m. on Sundays Saturday evening programmes would include sports news and results, and Sunday programmes would include a newsreel review of the week and orchestral concerts, ending with a religious programme Women's programmes would be given from 3 to 4 p.m. from Mondays to Thursdays, and children's television would run daily from 5 to 6 p.m.

V.H.F. Broadcasting. The B.B.C.'s first regular V.H.F. (Very High Frequency) broadcasts took place from the Wrotham (Kent) station on May 2, covering a radius of about 50 miles and serving a potential audience of 13,000,000

On Nov. 26, 1954, it had been announced that the plans for the new station at Tacolneston, Norfolk (see above) included provisions for V.H.F. sound transmission, whilst on Dec 22 Earl de la Warr (then Postmaster-General) stated that, on the advice of the Television Advisory Committee, the Government had agreed that Wenvoe (Glamorgan) should be added to the list of nine V.H.F. stations already authorized

B.B.C. European Services. Lord Reading (Minister of State, Foreign Office) announced on Dec 8, 1954, that the Government had "reluctantly decided" not to adopt the proposals of the Drogheda Committee (see 13602 A) to spend an additional £2,500,000 annually on the overseas information services, but would "adopt a modest and more sober plan of streamlining the existing services" As part of this plan, the B.B.C.'s European services would not be curtailed as recommended by the Committee, but would be maintained for a further year

On March 2, 1955, however, Lord John Hope (Under-Secretary, Foreign Office) stated in the House of Commons that although expenditure on the European services during 1955-56 would be maintained "at about the same level as in 1954-55," it would be necessary, in order to offset rising costs, to reduce the total daily time on the air by about three hours

Powers against Television Interference. Regulations were laid before Parliament on March 1 under the Wireless Telegraphy Act (see 9769 A) requiring refrigerators and domestic and industrial appliances driven by small electric motors (e.g. vacuum cleaners, hair-driers, and drills) to be effectively "suppressed" after Sept 1 1955, in order to prevent "interference" with sound radio and television programmes

The B.B.C. announced on March 9 that Lord Radcliffe had resigned as chairman of its advisory council, and that Mr Norman Fisher, formerly chief education officer for Manchester, and a member of the council, had been appointed to succeed him. On July 29 it was announced that Sir Edward Benthall, a former governor of the Imperial Bank of India, had been appointed to the B.B.C.'s board of governors *vice* Sir Ivan Stedeford, whose term of appointment expired on June 30.

A. SAUDI ARABIA - UNITED KINGDOM.—Buraimi Oasis Dispute. - Suspension of Arbitration Tribunal's Inquiry. - Resignation of British Member.

The membership of the international arbitration tribunal set up to consider the dispute between the United Kingdom and Saudi Arabia over the ownership of the Buraimi Oasis area was announced on Dec. 29, 1954, as follows: Dr. Charles de Visscher (Belgium), a former judge of the International Court of Justice, as chairman; Señor Ernesto de Dihaigo (Cuba); Dr. Mahmud Hassan (Pakistan); Sir Reader Bullard (British Ambassador to Persia, and formerly Minister to Saudi Arabia); and Sheikh Yusuf Yasin (the Saudi Arabian Deputy Foreign Minister). After a preliminary meeting at Nice in January, at which the tribunal invited the two parties to submit memoranda, the hearing of the dispute opened at Geneva on Sept. 11, 1955, the British Government being represented by Sir Hartley Shawcross, Q.C., and Professor C. H. M. Waldock, Q.C (Professor of International Law at Oxford), and Saudi Arabia by Dr. Azzam (the former secretary-general of the Arab League) and Judge Manley Hudson (U.S.A.). Proceedings from Sept 11-15, however, were not concerned directly with the boundary question, but with British allegations that the Saudi Arabian Government had sought to win the support of sheikhs and notables in the disputed area by means of bribery, and had engaged in gun-running.

Evidence was given on Sept. 11-12 by a number of sheikhs that they had been offered very large sums if they would transfer their allegiance from the Sheikh of Abu Dhabi and the Sultan of Muscat (the rulers whose claim is supported by the British Government) to Saudi Arabia, and by Captain Clayton (head of the police detachment sent into the zone by those rulers) that the Saudi Arabian police detachment in the Oasis was being used for political agitation On Sept 12 Sir Hartley Shawcross informed the tribunal that a Saudi Arabian aircraft had flown into the disputed area a few days before, without prior notification to the British Government, and had landed a political officer who had previously been responsible for the distribution of bribes, and whose return, he contended, was both a clear contravention of the arbitration agreement and a gross contempt of court. He therefore asked the tribunal to declare (1) that the Saudi Arabian Government should reduce the size of its police detachment, (2) that it should cease flying passengers into the disputed zone; (3) that Abdul Qureishi (the Saudi Arabian political officer responsible for the zone, then in Geneva) should be removed from office; and (4) that bribery and gun-running were contrary to the arbitration agreement

The arbitration proceedings were suspended *sine die* on Sept. 16 after Sir Reader Bullard had resigned as a protest against the conduct of Sheikh Yasin, who, he contended, had compromised the tribunal's position.

Sir Reader Bullard made the following statement to the tribunal: "I have always felt uneasy about the position of Sheikh Yusuf Yasin in connexion with these proceedings, but I had not realized until yesterday, when Sheikh Yusuf Yasin openly asserted the fact, that he himself was the Saudi Arabian official in charge of affairs at Buraimi, and that he accepted full responsibility for the conduct of Qureishi Moreover, in the last few days it has become abundantly clear that Sheikh Yusuf Yasin is, in fact, in effective control of the conduct of the proceedings on behalf of the Saudi Arabian Government, and is representing that Government on this tribunal rather than acting as an impartial arbitrator It has been established that the first thing Qureishi did on reaching Geneva was to see Sheikh Yusuf Yasin, and the subsequent course of events leaves no doubt in my mind that the Sheikh saw fit to brief him as to his evidence and conduct before the tribunal This I regard as completely vitiating the whole proceedings

"I have always regarded my own position as one of complete independence of the British Government, and this I know is the position which the British Government desires me to occupy. Indeed, I regard it as essential to any system of arbitration that each member of the arbitration tribunal should feel completely at liberty to give any decision he thinks right, including one against his own Government. I am afraid the position of the tribunal has been hopelessly compromised by the conduct of Sheikh Yusuf Yasin and by other distasteful matters which have come to notice. I do not think that the tribunal is any longer in a position to reach a unanimous or judicial conclusion on the matters before it, and I feel the only step I can take which is consistent with my own independence and honour is to tender my resignation."

Sheikh Yasin replied to Sir Reader Bullard in the following statement, issued on Sept 17: "I deeply regret that the resignation of Sir Reader Bullard has forced a suspension of the Buraimi arbitration proceedings just at the moment the tribunal was about to take a decision on the various complaints which had been laid before it by each side against the other. The tribunal has thus been frustrated in expressing its views on these charges. I have been a good friend of Sir Reader Bullard since he came to Jeddah as British Minister in 1937, and there is certainly nothing new to him in my position as Deputy Foreign Minister Throughout the history of the dispute I have been in charge of negotiations for my Government, and when arbitration was agreed upon Sir Reader and I together selected our three colleagues.

"The tribunal has always been aware that I have continued as Deputy Foreign Minister and head of the Political Department, dealing regularly with the British Government on problems relating to Buraimi. I have also been responsible for issuing instructions regarding the application of the arbitration agreement in the disputed area. My position has never been a cause for objections on the part of the neutral members, although the tribunal has been in existence for nine months and has held two full sessions It is to be regretted that only now, just before the tribunal was about to pronounce its first important decision, has Sir Reader Bullard found my position unsatisfactory and has prevented, by his resignation, any further action by the tribunal for the time being I hope that the British Government will make it possible for us to resume at an early date"

An allegation by Dr. Azzam that Sir Reader Bullard's resignation was an attempt by the British Government to "sabotage" the proceedings was emphatically denied on Sept. 16 by Sir Hartley Shawcross, who said that the British Government had fully expected the proceedings to end in a settlement of the dispute.

The British Foreign Office announced on Sept. 23 that it had received a letter from Dr. de Visscher stating that, following the resignation of Sir Reader Bullard, he had decided to relinquish his position as member and president of the tribunal. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Buraimi Oasis Dispute, 13743 C.)

B. UNITED STATES. — U.S. Overseas Investments. - Foreign Investments in the U.S.A.

Figures published by the U.S. Department of Commerce on Aug. 23 showed that U.S. investments in overseas countries in 1954 amounted to nearly $3,000,000,000, bringing the total of such investments on Dec. 31, 1954, to the record figure of $26,500,000,000. Earnings on American investments abroad also reached the new record level of $2,535,000,000.

Investments in Western Europe, it was stated, had been mounting at a rate of about $200,000,000 a year, and at the end of 1954 had reached a total value of $2,600,000,000, including $1,400,000,000 in manufacturing industries and about $700,000,000 in petroleum enterprises A "striking development" in 1954 and early 1955 had been the greatly increased purchases of European securities, net purchases of European corporate stocks in 1954 having amounted to $100,000,000 Total American holdings of foreign bonds and stocks reached $5,000,000,000 at the end of 1954, over 60 per cent being in Canada. The area of largest American direct private investment was Canada, where $700,000,000 was placed during the year, bringing the total for that country to nearly $6,000,000,000. In Latin America, direct private U S investment increased by about $200,000,000, bringing the total in that region to $6,300,000,000.

Direct U.S. private investment in major industries in European countries at the end of 1954 was as follows United Kingdom, $1,245,000,000, France, $333,000,000; Western Germany, $278,000,000; Netherlands, $140,000,000; Italy, $121,000,000; Belgium, $117,000,000; Sweden, $84,000,000; Spain, $49,000,000; Norway, $40,000,000, Denmark, $38,000,000, Switzerland, $35,000,000, Anstria, $24,000,000, Portugal, $23,000,000; Finland, $14,000,000; other European countries, $64,000,000

Foreign long-term investments in the United States reached the record total of $11,000,000,000 at the end of 1954, an increase of $1,800,000,000 on Dec. 31, 1953. These foreign-held investments—which were additional to $15,700,000,000 of liquid dollar reserves and working balances held in the U.S.A. by foreign Governments, private businesses, and individuals —comprised foreign-controlled enterprises with a book value of $4,000,000,000, corporate securities with a market value of $5,500,000,000, and $1,500,000,000 in the form of estates and trusts, real estate, and miscellaneous items. Of the total, $7,300,000,000 was owned by Western European countries, $2,300,000,000 by Canada, and $800,000,000 by Latin America. Earnings of foreign countries on their long-term U.S. investments in 1954 amounted to $500,000,000, of which $340,000,000 was earned by European countries and $120,000,000 by Canada. (New York Times - New York Herald Tribune)

(Prev. rep. Overseas Investments, 13254 B.)

C. PAKISTAN.—General Mirza appointed Governor-General. - Resignation of Mr. Ghulam Mohammad.

It was officially announced in Karachi on Sept. 19 that Mr. Ghulam Mohammad, then on sick leave, had resigned the Governor-Generalship of Pakistan because of ill-health; that the Queen, on the recommendation of the Pakistani Government, had appointed Major-General Iskander Mirza, the acting Governor-General, as Mr. Ghulam Mohammad's successor; and that Major-General Mirza would become Governor-General of Pakistan as from Oct. 6, on which date Mr. Ghulam Mohammad's resignation would take effect. (Pakistan High Commissioner's Office, London)

(Prev. rep. Governor-Generalship, 14371 A.)

A. AUSTRALIA. — The Petrov Case. - Report of Royal Commission on Soviet Espionage in Australia.

The Royal Commission set up in April 1954 to study the disclosures made by Mr. Vladimir Petrov, the former official at the Soviet Embassy in Canberra, and to investigate the general question of Soviet espionage in Australia, published its report on Sept. 14, 1955. The Commission, which had sat for 112 days and heard 119 witnesses, held preliminary hearings in Canberra on May 17-19, 1954, and in Sydney on June 11, and then sat in Melbourne from June 30 to July 23. It subsequently resumed in Sydney on Aug. 16, 1954, and held the remainder of its sittings there, hearing the last of the witnesses on March 31, 1955.

The main question considered by the Commission in the early months of its inquiry was the authorship of "Document J," one of the documents from the Soviet Embassy which Petrov had turned over to Australian security officials on seeking asylum in Australia. This contained the names of a number of journalists who originally worked in the press gallery in Canberra and who (it was apparently thought) might be useful for obtaining information "off the record." It was described by Mr Windeyer, the Australian Government's chief counsel, as "a farrago of fact, falsity and filth." After hearing a number of witnesses over a period of several weeks the Commission published an interim report on Oct. 26, 1954, in which it said that "Document J" had been written by one Rupert Lockwood, a Communist journalist of Sydney. Lockwood himself had refused to answer any questions when summoned before the Commission on July 9 and 12, and had applied for an injunction (rejected by the High Court) compelling the Commission to suspend its inquiry on the ground that its setting-up was unconstitutional

In view of Lockwood's refusal to testify before the Commission, a special Bill to strengthen the Commission's powers was introduced in the Federal Parliament by the Prime Minister, Mr Menzies, and passed through all its stages on Aug. 11-12, 1954 It provided for a penalty of three months' imprisonment for each refusal by a witness to answer questions before the Commission, and made the offence punishable summarily by the High Court as if it were contempt of the High Court itself It also provided that no action for defamation could be brought against the Commonwealth Government or its representatives for publishing transcripts of the Commission's proceedings or any report made by the Commission, and extended the same protection to newspapers and radio stations publishing fair and accurate reports of the proceedings [This second provision had been inserted because Lockwood had begun an action claiming £A.10,000 damages for libel from the Commonwealth Government and Mr. Windeyer, which was founded on the transcript of the Commission's proceedings Mr. Menzies indicated that the Bill would render these actions fruitless.] The Bill nevertheless contained the overriding provision that no-one would be penalized for anything done before the operation of the new legislation to which he would not have been liable had the new Bill not been passed. Lockwood was subsequently recalled before the Commission and admitted having supplied most of the information in "Document J" and having written part of it.

During the course of the investigation into the authorship of "Document J," Dr. Evatt, Q.C. (Leader of the Australian Labour Party), who was appearing in his legal capacity on behalf of two members of his staff—Mr. Alan Dalziel and Mr. Albert Grundeman, whose names had been mentioned and who had been summoned as witnesses—alleged that the defection of Petrov and the subsequent events were all part of a conspiracy to malign the Labour Party in general and himself in particular before the general elections (held on May 29, 1954). He refused, however, to substantiate his charges when called upon to do so, and after further differences between himself and the Commission (notably with regard to Mme. Ollier—see below) he was refused permission to appear before it as counsel on the ground that his duties as Leader of the Opposition in the Federal Parliament conflicted with his duties as counsel before the Commission Dr. Evatt's appearance before the Commission also brought to a head a conflict within the Australian Labour Party about the leadership of the party, but at a meeting of the Parliamentary Labour Party on April 18, 1955, Dr Evatt was confirmed in his position as leader (see 14178 A).

The principal witnesses called before the Commission—apart from those mentioned above—included **Mr. and Mrs. Petrov**; **Mr. G. R. Richards,** deputy director of the Australian Security Service, who had negotiated with Petrov about his decision to seek asylum in Australia, **Dr. Michael Bialoguski,** a naturalized British subject, formerly of Polish nationality, who had worked with the Australian Security Service while pretending to be a Communist sympathizer; **Mr. Fergan O'Sullivan,** a journalist and press secretary to Dr Evatt in 1953-54, who admitted to being author of "Document H," which contained names of people from whom information might possibly be obtained by Soviet agents; **Mr. W. S. Clayton,** a New Zealander, formerly one of the four members of the central committee of the Australian Communist Party; **Mr. F. G. Rose,** a farmer, who went to Australia from Britain and worked in several Government departments, **Mr. Harry Bocquet,** secretary in Victoria of the Eureka Youth League, a Communist-inspired organization; **Miss June Barnett,** assistant official secretary to the Australian High Commissioner in New Zealand, who admitted to having been a Communist in 1944-48 but who said that she had resigned shortly before joining the public service; **Mr. Reginald Dixon,** National President of the Communist party in Australia, and **Mr. W. H. Bird,** Victorian secretary of the Seamen's Union and a member of the Communist Party.

Another person whose name was mentioned in the course of the inquiry was **Madame R. M. Ollier,** formerly Second Secretary at the French Embassy in Canberra It was announced on Sept. 3, 1954, that Mme Ollier had been arrested at Nouméa, New Caledonia, and would be tried in France on a charge of a breach of French internal security in view of evidence given at a secret session of the Commission by Mr. Petrov The latter had alleged that Mme. Ollier had supplied him with secret information about the loading of arms in Australia and New Zealand for the French forces in Indo-China It was subsequently announced in Paris on Jan 4, 1955, that Mme Ollier had been released from prison on bail after the charge against her of "having intelligence with a foreign Power" had been dropped on the ground that it was "exaggerated." It was stated, however, that she remained charged with "failing to reveal acts of espionage." A public protest by Dr Evatt on Sept. 4, 1954, against the arrest of Mme Ollier was the immediate cause of his being debarred from appearing as counsel before the Commission on Sept. 7.

The Royal Commission found that all the documents handed over by Petrov to the security service were genuine, and said that the evidence of Petrov himself, and of Mrs. Petrov, was truthful. They admitted, however, that the volume of facts about which the Petrovs had been questioned was so enormous that it was not surprising that "occasionally their memories were at fault about dates and the sequence of events, and sometimes they differed between themselves in their recollections." They found that at least two independent Soviet espionage systems had been operating in Australia, finding their helpers among Australian Communists and Communist sympathizers, though the Soviet Union had deliberately refrained from using the Australian Communist party for purpose of espionage lest exposure should lead to political embarrassment and possibly to the party's outlawry. The Commission also found that, because of the state of the Australian law on espionage and the admissibility of evidence, it appeared that the prosecution of none of those whose actions it had considered would be warranted. In this connexion the Commission expressed the view that the law of Australia was inadequate to combat espionage, especially in peace-time.

A summary of the Commission's findings is given below under cross-headings.

Organization of Soviet Espionage in Australia. From the documents handed over by Petrov it "plainly appeared" that for many years the U S S R. had been using its Embassy in Canberra as a cloak under which to control and operate espionage organizations in Australia Each of these organizations was controlled directly from a special Moscow centre which conducted its operational work secretly and independently of the Soviet Foreign Office and of the Ambassador. They comprised the G R.U., which was concerned with naval, military, and air espionage, and the M.V.D, which was established in Australia in 1943 and functioned until April 1954, dealing with all other forms of espionage As the G.R.U was carefully "insulated" from the M V D, the Commission could not say whether it was still operating in Australia; it considered, however, that in view of the importance of Australian developments in guided missiles, it would be unwise to assume that the G R U. had not been operating in Australia since the departure of the Soviet Embassy from Canberra It stated that Petrov was of the opinion that the G.R.U was still operating.

The first task of the M.V D. was to discover persons who had access, directly or indirectly, to confidential information useful to the Soviet Union, and from whom it might obtain such information by inducement, pressure, or unwitting disclosure Of the many names submitted by the M V D. in Australia, its Moscow centre selected those of at least 120 Australians as being of interest, and allotted code names to 40 of them. The Moscow centre also kept under close surveillance the many Australians who visited the Soviet Union and other Communist-controlled countries, particularly members of delegations to various "peace" and "youth" congresses, in respect of whose visits the Soviet Union had contributed very large sums of money The object of this surveillance was twofold—to select possible helpers and to detect possible counter-intelligence agents.

The work of the Soviet "resident" in Canberra, who controlled the M V D organization, assisted by his cadre workers and collaborators, was (*a*) to report to the Moscow centre upon persons in Australia who might be of interest to the M V.D.; (*b*) to "study" such persons with a view to using them as witting agents or unwitting helpers or informants; (*c*) to obtain useful confidential information through such agents, helpers, or informants. "The evidence clearly shows," the report said, "that it was only among Communists (in which term we include Communist sympathizers) that the M.V.D. could expect to find in Australia willing helpers. The only Australians who, so far as the evidence shows, knowingly assisted Soviet espionage directly or indirectly were Communists." The report pointed out, however, that in the hope of finding witting or unwitting informants or helpers the M.V.D. had sought to make "contacts" amongst persons in all walks of life, particularly amongst public servants, members of foreign diplomatic missions, members of Parliament, journalists, persons engaged in commerce, scientists, and emigrés from the Soviet Union or other Communist-controlled countries

Role of the Australian Communist Party. The Commission believed that the Soviet Union had deliberately refrained from using the Australian Communist party for espionage purposes "lest exposure should lead to its serious political embarrassment and possibly to its

outlawry." The report nevertheless emphasized that "without Communism Australia would be barren soil in which Soviet espionage could not even take root, let alone flourish." "It is a deplorable thing [it went on] that in a country like Australia there should be any need of a security service, but it is a hard, cold matter of fact that its justification and necessity spring from the Soviet's attempted exploitation of Communism here for espionage and fifth-column purposes."

The Commission said that although the Communist party pretended to be merely an Australian political party, there was evidence that some of the "strings" which activated it were held in Moscow, and that its auxiliary force comprised some persons whose role it was to conceal their Communist affiliations and sympathies and to operate in the guise of loyal Australian citizens. This class of persons provided the most dangerous pool of helpers in "fifth-column" espionage work, and it was to it that Moscow usually looked for aid. The Commission recorded that $25,000 [in U.S. currency] was paid to Mr Laurence L. Sharkey, secretary of the Australian Communist party, by the Soviet Embassy in October, 1953, to recoup the party for the expenditure it had incurred in its campaign to defeat the 1951 referendum on the proposal to give the Commonwealth Government power to make laws for combating Communists and Communism.

Attempt to gain Information from Department of External Affairs. The M.V.D. had made special efforts to gain access to confidential information in the hands of the Department of External Affairs. In 1948 information then in the hands of the Crown gave rise to suspicions that security measures in Australia, particularly in the Department of External Affairs, were inadequate, and it was in consequence of this that Mr Chifley (then Prime Minister) had formed the present security service Petrov knew only the bare facts that leakages of confidential information from the Department of External Affairs had occurred between 1945 and 1948, and that "Klod" was the code name of the Australian agent involved. The Commission said that the material before them clearly showed that the suspicions held in 1948 were well-founded, and that "Klod" was Walter Seddon Clayton, who during the relevant years (1945-48) was a functionary of the Australian Communist party and an active agent of the M.V.D. Clayton had continued his "agent" activities at least into 1950, but apparently with no success in the later years.

The Commission said that their inquiry had disclosed no trace of any significant leakage of information from the Department of External Affairs since 1949, although it was evident from the Moscow letters that penetration of that Department had remained throughout a principal aim of the M.V.D.

Role of O'Sullivan and Lockwood. So far as the Commission could learn, the M.V.D. had no success after 1949 in gaining any information directly involving the security or defence of Australia, but it had pursued its operations and had some success in matters indirectly affecting the security of Australia, particularly in building up its network Examples were the procuring of Exhibit "H" in 1951 and of Exhibit "A" in 1953 from O'Sullivan and Lockwood respectively The acts of these men, the Commission declared, were indirectly prejudicial to the security of Australia, not only because of the information they gave, but also, and more importantly, because, by giving it, O'Sullivan was "on the small hook" (i.e. he had taken the first compromising step which made him vulnerable to future pressure) and Lockwood had more deeply compromised himself.

Role of Mme. Ollier. Before and after Petrov's arrival in Australia, a most important design of the M.V.D. had been to obtain through Mme Ollier, a French Embassy cipher clerk, French cipher books and a knowledge of French cipher technique In pursuance of this design, Pakhomov (a Tass representative in Australia), and later Petrov, had had a number of secret meetings with Mme. Ollier, the last being in March, 1954, but had failed to attain their object. "Petrov's defection," the report declared, "exposed and frustrated their design"

Establishment of Soviet "Fifth Column." In June 1952 international tensions were such that war involving Australia and the Soviet Union was not improbable, said the report. The "plan of work" had directed Petrov to intensify the general M.V.D. activities in Australia and immediately to set about the establishment of an espionage organization or "fifth column" which could operate in Australia if war destroyed the existing organization by causing the withdrawal of the Soviet Embassy The "plan of work" involved preparation for the planting in Australia of M.V.D. "illegal workers" who would enter Australia undetected in the guise of ordinary immigrants. Some work of this kind had been carried out by the M.V.D., but otherwise little of the "plan of work" had been performed. So far as the Commission was aware, no G.R.U. or M.V.D. organization of this type had operated in Australia since Petrov's defection.

The Royal Commission's report was strongly attacked by Dr. Evatt, who declared that "all Australians will share surprise at the failure of the Commissioners to expose one of the most transparent frauds in modern history."

"The Petrov affair of the 1954 elections," said Dr. Evatt, "will be regarded in future as far worse than the notorious Zinoviev letter, timed to defeat the British Labour Government in 1924. The Petrov-Bialoguski scandal is far worse, because so many McCarthy-like smearings of loyal Australians appear to have been organized by anti-Labour groups through agents and informers Clearly the investigation of the Petrov affair must be pursued until the truth is finally revealed. That course I propose to take, asking for the full support of every Australian who believes in justice, especially at a time when the apparatus of the police state threatens the basic right of full freedom of political opinion and political expression."

In a further statement on the following day (Sept. 15) Dr. Evatt said that Mr. Menzies had suggested to Parliament in 1954 that Petrov had suddenly sought asylum, when in fact the security service, through Dr. Bialoguski, "their well-paid agent," had prepared and nurtured him for more than two years. Dr. Evatt alleged that the payment of £A 5,000 to Petrov and the existence of Dr. Bialoguski were facts which had been "well concealed" until after the general election.

Mr. Menzies, in reply to questions in the Federal Parliament on Sept. 15, described Dr. Evatt's statement as "a miserable attack not only on the judges but on the witnesses." The three judges, he emphasized, had found the Petrovs to be accurate, truthful people. To the "chagrin of Dr. Evatt" the judges had also found that the security service, "whose implacable enemy Dr. Evatt now was," had been so effective since 1949 that it had prevented any disclosures from official sources. Mr. Menzies said that the Petrovs were still being maintained at Government expense and that they were supplying intelligence information of value in combating Soviet espionage not only in Australia but throughout the world.—(Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - New York Times - Le Monde, Paris)

A. INDIA. — Steel Industry. - New Steel Plant to be built with British Assistance.

The Government of India announced on Aug. 23 that it had accepted the recommendation of a British technical mission that a steel plant should be built in India with British assistance at a cost of 1,100,000,000 rupees (about £82,000,000). The plant, when completed, will have a capacity of 1,000,000 tons of steel a year and will enable India to increase her steel production to 6,000,000 tons a year, the target envisaged in the second Indian Five-Year Plan. It will be the third steel plant to be owned by the Government of India, the other two being those to be built at Bhilai (Madhya Pradesh) with Soviet assistance and at Rourkela (Orissa) with German assistance (see 14103 A).

The Commonwealth Relations Office in London had announced on March 24 that the Government of India had asked the U.K. Government to send a steel mission to India to advise on the establishment of a third steel plant (i.e. additional to those at Bhilai and Rourkela) and to study such matters as the capacity of the proposed plant, costs of production, the processes to be employed, the range of end-products, arrangements for the training of Indian personnel, etc. It was stated that the U.K. Government had agreed to send such a mission under the Technical Co-operation Scheme of the Colombo Plan, and that the mission, after completing its studies, would present its report and recommendations to the Government of India.

The mission was headed by Sir Eric Coates, a former chairman of the Overseas Food Corporation and former deputy chairman of the National Coal Board, and a former Finance Minister of the Government of India. The seven other members, all of whom were responsible for specialized matters, were: Dr. T. P. Colclough (general technical adviser), consultant to the British Iron and Steel Federation; Mr. G. N Hewitt (electrical member), of McClellan and Partners, London, Mr W. W. Franklin (rolling-mill investigations), of Davy and United Engineering Co. Ltd.; Mr. T. H. Stayman (blast furnace investigations), of Head, Wrightson and Co. Ltd.; Mr. D. T. Barritt (coke-oven investigations), of Simon-Carves Ltd.; Mr. V. G. Burley (steel-making equipment), of the Wellman Smith Owen Engineering Corporation, and Mr. M. D. J. Brisby (technical assistant and secretary), of the British Iron and Steel Federation. The mission arrived in Delhi on April 3 and returned to London at the beginning of May.

The mission stated in its report that the construction of a plant with an annual capacity of 1,000,000 tons of steel ingots would be technically sound and economically profitable, a conclusion accepted by the Government of India. Although a number of alternative sites were examined, no definite recommendation was made for the location of the British-built plant; it was, however, understood that the mission had given special consideration to Durgapur, in West Bengal (see 14430 A) and Sindri, in Bihar (see 12077 A), and that the final decision would be taken after consultations with the Governments of these two States.

It was stated in Delhi that the main products of the British-built plant would be medium and light sections, rolling-stock parts, and pig-iron; that the Soviet-built plant at Bhilai would produce mainly rails and heavy sections; and that the German-built plant at Rourkela would produce flat products such as steel plates and sheets.—(The Statesman, Calcutta - The Hindu, Madras - Financial Times, London)

A. INDONESIA. — Resignation of Sastroamidjojo Cabinet. - New Coalition Government formed by Mr. Harahap. - State of Emergency in South Moluccas.

The Indonesian Cabinet headed by Dr. Sastroamidjojo resigned on July 24 as the result of a dispute between the Government and the Army leaders, who had refused to accept the new Chief of Staff nominated by the Defence Minister. After the failure of attempts to form a Ministry including representatives of the two leading parties, the Moslem Party (*Masjumi*) and the Nationalist Party (P.N.I.), a coalition government from which the P.N.I. was excluded was formed on Aug. 11 by Mr. Harahap, a member of the *Masjumi* executive.

Following the resignation on health grounds of the Chief of Staff, Major-General Sugeng, the Government announced on June 26 that Colonel Utojo, divisional commander in South Sumatra, had been appointed to succeed him and had been promoted to the rank of major-general. The majority of the senior officers, however, headed by Colonel Lubis (the Deputy Chief of Staff), protested to President Sukarno against Major-General Utojo's appointment, on the grounds that it had been made for political reasons and that he did not possess the necessary qualifications. When their protest was rejected, the officers refused to recognize the authority of Major-General Utojo; Colonel Lubis was suspended on June 28 on a charge of insubordination, but refused to give up his post. A number of proposals for a compromise settlement were put forward by the Government (from which the Defence Minister, Mr. Sumantri, resigned on July 14) but were rejected or ignored by the Army leaders, and the Cabinet accordingly resigned on July 24. Dr. Sastroamidjojo had held office since July 30, 1953, a longer period than any previous Indonesian Prime Minister.

In the absence of President Sukarno, who was making a pilgrimage to Mecca, Vice-President Hatta invited Dr. Wilopo (P.N.I.), Dr Sukiman (*Masjumi*), and Dr. Asaat (Independent) to co-operate in forming a new Government. Although agreement was reached that Dr. Hatta should himself head an interim Government pending the holding of elections, which had been fixed for Sept. 29, negotiations broke down over the constitutional position, as the P.N.I. insisted that Dr. Hatta should resign the Vice-Presidency before forming a Government. Dr. Hatta then entrusted the formation of a Ministry to Mr. Harahap, who announced the membership of his Government on Aug. 11.

The new Ministry, which was regarded as more conservative than its predecessor, was supported by 140 of the 231 members of Parliament. Its main support was drawn from the six parties and groups which had previously been in opposition: viz., the *Masjumi*, the Socialists, the Christian (i.e. Protestant) Party, the Catholic Party, the Democrats, and that section of the Greater Indonesian Federation (P.I.R.) which had been led by Professor Hazairin since the split in the party in November 1954 (see 13958 C). Moreover, in addition to the Indonesian People's Party (P.R.I.), which is not represented in Parliament, the five parties which had previously supported Dr. Sastroamidjojo were also represented in the new Government: viz., the Moslem Association (*Nahdlatul Ulama*), the Moslem Political Federation (P.S.I.I.), the National People's Party (P.R.N.), the Greater Indonesia Party (*Parindra*), and the Labour Party. The membership of Mr. Harahap's Government was as follows:

Mr. Burhanuddin Harahap (*Masjumi*)	Prime Minister and Defence.
Mr. Djanu Ismadi (P.I.R.)	First Vice-Premier.
Mr. Harsono Tjokroaminoto (P.S.I.I.)	Second Vice-Premier.
Mr. Anak Agung Gde Agung (Democrat)	Foreign Affairs.
Mr. Sunarjo (Moslem Association)	Home Affairs.
Dr. Sumitro Djojohadikusomo (Socialist)	Finance.
Mr. Kasimo (Catholic)	Economic Affairs.
Mr. Suwandi (*Parindra*)	Education.
Mr. R. P. Soeroso (*Parindra*)	Public Works.
Mr. S. Laoh (P.R.N.)	Communications.
Mr. Sardjan (*Masjumi*)	Agriculture.
Mr. Tedjasukmana (Labour Party)	Labour.
Mr. Leimena (Christian)	Health.
Mr. Sjamsuddin Makmur (P.I.R.)	Information.
Mr. Sudibjo (P.S.I.I.)	Social Affairs.
Mr. Gunawan (P.R.N.)	Agrarian Affairs.
Mr. Hadji Iljas (Moslem Association)	Religious Affairs.
Mr. Lukman Wiriadinata (Socialist)	Justice.
Mr. A. Hakim (*Masjumi*)	Minister of State for Defence.
Mr. Sutomo (P.R.I.)	Minister of State for Ex-Servicemen's Affairs.
Mr. Asaruddin (Labour Party)	Vice-Minister for Communications.
Mr. Cumala Noor (P.I.R.)	Minister of State without portfolio.

Mr. Harahap (38), a lawyer, is the youngest Prime Minister yet appointed in Indonesia. In a policy statement on Aug. 11 he promised to re-establish the confidence of the Army in particular and the people in general in the Government, to combat corruption and inflationary tendencies, to proceed with the general elections according to schedule, and to implement the laws relating to the decentralization of governmental powers as soon as possible. In foreign affairs the Government would pursue "an independent and active policy aiming at world peace," and laying particular emphasis on co-operation with Asian and African countries. It would also continue the struggle for the incorporation of West Irian (Dutch New Guinea) in the Indonesian Republic.

In order to conciliate the Army leaders, the new Government accepted Major-General Utojo's resignation on Aug. 15, reinstated Colonel Lubis as acting Chief of Staff, and decided to abandon all investigations into the attempted military *coup* of October, 1952 (see 12744 A). During the Cabinet crisis the Army leaders had announced that they would launch a drive against "elements suspected of corruption," and on Aug. 4 military police, acting without legal authority, arrested Mr Van Dulken, deputy head of the Foreign Exchange Institute. Mr. Gondokusumo, Minister of Justice in Dr Sastroamidjojo's Cabinet, and his secretary were also arrested on Aug 12 by military police, with the acquiescence of the new Government. The arrest of Mr. Gondokusumo—who, like Mr. Van Dulken, was charged with illegal dealings in foreign exchange—weakened the new Government's position, as the National People's Party, of which he is chairman, threatened to go into opposition unless he were released.

On Jan. 5, 1955, the Indonesian Government had proclaimed a state of emergency in the islands of Ceram, Boane, Manipa, Haruka, Saparua, Nusa Laut, Watubela, and the Aru and Kei groups, and had given military commanders full powers to "deal with disruptive elements belonging to the self-styled 'Republic of the South Moluccas'." A spokesman of the Indonesian Embassy in The Hague denied that "a condition of war" existed in the South Moluccas; stated that there was "merely some trouble, and a certain amount of infiltration by rebellious elements—remnants of the former Netherlands East Indies Army (K.N.I.L.)—on Amboina"; and explained that the state of emergency had been extended over a wide area in order to facilitate the capture of rebels who had fled from Amboina and Ceram.

The "Republic of the South Moluccas" had been proclaimed in April 1950 after a *coup d'état* on Amboina by former K.N.I.L. troops (see 10797 A). Indonesian troops reoccupied Amboina in the following November, but sporadic guerrilla activity continued, and the insurgents made several attempts to obtain arms from Australia. According to unofficial and unconfirmed reports, a revival of rebel activity had occurred in November 1954, heavy fighting was said to have taken place on Amboina (which had remained under a state of emergency since 1950), and the rebels were said to have seized control of part of Ceram.

The commander of the Moluccas military area, Lieut.-Colonel Sukawati, stated on Jan. 19, 1955, that no fighting was in progress, and that a state of emergency had been proclaimed to counter possible infiltration from outside. He said that six people had been arrested in December who, he alleged, had proved to be "infiltrators sent by the Dutch" from New Guinea, and that some 60 rebels had been arrested in all, including several Dutchmen. Reports that Netherlands citizens had infiltrated illegally into Indonesia, partly by submarine landings, were denied on Jan 20 by Mr. Luns (joint Netherlands Minister of Foreign Affairs with Dr. Beyen), who declared that there were no Netherlands submarines in Indonesian waters. According to later reports, a number of the rebels were believed to be still at large on Ceram at the end of August, among them Dr Sumokil, the original leader of the rising.

The trial of 12 of the rebel leaders opened before a military tribunal on March 1, 1955, and concluded on June 9, when all the prisoners were found "guilty" and sentenced to terms of imprisonment ranging from three to 10 years. D. J. Samson, the rebel "Chief of Staff," was sentenced to 10 years' imprisonment; Thomas Jussy, the "C.-in-C." of the rebel forces to seven years; Albert Wairisal, the "Prime Minister" of the South Moluccas, to five years; and Johannes Manusama, "President of the South Moluccan Republic," to four years. (Indonesian Embassy Press Department, London - Netherlands News Agency - Times - New York Times) **(Prev. rep. Cabinet, 13958 C; South Moluccan Rising, 11179 A.)**

B. UNITED STATES. — Increase in Bank Rate.

The Federal Reserve Banks in New York, Chicago, Richmond, Kansas City, Dallas, and San Francisco raised their rediscount rate on Sept. 8 from 2 to 2½ per cent, following similar action by the Reserve Banks in Cleveland, Atlanta, St. Louis, and Philadelphia. The remaining two Federal Reserve banks—in Boston and Minneapolis—subsequently followed suit.
(New York Herald Tribune) **(Prev. rep. 14368 A.)**

OCTOBER 1—8, 1955

A. MIDDLE EAST. — Czechoslovak Arms Supplies for Egypt. - Statements by Colonel Nasser. - Soviet Support for Egyptian-Czechoslovak Agreement. - Western Powers' Concern at Possibility of Middle East "Arms Race." - Israeli Protest to Czechoslovakia. - Arab and Israeli Reactions to Mr. Dulles' "Peace Plan."

The Egyptian Prime Minister, Colonel Nasser, announced in a broadcast on Sept. 27 that a commercial agreement had been signed under which Czechoslovakia would supply arms to Egypt in exchange for such Egyptian products as cotton and rice. He said that the Egyptian Government had taken this step after its "repeated failure" to obtain arms from the Western countries on conditions compatible with the aims of the Egyptian revolution. Czechoslovakia, on the other hand, had offered to supply arms to Egypt without any conditions and on the basis of a "purely commercial agreement," and this offer had been accepted.

A statement on Egypt's decision to obtain arms from Czechoslovakia was made by Colonel Nasser on Oct. 2 to the Cairo correspondent of *The Times* (London), in which the Egyptian Prime Minister emphasized that the decision would not open the door to Communist influence in Egypt.

Colonel Nasser said that the sole reason for the conclusion of the agreement with Czechoslovakia was Egypt's "genuine fear" that Israel was planning to extend her frontiers He (Colonel Nasser) had been "feeling insecure" since the Gaza incidents in February last (see 14157 A), and this feeling of insecurity had been heightened in recent months by the speeches of Mr. Ben-Gurion during the election campaign in Israel, by the speeches of other Israeli "extremist leaders" who had spoken of the expansion of Israel, by the arms supplies received by Israel—"Sherman tanks from Britain and fighters, tanks and medium artillery from France"—and by the "constant threats against the Egyptian position at Gaza" Egypt felt that she could not rely upon external aid or protection, as the United Nations was "impotent" and the British-U S -French tripartite agreement of 1950 was "useless," and had therefore sought arms wherever she could get them

Egypt (Colonel Nasser continued) had been trying "from the first day of the revolution" to obtain arms from the Western countries without prior conditions being attached, but she had been "rebuffed" He would have preferred to buy arms from Britain, as the Egyptian Army had formerly been equipped with British material, but although Britain had supplied some arms, the quantity was not nearly enough for Egyptian needs France had agreed to supply aircraft, guns, and tanks, but had delivered only a few tanks before cancelling the agreement on the ground of Egyptian interference in North African affairs (see 14452 B) The United States, he alleged, had at first been prevented from selling arms to Egypt by "British influence," and had later insisted that membership of a mutual security pact was a pre-requisite for the supply of arms. In these circumstances Egypt had to seek arms wherever she could get them, and in June last he had warned the British and U.S Ambassadors that Egypt would have to get them from the "Iron Curtain" countries if she could not obtain them from the West. Accordingly he had approached both the Soviet Union and Czechoslovakia, and an agreement had eventually been concluded with the latter country. There was no agreement with the U S S.R., although that country knew of and approved the Czechoslovak-Egyptian agreement.

Colonel Nasser stressed that the supply of arms from an "Iron Curtain" country would not mean any expansion of Communist influence in Egypt He declared in this connexion: "We are strong enough to cope with all internal subversion, including Communism. Communism is banned in Egypt. We have five or six underground Communist organizations, but we know all about them. They have no able leadership. Many other Communists are in prison"

Asked whether the supply of arms by Czechoslovakia would lead to an arms race in the Middle East, Colonel Nasser said that there was already "a one-sided arms race with Israel getting all the armaments." He stressed that the two aims of his policy were defence against external aggression and security against internal subversion, that he had "no aggressive intentions at all", and that Egypt's foreign policy had two objectives—"to be completely independent ourselves, and to help others to self-determination" Because Egypt was obtaining arms from Czechoslovakia, it did not mean that the Egyptian Army would in future be equipped throughout from the "Iron Curtain" countries, Egypt had no fixed policy for re-equipment, "because these decisions do not lie with us but with the great Powers who control arms production"

In a speech on Oct. 2 to Egyptian military cadets, Colonel Nasser attacked the Western Powers for having, he alleged, denied arms to Egypt whilst at the same time arming Israel. He also claimed that the Egyptian Government were in possession of secret British and French military intelligence documents showing the extent of Western aid to Israel.

After declaring that "the Israeli aggression organized by Ben-Gurion on Feb. 28" had been an "alarm bell" for Egypt, Colonel Nasser accused the Western Powers of having "armed Israel and refused to arm us so that we should remain under their yoke and sphere of influence and at their mercy." He added "We shall go ahead with our plans to arm ourselves. We shall go ahead with our policy of building up a strong army to defend our frontiers, but not for aggression. I repeat—we have no intention of creating unrest in the Middle East. We do not want war, but a strong army to protect our frontiers."

As regards the alleged secret British and French documents in Egyptian hands, Colonel Nasser said that the French document showed that British and American military equipment for the Israeli armed forces comprised 120 aircraft, 115 tanks, 100 armoured cars, 70 25-pdr guns, and other equipment; the aircraft included 20 *Meteor* jet fighters, 50 *Mustang* fighters, and 20 *Mosquitos*, whilst the tanks included 100 American *Shermans* and 15 British *Churchills*. In addition, Israel was negotiating with Britain for the supply of further *Meteors* and of *Centurion* tanks

The British document, according to Colonel Nasser, had been published by the General Staff of the War Office in May, 1955, and contained the following appraisal of the situation on the Egyptian-Israeli border "The Egyptian Government will probably do their best to avoid war, the manner of their reinforcements of the Sinai frontier after the Gaza incident did not suggest aggressive intentions. There is less confidence that the Israeli Government will decide to continue a long-term and co-existence policy of restraint. After receiving a report from their own sources that the Israelis were about to occupy the Gaza strip, the Syrian military authorities instructed their forces to be prepared to attack the Israelis immediately if the latter attacked Egypt." According to Colonel Nasser, Israel had intended to launch a full-scale attack on Egypt after Feb. 28, but had refrained from doing so when she learned that the Syrian Army had received instructions to attack Israel in the event of an Israeli attack on Egypt.

A spokesman of the British War Office said on Oct. 4 that there would be an investigation into Colonel Nasser's statement that he had in his possession a secret British Intelligence report. The spokesman confirmed that there was such a document, and added that its contents could not be disclosed. In Paris, a spokesman of the Quai d'Orsay said that nothing was known of the French secret document which Colonel Nasser claimed to possess, and that alleged photostats published in the Egyptian Press appeared to reproduce nothing more secret than extracts from French and British military magazines or reviews.

Prior to the announcement that Czechoslovakia would supply arms to Egypt, Mr. Dulles had stated on Aug. 30 that the U.S. Government had received unofficial but reliable reports that the Soviet Union had offered to supply arms to countries in the Middle East. After a meeting in New York on Sept. 27 between Mr. Dulles and Mr. Macmillan (the British Foreign Secretary, then attending the 10th session of the U.N. General Assembly), it was announced that the U.S. and British Governments had "for some time been in close consultation with each other, as well as with other Governments," on matters "relating to their arms supply policy in the Middle East," and that there was "complete harmony of views" between the two Governments. The statement added:

"Both Governments base their policies on the desire, on the one hand, to enable the various countries [of the Middle East] to provide for internal security and for their defence, and on the other to avoid an arms race which would inevitably increase the tensions in the area. They will continue, and hope that other Governments will continue, to be guided by these principles" The British spokesman, Sir George Young, commented that the reference to "other Governments" certainly included Russia

Mr. Macmillan had a meeting on the same day (Sept. 27) with M. Molotov, at which, it was understood, he enlarged on the objections to any action likely to precipitate an arms race in the Middle East. Mr. Dulles stated on Oct. 4 that he had had two meetings with M. Molotov at which he had expressed the U.S. Government's view that arms deliveries by the Communist countries to Middle Eastern States "would not contribute to relaxing tensions." The "grave concern" of the Western Powers at Egypt's decision to buy arms from "Iron Curtain" countries was expressed to Colonel Nasser on Oct. 1 by the British and French Ambassadors in Cairo (Sir Humphrey Trevelyan and M. du Chayla) and by Mr. George V. Allen, U.S. Assistant Secretary of State for Near Eastern Affairs, who was then visiting Egypt and the Levant

It was announced in Prague on Oct. 2 that Colonel Nasser had accepted an invitation to visit Czechoslovakia, the announcement adding that "the Egyptian Government, in the interest of the security of the country and of peace in that region, has turned to where deliveries of armaments can be obtained on a purely commercial basis without political or other conditions." The Czechoslovak Government issued a further statement on Oct. 3 denouncing what it described as the "intensive campaign" of the Western Powers to put pressure on Egypt to cancel the agreement with Czechoslovakia, and rejecting "unwarrantable attempts" to interfere in a matter affecting two sovereign States.

The Soviet Government also issued a statement on Oct. 2 upholding Czechoslovakia's right to supply arms to Egypt. As quoted by the Tass Agency, the statement said:

"It appears from foreign Press reports that pressure has been exercised of late upon some Middle Eastern countries to make them buy their defence requirements exclusively from the Western countries and on terms imposed by the Western countries. It also appears that the Egyptian Government regards such pressure as an intolerable interference detrimental to the independence of Egypt and to the interests of her legitimate defence. The Soviet Government holds the view that every State has the legitimate right . . to purchase arms for its defence requirements from other States on the usual commercial terms, and that no foreign State has the right to intervene. . . . The Soviet Government has expressed this point of view to the Egyptian and Czechoslovak Governments, and also to the British and U.S. Governments."

Grave concern was aroused in Israel at the supply of Czechoslovak arms to Egypt, and an emergency meeting of the Israeli Cabinet was held on Oct. 3 at which the Prime Minister (Mr. Sharett) reported on the "steps taken with the Powers to prevent an arms race and to ensure the security of Israel." Mr. Sharett had had a meeting with the British and U.S. Ambassadors on the previous day, after an earlier meeting with the Soviet Chargé d'Affaires. On Oct. 4 the Israeli Chargé d'Affaires in Prague informed the Czechoslovak Government that Israel regarded the sale of arms to Egypt as an "unfriendly act" and as tantamount to abetting aggression.

An official statement was issued after the Israeli Cabinet meeting describing the Egyptian reports of Israel's superiority in armaments as "without foundation," and the figures given by Colonel Nasser as a "ridiculous exaggeration" After declaring that Israel was far behind Egypt in military equipment, and pointing out that Israel's military budget was one-third that of Egypt, the statement expressed Israel's "grave concern" at the prospect of the present military balance altering substantially in favour of Egypt, and at the possibility that this might encourage Egyptian aggression against Israel It added that if reports of the quantities and types of arms to be supplied to Egypt proved to be accurate, Israel must "take every step at her disposal to improve her defensive power, including the purchase of increasing quantities of armaments."

Prior to these developments, Mr. Sharett had defined Israel's attitude to the "peace plan" for the Middle East put forward on Aug. 26 by Mr. Dulles (see 14392 A).

In an interview to the British United Press on Sept. 11, Mr. Sharett said that while Israel was willing to discuss certain mutual border adjustments with her Arab neighbours, she was not prepared to make unilateral concessions of territory, particularly in the Negev. Commenting that Mr. Dulles had appeared to "make the fixing of boundaries a condition that must come before the conclusion of the defence treaties, which he himself regards as urgently needed," Mr. Sharett declared that the present armistice lines, "whatever technical or other demerits they possess, have at least the inestimable advantage of being agreed upon, whereas any agreed correction of these lines in the near future is highly problematical, if not illusory." The Negev, in particular, was of great importance to Israel both for its mineral wealth and for the "supreme value" of the port of Eilat, at its southern apex (see map, page 14436), "that foothold on the Red Sea," said Mr. Sharett, "is of far-reaching significance to Israel, and invests with the same quality of decisive value any part of the land bridge between it and the main body of the State's territory"

A further amplification of Israel's attitude to the "Dulles plan" was made on Sept. 11 by the Israeli Ambassador in Washington, Mr. Eban, with the authority of Mr. Sharett. After stating that Mr. Sharett had presented Israel's views to the U.S. Government, Mr. Eban warmly commended Mr. Dulles' "realistic and imaginative approach" to the problem, but said that it was "acutely discouraging to read Mr. Dulles' paragraph on frontiers." Mr. Eban said in this connexion that the Israeli Government considered that the present frontiers between Israel and the Arab States possessed "more solid attributes" than Mr. Dulles' speech had indicated, for the following reasons:

(1) The present frontiers had existed by international agreement and arrangement for seven years, and had stood out "in recognized integrity" despite the fact that hostilities had occurred from time to time. As the subject of an international guarantee they were "vastly superior to any imaginary line which does not have the tradition of stability or the virtue of reality."

(2) Both Israel and the Arab States had agreed that the present frontiers would not be changed except by agreement under the armistice terms concluded in 1949. None of the parties had invoked the armistice procedure for change, and they were more likely to resign themselves to the present frontiers than to reach a new agreement. In any event "there can be no question of unilateral concessions by Israel to the Arab States, which are so abundant in territory."

(3) If the present border could be "a fitting subject for the tripartite agreement in 1950, it cannot be an unfitting subject for a treaty engagement today."

(4) Even the advocates of a new boundary agreement did not seem to have any drastic alterations in mind. "How, then, could an adjustment, which admittedly would be only minor in character, be so momentous as to make all the difference between the application of a treaty solution and its denial?"

(5) There was "nothing intrinsically tense" about the configuration of the present frontiers. Tension would result, not from the shape of the frontier, but from the relationship between the Governments on either side of it

Summarizing what he described as "the foundation of Israel's position," Mr Eban said. "We will explore every road of progress towards the liquidation of conflict between the Arab States and Israel. While being ready for mutual adjustments of the boundary line, we shall accept no unilateral territorial concessions for ourselves, just as we have demanded nothing from our neighbours Mr. Sharett's statement on the Negev is an absolutely fundamental and immutable part of our policy. Now that there is an important willingness in principle for the leaders of the United States to engage themselves by a treaty to thwart aggression in our area, we urgently advocate that this priceless stability be conferred upon our region now and not be lost through association with unattainable conditions"

Mr Eban ended by saying that Israel and the United States had drawn closer together in this "memorable discussion," but that much work remained to be done before the promise enshrined in Mr. Dulles' statement could produce lasting peace and security for the Middle East.

The new Prime Minister of Syria, Said Ghazzi (see 14454 A), announced in the Chamber of Deputies on Sept. 26 that Syria rejected any plans or attempts for the conclusion of peace with Israel, including the proposals of Mr. Dulles. No other Arab State had officially defined its attitude towards Mr. Dulles' proposals, but a Cairo broadcast of Aug. 29 denounced the "Dulles plan" as an attempt "to deliver the Arabs to the mercy of Israel."—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune) **(Prev. rep. Gaza Incidents, 14419 A; 14389 A; 14157 A; Gulf of Akaba, 14436 A; "Dulles Plan," 14392 A.)**

A. UNITED KINGDOM. — Life Sentences imposed on I.R.A. Men for Arborfield Raid.

The three Irishmen arrested after the I.R.A. raid on the arms depot at Arborfield—Donal Murphy, Joseph Doyle, and James Andrew Mary Murphy—were sentenced to life imprisonment by Mr Justice Cassels at Berkshire Assizes on Oct. 5.

Each of the three men was found "guilty" on two counts of armed robbery and received sentences of life imprisonment on these charges In addition, they were each sentenced to 14 years' imprisonment for breaking and entering into the Arborfield camp and stealing arms, to five years' imprisonment for conspiring to rob, and to two years' imprisonment for assaulting Sergeant Carter (the guard commander at the depot), all these sentences to run concurrently. They were found "not guilty" of causing grievous bodily harm to Sergeant Carter

Mr. Justice Cassels addressed the three men as follows when passing sentence:

". . . You and others organized a plan to acquire and use . . . a vast quantity of arms and ammunition But for the vigilance of two police officers on the main road to Ascot in the early hours of that morning (Aug 13) you might not have been discovered The whereabouts of what you had stolen might not have been known, and how much blood might have been shed as the result of what you had done no-one could tell This was an act of war upon your part. It was carried far enough to indicate your determination to go through and to stick at nothing in order to achieve your aims. You were armed; Sergeant Carter and his men were not; and this Court has no doubt that if resistance was shown by the guard, you, who were carrying loaded revolvers, would not have hesitated to use them. If you had, and if you had killed . . . it is difficult to see what answer you could have had to a charge of murder. . . So far as your imprisonment is concerned . . . the day of your release depends entirely upon the Secretary of State, who may release when he sees fit so to do and upon such conditions as he sees fit to impose."

The accused men had refused to plead to any of the charges, and Mr. Justice Cassels had entered a plea of "not guilty." The only prisoner to comment after the jury had returned their verdicts was Doyle, who said: "We are soldiers of the Irish Republican Army. Those arms and ammunition were to be used against the British army of occupation in Ireland. We have no regrets and do not apologize for our part in the raid at Arborfield. Our only regret is that it was not a success". (Times - Daily Telegraph) **(Prev. rep. 14405 A.)**

B. CEYLON. — Imperial Honours to be ended.

Sir John Kotelawala, the Prime Minister of Ceylon, announced in the House of Representatives on Sept. 6 that arrangements were being made for the replacement of Imperial Honours by suitable Ceylonese Honours as soon as possible.

(Ceylon Government Information Department, Colombo)

A. SOVIET UNION - EASTERN GERMANY. — Governmental Discussions in Moscow. - Soviet-East German Treaty. - Restoration of Sovereignty to Eastern Germany. - Abolition of Soviet High Commission. - Retention of Soviet Troops. - East German Responsibility for Traffic and Frontier Control.

Discussions between the Soviet Government and the Government of the German Democratic Republic (Eastern Germany) were held in Moscow from Sept. 17-20, shortly after the conclusion of the discussions between the U.S.S.R. and the German Federal Republic (see 14425 A). The negotiations were conducted on the Russian side by Marshal Bulganin and M. Khrushchov, and on the East German side by Herr Otto Grotewohl (the Prime Minister), who was assisted by Herr Ulbricht, Herr Nuschke, and Herr Stoph (the three Deputy Premiers), Dr. Lothar Bolz (Foreign Minister), and Dr. Erich Correns (president of the National Front, comprising all political parties and mass organizations in Eastern Germany).

The negotiations ended with the signing by Marshal Bulganin and Herr Grotewohl of a treaty between the Soviet and East German Governments containing the following provisions:

Art. 1. Both Governments "solemnly confirmed" that their relations were based "on complete equality of rights, mutual respect of sovereignty, and non-interference in domestic affairs." In accordance with this principle, Eastern Germany was henceforth "free to decide questions concerning its internal and foreign policy, including its relations with the German Federal Republic as well as its relations with other States."

Art. 2. Both Governments declared their readiness "to take part, in a spirit of sincere co-operation, in all international actions aimed at safeguarding peace and security in Europe and in the world, and which are in conformity with the principles of the U N. Charter." For this purpose they would consult each other "on all important questions affecting the interests of both countries," and would take all measures at their disposal "not to allow a violation of peace"

Art. 3. The two Governments agreed to develop and strengthen the economic, scientific-technical, and cultural relations existing between them, and to give each other all possible mutual aid in these fields

Art. 4 (*a*) The Soviet forces at present stationed in Eastern Germany under international (i.e. four-Power) agreements would continue to be stationed there temporarily with the approval of the Government of the German Democratic Republic, and on conditions to be settled by an additional agreement between the two Governments.

(*b*) Soviet forces stationed in Eastern Germany would not interfere in the internal affairs of the German Democratic Republic or in the social and political life of the country

Art. 5. Both Governments were agreed that it was "their main aim to bring about a peaceful settlement for the whole of Germany by means of appropriate negotiations." To this end they would "make the necessary efforts towards a settlement by a peace treaty and towards the restoration of the unity of Germany on a peaceful and democratic basis."

Art. 6. The treaty would be valid until the restoration of the unity of Germany as a "peaceful and democratic State," or until it was annulled or amended "by agreement between the parties."

Art. 7. The treaty would take effect upon ratification by the Soviet and East German Governments Instruments of ratification would be exchanged in Berlin at an early date.

The preamble stated that the Soviet and East German Governments would respect the obligations undertaken by both Governments under "international agreements relating to Germany as a whole." [By implication, this phrase recognized the special four-Power status of Berlin and the responsibilities shared by the Soviet Union, equally with the three Western Powers, concerning German reunification.]

In addition to the above-mentioned treaty restoring sovereignty to Eastern Germany, there were also published at the end of the conference (1) an exchange of letters between Dr. Bolz and M. Zorin (Deputy Soviet Foreign Minister) confirming that the East German Goverment would in future have control of traffic (other than military traffic) across its territory from Western Germany to Berlin, and also of the frontiers of the German Democratic Republic; (2) a communiqué stating, *inter alia*, that the Soviet Government would give "favourable consideration" to the release of Germans still held in the U.S.S.R.; and (3) an announcement by the Soviet Government abolishing the Soviet High Commission in Eastern Germany, and assigning to the Soviet Ambassador to the German Democratic Republic "the function of maintaining relations with the U.S., British, and French diplomatic representatives in the German Federal Republic on questions resulting from the decisions of the four Powers concerning Germany as a whole." In addition, the Soviet Government rescinded all laws, directives, and orders issued by the Soviet control organs in Eastern Germany between 1945 and 1948—i.e., prior to the formation of the Allied High Commission in the latter year.

In the exchange of correspondence between Dr. Bolz and M. Zorin it was stated that the East German Government would take over responsibility for the control of its frontiers and for lines of communication between Western Germany and West Berlin passing through East German territory. Questions concerning these communications—e.g., matters relating to passenger and freight transport by road, rail, and canal—would be settled in consultation with the "corresponding authorities" of Western Germany. East German control of civilian and civilian freight traffic (both of German and foreign nationals) would not, however, apply to the personnel and supplies of the British, French, and U S. garrisons in West Berlin. It was confirmed that the Western Powers, as hitherto, would have access to West Berlin *via* the recognized road, rail, and air corridors, and that control of military traffic between Western Germany and West Berlin would continue to devolve "temporarily" upon the Soviet military authorities until a further agreement had been concluded [i.e. a four-Power agreement between Russia and the Western Powers].

The communiqué issued at the end of the discussions said that the Soviet and East German Governments had exchanged views on international questions; that both Governments were agreed that the participation of East and West German representatives in the forthcoming Geneva conference of Foreign Ministers would facilitate the discussion of questions concerning Germany; and that the Soviet Government would give "favourable consideration" to requests by the East German President and Government (see below) for the release of German prisoners in the U.S.S.R., and would submit recommendations on this matter to the Presidium of the Supreme Soviet. The communiqué made no mention of Marshal Bulganin's pledge to Dr. Adenauer that 9,626 Germans convicted of war crimes would be released.

On Sept 15, before the East German delegation arrived in Moscow, it had been announced in East Berlin that Herr Wilhelm Pieck, the President of the German Democratic Republic, had addressed a letter to Marshal Voroshilov (chairman of the Presidium of the Supreme Soviet), dated Aug 31, on the question of the release of Germans held in the Soviet Union. In this letter (the text of which was broadcast by the East German radio) President Pieck had written: "During the visit of the Soviet Government delegation to Berlin in July (see 14357 B) the question was raised with the Government of the German Democratic Republic as to whether there existed the possibility for the release and repatriation of former German prisoners of war who are serving sentences for crimes committed during the war against the Soviet people. It was agreed to continue the examination of this question . . . I therefore consider the moment opportune . . . to plead formally for the early release and return of all former German prisoners of war. The Soviet Union may rest assured that such a magnanimous action would be appreciated by the entire German nation with deep gratitude."

In a statement in Moscow on Sept. 19, Herr Ulbricht said that Soviet troops would remain in Eastern Germany "so long as the Western Powers are unwilling to withdraw their troops from Western Germany and to liquidate their military bases there." He added, however, that the continued presence of Soviet forces in Eastern Germany would not affect the responsibility of the German Democratic Republic to protect itself "effectively" with its own armed forces. After denouncing the passing of the Defence Law by the West German Government, and declaring that the building-up of an "aggressive *Wehrmacht*" had already started in the Federal Republic, he declared that the German Democratic Republic would "faithfully fulfil its rights and obligations" resulting from the Warsaw Treaty (see 14249 A).

M. Khrushchov, speaking on the same date during the negotiations, similarly declared that the Soviet Union was ready to withdraw its forces from Eastern Germany "providing our partners in the war against Hitlerite Germany also withdraw their troops" from Western Germany.

After ratification by the Presidium of the Supreme Soviet and the East German *Volkskammer*, the treaty came into force on Oct. 6, on which date instruments of ratification were exchanged in East Berlin between the Governments of the U.S.S.R. and the German Democratic Republic.—(East German News Agency, A.D.N. - Tass Agency - Frankfurter Allgemeine Zeitung - Der Tagesspiegel, Berlin - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. 14425 A; 14357 B.)**

B. PERSIA. — Ban on Opium Cultivation.

The Majlis passed a Bill on Oct. 4 banning opium cultivation throughout Persia, and laying down measures for a campaign against opium-smoking, which was also banned. The measure had been passed by the Senate in August.

The Minister of Health (Dr. Salah), who introduced the Bill, had pointed out that Persia produced between 700 and 1,200 tons of opium a year, that 100,000 persons died prematurely in Persia every year as a result of opium addiction, and that some 5,000 other addicts committed suicide each year, leaving their families destitute. It was estimated by the Ministry of Health that 2,000,000 grammes of opium were smoked daily in Persia, involving the daily loss of 500,000 man-hours, and that the debilitating effects of the drug were affecting more than half the Persian labour force.

Grave concern at the effects of opium addiction in Persia, and at exports of the drug from that country, had been expressed on a number of occasions by the U.N. Narcotics Bureau.

(Daily Telegraph - New York Herald Tribune)

A. UNITED STATES. — Trade Policy. - Increase of 50 per cent on Bicycle Tariffs. - Protests by Britain and European Countries.

President Eisenhower announced on Aug. 19 that, after having considered the Tariff Commission's recommendations, he was authorizing an immediate increase of 50 per cent in the duty on all bicycle imports into the United States. The President's decision, which was based on the "escape clause" of the Reciprocal Trade Agreements Act, raised the minimum *ad valorem* duty on light-weight machines with 25-in. wheels from 7½ to 11¼ per cent, and on other types from 15 to 22½ per cent. The Tariff Commission had recommended an increase on all imported cycles to a standard rate of 22½ per cent.

An earlier request by the U.S. manufacturers for higher tariffs on imported machines had been rejected by the Tariff Commission in 1952 (see 12828 A), but another appeal to the Commission was made in August 1954 The Commission submitted its report on March 14, 1955, and, after a request by the President for additional data, made a supplementary report on July 14. It stated that during the first five months of 1955 imports of foreign bicycles of all types had risen by 74 per cent to some 375,000, against 216,000 during the comparable period of 1954, and that domestic production was running at an average of 82,000 a month, compared with a monthly average of 107,000 during the years 1950 to 1954. The Commission informed the President that domestic manufacturers were unable to produce light-weight bicycles as cheaply as they could be imported from Britain and the European continent, and concluded that, in the absence of any indication of a change in present trends, the American industry was virtually certain to show further deterioration during the current year.

In identical letters on Aug. 19 to the chairmen of the Senate Finance Committee and the House Ways and Means Committee, President Eisenhower said that he agreed with the majority of the Tariff Commission that the American bicycle industry had, within the meaning of the law, "suffered serious injury or the threat of serious injury from increased imports resulting in part from tariff concessions." He emphasized, however, "that this nation's firmly rooted policy of seeking ever-expanding levels of international trade and investment" was "in no respect altered" by the decision to raise the tariffs on bicycles.

Explaining why he had authorized a tariff increase on lightweight machines of only 7½ per cent to 11¼ per cent, instead of the 22½ per cent recommended by the Tariff Commission, the President said that the recent expansion of the U.S market for large wheel light-weight bicycles had resulted mainly from the efforts of foreign producers and American importers. The domestic industry manufactured almost no bicycles of this type, and the American product, which had typically been of the balloon tyre variety, was not directly competitive with the imported large wheel light-weight Moreover, by raising the tariff on both types of machine by an equal 50 per cent, the existing relationship in tariff treatment for imported large wheel light-weight machines was preserved, and recognition was given to the fact that "the development of the present American market for this particular bicycle is attributable almost entirely to the ingenuity and resourceful efforts of foreign producers and American importers." The American industry was, however, showing "encouraging signs of stirring" to meet competition from abroad by improving its technology and its appeal to consumer tastes. "In my judgment," said the President, "these developments, rather than intervention by the Government, are the domestic industry's real hope for the future."

The U.S. action aroused strong resentment in a number of European countries, especially in Britain, the largest exporter of bicycles to the United States.

Mr. T. J. Boulstridge (vice-president of the British Cycle and Motor Cycle Manufacturers' and Traders' Union, and managing director of Phillips Cycles Ltd.) said on Aug. 19 that industry in Britain and Europe "must regard with misgiving this further evidence of American sensitivity" to increasing exports, and that there seemed little purpose in cultivating the American market if protection was to be so lightly applied when success was achieved. He contended that U.S. industry had over-emphasized the normal seasonal decline in trade during the winter; that it had fully recovered since; and that there was little real evidence that their business had been injured by imports. American makers, he said, must put their own house in order by producing merchandise with a greater consumer appeal, or their trade would suffer, irrespective of imports.

At the meeting of the O.E.E.C. Council in Paris on Aug 26, the representatives of Britain, Western Germany, France, Austria, the Netherlands, the Irish Republic, and Portugal expressed their "concern" about the U.S. action. The British delegate pointed out that although the U.S. Government had "repeatedly said" that it recognized the importance of tariff stability, it had once again used the "escape clause" of the Tariff Act to raise a duty. The West German representative stressed that the U.S action was incompatible with the close co-operation between the O.E.E.C. countries and the U.S.A., adding that the export of bicycles had been developed "at the instigation of our American friends to increase dollar earnings of O.E.E.C. countries, and is now being curtailed when it is beginning to yield tangible results."

Figures published in the British and U.S. Press showed that total bicycle sales in the U.S.A. in 1954 amounted to about 2,510,000, of which 1,554,000 machines were manufactured in the United States and 956,000 were imported.

More than half of the imports (530,000, valued at $12,970,000) came from Britain, followed by Western Germany (262,000, valued at $4,494,000), France (88,000, valued at $1,793,000), and Austria (35,000, valued at $788,000). In 1954 the U.S A. was Britain's best overseas market for cycles, taking one-fifth of all the machines exported, exports of British bicycles to the U S A had risen from 58,000 in 1950 to 123,000 in 1951, 191,000 in 1952, and 407,000 in 1953.

The Washington correspondent of *The Times*, in a despatch on Aug. 20, stated that the total number of Americans employed in the manufacture of bicycles was no more than 3,954 in 1953 and 2,901 in 1954, and that, moreover, none of the nine firms engaged in the business was devoted exclusively to bicycle manufacturing; all made other items, which, in some cases, were more important than their bicycle operations

The U.S. State Department issued on Sept. 21 a list of commodities on which the U.S.A. was prepared to consider offering tariff concessions at the next conference of parties to the General Agreement on Tariffs and Trade (GATT) for the purpose both of obtaining "new concessions of benefit to U.S. trade" and of "making compensation for the recent action of the United States in increasing the duty on bicycles."
(New York Times - New York Herald Tribune - Times - Financial Times) **(Prev. rep. 14299 A.)**

B. FRENCH NORTH AFRICA. — Formation of North African "Liberation Army" announced in Cairo. - Unification of Algerian and Moroccan Rebel Forces. - Suspension of French Arms Shipments to Egypt.

It was announced in Cairo on Oct. 4 by Si Allal el-Fassi, leader of the Moroccan *Istiqlal* (nationalist) party, that the Algerian and Moroccan "resistance movements" had been combined under a "unified command" to form a "liberation army of North Africa" (*armée de libération du Maghreb Arabe*) which would conduct a joint struggle for the "liberation" of Algeria and Morocco. He said that the "movement for the liberation of North Africa" had entered into "a new phase in which its objectives and military actions will be co-ordinated to achieve its goals—the independence of North Africa (*les pays du Maghreb*) and the return of Sultan Ben-Youssef [the deposed Sultan of Morocco] to his throne." Si Allal el-Fassi added that the "liberation army" would be joined by Tunisian elements "at the proper moment."

It was stated that the "liberation army" was officered by men who saw active service in World War II and in the "resistance movements"; that it would carry out military operations and issue regular communiqués from an underground headquarters "somewhere in North Africa"; and that it had gone into action for the first time on Oct 1. [A widespread series of attacks was carried out during the night of Oct. 1-2 in different parts of Algeria and Morocco, during which Moroccan tribesmen attacked the town of Immouzer, in the Atlas Mountains, and massacred 11 French men, women, and children.]

A "Communiqué No. 1," issued in Cairo on the same date (Oct. 4), said that the "liberation army" did not consider itself bound by "any agreement, past or future," which did not involve the attainment of "total independence" for North Africa

It was confirmed at the Quai d'Orsay on Sept. 17 that France had suspended the supply of arms and military equipment to Egypt because of the offensive nature of recent anti-French broadcasts from Cairo. It was also announced that the French Ambassador in Syria had protested against similar anti-French broadcasts from Damascus. The French action against Egypt was taken after a number of violent and abusive broadcasts from Cairo attacking French policy in North Africa and expressing support for the rebel movements in Algeria and Morocco. The French newspaper *Le Monde* disclosed on Sept. 27 that the suspension of arms shipments to Egypt had been put into effect on Sept. 2.

The secretary-general of the Arab League (Abdul Khalek el-Hassouna) denounced the French decision as "a hostile act against the Arabs," whilst the Cairo newspaper *Al Goumhouria* (the official organ of the Egyptian Government) made abusive attacks on the French Government and Prime Minister, M. Faure, whom it described as "the hangman of the Arabs" and "the stooge of Zionist agents."—(Le Monde, Paris - Le Figaro, Paris - Manchester Guardian - New York Times)

C. UNITED KINGDOM. — August Trade Figures.

Imports into the United Kingdom in August totalled £342,300,000, exports £264,200,000, and re-exports £10,000,000, the adverse visible balance for the month thus amounting to £68,100,000—(Board of Trade Journal) **(Prev. rep. 14443 B.)**

A. UNITED KINGDOM. — Mr. Butler's Mansion House Speech on Britain's Economic Position. - Speech by Governor of Bank of England. - Fall in Gold and Dollar Reserves in September.

Mr. Butler, the Chancellor of the Exchequer, surveyed the present economic situation in Britain when he addressed the bankers and merchants of the City of London at the Mansion House on Oct. 4. He spoke as follows :

" We must move to stabilize or reduce costs so as to improve our competitive power as a great trading nation, and maintain our standard of national well-being, and our fine achievements over the last four years. During this time expansion has been the order of the day. . . . We have opened markets, removed restrictions, widened trade, and freed human endeavour. This has all resulted in a considerable increase of prosperity—a word which has meant for the normal working family sure employment, a happy home, and, in most cases, increased rewards . . .

But there is something more fundamental We live in an island. We must import almost all we want to keep up full employment and good living. We have been using up too much at home and not sending enough abroad to pay for what we bring in

Let us examine for a few minutes what is to the credit of Government achievement as it affects human happiness. I use the word ' credit ' in the normal English sense of what is good. As the bear said when eating the honey, we shall come to the ' squeeze ' later. . .

First, domestic production has fully justified our expectations, as expressed in my 1955 Budget and in my Budget speech. There has also been a surge forward of investment, towards which I was pressed by both sides in Parliament and in industry House and factory building have been climbing steadily. The City of London is rising again from its ruins The output of plant, machinery, and vehicles is markedly greater.

Indeed, so successful have we been that the rate at which development is proceeding, taken together with all that people are spending, is resulting in a shortage of labour and materials and hence an overloading of the economy Our difficulties come purely from an increase in the amount spent on personal consumption, which, though moderated in the first six months of this year, is still excessive in relation to what our resources can bear.

The index of weekly wage rates, after having risen by five points between December and March, rose by another three points between March and June and has since risen again by a further point Moreover, there are new wage claims to face, and there have been marked increases in dividend distribution.

Imports have risen steeply, though I have reason to believe they may be brought under control In particular, we have had to spend this year to date £47 million on coal imports, as compared with only £6 million a year ago. Every ton of coal we waste or fail to dig reduces our reserves of gold and dollars by about £7.

And why do we have to import coal ? Because our booming industry has used more, and because, so far from increasing, production over the first 35 weeks of this year is 3,500,000 tons less than in the same period last year. We have had to cut down very severely our coal exports. which is disastrous for our country, and to increase our imports of fuel oil.

Our exports as a whole have certainly increased, though it is difficult to follow the trend exactly because of the dislocation caused by the strikes earlier this year. We look like achieving a 10 per cent improvement in the volume of our exports this year over the 1954 volume ; in particular, our exports to the United States seem likely to be better than for some time past Much more effort is needed and we must invade new markets ; but the record is good.

We shall not go back on our policy of widening trade and freeing payments. We have to trade to live. We trust that we shall see the following up of the lead given by the President of the United States towards freer trade and more imaginative good creditor policies. . . .

The imperative need is for us to use less at home and send more abroad. In a week's time we shall publish the six-monthly balance-of-payments White Paper. I will mention in advance that in the first six months of this year the U.K. had a small current surplus with the rest of the world—including the remaining U.S. aid So far so good But, as you all know, we need a large surplus ; moreover, U.S. aid is coming to an end and we must stand on our own feet.

Last month the gold and dollar reserves went down by $112 million, including the payment to the E P.U. of $59 million for our E.P.U. deficit in August A large proportion of the decline in the reserves during the last three months has been due to our deficit with Europe We must remember that we tend to spend most heavily in Europe in the late summer, when we and other sterling countries earn least. Also, from the end of July onwards, three-quarters of our deficit with Europe have to be paid for in gold. The E.P.U deficit for September was £37,000,000, which will mean a payment of $80 million from our reserves due this month.

Analysing the September figures, I can state that virtually the entire loss and deficit with the E.P.U. took place in the first half of the month. After my speech to the International Monetary Fund, adverse speculation against sterling ceased, and with it the loss of reserves and the increasing deficit in E.P.U. To the extent that sterling has been firmer, things are better.

I have indicated clearly, and with general assent, that we intend to make no move on the exchange front until we have fortified the internal economy and the general outlook is more favourable. We intend to move and shall move, when we are ready, to a wider system of payments and to a system of freedom. We shall at all costs defend the pound. . We must now assist sterling to carry forward its recovery by showing our continuing determination to deal with inflation at home Then I believe sterling will regain its full strength. . . .

It is evident that, in a mixed economy of private and public enterprise, measures to restrict credit must be further helped by parallel action to curtail expenditure in the public sector. The measures of last February resulted in bank deposits being reduced, but for various reasons bank advances continued to rise. Therefore on July 25 further steps were taken. The bankers were asked to press the restriction of credit—in other words (to quote a professional periodical) ' to blow the froth off a brimful economy.' The latest figures of deposits and advances, to be published this week, show how strenuously they have worked.

I will certainly blow off my share of the froth. But I think together we want to go deeper and increase the ' gravity ' of the brew. The banks will expect the Government and public authorities to do their best to support what must be to bankers a disagreeable but necessary exercise. The sum of the Government's proposals in the field of expenditure, and any other measures which are necessary to correct the situation, must, of course, be announced to Parliament as soon as we meet. The Government must do its duty in bringing forward whatever comprehensive remedies the situation demands.

This is the time of the year when the Government is preparing the estimates of its own expenditure for next year, and we shall certainly do our part in seeing that they do not exceed what can be clearly justified. The recent warning of the Minister of Housing that the housing subsidies should be reduced rather than increased is very important. Meanwhile, I am, as always, keeping a close watch on the current progress of the Exchequer. In the half-year to Sept. 30, revenue was £35 million better than last year, against a Budget estimate of a reduction of £28 million over the whole year. Expenditure is £55 million higher than last year, but the rate of increase is well below that provided for in the Budget. It is risky to attempt to draw conclusions for the whole year from the half-year's results, but we can confidently expect the out-turn of the Budget to be better than I forecast last April.

I can now resume briefly what I have said. On the favourable side of the picture we have the gratifying rise in production and in exports and the general spirit of confidence which is abroad in the country. On the other side we have the big rise in imports, the pressure of additional wage demands, and the acute shortage of labour—there are now on the average well over two vacancies in industry for every person who is registered as unemployed

But I would not wish anyone either at home or abroad to misjudge the nature of the problem. These are not the difficulties of a country which is running into trouble through inertia or flabbiness ; rather we are suffering from the effects of buoyant expansion coupled with insufficient restraint at home. This restraint is to be intensified.

We have always had a dual policy of discipline and incentive. Without incentive we should not have expanding opportunity. Without discipline, of which still more is to come, we shall not be able to invade and conquer oversea markets. Placed as we are by nature 'twixt the two colossi of East and West, we shall win through only if we are inspired by the traditional virtues of the merchants and bankers of the City of London, absolute integrity, and the virtues of ever-welling ingenuity and patient self-sacrifice."

After Mr. Butler's speech the meeting was addressed as follows by Mr. C. F. Cobbold, Governor of the Bank of England :

" There has been much talk about sterling in recent months, but the most important point of all has often been overlooked In 1949 sterling was overvalued The devaluation in that year left sterling undervalued. Since then the margin of undervaluation has lessened. If in the future we were to be so foolish as to allow our costs to continue to rise disproportionately to those of our competitors, the relative value of sterling would again come into question. But today sterling is still undervalued rather than overvalued in relation to most of the principal currencies of the world."

In discussing the Chancellor's " tighter money " policy, Mr. Cobbold said that the effect on the foreign exchange position of the combined measures taken by the Chancellor had been immediate and decisive. " The disturbing markets in cheap sterling which had been growing up over the previous four months disappeared almost overnight and have since given very little trouble Sterling generally took on a more favourable look, which it retained until July, when bad trade figures came out, doubts were expressed about the effectiveness of our anti-inflationary measures, and rumours circulated about changes in our exchange arrangements. At the same time the tightening of money, coupled with a similar but less pronounced tendency in the United States, began to influence commodity prices, with a consequent improvement to our terms of trade.

" It is less easy to gauge the effect of the February measures and the tight monetary policy of the succeeding months on the internal economy. The immediate results were disappointing · for a month or so the view persisted that tight conditions would not be maintained for long and need not be taken seriously. But, from April onwards, the measures were probably more effective than has been generally supposed Without them there is little doubt that bank advances would have climbed much more steeply and the upsurge of hire purchase might have got out of hand. Against a general atmosphere of boom and expansion, the steady pressure of monetary policy through those months was gradually building up resistance to an

exceptionally heavy demand for credit. It became clear, however, during the summer that the banks would not succeed in bringing advances down quickly enough and to the necessary extent without the support of a statement of Government policy. The statement made by the Chancellor of the Exchequer in July greatly reinforced the technical 'squeeze' and, although the banks still find themselves up against difficult problems, the tide of advances has turned."

Drawing "certain conclusions" about the use and effect of monetary policy in modern conditions from their experience since 1951, Mr. Cobbold said: "The proportion of the economy which is directly affected by credit policy through the banking system, both as to investment and as to consumption spending, is much smaller than it used to be. With the enormous growth of the public sector, monetary action to restrict the borrowing and spending of individuals, firms and companies can be outweighed by the action of Government, local authorities, and the nationalized industries. Moreover, with the redistribution of income since the war, the immediate impact of credit policy on consumption spending is outweighed by the level of earnings and by fiscal policy.

"Secondly, with present high taxation levels, business people are less sensitive to an increase in the cost of bank borrowing. International capital movements are less free than before the war and also less sensitive, though by no means wholly insensitive, to interest rate changes,

"Thus, in its direct impact, monetary policy works on a smaller field than it used to. But it still exercises a gradual and persuasive influence over a much wider field. Bank Rate movements are an integral part of monetary policy and still have their psychological effect. The experience of these years shows that it would be most unwise not to make full use of these instruments; it would be equally unwise to blunt them by loading them with more responsibilities than they can effectively discharge."

"Our monetary policy has got into its stride and we must hold to it firmly," Mr. Cobbold ended. "If strong action is now taken by the Government over the rest of the field, and if we keep industrial costs steady, the task ahead of us should be well within our capacity."

The sterling area had a gold and dollar deficit in September of $112,000,000 after taking into account (*a*) the receipt of $2,000,000 in U.S. defence aid, (*b*) the payment of $59,000,000 to the E.P.U., representing that part of the August settlement which had to be paid in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,845,000,000 on Sept. 30.

Provisional figures for the E.P.U. September settlement showed that the U.K. had a deficit of $106,400,000 (£38,000,000), which will be settled in October, under the recently revised scales of payment (see 14374 A), three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Treasury Press Office) **(Prev. rep. Mr. Butler, 14343 A; Gold and Dollar Reserves, 14412 E.)**

A. SYRIA. — New Government.

The Cabinet headed by M. Sabry Assali tendered its resignation on Sept. 6 to President Kuwatli, who was officially installed on that date as President of the Syrian Republic in succession to President Hashem Atassi. A new eight-man Cabinet was formed on Sept. 13 by M. Said Ghazzi, in which all the political parties were represented except the National Socialists and the Arab Renaissance (*Baath*) party. M. Ghazzi, an Independent, took over the portfolio of Foreign Affairs concurrently with the Premiership.—(Le Monde, Paris)
(Prev. rep. President Kuwatli, 14400 A; Cabinet, 14063 B.)

B. PAKISTAN. — Accession to Turkish-Iraqi Pact.

It was announced in Karachi on Sept. 23 that Pakistan's instrument of accession to the Turkish-Iraqi pact of mutual co-operation had been deposited in Baghdad the same day, marking Pakistan's formal adherence to the pact and increasing the number of its member-countries to four [i.e. Pakistan, Turkey, Iraq, and the United Kingdom]. An official spokesman in Karachi said that the Turkish-Pakistani pact would become part of the Turkish-Iraqi pact so far as defence measures were concerned.—(Pakistan High Commissioner's Office, London)
(Prev. rep. 14298 B.)

C. AUSTRALIA. — Cabinet Appointment.

Senator S. D. Paltridge (45) was sworn in on Sept. 27 as Federal Minister of Transport and Shipping in place of the late Senator McLeay, who died on Sept. 13. Mr. Paltridge, a Liberal, was elected as a Senator for Western Australia in 1951, and was formerly an hotel manager in that State. The Federal Attorney-General (Senator Spicer) had taken over the portfolio of Transport and Shipping *ad interim* after the death of Senator McLeay.—(Australian News and Information Bureau)
(Prev rep. 14414 B.)

D. SOUTH AFRICA. — Temporary Closure of Fort Hare African College.

The University College of Fort Hare (Cape Province), the only non-European institution of university status in South Africa, was temporarily closed on May 4 by its Governing Council. The 367 students—330 of whom had been suspended for an indefinite period—were sent home under the guard of armed police.

A statement issued by the Principal, Professor C. P. Dent, said that there was evidence of the existence of a secret authority, sometimes called "the caucus," whose instructions, rather than those of the College authorities, were obeyed by the students, often through fear of violence or other forms of intimidation. In consequence it had become impossible to continue the work of the College under present conditions.

A commission of inquiry appointed by the Governing Council issued a report on Sept. 1 which strongly criticized the attitude of many of the students, but made no reference to the alleged "caucus."

The report stated that the students were suspicious of the College authorities, of many (though not all) Europeans, and of one another, partly as a result of the authorities' "unwise encouragement of talebearing." Mistrust had been focussed on the Principal and the College authorities, and some at least of the students seemed to be "opposed to all authority as authority." Although the majority were probably not active members of any political organization, some belonged to the youth movement of the African National Congress, and others (probably a greater number) to the "Sons of Young Africa" organization, the junior branch of the All-African Convention. These were in touch with the leaders of their organizations, who had apparently been led by the College's unique position and by the national and international interest in it into "the unhappy policy of using it as the spearhead of a national political struggle." The report noted that there was "much indifference and a good deal of active hostility towards Christianity among the students," and that "all the usual Leftist ideas of religion being the opiate of the masses are found, combined with African nationalist views of the missionary as the agent of the conqueror."

The commission suggested that part of the present difficulties arose from the fact that the College had outgrown "an interpretation of discipline on high school rather than university lines." Its recommendations included (*a*) informal discussions between representatives of the College and Native political leaders, who "could be asked to direct their members at Fort Hare not to confuse the political struggle outside the College with resistance to discipline and constituted authority inside it"; (*b*) the abolition of compulsory attendance at religious services; (*c*) the establishment of Chairs of law and music and of departments of commerce and physical education; and (*d*) the encouragement of co-operation between the College and Rhodes University, to which it is affiliated.—(Cape Times)

E. WESTERN GERMANY. — German Credit for Turkey. - Krupp Contracts in Greece and Turkey.

German credits totalling 325,000,000 DM. for Turkish purchases in Western Germany were opened early in August. 225,000,000 DM., of the total, guaranteed by the German Federal Government and designed to cover German exporters for 70 per cent of their sales to Turkey, had been provided for in an agreement signed between the two countries in Ankara on Dec. 22, 1954. It was stated at the time that 180,000,000 DM. would be allotted to capital goods purchased by Turkish State enterprises and 45,000,000 DM. to consumer goods for private enterprise. It was understood that part of this credit—which was additional to an earlier credit of 180,000,000 DM. granted in May, 1954, for the building of a number of cement factories and the purchase of ships in Western Germany—would be used for the building of a synthetic ammonia plant to manufacture nitrogen fertilizers. The remaining 100,000,000 DM. of the total were extended to the Turkish Government by the Reconstruction Credit Institute (Frankfurt) to finance Turkish purchases of German goods and services in connexion with economic development schemes.

The Krupp Company (Essen) sighed a contract worth more than £6,500,000 on Aug. 10 for the exploitation of brown coal (lignite) deposits in Greece and for the building in that country of a briquette factory, a coke installation, and an electrical power plant. The project, based on the Ptolemais lignite deposits, will provide the basis for a considerable expansion of Greek electrical power supplies to help industrialization schemes.

Krupps also signed a contract with the Turkish Government in July for the construction of a 600,000-ton steel plant, which was expected to be built in the Aegean coastal area. The estimated cost of £T.150,000,000 will be financed by German long-term credits and by Turkish banks.

A. GOLD COAST. — Agitation by Opposition Parties for Federal Constitution. - Sir Frederick Bourne appointed Adviser to Gold Coast Government and Parties.

An agitation in favour of a federal form of government for the Gold Coast was launched during the autumn of 1954 by a new Opposition party which had been founded in September under the name of the National Liberation Movement (N.L.M.). The N.L.M. received strong support from the Ashanti tribe, which had previously supported the Convention People's Party (C.P.P.)—the governing party led by Dr. Nkrumah, the Prime Minister. The Asantehene (paramount chief of the Ashanti), Sir Agyeman Prempeh II, and his Council adopted on Oct. 21, 1954, a resolution endorsing the demand for a federal Constitution, and requesting the Queen to set up a commission of inquiry into the project; in reply to this petition, however, the British Government suggested that as the Gold Coast had internal self-government, the question of the Constitution should be settled without outside interference. Dr. Nkrumah, who described the demand for federation as "fantastic," subsequently proposed in December the holding of a round-table conference on the subject, this proposal was rejected on Dec. 17 by the Asanteman (Ashanti) Council and the N.L.M., which stated that they were willing to discuss their demands with the Governor but not with "a party leader." A second proposal for a conference, made by Dr. Nkrumah in a broadcast on Dec. 30, was also rejected by the Council and the N.L.M. on Feb. 4, 1955.

Dr. Nkrumah recalled in his broadcast that the present Constitution had been drawn up after exhaustive consideration of the views of representatives from all parts of the Gold Coast, and had been unanimously supported in the Legislature, no mention being made of a federal form of government. In negotiating with the British Government, the Gold Coast Government could not divest itself of its responsibility to be bound by the views of the Assembly, although it was prepared to examine those of other bodies. Whilst declaring that a federal Government was impracticable, he reaffirmed his willingness to discuss with the Asanteman Council both this question and proposals which had been put forward for the establishment of a Second Chamber. He suggested that underlying the Ashanti demands was a desire for closer consultation by the Government with the regions in matters of regional interest, and gave an assurance that the Government was prepared to submit legislation to the Assembly providing for representative regional councils in regions where they did not already exist. Steps were also being taken to establish in the interim period, before regional councils were set up, an *ad hoc* development committee for Ashanti. In conclusion, Dr. Nkrumah emphasized that the Government would not tolerate the use of violence, and appealed for a peaceful and constitutional solution of all differences.

Despite Dr. Nkrumah's warning against violence, a series of incidents took place in Kumasi (capital of the Ashanti region) during the first week of January, in which two people were killed, about 50 arrested, and attempts made to blow up the houses of the Ashanti regional chairman of the C.P.P. and of a chief who had refused to support the federation movement. A proclamation forbidding the carrying of arms in Kumasi and 29 other Ashanti towns was issued on Jan. 7 by the Governor, Sir Charles Arden-Clarke. Further rioting, in which a C.P.P. supporter was killed and several people injured, took place near Kumasi on May 14, and in view of the tension in the town a state of emergency was declared and a curfew imposed.

The federalist movement increased in strength during the early months of 1955. Mr. Appiah (formerly Dr. Nkrumah's personal representative in London, and a son-in-law of the late Sir Stafford Cripps), together with a number of other leading members of the C.P.P., joined the N.L.M. in February and issued statements accusing the Government of corruption and nepotism, and criticizing in particular its failure to investigate allegations of bribery in the Cocoa Marketing Board and the Cocoa Purchasing Company. On March 9 the Northern People's Party, which forms the official Opposition in the Legislative Assembly, announced its support for federation, on the ground that the Government had paid insufficient attention to the needs of the Northern Territories. On July 16 Mr. B. F. Kusi (a member of the N.L.M. executive), standing as an Independent with the support of the N.L.M. and the Moslem Association, defeated the C.P.P. candidate by a majority of 2,240 in a by-election in an Ashanti constituency; this result was regarded as a serious setback for the Government, in view of the fact that in the 1954 general elections Mr. Kusi, then standing as a Ghana Congress Party candidate, had been defeated by the C.P.P. candidate in the same constituency by a majority of over 2,000. His victory in the by-election, and the progress made by the federalist movement generally, were attributed largely to discontent among Ashanti farmers at the level of cocoa prices fixed by the Government, which Mr. Kusi made a central issue in his campaign.

A select committee was appointed on April 5, on the proposal of Dr. Nkrumah, to examine the question of a federal system of government and the establishment of a Second Chamber for chiefs and others. It submitted its report on July 27.

The committee rejected federation on the grounds that the cost of running both a central and regional Government would be disproportionate to its advantages, and that it would be impossible to find sufficient qualified Africans to fill the many posts that would be necessary. It recognized the need for effective machinery for consultation at regional level, however, and therefore recommended the establishment of regional consultative councils to ensure full collaboration between the Government and the regions in the planning of development. The committee also rejected the proposal for a Second Chamber, but suggested that the question might be re-examined after the attainment of independence by the Gold Coast.

When the report was debated by the Legislative Assembly on Aug. 8, the Leader of the Opposition, Mr. Dombo, announced that they would boycott the debate because they had taken no part in the appointment or the proceedings of the committee, and would press for the setting-up of a Constituent Assembly. Dr. Nkrumah suggested during the debate that the Gold Coast's population of 5,000,000 was too small to support a federal form of government, and pointed out that the Government was already assisting the chiefs and had made grants of £700,000 for the strengthening of local and district councils, £500,000 for the development of regional councils and regional development committees, and £136,000 for the building of regional council halls. The Assembly adopted the committee's report on Aug. 9, and approved a Government proposal inviting the British Colonial Secretary to appoint an expert to advise the Gold Coast Government on the establishment and functions of regional councils.

Professor K. A. Busia (chairman of the Ghana Congress Party) had previously visited London in July as an emissary of the Asantehene and the Opposition parties, and had had an interview on July 6 with the Colonial Secretary, Mr. Lennox-Boyd, who suggested that the N.L.M should submit details of its proposals to the Governor. At a press conference on July 8 Professor Busia said that the Opposition parties proposed that an inquiry should be held into allegations of corruption, that a constitutional expert should visit the Gold Coast and make recommendations, and that a new Constitution should be discussed and fresh elections held. He accused the C.P.P. of misuse of public funds for party purposes, of discrimination against non-party members, of disregard for Ashanti traditions, and of tending to regard the chiefs, who were an essential part of Ashanti culture, as "museum pieces" The introduction of a federal Constitution, he contended, would prevent "dictatorship" and over-centralization of power, and make possible the emergence of an effective Opposition, first on a regional and then possibly on a national basis

In accordance with Mr. Lennox-Boyd's suggestion, the Opposition parties submitted proposals for a federal Constitution to Sir Charles Arden-Clarke on Aug. 12, the main features of which were as follows:

(1) The Gold Coast would become a Federal Union consisting of four Regions: the Gold Coast Colony, Ashanti, the Northern Territories, and Togoland. The Queen, as Head of the Union, would be represented by a Governor-General appointed by her on the advice of the Federal Ministers The Asantehene would be the head of the Ashanti Region, whilst Governors would be appointed for the other Regions by the Governor-General after consulting the Council of State.

(2) The Federal Parliament would consist of an Upper House, partly elected for six years and partly appointed, and a Lower House elected for four years. The Council of Ministers would be appointed by the Governor-General in consultation with the leader commanding a working majority in the Lower House, who would become Prime Minister. The Federal Legislature would have power to make laws for peace, order, and the good government of the Union.

(3) The Regional Legislatures would consist of an Upper House consisting of all the chiefs and a Lower House elected by adult suffrage, and would have power to legislate on matters not specifically assigned to the Federal Legislature. Each Region would have its own Prime Minister and Council of Ministers.

(4) A Council of State, consisting of the heads of the Regions, the Federal and Regional Premiers, and the Federal Ministers of Defence, the Interior, and Justice, would advise the Governor-General.

(5) Revenue would be collected by the Federal Exchequer and divided among the Regions according to population, need, national expenditure, independent revenue, and derivations.

(6) Judicial power would be vested in a Federal Supreme Court and Regional High Courts. Appeals from the High Courts would go to the Supreme Court, and then to the Privy Council

(7) Any alteration of the Constitution would need to be approved by an absolute majority of both Houses of the Federal Legislature.

On Sept. 19 Mr. Lennox-Boyd appointed Sir Frederick Bourne, a former Governor of the Central Provinces and Berar in British India, and from 1947-50 Governor of East Bengal (Pakistan), as adviser to the Gold Coast Government and to all parties and organizations wishing to avail themselves of his services on constitutional matters connected with the devolution of powers

to regions. The Opposition parties, however, informed the Governor on Sept. 21 that they would boycott Sir Frederick Bourne if his terms of reference did not include investigation of the present political crisis in the Gold Coast.

Sir Frederick Bourne arrived in Accra on Sept. 26, when it was officially announced that he would not only advise the Gold Coast Government on the organization and functions of regional councils but would also assist in resolving the present constitutional crisis. The official statement added that Sir Frederick would be " free to receive the views of the National Liberation Movement on constitutional matters and would put their views to the Government with his observations."
(Times - Daily Telegraph - Manchester Guardian - New Commonwealth) **(Prev. rep. Gold Coast, 13649 A.)**

A. UNITED STATES. — New England Flood Disaster.

Severe flooding was caused in the New England States of Pennsylvania, Connecticut, Massachusetts, New Jersey, and Rhode Island as a result of torrential rains on Aug. 18-19, when the fringe of a hurricane (code-name "Diane") passed over the area. Thousands of acres of land were inundated when rivers and streams burst their banks; at least 140 people lost their lives and over 34,000 families were forced to leave their homes; and 922 homes were completely destroyed and over 14,000 damaged. The total damage was estimated at $1,677,000,000 and tens of thousands of people were put out of work by damage to or the destruction of factories, offices and shops. The States of Pennsylvania, Connecticut, and Massachusetts, " all flooded areas of New Jersey," and the Woonsocket area of Rhode Island were declared " major disaster areas " by President Eisenhower, as was also the State of South Carolina, which had been hit by the hurricane earlier.

The heaviest material damage was suffered in **Connecticut**, where the Naugatuck river flooded and caused extensive damage to the towns of Litchfield, Torrington, Waterbury, Winsted, Ansonia, Seymour, Naugatuck, and Putnam; 13 communities were declared " health hazard areas " as a result of the polluted water supply and contaminated food. In **Pennsylvania**, where the heaviest loss of life occurred, 31 women and children were killed in a camp in the Pocono mountains near Stroudsburg The town of Stroudsburg itself, as well as Scranton, Easton, Hazelton, Tamaqua, Reading, Wilkes-Barre, and Pottstown, were all damaged by flood-water and were without gas, water and electricity for several days. In the Woonsocket area of **Rhode Island** 500 families were evacuated and almost the entire city of Woonsocket (population 50,000) was without drinking water. The **Massachusetts** towns of Springfield, Chicopee, Holyoke and Worcester were the most severely affected in that State, whilst in **New York** Port Jervis was declared a disaster area by Governor Harriman. In **New Jersey** thousands of people in Trenton had to flee from their homes, and the towns of Clinton, Philippsburg, Pequannock, and Oakland also suffered severe flooding

President Eisenhower, who flew over the flooded areas, authorized the immediate expenditure of Federal funds for flood relief (the amount was not specified). A flood relief fund was opened by the American Red Cross and, apart from contributions sent by businesses and individuals in the United States, money was sent by the Soviet Union, Australia, Austria, the Dominican Republic, the New Zealand Red Cross, and Puerto Rico. Private gifts were also sent from the Netherlands, the United Kingdom, and other countries, the British Government announcing that the Bank of England would authorize applications for the remittance of " reasonable sums " for this purpose.—(New York Times - New York Herald Tribune) **(Prev. rep. 1936 Flood Disaster, 2043 G.)**

B. DENMARK - UNITED KINGDOM. — Renewal of Bacon Agreement.

It was announced in London and Copenhagen on Sept. 15 that, as a result of discussions in Copenhagen between representatives of the British Ministry of Agriculture, Fisheries and Food and the Danish Bacon Board, it had been agreed that the minimum price to be paid by Britain for Danish bacon in the year beginning Oct. 2, 1955 (i.e. the last year of the existing contract) would be " related to the price realized for Danish bacon in Great Britain, " with a minimum of 240s. a cwt. This figure compared with a minimum price of 237s. 6d. a cwt. in the previous 12 months.

A spokesman of the Ministry in London explained that, although the minimum price had only been increased by 2s. 6d. a cwt., the new arrangement—which would be related to the price in the U.K. market from week to week—would enable Denmark to share in any additional profits whenever the price exceeded this minimum.

The quantity of bacon to be delivered by Denmark during the 12 months will be 208,000 tons, compared with the maximum of 200,000 tons originally agreed upon for the third year of the agreement. The quantity shipped in the year ending Oct. 1, 1955, was expected to be about 220,000 tons.
(Financial Times) **(Prev. rep. 13847 A.)**

C. ZANZIBAR. — Constitutional Reform Proposals.

Proposed measures for constitutional development in Zanzibar, contained in a statement by the British Resident in Zanzibar (Mr. H. S. Potter), were published by the Colonial Office in London on Oct. 2.

The statement said that it was the wish of the British Government and of the Sultan that Zanzibar should, by appropriate stages, attain internal self-government within the Commonwealth. There had been a growing demand for some measure of constitutional advance, but although the agreement of all the unofficial members of the Legislative Council to certain proposals had been obtained in March 1954, there had been a divergence of opinion " on certain questions " and the matter had been delayed in the hope of obtaining unanimity. This hope had not been fulfilled, but since the proposals were confidently believed to be acceptable to the great majority of the inhabitants of the Protectorate and had received the Sultan's approval, it was considered that any further postponement would be unjustified

With the agreement of the Colonial Secretary (the statement continued) it was therefore the Zanzibar Government's intention to put the following proposals before the Legislative Council for its consideration at an early date:

(1) A Privy Council should be established, presided over by the Sultan, to advise the latter on any matters on which he might require advice. Its members would at first be the British Resident, the Chief Secretary, the Attorney-General, and not more than three other persons nominated by the Sultan.

(2) The Executive Council, as the chief instrument of policy, should consist of the British Resident (as president), four *ex-officio* members as at present (the Chief Secretary, Attorney-General, Senior Commissioner, and Financial Secretary), three official members to be nominated by the Sultan on the advice of the British Resident, as at present, and, in addition, three unofficial members, similarly nominated. Mr Potter's statement added " In providing for three unofficial members, the intention would be to make it possible to appoint one Arab, one African, and one Indian The unofficial members would normally be drawn from among the unofficial members of the Legislative Council."

(3) The Legislative Council should consist of the British Resident (as president), four *ex-officio* members (the *ex-officio* members of the Executive Council), and nine official members and 12 unofficial members nominated by the Sultan on the advice of the British Resident It was proposed that the 12 unofficial members should be four Arabs, four Africans, three Indians, and probably one European, though this was not intended to imply that the unofficial members of the Legislative Council would represent only the members of their own communities.

A qualified person would be invited to hold an inquiry and to advise on the most suitable method of choosing the unofficial members of the Legislative Council, although it was intended in the first instance to make no change in the existing method of appointing members.

Zanzibar has been a British Protectorate since 1890, in which year it was ceded by Germany to Britain in exchange for Heligoland. It was under the control of the Foreign Office until 1913, when it was transferred to the Colonial Office. The Government is administered by a British Resident. There is an Executive Council presided over by the Sultan, and a Legislative Council of 16 members (4 *ex officio*, 5 official, 8 unofficial) under the chairmanship of the Resident.

D. FRANCE - WESTERN GERMANY. — Civil Aviation Agreement.

An air transport agreement between France and the German Federal Republic was signed in Paris on Oct. 4. It provided for flight and landing rights for air services between the two countries, as well as transit rights on the following international routes:

France was granted the right to fly two services over Germany, one to Austria and South-Eastern Europe and the other to Indo-China, Japan, Australia, and New Caledonia.

Western Germany obtained the right to fly the following five services: (*a*) *via* Nice and Bordeaux to Spain and Portugal; (*b*) *via* Paris to Brazil, Argentina, and Chile; (*c*) *via* Paris to Venezuela, Colombia, and Peru; (*d*) *via* Brazzaville to South Africa; (*e*) *via* Paris to Shannon (Eire) and New York.

The Franco-German agreement followed the similar agreements recently concluded by Western Germany with Britain and the United States.—(Le Monde, Paris - Frankfurter Allgemeine Zeitung) **(Prev. rep. 14348 B.)**

E. INDIA. — Loan to Burma.

It was announced in Delhi on Sept. 20 that India had agreed to give Burma a loan of 100,000,000 rupees (£7,500,000) at the request of the Burmese Government. In addition, Burma would also be granted a credit of the same amount to enable her to finance her purchases in India.—(Indian High Commissioner's Office, London) **(Prev. rep. 13468 C.)**

A. UNITED KINGDOM. — Government White Paper on Disappearance of Guy Burgess and Donald Maclean.

An official report on the disappearance in 1951 of two Foreign Office officials, Mr. Donald Maclean and Mr. Guy Burgess, was published by the Government as a White Paper (Cmd. 9577) on Sept. 23. The decision to publish such a report was taken as a result of an article published in a Sunday newspaper, *The People*, by Mr. Vladimir Petrov, formerly of the Soviet Embassy in Canberra, who broke with the Soviet Government and sought refuge in Australia in 1954 (see 13540A).

Mr. Petrov alleged in this article that Maclean and Burgess were long-term Soviet agents who had been recruited for intelligence work while still students at Cambridge, and who had regularly supplied the Soviet Government with information. He said that they had left Britain to seek asylum because they had discovered that they were under investigation by the security services. Petrov claimed that he came to know about Maclean and Burgess through an agent, Kislytzin, who had been his subordinate in the Australian branch of the Soviet secret service Kislytzin had previously worked as a cipher clerk in the Soviet Embassy in London from 1945 to 1948, and before going to Australia had been in charge of the department in Moscow which dealt with information alleged to have been supplied by Maclean and Burgess

The text of the White Paper is given below (cross-headings inserted).

Disappearance of Maclean and Burgess. "On the evening of Friday, May 25, 1951, Mr. Donald Duart Maclean, a Counsellor in the senior branch of the Foreign Service and at that time Head of the American Department in the Foreign Office, and Mr Guy Francis de Moncy Burgess, a Second Secretary in the junior branch of the Foreign Service, left the United Kingdom from Southampton on the boat for St Malo. The circumstances of their departure from England, for which they had not sought sanction, were such as to make it obvious that they had deliberately fled the country. Both officers were suspended from duty on June 1, 1951, and their appointments in the Foreign Office were terminated on June 1, 1952, with effect from June 1, 1951

Maclean's Background and Career. Maclean was the son of a former Cabinet Minister, Sir Donald Maclean. He was born in 1913 and educated at Gresham's School, Holt, and Trinity College, Cambridge, where he had a distinguished academic record He successfully competed for the Diplomatic Service in 1935 and was posted in the first instance to the Foreign Office. He served subsequently in Paris, Washington, and Cairo. He was an officer of exceptional ability and was promoted to the rank of Counsellor at the early age of 35 He was married to an American lady and had two young sons A third child was born shortly after his disappearance

In May, 1950, while serving at H.M. Embassy in Cairo, Maclean was guilty of serious misconduct and suffered a form of breakdown which was attributed to overwork and excessive drinking. Until the breakdown his work had remained eminently satisfactory and there was no ground whatsoever for doubting his loyalty. After recuperation and leave at home he was passed medically fit, and in October, 1950, was appointed to be Head of the American Department of the Foreign Office, which, since it does not deal with the major problems of Anglo-American relations, appeared to be within his capacity.

Since Maclean's disappearance a close examination of his background has revealed that during his student days at Cambridge from 1931 to 1934 he had expressed Communist sympathies, but there was no evidence that he had ever been a member of the Communist Party, and indeed on leaving the university he had outwardly renounced his earlier Communist views.

Burgess's Background and Career. Burgess was born in 1911 and was educated at the Royal Naval College, Dartmouth, at Eton, and at Trinity College, Cambridge, where he had a brilliant academic record. After leaving Cambridge in 1935 he worked for a short time in London as a journalist and joined the B.B.C. in 1936, where he remained until January, 1939 From 1939 until 1941 he was employed in one of the war propaganda organizations. He rejoined the B.B C. in January, 1941, and remained there until 1944, when he applied for and obtained a post as a temporary Press officer in the News Department of the Foreign Office.

He was not recruited into the Foreign Service through the open competitive examination, but in 1947 took the opportunity open to temporary employees to present himself for establishment. He appeared before a Civil Service Commission Board and was recommended for the junior branch of the Foreign Service His establishment took effect from Jan 1, 1947 He worked for a time in the office of the then Minister of State, Mr. Hector McNeil, and in the Far Eastern Department of the Foreign Office. In August, 1950, he was transferred to Washington as a Second Secretary.

Early in 1950 the security authorities informed the Foreign Office that in late 1949, while on holiday abroad, Burgess had been guilty of indiscreet talk about secret matters of which he had official knowledge. For this he was severely reprimanded. Apart from this lapse, his service in the Foreign Office up to the time of his appointment to Washington was satisfactory and there seemed good reason to hope that he would make a useful career.

In Washington, however, his work and behaviour gave rise to complaint. The Ambassador reported that his work had been unsatisfactory in that he lacked thoroughness and balance in routine matters, that he had come to the unfavourable notice of the Department of State because of his reckless driving, and that he had had to be reprimanded for carelessness in leaving confidential papers unattended. The Ambassador requested that Burgess be removed from Washington, and this was approved He was recalled to London in early May, 1951, and was asked to resign from the Foreign Service. Consideration was being given to the steps that would be taken in the event of his refusing to do so. It was at this point that he disappeared.

Investigations into Burgess's past have since shown that he, like Maclean, went through a period of Communist leanings while at Cambridge, and that he, too, on leaving the university outwardly renounced his views No trace can be found in his subsequent career of direct participation in the activities of left-wing organizations; indeed he was known after leaving Cambridge to have had some contact with organizations such as the Anglo-German Club.

Friendship between Maclean and Burgess. The question has been asked whether the association of these two officers with each other did not give rise to suspicion The fact is that although we have since learned that Maclean and Burgess were acquainted during their undergraduate days at Cambridge, they gave no evidence during the course of their career in the Foreign Service of any association other than would be normal between two colleagues.

When Burgess was appointed to the Foreign Office Maclean was in Washington, and at the time Burgess himself was appointed to Washington Maclean was back in the United Kingdom awaiting assignment to the American Department of the Foreign Office It is now clear that they were in communication with each other after the return of Burgess from Washington in 1951, and they may have been in such communication earlier Their relations were, however, never such as to cause remark

Leakage of Foreign Office Information. In January, 1949, the security authorities received a report that certain Foreign Office information had leaked to the Soviet authorities some years earlier. The report amounted to little more than a hint and it was at the time impossible to attribute the leak to any particular individual. Highly secret but widespread and protracted inquiries were begun by the security authorities, and the field of suspicion had been narrowed by mid-April, 1951, to two or three persons.

By the beginning of May, Maclean had come to be regarded as the principal suspect. There was, however, even at that time, no legally admissible evidence to support a prosecution under the Official Secrets Acts Arrangements were made to ensure that information of exceptional secrecy and importance should not come into his hands In the meantime the security authorities arranged to investigate his activities and contacts in order to increase their background knowledge and, if possible, to obtain information which could be used as evidence in a prosecution

On May 25 the then Secretary of State, Mr. Herbert Morrison, sanctioned a proposal that the security authorities should question Maclean In reaching this decision it had to be borne in mind that such questioning might produce no confession or voluntary statement from Maclean sufficient to support a prosecution, but might serve only to alert him and to reveal the nature and extent of the suspicion against him. In that event he would have been free to make arrangements to leave the country, and the authorities would have had no legal power to stop him.

Everything therefore depended on the interview, and the security authorities were anxious to be as fully prepared as was humanly possible They were also anxious that Maclean's house at Tatsfield, Kent, should be searched, and this was an additional reason for delaying the proposed interview until mid-June, when Mrs. Maclean, who was then pregnant, was expected to be away from home

Flight of Maclean and Burgess. It is now clear that, in spite of the precautions taken by the authorities, Maclean must have become aware, at some time before his disappearance, that he was under investigation. One explanation may be that he observed that he was no longer receiving certain types of secret papers. It is also possible that he detected that he was under observation Or he may have been warned. Searching inquiries involving individual interrogations were made into this last possibility. Insufficient evidence was obtainable to form a definite conclusion or to warrant prosecution.

Maclean's absence did not become known to the authorities until the morning of Monday, May 28. The Foreign Office is regularly open for normal business on Saturday mornings, but officers can from time to time obtain leave to take a week-end off. In accordance with this practice Maclean applied for and obtained leave to be absent on the morning of Saturday, May 26. His absence therefore caused no remark until the following Monday morning, when he failed to appear at the Foreign Office. Burgess was on leave and under no obligation to report his movements.

Immediately the flight was known, all possible action was taken in the United Kingdom, and the French and other Continental security authorities were asked to trace the whereabouts of the fugitives and if possible to intercept them. All British Consulates in Western Europe were alerted, and special efforts were made to discover whether the fugitives had crossed the French frontiers on May 26 or 27.

As a result of these and other inquiries, it was established that Maclean and Burgess together left Tatsfield by car for Southampton in the late evening of Friday, May 25, arrived at Southampton at midnight, caught the s s *Falaise* for St Malo, and disembarked at that port at 11 45 the following morning, leaving suitcases and some of their clothing on board. They were not seen on the train from St Malo to Paris, and it has been reported that two men, believed to be Maclean and Burgess, took a taxi to Rennes and there got the 1.18 train to Paris. Nothing more was seen of them.

Subsequent Messages received from Maclean and Burgess. Since the disappearance various communications have been received from them by members of their families. On June 7, 1951, telegrams ostensibly from Maclean were received by his mother, Lady Maclean, and his wife, Mrs. Melinda Maclean, who were both at that time in the United Kingdom. The telegram to Lady Maclean was a short personal message, signed by a nickname known only within the immediate family circle. It merely stated that all was well. That addressed to Mrs. Maclean was similar, expressing regret for the unexpected departure and was signed 'Donald.' Both telegrams were dispatched in Paris on the evening of June 6. Their receipt was at once reported to the security authorities, but it was impossible to identify the person or persons who had handed them in. The original telegraph forms showed, however, that the messages had been written in a hand which was clearly not Maclean's. The character of the handwriting, and some mis-spelling, suggested that both telegrams had been written by a foreigner.

On June 7, 1951, a telegram was received in London by Mrs. Bassett, Burgess's mother. It contained a short and affectionate personal message, together with a statement that the sender was embarking on a long Mediterranean holiday, and was ostensibly from Burgess himself The telegram had been handed in at a Post Office in Rome earlier on the day of its receipt. As with the telegrams from Paris to Maclean's family, there was no possibility of identifying the person who had handed it in. The handwriting had the appearance of being foreign, and was certainly not that of Burgess.

According to information given to the Foreign Office in confidence by Mrs. Dunbar, Maclean's mother-in-law, who was then living with her daughter at Tatsfield, she received on Aug 3, 1951, two registered letters posted in St. Gallen, Switzerland, on Aug. 1. One contained a draft on the Swiss Bank Corporation, London, for the sum of £1,000 payable to Mrs Dunbar; the other, a draft payable to Mrs. Dunbar for the same sum. . . Both drafts were stated to have been remitted by order of a Mr Robert Becker, whose address was given as the Hotel Central, Zurich Exhaustive inquiries in collaboration with the Swiss authorities have not led to the identification of Mr. Becker, and it is probable that the name given was false.

Shortly after the receipt of these bank drafts, Mrs Maclean received a letter in her husband's handwriting. It had been posted in Reigate, Surrey, on Aug 5, 1951, and was of an affectionate, personal nature as from husband to wife It gave no clue as to Maclean's whereabouts or the reason for his disappearance, but it explained that the bank drafts, which for convenience had been sent to Mrs. Dunbar, were intended for Mrs Maclean

Lady Maclean received a further letter from her son on Aug. 15, 1951. There is no doubt that it was in his own handwriting It had been posted at Herne Hill [South London] on August 11.

Mrs. Bassett, the mother of Burgess, received a letter in Burgess's handwriting on Dec. 22, 1953. The letter was personal and gave no information as to Burgess's whereabouts. It was simply dated 'November' and had been posted in South-East London on December 21.

The last message received from either of the two men was a further letter from Burgess to his mother, which was delivered in London on Dec. 25, 1954. The letter was also personal and disclosed nothing of Burgess's whereabouts. It, too, was simply dated 'November.' It had been posted in Poplar [London, E.14] on December 23.

Disappearance of Mrs. Maclean. On Sept. 11, 1953, Mrs. Maclean, who was living in Geneva, left there by car with her three children She had told her mother, who was staying with her, that she had unexpectedly come across an acquaintance whom she and her husband had previously known in Cairo and that he had invited her and the children to spend the week-end with him at Territet, near Montreux. She stated that she would return to Geneva on Sept. 13 in time for the two elder children to attend school the following day.

By Sept. 14 her mother, alarmed at her failure to return, reported the matter to H.M Consul-General in Geneva and also by telephone to London. Security officers were at once dispatched to Geneva, where they placed themselves at the disposal of the Swiss police, who were already making intensive inquiries. On . . . Sept. 16 Mrs Maclean's car was found in a garage in Lausanne. She had left it on the afternoon of the 11th, saying she would return for it in a week The garage hand who reported this added that Mrs. Maclean had then proceeded with her children to the Lausanne railway station.

On the same day, Sept. 16, Mrs Dunbar reported to the Geneva police the receipt of a telegram purporting to come from her daughter The telegram explained that Mrs. Maclean had been delayed 'owing to unforeseen circumstances' and asked Mrs. Dunbar to inform the school authorities that the two elder children would be returning in a week. Mrs. Maclean's youngest child was referred to in this telegram by a name known only to Mrs. Maclean, her mother, and other intimates. The telegram had been handed in at the post office in Territet at 10.58 that morning by a woman whose description did not agree with that of Mrs Maclean. The handwriting on the telegram form was not Mrs Maclean's, and it showed foreign characteristics similar to those in the telegrams received in 1951 by Lady Maclean, Mrs Maclean, and Mrs. Bassett.

From information subsequently received from witnesses in Switzerland and Austria, it seems clear that the arrangements for Mrs. Maclean's departure from Geneva had been carefully planned, and that she proceeded by train from Lausanne on the evening of Sept. 11, passing the Swiss - Austrian frontier that night, and arriving at Schwarzach St. Veit, in the American zone of Austria, at approximately 9.15 on the morning of Sept. 12.

The independent evidence of a porter at Schwarzach St. Veit and of witnesses travelling on the train has established that she left the train at this point. Further evidence, believed to be reliable, shows that she was met at the station by an unknown man driving a car bearing Austrian number-plates. The further movements of this car have not been traced. It is probable that it took Mrs Maclean and the children from Schwarzach St. Veit to neighbouring territory in Russian occupation, whence she proceeded on her journey to join her husband.

There was no question of preventing Mrs. Maclean from leaving the United Kingdom to go to live in Switzerland. Although she was under no obligation to report her movements, she had been regularly in touch with the security authorities, and had informed them that she wished to make her home in Switzerland She gave two good reasons, firstly, that she wished to avoid the personal embarrassment to which she had been subjected by the Press in the United Kingdom; and secondly, that she wished to educate her children in the International School in Geneva.

It will be remembered that Mrs. Maclean was an American citizen, and in view of the publicity caused by her husband's flight it was only natural that she should wish to bring up her children in new surroundings. Before she left for Geneva the security authorities made arrangements with her whereby she was to keep in touch with the British authorities in Berne and Geneva in case she should receive any further news from her husband or require advice or assistance Mrs. Maclean was a free agent The authorities had no legal means of detaining her in the United Kingdom. Any form of surveillance abroad would have been unwarranted.

Present Whereabouts of Maclean and Burgess. In view of the suspicions held against Maclean and of the conspiratorial manner of his flight, it was assumed, though it could not be proved, that his destination and that of his companion must have been the Soviet Union or some other territory behind the Iron Curtain. Now Vladimir Petrov, the former Third Secretary of the Soviet Embassy in Canberra, who sought political asylum on April 3, 1954, has provided confirmation of this.

Petrov himself was not directly concerned in the case, and his information was obtained from conversations with one of his colleagues in Soviet service in Australia. Petrov states that both Maclean and Burgess were recruited as spies for the Soviet Government while students at the university, with the intention that they should carry out their espionage tasks in the Foreign Office, and that in 1951, by means unknown to him, one or other of the two men became aware that their activities were under investigation. This was reported by them to the Soviet intelligence service, who then organized their escape and removal to the Soviet Union.

Petrov has the impression that the escape route included Czechoslovakia, and that it involved an aeroplane flight into that country Upon their arrival in Russia, Maclean and Burgess lived near Moscow. They were used as advisers to the Ministry of Foreign Affairs and other Soviet agencies. Petrov added that one of the men (Maclean) has since been joined by his wife

Matters Calling for Comment. Two points call for comment . first, how Maclean and Burgess remained in the Foreign Service for so long; and, second, why they were able to get away.

When these two men were given their appointments, nothing was on record about either to show that he was unsuitable for the public service It is true that their subsequent personal behaviour was unsatisfactory, and this led to action in each case As already stated, Maclean was recalled from Cairo in 1950 and was not re-employed until he was declared medically fit. Burgess was recalled from Washington in 1951 and was asked to resign. It was only shortly before Maclean disappeared that serious suspicion of his reliability was aroused and active inquiries were set on foot.

The second question is how Maclean and Burgess made good their escape from this country when the security authorities were on their track. The watch on Maclean was made difficult by the need to ensure that he did not become aware that he was under observation. This watch was primarily aimed at collecting, if possible, further information and not at preventing an escape In imposing it a calculated risk had to be taken that he might become aware of it and might take flight. It was inadvisable to increase this risk by extending the surveillance to his home in an isolated part of the country, and he was therefore watched in London only.

Both men were free to go abroad at any time. In some countries no doubt Maclean would have been arrested first and questioned afterwards. In this country, no arrest can be made without adequate evidence. At the time there was insufficient evidence. It was for these reasons necessary for the security authorities to embark upon the difficult and delicate investigation of Maclean, taking into full account the risk that he would be alerted. In the event he was alerted and fled the country together with Burgess.

Tightening-up of Security in Foreign Service. As a result of this case, in July, 1951, the then Secretary of State, Mr. Herbert Morrison, set up a committee of inquiry to consider the security checks applied to members of the Foreign Service; the existing regulations and practices of the Foreign Service in regard to any matters having a bearing on security, and to report whether any alterations were called for.

The Committee reported in November, 1951. It recommended, among other things, a more extensive security check on Foreign Service officers than had until then been the practice. This was immediately put into effect, and since 1952 searching inquiries have been made into the antecedents and associates of all those occupying or applying for positions in the Foreign Office involving highly secret information. The purpose of these inquiries is to ensure that no one

is appointed to or continues to occupy any such post unless he or she is fit to be entrusted with the secrets to which the post gives access. The Foreign Secretary of the day approved the action required.

Reasons for Ministerial Reticence. A great deal of criticism has been directed towards the reticence of ministerial replies on these matters, an attitude which, it was alleged, would not have been changed had it not been for the Petrov revelations Espionage is carried out in secret Counter-espionage equally depends for its success upon the maximum secrecy of its methods. Nor is it desirable at any moment to let the other side know how much has been discovered or guess at what means have been used to discover it. Nor should they be allowed to know all the steps that have been taken to improve security These considerations still apply and must be the basic criterion for judging what should or should not be published "

Mr. Herbert Morrison, Foreign Secretary in the Labour Government at the time of the disappearance of Burgess and Maclean, spoke of the case in a speech in his constituency (South Lewisham) on Sept. 30.

Mr. Morrison welcomed the Government's decision (announced after the publication of the report) to hold a debate on the matter when Parliament reassembled, and expressed the hope that certain considerations arising out of this " unhappy and scandalous experience " would receive fair attention The general principle of the security of Civil Servants in holding their positions was widely accepted, but he thought that in a strictly limited number of cases excessive efforts were made to protect men against the natural consequences of incompetence or other faults Stern action, fairly reached, in a limited number of cases when warranted might not only be just and in the public interest but might also have a good effect on the service as a whole

Another trouble, Mr Morrison said, was that the Foreign Secretary was " terribly hard worked " " I know from my own experience," he added, " that while the work . is enormously interesting, the burden is excessively heavy The question arises whether there can be some delegation [of powers] which will help him to carry the load As things are it is difficult for the Foreign Secretary to devote an adequate proportion of his time to the administrative problems of the Foreign Office and to personal matters affecting the staff, as is done by Ministers of the Home departments. I think it likely that the Foreign Office staff themselves feel restraint in putting too many of these matters before the Foreign Secretary, unless it becomes essential, because of their wish to protect him against too much detailed work—a motive which would do them no discredit It was for this, among other general reasons, that I made a suggestion that there should be a suitable form of inquiry into the work of the Foreign Secretary and the general organization of the [Foreign] Office. . . . It could be argued that a select committee of Parliament would be suitable, but I am inclined to think that a very small committee of Privy Councillors, drawn from both sides of the House of Commons, might be best "

Mr. Morrison said that sweeping allegations against the Foreign Office of general incompetence, inefficiency, and snobbery were unfair. Its average quality, both at home and abroad, was very high and the officials served their country with great ability and conscientiousness. (Cmd. 9577 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 13290 D.)**

A. YUGOSLAVIA - GREECE. — Greek Royal Visit to Yugoslavia. - President Tito's Statement on Cyprus Situation and Anti-Greek Riots in Turkey.

King Paul and Queen Frederika of Greece paid an official visit to Yugoslavia from Sept. 8-14, at the invitation of President Tito and the Yugoslav Government, during which they visited Belgrade, Zagreb, Ljubljana, Bled, Split, Dubrovnik, and the island of Brioni, where they spent two days as the guests of President and Mme. Tito.

In an interview to Greek press correspondents on Sept. 15, President Tito expressed Yugoslavia's support for Cypriot independence, and his concern at the recent outbreak of anti-Greek rioting in Turkey.

Asked about Yugoslavia's attitude to the Cyprus question, President Tito said " The policy of our government is unalterable regarding the right of self-determination of people in every country, including those countries in which this right is not enjoyed. . . . As regards the present situation in Cyprus, we hold that the matter should be treated in such a way as, on the one hand, to preserve co-operation and peace in the Balkans, and on the other, that it should be solved in time as the people of Cyprus demand."

Answering a question about the recent anti-Greek riots in Turkey, President Tito said : " We are saddened by the whole matter. . . . I think that what has happened is a lesson that everything must be done in the future to thwart certain irresponsible elements and the repetition of things of this kind. I believe that the Turkish Government's statement with reference to these events, and its willingness to make good the damage, is a sufficient guarantee that this unfortunate happening will be cleared up. I also believe that it will not have any severe repercussions on the Balkan alliance."

A communiqué issued in Belgrade on Sept. 14 said that the visit of King Paul and Queen Frederika had confirmed and strengthened the traditional friendship between Greece and Yugoslavia and would " result in the further consolidation of the foundations on which our allied relations are built."

(Tanjug Agency, Belgrade)

B. SOVIET UNION.—Amnesty for Wartime Collaborators. - Repatriation of German War Criminals.

A decree was issued on Sept. 17 by the Presidium of the Supreme Soviet granting an amnesty " to those Soviet citizens who, from faint-heartedness or irresponsibility, collaborated with the invaders during the war of 1941-45." Its provisions were as follows :

(1) Persons serving sentences of up to ten years for collaboration with the enemy during the war would be released.

(2) Persons serving prison terms of more than ten years would have their sentences reduced by half.

(3) Persons sentenced for having served in the German Army, police, or special formations would be released, irrespective of the length of their sentences. Those who had been sentenced to exile or deportation for such crimes would also be released

(4) The amnesty would not apply to members of punitive detachments sentenced for the murder and torture of Soviet citizens.

(5) Proceedings in all pending cases would be stopped, except in cases under (4) above.

(6) Citizenship rights would be restored to persons released under the amnesty, and also to those who had previously been released after having served their sentences

(7) (*a*) Soviet citizens now living abroad who surrendered to the enemy during the war, or served in the German Army, police, or special German formations, would not be held responsible.

(*b*) Soviet citizens living abroad who, during the war, held leading posts in the police, gendarmerie, or propaganda agencies set up by the occupation forces, including those who were drawn into anti-Soviet organizations after the war, would also not be held responsible " provided they have subsequently atoned for their guilt by patriotic activity for their country, or have admitted their guilt "

(*c*) Admission of guilt by Soviet citizens living abroad who had committed " serious crimes against the Soviet State " during the war would be considered a mitigating circumstance The penalty imposed upon such persons would not exceed exile for five years.

(8) The Council of Ministers was authorized " to take steps to facilitate the entry into the U.S.S.R. of Soviet citizens now living abroad, and also of their families regardless of their citizenship, and to arrange for their employment in the Soviet Union."

The Presidium of the Supreme Soviet announced on Sept. 28 that, in response to requests by the Governments of the German Democratic Republic and the German Federal Republic, it had been decided (1) to release 8,877 German citizens at present serving sentences for war crimes, and to repatriate them to their places of residence in Eastern or Western Germany; (2) to hand over to the East or West German Governments (depending on the places of residence of the persons concerned) 749 German war criminals who had committed especially grave crimes against Soviet citizens during the war. The two categories brought the total number of such persons to be repatriated to 9,626, in accordance with the undertaking given by Marshal Bulganin to Dr. Adenauer during the latter's recent visit to Moscow.—(Soviet Weekly - Manchester Guardian)

C. LEBANON. — New Government.

The Lebanese Prime Minister, M. Sami Solh, resigned on Sept. 13 after refusing a demand by the Chamber of Deputies to submit his Government to a vote of confidence. His resignation, tendered after a heated debate in which the Government's domestic policy was strongly criticized, had been preceded by the resignation of four of his Ministers.

After a Cabinet crisis lasting a week, President Shamoun asked M. Rashid Karame (33), Minister for National Economy in the outgoing Government, to form a new administration. M. Karame—who became Prime Minister for the first time—formed a ten-member Government on Sept. 19 which included only three members of M. Solh's Cabinet—M. Selim Lahoud (formerly Minister of Agriculture), who became Foreign Minister; Emir Majid Arslan, who remained Minister of Defence; and M. Karame himself.—(Le Monde, Paris)
(Prev. rep. 14331 B.)

D. UNITED STATES. — Revenue and Expenditure. - Figures for Fiscal Year 1954-55.

Official figures released by the Secretary of the Treasury and the Director of the Budget on July 20 showed that during the fiscal year 1954-55 (ending on June 30) the U.S. Government had incurred a budgetary deficit of $4,192,000,000, receipts having amounted to $60,303,000,000 and expenditure to $64,494,000,000. The deficit, which was some $1,000,000,000 more than in 1953-54, exceeded the President's estimate in his 1954 Budget message by about $1,300,000,000.

A. FINLAND - SOVIET UNION. — Visit of Finnish President and Prime Minister to Moscow. - 20-Year Extension of Finnish-Soviet Friendship Treaty. - Porkkala Naval Base returned to Finland by U.S.S.R.

The 84-year-old President of Finland, M. Juho Paasikivi, accompanied by the Finnish Prime Minister (Dr. Urho Kekkonen), the Defence Minister (M. Emil Skog), and the Deputy Foreign Minister (M. Svento), visited Moscow on Sept. 16-19 at the invitation of President Voroshilov and the Soviet Government.

After discussions at the Kremlin on Sept. 16 between Presidents Paasikivi and Voroshilov, meetings were held on Sept. 17-19 between the Finnish delegation, headed by Dr. Kekkonen, and a Soviet ministerial delegation led by Marshal Bulganin and including M. Khrushchov, M. Molotov, and M. Pervukhin. They resulted in the signing by Marshal Bulganin and Dr. Kekkonen of (1) a protocol extending for 20 years the Finnish-Soviet treaty of friendship and mutual assistance which had been concluded in 1948 (see 9228 A), and (2) an agreement whereby the Soviet Government undertook to evacuate, and to return to Finland, the naval base of Porkkala (12 miles south-west of Helsinki), which had been leased to the U.S.S.R. for 50 years under Article 4 of the Finnish Peace Treaty signed in 1947 (see 8517 A).

Extension of Finnish-Soviet Treaty. The original treaty of 1948 was valid for ten years and would therefore have expired in 1958 The new protocol provided (*a*) that the treaty would remain in force for 20 years as from the signing of the protocol (i e until 1975); (*b*) that it would be automatically renewable for five-year periods after 1975, unless either party denounced the treaty one year before the date of expiration, and (*c*) that the protocol would become effective on ratification by the Finnish and Soviet Parliaments, and after the exchange of instruments of ratification

The Porkkala Base. The agreement for the return of the Porkkala base to Finland consisted of five Articles, as follows .

(1) The Soviet Union would relinquish to Finland "all its rights to use and control those land and sea areas" which were leased to the U.S.S.R. for 50 years under the Finnish Peace Treaty Moreover, the U.S.S.R would relinquish all its rights to "rail, sea, road, and air traffic to the Porkkala peninsula, as well as its communication rights."

(2) The Soviet Union would withdraw all its troops from the Porkkala base within three months of the ratification of the agreement.

(3) All property at the Porkkala base (houses, warehouses, barracks, port facilities, etc.) would be returned by the Soviet Union to Finland "free of charges, taxes, and other possible expenses or rights."

(4) Neither country would charge the other any expenses arising from the presence of Soviet forces in the Porkkala area, or from the return of the area to Finland.

(5) The agreement would be ratified by the Finnish and Soviet Parliaments, and instruments of ratification exchanged in Helsinki.

Joint Communiqué. A joint communiqué said that the Finnish-Soviet negotiations had been held "in a spirit of friendship, heartiness, and mutual understanding." It continued ·

"Both parties unanimously believe that the treaty of friendship and mutual assistance signed between Finland and the Soviet Union in 1948 is a stable foundation for strengthening the friendly relations between the Soviet Union and Finland, and for helping to create friendly relations in the whole of northern Europe Both parties agreed to prolong the treaty for 20 years, and signed a protocol to this effect.

"Taking into consideration the friendly and neighbourly relations between the Soviet Union and Finland, and a certain relaxation of international tension, especially since the Geneva Conference of the four Heads of Government, the Soviet Union [has] found it possible to give up its rights to Porkkala, to liquidate its military and naval base, to evacuate its forces, and to hand the base over to Finland."

The Soviet Union's decision to return the Porkkala base to Finland had been announced by Marshal Bulganin on Sept. 18, during the discussions with the Finnish delegation. He added in this connexion :

"There can be no doubt that the liquidation of bases on foreign territories by other Powers as well would be an important contribution to the further lessening of international tension and to the removal of distrust between States, and would foster the creation of the necessary conditions for ending the armaments race."

President Paasikivi, speaking on Sept. 19 at a banquet given in his honour in the Kremlin, declared that the return of the Porkkala base to Finland would give "great joy" to the Finnish people.

After recalling that he had paid seven visits to the Soviet Union for negotiations on questions of Russo-Finnish concern, and had "usually returned unsatisfied," President Paasikivi said that now "for the first time I return to our capital satisfied." He added · "Eleven years ago I signed the agreement under which we lost Porkkala. Today I signed the agreement which returns it to us. I must say frankly that the loss of Porkkala was a serious thing for us. Porkkala is only 18 kilometres (12 miles) from Helsinki, and, to tell the truth, it was very inconvenient to have you [the Russians] there But everything is now comfortable again. . . ."

Warm tributes to President Paasikivi were paid by Marshal Voroshilov, who described the Finnish President as "not only a chief of State but chief among the best men I ever met," and by M. Khruschchov, who said that "in giving up a military base we are getting instead a better base for friendship and world peace" Before leaving Moscow for Helsinki, President Paasikivi conferred upon President Voroshilov the Grand Cross of the Order of the White Rose, Finland's highest decoration The Order of Lenin had been conferred upon President Paasikivi by the Supreme Soviet in 1954 (see 13847 C).

The Porkkala base had been a Soviet *enclave* in Finnish territory since the Soviet-Finnish armistice agreement of 1944, and its return to Finland was warmly welcomed in that country. President Paasikivi, who was enthusiastically greeted by large crowds on his return from Moscow, emphasized that there were no secret clauses in the agreements signed with the Soviet Government, and said that he returned from the Soviet capital "completely happy." Both he and Dr. Kekkonen announced that the Soviet Government would allow all former Finnish prisoners of war in the U.S.S.R. to return to Finland, including those who had been sentenced for war crimes.

A Soviet-Finnish agreement providing for the exchange of information and experience in industry, agriculture, and general scientific research (excluding military information) had been signed in Helsinki on Aug 16, following preliminary arrangements made during a visit to Finland in December last by M. Mikoyan, then Soviet Minister of Foreign Trade.—(Times - Manchester Guardian - New York Times - Le Monde, Paris - Berlingske Tidende, Copenhagen) **(Prev. rep. Soviet-Finnish Relations, 13847 C ; Friendship Treaty, 9228 C ; Porkkala Base, 9158 A ; Finnish Peace Treaty, 8517 A.)**

Note. New Soviet-Finnish trade arrangements for 1955, concluded under the five-year trade agreement between the two countries (see 13847 C), were laid down in a protocol signed in Moscow on Jan 24 Finnish exports to the Soviet Union were expected to amount to 32,100,000,000 Finnmarks (about $140,000,000), against Soviet exports totalling 23,500,000,000 Finnmarks The Soviet Union agreed to grant Finland another 10-year loan of 40,000,000 roubles (about $10,000,000) in gold or U.S dollars, against the considerable balance in Finland's favour arising out of the excess of Finnish exports to the U S S R over Soviet exports to Finland, the loan will bear interest at 2½ per cent The goods to be exchanged are on the same lines as in previous agreements, and include the building by Finland for the U S S R of two tankers and an 8,500-ton cargo ship Soviet purchases of prefabricated timber houses were, however, heavily reduced, from 750,000 cubic metres in 1954 to only 250,000 cubic metres in 1955

Finland's total foreign trade in 1954 amounted to 156,600,000,000 Finnmarks in exports and 152,100,000,000 Finnmarks in imports, leaving an export surplus of 4,480,000,000 Finnmarks Britain and the Soviet Union accounted for 40 per cent of Finland's total foreign trade, about evenly divided between the two countries. Whereas, however, the Soviet Union had been Finland's best customer in 1953, Britain regained this position in 1954.—(Times - Le Monde, Paris - New York Times - Neue Zurcher Zeitung) **(Prev. rep. 13847 C.)**

B. AUSTRALIA. — Population Figures.

Figures published recently by the Commonwealth Bureau of Census and Statistics, and revised in accordance with the preliminary results of the population census of June 30, 1954, showed that the population of Australia on Dec. 31, 1954, was 9,090,738 (4,598,208 males and 4,492,530 females).

The distribution of population between the States was as follows: New South Wales, 3,462,502 ; Victoria, 2,480,873 ; Queensland, 1,322,886 ; South Australia, 808,308 ; Western Australia, 649,360 ; Tasmania, 319,542 ; Northern Territory, 16,123 ; Australian Capital Territory (Canberra), 31,144.

The population on Dec. 31, 1954, was 187,730 higher than on Dec. 31, 1953, due to a natural increase (i.e. excess of births over deaths) of 120,451, and a net migration of 68,207 (overseas arrivals 198,025, overseas departures 129,818). (Commonwealth Bureau of Census and Statistics) **(11465 B.)**

C. NEW ZEALAND. — Reduction in Motor Vehicle Imports. - Effect on British Car Exports.

The Minister of Customs (Mr. Eyre) announced on Sept. 27 that licences for the import of motor vehicles in 1956 would be one-third lower than in 1955. Imports of vehicles in 1956 were consequently expected to amount to 33,000 vehicles, valued at £N.Z.15,000,000, compared with 48,000 vehicles in 1954 and an anticipated 50,000 in 1955.

A spokesman of the Society of Motor Manufacturers in London described the cut as "a serious blow" to the British motor industry, as New Zealand was its second largest export market for cars and the fourth for commercial vehicles. British vehicle exports to New Zealand in 1954 totalled 39,000 cars and 9,000 commercial vehicles, valued at £16,750,000.—(Times - Directorate of Information Services, Wellington) **(13736 D.)**

OCTOBER 8—15, 1955

A. UNITED NATIONS. — Opening of Tenth Session of General Assembly. - Señor José Maza elected President of Assembly. - Speeches by Mr. Dulles, Mr. Macmillan, M. Molotov and M. Pinay. - French Protest at Assembly's Decision to debate Algerian Situation. - French Withdrawal from General Assembly. - Recall of French Delegation at U.N. - Rejection of Greek Proposal for Debate on Cyprus.

The tenth session of the U.N. General Assembly opened in New York on Sept. 20, when Señor José Maza (Chile) was unanimously elected President of the Assembly in succession to Dr. van Kleffens (Netherlands).

Señor José Maza (66), an eminent jurist, is the author of many legal works in Spanish, including a study of the U N Charter A member of the Chilean Senate from 1925-53, he has held the posts of President of the Senate, chairman of the Senate Foreign Relations Committee, Minister of Education, and Minister of Justice He has been Ambassador to Brazil, Peru, Uruguay, Panama, and Haiti, and has led the Chilean delegation at several sessions of the U N General Assembly.

The chairmen of the Assembly's committees were also unanimously elected on the same day, as follows .

Political Committee .	Sir Leslie Munro (New Zealand)
Ad Hoc Political Committee	Prince Wan Waithayakon(Siam)
Economic and Financial Committee	M. Ernest Chauvet (Haiti)
Social, Cultural and Humanitarian Committee . .	M Omar Loutfi (Egypt)
Trusteeship Committee	Señor Luciano Joublanc-Rivas (Mexico)
Administrative and Budgetary Committee . .	Hr. Hans Engen (Norway)
Legal Committee ..	Prof. Manfred Lachs (Poland)

Before Señor Maza's election as President of the Assembly, M. Molotov (the Soviet Foreign Minister) moved that representatives of the Chinese People's Republic should be seated in the General Assembly and other U.N. organs, and that the Chinese Nationalist representatives should be unseated. By 42 votes to 12, with six abstentions, the Assembly approved a U.S. amendment asking it "not to consider at its tenth session any proposals to exclude the representatives of the Republic of China [i.e. Nationalist China] or to seat representatives of the People's Republic of China." As the Assembly approved the U.S. amendment, the Soviet resolution was not voted upon.

The 12 countries supporting the admission of the Chinese People's Republic were the Soviet Union, the Ukraine, Byelorussia, Poland, Czechoslovakia, India, Burma, Indonesia, Denmark, Norway, Sweden, and Yugoslavia. The six abstaining countries were Afghanistan, Egypt, Israel, Saudi Arabia, Syria, and Yemen.

The general debate in the Assembly began on Sept. 22 and ended on Oct. 4. The major speeches—summaries of which are given below—were those of Mr. Dulles, the U.S. Secretary of State, on Sept. 22; of M. Molotov, the Soviet Foreign Minister, on Sept. 23; of M. Pinay, the French Foreign Minister, on Sept. 29; and of Mr. Macmillan, the British Foreign Secretary, on Sept. 30.

Mr. John Foster Dulles.

The U.S. Secretary of State expressed the conviction that all four Heads of Government who took part in the Geneva "summit" conference (see 14325 A) wanted to end the tensions of the past decade, in which, although no major war had broken out, "true peace has not been enjoyed." "That phase may now be ending," Mr Dulles added. "All four Heads of Government wanted that result, and each contributed to it In consequence, a new spirit does indeed prevail, with greater flexibility and less brittleness in international relations. . . ."

"At the Geneva 'summit' meeting," Mr. Dulles continued, "President Eisenhower brought up two causes of international tension which were not accepted for the agenda of the conference. The first was 'the problem of respecting the right of peoples to choose the form of government under which they will live.' President Eisenhower said: 'The American people feel strongly that certain peoples of Eastern Europe, many with a long and proud record of national existence, have not yet been given the benefit of this pledge of our U.N. wartime declaration, reinforced by other wartime agreements. President Eisenhower also raised the problem of international Communism. He said that for 38 years this problem has disturbed relations between other nations and the Soviet Union. . . . The Head of the Soviet Government took the position that these problems were not a proper subject of discussion at the conference."

"Nevertheless," said Mr. Dulles, "the eyes of much of the world will remain focussed upon these two problems. What, in fact, the Soviet Union does about them will, to many, be a barometer of the Soviet's real intentions If the 'spirit of Geneva' is genuine and not spurious, if it is to be permanent and not fleeting, it will lead to a liquidation of abnormal extensions of national power, which crush the spirit of national independence, and to the ending of political offensives aimed at subverting free governments."

Mr. Dulles said that there were "welcome signs" that the U.N 's second decade "may be more harmonious than the first," and believed that "given goodwill and mutual confidence, many provisions of the Charter will gain new meaning and new vitality." "We can feel that confidence," he said, "because we see the nations becoming more and more sensitive to the moral verdicts of this Organization . . . No nation lightly risks the Assembly's moral condemnation, with all that such condemnation implies."

He then went on to discuss specific problems, notably the questions of German reunification, disarmament, "atoms for peace," the proposed review of the U.N. Charter, and U S. policy towards China and in the Near East.

On the first question, he said that the continued division of Germany was "a crime against nature," and that the Western Powers were "ready to advance some overall plan of European security which would give the Soviet Union substantial additional reassurances" against fears that might be entertained by the entry of a unified Germany into NATO. After emphasizing that "an unprecedented opportunity" was provided by the conjunction of this offer and the present peaceful mood of the German Federal Republic under Dr. Adenauer's leadership, he added: "But the German mood which I describe may not always persist Also, it cannot be assumed that the Western Powers, including the United States, will always be ready to enlarge their present commitments to meet Soviet concern about European security. The present opportunity is so unusual and so full of constructive possibilities that it can be hoped that the forthcoming four-Power meeting of Foreign Ministers [at Geneva] will find a solid basis for the reunification of Germany within a framework of European security."

On disarmament, Mr. Dulles stressed the advantage of President Eisenhower's proposal [made at the Geneva "summit" conference] that the U.S.A and the U.S.S R should exchange information on their military establishments and allow mutual aerial reconnaissance "The logic of this proposal," he said, "is simple and clear. Major aggression is unlikely unless the aggressor can have the advantage of surprise and can hope to strike a blow which will be devastating because it is unexpected. But the preparation of an attack of such magnitude could hardly be concealed from aerial inspection. Aerial inspection would not, of course, detect everything. We do not think of it as a final comprehensive system of inspection. But it would detect enough to exclude the greatest risk As such it would open the way to further steps towards inspection and disarmament, which we all want to see Long experience in these matters has made it apparent that when there is a sense of insecurity, when there is an ominous unknown, then arms seem needed and limitation of armament become virtually unattainable Reductions of armament occur when fear is dissipated and when arms seem less needed. . . The essence of the President's proposal was that it would, as a beginning, do what is required of a beginning namely, make it more possible to take subsequent steps ."

On the subject of the peaceful uses of atomic energy, Mr Dulles described the recent scientific conference in Geneva (see 14416 A) as an "outstanding success"—"so successful that the United States will propose a similar conference to be held in three years, or earlier if the increasing development of the peaceful uses of atomic energy will so warrant" He also referred briefly to the U S proposal that the U N. should arrange for the collection and publication of information on the atomic effects of radiation upon human health and safety (see below). In this connexion he said that when the Assembly considered the matter during its current session, the U.S.A would suggest the establishment of an international technical body, composed of qualified scientists, which would "collate and give wide distribution to radiological information furnished by members of the United Nations or specialized agencies"

Dealing with the review of the U N. Charter, Mr. Dulles expressed the U S Government's opinion that the Assembly should "approve in principle" the convening of a conference to revise the Charter, and should establish a Preparatory Commission to prepare and submit recommendations for this purpose After commenting that the present Charter was a "pre-atomic age Charter," he said that he believed that an "impelling reason" for holding such a conference "would be to reconsider the present veto power in relation to the admission of new members, particularly if that veto power continues to be abused"

Turning to the China area, Mr Dulles described the situation there as "somewhat less ominous than it was," and expressed the hope that the Chinese People's Republic "will respond to the manifest will of the world community that armed force should not be used to achieve national objectives" He paid tribute to the role played by the U N. and its Secretary-General, Dr. Hammarskjold, in securing the release of the U S. airmen imprisoned in China while serving under the U.N Command (see 14415 A), and said that the outcome had "justified the confidence which the United States had placed in the United Nations, and our restraint in the use or threat of our own national power"

As regards the Near Eastern situation, Mr Dulles recalled the proposals he had made for bringing peace to Palestine, including an international guarantee to prevent any effort to alter by force the boundaries between Israel and the neighbouring Arab States (see 14392 A). Noting that a number of countries had indicated their support for the U S. offer, he said . "If there is a favourable response from the Near Eastern countries, many aspects of this problem would eventually come to the United Nations for its action at some future session."

In the course of his speech Mr Dulles appealed for the admission of countries who had for long been trying to enter the United Nations He said in this connexion: "Today we have a wide and important

membership. But about a score of sovereign nations are not represented here Many of them meet the membership tests of our Charter. They are peace-loving and have shown themselves able and willing to carry out the Charter's obligations. Their Governments could reflect here important segments of world opinion. To block the admission of such nations by use of the veto power is a grave wrong, not only to them but also to this Organization. I hope that during this session action will be taken by the Security Council and this Assembly to bring these nations into membership Thus, the U.N would enter its second decade better equipped to serve mankind."

M. Vyacheslav Molotov.

The Soviet Foreign Minister spoke at considerable length on the Geneva "summit" conference, pointing out that it was "not an isolated development" and that the way for it had been "paved by recent events." The conference itself, he said, had "reflected the deep changes that have taken place in the minds of the people, who are showing an ever-growing determination to defend peace and to prevent a new world conflagration" He recapitulated many recent developments which had contributed to the improved international atmosphere; emphasized, in particular, the value of the International Conference on the Peaceful Uses of Atomic Energy which had been held at Geneva, and expressed the hope that regular, and "preferably annual," conferences of a similar kind would be held

Discussing the proposals made at the Geneva "summit" conference, M. Molotov said the Soviet Union recognized the importance of President Eisenhower's plan for an exchange of military information and mutual aerial reconnaissance, and regarded it "as an expression of a sincere desire to facilitate the solution of the important problem of international control and inspection" The U S S R, he said, was studying the proposal "and its various aspects," and in doing so was interested in ascertaining to what extent it would "contribute to a reduction of armaments and to the settlement of the problem of outlawing atomic weapons, that is to say, to what extent it would help to fulfil the principal task—that of ending the armaments race and relieving the peoples of the heavy burden of inflated military budgets and war preparations"

M. Molotov also said that the U S S R was giving consideration to the plans put forward at Geneva by the Prime Ministers of France and the United Kingdom, M. Faure and Sir Anthony Eden [M Faure had proposed the limitation of armaments by the reduction of military budgets, and Sir Anthony Eden had suggested the establishment of joint inspection teams] He emphasized that the solution of the German problem was "inseparable from the task of establishing a system of European security and from the question of whether Europe would be turned into a potential hot-bed of a new war or whether it would become a bulwark of peace and international security" Under present conditions, he added, the German problem "will find its solution through the setting up of an all-European security system." After recapitulating the proposals made by the U.S S R. at Geneva, M. Molotov said his Government hoped that, on the basis of its own suggestions and the "constructive considerations" of the other participants in the conference, a solution to the problem of European security would be found

A considerable part of M Molotov's speech was devoted to disarmament, in which connexion he declared that the U N "must speak up emphatically against the arms race and in favour of reducing armaments, outlawing atomic and hydrogen weapons, and removing the danger of another war" He urged acceptance of the Soviet Government's disarmament proposals which had been made to the U.N sub-committee on disarmament in May last, pointed out that these proposals had "in many respects" taken into account the considerations advanced by the Western Powers; and described them as "a major step in narrowing down the differences between the U.S S R and the Western Powers on disarmament." Citing specifically the Soviet Union's acceptance of the Western proposals on the level of forces of the five major Powers, he contended that this had made "pointless" the West's objections to the banning of atomic weapons on the ground that they were a means of maintaining a "balance" in armaments between the East and West The Soviet Union now had reason to expect that the Western Powers, in their turn, would adopt a position on atomic weapons which would permit agreement to be achieved. Emphasizing that his Government attached "considerable importance" to the question of disarmament controls, M Molotov said that the setting-up of control posts on a mutual basis (as suggested in the U N. disarmament sub-committee) would be a particularly effective measure "in preventing surprise attack by one State against another."

M. Molotov also placed emphasis on the question of military bases in foreign territories. In this connexion he recalled that the Soviet Union had withdrawn from Port Arthur (see 14226 A) and was about to withdraw from Porkkala (see 14460 A); pointed out that when the Porkkala withdrawal was completed "there will be no Soviet military bases on the territories of other States"; and added "This gives us reason to call on the Governments of other Powers, and particularly those which maintain numerous bases on foreign territories, to give up their bases."

On the membership issue, M. Molotov announced that the Soviet Government would support the simultaneous admission to the United Nations "of the 16 States which have applied for membership" He did not enumerate the States to which he referred [On previous occasions the U.S.S R. had urged the simultaneous admission of **14 applicants—Albania, Austria, Bulgaria, Ceylon, Finland, Hungary, the Irish Republic, Italy, Jordan, Libya, Mongolia, Nepal, Portugal, and Rumania.**]

M. Molotov opposed the revision of the U N. Charter and the convening of a conference for such a purpose. He declared in this connexion: "If we consider the present situation objectively, we must recognize that agreement on Charter provisions which, in the opinion of certain States, require alteration, would not be easier, and may be more difficult to achieve at present, than was the case ten years ago. . . . Our aim should not be to break up the Charter, but rather to achieve joint action by States and, in particular, by the permanent members of the Security Council." The role of the Security Council, he emphasized, should be enhanced rather than diminished.

In conclusion, M Molotov presented a draft resolution "on measures for further easing international tension and developing international co-operation." After expressing satisfaction at the recent efforts to ease international tension, it called upon the Assembly to examine both the Soviet Government's proposals "on questions of ending the arms drive, banning atomic weapons, and eliminating the threat of a new war" and the disarmament proposals presented by President Eisenhower, Sir Anthony Eden, and M. Faure at the Geneva "summit" conference, as well as "the corresponding proposals of other States"

M. Antoine Pinay.

The French Foreign Minister, while welcoming the recent lessening of international tension, stressed France's "resolute opposition" to an international *détente* which would involve "the dissolution of the Atlantic Pact and the departure of American forces from Europe." Refuting the Soviet assertion that NATO was an "aggressive" organization, he declared "The Soviet Union is on the wrong track when it attacks the Atlantic Pact and when it bases its propaganda on the elimination of what is called, incorrectly, 'foreign bases.' I know of no 'foreign bases' within NATO I only know of means of defence that have been placed in common, freely and voluntarily, in the service of a single ideal—that of peace." Since, by its very nature, NATO had a strictly defensive character, it in fact provided the Soviet Union "with the perfectly legitimate guarantees which it has a right to demand" "There can be no question," he added, "of substituting for these real guarantees, offered by the Atlantic organization, abstract guarantees of the Locarno type, which in the recent past have proved illusory"

Defending the Paris Agreements, M. Pinay said "For the time being they offer the only example of a system providing for the limitation and reciprocal control of armaments They are the seal of Franco-German reconciliation, a decisive factor in the pacification of Europe They lay the foundations for the progressive and continuous construction of Europe, and constitute, therefore, an application of the principles of the Charter"

As regards the reunification of Germany, M. Pinay declared: "The division of Germany constitutes a permanent factor of insecurity in the heart of Europe. Continued division will not generate any satisfactory solution, it will merely complicate, with the passage of time, the given facts of the problem It is more than an injustice, therefore, it is a mistake. The possibility has been mentioned of a progressive re-establishment of unity through increasing contacts between the German Federal Republic and Eastern Germany I am rather fearful lest this theory of the 'two Germanies' should lead us to a dead end The French Government knows of only one democratically-elected government in Germany that of the Federal Republic. It does not consider it possible to place a legal government and *de facto* authorities on an equal footing."

He continued "While we feel that there is no security for Europe without the reunification of Germany, we also feel that there could be no reunification without the formulation of a security system A united Germany must, in our opinion, be subject to controlled military limitations, which should not in any sense be discriminatory. We are in favour of reciprocal controls which guarantee to each nation respect for the rules established by common agreement On these bases, an equitable arrangement should finally take shape between East and West. If the Soviet Union is really concerned only with ensuring its own security, such an agreement is truly possible"

Whilst welcoming the "impetus to the hopes of all peoples" provided by the Geneva "summit" conference, M. Pinay said that it was necessary to distinguish carefully between a "true" and a "false" *détente*. "There would be no true *détente*," he declared, "if it were a matter of an armistice concluded at one point in order to attack all the better on another front There would be no true *détente* if force should assume the mask of subversion from within, or of incitement to primitive nationalisms. We should like to be sure that there is no longer any question of shattering a system of values in order to bring about the triumph of the opposite system by means of subversion, which would only be the continuation of a policy of force and thus contrary to the spirit of our Charter. It is difficult for us to forget that agitation among the non-self-governing peoples has constantly been held to be an essential weapon in the struggle of Communism against the free world. Are there some who would consider opening a new front in Africa? This ambiguity must be removed The pursuit of such a course of subversion would be the principal obstacle to the great problem of our time: the orderly fulfilment of the aspirations of all peoples for independence and liberty."

After referring to the successful negotiations which had led to the establishment of an all-Tunisian Government, and declaring that France "intends to give to Morocco the characteristics of a modern democratic sovereign State, united to France by bonds of a freely accepted interdependence," M. Pinay declared: "France will never

permit anyone to jeopardize the destiny of a country which she has succeeded in pacifying, unifying, and lifting for ever above its original condition." Without specifically mentioning Algeria, he added: "To those who seek to indict France, I shall not merely present the irrefutable legal argument of the incompetence of the U.N. [in the Algerian question] . I shall only say to them: 'You are seeking to destroy the effort, undertaken by France, to build a free association between herself and overseas peoples who are closely united to France by geographical and historical links and by evident mutual interests . . . Thus, consciously or unconsciously, your objective is chaos'."

As regards the admission of new U.N. members, M Pinay declared: "The French Government hopes that a sounder understanding of international co-operation will enable us to make progress this year and to admit into the U N countries that have been kept out unfairly —among the first of which I would mention Italy" With regard to revision of the U.N Charter, he said that it seemed "wiser to await a more auspicious climate before undertaking this desirable reform."

Mr. Harold Macmillan.

The British Foreign Secretary said that the Western Powers fully understood the Soviet Union's determination that the terrible injuries inflicted by the Nazi armies in the war should never be repeated, and that "the soil of Russia should never again be defiled by the invader." "If this is the only difficulty," he said, "I am satisfied that the Western Powers can devise a scheme to meet these legitimate preoccupations We are confident that we can produce plans which the world would regard as giving Russia full protection against the threat of a reunited Germany which has chosen, as it well may, to join NATO This is the purpose of the various security proposals upon which we are working This is the purpose, too, of Prime Minister Eden's additional proposals to strengthen any pact, which after all is a matter of words, by thinning out military dispositions, which is a question of deeds If our proposals are insufficient, we would welcome the opportunity of considering any amendments or additions. If in one form or another the Soviet Government are able to accept this system of security, the Gordian knot will have been cut and the spirit of Geneva will have proved something real indeed"

Mr. Macmillan warned against expecting "spectacular results" from the forthcoming meeting of Foreign Ministers in Geneva. "We must hope," he said, "for a gradual growth of understanding of each other's point of view, and, with that understanding, a reaching of practical agreements in which the new spirit can be embodied" He recalled that the agenda of the four-Power meeting contained three points: (1) the reunification of Germany within the framework of European security; (2) the problem of disarmament; and (3) means of increasing contacts between East and West. On the first point, he said that progress on the "vital issue" of German reunification "depends really on the answer to a simple question Why does the Soviet Government object to the re-establishment of a united Germany under a system of free elections?" If the Foreign Ministers could reach agreement on the first item on their agenda, "how different will be the prospect of approaching the second—the problem of disarmament." As regards the third point, Mr Macmillan said: "Let us make use of every possible means—travel, trade, interchange of ideas. Those who are really confident that their philosophy is the right one should not be alarmed at exposing it to the maximum amount of criticism and knowledge"

Turning to the question of disarmament, Mr Macmillan declared: "It would be ungenerous not to recognize the very substantial progress which has been made under the aegis of the U N. since we met last year. The work in the Disarmament Commission has brought a new and realistic approach to what has formerly been largely an academic or propaganda exercise. In June, 1954, the Anglo-French plan was put forward and universally accepted as a valuable contribution. After a year's thought the Soviet Government advanced proposals which reproduced many of its features . . . The casual reader of Mr Molotov's resolution (see above), which he introduced at the end of a moderate and balanced speech, would have thought that the Russian proposals represented some novel and revolutionary initiative However, it is satisfactory to feel that in this, as in so many other matters, they are now following in the steps of the 'bourgeois' States I would like, nevertheless, to take the opportunity of saying how much we were encouraged by the general tone of Mr. Molotov's speech It was certainly, in language and presentation, in tune with the new decorum which is consistent with the Geneva spirit. There is hardly a sentiment throughout his long and valuable contribution to which I would myself raise disagreement. Even the references to Soviet anxieties or grievances were clothed in conciliatory language. . ."

Mr. Macmillan added, however, that there was one point in M. Molotov's speech to which the Western Powers took exception—the argument that the Western countries no longer had a case for objecting to the banning of atomic weapons in view of the fact that the Soviet Union had accepted the Western proposals on the levels of armed forces. "This," said Mr. Macmillan, "really begs the question. It would be quite easy to expose the logical fallacy of this argument, but it is not necessary for me to draw upon our own resources for this purpose. I need only quote the Soviet Government's statement in their proposal of May 10 [in the U.N. disarmament sub-committee] in which they issued this warning: 'Thus there are possibilities beyond the reach of international control for evading this control and for organizing the clandestine manufacture of atomic and hydrogen weapons, even if there is a formal agreement on international controls.'" Mr. Macmillan added: "It is that problem, indeed, that we must somehow solve if we are to make the progress for which the world longs."

Turning to Near Eastern problems, Mr. Macmillan said that the Cyprus question, intractable as it now appeared, was no more dangerous or difficult than many other questions that had been settled. "We shall press forward calmly but firmly with constitutional development in Cyprus, and although sole responsibility lies, of course, upon the British Government, we shall continue our search for common ground with our friends and allies, Greece and Turkey." As regards the Palestine situation, he said "It is clearly the duty of the United Nations to moderate and allay the animosities between Israel and her Arab neighbours. In this intractable issue the duty of men of good will is to try to develop the necessary confidence on both sides for an ultimate settlement to be reached. A heavy responsibility will lie on any country which introduces any new and disturbing factor into this delicate situation" [The last sentence was interpreted as a reference to the supply of arms to Egypt by Czechoslovakia, with Soviet approval.]

Reviewing the events of the past 12 months, Mr Macmillan said that on many fronts the U N. had had "a good year," and that the 10th anniversary session in San Francisco (see 14301 A) had shown that there was "a widespread and genuine desire to make the U.N. work as it should" The atoms-for-peace conference in Geneva, in particular, had been outstandingly successful and had "done much to dissipate the atmosphere of secrecy and suspicion which has hitherto veiled the unfolding of the most important discovery of our time." He urged that the U N. should admit many nations whose right to membership could not be questioned, but thought that the time was not yet ripe for raising the question of China's representation, nevertheless, this question would have to be settled "before fully peaceful relations can be established in the Far East."

Agenda for Tenth Session.

The regular agenda for the tenth session comprised 57 items, including disarmament, international co-operation in developing the peaceful uses of atomic energy, the racial problem in South Africa, the question of the Indian minority in South Africa, the status of South-West Africa, the economic development of under-developed countries, the question of establishing an International Finance Corporation, and the admission of new members to the United Nations. In addition, the following supplementary subjects were proposed by various countries: (1) the Cyprus question; (2) the Moroccan situation; (3) the Algerian situation; (4) the question of Dutch New Guinea; (5) the "co-ordination of information relating to the effects of atomic radiation upon human health and safety"; (6) the problem of ex-prisoners of war in Korea who had chosen to be sent to India; (7) the question of "the safety of commercial aircraft flying in the vicinity of, or inadvertently crossing, international frontiers"; (8) "measures for the further relaxation of international tension and the development of international co-operation."

The inclusion of the Cyprus question was proposed by Greece in the following form: "Application, under the auspices of the U N., of the principle of equal rights and self-determination for the people of Cyprus."

The question of Morocco was proposed jointly by Afghanistan, Burma, Egypt, India, Indonesia, Iraq, Lebanon, Liberia, Pakistan, Persia, the Philippines, Saudi Arabia, Siam, Syria, and Yemen. The 15 Asian-African countries presented a memorandum declaring that "for many years the Moroccan people, under French rule, have been deprived of basic rights of self-determination" and that "the attempt to maintain by force a regime contrary to the wishes of the people of Morocco" had led to "a steadily increasing threat to peace."

The Algerian question was presented by 14 of the above-mentioned 15 countries (the exception being the Philippines) A joint memorandum said that the situation in Algeria had become "a cause for increasing concern"; that the Algerian people could not exercise the right of self-determination as envisaged in the U.N Charter; that matters in Algeria had reached a point at which "the only method of affirming France's presence is by a show of force"; and that this situation was creating "a serious threat to peace in the Mediterranean area."

The question of Dutch New Guinea (West Irian) was raised by the same 15 countries that presented the Moroccan resolution. Like the similar resolution presented at the ninth session, it asserted that sovereignty over Western New Guinea should be exercised by Indonesia and not by the Netherlands.

Item (5) above was presented by the United States, as announced by Mr. Dulles in his speech to the General Assembly (see above). The U S Government issued an explanatory memorandum proposing that the General Assembly should "take steps to establish procedures for the receipt and assembly of radiological information collected by the various States and the results of their studies of radiation effects upon human health and safety."

Item (6) above was presented by the Government of India, which issued a memorandum stating that it could "not continue indefinitely to shoulder the burden" of maintaining the 82 Chinese and Korean prisoners-of-war who were still in Indian custody while awaiting their final disposition The memorandum reported that most of these men wished to go to countries that were neutral in the Korean War; requested the General Assembly to call upon those countries to admit the former P.O.W.s and to undertake responsibility for their rehabilitation, and asked the U.N. to meet the cost of caring for the men in India (where they had been held since February, 1954) pending their final disposition.

Item (7) above was proposed by Israel, which presented a memorandum noting that in recent years a number of commercial aircraft "innocently deviating from fixed flight plans in the vicinity of or across international frontiers" had been shot down, resulting in serious loss of life and causing grave international friction. It suggested that the U N Secretary-General should study this question, in consultation with specialized agencies or any other bodies he deemed appropriate, and should report his findings and recommendations to the 11th session of the General Assembly [The resolution arose out of the incident on July 27, when an Israeli airliner was shot down by Bulgarian fighters with the loss of 58 lives—see 14359 E.]

Item (8) above was the Soviet resolution presented by M. Molotov at the end of his speech to the General Assembly. It was unanimously placed on the Assembly's agenda.

Acceptance of Arab-Asian Proposal for Debate on Algeria. - French Withdrawal from General Assembly.

The raising of the Algerian question by the Arab-Asian group, and the Assembly's subsequent decision—taken by a majority of only one vote, and against the recommendation of the Steering Committee—to place it on the agenda, precipitated a crisis which led to the recall of the French delegation from the United Nations and to the withdrawal of France from the current session of the General Assembly.

The 15-member Steering Committee (which decides upon the Assembly's agenda, and whose recommendations are presented to the plenary session) decided on Sept. 22, by eight votes to five, with two abstentions, not to include the 14-nation resolution on Algeria in the agenda for the current session. The majority votes were those of France, Britain, the U S.A , New Zealand, Norway, Haiti, Luxemburg, and Señor José Maza, in his capacity as President of the Assembly, whilst the five minority votes were cast by the Soviet Union, Poland, Egypt, Mexico, and Siam The two abstentions were Ethiopia and Nationalist China.

M. Hervé Alphand (France) maintained that the U N. was precluded under Article 2(7) of the Charter from discussing what was essentially a domestic concern of France, since Algeria was an integral part of Metropolitan France and Algerians of all races and creeds were French citizens [Article 2(7) lays down that the U.N may not intervene in the domestic affairs of member-States.] After recalling that the French annexation of Algeria in the 19th century had been recognized by all the Powers which then enjoyed international status, M. Alphand gave a warning that if the U N. were entitled to question all the frontiers that had resulted from wars, there would no longer be any security within those frontiers for any member-State. As regards the right of self-determination, he declared that there was no Algerian nation distinct from the French nation.

Sir Pierson Dixon (Britain), **Sir Leslie Munro** (New Zealand), **Mr. Cabot Lodge** (U.S.A.), and **M. Ernest Chauvet** (Haiti) all supported M. Alphand's arguments, emphasizing that Algeria was an integral part of France and that its legal position was different from that of Tunisia and Morocco, which were protectorates. Sir Leslie Munro said that it was difficult to escape the impression that the outbreaks of violence in Algeria (see 14431 A) had been "deliberately timed to impress world opinion with the need for international action"; to agree to a discussion on Algeria, he added, would be to "put a premium on violence" and would also provide a legal precedent for "any secessionist minority" to seek support in the United Nations. Mr. Cabot Lodge said that the sponsors of the Algerian resolution were seeking "a course of action intended to bring about fundamental changes in the constitution of the French Republic"

M. Omar Loutfi (Egypt), **Dr. Jamali** (Iraq), and **Mr. Brohi** (Pakistan) contended, on the other hand, that the Algerian people had never had an opportunity to express their views on the "unilateral decision" of France to incorporate Algeria into the French Republic, that the Algerian people did not accept the view that Algeria was a part of France; and that the question was one of the right of self-determination of peoples, which the Assembly had solemnly upheld at its seventh session. They asserted that the existence of a "veritable state of war" in Algeria justified the sponsors of the resolution in bringing the Algerian situation before the Assembly, as it constituted "a threat to international peace." **Mr. Krishna Menon** (India) declared that "the sword of France" had "suppressed the sovereignty of Algeria"; that France possessed "authority but not jurisidction" in Algeria; and that the question of domestic jurisdiction did not, therefore, arise. **M. Kuznetsov** (Soviet Union) felt that the U.N. should discuss the Algerian situation because it had caused great anxiety in neighbouring countries and was an "important and serious" international question.

The Steering Committee's recommendation was, however, overridden by the plenary session of the General Assembly, which decided on Sept. 30—by 28 votes to 27, with five abstentions—to debate the Algerian situation. The voting was as follows:

In favour of a debate (28 votes)—Afghanistan, Argentina, Bolivia, Burma, Byelorussia, Costa Rica, Czechoslovakia, Egypt, Greece, Guatemala, India, Indonesia, Iraq, Lebanon, Liberia, Mexico, Pakistan, Persia, Philippines, Poland, Saudi Arabia, Siam, Soviet Union, Syria, Ukraine, Uruguay, Yemen, Yugoslavia.

Against a debate (27 votes)—Australia, Belgium, Brazil, Canada, Chile, Colombia, Cuba, Denmark, Dominican Republic, Ecuador, France, Haiti, Honduras, Israel, Luxemburg, Netherlands, New Zealand, Nicaragua, Norway, Panama, Peru, South Africa, Sweden, Turkey, United Kingdom, United States, Venezuela.

Abstaining—Nationalist China, El Salvador, Ethiopia, Iceland, Paraguay.

Before the vote was taken, M. Pinay addressed the General Assembly as follows:

". . . Everyone here knows our legal position. It was set forth in detail before the Steering Committee by M. Alphand I do not wish to go into legal controversies. We are being attacked on principles. I shall answer on principles.

Since 1830—that is, for over 120 years—Algeria has been an integral part of French territory All international treaties that we have signed, including the U N. Charter, apply to Algeria as French territory. No-one has ever thought of contesting this fact How and by what right can anyone seek to question today a national and international reality that is more than a century old?

It has been argued against us that there exist in Algeria populations whose race, language and religion are different from those of the people of Metropolitan France It is inferred that in order to be free, these populations must be separated. A pretence is made of believing, that independence can be achieved only by dissociation.

Can it really be that certain countries have dared to raise this argument within an Organization which has set as one of its major objectives the erasing of all discrimination deriving from race, language or religion? Can it be meant that it is impossible for men of different races or religions to live side by side in peace, as citizens of the same State? Does anyone really want, within these walls, to support racism and to stir up religious fanaticism? No-one in France would understand the United Nations lending its support, even indirectly, to such theses. No Frenchman would understand France being indicted for not having ceased to believe that it is possible to treat a Frenchman of Algeria and a Frenchman of Metropolitan France as equals

The French Parliament includes Deputies of all races. The French Army includes Moslem officers and generals. Educated Moslem Algerians have acceded to the highest political and administrative responsibilities There is no country in the world where the very idea of racial and religious discrimination is as completely alien as it is in France. We believe, and millions of men throughout the world believe with us, that it is possible for them and for us to live in peace—in equality, freedom, and brotherhood—closely united within a single political organization The republics of Latin America, with their unfailing sense of human progress, have long since followed a course similar to ours, and in many cases have shown us the way. What would become of the national unity in our respective countries if certain States could henceforth incite, on the soil of their neighbours, disorders intended to provoke secession?

What actually are the aims that are being sought in this debate? Is it freedom for the Moslem peoples of Algeria? My answer is: Are they not already free? Do they not have universal suffrage? Are they not represented in local assemblies and in the Algerian Assembly, as well as in the Assemblies of the French Republic? The Moslems exercise the same rights as other French citizens Their position is in fact far superior to that of the peoples of many States which are today among our adversaries.

How can certain States dare to attack France when they themselves ignore the very existence of the right to vote, and when they do not respect the most elementary rules of justice? France can tolerate neither insults nor calumny of her civilizing mission from countries where there are minorities subject to cruelly discriminatory treatment; where poverty is regarded as an act of fate; where 90 per cent of the people are illiterate and the infant mortality rate is as high as 800 in 1,000; where there is not a single doctor for every 300,000 inhabitants or one hospital for 1,500,000. Let those countries call on the United Nations for guidance and aid in the effort which it is their duty to accomplish at home. That is the real mission of the United Nations .

The decision which you are about to take is more serious for the United Nations than for France, for the whole future of our Organization is at stake What would happen if it were henceforth established that the U N. has the right to intervene wherever there exists within the frontiers of a State a racial, linguistic, or religious minority? If it were decided to discuss here the French problem of Algeria, nothing would ever restrict, in the future, the right to interfere in the internal affairs of any one of us, since the Assembly would henceforth have recognized that very right. The territorial unity of any State, the treaties, whether old or recent, relating to boundaries, could at any moment be challenged. For many it would be the end of security, and for the weakest the end of independence The Organization, created in 1945 to establish understanding and security among nations, would then have defeated its very purpose. It would be playing a role diametrically opposed to that originally assigned to it It would become a tool of division, violence, and disorder instead of an instrument of unity, tolerance, and peace . . . Under these conditions, how could our Organization survive? If it appeared that it was putting its moral authority at the service of division, violence, and disorder, there would be many who would lose confidence and would be tempted to hold themselves aloof from this Organization

In North Africa, as elsewhere, France has shown that she is fully aware of the evolution of societies, that she knows how to find reasonable solutions adapted to the modern world, and that she is resolute in her determination to apply them. . . . She does not believe that our Organization—whose mission is to promote understanding between nations, and whose moral authority must support those who are seeking to introduce reforms, and not those who are attempting to jeopardize them—will play the role that some are trying to make it play. The proposals of the Steering Committee [to delete the Algerian resoluation from the agenda] is wise because it safeguards the future of the U.N. We earnestly hope that you will confirm it."

After the vote was taken, M. Pinay announced that any recommendation made by the Assembly on the Algerian situation would be considered by the French Government as "null and void." He then walked out of the General Assembly, accompanied by the entire French delegation, after declaring that he did not know what would be "the consequences of this vote on the relations between France and the United Nations."

During the debate before the vote was taken, **M. Spaak** (the Belgian Foreign Minister) gave a warning that there could be "no possible international life and no viable international organization if each and every country is entitled to intervene in the domestic affairs of other countries." If the Assembly were to violate the terms of its Charter, which specifically declared that no U.N intervention was permissible in domestic affairs, "many of us would be faced with a most agonizing question—the question of how it would be possible to remain in an Assembly which would have violated the terms of the contract which was established to govern our mutual relations" He added: "Are we here . . . to provide a refuge for excessive nationalism, for vehement language, and for the performance of international demagoguery? If this extraordinary situation were to become a reality . . . the very fate of our organization would be at stake." M. Spaak commented during his speech that some of the delegates who criticized the electoral laws in Algeria came from countries "where there are no electoral laws whatsoever."

Mr. Krishna Menon (India) said that a discussion of the Algerian question would "assist in allowing some of the pent-up steam to be released without explosions" and would "go a long way to bringing counsels of reconciliation nearer, rather than counsels of conflict." **Mr. Mohammed Ali** (Pakistan) said that there was "no equality" for the people of Algeria "either in law or fact," and that the electoral and other laws were based on discrimination against the Algerians as compared with the people of other French *départements* **Dr. Mahmoud Fawzi** (Egypt) declared that if the Assembly submitted to the "untenable attitude" adopted by France, "colonialism would gain a ready-made device for perpetuating itself", **M. Rafik Asha** (Syria) said that the U.N. would cease to be the champion of human rights if a debate were denied, and that Algeria would become "a running sore liable to affect all Africa", whilst **Dr. Jamali** (Iraq) maintained that the prestige and functioning of the U N were directly involved. With reference to M. Spaak's speech, Dr. Jamali admitted that some of the sponsors of the proposal for a debate did not have good electoral laws, but said that they "recognized their shortcomings and were working to improve conditions." **Prince Wan Waithayakon** (Siam) said that the French Government "need have no fear of a more far-reaching recommendation than an exhortation to a peaceful adjustment of the situation, such as an appeal for direct negotiations between the parties concerned."

After a five-hour meeting on Oct. 2, the French Cabinet unanimously decided to recall the French permanent delegation from the U.N. and to take no further part in the current session of the General Assembly. A communiqué described the Assembly's vote on Algeria as "a flagrant violation of the U.N. Charter," and said that it was necessary to dissociate France from a course which might be "fatal for the United Nations." It was, however, explained that although France had withdrawn from the current session of the General Assembly she would continue to take part in the work of the Security Council and of other U.N. organs, though she would no longer furnish to the U.N. economic, social and cultural information relating to the French overseas territories. It was also announced that M. Faure and M. Pinay would postpone their visit to Moscow, which was to have taken place during October, because of the Soviet Union's action in supporting a debate on Algeria.

M. Pinay and the other members of the French delegation, including M. Hervé Alphand (French permanent delegate at the U.N. and president of the Security Council in October) returned to Paris on the same day. On arrival at Orly Airport, M. Pinay said that he had returned "full of sorrow at the abominable allegations" made against France at the U.N., and that the General Assembly's decision to debate Algeria would require serious study by the French Government. He added: "France has withdrawn from the activities of the United Nations. I do not say that she will leave the U.N., but M. Alphand has returned with us to show that we do not accept the decision that has been taken." M. Pinay also said, *inter alia*, that the distribution of votes in the U.N. was unfair, since Western Europe disposed of only seven votes whereas the Arab and Asian States commanded 16 and the Latin American States 21.

The French withdrawal from the General Assembly was the second boycott of the U.N. by a major Power in recent years In January, 1950, the Soviet Union withdrew temporarily after the Security Council had refused to accept its motion for ousting Nationalist China from U.N. membership. It was the absence of the U S S.R which enabled the Security Council to take action without a Soviet veto in calling on U.N. member-States to support South Korea in resisting the North Korean invasion. The U.S.S.R. returned to the Security Council and resumed participation in other U.N. activities in August 1950.

Regret at the French withdrawal from the tenth session was expressed in the General Assembly on Oct. 3-4 by a number of delegates, including several who had supported a debate on Algeria.

Mr. Krishna Menon (India) stressed that the raising of the Algerian question had never been intended as a slight to France, that India had the highest regard for the French people, and that the Algerian question had been brought before the U N. solely for the purpose of conciliation, he expressed "deep regret" at France's withdrawal from the Assembly, and his hope that she would return within a very short time **Mr. Mohammed Ali** (Pakistan) similarly expressed "regret and concern" at France's withdrawal, and said that the U.N would be "greatly handicapped" without full French participation. **M. Victor Khoury** (Lebanon) said that "our action was misunderstood" by France, and regretted her absence from the Assembly Among other delegates, **Dr. Osten Unden** (the Swedish Foreign Minister) said that the participation of France in the U.N. was "of vital importance," and expressed the hope that "a solution will be found to this abnormal situation."

Rejection of Greek Proposal for Debate on Cyprus.

The Greek proposal that the U.N. should debate the Cyprus question was defeated both in the Steering Committee and in the plenary session of the General Assembly. As a result, the Cyprus issue was not placed on the Assembly's agenda.

Mr. Anthony Nutting (U.K.), speaking in the Steering Committee on Sept. 21, expressed regret that the Cyprus resolution should have been raised by Greece, a country with which Britain had "ancient bonds of friendship" and to which she was united by a common alliance. Having "no wish to quarrel with an old friend," the British Government had consistently sought, firstly, to foster the well-being of the Cypriot people and to promote their development towards full self-government, and secondly, to maintain its friendship and alliance with Greece and Turkey It had accordingly taken the "unprecedented step" of inviting Greece and Turkey to the recent London conference (see 14413 A) to examine, together with the U.K Government, what was undoubtedly a British responsibility. Although the conference "stood suspended in disagreement," the U.K. Government hoped that its proposals for finding a basis for agreement might in time prove acceptable in one form or another.

Although resumption of the tripartite talks might not be immediately possible (Mr. Nutting continued), the U K. Government was ready to resume them at any time. Its proposals for a liberal constitution for Cyprus, "designed to lead to the fullest measure of internal self-government compatible with the strategic requirements of the present situation," still stood, and it was prepared to consider amendments or counter-proposals Moreover, the U.K. had also proposed the creation of a three-Power committee to examine the British plan for a constitution, and to act as a standing body for consultation and co-operation between the three Governments on Cypriot problems. Public discussion of the Cyprus question in the U.N., however, would not contribute to a solution but would only "deepen existing divisions." After declaring that the Greek purpose was to acquire sovereignty over Cyprus through support of the *enosis* movement—which meant union with Greece, and not self-determination—Mr. Nutting pointed out that British sovereignty over the island had been confirmed in 1923 by the Treaty of Lausanne, to which Greece was a party.

M. Giorgios Melas (Greece) said that his Government were sponsoring "a legitimate claim of a distinct national entity which had every right to call for the application of the principles of the U N. Charter" He claimed that no member of the British Commonwealth had a lower administrative status than Cyprus, which was still a Crown Colony, that Article 2(7) of the Charter could not be invoked in the Cyprus dispute, and that it would be "politically unwise" for the Assembly to "shrink from its responsibilities as soon as a matter becomes a little touchy." After declaring that the Assembly's policy at the ninth session [i e of deciding not to discuss the Cyprus question] had been one of "playing the ostrich," M Melas said that there had been "an immediate and real deterioration" of the situation during the past year, involving "bloodshed and firing on unarmed people" He declared that the Greek Government would "not be found wanting" if constructive proposals on Cyprus were presented

M. Selim Sarper (Turkey) agreed with Mr. Nutting that the Greek resolution was based not on self-determination but on the desire to annex territory belonging to another State, and opposed the Greek request as an interference in the internal affairs of a member-country. He asserted that Greece itself was "full of majorities and minorities," with Albanian and Macedonian majorities in some areas and Bulgarian and Turkish minorities in others, and recalled that the late M. Venizelos had refused to accept self-determination for the Turks of Thrace

Sir Leslie Munro (New Zealand) and **M. Alphand** (France) supported the British viewpoint, Sir Leslie declaring that the inclusion of the Cyprus question on the agenda would constitute an infringement of British sovereignty and place a great strain on Greco-Turkish relations. **Mr. Cabot Lodge** (U S.A.) felt that "quiet diplomacy" would be better than "open debate", the Chinese Nationalist representative also doubted the usefulness of a debate; the Ethiopian and Siamese delegates thought that direct negotiations between the parties would be preferable to a discussion in the U.N.; whilst the Soviet, Polish, Egyptian, and Mexican delegates supported the Greek request for a debate on the subject.

By seven votes to four, with four abstentions, the Steering Committee decided not to place the Greek proposal for a debate on Cyprus on the Assembly's agenda. The decision was upheld by the full Assembly on Sept. 23 by 28 votes to 22, with 10 abstentions.

The 28 countries voting for the Steering Committee's recommendation were Australia, Belgium, Brazil, Canada, Chile, Colombia, Cuba, Denmark, France, Honduras, Iraq, Liberia, Luxemburg, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Siam, Sweden, Turkey, South Africa, the U.K., the U.S.A., and Venezuela. Those opposing were Afghanistan, Argentina, Bolivia, Byelorussia, Costa Rica, Czechoslovakia, Ecuador, Egypt, El Salvador, Greece, Guatemala, Iceland, Lebanon, Mexico, Poland, Saudi Arabia, Soviet Union, Syria, Ukraine, Uruguay, Yemen, and Yugoslavia. The abstentions were Burma, Nationalist China, the Dominican Republic, Ethiopia, Haiti, India, Indonesia, Israel, Persia, and the Philippines.

It was remarked that although the United States had abstained from voting on the Cyprus question at the ninth session, it voted for its exclusion from the agenda at the current session.

Dutch New Guinea.

By seven votes to five, with three abstentions, the Steering Committee decided to place the question of Dutch New Guinea on the Assembly's agenda. The decision was upheld by the full Assembly on Oct. 3 by 31 votes to 18, with 10 abstentions and France absent. The 31 countries supporting a debate on New Guinea included the Arab-Asian bloc, the Soviet group, Yugoslavia, and several Latin American countries, including Argentina, Bolivia, Mexico, and Uruguay, whilst the 18 opposing votes included those of Britain, France, the Netherlands, Belgium, the Scandinavian countries, Australia, New Zealand, South Africa, and Israel. The abstentions included the U.S.A., Canada, Brazil, Chile, Greece, Turkey, and Nationalist China.—(U.N. Information Centre, London - New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Le Figaro, Paris - Soviet Weekly) **(Prev. rep. Tenth Anniversary Session, 14301 A; Ninth Session, 14010 A; 13993 A.)**

A. AUSTRALIA. — The Millionth Post-War Immigrant. - Increased Immigration Target in 1955-56.

Australia's millionth post-war immigrant, Mrs. Barbara Porritt, sailed from Tilbury (London) on Oct. 12 with her husband in the liner *Oronsay*, and was officially seen off by the Australian High Commissioner in London, Sir Thomas White. Almost exactly half of the million post-war immigrants to Australia have been British, of whom about 350,000 have emigrated directly from the U.K. to Australia. The other half million are almost entirely from continental Europe, 182,159 having been resettled in Australia under the auspices of the International Refugee Organization, and the greater part of the remainder by the Intergovernmental Committee for European Migration.

The Minister for Immigration (Mr Holt) announced on June 5 that Australia's immigration programme would be raised from 115,000 in 1954-55 to 125,000 in 1955-56, of whom 70,000 would travel under the assisted passage scheme and an estimated 55,000 would pay full fares. "If our expansion is not to be halted," Mr Holt said, "we must maintain from migration a supply of labour to all sections of industry. Large-scale immigration is accepted unhesitatingly by most Australians as imperative for our development and defence. The community as a whole shares the confidence of the Government that Australia can successfully absorb continued population growth on the scale proposed. In coming to its decision, the Government had information that our rate of creation of capital services is not only keeping pace with new demands resulting from population increase, but is making useful reductions in backlogs that accumulated during the war and immediate post-war years. Three-fourths of the additions to our labour force in post-war years have come from migration."

Figures published on Sept. 12 by the Commonwealth Statistician in Canberra showed that there had been a net population increase through immigration of 51,927 in the first six months of 1955—viz., 70,137 permanent arrivals (of whom 34,022 were British) and 18,210 who had left Australia permanently. The figure compared with a net immigration increase of 30,835 in the first six months of 1954.

B. JAPAN - SIAM. — Cultural Agreement.

The first cultural agreement between Japan and a South-East Asian country since the war was signed in Tokio on April 6 by the Siamese and Japanese Foreign Ministers (respectively Prince Wan Waithayakon and Mr. Shigemitsu). It came into effect on Sept. 6, when instruments of ratification were exchanged in Bangkok. (Japanese Embassy, London)

C. FRANCE. — Diplomatic Appointments. - M. Alphand appointed Permanent Delegate to the U.N. - M. de Margerie appointed Ambassador in Bonn.

The *Journal Officiel* published a decree on July 14 appointing M. Hervé Alphand as permanent French delegate to the United Nations. M. Alphand was one of the principal sponsors of the European Defence Community project and had been French representative on the North Atlantic Council until September 1954, when he resigned following the defeat of the E.D.C. Bill in the French National Assembly. As French representative on the U.N. Security Council he succeeded M. Henri-Etienne Hoppenot, who had been appointed French High Commissioner in South Vietnam on July 28.

The appointment of M. Roland de Margerie as director-general of political and economic affairs at the Quai d'Orsay (a post once held by M. Alphand) was also announced on July 14. On Oct. 6, however, M. de Margerie was appointed French Ambassador to the German Federal Republic in succession to M. François-Poncet, who retired on Sept. 30.

M. François-Poncet (68) had been closely connected with German affairs for nearly 20 years, having been Ambassador in Berlin from 1931-38. Since the end of the war he had represented France in Western Germany, first as political and diplomatic adviser to the French Military Governor, then as High Commissioner, and since May 1955 as Ambassador to the German Federal Republic.

Other French diplomatic appointments announced since the beginning of 1955 included the following:
M. Jean Filliol as Ambassador to Saudi Arabia *vice* M. Georges Gueyraud.
M. François Coulet (formerly Ambassador in Teheran) as Ambassador to Yugoslavia.
M. Armand de Blanquet du Chayla (formerly Ambassador in Stockholm) as Ambassador to Egypt.
M. Albert Ledoux as Ambassador to Norway, in succession to M. Louis de Monicault.
M. Jacques-Emile Paris (formerly Ambassador in Damascus) as Ambassador to Persia, succeeding M. Coulet.
M. Pierre Denis as Ambassador to Venezuela.
M. Henri Ingrand as Ambassador to Colombia.
M. Jacques Baeyens as Ambassador to Ethiopia *vice* M. Henri Roux.
M. Georges Bernis as Ambassador to Ecuador.
M. Francis Lacoste (retiring French Resident-General in Morocco) as Ambassador to Canada *vice* M. Guérin.
M. Jean-Charles Serres as Ambassador to Pakistan.
M. Jean de Hauteclocque as Ambassador to Portugal.
M. Géraud Jouve (French delegate to the Council of Europe) as Ambassador to Finland.
M. Philippe Baudet as Ambassador to Argentina.
M. Jacques de Blesson (head of the Department of American Affairs at the Quai d'Orsay) as Ambassador to the Irish Republic.
M. Edmond Petit de Beauverger (French delegate to the U.N. High Commission for Refugees) as Ambassador to the Netherlands *vice* M. Jean-Paul Garnier, who was appointed Ambassador to Turkey.

It was announced on July 23 that the French Government had agreed with the Governments of Nicaragua, Guatemala, and Costa Rica to raise the status of their respective diplomatic missions to the level of embassies.—(Le Monde - Le Figaro) **(Prev. rep. 14253 A; 13820 B.)**

D. ASTRONOMY. — Discovery of Vegetation on Mars.

It was announced in Washington on Sept. 18 by the National Geographic Society that observations carried out in South Africa during the summer of 1954 by Dr. E. C. Slipher (of the Lowell Observatory, Arizona) had resulted in the "totally unexpected" discovery of a vast blue-green area on the planet Mars, covering about 200,000 square miles (approximately the size of Texas), which was believed to be living vegetation.

It was explained that Dr. Slipher, as leader of an expedition sponsored jointly by the National Geographic Society and the Lowell Observatory, had carried out a very large number of visual and photographic observations at the Bloemfontein Observatory, and that a study of more than 20,000 photographs taken by him had disclosed the existence of the large area of apparent vegetation on Mars. The observations were carried out in South Africa because Mars was too far south at the time to be effectively studied by observatories in the northern hemisphere.

The announcement said that the 200,000 square-mile area of presumed vegetation was situated near one of the Martian "canals," and that its discovery had produced "the greatest change in Martian geography since the planet was mapped 125 years ago." It added: "Never before has such a dark splotch appeared except as an increase of an existing dark area. The remarkable transformation indicates that the division between the Martian (orange-red) desert and dark areas is not necessarily fixed or permanent: one may change to the other at any time. It helps to support the conclusion that Mars is not a dead world, and that the darkening is due to the growth of plant life. . . ." (New York Times - New York Herald Tribune - Times) **(Prev. rep. Astronomy, 13335 D.)**

A. GREECE. — Death of Field-Marshal Papagos. - New Government formed by M. Karamanlis.

Field-Marshal Alexander Papagos, the Prime Minister of Greece and a distinguished soldier-statesman, died in Athens on Oct. 4, aged 72, after having been seriously ill for many months.

Alexander Papagos, the son of General Leonidas Papagos, was born in Athens on Dec 9, 1883, entered the Greek Army after studying at the Brussels Military College, and took part as a young officer in the Balkan Wars of 1912-13 and the Greco-Turkish War of 1921-22. He entered politics for the first time in 1935, when he became Minister of War in the Kondylis Government After a brief period as Inspector-General of the Army he was reappointed Minister of War, but in August, 1936, became Chief of the Army General Staff, a post he held throughout the dictatorship of General Metaxas from 1936 to 1940 He carried out many important reforms which greatly increased the quality and efficiency of the Greek Army, and which enabled 500,000 men to be rapidly mobilized after the Italian invasion of 1940.

In a brilliant military campaign General Papagos drove the Italian Army out of Greece within a few weeks, inflicted upon it a series of severe defeats, and counter-attacked deeply into Albania. After Greece was overrun by the German Army in April, 1941, he retired into private life, refused to co-operate in any way with the "quisling" government set up with German and Italian support, and declined to accept a pension from that regime. He was arrested by the Germans as a hostage in 1943 and imprisoned in a number of concentration camps, being eventually liberated from Dachau by American troops during the Allied invasion of Germany He returned to Greece seriously ill from his sufferings in the concentration camps, and subsequently developed consumption.

Early in 1949, at a time when the Communist guerrillas were threatening to overrun the country during the Civil War, General Papagos was recalled to active service by the Sophoulis Government and appointed C.-in-C. of the armed forces, with wide powers. Within a few months he had routed the guerrillas in all areas, and in August of the same year the Communists admitted total defeat. On Oct. 28, 1949—the ninth anniversary of Greece s rejection of the Italian ultimatum—he was promoted to the rank of Field-Marshal. On May 31, 1951, Field-Marshal Papagos resigned from the post of C -in-C after King Paul had denied him the right of vetoing military appointments, and on the same night a group of senior officers supporting the Field-Marshal attempted, without the latter's knowledge, to stage a *coup d'état* and seize power. Field-Marshal Papagos, however, dissociated himself from the plot and personally ordered the rebel leaders to return to their homes.

In August 1951, at a time of acute political instability and ministerial crises, Field-Marshal Papagos founded a party of national unity under the name of the Greek Rally In the elections of November of that year the Greek Rally was returned as the largest party in the Greek Parliament, winning 114 of the 256 seats As it did not have an absolute majority, and as Field-Marshal Papagos was strongly opposed to coalition governments (which he regarded as the principal weakness of the Greek political system), the Greek Rally remained in opposition during a series of short-lived coalitions. New elections were held in November, 1952, at which the Greek Rally won an absolute majority (241 seats in the expanded Parliament of 300), and Field-Marshal Papagos accordingly became Prime Minister—a post he continued to hold until his death—in a Government recruited exclusively from that party.

The Papagos administration was noteworthy for a number of important economic and financial reforms carried out by M. Markezinis, the Minister of National Economy and one of the Field-Marshal's closest associates. In November, 1954, however, M. Markezinis (who had meanwhile relinquished his ministerial post) left the Greek Rally with a number of other deputies after a dispute with the Prime Minister on questions of economic policy (see 13973 A).

A few hours before his death, Field-Marshal Papagos had signed a decree nominating M. Stephanopoulos, the Foreign Minister, as acting Prime Minister. M. Stephanopoulos tendered his resignation to King Paul after the Field-Marshal's death, and the King called upon M. Karamanlis, Minister of Public Works under Field-Marshal Papagos, to form a new administration. M. Karamanlis accepted the task and formed a new Government on Oct. 6 which was drawn—like its predecessor—entirely from the Greek Rally. Its members were:

M. Constantine Karamanlis .	Prime Minister and Minister of Defence.
M. Spyros Theotokis . .	Foreign Affairs.
M. Ioannis Trinatafilis . .	Interior.
M. Constantine Adamopoulos . .	Justice.
M. Andreas Apostolides . .	Finance and Economic Co-ordination.
M. Vassilios Paparigopoulos .	Commerce.
M. Achilles Gerokostopoulos . .	Education.
M. Constantine Papaconstantinou	Agriculture.
M. Stavros Polyzogopoulos . .	Labour.
M. Giorgios Rallis . .	In charge of the Prime Minister's Office.
M. Lambros Eftaxias . .	Public Works.
M. Ioannis Voyatzis . .	Shipping.
M. Giorgios Exindaris . .	Minister without portfolio.

Nine of the Ministers held office under Field-Marshal Papagos, but two of the most important former Ministers were dropped—M. Stephanopoulos, whose portfolio (Foreign Affairs) was taken by M. Theotokis, and M. Kanellopoulos, whose portfolio (Defence) was assumed by M. Karamanlis concurrently with the Premiership. Both M. Stephanopoulos and M. Kanellopoulos had been Deputy Premiers in the former Government. M. Exindaris, Minister without portfolio in the new Cabinet, is Greek representative on the North Atlantic Council.

M. Karamanlis (48), a lawyer, is strongly anti-Communist, and an exponent of close links between Greece and the Western countries. In a statement to the Greek Parliament on Oct. 10, he declared that the new Government would give full support to the "just aspirations of the Cypriot people"; that Greece would remain faithful to her alliances; but that her allies should "appreciate the need to remove all the causes which endanger those alliances." He added that the recent anti-Greek riots in Turkey had aroused the "sharp and just indignation" of the Greek people, and that it rested with Turkey to take adequate steps to ensure that the material losses were made good, and, above all, to repair the moral damage caused to Greco-Turkish friendship. M. Karamanlis was given a vote of confidence by 200 votes to 77, after announcing that general elections would be held in April, 1956 —(Times - Manchester Guardian - Daily Telegraph - Le Monde, Paris)

(Prev. rep. Cabinet, 13973 A.)

B. INDIA - PAKISTAN. — New Trade Agreement. - Resumption of Calcutta-Lahore Train Service. - Statement by Dr. Azad on India Office Library Question.

A new trade agreement between India and Pakistan was signed in Karachi on July 19.

An official communiqué said that the agreement provided for the movement of jute and coal between the two countries and for a revival of trade in other commodities, including cotton, whilst trade in commodities not specified in the agreement would continue according to the respective licensing policies of the two Governments. Special facilities were provided for small-scale trade, free from Customs and exchange regulations, across the borders of East Pakistan and the neighbouring Indian States, and provision was also made for the exchange of films, books, and periodicals between the two countries.

It was announced on Aug. 28 that the agreement had been ratified by both Governments, would come into force on Sept. 1, and would be valid for one year.

Further details of the trade agreement, released in Delhi and Karachi, showed that Pakistan would supply to India 1,800,000 bales of raw jute, 1,000,000 raw cow-hides, 100,000 pieces each of sheepskins and goatskins, and an undisclosed quantity of cotton, as well as fish, poultry, eggs, betel nuts, saltpetre, rock salt, etc. India would export to Pakistan at least 78,000 tons of coal a month, 5,000 tons of hardwood, and 10,000 tons of softwood, as well as mica, antimony, bauxite, tobacco, strawboard, chemical and pharmaceutical products, etc. The special facilities for border trade would apply between East Pakistan on the one hand and the Indian States of West Bengal, Bihar, Assam, and Tripura on the other.

Through passenger train services between Calcutta and Lahore (West Punjab) and between Munabao (Rajasthan) and Khokrapar (Sind) began on Aug. 1, under an agreement concluded on July 14 between representatives of the Indian and Pakistani railway systems.

Hitherto the only train service operating between India and Pakistan had been a shuttle service between Amritsar (East Punjab) and Lahore The agreement also provided that Customs examination on this line should be held at the two termini, in order to avoid stops at the border stations, and that services between Ferozepur (East Punjab) and Kasur (West Punjab) would be resumed at a date to be announced later.

The Indian Minister of Education, Dr. Azad, stated on July 29 that he was in correspondence with Lord Home (the British Secretary for Commonwealth Relations) regarding the latter's claim that the India Office Library was legally the property of the United Kingdom. He added that there was complete agreement between India and Pakistan that the library belonged to them.—(Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta - Eastern Economist, New Delhi) **(Prev. rep. Trade Agreement, 13016 B; Rail Communications, 14151 A; India Office Library, 14303 A; 14308 A.)**

C. CANADA. — Increase in Bank Rate.

The Bank of Canada increased its bank rate on Oct. 13 from 2 to 2½ per cent. The increase was the second in two months and brought the Canadian bank rate to the highest level ever recorded.—(Times) **(Prev. rep. 14368 A.)**

A. UNITED KINGDOM. — Labour Party. - Report of Wilson Committee on Party Organization.

The report was published on Oct. 5 of the sub-committee which was appointed in June last, under the chairmanship of Mr. Harold Wilson, M.P., to inquire into the general organization of the Labour Party. It made numerous criticisms of the existing state of the party organization; presented 41 recommendations for improvements, many of which were concerned with technical details of organization; and declared *inter alia*, that "compared with our opponents [the Conservative Party] we are still at the penny-farthing stage in a jet-propelled era, and our machine is getting rusty and deteriorating with age."

The sub-committee visited all the regions into which the party organization is divided, and received evidence, oral or written, from some 550 full-time or part-time agents, 140 Labour M.P.s, and 163 Labour candidates. Its report to the National Executive Committee is summarized below under cross-headings.

Defects of Existing Party Organization. "After what we have seen of party organization throughout the country, our surprise is not that the general election was lost but that we won as many seats as we did We were particularly disturbed by what appears to be the progressive deterioration of the party's organization, especially at constituency level. Constituencies which were not particularly well organized in 1950 and 1951 have declined seriously since then, and, at a time when our opponents' organization has become more streamlined and efficient, ours has been getting worse.

"We have not been holding an inquest into our electoral defeat; that would involve questions far wider than party organization. Obviously full employment, overtime, and the widespread employment of married women affected not only political attitudes but also the numbers of volunatry workers willing and able to carry on election activities. Apathy, disputes in the party, national and local, the absence of sufficient clearly defined differences between the parties, disillusionment with nationalization in the way it has been presented to the public, the rationing scare: all these have played their part.

"The main effect of all this has been to reduce the numbers and enthusiasm of party workers available. With the exception of a small number of constituencies, mainly marginal all reports have confirmed that voluntary workers were fewer and less enthusiastic than at any previous time Many of those who did work for a Labour victory were older men and women · with many it was habit rather than enthusiasm which provided the motive force. Another major difficulty in this election was redistribution In many cases it was impossible to constitute the redistributed constituency Labour party until the latter part of April or even early May. This led to serious delay in the selection of the candidate and the appointment of the agent. . . .

"But, making every allowance for these difficulties, we feel it our duty to report that we are deeply shocked at the state of party organization in many parts of the country. Without putting the main blame for our electoral defeat on the mechanics of organization, it is our view that even a limited improvement in organization would have won us the election, if only by a narrow margin The National Agent has listed 35 marginal constituencies won by the Conservatives which were, in his words, 'lost primarily through poor organization'

"On grounds of space we cannot publish all the evidence we collected; one or two examples should suffice.

(1) In one large city with three marginal constituencies, not a house was canvassed in the general election or the municipal elections which preceded it,

(2) In another large city, constituency organization was almost non-existent at the time of the announcement of the election; there was no recorded canvass, and what door-to-door work was done was mainly the work of the candidates and friends and relatives brought in from outside.

(3) In each of two adjacent rural areas the only party workers right up to polling day were the agent and candidate; the only literature distributed was personally pushed through letter-boxes by the candidate. These were safe Tory seats and we could not have made much impression on the majorities there; nevertheless, from these divisions coachload upon coachload of Tory party workers poured into a neighbouring industrial area, where they captured a seat from us,

"We do not wish to give the impression that every constituency was as badly organized as those we have quoted, though a number of others were little better. In many constituencies, especially marginal seats where a keen contest was fought, efficient organization and fighting enthusiasm went hand in hand. But the fact remains that, compared with our opponents, we are still at the penny-farthing stage in a jet-propelled era, and our machine is getting rusty and deteriorating with age."

". . . We do not suggest any attempt to copy the Tory election system. Even if sufficient money were available, we are convinced that an attempt to build up a streamlined professional machine would be offensive alike to our traditions and our principles For half a century our party has relied on voluntary workers, supplemented and assisted by a handful of paid officers. Our problem is not to replace the voluntary workers by professionals. It is to provide sufficient help in terms of staff, finance, inspiration and advice as will enable constituency parties once again to mobilize to the full the voluntary workers available, and, having mobilized them, to use them more efficiently. . . .

"An important element in the successful reorganization of the party is to restore organization to its rightful standing and prestige. At both national and constituency level since the war, organization has become an 'also ran' compared with the more glamorous and exciting task of policy-making. Arguments about policy and personalities, both national and local, have tended to squeeze questions of organization off the agenda of both the Executive and its committees, at one end of the scale, and constituency and ward (or village) parties at the other, . . Organization has become the Cinderella of the party at all levels It is vital that it should play a more central part in party affairs, and that those concerned with it should be given more encouragement and support."

Central Organization. As regards the Labour Party's central organization, the report expressed the conviction that the status of the National Agent's department "has declined, is declining, and ought to be increased." It also believed that there was "too much overlapping" between the National Agent (Mr A L. Williams) and the General Secretary (Mr. Morgan Phillips). The General Secretary's duties and interests were so wide—particularly in view of his position as chairman of the Socialist International—that it was unfair to him, and detrimental to the party, that he should be involved in duties which could and should be decided within the National Agent's department. It was therefore proposed that the day-to-day control of organization, both nationally and regionally, together with a greater part of the duty of reporting to the National Executive, should devolve upon the National Agent's department. Unless this action was taken, "satisfactory party organization is impossible."

In order that the National Executive could provide the "necessary drive" which was at present lacking, it was proposed that a special standing sub-committee of the N E C. should be created to supervise the organizational work of the party. This committee should consist of three or four members of the Executive, the party Treasurer (*ex-officio*), the National Agent, the assistant National Agent, and the chief woman officer, under the chairmanship of a member of the Executive; other departmental officers—e g the Press and Publicity Officer, the Education Officer, and the National Youth Officer—would attend as required The committee should meet regularly and should be charged with the duty of receiving and considering reports from regional organizers, organizing and supervising conferences of regional staffs, maintaining contact with the regions, etc.

Regional Organization. "One of the most urgent reforms required," the report continued, "is to improve relations between head office and the regional offices, principally by giving a freer hand to regional organizers and by bringing them more fully into consultation on all matters affecting party organization . . . There is too little disposition [at Transport House, the party headquarters] to make use of the field knowledge, and in many cases long experience, of the regional organizers"

After recommending that there should be regular conferences between organizers and the principal officers of Transport House, and that, in addition, there should be an annual conference of the full regional staff, the report continued: "There is too much written work, too much bureaucracy, too little devolution of authority, and far too much reservation to head office of decision over matters that should be dealt with locally We were particularly concerned at the volume of unnecessary paper-work. Reports from regional staff are pouring into Transport House at the rate of at least 7,000 per annum. The task of reading (and dictating) the reports is, in our view, a wasteful use of headquarters and regional staff. Moreover, the very existence of the system creates a wrong relationship between head office and the regions, based on a degree of overcentralization which we should expect to find in a minor department of the War Office rather than in a great national party We therefore recommend that . . . the system of reporting on individual visits should be discontinued, and that in its place there should be a monthly report from each regional organizer giving a review of activities and developments in the region, under previously agreed heads."

Among other recommendations, the sub-committee urged that a redistribution of the areas covered by the existing regional offices should be considered. It suggested the possibility of creating a new Central Southern area (corresponding to the Conservatives' Wessex Division) to include Hampshire, Wiltshire, Dorset, Berkshire, and Oxfordshire, or a new Home Counties area north of the Thames to cover Middlesex, Bedfordshire, Hertfordshire, and Buckinghamshire. It also suggested that the question of sub-regional offices in Wales and Scotland might be reconsidered.

Consideration was also given, *inter alia*, to the question of transport facilities, in which connexion the report recommended that "the necessary steps be taken to enable members of the regional staff to buy cars for use on organizational work"; to the work done by women organizers, who in many divisions provided "the majority of active party workers," and to which high tribute was paid, and to the Labour League of Youth. On the last-mentioned matter the report said: "We are deeply concerned at the widespread evidence we have received showing that we are an 'ageing' party. Apart from one or two divisions, we are entirely failing to appeal to youth. Certainly our opponents have been able to mobilize far more young people for active work at election times than we have. . . ."

Marginal Constituencies. The sub-committee devoted special attention to the marginal constituencies, and in this connexion listed more than 60 parliamentary seats which Labour had failed to win at the general election but which were considered "winnable" by improved organization. The report said:

"Since it is probably true that the majority of non-voters [at the last general election] were Labour, and since we may set 90 per cent as the possible maximum vote (allowing for deaths, untraceable

removals, and those becoming ill too late to qualify for the postal vote), we would regard as winnable Labour seats those where the Tory majority is less than half the number of non-voters necessary to raise the actual voting percentage to 90 per cent. . . For the purpose of defining a marginal constituency we have taken those cases where only half the available non-voters are needed to cancel out the 1955 Tory majority. There are some 47 seats at present held by Tories which are on this definition winnable, and in none of these does the task exceed getting to the polls half the 'available' non-voters. If all these were won we should have 324 Labour members in the House of Commons and a working Labour majority of 23 To get a majority of 60 we should need, on the 1955 voting figures, to win all the 66 constituencies in which the Tory majority is less than 60 per cent of the 'available' non-voters.

"Twenty-eight of the 35 seats listed by the National Agent as lost 'primarily through poor organization' appear in the list; most of these require only a very small proportion of the non-voters to be mobilized to give us victory. It is interesting to note that though the seats listed include most of the low-majority constituencies, there are others, such as Toxteth (4,539 majority), where polling by 42 per cent of the 'available' non-voters would give us victory. The poor organization and low total polls in a number of other Liverpool constituencies, and some in Glasgow, bring them into the easily winnable category. . .

"We must insist that if we are to mobilize anything like a full Labour vote, a permanent record of Labour votes is necessary in every marginal constituency, with appropriate action to keep it up to date and to register potential postal and proxy votes The preparation, by September, 1957, of an adequate marked register [i e. a register on which the political leanings of every voter are recorded] in every marginal constituency must be our target, and our planning, national and regional, must be directed towards it."

The report laid emphasis on the fact that help for "marginal" seats from divisions with safe seats was "infinitesimal"—"in marked contrast to the highly organized and effective work of our opponents in this field." It added: "Far too many of our parties in safe seats, basking in the glory of majorities of 20,000 or more . . . take little trouble with either membership or party organization. They have little thought for the broader interests of the movement In most safe seats membership is low. The 89 seats with majorities exceeding 10,000 have an average membership of 1,345. There are 49 with fewer than 1,000 members, and nine of these have fewer than 500 . . . The committee therefore recommend that there should be a drive to ensure that parties in safe seats, including those in safe Conservative seats, should increase their membership and improve their organization so that they can assist marginal divisions"

Candidates. "We have heard of a number of constituencies," said the report, "where many votes were lost because of the quality of the candidate. The oft-quoted statement that no candidate is worth more than 500 votes was an understatement in the last election the absence of a major clash between the parties made the personality and record of the candidate much more important. It is disturbing to record that in some constituencies there was the greatest difficulty in finding a suitable candidate. Since the question of the quality of candidates is under review by the appropriate sub-committee of the National Executive, we make no recommendation on it We do, however, recommend that every possible step be taken to ensure that candidates are selected early. Partly because of redistribution, but in undistributed divisions, too, the campaign was gravely affected by the late choice of candidate . . .

"We feel also that many prospective candidates should do more, once selected, to build up a personal vote through service in their constituencies. In the last election the sitting member, whether Conservative or Labour, had a great advantage through his personal contacts with individual voters, his 'surgeries', and his correspondence. There is no reason why a prospective candidate should not engage in similar activities. . . We recommend, therefore, that prospective candidates be pressed to undertake these duties. We further recommend that prospective candidates [should] take an active interest in their constituency party organization

"There is one further point . . . We are disturbed at the number of candidates who, out of their own pockets, are required to make annual contributions towards constituency party finances. Quite apart from the undesirability of this practice on general grounds, the dependence of constituency party finances on such a source of income has a detrimental effect on organization. We recommend that early steps be taken to end this practice, and that it shall be an instruction to N.E C. representatives at selection conferences that any attempt to influence a selection by personal promises of money, or any attempt to exact a financial pledge from a possible candidate, shall invalidate the conference"

Party Agents. "The party's problem with full-time agents is that we have too few. . . . During the past two years 100 full-time agencies have collapsed and a further number are in course of doing so. . . . We are in no doubt at all that present relatively low salaries and, above all, insecurity, have had a bad effect on the present agency service. Morale is low, real hardship is not unknown, and the chronic insecurity . . . has caused the loss of many good agents and a serious deterioration in the quality of candidates for agency posts. . . .

"Salaries are low, not only in comparison with the rates paid to Conservative agents (many of whom have Service pensions), but in comparison with prevailing rates in industry and in terms of purchasing power in relation to pre-war. In 1939, the basic rate was £200 to £310: this compared with a man's average wage in manufacturing industry of £178 per year. The Grade I rate today is £450-£550, compared with average industrial earnings of £500 per annum. , . . For a family man with young children there is real hardship and risk involved in taking an agency, and there is nothing like the flow of new recruits that the movement enjoyed before the war.

"The National Union of Labour Organizers and Election Agents has repeatedly pressed for a national service giving status and, above all, security to their members. Although the party should declare its aim of working towards a full national agency service, we see no immediate prospect that party finances would enable us to proceed in the foreseeable future to a national agency service with a full-time member in every marginal constituency. Moreover, the case is not in our view fully made out for the appointment of full-time agents in every constituency. Evidence from M P.s, and an examination of the position in some highly marginal constituencies in the 1955 general election, suggest that in some constituencies a first-class part-time agent has been successful where a full-time agent, particularly one from outside, might have failed. . . .

"It is obvious that it will be necessary to create the nucleus of a national agency service, nationally staffed and paid and working under the control of regional organizers. We therefore recommend that the proposed new special sub-committee be instructed to draw up, for consideration by the National Executive, a plan for the recruitment, terms of appointment, and training of a small national agency service adequate to meet the needs of regional schemes. The conditions of employment in this service should provide for long-term security on a career basis . . ."

Affiliation Fees. The present affiliation fee for individual party members (6d a member per annum) was criticized because it meant that in areas where Labour was strongest, the smallest proportionate contribution was made to the common effort [i.e , because party membership tended to be low in the majority of safe Labour seats, as pointed out above]. It was therefore suggested that the party's constitution should be changed to provide that affiliation fees should be 6d. a member or £2 per 1,000 or part of 1,000 votes, whichever was the greater If party affiliation fees were raised to 9d. a member, the rate per 1,000 votes (or part thereof) should be raised to £3. The committee admitted that there was bound to be resistance to this proposal, but believed that the case was unanswerable.

The report will be considered at the forthcoming Labour Party conference at Margate.—(Daily Herald - Times - Manchester Guardian) **(Prev. rep. Wilson Committee, 14287 A.)**

A. MOTOR VEHICLES.—Production in 1953 and 1954.

The following table, compiled from information given in the European edition of the *New York Herald Tribune* on Oct. 8, shows motor vehicle production in the United States, Canada, and the principal European producing countries in 1954 and 1953:

	Passenger Cars		Commercial Vehicles	
	1954	1953	1954	1953
United States	5,559,000	6,117,000	1,042,000	1,206,000
United Kingdom	769,000	595,000	270,000	240,000
Western Germany	518,000	369,000	113,000	96,000
France	437,000	368,000	163,000	130,000
Canada	282,000	365,000	68,000	119,000
Italy	181,000	143,000	36,000	31,000

The 1954 output of the above-mentioned six countries represented 92 per cent of world production of motor vehicles, the U.S.A. alone accounting for 65 per cent of the total. Other non-Communist countries produced or assembled in 1954 a total of 171,000 motor vehicles (Japan 60,000, Australia 55,000, Sweden 45,000, various other countries 11,000). Production in the Soviet Union in 1954 was estimated at 503,000 lorries, 51,000 passenger cars ,and 7,000 buses, whilst Poland produced an estimated 38,000 vehicles and Eastern Germany 30,000. (New York Herald Tribune) **(Prev. rep. 13290 B.)**

B. BULGARIA.—The Dimitrov Hydro-electric Scheme.

The Georgi Dimitrov hydro-electric scheme, situated in the Kazanluk plain (the "Valley of Roses") between the Balkan and Sredna Gora mountain ranges, was officially inaugurated on Sept. 6 by the Deputy Premier, M. Anton Yugov. The scheme, which took four years to complete, consists of a dam, two power stations, and two large irrigation canals, one supplying the Kazanluk region and the other passing through a long tunnel under the Sredna Gora mountains to supply water to the Stara Zagora region. The dam holds a third of the annual flow of the River Tundja, and to make better use of the remaining water it is planned to build a second dam (even larger than the Georgi Dimitrov dam) on the River Gyurlya, which flows into the reservoir itself. The Kazanluk plain, in addition to roses, grows essential oil-bearing crops, while the Stara Zagora plain, famous for its good wheat, is intended to become one of Bulgaria's important cotton-growing areas. (Bulgarian Legation, London)

C. LIBYA - SOVIET UNION. — Diplomatic Relations.

The Libyan Foreign Minister announced on Sept. 25 that Libya and the Soviet Union had agreed to establish diplomatic relations between the two countries. (New York Times)

A. AUSTRALIA. — Further Import Restrictions. - Export Promotion Programme. - Reductions in Capital Works Programme and Hire Purchase Financing. - Balance of Payments and Trade Figures.

Further import restrictions, designed to cut imports by £A80,000,000 (£64,000,000) in a full year, or by £A20,000,000 in 1955-56, were announced by Mr. Menzies (the Prime Minister) in the Federal House of Representatives on Sept. 27. He said that the new restrictions, which would come into force on Oct. 1, were planned to reduce imports to a level at which it would be possible to finance them by June 30, 1956, without further running down the country's external reserves. Mr. Menzies also announced a reduction of £A10,000,000 (from £A140,000,000 to £A130,000,000) in the Federal Government's capital works programme; a reduction in the value of import licences being sought by Government departments from £A59,000,000 to £A40,000,000; the introduction of measures designed to stimulate exports; and restrictions on high-purchase finance and on hire-purchase rates and periods of repayment. Mr. Menzies stated "quite categorically" that there would be no depreciation of the currency.

Mr Menzies listed four major factors in Australia's present economic situation. "(1) High and growing money purchasing power which gives rise to a level of demand for goods and services higher than ever before in our history. (2) As such demand cannot be entirely satisfied by Australian products there is a vast demand for imported goods and as that demand exceeds our export earnings our external balance of payments is in heavy deficit. (3) Any expansion of export earnings is made more difficult by substantially increasing levels of wages and costs, partly arising from competition for labour. (4) During the past two years the fortunes of international trade have not been so favourable, the terms of trade have moved against us, while overseas trading practices such as subsidies and bilateral trade deals have frequently not been helpful." "In short," he added, "there has been an over-rapid growth in demand for goods and resources without a corresponding growth in export income. Our economy has therefore tended to become unbalanced, with a disposition in favour of a permanent debit on our international trading account"

Reviewing the worsening of Australia's payments position, Mr. Menzies said that after the crisis of 1951-52 imports had fallen to £A511,000,000 in 1952-53, export income had amounted to £A846,000,000, and Australia's international reserves had risen by £A189,000,000. Import restrictions had consequently been relaxed, and this process of relaxation had continued over the next 18 months. During 1953-54 imports had risen again by £A172,000,000, exports had fallen by A34,000,000, and international reserves had increased by £9,000,000 In 1954-55 this process of rising imports and falling exports had continued; wool prices had dropped somewhat and there had also been some difficulties in selling wheat, as a result of which export income had declined by £A49,000,000 International reserves had fallen and from April 1, 1955, fairly severe additional restrictions had been imposed on all classes of non-dollar imports (see 14111 A). The reserves had nevertheless continued to fall, and since June 30 had declined by a further £A58,000,000 to £A370,000,000. "This kind of process cannot be allowed to go on" Mr Menzies declared "It would not inevitably be disastrous if, by the end of next year, our reserves were somewhat below £A300,000,000, but it would be disastrous if that point were reached with nothing done to check the downward fall in the reserves. It has been decided, therefore, that our external payments situation must be brought into full balance not later than June 30, 1956."

After referring to the Central Bank's directive regarding credit (see below), the Prime Minister said that at a subsequent meeting with representatives of the banks it had been agreed that a tightening-up of credit was needed if the problem of overseas balances was to be solved It was clear that, irrespective of any formal directive by the Central Bank, the trading banks would co-operate with the Government

With regard to hire-purchase finance, Mr Menzies said that this had been growing too rapidly and that in the past 12 months alone no less than £A50,000,000 had been added to its resources—an increase of 33 per cent The Government had been hoping to raise £A120,000,000 on the loan market for current works, but, by offering high rates of interest of up to 6 and 7 per cent for short- and medium-term investment, hire-purchase companies had been pulling money away from Government loan issues. The problem of moderating the present rate of expansion of hire-purchase finance fell primarily within the power of State Governments, but, because of the difficulty of securing early concerted action by the States, representatives of the major hire-purchase corporations had been invited to confer with him (the Prime Minister) At this meeting it had been unanimously agreed that the hire-purchase industry should recommend to its various boards of directors (*a*) that they should "peg turnover or outstandings at the present levels, with an allowable increase not exceeding 10 per cent between now and June 1956"; (*b*) that minimum "down" payments on motor vehicles should be fixed at 33⅓ per cent and the maximum hiring period at 30 months. The Prime Minister added that although the terms of this resolution should not be regarded as precise in their operation, assurances had been given that restraint would be exercised in respect of hire-purchase and that the Government might expect a large measure of co-operation. As in the case of the finance corporations, representatives of the retail trade engaged in hire-purchase operations would also exercise a cautious policy.

Turning to the promotion of exports, Mr. Menzies said that unless Australia was to have a permanently unbalanced economy, with import restrictions as a "chronic feature of life," something must be done to stimulate export income. New markets must be opened up and retained, and old ones expanded. If as was hoped, a sound basis could be found for an Export Credit Scheme, having regard to the special difficulties and peculiarities of Australia's export trade, such a scheme would be introduced. Thanks to positive policies, the great primary industries had expanded quite well and the volume of exports had increased by some 15-20 per cent in the last three years To sustain existing markets a considerable publicity drive was now well under way and the Australian Trade Commissioner services were being suitably strengthened. The Government was also prepared to send strong missions overseas with special tasks to develop new markets, these missions would comprise practical men who knew their goods and were experienced in salesmanship, and the Government would subscribe money "liberally" for this purpose.

Referring to possible Government economies, Mr Menzies said that the Commonwealth Government could do little to reduce its expenditure unless it was prepared to reduce such items as defence, pensions, or payments to the States. Nevertheless, the Government had decided on the following economies (*a*) the above-mentioned cut in its capital works programme; (*b*) the £A19,000,000 reduction in import licences for Government departments, (*c*) a request to the independent committee which was examining parliamentary salaries and allowances to make no report until the end of 1955-56.

In conclusion, Mr Menzies said that the essence of the Government's policy was to call upon the community to observe self-restraint in demand and that, as a result of the conferences with all sections of industry, they had been encouraged to hope that there would be a "wide and wise" response If, however, this turned out to be wrong, the Government would not hesitate to take further fiscal or other measures to ensure that, by June 30, 1956, Australia's payments were in balance and her payments position secure As public co-operation depended on authoritative and accurate information about the basic economic facts, it had been decided that the Treasury would issue periodically (quarterly if practicable) a paper setting out the principal economic facts. It was also proposed that in March or April of each year the Prime Minister should present to Parliament an economic report on the state of the nation

Details of the import cuts announced by Mr. Menzies were given on the following day (Sept. 28) by Senator O'Sullivan, Minister for Trade and Customs, as follows:

"Category A" Goods (mainly essential imports such as machinery and raw materials), which had been imported since April 1 at 85 per cent of the base year 1950-51, would be further reduced by 12½ per cent. The following exceptions would be transferred to the Administrative Category and be reduced by only 7½ per cent: surgical instruments, bacteriological products, yarns (other than rayon and jute), ophthalmic instruments, aluminium angle bars, aluminium wire, brass, bronze and other non-ferrous alloys.

"Category B" Goods (less essential goods and luxuries), which had been imported since April 1 at 40 per cent of the base year quotas, would be further reduced by 25 per cent. Goods in this category included fully assembled motor vehicles, liquors (including Scotch whisky). piece goods, clothing and apparel, drapery and napery, household washing machines, electric stoves, radiators, kettles, gas and electrical appliances, cutlery, lamps, torches, bottles, glassware, toys, jewellery, watches, clocks, cigarettes, cameras, and smokers' requisites. Two exceptions in "Category B" goods would be textiles for manufacturing purposes and "completely knocked down" motor vehicles, quotas for which would be reduced by only 12½ per cent.

Administrative Category Goods (essential imports such as capital equipment and raw materials). Their total value would be reduced by 12½ per cent overall, though individual items would be affected differently. Thus, items for which there would be no reduction would include tobacco leaf, iron and steel, rubber, rock phosphate, nitrate of soda and other fertilizers, crude asbestos, ferrous alloys, aluminium and nickel blocks, ball and roller bearings, steel ball-bearings, manganese, chrome ore, paper pulp, and medicines. Goods which would be reduced by only 7½ per cent included the following · replacement parts for agricultural machinery, motor vehicles, and motor cycles; motor cycle accessories, bicycle components and accessories; hand tools; household sewing machines; replacement parts for watches and clocks; plate glass; scientific instruments; alarm clocks; coir and ramie fibres. Quotas for cigarettes, sporting rifles, and sodium and potassium bichromate would be cut by 25 per cent.

Raw Materials. Senator O'Sullivan also announced that existing regulations relating to certain basic materials would be relaxed so as to permit importers to buy the materials from any country, regardless of currency considerations, thereby enabling them to purchase them from the best and cheapest source of supply. These materials were titanium oxide, sulphur, paper pulp, cotton, aluminium, nickel, copper, tobacco leaf, hog casings, crude asbestos fibre, and newsprint.

Dollar Goods. The level of licensing of goods from the dollar area would be subject to an overall reduction of 12½ per cent.

The central Bank's directive on credit, referred to by Mr. Menzies in his speech, had been issued by Dr. H. C. Coombs, Governor of the Commonwealth Bank, on Sept. 18.

Trading banks throughout Australia, Dr. Coombs stated, had been asked (*a*) to to restrict loans and overdrafts likely to stimulate investment and demand for imports, and specifically not to approve new or increased loans of any magnitude for capital expenditure, and not to enter into any new commitments involving increased accommodation for financing imports; (*b*) to review large overdraft accounts to achieve reductions in both limits and indebtedness, especially where substantial permanent borrowing persisted. He added that the Central Bank had asked business enterprises to co-operate by being prepared to revise their plans for expansion so as to permit reduction of their dependence on the banking system for this purpose

In view of the continued rise in prices in Australia, price controls—which had been abandoned by the Federal Government in 1954—were reimposed in New South Wales, Tasmania, South Australia and Western Australia in July and August. Queensland had not relinquished price controls in 1954, whilst the remaining State Government, Victoria, had announced that it would "not be rushed" into taking action. In other recent actions connected with the rise in prices, the Western Australian Arbitration Court had awarded the first quarterly adjustment to the State basic wage for two years, whilst the New South Wales Cabinet had decided to restore quarterly cost-of-living adjustments to basic wages.

Australia had a deficit of £A256,000,000 in her balance of payments in 1954-55, the biggest since 1951-52. This payments deficit compared with one of £A18,000,000 in 1953-54, and with a surplus of £A191,000,000 in 1952-53, Although the effect of the unfavourable balance in 1954-55 on Australia's international reserves was offset to some extent by the net result of capital transactions, the reserves nevertheless fell to £A428,300,000 on June 30, 1955, compared with £A570,000,000 on June 30, 1954, and £A561,200,000 on June 30, 1953.

Details of Australia's visible trade, published on July 7 and Sept 12, showed that imports in 1954-55 amounted to £A843,400,000 and exports to £A775,400,000, leaving an adverse balance of £A68,000,000. These figures compared with imports of £A681,600,000, exports of £A828,300,000, and a favourable balance of £A146,700,000 in 1953-54. The trade deficit with Britain increased from £A30,971,000 in 1953-54 to £A92,338,000 in 1954-55, due to an increase in imports from £A331,701,000 to £A378,664,000 and a decrease in exports from £A300,730,000 to £A286,326,000. The deficit with the U.S A. also increased from £A17,720 000 in 1953-54 to £A49,722,000 in 1954-55, imports having risen from £A73,254,000 to £102,162,000 and exports having fallen from £A55,534,000 to £A52,440,000. Imports from Japan in 1954-55 amounted to £A18,419,000, which was nearly twice as much as in 1953-54 and nearly three times as much as in 1952-53; exports to Japan totalled £A58,572,000, some £A3,000,000 more than in 1953-54.

The Department of Commerce announced on Sept. 30 a major Australian export drive in the New Zealand market, aimed at capturing a part of Britain's market there. A spokesman said that although the U.K. held 57 per cent of New Zealand's import trade, against Australia's 13 per cent, Australia should enjoy a "natural advantage" because of proximity, favourable tariff and licensing treatment, and ready access for first-hand knowledge of the market's requirements. Australian goods which would sell well in New Zealand included farm machinery, clothing, footwear, and paints and varnishes. The Minister of Commerce, Mr. McEwen, said that the attack on the New Zealand market was part of the export drive announced by Mr. Menzies, and that Australia also hoped to sell more cars and trucks in New Zealand.—(Australian News and Information Bureau - Times - Financial Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14111 A.)**

A. SOVIET UNION. — New Ministries.

It was announced in Moscow on Sept. 25 that two new Ministries had been formed by dividing the Ministry of Consumer Goods—one for light industry and the other for the textile industry. M. Nikita Ryzhov, hitherto Minister of Consumer Goods, became Minister for the Textile Industry, and M. Nikolai Mirotvortsev was appointed Minister for Light Industry, a portfolio he had formerly held in the Cabinet of the Russian Soviet Republic.

On July 24 it had been announced that the Ministry of the Automobile, Tractor, and Agricultural Machine-Building Industry would be divided into two separate Ministries, one for the automobile industry under M. Strepin and the other for the tractor and agricultural machine-building industry under M. Khlamov. The Minister hitherto in charge of the combined Ministry was M. Akopov.

Pravda announced on Aug. 1 that M. Kazakov, the Minister for Heavy Mechanical Industries, had been relieved of his duties because of his inability to "adapt himself to new progressive techniques," and that he had been replaced by M. Constantin Petukhov.—(Times - Le Monde, Paris) **(14315 C.)**

B. YUGOSLAVIA. — New Economic Policy. - Increased Investment in Agriculture and Consumer Goods Industries.

An official statement on Yugoslavia's new economic policy was issued in Belgrade on Oct. 1, following a meeting of economic experts under the chairmanship of President Tito on Sept. 28. The statement affirmed that the policy of industrialization, carried out under "extraordinarily difficult conditions," had created the essential industrial basis for Yugoslavia's further economic and social development, and for the gradual improvement of the people's standards of living. This, however, had required a high level of investment in the key industries, as a result of which insufficient capital had been invested in secondary industries and agriculture. In consequence, there had been a slowing-down in the growth of the national income and consequently in the standard of living, especially in the larger cities and industrial centres.

The statement therefore outlined the objectives which should form the basis of future industrial policy, as follows:

(1) To secure the consolidation and gradual improvement of the workers' standard of living, in line with the general growth of production and in proportion to the productivity of individual workers.

(2) To plan capital investment in such a way as to eliminate disproportions and to secure higher standards of living It was emphasized, however, that the total volume of investments in the coming period must not be so large as to imperil stability and endanger the standard of living. The production of agricultural consumer goods and consumer goods from the processing industry, together with the improvement of communal and housing services, should be increased in proportion to each other, and investment policy should be designed with this end in view

(3) "To secure the greatest possible stabilization of the market through an adequate policy for distributing the national income between investment and the strengthening of the reserves."

(4) To promote, through further economic development, the growth of Yugoslavia's share in world trade

(5) To encourage the growth of rural co-operatives, farms, etc. Agricultural policy in the last few years had produced useful results, but this had been "only the beginning."

(6) To continue to help the under-developed regions of Yugoslavia in conformity with the principles defined above

It was further decided that measures should be undertaken to improve the economic system and adapt it to the new policy. Such improvements should include measures designed to overcome trading difficulties, especially in agriculture, by placing commerce under the control of consumers, improving marketing by better transport and other means, entrusting rural co-operatives with the purchase of agricultural products, and eliminating middlemen.

It was agreed that the Federal, Republican, and local economic plans should be based on the above-mentioned objectives

M. Vukmanovich, a Vice-President of the Federal Executive Council, referred to the new economic policy in a recent speech in Belgrade.

Declaring that the time had come to remove the disparity between the key industries and the processing industries, he said that since the war "huge investments," amounting to over 40 per cent of the national income, had been required to pull Yugoslavia out of her backwardness and "semi-colonial dependence" on foreign countries in the shortest possible time. The focal point of new investments would, however, now be transferred from the key industries to the consumer goods industries and agriculture M Vukmanovich also referred to the great achievements which had taken place, saying in this connexion that Yugoslavia was now producing four times as much electric power as before the war; that machinery and electrical industries, non-existent before the war, had been built up, and that a strong shipbuilding industry was developing

President Tito, speaking at Zvornik (Serbia) on Sept. 26, emphasized that industrialization would continue, but that it would be aimed at improving the people's standards of living. (Tanjug Agency, Belgrade) **(Prev. rep. 14324 B.)**

C. PAKISTAN. — Cabinet Appointments.

The Government of Pakistan was expanded on Sept. 26 by the appointment of Mr. Hamidul Haq Choudhury as Minister of Foreign Affairs and Commonwealth Relations, and of Mr. Akshya Kumar Das as Minister of State for Economic Affairs. The two new Ministers both come from East Pakistan, Mr. Choudhury belonging to the United Front and Mr. Das to the Scheduled Castes Federation.

Mr. Choudhury, a lawyer, became a member of the Bengal Legislative Council in 1937 and a member of the Pakistan Constituent Assembly in 1947. He is a former Minister for Finance, Industries and Commerce in East Bengal, and has led Pakistani delegations at important international meetings

The appointments brought the total strength of the Government to eleven Cabinet Ministers and three Ministers of State. By party affiliation, seven Ministers belong to the United Front, five to the Moslem League, and one is an Independent. (Pakistan High Commissioner's Office, London) **(14405 E.)**

A. UNITED KINGDOM. — Opening of Independent Television. - First I.T.A. Broadcasts.

Commercial television was inaugurated on Sept. 22 with a programme broadcast from the Independent Television Authority's station at Croydon. The programme was preceded by a ceremony—also televised—at London's Guildhall, at which the chief speakers were the Postmaster-General (Dr. Charles Hill), the Lord Mayor of London (Sir Seymour Howard), and the chairman of the I.T.A. (Sir Kenneth Clark).

The inaugural programme was produced jointly by Associated Rediffusion Ltd. and the Associated Broadcasting Company, and was seen by viewers within an estimated range of about 70 miles The programme was interrupted for the showing of the first commercial advertisements—for brands of toothpaste, drinking chocolate, and margarine, followed by advertisements for tyres, motor spirit, and beef extract.

Recent developments in connexion with independent television are summarized below :

Broadcasting Hours. Earl De La Warr (then Postmaster-General) had announced on March 22, 1955, that commercial television broadcasting would be permitted for up to 50 hours a week, with a maximum of 8 hours on weekdays and 7¾ hours on Sundays. After discussions between the I.T A., the B B.C , and himself, it had been agreed that there should be a maximum of 35 hours actual broadcasting time in the period Monday-Friday and a maximum of 15 hours in the period Saturday-Sunday. Broadcasting would not start before 9 a.m. or continue beyond 11 p.m., and on weekdays there would be a " close period " from 6 p.m. to 7 p.m , and not more than two hours broadcasting before 1 p.m. Sunday broadcasting would be permitted from 2 p.m. to 11 p.m., with a " close period " arranged to meet the views of the Churches (6.15 p.m -7.30 p m). Sunday programmes between 2 p m and 4 p.m (the normal Sunday-school hours) would be designed for adults. On special occasions the daily maximum of broadcasting hours might be exceeded in order to broadcast outside events.

Programme Contractors. The I.T.A. announced on Aug 12 that in consequence of the withdrawal of Lord Kemsley from the Kemsley-Winnick group (reported on July 8), the contract for the supply of week-end programmes to serve the Birmingham and Manchester areas had been re-advertised A further announcement on Sept 14 stated that out of nine applications received, the Authority had selected that of a new company, Associated British Cinemas (Television) Ltd It was explained that this company was a subsidiary of the Associated British Picture Corporation, which would subscribe 95 per cent of its capital of £1,000,000, and that the remaining £50,000 would be subscribed by three leading provincial newspaper companies—the Birmingham Post and Mail Ltd , the Birmingham Gazette Ltd., and the Bradford and District Newspaper Co , Ltd., publishers of the *Yorkshire Observer* and the *Bradford Telegraph and Argus*. Sir Philip Warter, chairman of the Associated British Picture Corporation, would be chairman of the new company, whilst its managing director would be Mr. Howard Thomas, originator of the B.B.C " Brains Trust " programmes, and subsequently producer-in-chief for Associated British Pathé Ltd., makers of newsreels and documentary films.

On March 10 the formation had been announced of a new programme company—to be known as the Associated Broadcasting Company—by the amalgamation of the Associated Broadcasting Development Company (see 12705 B) with the Incorporated Television Programme Company, which had been formed in September, 1954, with Mr Prince Littler (chairman and managing director of the Stoll Theatres Corporation) as chairman. It was stated that the new company, of which Mr. Littler and Mr. Norman Collins would be chairman and vice-chairman respectively, would have a capital of £1,500,000, and that it had arranged with the I.T A. to take over the Associated Broadcasting Development Company's contract for week-end programmes from London and for Monday-Friday programmes from Birmingham On Oct. 6 it was announced that, in order to avoid confusion with Associated British Cinemas (Television) Ltd., the Associated Broadcasting Company had agreed to change its name to Associated TeleVision Ltd., and that the two companies had arranged to work together in providing studios in the London and Birmingham areas.

The first programme contract, between the I T.A. and Associated Broadcasting Co , Ltd., for the provision of the Saturday-Sunday programmes from London and the Monday-Friday programmes from Birmingham, was signed on May 3, whilst contracts with Associated-Rediffusion Ltd. (for the Monday-Friday programmes from London) and with Granada T.V. Network Ltd. (for the Monday-Friday programmes in the Manchester area) were signed on May 25. All three contracts will remain in force until 1964—i e for the full term of the Authority's life under the Television Act The week-end programmes for the Birmingham and Manchester areas will, as stated above, be the responsibility of Associated British Cinemas (Television) Ltd.

Advertising Rates and Times. Provisional charges for advertising at week-ends from London and from Mondays to Fridays in the Midland area were announced by the Associated Broadcasting Corporation on March 14 as follows : **London :** From £200 per minute during the " test period " from 10 a m. to noon on Saturday to £1,000 per minute for the " peak period " of 8 p m.-9.30 p m. on Saturdays and Sundays. Rates were also quoted for (*a*) " time signals," broadcast for a maximum period of five seconds at least seven times a day (£750 on Saturdays and £1,000 on Sundays); (*b*) documentary advertising films, lasting up to 30 minutes (from £1,000 to £2,000, according to time of broadcasting) ; (*c*) participation in " shopping guides." **Birmingham :** From £100 per minute during the " test period " (10 a.m -11 30 a.m) to £500 per minute for the peak period (8 p m -9 p m) Documentaries, £500-£1,000 according to time of broadcasting.

Rates for advertising in the Monday-Friday programmes from London were announced by Associated Rediffusion Ltd on March 15 The basic rate for advertising between 3 p m.-6 p m , 7 p m -8 p m , and 10 p.m -11 p.m. was fixed at £650 per minute, with a 50 per cent higher charge (i e. £975 per minute) for the period 8 p m.-10 p m , and a 50 per cent reduction (i.e £325 per minute) for all other periods except when test transmissions were being made, when the rate would be £195 per minute Participation in " shopping guides " would be assessed on a basic rate of £500 , documentary advertising programmes would cost up to £4,000 for 15 minutes during the peak viewing period , and " time signals " of seven seconds' duration would cost £750 per day, with a guaranteed minimum of five transmissions.

Sir Edward Boyle (Parliamentary Secretary, Ministry of Supply) stated in the House of Commons on March 23 that the I.T A had decided that, apart from shopping guides and advertising documentaries, the time given to advertising should not exceed six minutes an hour, and that not more than six advertisements should be permitted in any one hour. As regards the type of advertisement and the methods of advertising, the Postmaster-General understood that the Authority intended " to follow closely the accepted standards of other advertising media "

Television News Service. It was announced on Feb 9 that the four provisional contractors for independent television programmes had jointly formed a company on a non-profit-making basis under the terms of the Television Act to provide a news service for their programmes With the I.T A 's approval, Mr Aidan Crawley (well known for his B.B C. television programme " Viewfinder," and a former Labour Under-Secretary for Air) had been appointed editor-in-chief of the proposed service.

Future Developments. The I.T A. announced on May 24 that work would shortly start on a transmitting station at Winter Hill, near Bolton, to serve Lancashire, and that it was hoped to bring this transmitter into service by, at latest, the spring of 1956 Because of the hilly nature of the surrounding country, the radius of reception would vary, but it was expected to extend to Barrow-in-Furness, Lancaster, and Settle in the north , to Stoke-on-Trent, Crewe, and Wrexham in the south , and to Liverpool and Colwyn Bay in the west In the east, effective coverage would be curtailed by the Pennines, and was not expected to extend much beyond Rochdale. The estimated population within the reception area was about 7,000,000.

The statement added that the Authority was also considering plans for a Yorkshire station to be located at Ovenden Moor, near Halifax, but that the timetable for this station would depend on the allocation to the I.T.A. of an additional frequency channel in Band III. If this were made available, there was " a strong possibility " that this station could be in operation by the autumn of 1956

Children's Advisory Committee. The I.T A. announced on Oct. 4 that a Children's Advisory Committee had been appointed with Mr. W. Hamilton, Headmaster of Westminster School, as chairman, to give advice in connexion with the broadcasting of children's programmes.

The Postmaster-General announced on Dec. 14, 1954, that Sir Charles Colston had resigned from the deputy-chairmanship of the I.T.A. for personal reasons. On Feb. 4, 1955, it was announced that Sir Ronald Matthews, chairman of the Brush Group Ltd., and formerly chairman of the London and North Eastern Railway, had been appointed to succeed Sir Charles Colston. The appointment of Mr. B. C. Sendall, formerly home controller of the Central Office of Information, as deputy director-general of the I.T.A. was announced on July 21.
(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Independent Television, 13915 A.)

B. POLAND. — Completion and Opening of Warsaw " Palace of Science and Culture."

The " Palace of Science and Culture," the construction of which had been agreed upon in 1952 between the Polish and Soviet Governments, was opened in Warsaw in July last after having been completed in three years. The building—a 750-ft. skyscraper, the highest in Poland—houses the Polish Academy of Sciences and other official bodies, and has some 2,800 halls and rooms, including three theatres, two cinemas, a congress hall seating 3,500 people, a concert hall, libraries, gymnasia, etc. It was erected at Soviet expense as a gift to Poland.—(Polish Embassy Press Department, London)

C. JAPAN - PAKISTAN. — Extension of Trade Agreement. - Commodity Exchanges.

It was announced on Sept. 21 that the trade agreement between Pakistan and Japan for 1954-55, which would have expired on Sept. 15, had been extended to Jan. 31, 1956. The principal Pakistani exports covered by the agreement are raw cotton, jute, skins, and chrome ore, whilst the main Japanese supplies to Pakistan include cotton textiles and yarns, rayon, iron and steel, capital goods and machinery, and chemicals and dyes.—(Pakistan High Commissioner's Office, London)

OCTOBER 15—22, 1955

A. FRENCH MOROCCO. — Terrorist and Counter-terrorist Campaigns. - The Casablanca Riots. - The Middle Atlas and Riff Revolts. - Appointment and Resignation of M. Grandval as Resident-General. - General Boyer de Latour succeeds M. Grandval. - French Government's Reform Plan. - The Aix-les-Bains Conference. - The Antsirabe Discussions with Ex-Sultan Ben Youssef. - Agreement on Setting-up of Representative Moroccan Government and New Franco-Moroccan Relationship. - Withdrawal of Sultan Ben Arafa to Tangier. - Formation of Council of the Throne.

The crisis arising from the deposition of the former Sultan Ben Youssef in 1953, which had led to a growing succession of Moroccan terrorist and French counter-terrorist attacks, came to a head in June last when the French Government appointed M. Gilbert Grandval as Resident-General, with the task of restoring internal security, settling the problem of the throne, and introducing fundamental reforms. Although M. Grandval was able to initiate discussions on the plan, his position was rendered untenable by the hostility shown to him personally by important sections of the French community in Morocco and the "traditionalist" supporters of the reigning Sultan Moulay Arafa, as well as by a massacre of Europeans by Berber tribesmen in the Middle Atlas region. These factors, as well as his disagreement with the French Government on certain aspects of the timing of the various steps, led to his premature resignation at the end of August, followed by the appointment of General Boyer de Latour (the French High Commissioner in Tunisia) as his successor.

At a conference held at Aix-les-Bains in August between French Ministers and spokesmen of various sections of Moroccan opinion, agreement was reached that Sultan Moulay Arafa should withdraw, that a Council of the Throne should be installed, and that the Council should appoint a broadly-based Moroccan Government, which in turn would negotiate with France a new Franco-Moroccan relationship. This policy subsequently received the approval of the ex-Sultan Ben Youssef, who also agreed to refrain from all political activities on being allowed to return to France. After Sultan Moulay Arafa had agreed to withdraw to Tangier, without, however, renouncing his rights, the Council of the Throne was installed on Oct. 15.

These events, as well as an organized rising in the Riff at the beginning of October, are summarized below.

Terrorist and Nationalist Activities, January 1954 - June 1955.

The terrorist campaign, which had begun after the deposition of the ex-Sultan Ben Youssef, continued throughout 1954 and the first half of 1955, and led to reprisals by French counter-terrorists. Most of the victims of Moroccan terrorist attacks were either Moroccan officials and policemen, or other Moroccans considered to favour Sultan Moulay Arafa and the "traditionalists," whilst in a number of cases anti-nationalist French leaders, French military and officials, and ordinary French civilians were killed or wounded. The French terrorist counter-attacks were directed both against Moroccans and French citizens considered to sympathize with Moroccan nationalist aspirations. In a statement published on March 8, 1955, the French authorities gave the total casualties between Aug. 20, 1953 (the date of the ex-Sultan's deposition) and the end of February, 1955, as 57 Europeans and 240 Moroccans killed and 201 Europeans and 709 Moroccans wounded. The more important incidents are described below.

January - July, 1954. Most of the terrorist outrages during this period occurred at Marrakesh and Casablanca In Marrakesh two grenades were thrown on Feb 19 at the Pasha of that city (Haj Thami el-Glaoui), who had taken the lead in Ben Youssef's deposition and in Moulay Arafa's installation on the throne The Sultan was slightly wounded by a grenade which was thrown at him in a mosque on March 5; this was his second escape, an earlier attempt on his life having been made on Sept 11, 1953 (see 13129 A). A bomb explosion on May 26, when General Guillaume (then Resident-General) was visiting Marrakesh, injured 30 soldiers and 12 civilians; General d'Hauteville, the military commander of the region, was shot and seriously wounded on June 20; and M Thivent, the local director of urban affairs, was shot dead on July 23. In Casablanca, where terrorist attempts were of almost daily occurrence, Dr. Eyraud, managing director of the anti-nationalist *La Vigie Marocaine*, was shot dead on June 30. A boycott of French goods, and particularly of tobacco (a Government monopoly), was launched with considerable success, and acts of arson, including the deliberate burning of crops, became increasingly frequent.

August 1954. During August an agitation in support of the ex-Sultan's restoration led to serious riots at Fez, Petitjean, and Port Lyautey. The increase in tension was attributed to the approach of the festival of Aid-el-Kebir, in which the Sultan plays a prominent part, and of the anniversary of the ex-Sultan's deposition, and also to the hopes aroused by the French offer of internal autonomy to Tunisia and by General Guillaume's replacement by M. Lacoste (see 13586 B)

An open letter was addressed to M. Lacoste on July 26 by 128 leading Moroccan public figures, who appealed for the recognition of Moroccan sovereignty in practice; for a frank discussion of the problems raised by the ex-Sultan's deposition; for the raising of the state of siege and the release of political prisoners; and for the introduction of "elementary liberties." A similar manifesto issued on Aug. 4 by the moderate nationalist Democratic Independence Party demanded the restoration of the ex-Sultan and the formation of a provisional Government which would negotiate a new treaty between Morocco and France Numerous petitions in support of these demands were sent to M Lacoste, among the signatories being 40 of the *ulema* of Fez (the body of Moslem theologians and magistrates which elects the Sultan), judges and high officials, and 20,000 citizens of Rabat

At Fez demonstrations of loyalty to the ex-Sultan continued from Aug 1-10, and gave rise to almost daily clashes with the police, in which over 20 people were killed. At Petitjean (90 miles N.E of Rabat) rioters murdered six Jews on Aug. 3 and set fire to Jewish-owned shops, four people were killed when the police opened fire on the rioters. At Port Lyautey nine Europeans were murdered and at least four Moroccans killed by police fire during riots on Aug. 7-8. A nationalist call for a general strike on Aug. 9 met with a wide response, whilst Aug 10 (the festival of Aïd-el-Kebir) was widely observed as a day of mourning.

During police operations between Aug. 13-20 about 250 people were arrested in Casablanca, 130 at Fez, 280 at Petitjean, and 70 at Meknès The *ulema* who had signed the petition in support of the ex-Sultan, and who had taken sanctuary in the Mosque of Moulay Idriss, were forcibly removed on Aug. 18 by the Sultan's guard, all but five, however, were subsequently released

September 1954 - June 1955. During this period Casablanca and its neighbourhood became the main centre of the terrorists' activities, which resulted in almost daily shooting or bomb-throwing incidents. Attempts were made by Moroccan terrorists on the lives of M. Boniface (former chief of the Casablanca police) on March 10, 1955, and of Dr. Causse (president of the Right-wing *Union pour la Présence Française*) on March 21. Unsuccessful attacks by French counter-terrorists on other Frenchmen included attempts on the lives of M. Clostermann, a Gaullist member of the National Assembly and a distinguished fighter "ace" in the Free French Air Force during the last war (Oct 28, 1954 and March 7, 1955), M Gouin, an industrialist (Oct 28, 1954), and M Reitzer, a businessman (June 5, 1955), all of whom had opposed the ex-Sultan's deposition. Prominent Moroccan nationalists murdered by French counter-terrorists included M. Slaoui, a lawyer (Aug. 28, 1954), and M Diouri (Nov. 30, 1954) and M. Sebti (Jan. 2, 1955), both businessmen.

The police announced on April 25, 1955 the arrest of 179 members of two secret organizations, who were alleged to be plotting a general uprising. A later statement issued on May 17 said that five terrorist groups were known to exist in Casablanca, and that their activities were co-ordinated by the *Moundama Seria*, a secret society founded by a group of Marrakesh students in 1952, which was thought to have been responsible for the explosion in the central market in Casablanca on Dec. 24, 1953 (see 13349 A), and for the attempts on the lives of Dr. Eyraud and M Boniface.

A strike of Moslem shopkeepers was enforced in Casablanca, Rabat, and Salé on May 20, and, despite the expulsion from Casablanca of 67 shopkeepers who had taken part, spread throughout the country. The serious food shortage caused by the strike was intensified by a fishermen's strike at Safi, in protest against the arrest of six leading members of their trade union early in June.

The Murder of M. Lemaigre-Dubreuil.

Intense indignation was aroused in France by the murder on June 11, 1955, of M. Jacques Lemaigre-Dubreuil, an industrialist, who was shot dead outside his home in Casablanca by French counter-terrorists. M. Lemaigre-Dubreuil (60) had acquired a controlling interest in the newspaper *Maroc-Presse*, in which he had denounced the counter-terrorists and advocated a policy of conciliation and reform. During the last weeks of his life he had approached both Marshal Juin and the Pasha of Marrakesh in an unsuccessful attempt to win their support for such a policy, and on June 10 he had been received by M. Faure, the Prime Minister. His last letter, written to M. Faure a few hours before his death, emphasized that any use of force by the Government could only increase the terrorists' influence, and appealed for the release of the arrested trade union leaders at Safi.

M. July (the Minister for Moroccan and Tunisian Affairs), in a statement on June 12, denounced counter-terrorism—which, he said, "finds support not only in Morocco but also in Paris"—as "dishonouring France," and announced that M Wybot, director of the French security police, would leave immediately on a mission of inspection of the Moroccan police forces. As a result of M. Wybot's inquiries, M. Delrieu, a former chief inspector of the Casablanca police,

was arrested on June 17, whilst during the next few days 10 more Europeans, including seven policemen and a woman, were also arrested; four of them were reported to have confessed that they belonged to a gang which was responsible for the murder of M. Lemaigre-Dubreuil and of numerous Moroccans, for the attempts on MM. Clostermann and Reitzer, and for the burning of Arab shops. These persons were the first Europeans to be arrested on charges of terrorism

Protest demonstrations by French residents against these arrests took place in Casablanca on June 27-28, in response to an appeal issued by the "Organization for Anti-terrorist Defence" (O.D.A.T.), which accused members of the Government of being "in the pay of the terrorists," asserted that the arrested men had "served France with honour and glory," and described M. Lemaigre-Dubreuil as "a man for whom money counted more than human lives." The demonstrators, who included Customs officials in uniform, forced European shops to close and attempted to attack the *Maroc-Presse* office.

Outrages by terrorists and counter-terrorists meanwhile continued, and on July 4 the Moslem magistrates of Casablanca informed the French authorities that they could not perform their duties until the situation returned to normal, as they had been threatened with death by Moroccan terrorists if they did so.

M. Grandval appointed Resident-General.

The French Government announced on June 20, 1955, that M. Gilbert Grandval, the French Ambassador to the Saar, had been appointed Resident-General in succession to M. Lacoste. M. Grandval (51), who is of Alsatian-Jewish origin, served with distinction in the resistance movement, and was appointed High Commissioner in the Saar in 1945 and Ambassador in 1952, displaying in his handling of the Saar question great ability both as administrator and diplomat.

M. Faure stated in the National Assembly on June 21 that the Government had been unable to accept all the recommendations formulated in M Lacoste's reports, and had therefore decided to entrust the execution of its policy to a new Resident-General. The Government's policy, he added, was based on four principles: (1) it would never renounce or allow to be disputed the permanence of France's presence in Morocco; (2) it was determined gradually to abolish direct French administration; (3) it would progressively introduce in all spheres the modern institutions towards which Morocco aspired; and (4) it sought to establish a genuine Franco-Moroccan community on a solid basis.

M. Grandval arrived at Rabat to take up his post on July 7, and paid a formal visit to the Sultan In his speech on this occasion he expressed his desire to restore their "true meaning" to the international undertakings uniting France and Morocco (a reference to the Government's declared policy of abolishing direct French administration), to "re-establish order in men's work, reason in their minds, and concord in their hearts"; and to "promote the democratic evolution of Moroccan institutions." The directors of the departments of Moroccan political affairs, industrial production, commerce, education. agriculture, public works, and labour were subsequently retired on July 12; these changes, M. Grandval explained, had been made for "essentially psychological reasons," as the new policy required to be carried out by new personnel.

Although terrorist attacks continued to take place, a certain relaxation of tension occurred after M Grandval's arrival Following the annulment of the expulsion orders against certain Casablanca tradesmen, the Moroccan shopkeepers' strike in the city ended on July 7, and the Moslem magistrates agreed to resume their duties. In Casablanca, M. Grandval received an enthusiastic welcome on July 9 from the Moslem population, and when the police arrested about 50 nationalists for demonstrating in favour of the ex-Sultan he ordered their release. On July 13, in honour of the French national holiday, he ordered the release of 31 political prisoners and the closing of the last internment camp in Morocco, rescinded the orders banishing 46 nationalists and trade unionists from their homes, and promised that further measures of clemency would be taken on the occasion of the Aïd-el-Kebir festival if the atmosphere of *détente* continued On July 14 he held a single reception at Rabat for Europeans, Moslems, and Jews, instead of the two separate receptions which had previously been the custom

The July Riots.

The situation again deteriorated gravely following the explosion of a powerful bomb outside a crowded café in the European quarter of Casablanca during the evening of July 14, which killed six Europeans and injured over 30. (Four Moroccans arrested on Sept. 5 were subsequently reported to have confessed to causing the explosion.) Violent demonstrations were immediately begun by thousands of Europeans, who marched through the streets shouting "Death to Grandval," tearing down Moroccan flags, and plundering and burning Moslem and Jewish shops. An attempt was made to attack the *Maroc-Presse* office, and several hundred people broke into the house of Maitre Legrand (a barrister who had frequently defended Moroccans charged with terrorism); in self-defence, M. Legrand fired at the mob, killing one person and wounding two others. He was subsequently arrested, but was released on bail on July 18 and flown to France.

The rioting was resumed on July 15, when the demonstrators—led by a retired naval officer, Admiral Le Fluch—forced European shops to close, set fire to Moslem shops, stoned the *Maroc-Presse* office, murdered three Moslems, and molested others. No attempt to interfere was made by the police, some of whom were reported to have taken part in the riots. During the evening a counter-demonstration was organized by several hundred Moslems, who entered the European quarter, stoned a European to death, and set fire to a number of cars, in one of which a man was burned alive. By order of M. Grandval, who had arrived in Casablanca during the day, a curfew was imposed from 9 p.m. to 5 a.m., and on July 16 all public assemblies were banned, martial law was proclaimed, and General Franchi was appointed commanding officer with full civil and military powers.

The funeral on July 16 of the victims of the bomb explosion was made the occasion for a new demonstration against M. Grandval, who was spat upon and assaulted as he left the Cathedral. Little or no attempt was made by the police to protect M. Grandval from these insults. Further rioting in the Moslem quarters on July 16-17 was suppressed by French armoured forces. The number of casualties during the four days' disorders in Casablanca (including those killed in the explosion) was officially estimated at 12 Europeans, 19 Moslems, and one Jew killed, and 68 Europeans, 168 Moslems, and 18 Jews injured.

Following the riots, M. Vergnolle, chief commissioner of the Casablanca police, who was considered responsible for their failure to take action against the European rioters on July 14-16, was suspended on July 18; M. Mattei, secretary-general of the *Présence Francaise*, and M. Cambiazo, who had led the attack on Maitre Legrand's house, were expelled from Morocco on the same day; Dr. Causse and 13 other Europeans who had taken part in the riots were expelled on July 21; and disciplinary measures were taken against 55 members of the Casablanca police on July 24.

M. Grandval's firm attitude towards the counter-terrorists was denounced in a violently anti-Semitic leaflet issued by the O D A.T. on July 19, which declared that "the renegade Jew Hirsch-Ollendorf, calling himself 'Grandval,' a friend of Abramovich, calling himself 'Mendès-France,' has come to sell Morocco as they have sold Tunisia." The leaflet protested against the release of "the murderer Jean-Charles Legrand" and the expulsion of "good Frenchmen", and called upon the Europeans of Casablanca to prepare to "liberate our second country by force if necessary."

On July 21, M Grandval visited Marrakesh, in accordance with the custom whereby a new Resident-General makes a tour of the principal cities Although orders had been issued beforehand by the Pasha of Marrakesh that there should be no demonstrations of support for the Resident-General or the ex-Sultan, large crowds cheered M. Grandval and shouted slogans in favour of the ex-Sultan, the police then opened fire and rioting broke out, in consequence of which a member of the Pasha's guard and five civilians were killed. Similar scenes marked M. Grandval's entry into Meknès on July 25, when the police fired on demonstrators cheering the Resident-General and the ex-Sultan, at least 19 people being killed. To avoid further bloodshed, M. Grandval cancelled on the same day his projected visit to Fez.

The celebration on July 30-31 of Aïd-el-Kebir—which, as in the previous year, was observed by most Moroccans as a day of mourning—gave rise to new disorders. At Marrakesh nationalist mobs took over the Moslem quarter on July 30, burning and plundering, and on the following day the police fired on demonstrators, 11 people being killed and 23 wounded in the two days' rioting. At Moulay-Idriss on July 30 a crowd of rioters attacked the Khalifa's house, set fire to buildings, and murdered a French fire brigade officer, four Moroccans being killed when the police opened fire

French Proposals for a Settlement.

M. Grandval was meanwhile engaged in discussions on the situation with representatives of all sections of Moroccan opinion, including the Sultan, the Pasha of Marrakesh, and Si Bekkai, the former Pasha of Sefrou, who had resigned his post as a protest immediately after the ex-Sultan's deposition, and had since lived in voluntary exile. Although no official statement was issued, details of M. Grandval's proposals were given in a letter from the Pasha of Marrakesh to M. Faure, which was published on Aug. 4.

The Pasha stated that, as a result of several conversations with M. Grandval, he had gathered that the Resident-General regarded the Sultan's abdication as probable, and envisaged (*a*) the formation of a Government representing all shades of opinion, which would be entrusted with the introduction of reforms; (*b*) the nomination of a religious leader of the Moroccan people, in whose name prayers would be said, for a period of two years; and (*c*) the choice of a new Sultan at the end of that period, with the agreement of the ex-Sultan Mohammed Ben Youssef, who, with his descendants, would himself be excluded from the throne. In the Pasha's view, however, the present Sultan's abdication was "unthinkable" except under "inadmissible external pressure"; even if he did abdicate, a new Sultan would have to be chosen immediately, and he (the Pasha) and his friends could not admit that Ben Youssef should be consulted on this. A communiqué expressing similar views was published on the same day by the *Présence Francaise*

At a meeting of the French Government's co-ordinating committee for North African affairs on Aug 11-12, a compromise settlement was agreed upon whereby the present Sultan would be asked to form a Government representing all political tendencies to carry out reforms. A letter from M. Faure, suggesting that such a Government should be formed by Aug. 18, was delivered to the Sultan by M.

Grandval on Aug. 14, together with a list of representatives of the traditionalist, moderate nationalist, and nationalist tendencies from whom such a Government might be chosen The two leading nationalist parties (the Istiqlal and the Democratic Independence Party), however, both issued statements on the same day emphasizing that they could not participate in any Government formed by the present Sultan, as they still regarded the ex-Sultan Ben Youssef as the legitimate sovereign.

In view of this situation, the Sultan informed President Coty on Aug 17 that he could not consider himself bound by any time-limit; that the Government he envisaged would represent all tendencies "willing to take an active part in the construction of a new political organization"; and that if certain parties adopted publicly "such an attitude that their consultation or participation is impossible," their position as an organized Opposition would be recognized. The French Cabinet accordingly agreed on Aug 18 to grant the Sultan a few more days in which to try to form a Government, and on the following day decided to open discussions with representatives of all sections of Moroccan opinion at Aix-les-Bains on Aug. 22.

The Uprising in the Middle Atlas.

The anniversary of the ex-Sultan's deposition was marked by a savage uprising of Berbers of the Ait Smalla and Zaian tribes of the Middle Atlas, who occupied the town of Oued Zem and murdered about 50 Europeans, among them a number of women and children. The shock to French opinion caused by these events was the greater because these tribes had hitherto been regarded as pro-French and as opponents of the ex-Sultan. In the large towns, however, the situation remained comparatively peaceful, although widespread loyalist demonstrations gave rise to a number of incidents.

The disturbances in the Middle Atlas began at Khenifra on Aug 19, when 10 Moroccans and three soldiers were killed in fighting between French troops and some 700 rioters who had set fire to European shops and besieged the police station The fighting was renewed on Aug 20, and ended only after the garrison had been reinforced by parachute troops, whilst tribesmen who attempted to enter the town were scattered by fighter planes Casualties were three soldiers and 32 Moroccans killed, and 41 Moroccans wounded. At the village of Boujad two Moroccans were killed and three wounded on Aug. 20 in a clash between demonstrators and troops When this news reached the nearby town of Oued Zem, the Moslem population, who were joined by tribesmen from the hills, attacked the European quarter, setting fire to houses and killing men, women, and children indiscriminately In the ensuing massacre about 50 of the 800 European residents were murdered, their bodies being mutilated or set on fire, the victims included 14 patients in a hospital (11 of them Moslems) which was broken into by the tribesmen. After holding the town for several hours the insurgents were expelled by troops, about 60 Moroccans being killed At the mines of Ait-Ammar (north of Oued Zem) 22 Europeans were murdered, whilst at Khouribga (a few miles west of Oued Zem) rioters killed three Europeans and completely wrecked the surface installations of the phosphate mines, the damage being estimated at 1,000,000,000 francs.

In the native suburbs of Casablanca rioting began on Aug. 17 and continued sporadically for the next three days, 11 Moroccans were killed by police fire and two by the rioters during Aug 17-19, and 35 when the police fired on rioting demonstrators on Aug. 20 A restraining influence, however, was exercised by the nationalist parties, who emphasized their wish not to embarrass M. Grandval in his attempts to find a settlement; accordingly, a demonstration of 30,000 people on Aug 21 at the funeral of those killed on the previous day passed off in complete order. Other incidents occurred at Safi, where eight demonstrators were killed on Aug 21 in a clash with the police, and at Marrakesh and Magazan, where nine Moroccans were killed in disorders on Aug 22.

Large-scale military operations were begun in the neighbourhood of Oued Zem and Khenifra on Aug 22 by the Foreign Legion and other French forces, supported by tanks and aircraft. They terminated on Aug 26, when the local tribesmen and the Moslem population of Oued Zem formally surrendered their arms and asked for pardon. Only 300 out of 4,000 adult tribesmen took part in this ceremony, however, and a new operation was launched during the week Sept 2-7 which led to the rounding-up of nearly 400 suspects

It was officially announced on Aug 27 that altogether 88 civilians had been killed on Aug 20, and four soldiers and 700 insurgents in the subsequent operations. Unofficial estimates placed the number of Moslem victims at a much higher figure, a statement issued by the Istiqlal on Sept 3 alleging that several thousand had been killed by the French troops or armed bands of settlers. A Reuter dispatch of Aug. 24 stated that 300 Moroccans had been killed at Oued Zem; that 250 men who had taken part in the massacres had been subsequently killed in the mountains, and that several villages had been razed to the ground for having sheltered rebels who had killed or wounded *légionnaires*

General Duval, commander of the French forces in Morocco, lost his life on Aug 22 when his aeroplane crashed near Khenifra; reports that the accident was due to sabotage were denied by the French military authorities His funeral at Rabat on Aug. 24 was made the occasion for further violent demonstrations against M. Grandval by members of the French community.

The Aix-les-Bains Conference.

Discussions with Moroccan political and religious leaders opened at Aix-les-Bains on Aug. 22, the French Government being represented by a five-man committee comprising M. Faure, M. Pinay (the Foreign Minister), M. July (Minister for Tunisian and Moroccan Affairs), General Koenig (Defence Minister), and M. Schuman (Minister of Justice). On Aug. 23-25 the committee met El Mokri (the centenarian Grand Vizier of Morocco), the Pasha of Marrakesh, General Béthouart (Senator for Morocco), leaders of the Democratic Independence Party and the Istiqlal, and Si Bekkai. The nationalist representatives insisted that essential features of any settlement must be the departure of the present Sultan, the establishment of a Council of the Throne (but not of a Council of Regency, as Mohammed Ben Youssef must be considered the legitimate Sultan), the formation of a representative Government which would negotiate reforms with France and arrange conditions in which the Moroccan people could reach a free decision, and the return of the ex-Sultan to France from his exile in Madagascar. The talks concluded on Aug. 27 after the French Ministers had heard the views of El Kittani (the religious leader who played a prominent part in the ex-Sultan's deposition) and of a delegate representing the French community.

The leaders of five right-wing groups represented in M. Faure's Government had previously sent a letter to the Prime Minister on Aug. 23 threatening to withdraw their support if the talks led to the Sultan's abdication. M Schmittlein (the Gaullist leader), one of the signatories of the letter, was, however, disavowed on Aug 24 by a section of the Gaullist party, which issued a statement emphasizing the need for sweeping reforms. On Aug. 25 M. Clostermann (see above) resigned from the party in protest against its leader's policy. In a letter to M. Schmittlein he pointed out that the party had never protested against the crimes of the counter-terrorists and the European rioters in Casablanca, and observed that "our group seems to be making itself the defender of falsehood and sordid interests"

The French Cabinet met on Aug. 28-29 to consider the issues raised at the conference, and, after prolonged discussions, reached agreement on its policy. Although no official statement was issued, it was reported to have been agreed that the Sultan should leave the country, that his powers should be assumed by a Council of the Throne consisting of three members, and that the Council should nominate a representative Government. M. July stated that the Government had "every reason to believe" that a representative Moroccan Government would be formed by Sept. 12. The Sultan, however, declared in a communiqué on Aug. 26 that he intended to "continue his divine mission," whilst on Aug. 29 the Pasha of Marrakesh and El Kittani published a statement asserting that the Sultan's removal would violate "the rules of Islam" and the Protectorate Treaty.

Resignation of M. Grandval.

The resignation of M. Grandval, and the appointment of General Boyer de Latour (then Resident-General in Tunisia) as his successor, were announced on Aug. 30 in a statement issued by M. Faure, who paid tribute to "the courage and devotion which M. Grandval has displayed in difficult circumstances," and affirmed that "the cause of Franco-Moroccan conciliation, which he has served with conviction and self-sacrifice, remains our own." The events leading up to M. Grandval's resignation were summarized in a letter which he wrote to President Coty on Aug. 27, and which was published on Aug. 31.

M. Grandval recalled in his letter that the instructions given to him on July 6 recognized that the Moroccan situation was dominated by two facts: that the ruling Sultan, Moulay Ben Arafa, possessed neither authority nor prestige, and that since his exile the ex-Sultan had become a national hero. In consequence two alternatives had existed: either the maintenance of Ben Arafa in power, which would have made it almost impossible to introduce reforms, or the withdrawal of Ben Arafa and the establishment of a Council of Regency, "balancing the traditionalist and progressive forces." The latter solution, however, had involved the difficulty that the Council of Regency would be purely provisional, and would have to "exercise its powers in the name of a sovereign who in Moroccan eyes could only be Ben Youssef." He (M Grandval) had therefore been instructed to study all the solutions which had been proposed, and particularly the suggestion that the Sultan should voluntarily hand over his political powers provisionally to a third person and should withdraw from Rabat for some months Above all, it had been laid down as a basic principle that Ben Youssef's return to the throne was completely excluded, although the Government would be prepared to allow him to return to France as soon as the problem of the throne had been settled, a Moroccan Government had been formed, and peace had been restored in Morocco.

After studying the situation, M. Grandval continued, he had proposed to the Government on Aug. 1 (1) that Ben Arafa should be persuaded to abdicate; (2) that a Council of Regency should be formed, and should choose a Government; (3) that Ben Youssef should be asked to recognize publicly the legitimacy of the provisional authority, as a pre-condition of his return to France, and (4) that he should be persuaded to renounce his claim to the throne. He had also emphasized "the necessity of reaching a solution before Aug. 20, in the conviction that that date might offer the pretext for bloody

disturbances" The Cabinet, however, had decided to invite Ben Arafa to form a Government and, in the event of his failure, to hold a conference to discuss the situation, in consequence, he (M Grandval) had tendered his resignation on Aug 13, but this had not been accepted. In a second report on Aug 16 he had expressed the opinion that the "absolutely superfluous" conference could only render Ben Youssef's return inevitable, and had threatened to resign if it were held The Aix-les-Bains conference had nevertheless been summoned, thereby "convincing Moroccan opinion that Ben Arafa's reign was over, and persuading those who had hesitated to support Ben Youssef."

M. Grandval went on to say that he had again submitted his resignation on Aug. 22, and had rejected on the following day a request by M Faure that he should withdraw it In his letter of resignation he had pointed out that it was now doubtful whether "the enthusiasm which would greet Ben Arafa's departure and Ben Youssef's return to France could be restrained," and had quoted the opinion of officials familiar with the countryside that "in the state of excitement which certain tribes have reached, they would regard the ex-Sultan's return to France as a first concession won by violence, and undoubtedly would turn to further subversive activities." Only two possible policies now remained—either one of repression, with which he did not wish to be associated, or the continuation of the policy laid down in the Government's instructions of July 6 and his own report of Aug 1, which subsequent events had rendered it dangerous to carry out. Ben Arafa's departure, the establishment of a Council of the Throne, and Ben Youssef's unconditional return to France, the letter concluded, would not produce the indispensable *détente*, but would inevitably lead to Ben Youssef's restoration, which could not be tolerated by France.

General de Latour arrived in Rabat on Aug. 31 to take up his post as M. Grandval's successor.

Negotiations in Madagascar with ex-Sultan.

Following discussions in Paris between M. Faure and Moroccan nationalist spokesmen, General Catroux (the distinguished French soldier and diplomatist) and M. Yrissou (principal private secretary to M. Pinay) left Paris by air on Sept. 2 for consultations with the ex-Sultan at Antsirabé (Madagascar). General Catroux had served for many years in Morocco and in recent years had been a prominent advocate of liberal policies in French North Africa. A second delegation of moderate nationalist leaders, consisting of Si Bekkai (the former Pasha of Sefrou), Ben Slimane (the former Pasha of Fez, who had likewise opposed the ex-Sultan's deposition and had been dismissed by Ben Arafa immediately after his accession), and Moulay Hassan (the ex-Sultan's brother-in-law), followed on Sept. 4.

On his return to Paris on Sept. 11 General Catroux announced that an agreement had been reached. In return for an assurance that he would be allowed to stay in France, the ex-Sultan had given an undertaking that he would abstain from all political activities and from any other activities which might embarrass the French Government, and that he would not leave France without its permission. He had also approved the French Government's proposals for the formation of a Council of the Throne and of a representative Government, and its long-term plans for the transformation of Morocco into a free and sovereign State, permanently linked with France by a treaty of inter-dependence; this treaty would guarantee France's strategic, diplomatic, political, and cultural interests, and would ensure the French colony a privileged status as compared with foreign nationals.

The executive committee of the Istiqlal, meeting in Rome, announced on Sept. 7 that it would agree to the establishment of a Council of the Throne on condition that its membership was approved by the ex-Sultan and did not include anyone who had been involved in his deposition. A joint delegation representing the Istiqlal and the Democratic Independence Party subsequently visited Madagascar for discussions with the ex-Sultan, at the conclusion of which they announced on Sept. 15 their approval of the agreement between Ben Youssef and General Catroux.

The Sultan's Departure for Tangier.

After hearing General Catroux's report the French Government decided on Sept. 12 to proceed with its plan for the establishment of a Council of the Throne. A letter requesting the Sultan to withdraw to Tangier, guaranteeing the security of himself and his friends, and assuring him that Ben Youssef would not be permitted to return to the throne, was drafted on Sept. 13 by President Coty, with the assistance of M. Faure and M. July. When it was submitted to the Cabinet's committee of five on the following day, however, M. Pinay and General Koenig took strong exception to it, and it was therefore decided that it should not be delivered.

During the following week further delay was caused by disagreements between the French Government and the nationalists over the composition of the Council of the Throne, which it had previously been agreed should consist of the Grand Vizier, Si Bekkai, and a non-political religious leader. On Sept. 15, however, the Government proposed that the third member should be a traditionalist; this was strongly opposed by the nationalists, as giving their opponents a majority on the Council. After General Kettani, a Moroccan officer and a close friend of General Juin, had refused on Sept. 19 an invitation to take the third place on the Council, the Cabinet agreed on the following day to leave the choice of the third member to M. Faure and M. July.

The Government's attempts to reach a settlement were greatly hindered during this period by the opposition of the right-wing parties, and particularly of the Gaullist Ministers. On Sept. 13 General Koenig issued through his Ministry an announcement of his disagreement with his colleagues' policy, on Sept. 18 General de Latour revealed at a Cabinet meeting that M. Triboulet (the Gaullist Minister for Ex-Servicemen) had sent him messages advising him not to follow M. July's instructions; and on Sept. 20 the Gaullist Ministers' opposition to M. Faure's policy was reported to have been overcome only by the M.R.P. Ministers' threat to resign if it was not approved. M. Montel, an Independent Republican and chairman of the defence commission of the National Assembly, went to Morocco, where he was received by the Sultan on Sept. 17 and 19; it was reported that M. Montel had advised the Sultan not to consent to abdicate.

After consultations with the Cabinet, General de Latour returned to Rabat on Sept. 21 with instructions to deliver President Coty's letter to the Sultan and to choose the third member of the Council of the Throne from a list prepared by M. Faure and M. July; at General de Latour's request, however, the Government agreed that no force should be used to bring about the Sultan's retirement and that no time-limit should be fixed for his departure. During the following week a number of petitions by Moroccan dignitaries in support of the Sultan were sponsored by the Pasha of Marrakesh and the *Présence Française*, whilst the nationalists organized a shopkeepers' strike in several towns in protest against the delay in the implementation of the Aix-les-Bains agreement.

General de Latour confirmed on Sept. 28 that he was now in a position to execute the Government's plan, and during the evening of Sept. 29 M. de Panafieu (Minister Delegate at the Regency) and M. de Lipkowski (the political director) had an interview with the Sultan, who assured them that he was anxious to leave. The Sultan's director of protocol, Si Abderrhamane Hajoui, however, succeeded in delaying Ben Arafa's signature of two documents in which he gave his reasons for leaving and appointed a Council of the Throne, and twice left the palace for discussions with the leaders of *Présence Française*, armed members of which had meanwhile stationed themselves round the building. M. de Panafieu accordingly ordered the arrest of El Hajoui, who thereupon fled from Rabat to an unknown destination. On Sept. 30 the Sultan sent a letter to President Coty informing him that he had decided, "in order to appease men's hearts and to reconcile their minds, to hold ourselves at a distance from the responsibilities of the throne, without renouncing our rights in any way."

The Sultan left Rabat by air in the early hours of Oct. 1 for the international zone of Tangier. At the airport before his departure General de Latour read to him a letter from President Coty paying tribute, on behalf of the French Government, to the "self-sacrifice and sovereign dignity" of his conduct. The letter also acknowledged that the Sultan's decision, taken solely to end the divisions in the country, would in no way affect his rights and prerogatives, and gave an assurance that there was no question of Ben Youssef's restoration, saying that this was made "legally impossible" both by the terms of the Sultan's withdrawal and by "the undertakings freely accepted by Ben Youssef on behalf of himself and his sons."

Establishment of the Council of the Throne.

Shortly after the Sultan left Rabat, a statement was broadcast announcing that he had delegated "the responsibility for dealing with all matters concerning the crown" to his cousin Moulay Abdallah Ben Moulay Abdel Hafid (son of the Sultan Moulay Hafid, who signed the Protectorate treaty in 1912). This was followed by a broadcast by General de Latour calling on French and Moroccans to rally for the time being round Moulay Abdallah, appealing to the Moroccan population for their continued support for himself, and assuring the French community that he fully understood the "painful problems" with which they were confronted, and which were "too often over-simplified by Frenchmen of the metropolis."

This appeal was made by General de Latour without preliminary consultation with the Government, and after discussions with the leaders of the *Présence Française*, who subsequently claimed that the General had given them an assurance on Sept 30 that the Council of the Throne would not be set up In a statement on Oct. 4 General de Latour declared, however, that his policy was that of the French Government, viz , the formation of a representative Moroccan Government and the subsequent solution of the problem of the throne It was nevertheless pointed out in the French Press that the French Government's plan in fact provided for the establishment of a Council of the Throne (of which no mention was made in the Resident-General's statement) before the formation of a Moroccan Government

The Istiqlal and the Democratic Independence Party both announced on Oct. 1 that, as they had never regarded Ben Arafa as a legitimate sovereign, they denied his right to delegate powers which he had never possessed, and insisted on the observance of the Aix-les-Bains and Antsirabé agreements. A similar attitude was adopted by the independent nationalists and the *Union Marocaine du Travail.*

A statement defining the main principles of the French Government's Moroccan policy was issued by M. July on Oct. 1.

The Government's plan, it said, was aimed at the establishment of a permanent union between France and Morocco and of a community of the two peoples, and was based on the following principles : (1) respect for existing international treaties ; (2) respect for the sovereignty and integrity of Morocco , (3) the permanence of France's presence in Morocco, in the common interest of both countries and of the free world , (4) recognition of the position and rights acquired in Morocco by the French community, and equitable representation of their interests.

Moroccan Sovereignty. The formation of a Moroccan educated class (*élite*), the statement continued, made it possible to entrust them with increasingly large responsibilities for the conduct of public affairs, and the French Government was therefore prepared to discuss with a representative Moroccan Government the progressive withdrawal of French direct control.

Problem of the Throne. The French Government was anxious to reach agreement on arrangements which would permit a " peaceful and conciliatory " solution of the problem of the throne

Moroccan Government. The proposed Moroccan Government would represent different trends of opinion and different sections of the population , it would in principle be homogeneous, but would include French technicians wherever this should be considered necessary. Its tasks would be (*a*) to carry on the administration and prepare legislation, " with full respect for fundamental liberties and existing rights, and without discrimination," and (*b*) to co-operate with the French Government in the introduction of modern democratic institutions and in the definition of the future permanent links between the two countries.

Franco-Moroccan Relations. Whilst France would retain her responsibility for defence and foreign affairs, it was proposed that a joint council of representatives of the two Governments should be formed for the discussion of matters of common interest, and that a high tribunal should be set up to deal with problems arising from the new system of association. In addition the reciprocal rights of the French and Moroccan sections of the population in the economic, political, administrative, and judicial fields would be recognized.

M. de Panafieu and M. de Lipowski, who were reported to have offered their resignation in protest against the Sultan's delegation of his powers to Moulay Abdallah, flew to Paris on Oct. 1 and were received by M. Faure and M. July On Oct. 3 M. de Panafieu returned to Rabat with instructions from M. Faure to General de Latour to proceed with the establishment of the Council of the Throne ; the Resident-General, however, was reported to have refused to do so, on the ground that Si Bekkai's inclusion would be regarded by the traditionalists and the French community as a first step towards Ben Youssef's return. The Prime Minister's Office nevertheless stated on Oct. 4 that in view of the military situation in Morocco (see below) General de Latour would not be recalled " even if he did not give political satisfaction." M. de Panafieu then proceeded to Tangier, and was received on Oct. 5 by the Sultan, who assured him that his delegation of powers to Moulay Abdallah was " in no way incompatible with the establishment of the Council of the Throne."

After further discussions in Rabat between General de Latour, General Billotte (General Koenig's successor as Defence Minister), and M. Yrissou, a proclamation establishing a Council of Guardians of the Throne, with four members instead of the three originally agreed upon, was issued by El Mokri, the Grand Vizier, on Oct. 15. The members named were El Mokri, Si Bekkai, Hadj Mohammed Sbihi (the Pasha of Salé), and Si Tahar Ou Assou (Caid of the Air Alham tribe in the Middle Atlas). The increase in the number of members was intended as a compromise between the French and nationalist viewpoints, Hadj Sbihi being regarded as politically neutral and Si Tahar as a moderate traditionalist.

Hadj Mohammed El Mokri, who is nearly 100 years old, took part in the Algeciras conference of 1906, negotiated the Treaty of Fez in 1912, and has been Grand Vizier since 1917. **Si M'Barek Ben Mostapha El Bekkai** (48) was seriously wounded while serving in the French Army in 1940, losing a leg, and was captured by the Germans. After his release he served successively as Pasha of Beni-Drar and as Pasha of Sefrou until his dismissal in 1953. **Hadj Mohammed Ben Hadj Taibi Sbihi** (71) has been Pasha of Salé since 1920, and is a noted Koranic scholar **Si Tahar Ou Ali Ou Assou Loudyi** (38) served in the French Army before succeeding his father as Caid of his tribe.

Uprisings in the Riff and Middle Atlas.

During the night of Oct. 1-2 a series of concerted attacks occurred simultaneously in the Riff area in the north, near the frontier of French and Spanish Morocco, and in the Middle Atlas in central Morocco. In both areas the attacks were carried out by tribesmen, led by uniformed " commandos " heavily armed with automatic guns and sub-machine guns and other weapons.

In the frontier zone, north of the small town of Taza, the rebels concentrated their attacks on the mountain posts of Boured, Tizi Ouzli, and Bou Zineb (a post forming an enclave in Spanish Morocco) Boured was overrun but the small garrison recaptured it with the help of reinforcements on Oct 2 ; at Tizi Ouzli the garrison successfully fought off the attackers until a relief column arrived late on Oct. 4 ; and Bou Zineb, where the small garrison was compelled to withdraw after burning down the fort, was likewise reoccupied by relief forces on Oct 3 During the next few days sharp fighting continued in the triangle formed by Boured, Tizi Ouzli, and the small town of Aknoul, from where French reinforcements tried to reach Boured and Tizi Ouzli but found the road, which passes through precipitous mountain territory, cut in several places , only after strong efforts with air support did the relief columns succeed in breaking through at the narrow mountain pass in the Col du Nador, which had been dominated by small groups of rebels firing from concealed and almost inaccessible mountain positions Although the relief columns eventually reached Tizi Ouzli late on Oct 4 and Boured on Oct 5, the rebels again closed in on both posts, and bitter fighting continued on successive days, especially along the road to Tizi Ouzli After air and artillery attacks on the rebels' positions on the Col du Nador, another armoured French relief column succeeded in breaking through to Tizi Ouzli on Oct 7.

A fresh offensive with air and artillery support, to clear up the triangle, was launched on Oct 9 by strong French forces estimated at 10,000 men During the following week the French troops gradually moved up to positions along the Franco-Spanish border, whilst the rebels withdrew before them General de Latour and General Billotte (the new French Defence Minister) visited the fighting areas and subsequently confirmed previous French statements that supplies for the rebels were coming from the Spanish zone, and that the majority of the withdrawing rebels were finding refuge there—allegations which were, however, denied by the Spanish authorities

In the Middle Atlas mountains, about 1,000 Berbers of the Marmoucha tribe, led by "commando" units (who were believed to have infiltrated into this region in recent weeks from Algeria), attacked the town of Immouzer (65 miles S.E. of Fez) during the night of Oct 1-2 and were only driven out after 10 hours' fierce fighting by the small garrison of Moroccan *Goums* ; during the fighting 11 civilians (including three women and two children) were killed. In the subsequent clearing-up operations a French motorized column reached on Oct 5 the small town of Almis, believed to be the centre of the rebellion in the area, and was making contact with the rebel tribesmen in order to obtain their surrender On the same day about 400 tribesmen who had taken part in the attack on Immouzer formally surrendered and asked for pardon, whilst on Oct 6 it was reported that many villages were flying white flags, and that several friendly tribes had asked to be allowed to join in the operations on the French side

Smaller attacks also occurred on Oct 3-4 near the town of Berkine (about 70 miles S E. of Fez) and on the French post of Taforalt, about 30 miles west of Oujda, 18 miles from the Spanish Moroccan frontier and near the Moroccan-Algerian frontier, but in both cases the rebels were driven off by the garrisons. The French press reported on Oct. 15 that groups of rebels had infiltrated into the Oujda area, but that an attempt to establish a continuous " front " between Boured and the Oran department in Algeria had been frustrated by the counter-action of the French forces in that area, which had sealed off the " corridor " between Algeria and Spanish Morocco

French Military Reinforcements.

In view of the situation in Morocco and Algeria, the French Defence Ministry announced on Aug. 24 that the first half of the 1953 class of conscripts, comprising 50,000 - 60,000 men, would be recalled for active service. During the following week troops from garrisons in Germany were sent to Morocco, bringing the number of French forces in that country to over 25,000. Following the attacks on Oct. 1-2 it was announced in Paris that five more battalions, including two from Metropolitan France and three from Algeria, would be flown to Morocco immediately.

Franco-Spanish Relations.

The Riff uprising was followed by a renewed serious deterioration in Franco-Spanish relations, which had improved during recent months. Thus, in April last the Spanish Government had brought to an end the anti-French propaganda in Arabic

which had been broadcast by Tetuan Radio since the end of 1953, whilst a Spanish Note of Sept. 26 informed the French Government that Spain regarded the re-establishment of legality in Morocco as a matter concerning France alone; the Note added, however, that if this should lead to any changes in the regime of the Protectorate implying any revision of the treaties in force, Spain would have to be represented at the negotiations from their outset.

The secretary-general of the French Foreign Ministry, M. Massigli, told the Spanish Ambassador (the Count of Casa-Rojas) on Oct. 5 that the French Government had received information that the Riff insurgents had entered French Morocco from the Spanish zone, and called on the Spanish Government strictly to supervise the frontier and to take all necessary measures to ensure that the rebels did not use Spanish territory as a base. (Le Monde, Paris - Le Figaro, Paris - Times - New York Times) **(Prev. rep. Deposition of Ex-Sultan, 13129 A; Terrorist Activities, 13349 A; Resident-General, 13586 B; Franco-Spanish Relations, 13400 A; "North African Liberation Army," Formation, 14452 B.)**

A. SOVIET UNION. — Release of Mrs. Wallach.

Mrs. Erika Glaser-Wallach, foster-daughter of Mr. and Mrs. Noel Field, who were released from a Hungarian prison in 1954, was freed from the Soviet prison camp at Vorkuta (Siberia) at the beginning of October, and was released in Moscow on Oct. 18 pending the receipt of the necessary documents to enable her to leave the country. Mrs. Wallach said that she had been arrested by the East German police in the Soviet sector of Berlin in 1950, when she had gone to that city in an effort to trace the whereabouts of her foster-parents, who had disappeared the previous year. In January 1953, after being held in solitary confinement for 2½ years, she had been put on trial before a Soviet military court in East Berlin and found guilty of espionage against the Russians She had been sentenced to death and had been taken to Moscow, but in July 1953, four months after the death of Stalin, her sentence had been reduced to 15 years' imprisonment and she had been sent to Vorkuta.—(Times - Daily Telegraph) **(13957 D.)**

B. INTERNATIONAL RED CROSS. — 1949 Geneva Conventions. - Further Ratifications.

The U.S. Senate unanimously approved on July 7 the four Red Cross conventions signed at Geneva on Dec. 12, 1949, dealing with the protection of civilians in wartime, the treatment of sick and wounded military personnel in the field, the treatment of shipwrecked military personnel at sea, and the treatment of prisoners-of-war. The conventions were formally signed by President Eisenhower on Sept. 8.

The U.S. ratification, which was deposited in Berne on Aug. 2, brought the number of States which had ratified the conventions to 48; viz., the 36 listed in report 13664 B and—in addition to the U.S.A.—Rumania, Bulgaria, the Ukraine, Byelorussia, Netherlands, Hungary, Ecuador, the German Federal Republic, Poland, Siam, and Finland, which had ratified the conventions since May 1954.—(International Committee of the Red Cross, Geneva - New York Times) **(Prev. rep. 13664 B.)**

C. POLAND. — Death of General Okulicki.

Information released by Polish exiles in London on Oct. 18 said that the Soviet Government had disclosed the death nine years ago of General Leopold Okulicki, the last C.-in-C. of the Polish wartime underground Home Army. It was stated that the Soviet Red Cross had now informed his widow in London that he had died in a Moscow prison on Dec. 24, 1946. General Okulicki was one of 16 Polish underground leaders invited to Moscow for discussions in 1945 and then arrested and accused of working against the Red Army. They were tried in Moscow in 1945 and were, with one exception, sentenced to imprisonment, General Okulicki receiving the longest sentence of ten years.—(Daily Telegraph) **(Prev. rep. 7206 A.)**

D. EGYPT - CHINA. — Three-year Trade Agreement between Egypt and Communist China. - Chinese Machinery for Egypt.

The New China News Agency announced on Oct. 14 that Egypt and the People's Republic of China had signed a three-year trade agreement on Oct. 14 under which Egypt would receive light machinery from China. It was stated that the agreement provided for balanced trade between the two countries, with payments in transferable sterling unless another currency was considered suitable; that the two countries would open commercial offices in their respective capitals; and that they would accord each other most-favoured-nation treatment. (Times)

E. INDUSTRIAL DISPUTES. — Strikes, 1952-54.

The following table showing the incidence of strikes in a number of countries during the last three years was published on Sept. 12 by *The Times*, which reproduced it from an article which appeared in the July issue of the *International Labour Review*. The basis of comparison used was the number of working-days lost per year for each 1,000 workers employed:

Days Lost a Year per 1,000 Employed

Country	1952	1953	1954	Average 1947-54
Switzerland	10	60	25	39
Netherlands	20	15	35	80
Sweden	35	240	10	81
Western Germany	50	150	168	103*
Denmark	5	5	30	108
Norway	190	65	110	112
United Kingdom	140	170	190	151
Canada	1,140	620	660	736
Belgium	520	250	220	760
Japan	1,770	470	370	786
Irish Republic	1,730	320	258	881
Australia	810	740	680	941
New Zealand	110	70	75	963
Italy	530	1,110	710	1,023*
France	250	1,370	210	1,244
United States	2,400	1,070	850	1,515
Finland	65	120	200	1,520

* The figures given for Western Germany and Italy are the average for 1949-1954.

The Times commented as follows on these statistics:

"In some countries there have been great variations and their position in the table is affected by one or two very bad years of industrial strife Finland, for instance, lost 8,140 days for each 1,000 employed in 1950, a much higher proportion than any other country Similarly New Zealand's position is affected by a loss of 4,640 days a 1,000 in 1951. . Denmark would be at the top of the table if it were not for the loss of 790 days a 1,000 in 1947. The U K figures varied less than those of any country, the range being from 100 to 190, while the U.S. figures, varying from 850 to 2,290, were consistently high.

"It is tempting to try to draw conclusions about the kind of economy in which serious strikes are least likely to occur. It is to be noted . . that the Scandinavian countries, with strong united trade unions under powerful central guidance, and often central wage negotiations, have an excellent record, as have the Netherlands, where the trade unions are not united but wage movements are nationally controlled. On the other hand Australia, where there is also a strong element of Government control, has a consistently bad record

"Weak unions certainly do not means industrial peace, as the record of France shows, though the strong position of the Communists has no doubt a good deal to do with that. The figures for both France and Italy are much affected by one-day political strikes, which were demonstrations rather than industrial disputes The heavy ratio of strikes in the United States suggests that this may be a characteristic of a free competitive economy. The article quoted [in the *International Labour Review*] notes that in the five-year period from 1949 to 1953 a total of about 60,000,000 workers were involved in disputes and 400,000,000 days of work were lost in the 28 countries for which data were available. Strikes and lock-outs in the United States accounted for about one-fourth of the world total of workers involved and 50 per cent of the man-days lost in disputes.

"The trend of strikes in the United Kingdom might be held to give some added force to this contention. The number of days lost a 1,000 workers went steadily down from 190 in 1947 to 100 in 1950. The year 1951, in which a Conservative Government came into office and began to free the economy, was the beginning of a slight rise which has continued ever since There are other figures—for instance, those for Germany—which cannot be held to support this deduction.

"As for trade competition, it will be seen that British industrialists have been more handicapped by strikes than those of Germany, Sweden, or Switzerland, but much less than those of the United States, Canada, Japan, Italy, or France. Even in America, however, the total effect is probably very slight The article quoted points out that the number of days lost through disputes in the United States in 1954 represented only 0.2 per cent of all available working time The proportion was about the same in Britain's worst recent year, 1944. Illness and absenteeism both cause much more serious loss of time."

The figures given by the *International Labour Review* showed that the incidence of strikes was lightest in Switzerland, the Netherlands, and Sweden; relatively light in Western Germany, Denmark, Norway, and the United Kingdom; and heaviest in a group of countries which included Belgium, France, Italy, the United States, Canada, Australia, New Zealand, and Japan. (Times - International Labour Review)

F. NEW ZEALAND.—Further Increases in Bank Rate.

The Reserve Bank of New Zealand, which had increased its discount rate on July 1 from 4 to 5 per cent, further raised it to 6 per cent on Sept. 5 and to 7 per cent on Oct. 18. (Directorate of Information Services, Wellington) **(14323 D.)**

A. BRAZIL. — Presidential Elections. - Victory for Senhor Kubitschek. - 1954 General Elections. - Changes in Brazilian Cabinet.

Presidential and Vice-Presidential elections for the five-year term beginning Jan. 31, 1956, were held in Brazil on Oct. 3. The four candidates for the presidency were Senhor Juscelino Kubitschek, former Governor of the State of Minas Gerais, who was supported by the *Partido Trabhalista Brasileiro* and the *Partido Social Democratica* (the two groups which had supported the late President Vargas); Senhor Adhemar de Barros, former Governor of São Paulo, who had the support of the *Partido Social Progresivo* (the party for which President Café had stood in the previous Presidential elections in 1950); Major-General Juarez Tavora, a professional soldier, who was supported by the anti-Vargas *União Democratica Nacional*; and Senhor Plinio Salgado, founder and former leader of Brazil's Fascist Party, the *Integralistas* The candidates for the Vice-Presidency were Senhor João (Jango) Goulart, leader of the *Partido Trabhalista Brasileiro* and a former Minister of Labour; and Senhor Milton Campos and Senhor Danton Coelho, two veteran politicians.

Although separate votes are cast for the new President and the new Vice-President, candidates for the two offices are generally supported by the same groups Thus Senhor Goulart campaigned for election with Senhor Kubitschek, Senhor Coelho with Senhor de Barros, and Senhor Campos with General Tavora The Communists, who, though banned as a party, are still allowed to publish propaganda and otherwise express their views publicly, had announced in their newspaper *Imprensa Popular* on Aug 11 that they would support Senhor Kubitschek and Senhor Goulart for election as President and Vice-President

Preliminary election results, published on Oct. 11 when some 75 per cent of the votes had been counted, showed that Senhor Kubitschek had polled more than 2,600,000 votes, followed by General Tavora with 2,400,000. Senhor de Barros with about 2,000,000, and Senhor Salgado with 600,000 votes; it was thought unlikely that these positions would be changed by subsequent returns. In the vote for the vice-presidency Senhor Goulart had a margin of 40,000 votes over Senhor Milton Campos, with Senhor Danton Coelho third, and was regarded as assured of election.

Senhor Kubitschek (54), the son of a Czech immigrant and a doctor by profession, had a successful term as Governor of the State of Minas Gerais In his election campaign he promised to give "more food, more power, and more transportation" to Brazil and to develop the country's oil resources through the State monopoly. **Senhor Goulart** (37), known as "Peronsinho" (Little Peron) because of his close contacts with the former President of Argentina, was appointed Minister of Labour by the late President Vargas in 1953. In February 1954, however, his resignation was forced upon the President by the Army, which alleged that Senhor Goulart was trying to set up in Brazil a syndicalist movement having certain analogies with the *Peronista* Labour movement in Argentina (see 13530 B).

In a broadcast on Oct. 15 Senhor Kubitschek promised to work for social progress while President, and appealed for national unity to help develop the country "I need peace to work and to let all Brazil work," he declared, adding that he would pray that God would bring about "the miracle of transforming all the vehemence, all the aggressive impulse, all the pugnacity that we generally waste in senseless struggles into thoughtful energy applied in favour of the recovery and development of our country."

Elections held on Oct. 3, 1954, for a new Chamber of Deputies, two-thirds of the Senate, and Governors of 11 States, showed a swing away from the pro-Vargas groups towards the centre parties and the conservatives. In the new Chamber the centre parties supporting President Café Filho gained a working majority by winning some 170 of the 324 seats, whilst in the Senate the pro-Vargas *Partido Trabhalista Brasileiro* won less than 10 of the 42 contested seats. One of the most important of the gubernatorial elections was that in São Paulo, where Senhor de Barros, a wealthy industrialist and the former incumbent, was defeated by Senhor Janio Quadros, mayor of São Paulo City.

The following changes in President Café's Administration were announced in the last nine months.

Finance. Professor Eugénio Gudin resigned on April 5 and was succeeded by Dr. José Maria Whitaker, who had held the post under President Vargas in 1930. On Oct. 6, however, Dr. Whitaker resigned after President Café had decided to submit Dr. Whitaker's exchange reform plan to Congress instead of approving it immediately as the Finance Minister had requested. Dr. Whitaker was succeeded in turn by Senhor Mario Camara, former Brazilian Treasury representative in London and New York.

Justice. Dr. Miguel Seabra Fagundes resigned in February as Minister of Justice, being succeeded by Dr Alexandre Marcondes Filho In April, Senhor Marcondes himself resigned and Senhor José Duarte Prado Kelly was appointed to the post.

Transport and Public Works. Senhor Lucas Lopes resigned on Jan. 30 and was succeeded by Colonel Rodrigo Otavio Jordão Ramos. The latter also resigned on April 5 and was succeeded by Dr. Otavio Marcondes Ferraz.

Agriculture. Senhor José Costa Porto resigned in April and was succeeded by Senhor Bento Munhoz de Rocha Neto.

The President of the Bank of Brazil, Senhor Clemente Mariani Bittencourt, also resigned on April 5 together with Professor Gudin, whilst his successor, Senhor Alcides da Costa Vidigal, submitted his resignation in sympathy with Dr. Whitaker on Oct. 6.—(Brazilian Ministry of Foreign Affairs - New York Times - New York Herald Tribune - Bank of London and South America, Fortnightly Review - Times - Le Monde)

B. RUMANIA. — Government and Party Changes. - M. Stoica appointed Prime Minister. - Amnesty for War Criminals, Collaborators, and Rumanians Abroad.

The following changes in the Rumanian Cabinet and the Rumanian Workers' (Communist) Party were announced in Bucharest on Oct. 2, following a two-day conference of the party's central committee:

(1) M. Chivu Stoica, hitherto Minister for the Metallurgical Industry, was appointed Prime Minister in succession to M. Gheorghe Gheorghiu-Dej.

(2) M. Gheorghiu-Dej was appointed First Secretary of the Rumanian Workers' Party in succession to M. Gheorghe Apostol, who became president of the central council of Rumanian trade unions.

(3) M. Josif Chisinevschi became Second Secretary of the Rumanian Workers' Party, relinquishing his former position as a First Deputy Premier in the Rumanian Cabinet.

(4) M. Emil Bodnaras (Minister of National Defence), M. Petre Borila (Minister for the Food Industry), and M. Miron Constantinescu (chairman of the State Planning Commission) were promoted from Deputy Premiers to First Deputy Premiers, relinquishing their ministerial portfolios.

(5) M. Simion Bughici (Foreign Minister), M. Dimitru Petrescu (Finance Minister), and M. Alexandru Barladeanu (Minister of Foreign Trade) were appointed Deputy Premiers, also relinquishing their portfolios.

(6) M. Grigori Preoteasa, hitherto Deputy Foreign Minister, succeeded M. Bughici as Foreign Minister.

(7) General Leontin Salajan, hitherto Deputy Defence Minister, succeeded M. Bodnaras as Defence Minister.

(8) M. Gherasim succeeded M. Stoica as Minister for the Metallurgical Industry; M. Stefan Voitec became Minister of Foreign Trade; M. Manescu succeeded M. Petrescu as Finance Minister; and M. Theodoru was appointed Minister for the Food Industry *vice* M. Borila.

M. Gheorghiu-Dej, Prime Minister since 1952, had been First Secretary of the Rumanian Workers' Party from 1945 to 1954, when he relinquished the post to M Apostol. The new Prime Minister, M. Stoica, has been a member of the Rumanian Workers' (then Communist) Party since 1930, and is a leading trade union official. He had been a First Deputy Premier since 1950, and as Minister for the Metallurgical Industry had played an important part in the industrialization of Rumania.

An amnesty on identical lines to that recently issued in the Soviet Union (see 14459 B) was announced by the Rumanian Government on Sept. 25.

It provided (1) that Rumanians sentenced to less than 10 years' imprisonment for crimes committed during the war would be immediately released, (2) that those serving terms of more than 10 years would have their sentences reduced by half, but would be released if they had "taken part in the anti-Hitlerite war in the zone of operations" (after Aug. 23, 1944) or if they had not "committed murders on their own initiative", (3) that the amnesty would not apply to "members of Fascist Governments between Sept. 6, 1940, and Aug. 23, 1944"; (4) that all foreigners sentenced for war crimes would be released immediately, irrespective of the length of their sentences.

It was reported from Vienna on Oct. 16 that M. Titel Petrescu, former secretary-general of the Rumanian Social Democratic Party, had been released from prison in Bucharest, together with M. Valmarescu, one-time Rumanian Consul-General in Dresden, and a number of Army and Air Force officers M. Petrescu resigned from the Social Democratic Party in 1946 when the party decided to present joint election lists with the Communists (see 8025 A), and was subsequently imprisoned.

Earlier (in June) the Rumanian Government had offered a general amnesty (open until Aug. 23) for Rumanian citizens or former citizens living abroad, in order to afford them "the chance to return to their homeland to participate in the constructive work of their compatriots."—(Le Monde, Paris - Neue Zurcher Zeitung - Agerpres, Bucharest)

(Prev. rep. Cabinet, 13808 A; Amnesty, 12951 C.)

A. CZECHOSLOVAKIA. — Cabinet Reorganization. - Drive for increased Food Production and Farm Collectivization.

A major reorganization of the Czechoslovak Government was announced in Prague on Oct. 14, as follows:

(1) M. Karel Polacek, hitherto Minister of Engineering, was appointed Deputy Prime Minister.

(2) The Ministry of the Engineering Industry was divided into three new Ministries, viz., the Ministry of Heavy Industry, under M. Jano Bukal (previously Deputy Minister of the Engineering Industry); the Ministry of Precision Industry, under M. Vaclav Lomsky; and the Ministry of Motor Vehicles and Agricultural Machinery, under M. Emil Zatloukal.

(3) The Ministry of Agriculture was split into two—a Ministry of Agriculture under M. Vratislav Krutina (a Communist Party secretary), and a Ministry of State Farms under M. Marek Smida (hitherto Minister of Agriculture)—thus restoring the position before the merger of these two Ministries in September 1953.

(4) M. Joseph Tesla, chairman of the Communist Party's Central Committee and a former First Secretary of the Trade Union Federation, was appointed Minister for Manpower, succeeding M. Nosek, who had died on July 22.

(5) A new State Office for Reconstruction was created, headed by M. Oldrich Beran, hitherto Minister of State Control.

(6) M. Michael Bakula, formerly First Vice-Chairman of the Slovak Board of Commissioners, became Minister of State Control *vice* M. Beran.

The appointment of M. Polacek brought the number of Deputy Premiers to six, whilst the other ministerial changes increased the number of Ministries from 28 to 31 and of State Offices from three to four.

Earlier, a reorganization of the Politburo of the Central Committee of the Slovak Communist Party had been announced on April 25, and changes in the Slovak Board of Commissioners on July 6.

It was stated that at the meeting of the party's Central Committee on April 24 neither M. Siroky (the Czechoslovak Prime Minister), M. Zupka (deputy-chairman of the Czechoslovak trade unions), M. Culen (former Slovak Commissioner for Agriculture), nor M. Sebesta (a vice-chairman of the Board of Commissioners), had been re-elected to the Politburo, and that in the case of MM. Siroky and Zupka this decision had been due to the fact that they were "overburdened with other work." M. Siroky, however, remained a member of the Slovak Communist Party's central committee, as well as a member of the Politburo of the Czechoslovak Communist Party. The new Politburo of the Slovak Communist Party was headed by M. Karel Bacilek (the party's First Secretary).

Under the changes in the Slovak Board of Commissioners Dr. Horak, formerly in charge of Posts, became Commissioner for Local Industry; Dr. Lukacovic (Commissioner for Building and Construction) succeeded Dr. Horak as Commissioner for Posts, M. Takac (Commissioner of Light Industry) took over Building and Construction; and M. Hrusovsky (hitherto chief of the secretariat of the Board of Commissioners) was appointed Commissioner for Light Industry. M. Hojc was relieved of his position as Commissioner for Manpower, and it was stated that he would be given another post.

Prior to the above-mentioned reorganization of the Ministry of Agriculture M. Novotny, First Secretary of the Central Committee of the Czechoslovak Communist Party, had announced a drive to make collective farms predominant in Czechoslovak agriculture by 1960.

Addressing the Central Committee's session, which was held on June 29-30, M. Novotny complained about the unsatisfactory state of Czechoslovak agriculture and said that every effort would have to be made to increase food production by 6·5 per cent in 1956 and to bring under cultivation a further 81,000 hectares of land, in addition to the 39,000 newly cultivated so far. M. Novotny declared that apart from land lying fallow there were large areas of poorly cultivated land belonging to "sick or incompetent landlords or *kulaks*;" that this land had to be gained for co-operative farms (i.e. collectives); and that this would be achieved by refusing Government aid to the *kulaks*, who remained the "hereditary enemies of the working class." Recalling that the party had condemned forcible administrative measures to bring about collectivization, he urged small and middle farmers to join farm co-operatives wherever conditions for these were suitable, and added that such co-operatives would be formed, and would receive the Government's support, even in those villages where only a minority of the farmers were in favour of founding them. [This implied that even if the majority in a village were not directly forced to join the co-operative farms, the best lands and facilities would be given to the minority, so that the others, who would receive no Government aid and would also be oppressively taxed, would have to join the collectives in due course.]

The Central Committee adopted resolutions on June 30 calling for more food production, mainly by creating new collective farms, and approving the agricultural plan for 1955. In the annual Budget, which had been submitted to the National Assembly on March 22, it was provided that 7,952,000,000 Czechoslovak crowns (nearly £400,000,000) were to be spent in 1955 to increase agricultural production.

Introducing the Budget, M. Duris (the Minister of Finance) stated that, although industry had developed rapidly, agricultural production had basically not advanced from the pre-war level and was acting as a brake on the entire economy; among details which he gave was that the average milk yield per cow was not even up to the pre-war level.

The economic plan for 1955, which was submitted to the National Assembly on March 21, stated that the planned yields of the main agricultural crops for 1954 had not been realized, partly because of bad weather.—(Le Monde, Paris - Neue Zurcher Zeitung - Manchester Guardian - New York Times) **(Prev. rep. 13971 B; Slovak Board of Commissioners, 13156 A.)**

B. OBITUARY. — Mr. L. S. Amery.

The Right Hon. L. S. Amery, C.H., the eminent Conservative statesman, and a former Secretary of State for India and Burma, Secretary of State for the Dominions and Colonies, and First Lord of the Admiralty, died on Sept. 16 at the age of 81.

Leopold Charles Maurice Stennett Amery was born on Nov. 22, 1873, at Gorakhpur (India), the son of an officer of the Indian Forestry Department. Educated at Harrow and Balliol College, Oxford, he took a first class in Classics and *Literae Humaniores* and was elected a Fellow of All Souls. From 1899 to 1909 he worked on the editorial staff of *The Times*, and in 1902 was called to the Bar, although he never practised. After unsuccessfully contesting East Wolverhampton in 1906, 1908 and 1910, and Bow and Bromley in 1910, he was returned unopposed in 1911 as Unionist member for South Birmingham (now the Sparkbrook Division), which he represented unbrokenly throughout the 34 years of his parliamentary life.

During the 1914-18 War he saw service in Flanders and the Balkans, but was recalled in 1916 to become assistant secretary to the War Cabinet, subsequently serving on the staff of the War Council at Versailles and on the personal staff of the Secretary of State for War (1917-18). In the immediate post-war years he was successively Parliamentary Under-Secretary to Lord Milner at the Colonial Office (1919-21), Parliamentary and Financial Secretary to the Admiralty (1921-22) and First Lord of the Admiralty (1922-24). In the Conservative Government of 1924 he became Colonial Secretary, and in the following year Secretary of State for the Dominions when that post was created. He held both these posts until 1929, when the second Labour Government was returned to office. In 1927-28 he made a six-months' tour of the Dominions, during which he visited Canada, Australia, New Zealand, South Africa, and Southern Rhodesia, covering 55,000 miles and delivering some 300 speeches.

Although Mr. Amery held no Cabinet post during the 'thirties, he remained one of the leading Conservative personalities in the House of Commons. During the years immediately preceding the Second World War he made frequent appeals for a stronger foreign policy and for an intensification of rearmament, and was an outspoken critic of the "appeasement" policy and the Munich agreement. In May, 1940, he made his most famous speech when he addressed Mr. Chamberlain (then Prime Minister) in the words used by Cromwell in dissolving the Long Parliament. "You have been here too long for any good you have been doing. Depart, I say, and let us have done with you. In the name of God, go!"

In 1940 Mr. Amery was appointed Secretary of State for India and Burma in Mr. Churchill's Coalition Cabinet, and held that post throughout the Second World War. He was responsible for the offer of August, 1940, accepting the principle that India should work out her own constitution, for the increasing, and ultimately almost complete, "Indianization" of the Viceroy's Executive Council, and for the offer conveyed to New Delhi in 1942 by Sir Stafford Cripps. Among the many problems with which he had to deal were the building-up of India's war effort, her constitutional development towards full self-government within the Commonwealth, the subversive "Quit India" movement, and the severe Bengal famine of 1943-44. In the Labour victory of 1945, however, Mr. Amery lost his seat at Sparkbrook, and was never again to sit in the House.

Throughout his life Mr. Amery was an unswerving supporter of a strong and fully-developed Commonwealth and Empire, and one of the foremost advocates of Imperial Preference. He was a brilliant linguist (speaking more than a dozen languages), a keen mountaineer in his younger days, and the author of a number of political and other works, including *My Political Life* (his memoirs, the third and last volume of which was published shortly before his death), *The Times History of the South African War* (in seven volumes, completed in 1909), *Empire and Prosperity* (a defence of Imperial Preference), *Days of Fresh Air* (an account of his travels), and *In the Rain and the Sun* (his mountaineering and walking experiences). He was made a Companion of Honour in 1945.

Mr. Amery married in 1910 Florence, the daughter of the late John Hamar Greenwood and the sister of the first Viscount Greenwood. His elder son, Mr. Julian Amery, is Conservative M.P. for Preston North.

Tributes to the late Mr. Amery were paid by Sir Anthony Eden, Sir Winston Churchill, Mr. Attlee, and Mr. Clement Davies.—(Times - Daily Telegraph - Manchester Guardian)

A. UGANDA. — Return of Kabaka of Buganda. - New Constitutional Arrangements in Force. - Appointment of Buganda Ministers and Baganda Members of Uganda Legislative and Executive Councils.

Kabaka Mutesa II, who had been exiled from Buganda on Nov. 30, 1953, returned to his country on Oct. 17 in accordance with the constitutional arrangements worked out at the Namirembe Conference and subsequently approved by the British Government and the Buganda Lukiko. These provided for three main stages · (1) the signing of a transitional agreement on the constitutional changes by three of the Kabaka's representatives, who would then become regents until the Kabaka's return; (2) the election by the Lukiko of a new Katikiro (Chief Minister), who would then choose his five Ministers from a list of 15 selected by the Lukiko; (3) the election of five Baganda representatives to the Uganda Legislative Council. Six weeks after the second and third stages had been completed the Kabaka would be authorized by the British Colonial Secretary to return to Buganda, where he would formally sign the new constitutional arrangements himself. The implementation of these developments is described below.

Signing of Transitional Agreement. - Appointment of Regents. The Buganda (Transitional) Agreement, 1955, was signed in Kampala on Aug. 15 by the Governor of Uganda (Sir Andrew Cohen) and the three representatives of the Kabaka—Prince Badru Kangalu, the Kabaka's great-uncle, and a Moslem; Mr. Munyangenda, father of the Kabaka's chaplain, and a Protestant; and Mr. Andrea Kyemwa, a Roman Catholic. After the agreement had been signed the Kabaka's representatives were sworn in as Regents.

Election of Katikiro.—Appointment of Ministers. As the next step in implementing the Buganda agreement, the Lukiko on Aug. 17 elected Mr. Raphaeri Kasule to the new office of Speaker. [Previously the Katikiro had been both chairman and chief spokesman for the Buganda Government, but in future the Speaker will preside over the Lukiko and, in particular, will be responsible for the elections whenever there is a new Ministry.] Mr. Kasule, a wealthy landowner and a Roman Catholic, had been one of the Kabaka's six nominees in the Lukiko for the past 12 years; he was one of the plaintiffs in the Kabaka case in 1954, and was a member of both the recent Lukiko delegations to London.

Four nominations for the post of Katikiro were submitted to the Speaker, and in the elections by the Lukiko on Aug. 24 Mr. Mikaeri Kintu was returned with 40 votes. Mr. Matayo Mugwanya, the outgoing Omulamuzi (Chief Justice) received 37 votes, Mr. D. M. Mukubira, an elected member, five, and Mr. Paulo Kavuma, the outgoing Katikiro, four. Mr. Kintu is a *saza* (county) chief and was chairman of the drafting committee which went to London to draw up the new Buganda agreements.

On Sept. 4 Mr. Kintu announced his list of Ministers as follows: Omulamuzi, Mr. Antonio Gita, Omuwanika (Treasurer), Mr. Bulasio Kavuma; Education, Mr. A. K. Sempa; Health, Mr. Kasimu Male, Natural Resources, Mr. D. M. Mukubira. Mr. Gita and Mr. Kavuma are both *saza* chiefs, Mr. Sempa was secretary of the Lukiko, and Mr. Male was senior assistant to the Katikiro, so that Mr. Mukubira was the only non-official appointed. Mr. Gita, in accordance with tradition, is a Roman Catholic, while Mr. Male is the first Moslem to hold ministerial office in Buganda.

Election of Baganda Members of Uganda Legislative Council. The Buganda electoral college, whose members had earlier been elected by villages throughout Buganda, met on Sept. 5 and elected the following five Baganda members of the Uganda Legislative Council. Mr. A. K. Kironde, a Muganda lawyer and a member of the Uganda National Congress (U.N.C.); Mr. I. K. Musazi, president-general of the U.N.C.; Dr. E. M. K. Muwazi, secretary of the U.N.C.; Dr. B. N. Kununka, treasurer of the U.N.C., and Father R. Masagazi, editor of the Roman Catholic newspaper *Munno*. It was pointed out by *The Times* correspondent in Kampala that the educated members of the Lukiko had shown little interest in the elections, and that if they had done so it was doubtful whether the U.N.C. would have achieved their success.

Completion of Uganda Executive Council. After the Buganda elections to the Legislative Council of Uganda, Sir Andrew Cohen announced on Sept. 14 the appointment of the two remaining Ministers, both Baganda, in the Protectorate Government. Mr. Y. K. Lule, who failed to secure election to the Legislative Council, was named as Minister of Rural Development, and Mr. A. K. Kironde was appointed Assistant Minister of Social Services. Mr. Z. C. K. Mugonya, originally appointed Assistant Minister for Social Services (see 14356 A), was reappointed as Minister without executive responsibilities but with the title of Minister of Land Tenure.

The Kabaka left London by air on Oct. 16 and arrived at Entebbe (Uganda) on Oct. 17, six weeks after the completion of the stipulated preliminary arrangements. He was greeted by his wife (the Nabagareka), by the Governor and Lady Cohen, and by the regents and Ministers of Buganda, officials of the Protectorate and Buganda Governments, and the rulers of Bunyoro, Ankole, Toro, and Busoga.

The Kabaka was given an enthusiastic reception by a crowd of some 8,000 at the airport, and drove in an open car to Kampala along a route lined with people and crossed at intervals by triumphal arches. In Kampala, where the crowds were estimated at 100,000, he attended a special service in the cathedral, which was followed by a ceremony in the Lukiko Hall. Loyal demonstrations continued throughout the day.

The Buganda Agreement, 1955, was signed in Kampala on Oct. 18 by Sir Andrew Cohen and the Kabaka, thus formally bringing into effect the agreed constitutional changes. In a speech the Kabaka thanked those in Buganda and Britain who had served him or helped to bring about the present result, mentioning Sir Keith Hancock and Mr. Lennox-Boyd (the Colonial Secretary), and said that he looked forward to the "self-government of Buganda within the framework of a self-governing Uganda." In reply, the Governor, after welcoming the Kabaka, declared that as a result of the recent events a better understanding between the British and the Baganda could now emerge. The British would know that however fervently the Baganda desired progress in the western way, they were still deeply attached to their traditional institutions; while the Baganda might know "that the force which drives us in our work is the desire to help you forward."

The revised Bunyoro agreement (see 14356 A) was signed at Hoima on Sept. 4 by Sir Andrew Cohen and the Omukama of Bunyoro.—(Times - Daily Telegraph) **(Prev. rep. 14356 A.)**

B. PAKISTAN - AFGHANISTAN. — Settlement of Dispute over Insult to Pakistani Flag.

As a result of discussions between the Afghan Foreign Minister, Sardar Mohammed Naim Khan, and the Pakistani Ambassador in Kabul, Colonel A. S. B. Shah, an agreement was reached on Sept. 9 whereby the Afghan Government promised to make amends for the insult offered to the Pakistani flag during the Kabul riots of March 30, and both Governments undertook not to conduct propaganda calculated to arouse hatred and incite violence against each other.

Accordingly, the Pakistani flag was ceremonially rehoisted on the Embassy in Kabul on Sept. 13 by Sardar Mohammed Naim Khan in the presence of an Afghan military unit and heads of foreign diplomatic missions. In a short speech the Foreign Minister expressed regret for the incident, and gave assurances for the safety of the life and property of Pakistanis in Afghanistan. Similar ceremonies took place on Sept. 14 at Jalalabad, where the Afghan Communications Minister rehoisted the flag on the Pakistani Consulate, and on Sept. 15 at Peshawar, where Dr. Khan Sahib (the Pakistani Communications Minister) rehoisted the flag on the Afghan Consulate "as a gesture of good will" towards Afghanistan and, in a formal statement, gave assurances for the safety of Afghan life and property in Pakistan.

Relations between the two countries again deteriorated during October, however, as a result of continued Afghan opposition to the inclusion of the Pathan areas in the new Province of West Pakistan, leading to the recall of the Afghan Minister in Karachi and the Pakistani Ambassador in Kabul.

In a survey of the latest developments, the Pakistani Foreign Office stated on Oct. 18 that the Afghan Foreign Minister had proposed on Oct. 8 that the Prime Ministers of the two countries should meet urgently, either in Karachi or Kabul, for a "heart-to-heart talk on matters affecting Afghan-Pakistani relations." This proposal had been accepted immediately by the Pakistani Prime Minister, Chaudhri Mohammed Ali, who had sent an invitation to the Afghan Prime Minister, Sardar Mohammed Daud Khan, to visit Karachi whenever convenient. On Oct. 11, however, the Pakistani *Chargé d'Affaires* in Kabul had been informed that the visit of the Afghan ministerial delegation led by the Prime Minister was conditional upon the postponement of the implementation of the One-Unit Act setting up West Pakistan. On being told by the Pakistani Ambassador on the following day that the establishment of West Pakistan could not be postponed, the Afghan Foreign Minister (Prince Naim) had replied that no useful purpose would be served by the visit of the Afghan Ministers to Karachi, since its very object had been to secure the postponement of the implementation of the One-Unit Act.

Moreover, on Oct. 13 the Afghan Minister in Karachi had handed over a Note expressing his Government's concern at the incorporation of "Pashtunistan" in the new province of West Pakistan, and asserting that this was against the wishes of the Pashtuns, at the same time he had again proposed a high-level meeting of representatives of both countries to settle "all outstanding political differences." In its reply, the Pakistani Government had deprecated the "continued Afghan attempts at interference in Pakistan's affairs," and had rejected the Afghan contentions as "wholly unwarranted," reiterating that all territories lying to the east of the Durand Line were an integral part of the Pakistan and completely outside the jurisdiction of the Afghan Government. Nevertheless the Pakistani Government had expressed willingness to have a meeting of responsible Ministers of the two countries, provided that matters which were purely Pakistan's own concern were excluded from the scope of the discussions.

The Afghan Minister in Karachi was recalled to Kabul on Oct. 17, and the Pakistani Ambassador in Kabul on the following day.—(Pakistani High Commissioner's Office, London - Times) **(Prev. rep. 14291 A.)**

A. UNITED STATES. — Federal Employees. - Commission to review Loyalty-Security Programme. - Completion of Security Investigations. - The Ladejinsky, Peters, and Service Cases.

President Eisenhower signed a Bill on Aug. 9 creating a 12-member bipartisan commission to review the Government's loyalty-security programme for Federal employees and defence workers. The Bill provided that President Eisenhower, the President of the Senate, and the Speaker of the House of Representatives would each appoint four members of the commission, which would make a thorough study of the Administration's method of determining security risks. Although a revised procedure for dealing with Government employees suspected of being "security risks" had been approved by the President on March 5, there had been a growing demand in Congress for a complete revision of the loyalty review system, especially after the apparent lack of co-ordination between Government departments shown in the case of Mr. Wolf Ladejinsky.

Mr. Ladejinsky, a Russian-born expert on Far Eastern agriculture, was serving as an agricultural attaché at the U.S. Embassy in Tokio when the Department of Agriculture announced on Dec. 22, 1954, that he had failed to meet "technical standards and security requirements" and was therefore being removed from his post. It was stated that Mr. Ladejinsky had sisters living in the Soviet Union through whom he might be coerced; that he had worked for the Bureau of Transportation of the Soviet railways (later known as the Amtorg Trading Corporation) in 1930-31 after he had left the Soviet Union because of his professed dislike for the Communist regime; that he had visited the Soviet Union as a tourist in 1939; and that he had belonged to Communist-front organizations.

This decision was in complete contradiction to one of the U.S. State Department, from whom Mr. Ladejinsky had previously received a security clearance, and the U.S. Ambassador in Japan (Mr. John M. Allison) informed the State Department that the removal of Ladejinsky was damaging American prestige in the Far East. Mr. Ladejinsky himself described the allegations made by the Department of Agriculture as "utterly false and thoroughly unsubstantiated"; stated that he had worked for Amtorg only as an interpreter, strongly denied that he had belonged to "Communist front" organizations, and pointed out that he had made his journey to the Soviet Union in 1939 with the approval of the Agriculture Department, and that he had, at the Department's request, studied agricultural developments in the U S S R. He also said that he had not communicated with or heard from his sisters in the Soviet Union since 1946 or 1947.

On Jan. 5, 1955, it was announced that the Foreign Operations Administration had cleared Mr Ladejinsky as a "security risk" and had appointed him to a post dealing with land reform in Vietnam. It was indicated in the American Press that this action had been taken at the direction of senior White House officials, and President Eisenhower himself, at a press conference on Jan 12, upheld the right of two Government departments to reach conflicting opinions about whether or not Mr. Ladejinsky was a security risk. After repeated requests by Congressmen that the Secretary of Agriculture (Mr. Benson) should explain more fully the grounds on which Mr. Ladejinsky had been dismissed from his Tokio post, Mr. Benson sent a letter to Senator Carlson on July 2 in which he publicly retracted the charge that Mr. Ladejinsky was a "security risk," and informed the Senator that he had ordered that the findings against Mr. Ladejinsky should be expunged from the records. Mr. Benson noted that since Mr. Ladejinsky's case had been considered by the Department of Agriculture it had also been reviewed by "two agencies more experienced in security than this department," and that in both instances Ladejinsky had been cleared.

In two other recent cases the Courts had reversed decisions on Government employees who had been dismissed on the grounds that they were security risks.

On June 6 the Supreme Court ruled that Dr. John Peters, a professor of medicine at Yale University, had been wrongly dismissed on security grounds in 1953 from his post as consultant to the Public Health Service, and ordered that the Loyalty Review Board's findings should be expunged from the records of the Civil Service Commission The Supreme Court held that the Board, by reviewing a decision of Dr Peters' department on its own motion, had exceeded its powers, as the Executive Order under which it was established merely empowered it to review cases involving persons recommended for dismissal and to hear their appeals In view of the illegality of the Board's action, the Supreme Court did not decide on Dr. Peters' claim that his dismissal without being allowed to confront and cross-examine the witnesses was a violation of the Fourteenth Amendment. [This Amendment states that no person shall be deprived of liberty and property without due process of law.]

As a result of the Court's ruling on Dr. Peters, Judge Edward M. Curran, of the Washington Federal District Court, ruled on June 30 that the Loyalty Review Board's decision in the case of Mr. John S. Service was "a nullity," and ordered the Civil Service Commission to expunge from its records a finding of "reasonable doubt" of his loyalty. Mr. Service, a career diplomat with 18 years' service in the State Department, and an expert on China (where he was born), had been dismissed in December 1951 by Mr. Dean Acheson, then Secretary of State, after the Loyalty Review Board had held that his loyalty to the United States was "questionable," despite the fact that he had previously been cleared by six agency loyalty boards. However, although Judge Curran ruled in Mr. Service's favour with regard to his loyalty, he did not order his reinstatement, on the grounds that Mr Service had been validly discharged from the State Department because the Secretary of State had "absolute discretion" to dismiss any employee when he deemed it necessary or advisable in the interests of the U.S.A.

The chairman of the Civil Service Commission, Mr. Philip Young, stated on July 29 that the security investigation of 2,300,000 Federal Government employees had been completed and that henceforth the Government's security programme would only affect new applicants, unless fresh evidence should require a "reappraisal." Mr. Young said that between May 28, 1953, and March 31, 1955, a total of 3,432 Government employees had been dismissed "because of security reasons," and that 5,447 had resigned when unfavourable information had been found in the files. The resignations amounted to 1.2 per cent of the 441,000 resignations from Government service in the same two-year period, whilst the security discharges accounted for about 10 per cent of the total dismissals.

Following President Eisenhower's statement in his State of the Union message in January 1954 (see page 13353, first column) that "more than 2,200" Federal Government employees had been dismissed by the Republican Administration under the loyalty security programme, Democratic spokesmen had challenged the figures issued from time to time by the Government on the grounds that they were meaningless without further explanation. The *New York Times*, in an editorial (Jan. 4, 1955), stressed that the term "security risk" covered "such a multitude of real or imagined sins that the term does not have much significance any more." It pointed out that, under the Administration's security programme, sexual perverts, drunkards, employees with criminal records or "character defects," and those whose "behaviour, activities, or associations" tended to show that they were "not reliable or trustworthy" were all defined as security risks.—(New York Times - New York Herald Tribune) **(14304 A; 13862 A.)**

B. HUNGARY. — Release of Archbishop Grosz.

It was officially announced in Budapest on Oct. 13 that the Minister of Justice had consented "to interrupt the imprisonment" of Mgr. Joszef Grosz, Roman Catholic Archbishop of Kalocsa, who had been sentenced on June 27, 1951, to 15 years' detention on charges of "conspiring to overthrow the democratic regime," "organizing a counter-revolutionary movement," "illegal foreign exchange transactions," and the "organization of escapes abroad." The announcement said that the Minister's decision had been taken in response to a request by the chairman of the Hungarian Bishops' conference, Mgr. Czapek (Archbishop of Eger), and that Mgr. Grosz would take up residence in an "ecclesiastical building" to be assigned to him. Four Roman Catholic priests who had been sentenced to varying terms of imprisonment were granted an amnesty at the same time.

Archbishop Grosz, who became the leader of the Roman Catholic hierarchy in Hungary after the imprisonment of Cardinal Mindszenty, concluded the agreement with the Hungarian Government in 1950 regulating the relations between Church and State (see 11259 A). In 1951, however, he refused to sign a "peace appeal" and, after a violent campaign against him in the Communist Press, was arrested on June 18, 1951. His "provisional release" from prison followed that of Cardinal Mindszenty, announced in July last. (Le Monde, Paris - New York Herald Tribune) **(Prev. rep. Cardinal Mindszenty, 14315 D; Grosz Trial, 11769 A.)**

C. INDIA. — Congress Party. - Central Election Committee. - Membership.

The All-India Congress Committee elected on Sept. 4 the five members of the party's Central Election Committee, who, together with the six members of the Central Parliamentary Board, will constitute the supreme body to direct the Congress Party's work in the next general elections. Those elected were: Mrs. Indira Gandhi (a daughter of Mr. Nehru), Mr. Lal Bahadur Shastri (Minister of Railways and Transport), Mr. Kamaraj Nadar (president of the *Tamil Nad* Congress party), Dr. B. C. Roy (Chief Minister of West Bengal), and Mr. U.S. Mallayyah (a party whip). The Central Parliamentary Board consists of Mr. Dhebar (the Congress Party president), Mr. Nehru (the Indian Prime Minister), Dr. Maulana Azad (the Minister of Education), Pandit Pant (the Home Minister), Mr. Morarji Desai (Chief Minister of Bombay), and Mr. Jagjivan Ram (the Minister of Communications).—(The Hindu, Madras - The Statesman, Calcutta) **(Prev. rep. 14150 A.)**

A. UNITED KINGDOM. — Electricity Industry. - British Electricity Authority Report for 1954-55. - Net Surplus of £18,794,878. - Issue of £200,000,000 B.E.A. Stock.

The report and accounts of the British Electricity Authority (now renamed the Central Electricity Authority, see 14016 C) for the year ended March 31, 1955, were published on Sept. 27. They showed that, before transferring £10,500,000 to supplementary reserve for depreciation of fixed assets, the Authority itself and the 14 Area Boards earned a combined surplus of £18,794,478, the largest since nationalization in 1948. The net surplus after this special depreciation provision was £8,294,478.

The combined revenue of the Authority and the Area Boards amounted to £364,526,686, and combined expenditure (including £54,063,183 for normal depreciation) to £308,512,734, leaving a net surplus from trading of £56,013,952. These figures compared with a revenue of £325,547,395, expenditure of £277,772,146, and a consolidated trading surplus of £47,775,249 in 1953-54. After adding interest from subsidiary companies, rent receipts, etc , and deducting interest, financing expenses, and further amounts written off for undertakings acquired, etc , the consolidated net surplus for 1954-55, before transfer to reserve, amounted to £18,794,478, compared with £13,188,738 in 1953-54. The Authority itself (which is responsible for supplying electricity to the Area Boards) made a surplus of about £11,600,000, the balance of about £7,200,000 representing the net trading surplus of the Area Boards. The final net surplus of £8,294,478 compared with a net surplus of £5,525,738 in 1953-54, and brought the net surplus since Vesting Day to £49,814,973

Salient points from the report are summarized below :

Revenue and Expenditure. Of the combined revenue, £356,327,522 came from the sale of electricity to consumers and £3,076,544 from rentals of meters and apparatus The principal items of expenditure were . generation costs, £165,313,883 ; distribution costs, £25,436,678, payments in lieu of rates, £16,553,796 , administrative and general exponses, £11,954,037 ; consumer services, £12,548,222

Consumers and Sales. The number of consumers increased during the year by 548,000 to over 14,900,000, supplies having been brought to a further 14,800 farms, thereby increasing the number of farms supplied with electricity to 167,307, or 60 per cent of all farms in the country, compared with only 32 per cent at the time of nationalization and with the target figure of 85 per cent by 1965. Sales of electricity totalled 62,410,000,000 units, or 11.8 per cent more than in 1953-54. The largest percentage increase (22.4) was in electricity sold to farms, followed by industrial consumption (12.5), consumption by electrified railways (11.5), commercial consumption (11.0), domestic sales (10.5), and public lighting (9.2). Consumption by tramcars and trolleybuses declined by 11 1 per cent Over half the sales during 1954-55 (32,063,000,000 units) were to industry and nearly one-third (18,486,000,000 units) to domestic consumers.

Prices and Costs. The average price received for electricity was 1.37d. per unit, compared with 1.373d in 1953-54. The report stated that costs had been kept down by improved thermal efficiency, which now averaged 23.85 per cent, compared with 23.4 per cent in 1953-54. It added that improvements in thermal efficiency since nationalization had saved 17,600,000 tons of coal and about £53,400,000, and that although the price of coal had gone up in the same period by about 40 per cent, the cost of electricity had risen by only about 0.2d per unit

Generating Plant Capacity, Capital Expenditure, etc. The report stated that on March 31, 1955, the Authority owned 294 power stations with a total installed capacity of 20,172,974 kw , new plant installed during the year having added about 1,539,000 kw. The Authority planned to increase generating capacity by 45 per cent by 1960, this programme being entirely separate from the Government's plan to build 12 nuclear power stations expected to be providing an additional 1,500,000-2,000,000 kw. by 1950 The Authority's capital expenditure during 1954-55 amounted to about £350,000,000.

Hire Purchase. Hire purchase sales rose to about £25,501,894, compared with £12,288,584 in 1953-54 The report pointed out that the reimposition of hire-purchase restrictions at the end of February (see 14067 A) had not had time to affect the results for 1954-55.

Lord Citrine (the Authority's chairman), commenting on the report, stated that the increases in coal prices announced in July (see 14428 A) were expected to cost the Authority £20,000,000 in a full year, and would necessarily involve increases in the price of electricity. However, even before the higher coal prices were announced, the Authority had already been considering whether it could substantially increase its revenue in order to provide a larger amount towards self-financing, and discussions would shortly take place with the Area Boards on the further methods to be adopted towards this end. To finance a programme of the size contemplated without operating on the open market would be " a terrific job," and might involve " increasing prices of electricity beyond the amount necessary to recover the increased cost of coal."

Dealing with the siting of the 12 nuclear stations announced in the White Paper on Atomic Development (see 14045 A), Lord Citrine explained that until public confidence had been built up it was proposed to site the early stations well away from urban areas and big coalfields, since the cost of uranium fuel was independent of locations, and nuclear stations would show the most economy if sited where normal fuels were expensive. At the same time they should be near areas of heavy electricity demand, whilst at present they required much more cooling water than conventional stations; these considerations pointed to the South of England, and particularly to the Severn estuary and the Essex coast, as the most suitable areas for the first stations.

Lord Citrine added that it should not be thought that " unlimited supplies of electricity from nuclear power are just around the corner." He pointed out in this connexion that present plans envisaged a capacity of about 2,000,000 kw. to be provided by such means by 1965, compared with the total capacity of 35,000,000 - 40,000,000 kw. which would be required. In ten years' time, therefore, the proportion of nuclear power to fuel-fired plant would only be about 6½-7 per cent, and this fact, together with indications that the National Coal Board would be unable to meet demands, had led the Authority to turn their attention to oil. It was anticipated that by 1965 sixteen power stations would be using oil fuel at a rate equivalent to about 10,000,000 tons of coal annually.

An issue of £200,000,000 4½ per cent Central Electricity Authority Guaranteed Stock, 1967-69, at £98. 10s. per cent was announced on Aug. 9 and was over-subscribed.
(Times - Manchester Guardian - Financial Times) **(Prev. rep. 1953-54 Report, 13854 A; Coal Situation, 14428 A.)**

B. AVIATION. — Pan American Airways Order for U.S.-built Jet Airliners. - New Turbo-Prop " Vanguard " Airliners for British European Airways.

Pan American Airways announced on Oct. 13 that it had placed orders for 20 Boeing-707 and 25 Douglas DC-8 jet airliners at a total cost of $269,000,000 (about £96,071,000), and that a contract had also been signed with the United Aircraft Corporation for Pratt and Whitney jet engines to power the planes. The orders were described as the largest ever placed by a commercial airline, and the first to be given for U.S.-built civil jet transports.

The statement said that it was intended to put the airliners into service on the Pan American trans-Atlantic, South American, and trans-Pacific routes, beginning in December 1958, when the first Boeings would be delivered Delivery of the Boeings was expected to be completed in November 1959, and that of the Douglas DC-8's to take place between December 1959 and January 1961. Both types of aircraft would have a speed of 575 m.p.h. and would carry slightly over 100 passengers in the standard versions and about 25 per cent more in the tourist versions. They would be capable of non-stop flights between New York and London in 6 hrs 15 mins., and would reduce the flying time between New York and Paris from 11 hrs. to 6 hrs 25 mins., between Chicago and London from 16 hrs. to 6 hrs. 45 mins., and between San Francisco and Tokyo from 25 hrs. to 12 hrs 45 mins.

The Pan American statement was followed on Oct. 17 by an announcement by British European Airways Corporation that it was negotiating with Vickers-Armstrong Ltd. for a " substantial fleet " of double-decked turbo-prop airliners which, it was claimed, would set new standards of speed and economy, and would provide greater passenger comfort and spaciousness than had hitherto been attained in any type of civil air transport.

The new airliners, the first of which was expected to be delivered by 1959-60, would be known as Vickers *Vanguards* or V-900's, and would be used on all B.E.A. major high density routes between 200 and 2,000 miles. Each would carry 93 to 105 passengers ; would cost nearly £750,000 without spares , and would be powered by four Rolls-Royce RB-109 airscrew turbine engines, now known as the *Tyne*, developing 4,470 h.p. each and giving a cruising speed of 425 m.p.h The fuselage, shaped in cross-section like a figure ' 8 ' or " double bubble," would be the largest yet incorporated in any civil airliner, and would contain three separate passenger saloons in the upper part, and two freight and luggage holds in the lower. The airliners would have sufficient cargo space to enable a full load to be carried when only 30 per cent of seats were occupied, and would be economic to run on most routes with only 30 seats filled.

Mr. G. R. Edwards, managing director of Vickers-Armstrong Ltd., stated on the same day that the *Vanguard*, in which a number of other airlines were already interested, would be developed to enable it to carry almost its maximum payload for 2,500 miles—about the distance across the U.S.A.—(Times - Daily Telegraph - New York Times - New York Herald Tribune) **(Prev. rep. 14397 A.)**

C. ISRAEL. — Private U.S. Aid for Resettlement of Moroccan Jews.

It was announced in New York on Oct. 13 that the United Jewish Appeal had raised over $10,000,000 to resettle Moroccan Jews in Israel, and that a mission was leaving for that country to survey " priority Jewish immigration, settlement, welfare, and rehabilitation needs." (New York Herald Tribune)

A. CAMBODIA. — General Elections. - Victory for Prince Norodom Sihanouk's "Popular Socialist Community." - Reference to French Union removed from Constitution. - Premiership accepted by Prince Norodom Sihanouk. - Military Aid Agreement with U.S.A. sanctioned by International Control Commission.

General elections held in Cambodia on Sept. 11 resulted in a complete victory for the "Popular Socialist Community" led by Prince Norodom Sihanouk, which won all the 91 seats in the National Congress. Although failure to vote had been made a punishable offence, only 500,000 people went to the polls out of an electorate of nearly 1,000,000; of the votes cast, 400,000 were for the Popular Socialist Community and most of the remainder for the left-wing nationalist Democratic Party. The remaining parties, the most important of which were the Liberals and the Communist-led "Khmer resistance forces," received negligible support.

The Democratic Party—which had had a majority in the previous Assembly (dissolved in 1952) and which was led by Prince Norodom Phurissara, a cousin of Prince Norodom Sihanouk—blamed the Government in its election propaganda for its alleged subservience to foreign countries, and asserted that it had handed over Cambodia to U.S. "economic domination." During the election campaign a number of Democratic Party candidates and election agents were arrested under a law forbidding propaganda against the monarchy, the Government, and public order, whilst on Sept. 11 the deputy secretary-general of the party (M. Van Vang-Sek) was arrested on a charge of conspiring to murder a former Premier, M. Sam Sary, and the secretary-general of the Popular Socialist Community, M. Sim Var. Several Democratic leaders subsequently fled from Pnom-Penh, and a number of others were placed under surveillance. The elections themselves, however, went off without incident; a number of teams of the International Control Commission toured the country as observers, the Commission's task being confined to ensuring the secrecy of the poll and the avoidance of any discrimination against former members of the Khmer resistance forces

Prince Norodom Sihanouk gave details of his proposed home and foreign policy at a press conference on Sept. 13.

Whilst admitting that he was "slightly embarrassed" at his "too complete victory," he claimed that this victory proved that the results were genuine. "If I had falsified the elections," he added, "I would never have had the effrontery to give us all the seats" He stated that he himself did not propose to enter the new Government, although he would act as its "constant mentor."

The Government, he said, would pursue a policy of strict neutrality, would not join "any international military pact or organization, even defensive," and did not wish to accept a SEATO guarantee of Cambodia's independence. The question of accepting further U.S. military and economic aid would be referred to the Assembly. Cambodia would, however, remain in the French Union in order to "keep their place as friends and equals at the round table." Diplomatic recognition would be extended to China as soon as there was a single Chinese Government; this also applied to Vietnam, although political missions would be exchanged in the meantime with both South and North Vietnam, provided the latter ceased to attack Cambodia.

Turning to home affairs, the Prince stressed that the Popular Socialist Community would put itself at "the service of the small people"; promised that a general amnesty would be granted to the Opposition; and declared that only those guilty of "incitement to murder" had been arrested. Constitutional changes would be introduced to end "dictatorship by Parliament," to ensure better control of representatives by their constituents, and to set up provincial assemblies, and measures would be taken against corruption. Finally, areas of vacant land would be distributed among impoverished peasants, and large-scale irrigation works would be undertaken immediately.

The new National Congress, at its first meeting on Sept. 25, unanimously adopted an amendment to the Constitution substituting the phrase "Cambodia, an independent and sovereign State" for "Cambodia, an autonomous State belonging to the French Union as an Associated State." Prince Norodom Sihanouk had previously announced that this change would be made because Cambodia "does not need to mention in its Constitution alliances which it might freely form or dissolve with other countries," and "no longer wants to take part in the Council and Assembly of the French Union, whose powers and existence are incompatible with her conception of independence." The final decision on Franco-Cambodian relations, he added, would rest with the Cambodian people, who would consider membership of the French Union only if it were modified on the lines of the British Commonwealth.

The Assembly also voted in principle for a number of internal changes, including (1) the creation of provincial assemblies, which would be elected by universal suffrage and consulted on matters relating to the Budget and to the conclusion of treaties with other countries; (2) the creation of an Upper House or "Council of the Kingdom"; (3) female suffrage and eligibility for office; (4) the limitation of the official use of French and other foreign languages to "diplomatic, administrative or technical requirements."

The Assembly offered the Premiership on Sept. 25 to Prince Norodom Sihanouk, who accepted it for three months in the first instance. He reversed his decision on the following day, suggesting three other possible nominations, but, after consultation with his father (King Norodom Suramarit), finally decided to accept the post.

Mr. Parthasarathi, the Indian chairman of the International Control Commission, stated on Oct. 4 that, with the conclusion of the elections in Cambodia, the political settlement envisaged for that country under the Geneva Agreement had been completed and the Commission's major task fulfilled. Accordingly, while the Commission had still a few important tasks for the future, it had now decided to contract its activities in accordance with the provisions of the Geneva Agreement; to reduce its strength by about 40 per cent; and to reduce the number of inspection teams from nine to five.

On May 30 the International Control Commission had requested the Cambodian Government to clarify certain clauses of the military aid agreement between Cambodia and the U.S.A., which, it suggested, were not strictly in conformity with the Geneva Agreement. The Government, in reply gave an assurance that the military aid agreement did not involve the acceptance of any military alliance or the obligation to cede bases to the U.S.A., but was merely a continuation of the assistance previously given by France, adapted to the needs of Cambodia's newly-acquired independence. This explanation was unanimously accepted on July 23 by the Commission.—(Le Monde, Paris - Le Figaro, Paris - Times - Indian High Commissioner's Office, London) **(Prev. rep. 14286 A.)**

B. PERU. — Cabinet Reorganization.

President Manuel Odría reorganized his Cabinet on Sept. 15, its new membership being as follows: Navy and President of the Cabinet, Vice-Admiral Roque A. Saldías; Foreign Affairs, Dr. David F. Aguilar Cornejo; Interior, Sr. Alejandro Esparza Zañartu; Justice, Dr. Alejandro Freundt Rossell; War, General Carlos Indacochea; Finance, Don Emilio Guimoye; Development and Public Works, Sr. Fernando Noreiga Calmet; Education, Dr. Carlos Rodriquez Pastor; Public Health, Dr. Jorge Romaña; Air, General F.A.P. Enrique Bernales Bedoya; Agriculture, Sr. Jaime Miranda Souze; Labour and Indian Affairs, Sr. Carlos d'Ugard.

New Ministers were Dr. Rodrigues Pastor (previously vice-president of the Chamber of Deputies), Sr. Esparza Zañartu (head of the internal security department of the Ministry of the Interior), Sr. d'Ugard, Dr. Roman, and General Indocochea. The other members were reappointed to their previous posts.

In a broadcast on Sept. 9, President Odría announced that he did not intend to remain in office after the expiry of his present term on July 28, 1956.—(Bank of London and South America, Fortnightly Review - New York Times) **(13848 C.)**

C. CANADA. — Immigration. - Extension of Assisted Passage Scheme for British Immigrants.

The Migration Council Ltd., in co-operation with the Canadian Department of Citizenship and Immigration, announced in London on Oct. 14 that the assisted passage scheme for emigrants to Canada, hitherto applicable only to school teachers, university professors, nurses, farmers, stenographers, and domestic servants, was to be extended to the heads of families in any trade or profession. Under the scheme an emigrant to Canada pays £10 towards his fare and undertakes to repay the balance over a period of two years; the scheme does not cover the passages of wives and children. Mr. Wallace, the Canadian immigration service director for the U.K., emphasized that his department reserved the right to decide whether applicants were likely to be readily absorbed into Canadian life, and to exclude those who would not qualify. (Times - Manchester Guardian) **(Prev. rep. 12839 A.)**

D. INDIA - PAKISTAN. — Canal Waters Dispute. - Extension of Interim Agreement.

It was announced by the International Bank in Washington on Oct. 15 that the provisional agreement between the Indian and Pakistani Governments concerning the use of the waters of the Indus river system had been extended for six months—i.e., to March 31, 1956—as it had not been possible to bring the discussions for a permanent agreement to a successful conclusion by the originally specified date of Sept. 30, 1955. (International Bank, Washington) **(Prev. rep. 14303 A.)**

OCTOBER 22—29, 1955

A. MIDDLE EAST. — Political Developments. - Persian Adherence to Baghdad Pact. - Turkish President's Visit to Persia. - Closer Turkish-Persian Economic Relations. - Egyptian Military Pacts with Syria and Saudi Arabia. - Israeli Appeal for Arms from Western Countries. - Mr. Sharett's Denunciation of Soviet Policy in Middle East. - Paris Discussions with Mr. Dulles and Mr. Macmillan.

A number of recent important political developments in the Middle East are summarized below under cross-headings.

Persian Accession to Baghdad Pact.

The Persian Government's decision to adhere to the Turkish-Iraqi mutual defence pact, of which Pakistan and the United Kingdom are also members, was announced in Teheran on Oct. 11 and officially communicated to the Iraqi Government on the following day. A single-clause Bill providing for Persia's accession to the pact was unanimously approved by the Majlis on Oct. 23, after having been passed by the Senate on Oct. 19 by 36 votes to four.

In a speech to the Persian Senate on Oct. 7 the Shah had declared that a policy of neutrality for Persia was "as futile as it is dangerous," and had dwelt on the need to safeguard Persian independence by taking all possible defensive measures. "Our neutrality," he declared, "was violated twice during the past half-century. . . . By remaining neutral we shall invite aggression, while adherence to regional pacts, which are permissible under the U.N. Charter, lessens the danger of war. We have no aggressive intentions, nor have we protested against the defensive measures of others."

A strong protest against Persia's accession to the Baghdad Pact was handed by M. Molotov to the Persian Chargé d'Affaires in Moscow on Oct. 12, its text being as follows:

"The conclusion of the Baghdad Pact meant the formation in the Near and Middle East of a military grouping which is an instrument of certain aggressive circles who are not interested in the consolidation of peace and international security. The creation of such an alignment had, at the same time, the aim of preserving and re-establishing the colonial dependence of countries of this region.

The accession of Persia to this military alignment is incompatible with the interests of consolidating peace and security in the Middle and Near East, and is in contradiction to good-neighbourly relations between Persia and the Soviet Union and to certain treaty obligations undertaken by Persia."

The Soviet protest was rejected by Persia as "incorrect and inadmissible," a Note to this effect being delivered on Oct. 16 to the Soviet Ambassador in Teheran.

The Persian Note emphasized that the Baghdad Pact aimed at the consolidation of peace and security in the Middle East, that it had been freely entered into by all the signatories, and that it conformed in every respect to the principles of the U.N. Charter, its purpose being purely defensive. The Persian Government saw no reason why its adherence to the pact should mar Soviet-Persian relations, nor did it agree that it conflicted in any way with existing agreements between the two countries.

Persia's adherence to the Baghdad Pact was warmly welcomed in London, Karachi, Ankara, and Baghdad, and also in Washington.

Visit of Turkish President to Persia. - Intensification of Turkish-Persian Economic Co-operation.

President Bayar of Turkey, accompanied by the Turkish Foreign Minister (Mr. Zorlu), paid an official visit to Persia from Sept. 19-26. Two communiqués were issued at the conclusion of the visit, of which the first stressed the need for "closer co-operation in all matters concerning the mutual interests of the two countries." The second communiqué announced that a joint Turkish-Persian commission would be set up in the near future to establish closer economic and cultural co-operation between the two countries, and, in particular, to study the following matters: the development of transport and travel between Turkey and Persia; the formation of a joint Turkish-Persian transport company; the linking of the Turkish and Persian railway systems; the introduction of regular telecommunication services between the two countries; the conclusion of a trade and barter agreement; and the formation of a joint civil airline company.

Egyptian Military Pacts with Syria and Saudi Arabia.

A military pact between Egypt and Syria was signed in Damascus on Oct. 20. Its provisions, as made public in Cairo and Damascus, included the following: (1) a joint command would be set up for the Egyptian and Syrian armed forces; (2) this command would control, both in peace-time and in time of war, "all striking units, including troops concentrated on the Palestine borders"; (3) a Supreme War Council would be set up, consisting of the Chiefs of Staff of both countries; (4) political authority would be exercised by a supreme council which would include the Foreign and War Ministers of the two countries; (5) military planning would be financed by a joint fund, to which Egypt would contribute 65 per cent and Syria 35 per cent. It was understood that the joint command would be headed by an Egyptian general, although no announcement was made in the official statement.

The Cairo Correspondent of *The Times* commented that the military pact bewteen Egypt and Syria was "obviously intended to counterbalance the Western-sponsored pact between Turkey and Iraq, thus striking another blow at the rising influence of Iraq in the Middle East."

A similar defence pact between Egypt and Saudi Arabia was signed in Cairo on Oct. 27 by Colonel Nasser, the Egyptian Prime Minister, and the Emir Faisal, Crown Prince and Foreign Minister of Saudi Arabia. Like the Egyptian-Syrian pact, it provided for joint command of the armed forces both in war and peace; for a combined military council consisting of the Egyptian and Saudi Arabian Chiefs of Staff; and for a supreme council including the Foreign and Defence Ministers of the two countries. It was laid down that Egypt and Saudi Arabia would consider an armed attack against either of the countries as an attack against both; that they would hold immediate consultations, at the request of either party, whenever international tension threatened their frontiers or independence; and that neither country would conclude a separate agreement without the consent of the other.

The general lines of a proposed treaty "to strengthen the military, political and economic structure of the Arab world" had been agreed upon between Egypt, Syria, and Saudi Arabia in March (see page 14105, second column). As the three countries had pledged themselves not to join the Turkish-Iraqi pact (now the five-nation Baghdad Pact) the conclusion of the Egyptian-Syrian and Egyptian-Saudi Arabian treaties meant, by implication, the abandonment of the original Egyptian project for a defence pact embracing all the Arab countries. Although the Yemen had expressed its support for such a pact, neither the Lebanon nor Jordan (which has treaties of alliance with Britain and Iraq) had committed themselves to the project.

Israel's Appeal for Arms Supplies from the West.

In a speech to the Israeli *Knesset* on Sept. 18, Mr. Sharett (the Prime Minister) declared that the supply of arms to Egypt by Czechoslovakia had cast "a deep shadow over the entire scene of Israel's foreign and defence affairs" and was "liable to bring about a revolutionary and ominous change in Israel's security situation." He claimed that the arms agreement between Egypt and Czechoslovakia implied a political and military link-up between Egypt and the Soviet bloc; appealed to the Western Powers to supply arms to Israel; and declared that Israel also desired a security pact with the Western Powers, and particularly with the United States.

Mr. Sharett (who spoke during a foreign affairs debate) emphasized that a security pact between Israel and the West, though desired by Israel, would not be regarded as a substitute for arms supplies. He declared in this connexion: "The ability for defence when war breaks out, the ability to deter an enemy from attacking and so to avoid war, depends first and foremost on the military strength of the country which is the target for aggression. What is happening around us . . . imposes upon us cool judgment and firm inner balance. Above all it enjoins on our people alertness, unity, and a constant, well planned effort to enhance our economic consolidation and defensive capacity."

The Prime Minister went on to accuse the Soviet Union of being behind the Egyptian-Czechoslovak arms agreement, and derided the Soviet assertion that that arms deal was merely a "commercial transaction." After pointing out that neither of the parties had pretended that the arms were not designed for use against Israel, he declared: "How does the U.S.S.R. justify the sale of such quantities of weapons to Egypt? What is all this about a financial transaction, cotton and rice, 'modest means of self-defence,' and all the other whitewash of which the Tass Agency's statement [see page 14450, top of first column] is compounded? This Soviet initiative in the strife-torn Middle East, this dangerous disturbance of the balance of armed forces, this vehement spur to an arms race giving free reign to fierce aggressive instincts—what relation does it all bear to a policy of lessening international tension, progressive disarmament, and working towards stable world peace which the U.S.S.R. at present avows?"

Speaking of the comparative military strengths of Israel and the Arab countries, Mr. Sharett said: "What is the truth about the relative strength of Israel and the Arab nations which surround her, maintain a state of war against her, and are constantly vowing to wipe her off the face of the earth? The truth is that the strength of the military manpower of the Arab States—regulars and reserves—is more than twice as great as ours. The truth is that the military budgets of Egypt, Syria, Lebanon, Jordan, Iraq, and Saudi Arabia amount to £140,000,000 ($392,000,000) annually together, or £700,000,000 (Israeli), while Israel's entire budget—ordinary and development, including defence—amounts to £631,000,000 (Israeli) ($353,360,000). The military budget of Egypt alone is almost equal

to the entire Israeli budget. Egypt's Army alone is superior to the Israeli defence forces in all categories of heavy weapons for use on land, sea, and in the air. The truth is that there are Arab States which possess heavy arms which we do not have—they are sold to them, but not to us Our strength is in quality, in the morale of the army, in its organizational and technical superiority. But quality, even the highest, can never serve as a full substitute for the vast quantitative advantage."

After emphasizing that Israel had always opposed an arms race in the Middle East, Mr. Sharett concluded : " Faced with an alarming and decisive increase in the armed power of Egypt, our first demand has become 'Arms ! Arms in quantity and of quality, and cheap ! ' This claim is directed first and foremost towards the great Powers who undertook publicly to keep the military balance between us and States hostile to us. . . . At this hour, from this house, from this city of Jerusalem, let the call go out to all Israeli citizens, to the dispersed Jewish people, and to the whole world—arms for Israel ! "

Speaking again on Oct. 19, in the concluding stages of the debate, Mr. Sharett disclosed that he had asked the Soviet Ambassador in Israel to outline his country's Middle East policy but had received no reply. After declaring that the Israeli Government had information that the initiative for the Czechoslovak-Egyptian arms deal had come from Russia, whose representatives were trying to bring about similar deals between other Arab States and the Communist countries, Mr. Sharett said that if war should result from the present crisis " it would be perfectly clear who struck the match which started the conflagration."

By 84 votes to five (the Communist deputies opposing) the *Knesset* passed a resolution on Oct. 24 expressing anxiety at the large shipments of arms to Egypt, and at the continued arming of Iraq and other Arab countries " which declare themselves to be still at war with Israel and which are plotting against this country's existence." The resolution urged the Government to marshal the Israeli people to meet the present dangers, to increase the strength of the defence forces, and to demand that the Powers provide arms for Israel.

Following Mr. Sharett's appeal in his speech to the *Knesset*, a nation-wide " Arms for Israel " campaign was launched on Oct 20 to buy arms for the country's defence. Over £800,000 (Israeli), equivalent to £160,000 sterling, was raised within three days from contributions by all sections of the community, including the forfeiture of a day's wages for this purpose by factory, bank, and public employees.

A spokesman of the U.S. State Department (Mr. Henry Suydam) said on Oct. 12 that the department had " some information indicating that the Soviet bloc may be making an approach to an offer of arms for Israel." The Tass Agency, however, issued a statement on Oct. 24 denying that the U.S.S.R. had offered any arms to Israel, and describing Mr. Suydam's statement, and similar reports in the foreign Press, as " a complete invention calculated to mislead world public opinion." Reports that Israel intended to buy arms from the Soviet bloc to counterbalance Egypt's arms deal with Czechoslovakia were also denied by the Israeli Foreign Ministry.

Mr. Sharett arrived in Paris on Oct. 23 to discuss the Middle Eastern situation with the Western Foreign Ministers, who were meeting in the French capital prior to the opening of the Foreign Ministers' conference at Geneva. He had separate meetings with Mr. Macmillan and Mr. Dulles on Oct. 26 (no official statement being issued), and on the following day arrived in Geneva for discussions with M. Pinay and M. Molotov.

On arrival in Paris, Mr Sharett said that his visit had a double purpose : " first, to consult with the Israeli Ambassadors in Washington, Moscow, London and Paris on the present situation ; and secondly, to draw the attention of the Foreign Ministers to the highly dangerous effect of the sudden change which is about to occur in the balance of military strengths in the Middle East and the security position of Israel—I refer, of course, to the arms deal between Czechoslovakia and Egypt."

The Egyptian Ambassador in Washington (Dr. Ahmed Hussein) stated on Oct. 17 that he had personally assured Mr. Dulles that Egypt's arms supplies from Czechoslovakia were being acquired as a " single commercial deal," that they would be used solely for defensive purposes, that Egypt had " no intention at all of using these arms to attack Israel," and that the Egyptian decision to buy arms from Czechoslovakia would not affect U.S.-Egyptian relations. It had been officially announced in Cairo ten days earlier that arms to be supplied to Egypt from Czechoslovakia would include MIG fighter aircraft ; other (non-official) reports had mentioned tanks, artillery, and torpedo-boats as among the military equipment to be supplied.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Turkish Embassy Press Department, London) **(Prev. rep. Middle East, 14449 A ; Defence Pacts, 14454 B ; 14137 A ; 14105 A.)**

A. NORTH VIETNAM.—Cabinet Changes. - M. Pham Van-Dong elected Prime Minister. - Trade and Payments Agreements with France.

The North Vietnamese National Assembly, meeting in Hanoi on Sept. 20, unanimously elected M. Pham Van-Dong as Prime Minister on the proposal of President Ho Chi-minh, who had hitherto combined this office with that of President of the Republic. M. Pham Van-Dong, who had previously been Vice-Premier, retained the post of Foreign Minister, whilst General Vo Nguyen Giap (Defence Minister) and M. Pham Ke-Toai (Minister of the Interior) were elected Vice-Premiers. M. Ton Duc-Thang was elected president of the Permanent Committee of the Assembly in place of the late M. Bui Bang-Doan.

M. Ton Duc-Thang is also president of the National Committee of the Lien-Viet Front, which replaced the former Vietminh organization in 1951 (see 11429 A). The committee consists of 13 members representing the Communist (Laodong), Socialist, and Democratic parties, trade union, peasant, women's, and youth organizations, and the Roman Catholic, Buddhist, and Caodaist communities The Roman Catholic representative, Father Ho Thanh-Bien, is vice-president of the committee.

Trade and payments agreements between France and North Vietnam were signed in Hanoi on Oct. 14. The agreements, covering the period July 1, 1955, to June 30, 1956, provided for trade exchanges worth 1,000,000,000 French francs on each side, it being stated in Paris that their purpose was " to enable certain French firms to maintain their ties with North Vietnam." Hanoi radio announced that France would supply machinery, spare parts and accessories, textiles, motor cars, bicycles, food products, chemicals, pharmaceutical products, building materials, books, newspapers and periodicals, in return for Vietnamese exports of anthracite, raw silk, agricultural products, timber, embroideries, lace work, and lacquered articles. It was pointed out in Paris, however, that no strategic material would be sent to Vietnam, in accordance with the rules laid down by the International Control Commission.—(Le Monde, Paris) **(Prev. rep. 14378 A.)**

B. SOVIET UNION. — Middle East Policy. - Loan Offer to Egypt for Building of Aswan Dam. - Diplomatic Relations with Yemen.

The Egyptian Ambassador in Washington, Dr. Ahmed Hussein, announced on Oct. 17 that the Soviet Union had offered Egypt a loan of $200,000,000 towards the cost of building the Aswan Dam on the Nile, repayable in the form of Egyptian cotton and rice supplies over 30 years at 2 per cent interest. Dr. Hussein said that the amount of the loan represented about one-third of the estimated cost of the dam ; that he did not know, however, what action the Egyptian Government would take on the offer ; and that the question of the possible despatch of Soviet technicians to Egypt had not yet been discussed.

It was also announced in Cairo on the same day, after meetings between the Soviet Ambassador to Egypt (M. Solod) and the acting Foreign Minister of the Yemen, that the Soviet Union and the Yemen would exchange diplomatic representatives, and that the 1927 treaty of friendship between the two countries (which expired in 1954) would be renewed. It was stated that trade and economic relations between the U.S.S.R. and the Yemen would also be strengthened.—(Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Middle East Situation, 14485 A ; 14473 A ; 14449 A ; Soviet-Libyan Relations, 14469 C.)**

C. BURMA. — Signing of Loan Agreement with India. - Amended Provisions.

The agreement on the Indian loan to Burma, announced on Sept. 20, was signed in New Delhi on Oct. 17 by Sir Chintaman Deshmukh, the Indian Finance Minister, and Sithu U Aung Soe, the Burmese Ambassador. At the request of the Burmese Government, India agreed during the negotiations to increase the loan to 200,000,000 rupees, instead of making a loan of 100,000 rupees and a credit of another 100,000,000 as had originally been intended ; moreover, it was also agreed that the whole loan could be converted into all sterling area currencies, instead of limiting part of it for use in India alone. The rate of interest was fixed at 4 per cent, the loan being repayable in half-yearly instalments of 25,000,000 rupees beginning in March, 1959.—(The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. 14456 E.)**

D. AUSTRIA - SPAIN. — Diplomatic Relations.

It was announced in Vienna and Madrid on Oct. 4 that the Austrian and Spanish Governments had decided to re-establish diplomatic relations and to set up Legations in Madrid and Vienna respectively. Relations between the two countries had been severed since the *Anschluss* in 1938.—(Le Monde, Paris)

A. UNITED STATES. — "Freedom Award" and Williamsburg Prize conferred on Sir Winston Churchill.

The annual Freedom Award, first instituted in 1941, was conferred on Oct. 9 upon Sir Winston Churchill, the first non-American recipient. The presentation was made *in absentia* at a ceremony in New York on Oct. 9 at which the award was accepted on Sir Winston's behalf by the British Ambassador, Sir Roger Makins.

The Freedom Award is conferred by Freedom House, an organization founded in October, 1941, "as a symbol and centre of the struggle against the forces of tyranny." Previous recipients of the award have included General Eisenhower, General George C Marshall, Mr. Bernard Baruch, Mr Walter Lippmann, Senator Arthur Vandenberg, and Mr Dean Acheson. The award to Sir Winston Churchill took the form of a plaque inscribed "For devotion to liberty, courage in adversity, leadership in victory."

A speech of thanks by Sir Winston Churchill, recorded in England, was broadcast during the ceremony by the National Broadcasting Company's network. Sir Winston spoke as follows:

". . . Freedom House was formed by men and women who recognized the imperative need of the United States to join the allies in their defence against the Hitlerite aggression. But prevention is better than cure, and it might well have been possible to avert the great and needless catastrophe which Hitler brought on the world, the marks of which scar our life today.

"Looking back into the history of the inter-war years, two events strike one as having had a most serious effect upon the future. Both involved the drifting apart of our two countries One was the withdrawal of the strength and influence of the United States from the League of Nations after the First World War The second was the failure of the British Government to grasp the opportunity which was offered when, in January 1938, President Roosevelt suggested that he should intervene in the ever-increasing tension in Europe. This proposal of President Roosevelt's made it clear that he wished to bring the United States on the scene at a time when the approaching peril might well have been warded off, and the chilling reply which he received from the British Government must have been a source of great satisfaction to those who, within two years, were leaping at our throats

"Our mistakes cannot be undone, but let us at least study and profit from them. At all times when America and the British Commonwealth have stood together, things have gone more or less right for us Whenever we have drifted apart . . . we have met with calamity, and we have had to come closer together to save ourselves from destruction. What improvement there may have been during the past few years in international affairs we owe to the unity of the Western world, and to the sacrifices we have made to maintain a strong, bold, and united front

"If this improvement continues, there may well be felt on either or both sides of the Atlantic a temptation to drift apart again, and for nations to go their own way Nothing could be more disastrous than that, and it would surely lead sooner or later to a catastrophe such as mankind has never known It is probably true to say that our two countries are closer today than they have ever been before This is the most significant fact of the post-war era, and so long as it continues we need fear no foe . .

"I believe in the essential and fundamental unity of the English-speaking peoples, not at the expense of other countries, not by the creation of elaborate machinery, but as the natural realization of a great truth The safety of the world depends upon it"

It was announced on Oct. 16 that Sir Winston Churchill would be the first recipient of a new award—known as the Williamsburg Award—to be conferred periodically upon "a person who has influenced the course of national or world events significantly by expressing in sustained action or eloquent and persuasive statement a dedication to liberty and justice for all men."

The award was established by Mr Winthrop Rockefeller and other trustees of a foundation (Colonial Williamsburg) which, with the aid of extensive benefactions from Mr. Rockefeller, has restored the historic town of Williamsburg, Virginia, to its 18th-century aspect. [Williamsburg, formerly the capital of British America, played an important role in the American War of Independence.] Mr Rockefeller explained that the award had been created to give "new strength . . to the belief in human liberty and the dignity of the individual which made Williamsburg and its leaders a moving force in Colonial America," and declared that Sir Winston Churchill "better exemplifies the principles for which the award stands than any other living person." The award will consist of an honorarium of $10,000 (£3,570) and a replica of a colonial town crier's bell, symbolic of "the people's vigil in defence of their liberties." Recipients may be of any race, nationality, or occupation.

The Williamsburg Award will be presented to Sir Winston Churchill in London, probably in December.

B. EGYPT - YUGOSLAVIA. — Embassy Status.

It was announced in Belgrade and Cairo at the end of September that the Yugoslav and Egyptian Governments had decided to raise their respective Legations to the rank of Embassies.—(Tanjug Agency, Belgrade)

C. AVIATION. — Ninth Session of ICAO Assembly. - Admission of Laos. - Further Signatories of Rome Convention. - Proposed Revision of Warsaw Convention.

The ninth session of the Assembly of the International Civil Aviation Organization (ICAO) was held at the Organization's headquarters in Montreal from May 31 to June 13 under the presidency of Brigadier C. S. Booth (Canada). The session—another "small-scale" one largely confined to financial and administrative matters—was attended by representatives of 53 member-countries, as well as by a number of observers. A summary of some of the principal decisions is given below.

Budget. The Assembly approved a net budget of Can $2,826,971 for the year 1956, compared with Can.$2,745,260 for 1955.

Membership. It was announced during the session that Laos had adhered to the Chicago Convention and would therefore become a member of the Organization on July 13, bringing the total membership to 66

A request by the German Federal Republic for admission to membership was approved by 51 votes to nil, with one abstention (Israel), and was passed on to the next session of the U.N. General Assembly for its agreement

Council Sessions. The Assembly accepted an Australian suggestion that the ICAO Council—the Organization's policy-making body—should hold shorter sessions, as an experiment.

ICAO Headquarters. In view of the difficulties which the Organization had encountered with the Quebec provincial authorities, the ICAO Council was asked (*a*) to request the Canadian Government's continued help in reaching a settlement with the Quebec Government; (*b*) to determine the cost of maintaining the ICAO headquarters elsewhere.

[It was pointed out in the Canadian Press that the chief complaint of ICAO members was that the Quebec Government refused to grant their representatives the "normal diplomatic immunities" granted to international civil servants in other countries]

Technical Assistance. In his report to the Assembly, the president of the ICAO Council, Dr Edward Warner, stated that since April 1951, when the first Technical Assistance mission had started work, experts recruited by ICAO had visited 22 countries to give advice on all aspects of civil aviation, 11 training centres had been established with ICAO's co-operation for training local people in subjects relating to civil aviation, and 123 persons had been awarded fellowships for the study of civil aviation abroad It was later stated that, of the total of about $26,000,000 allocated for U N Technical Assistance purposes in 1955, ICAO's share was expected to be about $1,000,000

Other recent developments connected with ICAO are described below.

Rome Convention on Damage to Third Parties. Since the 1954 session, four more countries had signed the Rome Convention of 1952, which specifies the limits of liability in the event of an aircraft causing harm to persons or property in foreign territory. The countries were Norway (Dec. 10, 1954), Greece (April 6, 1955), India (Aug 3, 1955), and Ceylon, bringing to 27 the number of signatories to the Convention, which will come into force after five countries have deposited their instruments of ratification.

Regional Offices. The ICAO Far East and Pacific regional office at Bangkok (Siam), where it had been moved from Melbourne, was officially opened in May, 1955. This brought the number of ICAO regional offices to five, the others being in Paris (European and African office), Cairo (Middle East), Lima (South America), and Montreal (North America and Caribbean).

Warsaw Convention. A conference to amend the 1929 Warsaw Convention, which limits the liability of air carriers for damage caused to passengers and cargo, took place at The Hague on Sept. 6-29 and was attended by legal experts from 44 countries and seven international organizations On the final day 26 countries signed a protocol amending the provisions of the Convention, the principal change being an increase in the maximum liability of an air carrier for a passenger killed or injured on an international flight from 125,000 "Poincaré" gold francs, or U S $8,291, to 250,000 gold francs, or U.S. $16,582. The amending protocol, however, retained the provision in the Warsaw Convention whereby, when an accident occurs which causes damage to passengers or cargo, there is a presumption of liability against the air carrier, thereby placing on the air carrier the onus of proof that the damage had not come about as a result of his own, or his agent's, negligence, and that he can therefore not be held responsible for it The amending protocol will come into force upon ratification by at least 30 countries

Following the Assembly's resolution on the question of the ICAO headquarters, seven representatives of the Organization, led by Dr. Warner, discussed the situation with Mr. Duplessis, the Premier of Quebec, on June 16, the meeting having been arranged by the Canadian Minister of Transport, Mr. Marler.

D. PERU. — Equal Rights for Women.

Under a law promulgated on Sept. 7 the Peruvian Constitution was amended to give women the same civil rights as men, thus enabling them to vote and to be elected as members of Congress or to any other public office.
(Bank of London and South America, Fortnightly Review)

A. INDIA. — Report and Recommendations of States Reorganization Commission.

The report of the Commission on the Reorganization of the Indian States, which had been appointed in 1953, was submitted to the Government of India on Sept. 30 and published on Oct. 10. The Commission consisted of Mr. Fazl Ali (a former Judge of the Supreme Court), as chairman, Pandit H. N. Kunzru (an Independent member of the Council of States), and Sardar K. M. Panikkar (a former Ambassador to Communist China and Egypt). During their inquiries the members of the Commission travelled 38,000 miles, interviewed over 9,000 persons, and received 152,250 memoranda, petitions, and communications in their attempt to obtain a complete cross-section of public opinion.

The report made the following proposals:

(1) The number of States should be reduced from 27 to 16, in addition to three centrally-administered territories, and the distinction between Part A, B, and C States, together with the office of Rajpramukh, should be abolished.

(2) Only the Part A States of Orissa and Uttar Pradesh and the Part B State of Jammu and Kashmir (which was not included in the Commission's terms of reference) should retain their present boundaries.

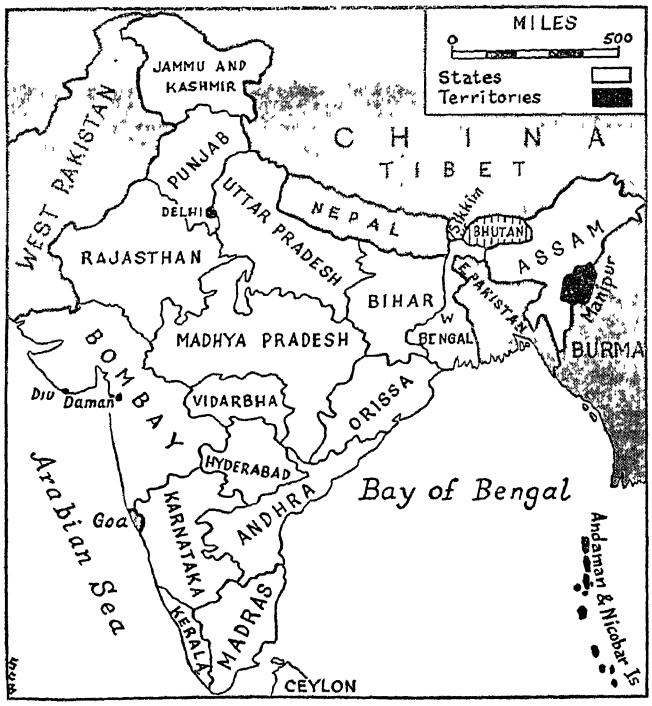
(3) The Part A States of Andhra, Assam, Bihar, and West Bengal and the Part B State of Rajasthan should be subject to minor boundary changes.

(4) The Part A States of Bombay, Madhya Pradesh, Madras, and the Punjab and the Part B State of Hyderabad should undergo more extensive changes.

(5) Three new States should be formed, to be known as Karnataka, Kerala, and Vidarbha.

(6) The Part B States of Madhya Bharat, Mysore, Patiala and the East Punjab States Union (PEPSU), Saurashtra, Travancore-Cochin, and Vindhya Pradesh, and the Part C States of Ajmer, Bhopal, Coorg, Himachal Pradesh, Kutch, and Tripura, should all disappear.

(7) The Part C States of Delhi and Manipur, together with the Andaman and Nicobar Islands, should become Centrally-administered territories.



Proposed reorganization of Indian States, as recommended by the States Reorganization Commission. (*The Statesman*, Calcutta)

The Commission's report is summarized below under cross-headings:

Historical Background.

The existing structure of the States of the Indian Union, the report pointed out, was "partly the result of accident and the circumstances attending the growth of British power in India, and partly a by-product of the historic process of the integration of former Indian States. The division of India during the British period into British provinces and Indian States was itself fortuitous, and had no basis in Indian history. The formation of provinces had been mainly governed by considerations of administrative convenience and economy and by reasons of military strategy and security. To the extent that there was a conscious or deliberate design behind the demarcation of the territories of administrative units, it was grounded in Imperial interests or the exigencies of a foreign Government, and not in the actual needs, wishes, or affinities of the people" With the emergence of nationalism in the later 19th century, the policy of balance and counterpoise had begun to over-ride purely administrative considerations in making territorial changes

At the time of their integration after 1947 the former Princely States had been in different stages of development, and some transitional expedient had therefore had to be adopted to fit them into the constitutional structure of India, which had added to the disparities already existing between the British Indian provinces These disparities had led to the classification of States into the three categories of Part A, B, and C States.

No State of the Union, the report emphasized represented a pre-existing sovereign unit, as did the American Colonies or the Swiss Cantons before federation, and the Indian Union, unlike the U S.A., was not an indestructible Union composed of indestructible States It was therefore unnecessary to invoke the provisions governing constitutional amendments to make territorial adjustments as the Constitution empowered Parliament to admit or establish new States, to increase or diminish the area of an existing State, or to alter its boundaries.

Whereas the British had given only qualified support to the linguistic principle in making territorial adjustments between administrative units, the Indian National Congress had accepted linguistic redistribution of provinces in 1920 as a political objective In recent years, however, there had been a growing recognition of the need to balance the linguistic principle with other factors, such as national unity and administrative and economic considerations The State of Andhra had been formed by the separation of the Telugu-speaking districts of Madras, but in determining its boundaries cultural administrative, and economic factors had been considered, as well as linguistic factors

After examining the arguments for and against speedy action in this matter, the Commission concluded that "the task of redrawing the political map of India must be undertaken now and accomplished without delay, in the hope that the changes which are brought about will give satisfaction to a substantial majority of the Indian people" In support of this view, it pointed out that for purposes of large-scale planning the country had to think in terms of enduring political units; that the integration of the States had "removed the main obstacle in the way of rationalization of the existing units", and that further deferment of a general reorganization would cause dissatisfaction and disappointment

Factors Bearing on Reorganization of States.

An essential consideration, the report stated, was that no change should be made unless the resulting advantages, in terms of "the welfare of the people of each constituent unit, as well as the nation as a whole," were such as to compensate for the heavy burden on the country's administrative and financial resources which reorganization must entail Four principles must govern reorganization. (1) the preservation and strengthening of India's unity and security; (2) linguistic and cultural homogeneity; (3) financial, economic, and administrative considerations, (4) the successful working of the national development plan The administrative set-up in strategic areas should be determined by considerations of national security, and when border areas were not under the direct control of the Centre it would be safer to have large and strong border States

It was neither possible nor desirable to reorganize States on the basis of a single test, either linguistic or cultural, and a balanced approach to the problem was necessary. Such an approach would appear to be as follows:

(i) To recognize linguistic homogeneity as an important factor conducive to administrative efficiency, but not to consider it as a binding principle over-riding all other considerations.

(ii) To ensure that communication, educational, and cultural needs of the different language groups, whether in predominantly unilingual or in composite units, were adequately met.

(iii) Where economic, political, and administrative considerations favoured composite States, to continue them with the necessary safeguards to ensure that all sections enjoyed equal rights and opportunities.

(iv) To repudiate the concept of communal or historical "homelands," which negated the fundamental principle of equal rights and opportunities for all citizens

(v) To reject the principle of "one language, one State," which was neither justified on the grounds of linguistic homogeneity, since there could be more than one State speaking the same language without offending the linguistic principle, nor practicable, since different language groups, including the vast Hindi-speaking population, could not always be consolidated to form distinct linguistic units.

(iv) To the extent that the realization of unilinguism at State level would tend to breed particularist feelings, to counterbalance it by measures calculated to give a deeper content to Indian nationalism.

Financial viability, economic self-sufficiency within an administrative unit, the wishes of the people, historical arguments, and geographical factors all had an important bearing on the reorganization proposals, but they had to be considered along with other relevant factors. Some degree of dislocation in the working of the second Five-Year Plan was likely to be caused by any scheme of reorganization, but this also should be considered together with the possible advantages The States could not be so reorganized as to conform

to economic regions, but it would be desirable to avoid as far as possible wide disparities in resources between them. The units should be large enough to ensure administrative efficiency and the co-ordination of economic development, and geographical continuity was important from this point of view. The report emphasized, however, that no proposals for reorganization should be determined by a single test, and that conclusions had to be reached after taking into consideration all the circumstances in each case

As a necessary consequence of reorganization, the existing constitutional disparity between the States would disappear. Part B States could be equated with Part A States by omitting Article 371 of the Constitution and by abolishing the institution of Rajpramukhs, which, apart from its undemocratic character, tended "to maintain, even where it does not create, loyalties which in our opinion are undesirable" In the Commission's view, there were "some weighty considerations" against the continuance of this institution. The Commission considered that the constitutional head of a State should not normally be a resident of the State, and that "the Rajpramukh being *ex hypothesi* a person having deep-rooted local interests and influence, his position as the constitutional head of a State is altogether anomalous." In view of the Rajpramukhs' past associations with the territories of which they were hereditary rulers, it was doubtful whether they could effectively discharge the essential functions of the constitutional head of a State. The institution, moreover, had a political aspect, and large sections of public opinion viewed its continuance with disfavour as not being in accord with the country's democratic framework The Commission considered that the Rajpramukhs' rights and privileges, including the privy purses guaranteed to them as former rulers of their respective States, would not be greatly affected if the institution were abolished.

The "economically unbalanced, financially weak, and administratively and politically unstable" Part C States, the Commission proposed, should, as far as was practicable, be merged in the adjoining larger States, although in the border States of Himachal Pradesh, Kutch, and Tripura the Central Government should retain supervisory powers for a specified period Those States which, for security and other imperative considerations, could not be merged in the adjoining States should be administered by the Centre as "territories." The component parts of the Indian Union would thus fall into two categories—the States and the Centrally-administered territories

Proposals for Reorganization of Existing Units.

Madras. Since the separation of Andhra (see 13165 A), Madras State had formed a homogeneous Tamil-speaking unit except for the west coast districts of Malabar and South Kanara, which were mainly Malayalam and Kannada-speaking respectively, and the Kannada-speaking areas on the borders of Mysore. The Commission recommended the separation of these areas from Madras on the one hand, and the transfer to Madras of five Tamil-speaking *taluks* in the south of Travancore-Cochin on the other [The demand for the union of these areas with Madras had previously given rise to serious disorders in Travancore-Cochin—see 14054 A.]

Kerala. The new Malayalam-speaking State of Kerala would consist of (*a*) the State of Travancore-Cochin (minus the areas transferred to Madras); (*b*) the Malabar district (including Fort Cochin and the Laccadive Islands); (*c*) a Malayalam-speaking *taluk* of South Kanara and the Amindive Islands. The Commission rejected arguments that the new State would not be economically viable, and that it should therefore be united either with Madras or with the whole of South Kanara and part of North Kanara.

Karnataka. The Commission recommended the formation of a single Kannada-speaking State consisting of (*a*) the State of Mysore (except certain areas to be transferred to Andhra); (*b*) the Kannada-speaking areas of southern Bombay; (*c*) two districts of Hyderabad; (*d*) South Kanara (except the area included in Kerala); (*e*) part of the Coimbatore district of Madras, (*f*) the State of Coorg. [The demand for a Karnataka State had led to disorders in southern Bombay in 1953—see 13165 A.]

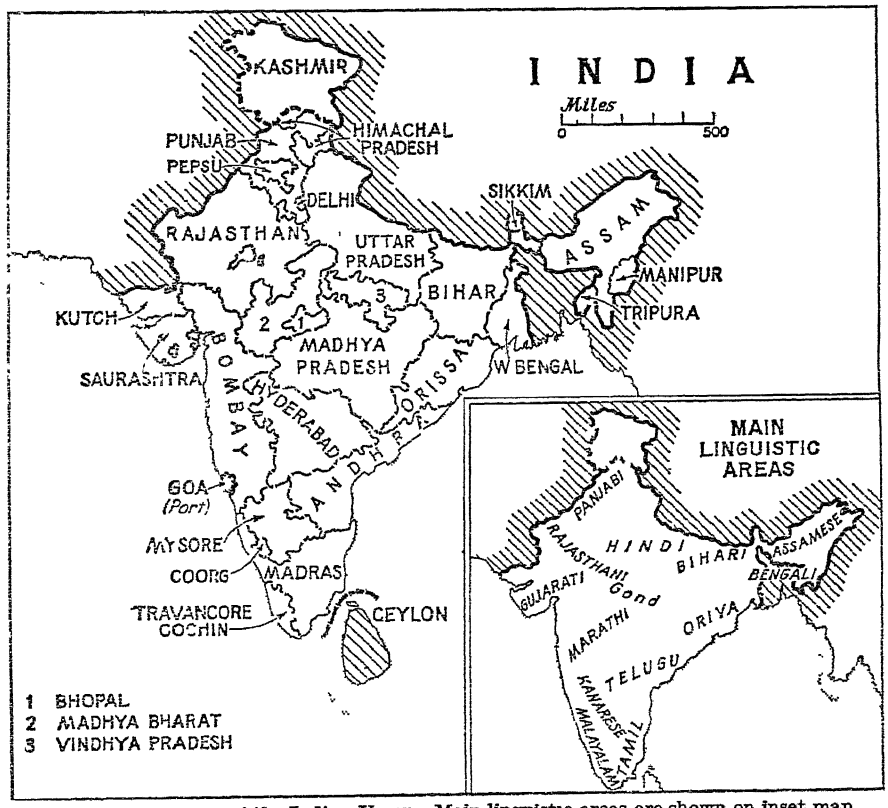
Hyderabad. The report pointed out that Hyderabad was a multi-lingual State, 47 8 per cent of the population speaking Telugu, 24.3 per cent Marathi, 11 6 per cent Urdu, 10.5 per cent Kannada, and 5 8 per cent other languages The unity of the State, being based not on a free association of the people but on personal rule, was purely superficial, and public sentiment, both inside and outside Hyderabad, was "overwhelming and insistent" on the need for its disintegration This demand was accepted by the Commission, which recommended the transfer of the Kannada and Marathi-speaking areas to Karnataka and Bombay respectively, leaving the Telengana district (which is predominantly Telugu-speaking) as a unit by itself. Whilst recognizing that "impressive" arguments existed for the union of Telengana with Andhra in a single Telugu-speaking State (usually referred to as Vishalandhra), the Commission noted that Telengana could be a stable and viable unit, and that fears existed among its people that they might be "swamped and exploited" by the people of Andhra, among whom higher educational standards prevailed. The report recommended, therefore, that Hyderabad should remain a separate State, but that provision should be made for its union with Andhra after the general elections to be held in or about 1961, if a two-thirds majority of the State Legislature expressed itself in favour.

Andhra. The boundaries of Andhra would remain as at present, subject to possible slight changes on the Madras and Karnataka borders, to be settled by negotiation between the State Governments concerned. The Commission recommended, however, that a part of the Bellary district which had been transferred to Mysore in 1953 (see 13165 A) should be added to Andhra. Proposals for joint control of Madras City by the States of Madras and Andhra, which had been put forward by the Andhra Government, were rejected by the Commission

Bombay. Bombay would remain a bilingual State, with Gujarati as the main language in the north and Marathi in the south. The Gujarati-speaking States of Saurashtra and Kutch and five Marathi-speaking districts of Hyderabad would be added to Bombay State, whilst the Kannada-speaking areas in the south would be transferred to Karnataka, and a Hindi-speaking *taluk* in the north to Rajasthan.

Vidarbha. The new State of Vidarbha would be formed from eight Marathi-speaking districts in the south-west of Madhya Pradesh.

Madhya Pradesh. Madhya Pradesh (language Hindi) would consist of the present State (minus the districts included in Vidarbha), the States of Madhya Bharat (except the Sunel *enclave*), Bhopal, Vindhya Pradesh, and the Sironj sub-division of Rajasthan. The Commission suggested that Jubbulpore should become the State capital of Madhya Pradesh instead of Nagpur, which was included in the area transferred to Vidarbha.



The existing States of the Indian Union. Main linguistic areas are shown on inset map. (*Economist*)

Rajasthan. Rajasthan (language Hindi) would lose the Sironj sub-division to Madhya Pradesh, but would absorb the State of Ajmer (which forms an *enclave* in its territory), one *taluk* of Bombay, the Sunel *enclave* of Madhya Bharat, and part of the Hissar district of the Punjab.

The Punjab. The Commission rejected the Akali Sikhs' demand for a Punjabi-speaking State (see 14412 C), and recommended the union of PEPSU with the Punjab in a bilingual State containing both Punjabi- and Hindi-speaking areas Mr Kunzru and Mr. Panikkar favoured the inclusion of Himachal Pradesh in the Punjab, on the ground that security considerations required "the establishment of a stronger and more resourceful unit than the present Himachal Pradesh"; Mr Fazl Ali, however, in a minute of dissent, recommended that the State, in view of its strategic position on the Chinese frontier, should be directly administered by the Centre as a territory.

Uttar Pradesh. Mr. Fazl Ali and Mr. Kunzru considered that there was no cause for dividing Uttar Pradesh (language Hindi), and recommended that it should retain its present boundaries. Mr. Panikkar, however, put forward a minority recommendation that the State should be divided into two, of which the western half (consisting of the Meerut, Agra, Rohilkand, and Jhansi divisions and the four northern districts of Madhya Bharat) should be known as the State of Agra

Bihar. Bihar (language Hindi) would retain its existing boundaries, except that part of the Purnea district to be transferred to West Bengal. The Commission rejected proposals for the formation of a Jharkhand State in southern Bihar, but recommended that the special needs of this area should be recognized.

West Bengal. West Bengal (language Bengali) would be enlarged by the addition of parts of the Purnea district, which would provide a direct link between the northern and southern sectors of the State

Assam. Assam (language Assamese) would absorb the State of Tripura, but would otherwise remain unchanged. The Commission rejected the demand for the creation of a separate State from the hill districts of Assam as impracticable, but recommended that special attention should be paid to these districts and that a Commissioner should be put in charge of their administration and development

Orissa. No changes were called for in the boundaries of Orissa (language Oriya), which had been fixed in 1936 after detailed examination.

Jammu and Kashmir was excluded from the Commission's terms of reference.

Territories. Delhi would be a Centrally-administered territory, but the question of creating a municipal corporation with substantial powers should be considered **Manipur** would also be a Centrally-administered territory for the time being, although its ultimate merger with Assam should be kept in mind In the **Andaman and Nicobar Islands** the *status quo* would continue.

Under the proposed reorganization, the areas and populations of the constituent units of the Indian Union would be as follows:

	Area (In sq. miles)	Population
States.		
Madras	50,170	30,000,000
Kerala	14,980	13,600,000
Karnataka	72,730	19,000,000
Hyderabad	45,300	11,300,000
Andhra	64,950	20,900,000
Bombay	151,360	40,200,000
Vidarbha	36,880	7,600,000
Madhya Pradesh	171,200	26,100,000
Rajasthan	132,300	16,000,000
Punjab	58,140	17,200,000
Uttar Pradesh	113,410	63,200,000
Bihar	66,520	38,500,000
West Bengal	34,590	26,500,000
Assam	89,040	9,700,000
Orissa	60,140	14,600,000
Jammu and Kashmir	92,780	4,400,000
Territories.		
Delhi	578	1,744,072
Manipur	8,628	577,635
Andaman and Nicobar Islands	3,215	30,971

Administrative and Other Implications of Reorganization.

The report recommended that constitutional recognition should be given to the right of linguistic minorities to primary education in their mother-tongue, if a sufficient number of pupils were available, and that the Central Government, in consultation with the State Governments, should adopt a clear code to govern the use of different languages at different levels of State administration. In examinations regulating entry into the public services of the States, a candidate should be allowed to use either one of the main languages of the State, the Union language (English or Hindi), or the language of a minority constituting 15 to 20 per cent or more of the population of the State.

Assets and liabilities should be divided among the States on the basis of principles which should as far as practicable be of general application. and the setting-up of special machinery to expedite the final settlement of this question should be considered Current inter-State agreements regarding water rights, etc, should be adapted as soon as possible after decisions regarding reorganization had been reached The creation of special development boards for under-developed areas should be considered, and a permanent body, on which members of the Planning Commission might be included, should be set up to examine any grievances regarding alleged neglect of certain areas The Government should consider the possibility of formulating an industrial location policy for the whole of India, in order to ensure the equitable distribution of development expenditure.

As a general rule, 50 per cent of the new entrants in the all-India services should be from outside the State concerned, and certain all-India services, such as the Indian Service of Engineers, the Indian Forest Service, and the Indian Medical and Health Service, should be reconstituted in the interests of national unity and good administration. At least one-third of the judges of State High Courts should consist of persons recruited from outside the State, so that the administration might inspire confidence and help to arrest parochial trends.

In formulating a policy with regard to the recognition of Hindi in competitive examinations for the all-India and other services, the need for encouraging the study of other Indian languages, and particularly of the South Indian languages, should be kept in view. For some time to come English should continue to occupy an important place in the universities and higher educational institutions, even after the adoption of Hindi and the regional languages for official and educational purposes

The Prime Minister, Mr. Nehru, in a broadcast on Oct. 9, appealed to the public to give the report "most careful consideration" and to approach the whole question of reorganization of States "in a democratic and peaceful way." The ultimate decision, he pointed out, would be taken by Parliament, and meanwhile the State Legislatures and the general public would have every opportunity to express their opinion. The Congress Working Committee adopted a resolution on Oct. 14 calling upon Congress members to "avoid the agitational approach," and not to associate with other parties or groups in any agitation or demands.

First reactions to the Commission's report in certain States are described below.

Mysore. The Commission's proposals for the inclusion of Mysore in Karnataka led to serious differences of opinion within the State Cabinet Whereas the Chief Minister, Mr Hanumanthaiya, publicly expressed his support for the formation of a single Kannada-speaking State, Mr Ramachandra Rao (Education Minister), Mr. Chenniah (Health Minister), and Mr Manjappa (Revenue Minister) issued a joint statement maintaining that if Mysore was "submerged in a backward area much larger than itself" its development would be "stunted and retarded" The three Ministers therefore advocated the formation of two Kannada States, one of which would comprise Mysore, Coorg, and the Kannada districts of Madras, and the other the Kannada districts of Bombay and Hyderabad The statement also opposed the suggested transfer of part of the Bellary district to Andhra

Bombay. Congress leaders from Bombay City, Maharashtra, and Gujarat took part in talks with Mr Nehru, Pandit Pant (the Home Minister), and Mr. Dhebar (president of Congress) in Delhi on Oct. 17-19 Whilst the delegation from Bombay favoured the acceptance of the report *in toto*, the Maharashtrian spokesmen demanded the formation of a single Marathi State with Bombay as its capital, and the Gujaratis stated that they were not averse to the formation of a separate Gujarati State Both the Bombay and Gujarati delegations, however, strongly opposed the inclusion of Bombay in a Marathi State, they maintained that if Bombay State were divided into linguistic units, the City of Bombay should be constituted as an independent unit in view of its cosmopolitan character

Punjab. Master Tara Singh, the Akali leader, who had been released from prison on Sept 9, declared on Oct 10 that the Sikhs were facing "a greater calamity than that of 1947," as the Commission's report "completely wipes us off the face of the earth."

The Home Ministry was reported on Oct. 12 to have sent instructions to the State Governments to be watchful of the law and order situation arising from the Commission's report, especially in the Punjab, Maharashtra, the Bellary district, and the border of Bihar and West Bengal.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13356 A.)**

A. UNITED KINGDOM. — Housing. - Construction Figures, First Half of 1955. - Sir Humfrey Gale appointed Adviser on Relief of Population Congestion.

Figures published by the Ministry of Housing and Local Government on Aug. 4 showed that 155,850 permanent houses were completed in Britain in the first six months of 1955, compared with 167,695 in the corresponding period of 1954. The number of permanent houses and flats completed since the end of the war was thus brought up to 1,838,719, of which 1,354,674 had been built by local authorities, 403,270 by private builders, 34,613 by housing associations, and 46,162 by Government departments.

Mr. Duncan Sandys (Minister of Housing and Local Government) announced on Oct. 18 that he had appointed Lieut.-General Sir Humfrey Gale, chairman of the Basildon Development Corporation, to advise and assist him in speeding up schemes for relieving population congestion in large built-up areas by the expansion of small existing towns in the surrounding countryside.

Mr. Sandys had stated on April 30 that the 12 new towns being built in England and Wales had already provided new homes for 100,000 people and employment for 20,000.
(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Housing, 14222 C.)

B. LIBYA - PAKISTAN. — Legations raised to Embassy Level.

It was announced in Karachi early in October that Pakistan and Libya had decided to raise their respective Legations to Embassy level.—(Pakistan High Commissioner's Office, London)

A. UNITED KINGDOM. — Miscellaneous Legislation. - The Food and Drugs (Amendment) Act.

Miscellaneous legislation enacted during recent months is summarized below. It includes legislation enacted during the first few weeks of the present Parliament (before the summer recess) and during the last few months of the former Parliament.

The County Courts Bill. This Bill was based on the recommendations of a Committee on Supreme Court Procedure, headed by Lord Justice Evershed, which reported in 1949, and was designed to relieve the pressure of work on the High Courts. It was given a second reading in the House of Lords on Feb 26 and, after passing through all its Parliamentary stages (House of Commons second reading, June 24), was enacted on July 27.

The Bill (1) increased the jurisdiction of County Courts in England and Wales from cases where the maximum sum involved was £200 to those where the maximum involved was £400, with power to increase the limit to £500 by Order-in-Council; (2) conferred a right of appeal from County Court judgments (in certain circumstances) on questions of fact as well as of law; (3) raised the statutory maximum number of County Court judges from 65 to 75, and extended the powers of County Court registrars to hear minor cases; (4) made legal aid available in all County Court cases to which the Legal Aid and Advice Act was applicable. In order to induce litigants to resort to the County Courts rather than to the High Court, the Bill introduced various "economic sanctions," including a provision that a person who started proceedings in the High Court when they could have been begun in a County Court should not be able to recover his full costs.

In the House of Commons Committee stage a Government amendment was agreed to entitling a High Court litigant who recovered between £300 and £400 to recover High Court costs, notwithstanding that he could have sued in the County Courts Sir Reginald Manningham-Buller (the Attorney-General), who moved the amendment, explained (*a*) that it had been introduced to meet criticisms (voiced in the second reading debate) that the Bill would penalize litigants in cases where it was difficult to assess what damages would be recovered, (*b*) that a litigant would be forced to go to the County Court, where £400 was the maximum that could be recovered, when he could have recovered £500 or more in the High Court

A second Government amendment (agreed to in the Report stage) provided that where an action had been started in a County Court and it later appeared that the plaintiff ought to recover an amount in excess of County Court jurisdiction, the case might be transferred to the High Court.

The Crofters (Scotland) Bill. This Bill received a second reading in the House of Commons on Jan 27 and was enacted on May 6. It (1) provided for the reorganization, development, and regulation of crofting; (2) authorized the making of grants and loans for agricultural production on crofts or for the provision of houses and buildings for crofters and cottars, (3) re-enacted the provisions of the Landholders' Act in respect of cottars.

The Fisheries Bill This Bill, enacted on March 29, increased from £3,000,000 to £3,500,000 the maximum for grants to the Herring Industry Board for the promotion of herring sales, and empowered the Minister of Agriculture, Fisheries and Food and the Secretary of State for Scotland to make loans and grants for harbour and other works.

Mr. Heathcoat Amory (Minister of Agriculture and Fisheries) explained on the second reading that herring sales had steadily declined in both home and export markets, home sales having fallen from the post-war peak of 836,000 crans in 1947 to about half that number, whilst the export market was now taking only about 300,000 crans annually, compared with up to 1,000,000 crans annually before the war.

The International Finance Corporation Bill, to enable the United Kingdom to take part in the proposed organization to assist economic development in backward countries (see 14168 A), was given an unopposed second reading in the House of Commons on July 1 and received the Royal Assent on July 27.

The Isle of Man (Customs) Bill (House of Commons second reading, March 24, enacted May 6). This Bill cancelled the requirement that resolutions of the Tynwald (the I O M Parliament) concerning tariffs must be validated by the U.K. Parliament, and provided that such resolutions might henceforth be validated by Order-in-Council.

The Oil in Navigable Waters Bill applied to British ships the provisions of the International Convention for the Prevention of Oil Pollution of the Sea (see 13598 C). It made it an offence, punishable by a fine of up to £1,000 on summary conviction, (*a*) for crude, fuel, lubricating, or heavy diesel oil to be discharged or allowed to escape from ships registered in the United Kingdom, (*b*) for oil of any description to be discharged or allowed to escape from any vessel or place on land into U.K territorial waters. Exceptions were made, however, where discharge of oil was necessary for the safety of a vessel, for preventing damage to the ship or her cargo, or for saving life. The Bill did not apply to naval vessels or to Government ships in Admiralty service.

The Bill was given a second reading in the House of Lords on Dec. 14, 1954, and in the House of Commons on March 21, 1955, and was enacted on May 6.

The Rating and Valuation (Miscellaneous Provisions) Bill. This Bill (1) simplified the procedure for appealing against rating valuations, (2) extended the exemption from rates of churches and chapels to cover church and chapel halls, so long as these were not let for profit; (3) provided for the remission or reduction of rates on properties occupied by charities, and for the exemption of garages for invalid chairs, etc., supplied by the Ministry of Health; (4) introduced a new method of assessing the rating of Gas Boards.

The following private members' Bills were also enacted during the period covered (sponsors' names in parentheses):

The Public Service Vehicles (Travel Concessions) Bill. (Mr. E Short, Lab). This Bill was originally named the Public Service Vehicles (Contract Carriages and Special Facilities) Bill, and, as introduced (1) empowered local authorities to provide travel free or at reduced rates for men over 65, women over 60, children between 15 and 18 to and from school, and blind or seriously disabled persons, and to levy a rate to meet the cost of these concessions, (2) authorized local authorities to run contract carriages—i.e. to cater for weekend private hire work, etc.

Mr. Short, in moving the second reading on Feb 18, explained that 96 local authorities already gave fare concessions to blind, disabled, or elderly people. A recent decision of the Court of Chancery that a scheme operated by the Birmingham Corporation was *ultra vires* the Corporation, however, made it essential that such schemes should be given a legal standing. The clause authorizing local authorities to run contract carriages would enable them to utilize profitably at week-ends vehicles which they were forced to provide for week-day rush periods, and which would otherwise be idle.

Mr. Molson (Parliamentary Secretary, Ministry of Transport) stated that the Government would support the Bill provided (*a*) that it was amended so as to limit the power to grant free or cheap travel concessions to those local authorities which already operated such schemes, and (*b*) that the clauses authorizing local authorities to run contract carriages (which, he said, might lead to unfair competition with private coach owners) were dropped A Government amendment to secure these points having been agreed to in the Committee stage, the Bill passed through its remaining Parliamentary stages and was enacted on May 6.

The Public Libraries (Scotland) Bill (Sir William Darling, C.) This Bill, given a second reading in the House of Commons on April 1 and enacted on May 6, removed the limitations imposed on Scottish county councils' expenditure and borrowing powers in respect of public libraries

On Nov. 25, 1954, the Royal Assent had been given to the Food and Drugs Amendment Bill, based on the recommendations of working parties for the catering and manufactured meat products trades, and of an inter-departmental committee on meat inspection. The Bill had originally been introduced in the House of Lords, where it was given a second reading on Dec. 3, 1953. As introduced, its provisions were as follows:

(1) It empowered the Minister of Food to require the registration of shops, restaurants, cafés, public houses, and other places used for the sale of food or its preparation for public consumption, as well as the licensing of food stalls or barrows

(2) It authorized the Minister to prescribe standards of hygiene for such premises.

(3) It substituted, for the specific provisions on hygiene contained in the Food and Drugs Act, general powers to make regulations for each trade. Regulations would cover the construction, layout, and maintenance of premises, the provision, maintenance and cleanliness of sanitary and washing facilities; the inspection of animals for slaughtering; the prohibition of the sale from stalls or vehicles of meat or other food liable to infection, and the prohibition or regulation of sales of shellfish from designated beds

(4) It prohibited the sale of food or drugs rendered injurious to health by addition, subtraction, or other processes

(5) It empowered the Minister of Food to make regulations to control the composition and treatment of food, and to demand information about new substances intended for use in the preparation of food.

(6) It embodied in permanent form Defence Regulations enabling a court to find food or drug labels or advertisements misleading, and protecting the public against misleading claims of nutritionary, dietary, or medicinal value.

After passing through its remaining stages in the House of Lords (third reading, March 30, 1954), the Bill was given a second reading without a division in the House of Commons on July 23. In the Committee stage, Dr. Charles Hill (then Parliamentary Secretary, Minister of Food and Agriculture) moved an amendment to delete the provision requiring catering establishments to be registered with local authorities, and substituting a clause empowering the courts to disqualify establishments which contravened the standards of cleanliness, etc., laid down. The amendment was agreed to by 211 votes to 185, after an Opposition amendment (moved by Mr. Willey) to retain the registration requirement had been defeated by 215 votes to 188.

Amendments were also agreed to (*a*) deleting the provision empowering the Minister of Food to prohibit the sale from stalls or vehicles of food susceptible to infection (agreed to without a division after Mr. Hurd, C., its sponsor had pointed out that such prohibition would affect travelling shops operating in country districts); (*b*) empowering the Minister to make regulations for refuse disposal from premises dealing with food (moved by Dr Broughton, Lab.); (*c*) authorizing him to make regulations for the cleanliness of clothing and apparatus on such premises (moved by Mr. Chapman, Lab); (*d*) prohibiting spitting on premises where food was sold, offered, exposed, stored, or prepared for sale (moved by Dr. Edith Summerskill, Lab.)

The Bill received its third reading in the House of Commons on Nov. 11. The Commons' amendments were agreed to in the House of Lords on Nov. 22, the amendment substituting disqualification for registration of catering premises being carried by 33 votes to eight.

A similar Bill applying to Scotland was given a second and third reading in the House of Lords on Feb. 8 and March 8, 1955, respectively.

The Minister of Agriculture informed the House of Commons on May 2, 1955, that a Food Hygiene Advisory Council had been set up with Lord Strang (chairman of the National Parks Committee) as chairman, and with 17 other members, 11 of whom would represent the public, three the food trades, and three the workers in those trades.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Legislation, 14055 A.)**

A. HIGH COMMISSION TERRITORIES. — Economic Development in Basutoland, Bechuanaland Protectorate, and Swaziland.

A White Paper summarizing the progress of economic and social development in the three High Commission territories of Basutoland, the Bechuanaland Protectorate, and Swaziland was published in London on Oct. 5.

It stated that the following sums had been allocated to the territories under the Colonial Development and Welfare Acts. Basutoland—grants £2,081,415, loans £500,000, Bechuanaland Protectorate—grants £2,282,918, loans £499,500, Swaziland—grants £2,107,683, loans £352,000. The bulk of these funds would be devoted to developing the wealth and resources of the territories to make possible a higher standard of living, but some direct assistance would also be given to the social services. In particular, it was recognized that there was special need to raise the standard of social services in Bechuanaland without delay, and a "substantial" grant-in-aid would be made for this purpose over the next five years. The chief projects to be undertaken in the three territories would be as follows:

Basutoland. Concentration would be on agricultural and land development, owing to the lack of minerals. It was hoped that the soil conservation scheme would be finished within five years; meanwhile the "Happy Valley" pilot scheme, where a whole catchment area had been developed by co-operative groups using tractors, was making good progress, a road into the mountainous interior was nearing completion, and explorations for diamonds were being carried out.

Bechuanaland Protectorate. Here efforts would be concentrated on water development, which, it was hoped, would increase the cattle population by 150,000 head; meanwhile the Commonwealth Development Corporation's abattoir at Lobatsi had been opened in October, 1954, and was now "in full swing." It was also proposed to spend £500,000 on a geological survey, minerals being already exploited in some parts of the territory.

Swaziland differed from the other territories in being an area of European settlement, the areas for European and African settlement being approximately equal. The country possessed a rich asbestos mine, but future development would consist chiefly in its large forest schemes. The C D C irrigation scheme was also being expanded.

The White Paper was based on a report by Sir Alexander Symon (now High Commissioner in Pakistan), who visited the territories on behalf of the Commonwealth Relations Office in the spring of 1954. (Commonwealth Survey) **(13394 B.)**

B. RHODESIA AND NYASALAND FEDERATION. — Kafue By-election. - Mr. Van Eeden re-elected.

Mr. G. F. M. Van Eeden, who had resigned his seat at Kafue in the Federal Parliament on July 8 after having been expelled from the Federal Party, was re-elected as an Independent at the ensuing by-election on Oct. 6.

Mr. Van Eeden received 500 votes, compared with 305 for Mr. G. B. Beckett (Federal Party) and 30 for Mr. F. S. Derby (Independent Confederate)—a majority of 255. At the 1953 general election Mr. Van Eeden, contesting the seat for the Federal Party, had had a majority of 244 in a straight fight. In the by-election, however, the electorate totalled 1,290, against 1,015 in the general election.

On July 13 Mr Van Eeden had signed an agreement with the leader of the Confederate Party, Mr. J. R. Dendy Young, under which the latter had pledged his party not to contest the by-election. For his part, Mr Van Eeden had undertaken to stand as an Independent and not to form a separate political party for the duration of the agreement, which would be "for at least the term of the present Parliament." As a result of their opposition to this agreement, two former members of the executive of the Confederate Party, Mr S. Gurland and Mr. C R. I. Weekes, were expelled from the party on July 29. They subsequently announced that they would form an Independent Confederate Party.

As a result of the by-election, party representation in the Federal Parliament was: Federal Party, 23 seats; Confederate Party, 1; Independents, 2; members representing African interests, 9.—(Federal Information Dept., Salisbury) **(Prev. rep. 14163 C; 13333 A.)**

C. UNITED STATES. — Agriculture. - Increased Surplus Disposals Bill. - Acreage Allotments for Maize, Wheat and Cotton. - Reduced Guaranteed Wheat Price. - Meeting of Joint U.S.-Canadian Committee for Trade and Economic Affairs.

President Eisenhower signed a Bill on Aug. 15 amending the Agricultural Surplus Disposals Act of 1954 (see 13991 A) by raising from $700,000,000 to $1,500,000,000 in the three years 1954-57 the amount of surplus agricultural commodities which the Government might sell abroad for foreign currencies. The President stated that during the past year agreements providing for the sale of surplus commodities valued at $469,000,000 had been reached with 17 countries; that they had been negotiated so as to safeguard "usual marketings of the United States" and to avoid undue disruption of world prices and world markets; and that the foreign currencies received would be used for development and expenditure abroad, "with substantial benefit to both the recipient countries and ourselves."

The U.S. Secretary of Agriculture, Mr Benson, stated on May 5 that the U S. Government owned, or held as collateral for loans, agricultural commodities valued at nearly $7,500,000,000, and that the Government would soon be paying $1,000,000 a day merely for the storage of these commodities.

Butter stocks, however, declined sharply in the first six months of 1955, the Agriculture Department stating on July 21 that they had been cut from 461,000,000 lbs in mid-1954 to 179,000,000 lbs. Cheese stocks were similarly reduced from 422,000,000 lbs to 273,000,000 lbs, and stocks of non-fat dry milk solids from 293,000,000 lbs to 157,000,000 lbs. It had been announced at the end of January that the U.S Government planned to reduce its butter surplus by converting quantities into ghee (made by melting the butter cooling it, and pouring off the more liquid part), the first sale of ghee (some 4,000,000 lbs to Pakistan) was announced on March 11.

The following acreage allotments and support prices were announced in recent months for maize, wheat, and cotton.

Maize. The Department of Agriculture on Jan. 31 fixed an acreage of 49,842,697 acres for the 1955 maize crop—an 8 per cent increase on the 1954 allotment of 46,995,504 acres. It was stated that the increase had been made to ensure a normal supply of livestock feed grains and reserves.

Wheat. Mr Benson announced on June 10 that the price support for wheat in 1956 would be $1.81 a bushel, or 76 per cent of the "parity" price. This compared with $2 06 a bushel (82½ per cent of parity) for the 1955 crop, and was the lowest support price since 1946. On May 13 Mr Benson had announced new wheat marketing quotas and a limitation of the area to be sown to wheat to 55,000,000 acres (the same as in 1955). The price and quotas were accepted by wheat farmers in a national referendum on June 26, the voting being 254,197 for and 73,852 against—a majority of 77 5 per cent.

Cotton. Production controls on cotton for 1956 were announced by Mr. Benson on Oct 14, the acreage allotment being cut by 4 per cent from 18,113,208 acres to 17,391,304 acres. The quotas will become operative if approved by a two-thirds majority of cotton growers in a national referendum on Dec. 13.

Mr. C. D. Howe, the Canadian Minister for Trade and Commerce, announced on Sept. 26, after the second meeting of the Joint U.S.-Canadian Committee on Trade and Economic Affairs (see 13312 A), that officials of the two countries, who were responsible for the sale and disposal of wheat, would meet as soon as possible in Washington to see whether the U.S. disposal programme could not be carried out without interfering with Canadian markets.—(New York Times - New York Herald Tribune) **(Prev. rep. 14207 B; 13991 A.)**

D. UNITED KINGDOM. — Financial and Monetary Policy. - New Defence Bonds and Conversion Issues.

The Treasury announced on Sept. 30 that a new issue of 4 per cent Defence Bonds would replace the current issue of 3½ per cent Bonds from Nov. 1.

The terms of the issue would remain unchanged, except that only three months' notice of encashment (instead of six months') would be required during the first five years of life of the bonds, whose full life would be ten years. The rate of 4 per cent was the highest yet paid on a Defence Bond issue.

On Oct. 9 the Treasury announced that £250,000,000 of a new issue of 4 per cent Conversion Stock, 1957-58, would be offered for cash on Oct. 18 at 99½ per cent, whilst another £524,000,000 was being offered to holders of 3 per cent Serial Funding Stock on a £100 per £100 basis, together with an adjusting cash payment of 10s. per £100 stock. It was stated on Oct. 12 that the cash offer had been over-subscribed and that applications for stock up to £5 had been granted in full, and larger applications as to about 78 per cent. At the expiry of the conversion offer on Oct. 21 the Bank of England announced that over three-quarters of the 3 per cent Serial Funding Stock (i.e., about £425,000,000 out of £524,000,000) had been tendered for conversion.—(Financial Times) **(Prev. rep. 14198 D.)**

A. UNITED KINGDOM. — Conservative Party Conference. - Debates and Resolutions. - Mr. Butler on Economic Policy. - Sir Anthony Eden's Review of Home and International Policy. - Statement on Government's Defence Policy. - Reduction in Armed Forces. - Raising of Call-up Age. - Lord Woolton's Farewell Speech.

The 75th annual conference of the Conservative and Unionist Party was held at Bournemouth on Oct. 6-8 under the chairmanship of Mrs. Evelyn Emmet, M.P. The subjects discussed and resolutions adopted are summarized below.

Economic Policy.

With only 20 dissentients, the conference adopted a resolution (moved by Mr. R. Elliott, Morpeth) which *(a)* congratulated the Government on the success of its policies, "which have contributed greatly to the present high level of production and employment"; *(b)* recognized that "the continuance of this prosperity depends on the maintenance of our competitive powers as a trading nation"; and *(c)* pledged its support of the Government "in the exercise of the strictest economy and all measures designed to eliminate the dangers of inflation."

Replying to the debate on the resolution, Mr. R. A. Butler (Chancellor of the Exchequer) discussed the country's economic problems in terms broadly similar to those of his Mansion House speech a few days earlier (see 14453 A). In the course of his speech to the conference, extracts from which are given below, he gave the new slogan "Expand success and curb excess" as the keynote of the Government's economic policy.

Mr. Butler said that the resolution echoed the policy of the Conservative election manifesto, which promised the use of "sound monetary and fiscal weapons" to combat inflation. He continued: "We propose not only to continue the flexible use of these instruments, but to make them effective until they have cured the inflammatory inflation. . . . Our policy has consistently been a dual one of encouragement and discipline, and there is no alteration of the basic lines. We are not acting through panic or in a crisis mentality. But I do think it is necessary to take firm action.

"The discipline which I applied in February, and which had immediate results, has not proved to be strong enough and needs strengthening in a mixed economy, that is, in the public sector and the private sector. The rate of interest and the credit 'squeeze' need supplementing by a control of the demands of the public sector of our economy on our resources of manpower and material. That is precisely the problem that we are going to deal with. . . ."

After declaring that the Government was seeking to build "a pioneering path between the extremes of rugged individualism and creeping bureaucracy with cramping State control," the Chancellor continued: "We shall not go back to physical controls, allocations, rationing, and restriction. I cannot see how you can cut one import, especially in foodstuffs, without resorting in the end to some form of allocation and rationing. We do not propose to have rationing by the purse. Physical cuts in imports on the scale I had to resort to in 1951-52 would be bound to result in retaliation against our exports. Furthermore, we should not get the advantages of the widening of world trade we are beginning to get.

". . . It is essential for Government policy to avoid two sorts of strain. One is the economic strain which we have been undergoing, but which in the last few weeks shows some slight easing on our balance of payments overseas; and the second is the social strain within our country. We must look after those who cannot protect themselves against rising costs. It must be a first aim of our Government to look after those on fixed incomes. Last year I used the slogan 'Invest in Success.' I still believe in it. This year my advice is: 'Expand success and curb excess.' That is the line we must take now.

"Last year I mentioned the possibility of doubling our standard of living in 25 years. That has been shown to be possible. In some ways the manner in which we have galloped towards prosperity has been too fast. We have to put a curb or bridle on the horse. I did not know it would be quite so fiery or so excitable when it saw the oats of freedom for the first time.

"To maintain full employment and to maintain the value of money there must be great restraint in wage demands and the distribution of profits. It has also become increasingly evident that more of the benefits arising from increased production should be passed on to the community as a whole, not just to the wage-earning section, through a reduction of prices. The aim must not be to give or see given such pecuniary increases, but to reduce the general costs so that money has a greater value. If we are to see industry reducing its prices, and the leaders of organized labour following the fine lead given by the T.U.C. at Southport [see 14440 A] to reduce wage demands, then it is quite clear that the Government must give its lead and then expect to be followed by their partners in industry and labour. . .

"I am called on to abolish or reduce purchase tax, income tax, and surtax; to speed up the repayment of post-war credits, to expand the road, hospital, education, and coast-protection programmes. All these things are important, but they confront us with the familiar difficulty of reconciling the general wish to cut expenditure with the individual wish to spend more. Or, as Samuel Butler put it, 'the universal innate desire on the part of every organism to live beyond its means.' Therefore you must take it flatly from me that you will have to exercise restraint about these notions. These will be the battles we will win later. . . ."

Turning to the Government's immediate policy, the Chancellor said: "We shall give first priority to what I describe as expanding success—to expenditure which will help Britain to keep level with, and in some respects ahead of, our giant competitors overseas. For example, we will back atomic power. We are going to back new inventions. We must go on supporting coal, which is woefully lagging behind. We have already announced our support of the realistic education and hospital programmes for the future. We will certainly support home agriculture, but we must continually review the subsidies to see that we do not spend too much on overseas payments, such as the immense bill for feeding-stuffs. We shall hold back sharply on Government building. We cannot go further on roads than the programme I have already approved, at any rate at present. We shall adjust the defence programme to modern needs. In controlling Government expenditure, the number of non-industrial Civil Servants has fallen by 53,000, and in the trade and industry group of departments, where we changed the policy on controls and rationing, the staffs were reduced by no less than 32 per cent. We shall go on with this and other processes . . "

Foreign Policy.

With a few dissenting votes, the conference adopted a resolution (moved by Mr. David Webster, Bristol North-East) welcoming the progress achieved by the Government to obtain a secure and lasting peace, and pledging support for further measures to reduce the threat of war and world-wide destruction. Mr. Harold Macmillan, the Foreign Secretary, replied to the debate.

Mr. Macmillan said that the principal achievement of the Geneva "summit" conference was the recognition that, however great the differences between the Communist countries and the free world, they must somehow or other try to live together in practice. They had now approached a point where no Power, however great, could hope to win a war in a nuclear age. This, however, was only true if there was the will to resist and if men and women refused to be blackmailed or paralysed into submission.

Turning to the forthcoming Foreign Ministers' conference at Geneva, Mr Macmillan said: "I do not expect to see spectacular results. I shall be satisfied if we make some practical progress. We have been set three tasks. First, the reunification of Germany within the framework of European security. Whether we succeed or not depends on the answer given to a simple question: 'Why does the Soviet Government object to the establishment of a united Germany under a system of free elections?'

"I am sure we can formulate plans which . . . would give full protection to Russia against any threat which might come from a reunited Germany if she chooses to join NATO. She may, of course, prefer to remain neutral. We are prepared to add to a legal pact actual military dispositions and arrangements for mutual inspection or control; that is, to underwrite the words of a pact by deeds of military understanding. If these proposals do not fully satisfy Russian requirements, let them suggest amendments. We will certainly consider them in the spirit of wishing to reach agreement. Our proposals are sincerely put forward. If they are acceptable in principle, something very real will have been achieved. The solution of the German problem, without which no true security is possible in Europe, will then be within our grasp . "

As regards the question of Cyprus, Mr. Macmillan stressed that Britain's strategic position in that island was vital for the defence of the Middle East. He believed there would eventually be progress on the lines of developing the greatest possible internal measure of self-government for Cyprus; but he was confident that the conference would not wish the Government to surrender the vital interests of Britain and her partners in the Middle East.

Other Subjects.

Other subjects discussed by the conference included industrial relations, housing, education, Commonwealth and Empire policy, electoral reform, etc. Summaries are given below.

Industrial Relations. Two resolutions on this subject were adopted by large majorities: (1) a resolution by Mr. Alan Green, M.P., congratulating Ministers on their encouragement of profit-sharing and co-partnership schemes, and calling for an early initiative by the Government to speed the process: (2) a resolution by Mr. B. Forbes (Solihull), a shop steward, which *(a)* welcomed the initiative taken by the Prime Minister and the Minister of Labour in discussing with the T.U.C., the British Employers' Confederation, and the nationalized industries ways and means of avoiding strikes in industrial disputes, and *(b)* urged more effective co-operation between management and labour in all sections of industry with a view to removing causes of industrial unrest.

Sir Walter Monckton (Minister of Labour) pointed out that the discussions between the Prime Minister and the three sides of industry were at present on a confidential footing, and therefore he could not disclose "the full nature of what we are doing." All the parties, however, had displayed "a genuine desire to find a way to avoid all unnecessary strikes," and there was "no question about the spirit of those taking part." Whilst he (the Minister) would not deny the impact of last summer's industrial disputes, it was necessary to preserve a sense of proportion; there was a wide area in which agreements had been reached, but people tended to overlook settlements and to exaggerate strikes, since the former were "not such good news value" as the latter. The T.U.C. had fully recognized their share of responsibility in respect of inter-union disputes, and he welcomed their decision to take powers to intervene at an earlier stage in such disputes (see 14440 A).

After stressing that there were " no quick cures " for the problem of strikes, Sir Walter said : " Nobody wants me to suggest repressive legislation That is a good thing, because I would not. The aim is to create and encourage partnership between all men and women of goodwill—Government, management, shareholders, and labour, working for the prosperity of all. If we don't get prosperity for all, there will not be prosperity for any. If we have prosperity for all, there is something to share, and then is the time to consider how to share it." He added that his Ministry was inquiring into the extent and working of co-partnership and profit-sharing schemes, and would publish the results.

Housing and Local Government. Two resolutions were accepted by large majorities . (1) a resolution by Cllr. P. F. Broadhead (Romford) which deplored " the subsidizing of persons in council houses and flats whose income is adequate to pay the full economic rent," and (2) a resolution by Mr. T. S Hayton (Lancaster) calling upon the Government " to introduce at an early date legislaton which will reform the structure and finance of local government so as to give greater local responsibility and a more even sharing of the rate burden." In moving his resolution, Councillor Broadhead said that young couples today " seem to think that the nation should provide them with a house fully equipped for the fruition of their natural instincts," and called on the Government to " stop this dreadful subsidized housing racket and sponging on the community."

Mr William Deedes (Parliamentary Secretary, Ministry of Housing and Local Government) replied in the absence of the Minister, Mr. Sandys, who was ill After pointing out that talks on subsidies were being resumed in the immediate future, he said · " We accept that the total burden of housing subsidies is too heavy and may be reduced without hardship. Rents charged should be more closely related to the current level of wages and the value of money The best way of achieving that is by some form of differential rents. It is the job of the Ministry to determine the course and then leave it to the local authorities to implement it in detail."

As regards Mr Hayton's resolution, Mr Deedes said that the Government were starting a comprehensive review of local government finance, which was essential before they could legislate for reform.

Education. With only six dissenting votes, the conference adopted a resolution (moved by Mr R J. Fulford, Conservative and Unionist Teachers' Association) congratulating the Government and the Minister of Education (Sir David Eccles) on their record of progress, but calling for immediate steps to fulfil the declared policy of expanding technical education Mr Fulford doubted whether the Conservative Party was as keen about technical education as it should be, and stressed the need for sufficient talent in the rising generation to meet the requirements of the atomic age.

Miss Primrose Hockey (of the same Association) also accused the party of lacking sufficient interest in educational matters, declaring in this connexion : " The Butler Act of 1944 said we would give secondary education to every child with the ability Yet there are thousands of children denied it. In our election manifesto we said we would build more technological schools and colleges, yet nothing has been done Our opponents are far more interested in this problem than we are "

Sir David Eccles, in reply, pointed out that investment in technical education had increased from £4,500,000 in 1954 to £7,000,000 in the present year, and would rise to £9,000,000 in 1956 Moreover, the Government were increasing grammar school places and had asked the local authorities to bring the proportion up to between 15 and 25 per cent, " with preference for the 25 per cent " In addition, they must do all they could to make the secondary modern school "a really interesting alternative," and to raise that kind of secondary school in the estimation of the public After recalling that Mr Butler had declared that the Government would continue to give high priority to education, Sir David emphasized that the programme of education expansion already announced would mean that education estimates would rise , this decision placed a great responsibility, both upon himself (the Minister) and local education authorities not to waste a penny, and for this reason " attractive but not strictly necessary improvement " must wait " The great thing," Sir David added, " is that we are still going to expand. It is a remarkable decision at this time "

Commonwealth and Empire Policy. The conference unanimously adopted a resolution (moved by Mr Peter Walker, Dartford) which (*a*) urged the Government to embark upon " a bolder and more imaginative policy of strengthening our economic and traditional ties with the Commonwealth and Empire," and (*b*) called upon Conservative constituency associations to launch " a virile campaign to arouse the interest of the electorate in the Commonwealth and Empire." Speakers in the debate included Mr Norman Cole, M P , who urged greater capital investment in the Commonwealth, and a Nigerian student, Mr. A Adejomo (Leicester Colleges Conservative Association), who called for " a real spirit of partnership and co-operation " between Britain and the Commonwealth

Mr Lennox-Boyd (Colonial Secretary) declared that, in spite of occasional differences of view, there had never been a greater unity of purpose between Britain and the Dominions than at the present time. Problems occasionally arose and could not be ignored—e.g , the import restrictions imposed by Australia and New Zealand (see 14470 A, 14460 C). Nevertheless, however unwelcome those restrictions might be, it was in the general interest of Britain that sterling area countries should rectify their balance of payments. As regards the Colonial Empire, Mr. Lennox-Boyd said that there were naturally " strains, as there are bound to be in any family when people are growing up " ; he emphasized, however, that the Colonial Empire was " not breaking up but growing up."

Electoral Reform. Two resolutions were presented on this subject : (1) a resolution by Mr F T. Nicholson (S.W. Norfolk) urging the Government " to repeal Section 88 of the Representation of the People Act, 1949, which limits the number of cars used to take voters to and from the poll " , (2) a resolution by Miss M. E. Clayton (East Leeds) asking the Government to consider extending the postal vote to people away from home " on legitimate business in a recognized voluntary, professional, or religious organization " Mr. Nicholson described the 1949 Act as " out-dated, ill-conceived, and obsolescent," and alleged that it had been widely abused at the general election.

Major Lloyd-George (the Home Secretary) agreed that a strong case could be made out for repealing Section 88 of the 1949 Act, the effect of which was undoubtedly to make voting more difficult for the elderly, the infirm, and those in scattered rural areas. They must consider, however, whether the great controversy that would be aroused would not be out of proportion to the usefulness of repealing the Section. The middle course would be to allow the restriction to remain in force in substance and to relax it where it caused most hardship.

On the second resolution he said that, broadly speaking, the present law restricted postal voting to people prevented, through circumstances over which they had no control, from going to the poll This was a logical restriction, and if one went beyond it, and allowed postal voting in circumstances of the voter's own choosing, it would be almost impossible to know where to stop.

Mr Nicholson's resolution was adopted by a considerable majority, whilst Miss Clayton's resolution was defeated

Nationalized Industries. With four dissenting votes, the conference adopted a resolution (moved by Mrs G Openshaw, Bournemouth) which (*a*) viewed " with anxiety " the present state of some of the nationalized industries, and (*b*) expressed " concern at the decreasing level of coal production with ever-rising prices " Criticizing the state of the railways in particular, Mrs Openshaw said that the country should be ashamed of its stations, that trains were often dirty, and that meals were expensive and often unappetising

Mr Geoffrey Lloyd (Minister of Fuel and Power) said that the coal industry was perhaps the most important and the most difficult of the nationalized industries ; in the coal industry they were dealing not only with a difficult economic problem, but with one which had been " twisted in the bitterness of political controversies." The complaint that had been made for years past about the shortages and the quality of coal had done more to discredit nationalization than any other factor Though there was much to put right, they had to carry the miners with them if they were to secure the results required. The Government had therefore acted in a way which showed their sincerity to help the coal industry, and not to " play any political monkey tricks with it." After referring to the report and recommendations of the Fleck Committee (see 14115 A), Mr Lloyd declared that the Government's present task was " to help the new Coal Board get on with the job "

Pensions. The conference accepted a resolution by Mr K J. Holloway (Bath) urging the Chancellor of the Exchequer (*a*) to implement at an early date the policy of increasing aid to old-age pensioners, and (*b*) to afford some relief to persons living on small fixed incomes It also adopted an amendment by General Sir Frank Messervy (Wokingham), incorporated in the main resolution, asking the Government to honour its undertaking to officers who had retired under the 1919 Royal Warrant, and to improve the conditions of other officers receiving obsolete rates of retired pay

Powers of Tribunals. Against the advice of the Attorney-General (Sir Reginald Manningham-Buller), the conference adopted a resolution by Dr. A. H Russell (Louth) deploring " the arbitrary and far-reaching power of administrative tribunals " and urging the Government to review the functions and powers of such tribunals " to conform to the accepted and ancient legal rights of the citizen "

The Attorney-General thought it would be unwise and foolish to condemn all tribunals, many of which were working excellently. The Conservative manifesto had said that a strong advisory committee would attend to the problems of administrative law, and an announcement to this effect had been made in the Queen's Speech. He therefore suggested that the resolution should be withdrawn, but Dr. Russell declined to withdraw it and the resolution was carried by a large majority

Other Resolutions. The conference also adopted resolutions which (1) called upon the Government to tackle " with vigour " the evils of monopolistic and restrictive practices on both sides of industry (sponsor—Mr D W P Collins, Wimbledon) , (2) urged the Government to expedite the repayment of post-war credits as soon as the country's financial position permitted (sponsor—Mr. Geoffrey Hirst, M P.) ; and (3) called upon the Government to provide greater stability for the horticultural industry (sponsor—Mr. C. J. M. Alport, M P)

The Prime Minister's Speech.

Sir Anthony Eden, speaking at the end of the conference on Oct. 8, reviewed domestic and foreign policy and, in particular, the Government's defence policy. He announced in this connexion (*a*) that the call-up age would be raised to 18 years five months in 1955 and to 19 years in 1956, resulting in a gradual reduction in the strength of the forces from 800,000 to 700,000 ; (*b*) that part-time service would be reduced from 60 days and three camps to a maximum of 20 days and one camp for most National Service men ; (*c*) that the Minister of Defence would have greater powers to direct general policy and co-ordinate

training and planning; and (*d*) that a full-time Commander-in-Chief, Home Forces, would be appointed. He stressed, however, that there could be no immediate cut in the present (two-year) period of service.

The Prime Minister spoke as follows (cross-headings inserted):

The General Election. "About the general election I have only a few words to say. First, that the decision to hold it was not an easy one. Apart from weighty national arguments, I was conscious of two hoodoos: that no Government in the history of this country had ever increased its majority since universal franchise had come into force, and that the summer was, from our point of view, a bad time for an election. As against this, I felt, and still feel, that we had a message to give the country to which the electors would respond. . . . We described to them what we had done, what the difficulties were, and what we proposed to do, and they have given us a mandate to get on with the job. Yet, despite our faith, despite the fervour of our voluntary supporters, despite the hard work of each one of you, the results of the general election could not have been won without the loyalty and spirit of our organization, presided over by the penetrating and avuncular genius of Lord Woolton. . . .

Economic Problems. Our first task at home is to do battle with our economic problems. These are formidable, but they have been worse. They can be solved if we take the necessary measures now. This is precisely what we propose to do. The action which our wise and experienced Chancellor took last February and again in July has had its effect.

In this connexion I have just received the provisional trade figures for September. Imports are £304 million, exports £243 million, and re-exports £11 million. The trade gap for September was therefore £50 million, compared with £68 million in August and £108 million in July. The September gap is actually about the same as the average monthly gap last year. The exports of £243 million for September bring the total figure of exports for the first nine months of this year to the formidable total of £2,123 million, nearly six per cent above the first nine months of last year.

These results are encouraging. They show that the action which we have already taken has been right. But we cannot be sure that this alone will be enough. Nor is this a business where any doubt can be allowed to creep in. Therefore we must do more in the way of corrective measures. We have been examining all this during the last weeks, and our plans are now ready. I cannot tell you today what additional measures we propose to take. That statement will be made as soon as Parliament meets.

There is another consideration. If our efforts are to be effective, many departments of State will have a part to play. This will be a combined operation. I think it important that the same team of Ministers should handle unchanged the essential work we have to do in the coming weeks. For this reason I have asked my colleagues to remain at their posts for the present. . . .

Those measures of which I have just spoken must be largely concerned with reducing excessive home demand on our resources But it is just as important to increase the efficiency of our production. We want not only to export enough to pay our way, but also to have a surplus. We want to use it at home, and to get ahead with schemes for development in the Commonwealth and Empire. The Government, however, can only create the conditions. It is industry which must create the wealth. British industry has been doing powerful work. Men and management alike deserve praise for the increase in production which has been won. . . . We should not forget that the greater part of industry has been running with smoothness and good will. As you know, I have personally had talks in the last few months with the leading employers and trade unionists, representative of all sections of industry. Our invaluable Minister of Labour is following up this matter, and we hope that the discussions which are going on will lead to constructive ideas and action.

Industrial Relations. We also welcome the steps which have been taken in the last few months by the T.U.C. in this field of industrial relations. I am particularly anxious to see the growth of what I have often called partnership in industry. I use the word 'partnership' in its widest sense. I include in it joint consultation and the giving of full information to employees about the affairs of the companies in which they work. I also include profit-sharing in a number of forms, particularly when it offers opportunities for employees to hold shares and so acquire a real stake in the enterprise in which they work. I would ask every firm in the country to consider carefully and urgently whether they cannot introduce further measures to promote the sense of partnership of which I speak. In this and other ways I believe that we can over the years bring greater peace throughout industry. At the same time we shall do something more than that. We shall make work a more satisfying part of life, and thereby raise the quality of our free society.

The International Situation. After we had concluded our work at the conference of Heads of Government at Geneva in July, I used these words at the final session · 'If we can continue our work together in the spirit of this meeting, what is hopeful purpose today should become solid performance as events unfold' I see no need to change those words or to modify their emphasis in any way today.

The meeting of the four Heads of Government did not resolve any of the stubborn problems which still confront the world. But it wasn't meant to do so. All that it could do was to chart a course and make it possible for the Foreign Ministers to meet and get to grips with problems which so far we have not been able to discuss across the table with any useful result.

The processes of diplomacy are slow. Behind all this repetition of public and private argument, conciliation may grow and the power of peace prevail. No doubt the discussions this month will be difficult. It is quite possible that after weeks of negotiation they will be adjourned without any progress made. I cannot tell. But of this at least I am certain, that the international anxieties in Europe and the Far East are less immediately acute today than they were when you and I met at Blackpool a year ago. I do not mean that the Great Powers have changed their purposes I do not think they have. But it could be that the knowledge of the weapons which some of them now command is helping to create a feeling of 'maybe we had better go along without trying to get all we want, because to try to get all we want might blow us where we don't want to go.'

I wish I could stop there, but the Middle Eastern situation is serious and could be dangerous. Everyone knows of the tension between Israel and Egypt, and how each country tries to build up its armaments to be stronger than the other. We have worked for a long time past by all manner of methods to try to bring about a reduction of tension in that part of the world. We have also tried to hold the balance even as regards the delivery of armaments. But now, if a Great Power from outside steps in with supplies on an infinitely larger scale, the risks are going to be intensified. That is inevitable. Here is, surely, an occasion where the Great Powers should agree to exercise restraint themselves and to join together to restrain others. That seems to me what the spirit of Geneva should mean.

As I look back over recent years, certain influences have moulded our diplomacy and helped to chart our progress. First, the constant unity of the Commonwealth, which has become a more active influence in world affairs in recent years. The influence of the Commonwealth will always be felt rather than enforced in world affairs But it is, none the less, important for that. Then there is our close partnership with the United States . . Finally, there is the unity of Western Europe, which has grown and found expression in trade, travel, and treaties. . . .

Disarmament and Defence. This afternoon I will only say this. The first aim is to reduce tension at points of contact. In my judgment, European security cannot be based on the division of Germany for an indefinite period. It was with this end in mind that we put forward at Geneva a plan for a Five-Power pact to give confidence and security to all.

Finally, looming before everything there is nuclear warfare and the hydrogen bomb—the bomb which has compelled the nations to talk against a terrifying back-cloth of universal destruction Here, of course, the problem of supervision and control is so important. Many ideas have been canvassed, but I do not think that any one country has found a final solution yet.

Peace in the modern world is closely associated with defence. I have always held that to build up the defensive military strength of the West would improve the international situation And so it has turned out. It was the conclusion of the Paris Agreements, whether some like it or not, that made the Geneva talks possible.

Defence Policy. The Minister of Defence and I, and the Service Ministers, have been examining our long-term plan for the defence forces. These present some pretty baffling problems. We have to take into account our overseas obligations. We have to consider the cost of our programme, and every new weapon with its improved performance, and probably additional gadgets as well, costs more than the weapon before. We have to weigh the demands that defence makes on our resources of manpower and materials We have to be sure that our forces are fitted in size and equipment for their tasks. Our examination of all this vexing business has made good progress since the general election. The Minister of Defence has been tireless in his efforts. I am now reviewing with him our research programme to make sure that our main effort is concentrated at the right places. Last June we transferred from the Ministry of Supply certain functions connected with the iron and steel and engineering industries. It has meant that the Minister can now devote more attention to the provision of military equipment It has also meant that the Ministry of Supply has become mainly a fourth defence department within the co-ordinating powers of the Minister of Defence. This takes us a further step towards our objective, which is to secure a closer integration of our forces and their supply. The Minister of Defence, if he is to do his work effectively, must be able to direct policy over the whole of this field. I am considering what further changes of organization can be made to enable us to handle smoothly and effectively these questions of defence policy.

Reduction in Armed Forces. There is one special matter to which I must refer, and that is the manpower in the Forces. We have made enough progress with our other plans to make it possible for me to say something definite on that topic. At present there are about 800,000 men and women in the Forces, of whom about 280,000 are National Service men. H.M Government have decided that by the end of the financial year 1957-58, the strength of the Services shall be reduced to about 680,000 men and 20,000 women—a reduction of about 100,000 upon the present figure. Over the five years from March, 1953, to March, 1958, it will be a reduction of 170,000, or more than 20 per cent—a very substantial figure by any standard.

The reduction must be gradual. Nothing could be more inefficient or cause more disorganization in the Forces than sudden and violent fluctuations in manpower. The decrease will be about 20,000 in the next six months and about 40,000 in each of the following financial years. We are confident that we can discharge our treaty obligations and maintain our position as a world Power despite this reduction in numbers. The precise extent to which the reduction will affect National Service men will depend on how successful we are in encouraging Regular recruitment . . .

Service Pay and Conditions. The Government are again considering pay and conditions of service for the regular forces. . . . Our decisions will be announced at the time of the Service Estimates at the beginning of the [next financial] year.

The Call-up Age. I have been considering for some time what is the most efficient and fairest method of bringing about the proposed reduction in the burden of National Service. It is a pretty intricate question. I do not believe that a system of selective service or balloting would be acceptable to the people of this country. If that is so—and I am quite sure you agree—the effective choice lies between reducing the period of service and reducing the number of young men called up every year. The difficulty about an immediate reduction in the period of service is that it would inevitably lead to a reduction in the numbers of fully trained men, because the cut would fall upon the most useful period of a man's service. At this moment in the international situation, and having regard to the state of our overseas commitments, this is a reduction for which I am not prepared to be responsible. We have accordingly decided that, for the present, the reduction should be brought about by calling up fewer young men each year.

The age of call-up will rise, the period of service remaining at 24 months. We hold ourselves free, however, to decide, in the light of future developments in the international situation, whether the reduction which we intend to make in the size of the Forces shall continue to be brought about in this way or by reducing the period of service. The option will remain open to us. I thought that was the fairest system we could possibly devise. Accordingly, this year there will be only three registrations instead of the usual four, and the age of call-up for the balance of this year will be about 18 years and five months. Plans are also being made for a reduced call-up next year If the whole of the proposed reduction in the size of the Forces were to be carried out by allowing the age of call-up to rise, the normal age of call-up would reach 19 years. It will still remain possible for men to apply for early call-up when good reasons exist. We realize that we must make sure that those called up are used efficiently. Vigorous steps are being taken to investigate cases where it is alleged that men's time is being wasted.

The Reserve Forces. We have also decided to reduce the burden of part-time service for National Service men. . . . The conception of Reserve forces waiting to take part in large-scale conventional warfare is, in our judgment, out of date In the event of a nuclear war the primary role of the Reserve Army would be to help to maintain the life of the nation and to deal with raids and sabotage. For these purposes we need a different type of training and organization, and it will be introduced The present requirement for part-time training of National Service men is 60 days, including three camps, spread over 3½ years. We consider that this requirement should be reduced to a maximum of 20 days, including one camp. There are, however, two or three categories to whom this will not apply Except for these categories, National Service men who have already done one period of continuous training will not be required to do further training. This decision will apply from Dec. 31 this year. . .

Home Defence. We must think of this question as one problem of home defence, which is a better term than civil defence ; a defence in which both civil and military forces have to take part. I have made certain arrangements to co-ordinate planning and training for this purpose under the Minister of Defence. A full-time Commander-in-Chief, Home Forces, will be appointed in the near future. We shall intensify our research work to find means of reducing the damage caused by nuclear attack .

The National Outlook. I would like, finally, to give you some reflections on our country's future as I see it We are today in an exciting but difficult transition period In this highly competitive modern world our island has always to be in the lead, or our people have no future. At the moment, one of our greatest difficulties is that we are short of an essential raw material, coal. I do not want to blame anyone for this, because the reasons for it are, many of them, complicated and of long standing If we could get 20,000,000 more tons of coal a year, or its equivalent in other fuels, the outlook would be transformed. In time that will happen The new discoveries on which our scientists and engineers are engaged will change the whole pattern of the future for this country and other countries

Meanwhile there is one problem which has been pressed upon me from all sides ; the shortage of young scientists and designers. Unless we can hold our own with the other great nations, Russia and the U S.A in particular, in scientific research and its application in engineering design we shall fall behind in the industrial race At this moment there are not enough young men studying these subjects. If they will come forward, if with their help we can continue to keep abreast of every new development, we shall be ready, whether the new world bursts or creeps upon us. It is for these reasons that I have agreed with the Chancellor of the Exchequer that, whatever the difficulties, balance-of-payments or others, nothing will be cut away from the necessary work in this nuclear sphere or in the training of scientific manpower."

Lord Woolton's Farewell.

Viscount Woolton was given an enthusiastic ovation when he took official farewell as chairman of the Conservative Party Organization at the close of the party conference.

Addressing the conference in a farewell speech, Lord Woolton said that when he became chairman of the party in 1946 the need was not primarily one of building up " a well-oiled machine," but of revitalizing the party's faith in its duty and in its capacity to do its duty. " I knew," he said, " that if we were to gain the responsibility for the government of the country, the party would have to be revitalized as a broad-based democratic party embracing and serving all sections of society, its inspiration the phrase ' Tory democracy.' We have made that phrase into a reality. . . ."

Calling upon the party for redoubled efforts in the future, Lord Woolton declared · " I leave you now because I believe we are at the beginning of a new era, calling for the energy as well as the outlook of younger men. The task ahead for them and for you is thrilling, enthralling, and often exacting. The party has a little more than half the country on its side. The vast trade-union movement, in its devotion to the cause of the artisan classes, still thinks of us with such suspicion that they support the Labour Party, though many of their leaders must know that disaster would follow the full practice of their creed. There is the task for us. . . You have a leader who in his person and outlook symbolizes all that is meant by the new, modern Conservative movement What does this mean ? To me it means a new confidence in this country and the Commonwealth as a force for peace ; a new stream of opportunity with wealth flowing in ever-widening channels ; and, above all, a sense of care and responsibility for the old, the weak, the unfortunate, and for the children. All these things we have started on the road, but the impetus and carry-forward belong to youth and to you."

Mr. Derek Walker-Smith, Q.C., M.P. for Hertford and chairman of the Conservative 1922 Committee, was appointed Parliamentary Secretary to the Board of Trade on Oct. 19 in succession to Mr. Donald Kaberry, M.P., who relinquished the post consequent upon his appointment as vice-chairman of the Conservative Party.—(Times - Daily Telegraph - Sunday Times) **(Prev. rep. Conservative Party, 1954 Conference, 13835 A ; Party Chairmanship, 14439 E.)**

A. RELIGIOUS LIFE. — Church of England. - Increase in Clergy Stipends. - Church Commissioners' Assets and Income, 1954-55.

The Church Commissioners announced on Oct. 20 that it was proposed in April, 1956, to raise the annual sum for allocation to diocesan stipend funds to £1,400,000, thus enabling further increases to be made in many clerical salaries. At the same time the present minimum salary would become permanently guaranteed, and (except in a few special cases) no incumbent would receive less than £550 a year, together with a free house and his Easter offerings up to £50. Subject to the approval of the Church Assembly, it was also proposed to provide a further £25,000 to cover increases in the stipends of bishops and archdeacons, and a similar amount to cover the stipends of cathedral bodies.

The Archbishop of Canterbury (Dr Fisher), chairman of the Commissioners, explained on the same date that, out of the Commissioners' total income in 1954-55, about £10,000,000 was available for spending after making provision for writing-down capital expenditure, reserves, administrative expenses, etc. Of this sum, £9,750,000 had been set aside for stipends, pensions, and maintenance of parsonage houses, and the remaining £250,000 for church buildings in new housing areas. He added that the Commissioners' eventual aim was a minimum stipend of £750 for incumbents, together with a rent-free house, but that this could only be achieved by the laity, with such help as the Commissioners could give.

The Commissioners' accounts for the financial year ended March 31, 1955, showed that gross income from all sources totalled £10,529,490, compared with £9,053,847 in 1953-54. Income from Stock Exchange investments amounted to £6,507,626 (against £5,672,266 in 1953-54) and net income from real estate to £2,594,747 (£2,232,606). During the year the Commissioners bought 31 large commercial properties in London and the provinces at a cost of £4,591,053, and it was estimated that the reinvestment policy recently adopted had resulted during the year in increased income of £1,018,480

Sir Malcolm Trustram Eve, Q.C., First Church Estates Commissioner, stated on Oct. 20 that the value of the Commissioners' land, farms, buildings, mortgages, and tithes was about £90,000,000. The value of their Government and public stock was £95,000,000, and that of their industrial and commercial equity shares about £50,000,000 at cost.

On Oct. 27 the Church Commissioners announced that, as part of their policy of reorganization to produce a higher income, they had decided to sell part of their " Paddington estate," consisting of about 650 residential, shop, and office properties near Paddington station. The announcement added that outlying parts of the estate sold by the Commissioners earlier in the year had realized over £1,000,000, and it was hoped that the present properties—the largest single block ever sold by the Commissioners—would realize a similar figure. (Church Times) **(Prev. rep. Stipends, Increases, 12816 A ; Church Finances, 11700 B.)**

B. GREECE. — Further Cabinet Appointments.

The membership of the new Greek Cabinet formed by M. Karamanlis was completed on Oct. 15 with the appointment of M. Levandis as Minister of Welfare, M. Vassilikos as Minister of Industry, and M. Babacos as Minister for Northern Greece. (Times) **(Prev. rep. Greek Cabinet, 14467 A.)**

OCTOBER 29—NOVEMBER 5, 1955

A. SAAR TERRITORY. — The Saar Referendum. - Rejection of Statute for "Europeanization" of the Saar. - Electoral Campaign by Pro-German Parties. - Repercussions in France and Germany. - Adenauer-Faure Discussions in Luxemburg. - Resignation of Herr Hoffmann. - Dr. Welsch appointed Saar Premier. - Forthcoming General Elections.

The Statute for the proposed "Europeanization" of the Saar, which had been signed on Oct. 23, 1954, by Dr. Adenauer and M. Mendès-France (see 13845 A), was rejected by the Saarlanders in a referendum held on Oct. 23, 1955—i.e., exactly one year after the signing of the Statute. The electorate, numbering about 670,000 (of whom 53 per cent were women) out of the total Saar population of 960,000, were asked to reply "yes" or "no" to the question: "Do you approve the European Statute for the Saar agreed on by the Federal German and French Governments on Oct. 23, 1954, with the assent of the Saar Government?" The number of "no" votes was 423,434 and the number of "yes" votes 201,973, the Statute therefore being rejected by a majority of more than two to one.

The referendum was carried out under the supervision of the International Commission for the Saar, whose headquarters were at Saarbrucken, with the assistance of 1,005 observers (including many mayors, lawyers, and government officials) drawn from all the member-countries of the Western European Union except France and the German Federal Republic. The two latter countries, as interested parties, took no part in the supervisory arrangements. Of the 1,005 observers, 345 came from Luxemburg, 325 from the Netherlands, 165 from Belgium, 120 from Italy, and 50 from Britain. A British national (Colonel William Urton, Conservative Central Office agent for the London area) acted as head of the neutral observer teams, general control being exercised by the International Commission. Neutral observers were present at all the 929 polling stations in the Saar to ensure that the elections were carried out fairly and in an orderly manner, and that there was no intimidation, fraudulent voting, etc. As a precautionary measure, and with the co-operation of the French, Federal German, and Luxemburg Governments, the frontiers of the Saar were "sealed" from mid-day on Oct. 22 until 6 a.m. on Oct. 24, on the instructions of the International Commission; the only persons allowed to enter the Saar during this period were qualified voters from outside, diplomats, NATO troops, and members of the Commission. The voting took place in an atmosphere of complete calm and order, no incidents occurring at any of the polling stations.

The categories of persons entitled to vote in the Saar referendum, the principles on which the referendum would be conducted, and the powers and duties of the International Commission, had been defined on May 13 by the Council of the Western European Union (see 14288 A). The International Commission, as originally constituted, consisted of Senator Dehousse (Belgium), as chairman, Sir George Rendel (Britain), Baron Bentinck (Netherlands), Signor de Paolis (Italy) and M. Kunnen (Luxemburg) (see 14288 A). On Sept. 27, however, it was announced that Sir George Rendel would be unable to continue his duties owing to ill-health, and that he had been succeeded by Sir John Troutbeck as British representative.

Sir John Troutbeck was Ambassador in Baghdad from 1951 to 1954, and had previously been head of the British Middle East Office in Cairo.

Legislative measures regulating the conditions under which the referendum would be held, in accordance with the provisions of the Saar Statute, had been promulgated by the Saar Government on July 23 after approval by the Saar *Landtag*. They had been approved by the Council of the Western European Union meeting at ministerial level in Paris on July 15, and at a further meeting on July 22 the Council decided that the date of promulgation would mark the beginning of the three-month period preparatory to the referendum. During this period the Saar was the scene of a vigorous electoral campaign in which intensive propaganda was waged both for and against the Statute.

On the one hand, the Saar Statute—involving the "Europeanization" of the Saar, its continued detachment from Germany, at least pending the conclusion of a peace treaty, and the maintenance of the economic union with France—was supported by the Christian People's Party and the Saar Socialist Party, headed respectively by Herr Johannes Hoffmann (the Saar Premier) and Dr. Peter Zimmer. They pointed to the advantages of maintaining the present economic union with France, and stressed that the "Europeanization" of the Saar would constitute an important stage in fostering European unity and promoting Franco-German understanding.

On the other hand, the Statute was strongly opposed by three new pro-German parties, corresponding to the three principal parties in the Federal Republic, which were formed in the Saar shortly after the above-mentioned legislation had been promulgated. These three parties were the Christian Democratic Party (the largest of them, and commanding strong support from the predominantly Roman Catholic population of the Saar), headed by Dr. Hubert Ney and corresponding to the Christian Democratic Union in Western Germany; the Saar Democratic Party, headed by Dr. Heinrich Schneider and corresponding to the Free Democrats (Liberals) in the Federal Republic; and the Saar Social Democratic Party, headed by Herr Kurt Conrad (a trade union official) and corresponding to the German Social Democratic Party.

Grouped as a *Heimatbund* (Homeland League), the three parties conducted a vigorous campaign for the reunion of the Saar with Germany, maintaining that rejection of the Statute would be tantamount to a vote in favour of reunion. The Saar Communist Party also opposed the Statute and supported the Saar's reunification with Germany.

The electoral campaign, and its repercussions on Franco-German relations, are described below under cross-headings:

Preparations for the Referendum. Four Bills regulating the conditions for holding the referendum, and incorporating certain amendments made by the International Commission for the Saar, were approved by the Saar *Landtag* on July 8 with only three dissenting votes (the Communist deputies), and, as stated above, were promulgated on July 23, after approval by the Council of the W.E.U. They covered, *inter alia*, the formation of political parties, Press and propaganda activities, and the holding of meetings, in conformity with the principles laid down by the Council of the W.E.U. With the promulgation of these laws, and the official entry into force of the three-month "pre-referendum" period, the former ban on the formation of pro-German parties came to an end, and parties were free to organize themselves and to campaign either for or against the Saar Statute. An immediate result was the formation of the above-mentioned three pro-German parties in the Saar

In a statement issued on July 15, the International Commission declared that it would carry out its task in accordance with three guiding principles: (1) "the protection of the Saar population, which is entitled to tranquility and peace"; (2) a fair referendum which would truly reflect the will of the population; (3) a desire, within the limits of its terms of reference, to help towards the establishment of good relations between France and Germany.

Memorandum by the Federal German Government. The Federal German Government presented a memorandum to the International Commission on July 21 which, although agreeing that the conditions for the holding of the referendum "contain important elements guaranteeing that the referendum will be held in a satisfactory manner," raised certain doubts and objections. The memorandum said in this connexion: "They [the Federal Government] feel bound to say that on examining the laws passed by the Saar *Landtag*, they have noted a number of points which give rise to some anxiety The provisions of the Saar laws differ considerably from those of corresponding legislation in other Western European countries; in particular, the laws relating to associations and to the Press confer on the Saar authorities wide powers, defined in very general terms, enabling them to take drastic measures of a preventive nature affecting freedom of political action and the formation of public opinion in the Saar. The Federal Government attach great importance to this matter, mainly for psychological reasons. In their view, neither legislation nor practice in the Saar have up to the present given due recognition to the need of allowing complete freedom for the formation of political opinion, as is the case in the Western world. . . . The people of the Saar will only regard the result of the referendum as intrinsically valid if they believe it reflects the freely expressed will of the population. . . . It is essential to avoid anything which might justify an allegation of unfair conduct of the referendum."

The Electoral Campaign. The leaders of the pro-German parties, Dr. Ney and Dr. Schneider in particular, conducted an intensive campaign for the rejection of the Saar Statute and the reunion of the Saar with Germany, their meetings commanding considerably bigger and more enthusiastic attendances than those of Herr Hoffmann and Dr. Zimmer, the leaders of the pro-Statute parties At many of the meetings and demonstrations held by the three pro-German parties the audiences sang *Deutschland über alles* (the German national anthem) and the song *Deutsch ist die Saar* ("The Saar is German"), which had been composed under the Nazi regime for the plebiscite of 1935. In addition, hostile demonstrations against the Saar Government, and against Herr Hoffmann personally, occurred, and violent incidents, resulting in intervention by the International Commission, took place when pro-German demonstrations tried to break up meetings of the pro-Statute parties, especially those addressed by Herr Hoffmann

[Dr. Schneider, a lawyer and former Nazi storm-trooper, joined the Nazi Party in 1930 but was expelled in 1937 after having held the post of head of the Saar Department in the German Foreign Office. He held a minor clerical post during the war and was denazified in 1949, thereafter resuming his legal practice in Saarbrucken. Dr. Schneider himself, though admitting that he had joined the Nazi Party in its early days, stressed that he had withdrawn from the party in 1934, three years before his expulsion.]

Twelve demonstrators and seven Saar policemen were injured on Aug. 17 at Neunkirchen when some thousands of pro-German demonstrators, mainly youths and young men, attempted to break up a meeting which was being addressed by Herr Hoffman; the demonstrators used iron railings, stones, etc., against the police, who in turn were obliged to use truncheons and tear-gas to restore order. A further incident occurred on the following day at St. Ingbert, when a hostile crowd of over 5,000 attempted to break into another meeting addressed by Herr Hoffmann, the police were again called in to restore order, and eventually dispersed the demonstrators with fire-hoses.

As a result of these incidents, the chairman of the International Commission (Senator Dehousse) called a meeting at Saarbrucken on Aug. 19 which was attended by the leaders of all the Saar political parties, both pro-Statute and anti-Statute. To guard against future incidents, M. Dehousse put forward two proposals (1) that the opposing groups should agree to hold joint meetings at which the various points of view would be put forward by a spokesman of one side and answered by a spokesman of the other side, and (2) that there should be a political truce for a week or a fortnight. Objections to these proposals were raised by both sides, and no definite action was taken. Nevertheless, as a result of appeals by all parties for the maintenance of calm and order, no further incidents occurred from Aug. 20 onwards, and the electoral campaign was conducted in a relatively calm atmosphere from that date until polling day on Oct 23

On Aug. 5 the International Commission had sent a message to the West German Foreign Minister, Dr. von Brentano, pointing out that "serious difficulties" would arise if the Christian Democratic Party in the Federal Republic sent representatives to attend the foundation meeting of the parallel party in the Saar on Aug 7. to which they had been invited It was pointed out that the Franco-German agreement on the Saar specifically forbade any intervention from outside which might influence Saar political opinion. As a result, Dr. von Brentano informed the Commission that the Christian Democrats would not send any representatives to the "foundation meeting" in Saarbrucken.

Complaints had earlier been lodged with the Commission that three prominent members of the Social Democratic Party in the Federal Republic—Herr Mellies, Herr Wehner, and Dr. Mommer—had attended the "foundation meeting" of the Saar Democratic Party at Sulzbach, near Dudweiler.

Repercussions in Western Germany. As stated above, the three pro-German parties in the Saar were, in effect, the counterparts of the similar parties in the Federal Republic The situation, however, was complicated by the fact that whilst the Social Democrats and the Free Democrats in Western Germany, equally with those in the Saar, were opposed to the Saar Statute, the Christian Democratic Party in the Federal Republic had approved the Statute, whereas the parallel party in the Saar was opposed to it.

The West German Christian Democratic Party issued a statement on Aug. 26, with Dr. Adenauer's approval, regretting the way in which the referendum campaign was being conducted in the Saar, and declaring that the question of accepting or rejecting the Saar Statute had become submerged in arguments for or against the present Government headed by Herr Hoffmann—a matter which, it was stated, should properly be settled in the *Landtag* elections to be held after the referendum Reiterating the party's support for the Saar Statute, the statement recalled that Dr. Adenauer had already explained to the *Bundestag* that he had agreed to the Statute as a way of restoring political freedom to the Saarlanders and of giving them the chance of choosing the Government they desired. The statement strongly denied allegations by the anti-Statute parties in the Saar that Dr. Adenauer had accepted the Statute "under pressure," and quoted the Chancellor's own denial before the party executive and before the *Bundestag*.

Dr. Adenauer himself, in a speech at Bochum on Sept. 2, expressed the hope that the Saarlanders would accept the Saar Statute and would subsequently reject the Hoffmann Government at the *Landtag* elections which would follow the referendum. He explained that he understood the desire of the Saarlanders to oust the present Saar Government, but maintained that the correct order of events should be, firstly, acceptance of the Saar Statute, and secondly, the holding of elections at which the Saarlanders would be free to choose their Government. The Chancellor's speech was strongly criticized both by Dr. Dehler and by Herr Ollenhauer (the respective leaders of the Free Democrats and the Social Democrats) as an attack on the pro-German parties in the Saar

In spite of Dr Adenauer's appeal, the leaders of the Christian Democratic, Social Democratic, and Free Democratic parties in the Saar announced on Sept. 3-4 that they would maintain their opposition to the Statute, and at the same time announced the formation of the *Heimatbund*, with the following aims. "To remain faithful to the German fatherland, to defend German culture in the Saar, to oppose any falsification of the popular will, and to further Franco-German understanding in the spirit of truthfulness through a just solution of the Saar question."

Subsequently some 600 delegates of the Saar Christian Democratic Party, meeting in Saarbrücken on Sept. 18, unanimously adopted a resolution reiterating their opposition to the Saar Statute and expressing full confidence in Dr. Ney, the party leader.

Dr. Ney gave an interview on the same day to a correspondent of the *Manchester Guardian* in which he denied that the pro-German movement in the Saar was in any way nationalist, or directed against the interests of France. "We are perfectly ready," he said, "to take France's economic needs into account. By all means let France have the Saar coal she requires, and let her pay for it with francs or, if she wishes, with foodstuffs from Alsace-Lorraine. . . . But even more important to us is our determination not to be separated from Germany politically"

Three West German parties—the Social Democrats, the Free Democrats, and the Refugee Party—issued a joint statement on Oct. 14 asking the Federal Government to take measures to ensure the reunification of the Saar with the Federal Republic The suggested measures—based on two considerations, (*a*) that the Saarlanders were Germans and desired to remain in Germany, and (*b*) that the Saar was legally a part of Germany within her 1937 frontiers—were as follows.

(1) Reduction of the duties on Saar goods imported into the Federal Republic

(2) Improvement of rail and road communications between the Saar and Germany

(3) Encouragement of Saarlanders to attend youth, trade union, cultural, and sports meetings of all kinds in Germany.

(4) The formation by the Federal Ministry of All-German Affairs of a Saar Council to investigate all problems connected with the reunion of the Saar with Germany.

(5) The implementation of a previously prepared economic plan for the Saar as soon as the territory was reunited with Germany. Its main purpose would be to modernize and rationalize the Saar's industries in order to bring them up to the same standards as those of the Federal Republic

(6) The raising of social benefits in the Saar to the same level as those in the West German *Länder*.

(7) An assurance that Saarlanders would be allowed to express their desire to return to Germany, and that no-one would be penalized in any way because of his attitude towards reunification.

Ten days earlier (Oct. 4) the leaders of the three pro-German parties in the Saar had visited Bonn to exchange views with representatives of the Federal Government. In a press conference, at which Dr Schneider acted as spokesman, they pointed out that any intervention in the electoral campaign, from whatever quarter it might come, would be contrary to the provisions of the Saar Statute and would "falsify" the results of the referendum. [The statement was issued on the eve of a meeting between Dr. Adenauer and M Faure, the French Prime Minister, which was held in Luxemburg on the following day—see below.] Dr. Schneider emphasized that all the pro-German parties had obeyed the regulations laid down for the conduct of the referendum, and that none of them had been rebuked by the International Commission.

Repercussions in France. - Faure-Adenauer Discussions. M Faure and Dr. Adenauer, accompanied respectively by M. Pinay (the French Foreign Minister) and Dr. Hallstein (State Secretary for Foreign Affairs in the West German Government), had a meeting in Luxemburg on Oct 5 at which the Saar and other European questions were discussed. The following joint communiqué was issued:

"The Federal Chancellor and the French Prime Minister . . . had an exchange of views which showed their opinions to be in full agreement. . . . The two Governments reaffirmed their wish to continue along the path of Franco-German co-operation in the European framework They expressed anew their conviction that the unification, peace, and welfare of Europe can be assured only by building up European institutions and by a sincere understanding between Germany and France. They made known their resolve to do everything to contribute to such a policy.

"Bearing in mind that the agreement on the Statute for the Saar is a component part of such a policy, they agreed that the details of the Statute, which will require to be worked out in consultation with the Saar population after it has accepted the Statute, must guarantee the full maintenance of the material and spiritual interests, character, and affinities of the Saar population. They recognized similarly that after acceptance of the Statute political freedoms must continue to remain in force as laid down in Article 6 of the Statute and in the decisions of the Western European Union Finally, they declared themselves ready to begin in February the tripartite negotiations envisaged in Art 12 of the agreement of Oct. 23, 1954."

[Art. 12 of the Saar agreement, while providing that the principles of the economic union of the Saar with France should be incorporated in an agreement between the Saar and France, also laid down that there should be progressively closer economic relations between the Saar and the German Federal Republic. Such relations would be "similar to those existing between France and the Saar," though they were not to endanger the currency union with France. Tripartite agreements—to which France, Germany and the Saar would be parties—were to be concluded to apply those principles.]

M. Pinay issued the following statement after the Luxemburg meeting "In answer to tendentious reports, the French Government wishes to make it clear that it has never lost sight of the fact that the final status of the Saar must have the approval of the Saar population. If at the peace conference France supports the continuation of the Saar Statute, which in her view is the best solution from a European point of view, she knows that this will be permanent only if the Statute has worked satisfactorily and has obtained the free consent of the Saar population. France in no way intends to exert pressure on the free decision of the Saar population by delaying the peace treaty."

A further statement on the French Government's policy *vis-à-vis* the Saar was made on Oct. 20 by M. Pinay to the Foreign Affairs Commission of the French National Assembly, in the form of the following six-point declaration:

"(1) As was recalled in the Luxemburg communiqué, the agreement of Oct. 23, 1954, constitutes an essential element in the policy of Franco-German co-operation and European reconstruction. . . This is really what is at stake in the vote of Oct. 23, 1955. It does not imply any choice between France and Germany, but involves a choice between co-operation and disunity.

(2) Thanks to the European Statute, the Saarlanders will be united instead of divided, and will thus be called on to play a decisive role in the reinforcement of the Western community. They will go to the poll in freedom, just as they will go in freedom to decide their future at the second referendum [i e. for the election of a new *Landtag*] The French Government, convinced of the need for a European solution, will never bring any kind of pressure to bear upon the free decision of the Saarlanders.

(3) On Oct 23 the Saarlanders will choose between a European solution and the maintenance of the *status quo*. The French Government formally denies allegations that an alternative solution might be envisaged The situation created by the rejection of an agreement arrived at after five years' effort, and approved by the Parliaments of the two countries, would make it impossible for any Government or Parliament to reopen negotiations.

(4) Negotiations to extend the economic relationship between the Saar and the Federal Republic will open in February, 1956, as foreseen in the agreement of October, 1954.

(5) That agreement entrusts to a European Commissioner the responsibility for deciding how the Saar shall contribute to common defence within the framework of Western European unity. It is thus untrue to say that it will be possible to enlist Saarlanders in the French Army, and absurd to claim that they could be sent to North Africa. [This assertion had been made during the electoral campaign by pro-German speakers]

(6) The agreement of October, 1954, opens up bigger prospects of development to the Saar. In Luxemburg the German and French Governments committed themselves to work in the spirit of co-operation and *rapprochement* between the two peoples. The application of the Statute must pay great attention to the character and affinities of the Saar population, and secure for it the advantages and essential achievements from which it now benefits. . . . The European Statute of the Saar opens the door to the future"

Defections from Saar Government and Christian People's Party. The position of Herr Hoffmann's Government was weakened a few days before the referendum by the withdrawal from the Christian People's Party (announced on Oct. 19) of four leading officials: Herr Gotthard Lorscheider, head of the Saar Government's Foreign Affairs Department; Dr Schutz, State Commissioner for Reconstruction and *Landrat* of St Wendel; and Herr Linicus and Dr. Dierkes, the respective *Landräte* of Merzig and Ottweiler. [A *Landrat* has roughly the same duties as a Prefect of a French *département*, acting as head of the local district administration.] No official reasons were given for the resignations.

Professor Paul Senf, the Saar Minister of Finance and also a leading member of the Christian People's Party, had resigned from the Government on Sept. 7 and in subsequent weeks appeared on the platform of the pro-German parties. The organ of the Saar Christian Democratic Party stated that Dr. Senf had resigned because he regarded the resignation of the Government, the dissolution of the *Landtag*, and the holding of new elections as essential preconditions for the holding of the referendum.

Post-Referendum Developments.

The following statement was issued by the Federal German Government on Oct. 24 after the result of the Saar referendum had been announced:

"With the consent of their Parliaments, the Governments of the French Republic and the German Federal Republic agreed to submit the Saar Statute worked out by them to a free, uninfluenced vote of the people of the Saar. The people of the Saar have expressed themselves by a large majority against the Statute. Thereby the problem is posed afresh of finding a solution which takes into account the will of the people of the Saar, expressed in the result of the referendum, and which serves German-French co-operation and the goal of the European community."

Dr. Adenauer sent a message to M. Faure on the same day reiterating his conviction, as expressed at the Luxemburg meeting, "that the outcome of the referendum should not and will not prejudice the good relations between our two countries." He added: "Knowing that both our Governments sought a settlement in the spirit of European solidarity and have loyally observed their obligations, I am certain that in the future, too, they will go the way of harmony and friendship." M. Faure replied: "Like you, I am convinced that the results of the Saar referendum cannot divert our two Governments from the path they have taken. The new difficulties in our way make our task harder. They will not, however, weaken our common will to serve the cause of Europe and of understanding between our two peoples."

The result of the referendum was enthusiastically welcomed in Western Germany by the Social Democrats, the Free Democrats, the Refugee Party, and the German Party, and by the West German Press generally. Herr Kaiser, the Federal Minister for All-German Affairs, sent a telegram of congratulation to the Saar Christian Democratic Party and demanded the resignation of Herr Hoffmann; Herr Blücher (Free Democrat), the Federal Vice-Chancellor, declared that he "thoroughly approved" the decision taken by the Saarlanders; whilst Dr. Dehler, the leader of the Free Democrats, said that he had "seldom been more delighted by a piece of news," and that the Saarlanders had "said 'no' to the Statute but 'yes' to Germany and Europe." Herr Ollenhauer, the leader of the Social Democrats, similarly expressed his pleasure at the result, declaring that the Saarlanders had "rejected the hated Hoffmann regime" and "demonstrated their German nationality." The Christian Democrats maintained reticence and issued no official statement.

In France, a statement was issued by the Quai d'Orsay saying that the referendum had "not brought that positive response which seemed to conform with the interests of Europe" It declared, however, that France stood by the ideals of European co-operation, that she was determined to pursue them in spite of all difficulties, and that the new situation could be considered only within the legal framework of existing institutions. Keen disappointment with the result of the referendum was expressed by the French Press, *Le Monde* heading its editorial article "A Rude Awakening." M. François-Poncet, the retiring Ambassador in Bonn (see 14466 C), writing in *Le Figaro*, said that the most serious aspect of the matter was the personality of the leader of the anti-Statute campaign, Dr. Schneider, whom he accused of having "acted in the manner and style of the Third Reich" and of having "shamelessly exploited national sentiment" in an attempt to persuade the Saarlanders that they had to vote either for France or Germany.

Herr Hoffmann, who had been Prime Minister of the Saar since 1952, resigned immediately the result of the referendum was made known. The Saar *Landtag*, meeting on Oct. 29-30, agreed to dissolve itself on Dec. 17 and decided that elections for a new *Landtag* should be held on Dec. 18. At the same time it appointed Dr. Heinrich Welsch, a lawyer and non-party man, as Prime Minister of the Saar on a "caretaker" basis until the elections. At the request of all the Saar parties except the Communists, it was agreed to ask the International Commission to remain in the Saar to ensure that the *Landtag* elections were held in a free and unfettered manner.

The pro-German parties, though not represented in the present *Landtag*, agreed to Dr. Welsch's appointment and to the arrangements for new elections. Although there had been some dispute about the date on which the elections should be held—the pro-German parties urging that they should take place on Dec 4, and the older parties suggesting January, 1956—the compromise date of Dec. 18 was agreed upon through the mediation of Senator Dehousse.

Dr Welsch (65), a Saarlander, was legal adviser to the German military administration in Alsace-Lorraine during the war, and was instrumental in saving M. Robert Schuman (the post-war French Premier and Foreign Minister, and author of the "Schuman Plan") from being sent to a concentration camp His clean war record and integrity were not questioned from any quarter, and after the war he held several Civil Service posts in the Saar administration. In 1951-52 he was Minister of Labour in Herr Hoffmann's Government (in a non-party capacity), and at the time of his appointment to the Premiership was chairman of the State Insurance Board.

Dr. Welsch formed a four-man caretaker Government on Oct. 30 with the following membership: Dr. Heinrich Welsch, Prime Minister, Labour, and Justice; Dr. Paul Schütz, Internal Affairs and Cultural Affairs; Professor Adolf Blind, Finance; and Herr Eugen Huthmacher, Economic Affairs. In a broadcast on taking office, Dr. Welsch promised that a new electoral law would be introduced in preparation for the *Landtag* elections, and pointed out that his administration was of an interim character until the elections took place. He declared that his chief aim would be to bring about internal pacification and compromise, whilst realizing the desires of the population as expressed in the referendum, and emphasized that there would be no victimization of any description.

A. INTERNATIONAL FINANCE CORPORATION. — Articles of Agreement signed by 20 Countries.

The United Kingdom and Canada signed the Articles of Agreement of the International Finance Corporation in Washington on Oct. 26, thus bringing to 20 the number of Governments which have signed to date. India had signed on Oct. 19, the other 17 signatory countries being Chile, Colombia, Costa Rica, Cuba, the Dominican Republic, Ecuador, Greece, Guatemala, Haiti, Honduras, Iceland, Mexico, Nicaragua, Pakistan, Panama, Paraguay, and Peru. A further 29 member-countries of the International Bank have expressed their intention of joining the I.F.C., including the United States, where a Bill authorizing U.S. participation was signed by President Eisenhower early in August, and Australia, where the Federal House of Representatives approved Australian membership on Oct. 27.—(International Bank, Washington) **(Prev. rep. I.F.C., 14168 A; U.K. Participation, 14490 A.)**

A. UNITED KINGDOM. — Supplementary Budget, 1955-56. - Increases in Purchase Tax and Undistributed Profits Tax. - Abolition of "D" Scheme. - Higher Postal Charges. - Cut in Housing Subsidies and Government Building. - Central Control of Local Government Borrowing.

It was announced from 10, Downing Street, on Oct. 19 that the Chancellor of the Exchequer would introduce a supplementary Budget in the House of Commons on Oct. 26, and that his statement would "cover a series of economic measures, some of which are fiscal and will need to be embodied in a Finance Bill." Mr. Butler accordingly introduced his autumn Budget on that date, the principal changes proposed by him being as follows:

Purchase Tax. The existing rates of 25 per cent, 50 per cent, and 75 per cent would be increased, with certain exceptions, by one-fifth to 30, 60, and 90 per cent respectively. Kitchenware, china, and some household goods which had been exempt for some years would become subject to purchase tax at the 30 per cent rate. The changes would apply to goods delivered by registered manufacturers and wholesalers, or imported by unregistered persons, on and after Oct. 27.

"D" Scheme. This scheme, which provided for purchase tax relief on certain articles of clothing, footwear, bedding, textiles, furs, and furniture, would be abolished, but most of the articles affected would become subject to preferential tax rates of 5 and 10 per cent as from Oct. 27.

Profits Tax. The rate of tax on distributed profits would be raised from 22½ per cent to 27½ per cent as from Nov. 1.

Housing Subsidy. The Exchequer subsidy for housing projects of local authorities would be abolished as soon as possible, except where it applied to slum clearance and to rehousing excess population from big cities In the meantime it would be cut substantially.

Loans to Local Authorities. The volume of Government lending to local authorities would in future be checked, to induce them to borrow on their own credit in the stock or mortgage markets and thus to relieve demands on the Exchequer. Local authorities borrowing from the Public Works Loans Board would have to pay rates at the current market level. A Government message was being sent to all local authorities asking them to review at once their capital spending programmes and to keep capital expenditure down to that of 1954-55.

Nationalized Industries. The electricity, gas, and coal industries had agreed to cut or delay certain capital expenditure.

Public Works. Certain Government building projects would be suspended for the time being, but the roads programme would go ahead as announced. There would be no cut in the hospital building programme, but hospital boards would be asked to undertake urgent projects only.

Postal and Telephone Charges. The following increases would come into force on Jan. 1, 1956

Letters, etc. Inland charge would remain at 2½d. up to 2 oz. (95 per cent of all letters are sent at this rate); but, instead of ½d. for the next 2 oz. and 1d. for each additional 2 oz., the charge for each 2 oz. above the first 2 oz would be 1½d.

Printed papers and samples, at present charged at 1½d. for 4 oz and ½d. for each additional 2 oz., would go up to 1½d. for the first 2 oz. and then 1d. for each additional 2 oz. Newspaper rates would remain unchanged

Special charges: The basic express letter charge would be increased from 6d. to 1s., and fees for long-term redirection of mail would also be higher.

Parcels. Inland rates would be as follows (old rates in parentheses): Up to 2 lb., 1s. 3d. (1s 1d); 2 lb - 3 lb, 1s 5d (1s 3d); 3 lb. - 4 lb., 1s. 8d (1s 6d.); 4 lb - 5 lb, 1s 11d. (1s 8d.); 5 lb. - 6 lb., 2s. 1d. (1s. 10d); 6 lb. - 7 lb, 2s 3d. (2s. 0d.), 7 lb - 8 lb., 2s 6d (2s. 1d.); 8 lb. - 11 lb, 2s 8d. (2s. 3d); 11 lb. - 15 lb, 2s. 9d. (2s. 4d). Price charges to the Irish Republic would be increased accordingly.

Telephones. Rental increases would be made varying from £1 a year for London business subscribers to £2 for London residential subscribers and £3 for provincial residential subscribers. There would also be increases for auxiliary lines, extensions, etc Local calls from telephone call-boxes would remain unchanged at 3d, but local calls from subscribers' telephones would be charged at 2d., as against 1½d. hitherto (for up to 5 miles), 4d. instead of 3d. (5 - 7½ miles), 6d. instead of 4½d. (7½ - 12½ miles), and 8d instead of 6d (12½ - 15 miles). Increased charges would be made for alarm calls, reversed charge calls, temporary transfer of calls, etc.

Surtax. (*a*) Measures would be taken to combat "dividend stripping"—a device operated by certain financial concerns under which the liquid reserves of companies (mostly private businesses) are extracted free of surtax by means of selling them to finance houses

(*b*) The relief from surtax allowed to Lloyds Underwriters on profits which they pay into special reserve funds would be increased, subject to certain conditions.

National Savings. The limit of holdings of National Savings Certificates would be raised from £750 to £900.

The Chancellor pointed out that these measures were intended to restrain public and private demand and thus to reinforce still further the Government's credit and monetary policy.

The Chancellor's speech to the House of Commons was as follows (cross-headings inserted):

"I have a variety of measures, including fiscal proposals, to put before the House which the Government judge are essential if the present economic situation is to be tackled thoroughly and effectively. The fact that my speech will include Budgetary measures might lead members to think that things are more difficult than they had imagined. Actually there has been a distinct improvement in the past month. . . . Since the middle of last month, sterling has strengthened and the loss of reserves has been effectively halted, and our current deficit under the European Payments Union has been greatly reduced Moreover, the September trade returns indicate that the gap between our export and import figures has been narrowed, and during 1955 the terms of trade have moved rather in our favour than against us."

Need for a Supplementary Budget. "What, then, have been the causes for our anxiety over this long summer, and why is further action needed now? These are the points I propose to answer Since the last Budget, over six months ago, rumours and speculations arose in July about the future parity of sterling and the margins within which it might move. This was largely due to the discussions in Paris in June on the subject of a European clearing system.

This uncertainty coincided with a second and separate factor the emergence of a significant degree of internal inflation due to wage claims and rising personal incomes, to increased spending on both consumption and investment, and to industrial unrest, in which the effects of the dock strike should not be under-estimated. Altogether there has been shown to be excessive demand for our limited supply of labour and materials. These two influences—rumours and uncertainty, and the emergence of a degree of internal inflation—reacted one on the other, and our reserves suffered some losses.

But a plain statement of our policy towards sterling—and I have nothing to add today to what I said at Istanbul over a month ago [at a meeting of the International Bank and Monetary Fund]—has altogether improved the standing of sterling, in so far as it was threatened by doubts about our exchange policy Some people may therefore be inclined to ask whether we could not wait till the next Budget to take further action against the internal inflationary pressure. This would be a much easier and more comfortable course than taking steps at once. But this Government are determined to restore the balance of the economy without delay so that we may rebuild our reserves and create a firm basis for future forward moves in national policy Thus we shall consolidate sterling's recent recovery and take advantage of the opportunities which world trade offers us.

I am quite clear where my duty lies, namely, that we must take further action, and take it now. We shall be moving in company with the Governments of Australia and New Zealand. These and a number of other countries have been suffering from troubles somewhat similar to our own, and Members will have observed that somewhat similar restraint is being applied in the United States, Western Germany, and Holland"

Dangers of Growing Economic Expansion. "Let us be clear, at the outset, that the problems which we in Britain are facing are not problems caused by a slack or enfeebled economy. We are moving on the tide of a vigorously growing expansion which is outstripping the resources available to maintain its strength Twenty-five years ago John Maynard Keynes said: 'We are suffering not from the rheumatics of old age but from the growing pains of over-rapid changes.' That statement is equally true of our situation today.

In addressing ourselves to the cause and cure of our growing pains, we must reflect that we have not experienced the problems of a free economy for some 17 years, that we have taken on many and varied overseas burdens far greater than some of our main competitors, such as Western Germany, and that we are sustaining, and mean to continue to sustain, a system of social services which is the envy of the world. In view of these three postulates I have made it clear that, in my view, the problems of the British economy demand a dual policy, combining both incentive and restraint.

We need and have needed incentive to secure the maximum expansion of production and employment at home. . . . In the last four years we have what may now be said to be the fullest employment known in our history. We need restraint to enable us to combine internal expansion with external solvency, and to ensure that the demand which results from full employment does not imperil our balance of payments or prevent us from honouring our manifold commitments overseas.

We have had these two considerations in mind during this year. In February, when the first signs of serious strain appeared, we took action by raising the Bank rate to 4½ per cent, and by reimposing a moderate degree of restriction on hire-purchase transactions. Therefore, at the time of the Budget in April, I could point both to the strengthening of sterling and to the improvement in the reserves which had resulted. I warned the House that it would 'naturally take some time for the effects of the Bank rate and of the tightening of credit to make themselves fully felt on our balance of payments.'

With the single and disquieting exception of coal, my confidence in our ability to increase production has been fully justified. So far this year industrial production has been running between 5 and 6 per cent above the corresponding period of last year, thus maintaining the momentum of the expansion of the last two or three years. Our exports have improved, and there is a generally high level of activity and well-being in the country. So much so that some people may find it hard to understand why, with full employment and better rewards, there is any need for remedial action to be taken.

But the truth is that, while the incentive side of our policy has worked to the advantage of the country as a whole, the disciplinary side, in the form of the restriction on credit—of which we had little practical experience in conditions of full employment when the trend of consumption and investment was rising, which was opposite to what happened when I applied it on first taking office—has proved to operate less rapidly than we expected and intended. That was the reason for the further measures which I introduced on July 25.

We cannot be certain as yet how far the various restraints which we have progressively brought into force during the year are exerting, in their totality, their effect on the economy Bank advances are generally gradually falling ; the trade gap is becoming rather smaller , and, as I foretold in the Budget—and my conclusion was correct—there has recently been some slowing down in the rate at which personal consumption has been growing. So my forecasts in the Budget were correct

But I am conscious of too many signs that, before the original pressures have been sufficiently checked, new pressures may develop to reinforce them. Here are some of the indications. The unsatisfied demand for materials and labour, which has been marked throughout the year, persists In spite of new production records, we are faced with a shortage of steel and of other essential materials ; and we are managing to overcome these only by additional imports And these are significant figures : for every individual unemployed, there are now more than two vacancies notified to employment exchanges. The excess of demand is showing itself not only in terms of personal consumption but also in a tempo of new investment which threatens to outstrip the growth of our resources "

Excessive Consumer Expenditure and its Effects. " These are the factors which have caused us to take action. The sum total of consumers' expenditure remains too high The Index of Weekly Wage Rates rose by no less than five points between December and March, when a good many of the large wage claims were settled But the figures now available show that it rose by another three points between March and June, and has since risen again by a further point And new wage claims are now being pressed forward.

At the same time the level of dividend distribution has continued to rise. Reports published by industrial companies in the first nine months of this year show an increase in net dividends of 22 per cent over the corresponding period of 1954 ; on a gross basis, that is before deduction of tax, the increase is about 19½ per cent. The conclusion is inescapable that we must design our policies so that they face up to, and cope with, the danger to the economy—and especially to our competitive power—of a further expansion of incomes and of consumer demand.

In addition to the evidence of continuing expansion in the amount of work actually done on fixed investment, all the indications of future intentions—the increase in the plans approved for new factory construction, and the rising value of orders on hand for machine-tools—point to a gathering momentum of demand in this field, which, taken with an increase of industry's stocks and work in progress, and with the rise in incomes and consumption, is now overloading the economy.

When a productive machine is working at such brimful capacity, it becomes easier not merely to obtain higher money incomes but also to pass on in higher prices the increased costs which result. Both costs and prices have been gradually edging upwards, reflecting the continuing rise in personal incomes This leads to social strains at home ; and abroad it threatens the competitive power of our exports in a world market where prices are becoming increasingly keener. It is significant that the index of our export prices has risen by 3 per cent since the end of last year.

It is difficult to define the trend of exports exactly, because of the interruptions of the dock strikes. So far as we can tell, it is rising at an appreciable rate Our exports to the U.S.A., in particular, will do better this year than they have been doing for a long time past. But it is becoming increasingly clear that home demand and home spending are not only sapping the competitive power of our exports but are also drawing in a larger volume of imports than we can afford.

In the first nine months of this year the excess of our total imports c.i.f. over our total exports has been no less than £676,000,000, as against only £425,000,000 in the same period last year. And although higher prices account for some part of this increase—the Index of Import Prices during this period has been, on average, some 3 per cent higher than over the same period last year—it is an expansion in the volume of imports which is mainly responsible. In volume, imports have been no less than 11 per cent higher in the period from January to September of this year than in the corresponding months of 1954 ; and the strain which they have imposed on our balance of payments has been particularly aggravated by the need to import substantial tonnages of coal. As a result we are faced with too wide a gap in the balance of our visible trade, and with a marked decline in the reserves of gold and dollars

The revised estimate for the overall current balance of the United Kingdom, recently published, shows a surplus for the second half of 1954 of £21,000,000 , and the provisional estimate for the first half of 1955 is £17,000,000. This surplus of £38,000,000 (including aid) for the 12 months ending in June, 1955, is at any rate a surplus, but it is insufficient to enable us to discharge the full range of our commitments and responsibilities overseas.

By Sept. 30 of this year the reserves had fallen to £838,000,000, and during October we have had to pay to the E.P.U. £28,000,000 in respect of our September deficit, which was incurred almost entirely in the first half of that month. On the other hand, on June 30, 1953, the International Monetary Fund still held sterling in excess of our original subscription to the extent of £96,000,000 ; the whole of that excess has now been redeemed. Thus our borrowing rights have increased, and this constitutes a significant reinforcement to our own reserves. In short, we have room in which to make effective our determination to reinforce and maintain sterling ; but we have no room for complacency."

Need for Measures of Restraint. "Now, when world trade is expanding, is the time for the level of our reserves to rise rather than to fall. As far as we can foresee, it would appear that the rest of the sterling area should, with improved commodity prices, do a little better in the months to come. On the other hand, the closest possible examination of our own prospects suggests that results in the U.K. are not likely to show sufficient improvement—though they might show a small improvement—unless we moderate the pull of home demand.

In judging what further measures of domestic restraint are required for this purpose, we must remember that a near balance or a small surplus on our overseas current account is not good enough. It is essential that we should earn a good surplus if we are to honour our manifold commitments overseas while allowing for adverse swings in our balance of payments, and if confidence in sterling is to be maintained

Having watched the recent course of events—the continuing high level of demand, both public and private, the persistent shortage of labour, the renewed pressure for higher wages, and the strain to which our reserves remain subject—I see both reason and need to reinforce the restraints which we have so far applied, in order to give the economy, in good time, the degree of relief which it needs and to strengthen the foundations of our balance of payments.

The methods by which we propose to deal with this problem will be consistent with the Government's economic policy as a whole, as it has developed during the past years. We shall not fall back on physical import cuts, which, so far from correcting inflation, may aggravate it still further and, in any case, can be effective only if they are reinforced by rationing, allocation, and controls Our measures must be of a more general character, consistent with our set policy of freer trade and payments, and designed to moderate the expansion of demand without distorting the natural pattern of growth of a free economy. The measures I shall outline are of this kind

But however firmly and wisely the Government acts, it is only if the Government's measures are recognized by public opinion as being taken in the best interests of the country as a whole that the economy will be restored to full health. It is an illusion to suppose that full employment, price stability, and a healthy balance of payments can be secured by the Government, irrespective of the contributions made, or withheld, by the people. Our plans are, therefore, framed to create the economic climate in which all elements of the community can play their full parts, and so balanced as to command the support of the whole country."

Principles of Restraining Public Expenditure. "I come now to the action which we propose to take. The measures of restraint which were imposed in the earlier months of the year will, of course, be maintained and allowed to develop their full effect. But the progressive operation of credit-policy will now be reinforced by further, and more direct, measures designed to restrain demand in both the public and the private sectors of the economy, and to reduce expenditure on both investment and personal consumption.

I sometimes hear it said that there is one simple solution for all our economic difficulties, namely, to make dramatic reductions in Government current expenditure. Most people who say this are the victims of two fallacies. First, that Government expenditure is making increasing demands upon the nation's resources ; secondly, that vast economies can be made by squeezing administrative costs, without changing the functions of the Government or reducing the scope of any important service

In fact, we have been wielding the knife continuously for four years now ; and during that period we have been much more successful in restraining Government expenditure than is commonly realized Four years ago Government current expenditure was eating up 29 per cent of gross national production. This year we have got it down to 26 per cent. Meanwhile, the squeeze on administrative costs goes on all the time, and it will tighten still more.

But it is not in the administrative cost that the big money lies. It lies in quite a small number of very large and important functions which the Government have to discharge : defence, law and order, social services, national insurance, assistance to agriculture, colonial and foreign services, and so on. When we look at Government expenditure, not in detail but in the large, the question of major changes of policy arises at once, for I emphasize that we are now at a point where major reductions in expenditure can only flow from major policy changes.

Do those who say that Government expenditure could be drastically reduced propose a reversal of policy in education, or a cut in the cost of pensions, or are we to hold up work on the roads ? Perhaps I can answer by saying that in each of these spheres we have to do all we can as it is to meet the imperative needs—in education, of a rising school population ; for the old, of an increased number of retired pensioners ; and for the roads, a programme which I cannot increase, but which is already insufficient to deal with the industrial needs of the country.

Are we, then, to make a big cut in our defence obligations ? The Defence Estimates will be published at the usual time, and they will show that we are carrying out our commitments with the utmost economy consistent with maintaining the efficiency of the Services in a period of revolutionary changes in strategy and equipment. This same criterion of economy and efficiency will have to be applied at the right time to the range of subsidies which fall within the field of the Ministry of Agriculture.

But at present—and I have been over the whole field of Government expenditure very thoroughly—the main possibilities of major economies do not lie in cutting back existing services. They lie in restraining the rate of development, in moderating the capital outlay on the expansion of services over the whole of the field where its cost affects Government finance, whether directly or through grants, loans, or guarantees, and so reducing the increased operating costs to which that expansion inevitably leads. It is in this way that we can best constitute a balanced and considered pattern of economy in public expenditure, such as the country needs."

Cut in Housing Subsidies to Local Authorities. "In the public sector the investment expenditure of the local authorities is a very important element. It represents about a quarter of the total of the nation's investment Ever since the first formulation of full employment policy in 1944 it has been common ground that this area of public investment is of particular significance in the task of keeping the economy on an even keel

By far the largest element is subsidized housing, which represented a capital expenditure of £390,000,000 in 1954 Housebuilding continues at a high rate; and there is no reason to doubt that the total number of houses completed in Great Britain will substantially exceed 300,000 this year, and will, if all goes well, probably be somewhere near that figure in 1956. Thus, in the first five years since the end of 1951, about 1,500,000 houses will have been built, and just under 2,500,000 since the end of the war. Of these, about 2,000,000 are houses built by public authorities for letting.

Nevertheless, local authorities still need to build a very large number of houses, more especially for two purposes. first, to rehouse families now living in slums, and second, to provide homes and industrial facilities in new and expanded towns for the excess population of the large congested cities.

It is against this background that the Government have been examining the problem of housing subsidies. The Minister of Housing and Local Government will tomorrow be announcing the revised rates for future housing subsidies in England and Wales It will be our policy in future to concentrate the subsidy as far as possible on the special purposes to which I have referred—namely, slum clearance and providing new industrial facilities for excess population. Our intention is to abolish the Exchequer housing subsidy for other purposes as soon as possible, and meanwhile to reduce it substantially."

Reduction in Local Authority Borrowing. "As for the other capital expenditure of local authorities, which represents well over £200,000,000 a year, the Government have now decided to reinforce their appeal of last July by a message to all local authorities, asking them not only to observe particular restraint in their current expenditure but also to review their capital expenditure, with the object of ensuring that in the financial year 1956-57 it will not exceed the expenditure of the year which ended last March in England and Wales and last May in Scotland. The Government are leaving it to the authorities to decide, in the light of local conditions, which of the various capital projects can be delayed with the least damage to the standards of their services.

I intend to support this action further by monetary measures It would be wrong to exempt the local authorities from the pressure of interest rates, and I have not hesitated to vary the lending rates of the Local Loans Fund in order to keep them in line with the market. But further action is needed if we are to restore financial responsibility to the local authorities and financial health to the Exchequer.

Hitherto, the local authorities have used the Exchequer as a source from which they can borrow as it suits them. But within their loan sanctions there has been no limit to the amount of their borrowing from the Exchequer; and they have had the benefit of rates based on Government credit.

This system has had two disadvantages. First, since the tap is open from which the local authorities can draw the money when their capital commitments mature, they have less incentive to consider, before they incur the commitments, how the money to meet them will be found. Their sense of financial responsibility is also weakened if they borrow at rates which reflect not their own credit but the credit of the Government. Second, the system is unhealthy for the Exchequer. The Budget of last April provided £320,000,000 'below the line' for loans to local authorities this year. In the 29 weeks so far, demands on the Exchequer for this purpose have already amounted to £223,000,000, an increase of £83,000,000 by comparison with the same period last year.

This drain is due to the fact that, when interest rates have been rising, the local authorities have chosen to concentrate their borrowing on the Public Works Loan Board. As a direct result, the Exchequer has been obliged to raise these large sums by increasing the Floating Debt, and this increase, by the operation of the monetary system, has diminished the pressure on the liquidity of the banks and added to the difficulties of credit control."

Government Check on Local Authorities' Loans. "In the next 18 months or so the capital expenditure of local authorities may be expected to fall. It is probable that the reduction in housing expenditure will continue; at the same time, if the local authorities succeed, as I am sure they will, in carrying out the Government's wishes in the rest of their programmes, their other capital expenditure will be no larger than it was last year This contraction of expenditure provides the opportunity for a change in the local authorities' arrangements for raising the capital finance.

I have therefore decided to exercise a check on the volume of Government lending to local authorities. I am not suggesting that any local authority, or class of authorities, should be denied the right of access to the Public Works Loan Board. But I have asked the Board, before it grants any advances in future, to put all applicants in inquiry as to their ability to raise the finance on their own credit, either in the stock market or in the mortgage market. I intend that all authorities who can borrow on their own credit shall make full use of the capacity of both markets, with corresponding relief to the demands on the Exchequer....

I know that this change implies a substantial modification in the financial practice of the local authorities. Transitional arrangements may well be required to avoid dislocation, and to ensure that there is no risk of delay in meeting commitments which the authorities, relying on past practices, have already incurred. We are fortunate, however, in having standing machinery for consulting the local authorities about arrangements for borrowing from the Public Works Loan Board; and I intend to use this machinery in order to ensure that the transition is carried out as smoothly as possible.

At the same time, I propose to change the present practice whereby an authority is charged a rate based on its own credit if it borrows on the market, but a rate based on Government credit if it borrows from the Public Works Loan Board. In future, an authority which makes its case for borrowing from the Board will pay a rate reflecting not Government credit, but the credit of local authorities of good standing in the market for loans of comparable periods.

The local loans rates now in operation are 5 per cent on advances for periods of five years and over, and 4½ per cent on advances up to five years Given current market levels, I consider that these rates provide at least a fair starting-point for the new policy of local loans rates based on local authority credit; and for the present I do not propose to change them. But the local loans rates will be kept under close review as the new policy develops. I have said before, and I say again, that day-to-day fluctuations will be avoided. But the local loans rates must not be insulated from the market, and the Treasury will continue to adjust them, in either direction, as may be required to keep them in line with future changes in the level of the relevant rates in the market."

Capital Expenditure Cuts by Nationalized Industries and Public Services. "I gave some account on July 26 of the preliminary surveys of capital expenditure and borrowings which the nationalized industries had made at the request of the Government In particular, I mentioned various measures which the Central Electricity Authority and the Gas Council, together with their area boards, were prepared to take, including the deferment of certain capital projects. In the result, the gas industry will make do with older equipment, such as carbonization plant, for a longer period, and will be able to reduce expenditure this year by something approaching £3,000,000. The Central Electricity Authority has asked the area electricity boards for an all-round percentage cut in their expenditure in the current year, and even in the priority field of generation they have been able to postpone certain less vital projects, while pressing on urgently with the nuclear power programme

In both industries promotional expenditure is being cut back; and working capital employed in hire-purchase activities, and stocks held for those activities, have been curtailed, as a result both of the boards' own efforts and the Government's restrictions on hire-purchase arrangements. These initial measures will produce some useful savings in this year's capital expenditure. In addition, the House will be aware that, owing to the funding operations undertaken during the summer, the overdraft limits of the two industries authorized by the Government have fallen from a peak of £280,000,000 earlier this year to a figure of £130,000,000.

But it is only in the period ahead that substantial changes can be made. For that period the nationalized industries have been carrying out a more detailed survey of capital projects and internal resources, the results of which will be incorporated in the investment programmes which they are about to submit to the Government. Such programmes are submitted every year; and the industries are fully conscious that on this occasion their proposals for future investment will necessarily be examined with a much more critical eye than in the previous years.

This examination is not confined to gas and electricity. I said on July 26 that the coal mines must have their full investment; but I am glad to learn that the National Coal Board are pursuing the possibility of some saving by deferring projects such as brickworks and office buildings which do not affect output. The modernization and re-equipment plan for British Railways is at an early stage of its development. It does not at present involve any substantially increased demand on labour and resources. The British Transport Commission are well aware of the general needs of the economy, and in carrying through their programme will have those needs in mind.

Other public authorities are being asked to co-operate in restraining both current and capital expenditure. The Minister of Health and the Secretary of State for Scotland are communicating with hospital boards in this sense. In the hospitals, as in the local authority services, we are not reducing the programmes which have already been announced; but, subject to this, we are asking the hospital boards to ensure that only those works are undertaken which are of the most urgent and necessary character. The Minister of Transport and Civil Aviation is going ahead with the roads programme which has already been announced; but, in present circumstances, the Government cannot agree to an extension or acceleration of it, much as we should like to"

Reduction in Government Capital Programmes. "The Government must exercise a similar restraint in its own capital programmes. We have therefore examined the present programme of new Government building, and have considered which projects can be postponed with least detriment to our interests and without waste of expenditure. By way of illustration I will mention one or two of the larger schemes which we have had under review.

First, the Westminster Hospital site . . . This site was acquired in 1947 for the purpose of providing a new Colonial Office building, at an estimated cost of some £3,000,000 We have now decided that, for the present, we must discontinue the work at the point it has now reached—that is to say, at basement level Then there is the site in Horseferry Road [Westminster] which has been acquired for the erection of new Government offices, estimated to cost nearly £3,000,000 Here again, we have decided to halt the work at basement level

We have also had to look particularly closely at plans for Government buildings overseas, since this is a field in which savings have a double effect, on the balance of payments as well as on the total of Government expenditure. One major project, which has now reached the sketch-plan stage, is that for a new office in Washington to house the staff of the Embassy and other U K. missions, at a total cost of about £1,000,000. We had hoped to make a start with this building by the end of 1956 ; but we have reluctantly decided that we should not be justified, in present circumstances, in proceeding with plans which may involve us in heavy dollar expenditure, if not now then in 12 or 18 months' time.

There is a number of other, more long-term projects, where we may have to consider spreading expenditure over a longer period than we had hoped One of these is the Royal Mint, in which I have a personal interest because, as Chancellor of the Exchequer, I am *ex-officio* Master, Worker, and Warden , and I have long wished to see the Mint more adequately housed than it is at present We shall have to look at the timing of the plans for this and other projects All that I have said indicates the Government's intention to set an example of restraint in its own capital expenditure "

Post Office Finances. " It is in this spirit that we have also considered the investment requirements of the Post Office, and the steps necessary to bring Post Office finances into line with current economic needs The Postmaster-General is laying a White Paper today which sets out his plans in detail In common with other authorities, the Post Office must restrain the rate of its capital investment, and I am sorry that it will not be possible for the Postmaster-General to reduce the size of the telephone waiting-list quite as quickly as we should have liked But we shall do all we can.

It is also necessary to bring charges into closer relationship with the cost of the services offered to each class of subscriber, including a proper allowance for the present high cost of equipment. Many telephone subscribers at present have a telephone for half of what it costs the Post Office to instal and maintain it. The adjustments which the Postmaster-General is proposing will bring us nearer to a position in which the waiting-list consists of persons who are prepared to pay an economic rent. Together with some necessary increases in postal tariffs, they will produce an extra £26,000,000 a year "

Restraint in Capital Expenditure by Private Enterprise. " It would not be in accordance with the Government's policy to try to control directly investment in the private sector. But I look to all those who provide or control the finance for capital expansion by private enterprise to bear well in mind the spirit of the decisions which the Government have taken for their own part, and the request which they have made to local authorities, to other public boards, and to the nationalized industries.

The banks and the Capital Issues Committee took note of my statement on July 25, and have applied it in their scrutiny of applications. I take this opportunity to underline, with fresh emphasis, what I then said, and to make it clear that there can be no question, for the time being, of the authorities relaxing their critical attitude. To the extent that those concerned with investment programmes are willing to enforce a stricter order of priority in giving effect to their projects, and to move rather more slowly for the time being in implementing their projects, they will be contributing directly to the stability of our economy and thus ultimately to their own prosperity."

Incentives for Saving. " The measures which I have described are directed to controlling the growth of expenditure in the public sector. They need to be supplemented by a policy to deal with the growth of personal consumption Restraint in this field can be achieved by self-discipline no less than by external compulsion; and I am anxious to give every encouragement to those who are willing to forgo a little of the luxury of immediate spending for the sake of the future well-being of our country.

Last April I paid tribute to the results of the National Savings Movement's campaign for 2,000,000 new savers, and the great success achieved in raising the level of new savings I renew my tribute to the movement, its leaders and workers alike, and I urge them to remember that their efforts are even more important today. This year's National Income Blue Book shows the great rise in personal savings of all kinds under this and the last administration since 1951. The amounts invested through the National Savings Movement increased by £86,000,000 in 1954, and the first nine months of 1955 show a further increase of some £80,000,000

A new Defence Bond will be available on and after Nov. 1, with the same bonus and limit on holdings as the present bond, but carrying interest at 4 per cent Lord Mackintosh [chairman of the National Savings Committee] has represented to me that an increase in the limit on holdings of National Savings Certificates would be of very timely assistance to the savings movement The Government have decided to give the movement this encouragement, and to increase the maximum permitted holding of certificates of the current issue from the present figure of 1,000 units, or £750, to 1,200 units, or £900. This measure, like the new Defence Bond, will come into effect on Nov. 1. These are fresh and attractive incentives ; and I am confident that the National Savings movement will rise to both the needs and opportunities of the present time, backed by public opinion and by members on both sides of the House."

Purchase Tax. Announcing the increases in purchase tax, the Chancellor said that he was " satisfied that some direct restraint on consumption is also required," and that for this purpose there was " one revenue measure which lies ready to hand and is immediate in its effect." After explaining the new rates, he went on : " I am also taking the opportunity to modify the tax, bringing into its ambit certain goods which at present lie outside, and reducing its impact in some cases where industry is undoubtedly suffering from its effects Two of the changes are major.

" The first affects a range of kitchenware, tableware, and other household goods, which were for the most part at one time subject to tax, but have for some years been exempt The general case for an increase in purchase tax applies equally to these goods ; moreover, the exemptions are arbitrary in their nature, and have proved difficult to administer, giving rise to a number of anomalies which are a frequent source of friction with the trades concerned. This range of articles will now be brought within the purchase tax field, and made subject to the lowest rate of 30 per cent.

" The second major change relates to the ' D ' allowance schemes, which now apply to clothing, footwear, textiles, furs and furniture. The levels at which the ' D ' figures now stand have for some time been too high, and have resulted in a far larger range of items becoming exempt from tax than was the intention when the levels were fixed. This situation was thus, in any case, overdue for revision. Moreover, with the ' D ' levels in mind, manufacturers at present tend to concentrate design and production on lower quality goods for the home market. The Government have therefore decided to abolish the ' D ' schemes, in order to open up the home market in quality goods and to provide a better base for the export market . . . . I believe that traders in general will welcome this change.

" While abolishing the ' D ' schemes, however, I am not proposing to apply the full rigour of the new rates of purchase tax to the articles affected. Apart from fur garments, which will remain chargeable at 50 per cent but with no ' D ' allowance, the whole range of articles now affected by the ' D ' schemes will be made liable to tax at rates of 5 or 10 per cent, corresponding broadly to the previous rates of 25 or 50 per cent with ' D ' allowances. For example, hats will be charged at 10 per cent. These low rates cannot be held to constitute any serious burden on the industry or the consumer, and the general financial effect of the changes will be that the yield from textiles and clothing will not be significantly increased.

" The other adjustments of purchase tax which I propose to make will give some help to the silverware and cut-glass industries, by reducing the amount of tax paid on most of these craft products.

" The result of these alterations in the purchase tax will be a simplification which will give much more freedom to the designer and the exporter. They therefore fit into the general pattern of the needs of the moment, and I commend them They will come into effect as from to-morrow, and should produce in a full year additional revenue of approximately £75,000,000. Their yield in this [financial] year will be £15,000,000. Their effect on the cost-of-living index will be an increase of a little under one point "

Profits Tax. " In considering whether I need do anything further in the field of direct taxation, I am governed by the conclusion reached in the earlier part of my speech . ' That we must design our policies so that they face up to and cope with the danger to the economy—and especially to our competitive power—of a further expansion of incomes and of consumer demand.'

" I do not propose to single out personal incomes, not even the highest personal incomes, for further taxation or for any reduction of the relief from taxation which I have already given them. Personal incentives, especially to those who give a lead on the shop floor or in the office, are hard enough to give, with taxation at its present level, and should not lightly be withdrawn.

" In death duties also the rates are already very high ; nor indeed would any practicable change in these duties make any direct contribution to the solution of our problem, which, as I have said, requires an early reduction in the call which we are making on our resources.

" There remain the taxes on profits. It is clear that the leaders of industry, large and small, as well as of organized labour, realize that what may be described as a ' demand race ' will price us out of overseas markets. This is true whether the demand derives from increased wages or from bigger incomes resulting from a considerable enlargement of the distribution of profits It is true that there are reasons for some of the increased wage claims, and that many of the increased dividends have been due to a pent-up restraint over a number of years.

" Provided that productivity per man increases at least in proportion, there are great advantages in higher wages and there is positive virtue in making profits. Profits are an indication both of efficiency of production and of the directions in which economic changes are needed. Unless the economy incorporates some index by which to evaluate rewards for efficiency, and to distinguish between the results of greater and smaller success in the business of risk-taking, it will soon lose the powers of adaptation and innovation which are essential to survival. Nevertheless, at a time when our resources are overloaded and the demand for the products of industry exceeds the supply, the level of profits can contribute to this excess demand. It is, therefore, appropriate that profits should make some contribution to the effort of restraint which is required of all sections of the community.

" We do not propose to withdraw the investment allowance. We propose to rely on the good sense of managements and on the credit squeeze to moderate the pace of investment. I have come to the conclusion that if we are to tackle excess demand as stimulated by the general level of profits, I must deal with the difficulty by

other means. In the U.S.A., for example, they find it necessary in the interest of the community to check undue fortuitous increases in personal fortunes. I have studied the arguments of the minority of the Royal Commission in favour of a capital gains tax; I confess that I am far from convinced by them. In any case, I am sure that it is premature to jump to conclusions about a capital gains tax, and most unwise to revert to any conception of an excess profits tax or a special contribution or levy. I have therefore turned my attention to the existing profits tax.

"This tax is now charged at two rates—22½ per cent on distributions and 2½ per cent on amounts put to reserve. The whole question of its structure, and of the taxation of corporations generally, has recently been exhaustively reviewed by the Royal Commission. The majority report recommends that the existing differential rates should be replaced by a single flat rate; the minority propose a wholly new system of taxing companies.

"I was attracted at first by the majority recommendation; but on examination I have found that it would be very variable in its incidence and have the most anomalous results. Companies which distribute a high proportion of their profits would gain, while those which put a large proportion to reserve would lose—and the latter include a large number of new and important industries. Such a change would not be directed to our present needs. Nor am I ready to make up my mind on the permanent alterations in the structure of the tax recommended by the Royal Commission For the moment, I must do what seems best within the existing framework.

"I have considered whether I should increase the rates of profits tax both on distributed and on undistributed profits. I am reluctant to increase the rates specifically charged on amounts put to reserve, since to do so would tend to impede the necessary replacement of capital assets, and to discourage future investment rather than current consumption Here our long-term interests diverge from our more immediate needs.

I realize that the tax on distributions has to be paid by the company. Nevertheless, I consider that in present circumstances, when increased dividends may imply increased consumption, there must be an increased tax on the profits which companies distribute. I have therefore decided to increase the rate of profits tax on distributed profits from 22½ to 27½ per cent, as the measure which is most appropriate to our requirements.

"The increase will apply to accounting periods beginning on or after Nov. 1, and, in the case of accounting periods which overlap that date, to so much of the period as falls on or after that date. As on previous occasions when the rate has been increased, there will be provisions for splitting companies' accounts, and for ensuring that a company cannot avoid the increased rate of tax by declaring on or after today an increased dividend for a period before Nov. 1. The yield in a full year will approach £40,000,000.

"I trust that the prospect of this additional charge on profits, combined with the effect on the whole economy of the sum of the measures which I am proposing, will exert a significant degree of restraint on the amounts actually distributed."

Conclusion. The Chancellor concluded: "Those, then, are the measures which the Government propose to restore the balance of the economy. We must not under-estimate our achievement over the last four years. We have removed restrictions and controls and restored liberty of choice: we have opened markets, widened the channels of trade, and moved nearer the freeing of payments. Now, if we show responsibility at home, we shall prove ourselves worthy of the position of leadership in the Commonwealth and among the nations of Western Europe. Moreover, the House may observe that this Government has always taken action in time and looked forward. It is our conviction that, by taking action of this sort in time, we can look forward not only to many years of successful government but to a continuance of our standard of living..."

The estimated effect of the taxation changes as set out in the Government's White Paper was as follows: (*a*) profits tax increase—gain negligible in 1955-56, £10,000,000 in 1956-57, and £38,000,000 in a full year; (*b*) purchase tax increases—gain of £15,000,000 in 1955-56 and £75,000,000 in a full year; (*c*) surtax, increased relief for Lloyds Underwriters—loss nil in 1955-56 and £500,000 in a full year. Total gain, £15,000,000 in 1955-56 and £112,500,000 in a full year.

Changes in Purchase Tax.

Further details of the purchase tax changes were given in the financial statement, as follows:

(1) Kitchenware and table-ware now chargeable at the rate of 30 per cent of the wholesale value included the following items: Vessels for use as containers for food or drink, and lids for them; serving trays, bread boards, bowls, jugs, etc; household brushes, brooms and mops; dustbins, buckets and pails, coal-hods, coal-scuttles, and pedal-operated sanitary bins; wash-tubs, wash-boards, portable baths, ironing boards, clothes-line posts, clothes pegs, clothes props, and clothes airers; pot-scourers and steel wool; pastry-boards and rolling-pins; coal or cinder sieves and sifters; electric kettles and other cooking utensils incorporating heating elements; smoothing irons and pressing irons, and shields and stands for them; interval timers; kitchen scales and weights; hand-operated wringers; and shopping baskets and shopping bags.

(2) Tax at 50 per cent on cut-glass vases was abolished, such goods becoming chargeable at the rate of 30 per cent.

(3) Tax at 50 per cent on goldsmiths' and silversmiths' wares and on articles made of semi-precious materials was also abolished, and liability to tax of such articles will no longer be determined by reference to the materials they contain. Articles of precious metal worn on the person will be chargeable at the new rate of 60 per cent, and trophy cups, bowls, etc, and picture frames, stands for photographs, etc., at the new rate of 30 per cent.

(4) Under the system of "D" reliefs, now abolished, certain wearing apparel, handkerchiefs, cloth, domestic textile articles, bedding and furniture were chargeable with tax only on the excess, if any, of their wholesale value over a fixed amount. Goods within these descriptions, at present exempt from tax (young children's garments and footwear), remained exempt. In addition, babies' gloves, headgear, high chairs, cots, playpens, and cradles became exempt.

Tax at 50 per cent, with "D relief," on woollen domestic textile articles and soft furnishings, including travelling rugs and pram rugs, was abolished.

Other goods of this kind will be taxed at the following rates, on the full wholesale value · garments, footwear and gloves, 5 per cent; headgear, 10 per cent; handkerchiefs, scarves, shawls and braces, 5 per cent; other haberdashery (excluding tapes, ribbons, and other narrow fabrics), 30 per cent; fur gloves, 5 per cent; fur garments and footwear, fur headgear, dressed fur skins and fur rugs, 50 per cent, clothing, bedding, etc., 10 per cent; mattresses, pillows, bolsters, and cushions, 5 per cent; most domestic furniture, 5 per cent, other domestic furniture and office furniture, 30 per cent.

Increase in Post Office Charges.

A White Paper on Post Office development and finance, issued on the same date, stated that the prices charged for many Post Office services had become uneconomic and that it was necessary to raise £25,750,000 additional revenue in the next financial year from the telephone and postal services.

It was stated that the additional funds were needed partly to meet the increased cost of telephone equipment and materials, which now called for an additional annual provision of £12,500,000, whilst additional wage awards and other increased costs accounted for another £17,000,000. Although the impact of these increased costs was being reduced by internal economies, they alone would put the Post Office in deficit in 1956-57. During the post four years, it was pointed out, at least £50,000,000 had been added to Post Office current costs, most of it through wage increases, and by no means all of this had been passed on to the public. It was estimated that without the proposed increases, and taking costs at their current level, the Post Office surplus of over £5,000,000 in 1954-55 would be turned into a deficit of £3,000,000 in 1956-57.

The White Paper also said that it was now necessary to provide for a payment of £5,000,000 to the Treasury, as it had been decided to reintroduce for a trial period of five years one of the reforms ensuing from the Bridgeman Committee of 1932, which entailed a limit on the use of the Post Office as a revenue-producing instrument for the Exchequer. This arrangement, which had been suspended during the war, meant fixing a definite contribution to the Exchequer beyond which any net earnings were at the disposal of the Post Office. This amount, together with the increased depreciation provisions of £12,500,000, the cost of improvements, and a sum in respect of rising current costs sufficient to convert the prospective deficit of £3,000,000 into an appropriate working margin of £5,000,000, made a total of £25,750,000 to be found by tariff increases.

The new rates, the White Paper pointed out, would bring the average paid by a telephone subscriber to about 80 per cent above pre-war, and postage for inland letters and printed papers to 98 per cent over pre-war—increases which compared with a 150 per cent increase in the cost of telephone apparatus and 175 per cent in Post Office wage rates, whilst new telephone equipment cost at least 2½ times that in 1939. The new rentals, estimated to produce another £9,750,000 a year, would still leave charges below costs for provincial subscribers, particularly residential ones As regards local calls, the cost to the Post Office of a 1½d call was at present slightly over 2d, and was increasing as the proportion of new plant grew. The additional income from increased call charges was estimated at £7,000,000 a year

Finally, the White Paper announced the forthcoming introduction of various improvements, stating that a big increase was required in the number of public trunk circuits, and that at least 4,000,000 more would be added during the next three years. The Post Office was also starting to build a chain of radio relay stations from south to north through the centre of the country, which, when completed in four years, would have an ultimate capacity for several thousand telephone circuits and a number of television channels for transmitting B.B.C. and I.T.A. programmes. In addition, mechanism was being installed to make it possible for all calls over 15 miles to be handled by one operator. As a further step subscribers would be able to dial long-distance calls themselves; suitable equipment for this was now being designed and should be ready for a first installation within four years. Finally, new coin boxes would be introduced with long-distance dialling facilities. For letter mails further use would be made of inland air services, and free delivery of telegrams was to be made universal.

Cuts in Housing Subsidies.

The proposed cuts in housing subsidies were announced by Mr. Duncan Sandys on Oct. 27, his statement being as follows:

"The basic subsidy of about £22 a house was fixed a year ago. Since then rates of interest on loans have risen appreciably, and if the Government were to follow the previous practice of adjusting subsidies to take account of such changes, the basic subsidy would now have to be raised to well over £30.

But the Government do not consider that such an increase is either necessary or desirable. Local authorities own about 1,250,000 houses built before the war, and a further 1,500,000 built since the war. The Exchequer subsidies which they are receiving on these existing houses amount in all to nearly £47,000,000 a year

There is no doubt that, in general, council house rents are today being subsidized to a greater extent than the financial circumstances of the individual tenants require. This shows that the amount of subsidy which the Exchequer is now paying out in respect of existing houses is unnecessarily large and provides a margin which could properly be used for financing some part of the future house-building programme.

For a number of years there will continue to be a large demand for more houses, and in many areas the shortage is still serious But most, if not all, the authorities which have long waiting lists possess a big pool of existing houses upon which they are receiving large amounts of subsidy. These usually include many pre-war houses, built at much lower cost. Provided, therefore, that they subsidize only those tenants who require subsidizing, and only to the extent of their need, local authorities should be well able to continue building the new houses they require with appreciably less Exchequer assistance than hitherto

We are not proposing that the rates of subsidy on houses already built or building should be altered · but we have come to the conclusion that the subsidy on future houses, built for general needs, should be abolished altogether. In order not to make the transition too abrupt, we propose, for a year or so, to pay a much reduced annual subsidy of £10 a house.

Since we wish to encourage local authorities to restart the slum clearance campaign with all possible vigour, we have decided, as a matter of policy, to maintain the subsidy on houses built for this purpose at the existing level of £22

What I have said about the position of local authorities as a whole does not apply to the corporations of the New Towns They do not possess any pool of low-cost pre-war houses, and consequently their rents are substantially above the general average. A special problem arises also in the case of authorities of small towns or districts which are being expanded to accommodate overspill population from congested cities.

We propose, therefore, in these special circumstances, to provide a basic Exchequer subsidy of £24, an increase of £2 over the existing rate. A Bill to effect these and other consequential changes will be introduced next week, and the new subsidy rates will apply to any dwellings for which tenders were approved by local authorities after that date.

Unless local authorities exercise more discrimination in giving rent relief to their tenants, there is bound to be a continued misuse of public money At present councils are discouraged from introducing differential rent schemes because no matter how much they increase their revenue from rents they still have to pay into the housing revenue account a fixed contribution from the rates We therefore propose to abolish this obligation. This will allow local authorities, if they so desire, to use any savings they may make to reduce the rate burden, and will give them for the first time an incentive to adopt realistic rent policies.

The revision of the subsidies has provided a convenient opportunity to look again at the system of housing allocations. There is no doubt that this control has caused friction, and I have accordingly decided to bring it to an end. Local authorities will henceforth be left to determine the size of their own housing programmes, and I look to them to keep their demands upon our building resources within reasonable bounds.

The reduction in the rates of subsidy will tend to encourage local authorities to charge rents more in line with current wages and the present-day value of money In this connexion the Government recognize that the level of rents of council houses and that of privately owned houses are inter-related. Since most of these latter are subject to rent control, it will clearly be necessary for us to review the provisions of the Rent Acts. This we shall now do ; and we shall announce our conclusions in due course

The proposed changes in the subsidy rates will have the effect of slowing down the annual growth of Exchequer expenditure on housing. But, since they will not affect the subsidies payable on houses already built, they cannot, of course, reduce the present total of the subsidy bill. Nevertheless, I believe that it will be generally recognized that the policy which I have announced represents an important step in the direction of restoring some measure of reality to our housing finance."

Mr. James Stuart, Secretary of State for Scotland, announced on the same date that there would be a review of housing subsidies in Scotland, but that any change would be deferred until after legislation had been passed to give effect to the Sorn Committee's report on valuation and rating in Scotland, including the abolition of owners' rates.

The messages sent on Oct. 26 to local authorities in England, Scotland, and Wales by the Chancellor of the Exchequer, the Secretary of State for Scotland, and the Minister of Housing and Local Government urged these authorities to review current expenditure so as to secure economies wherever possible and to refrain, save in cases of exceptional need, from undertaking new services which would involve additional expenditure either from Government grants or from the rates. The aims of the authorities' review, it was stated, should be to ensure, first, that total capital expenditure in the year 1956-57, excluding expenditure on housing in the case of county and district councils, should not exceed that of 1954-55, and secondly, that no new works, even those already authorized, were undertaken unless the authority was satisfied that they were urgently needed by the area.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. A. RELIGIOUS LIFE. — Anglican Communion. - Dispute between Archbishop of Canterbury and "The Church of England in South Africa."

Following an announcement that a religious body named "The Church of England in South Africa" had elected the Rt. Rev. G. F. B. Morris, formerly Anglican Bishop of North Africa, as its bishop, the Archbishop of Canterbury (Dr. Fisher) issued a statement on Oct. 3 emphasizing that unless Bishop Morris withdrew from this position he must be regarded as "having put himself out of Communion with the See of Canterbury and outside the fellowship of the Anglican Communion." The Archbishop's statement was as follows :

"In order to avoid misunderstandings which may arise from the announcement that a small body known as 'The Church of England in South Africa' has elected the Right Rev. G. F. B. Morris to be its bishop, I must make clear that this body has no place in the constitutional system of the Church of England and is not amenable to the jurisdiction of the Archbishop of Canterbury Bishop Morris has accepted episcopal office in this body against the advice and direction of the Archbishop of Canterbury and without any reference to the Archbishop of Capetown He has thus acted against the principles of Church order in the Anglican communion. I find it necessary to state that unless Bishop Morris withdraws from this position I must regard him as having put himself out of communion with the See of Canterbury and outside the fellowship of the Anglican communion."

It was explained in the Press on the same date that the dispute between the "Church of England in South Africa"—described as having only seven churches—and the Anglican "Church of the Province of South Africa"—which is in communion with the Province of Canterbury—dated back to 1870. In that year Dr. Colenso, the Bishop of Natal, refused to accept the jurisdiction of the newly-appointed Archbishop of Capetown, and was eventually excommunicated from the Anglican communion. He thereupon founded "The Church of England in South Africa," and after his death his adherents (who had been left without a bishop until the election of Bishop Morris) had constantly refused on doctrinal and liturgical grounds to join with the Church of the Province of South Africa.

Bishop Morris, in a letter to the Archbishop of Canterbury on Oct. 3, complained of the Archbishop's failure to reply to an earlier communication from the "Church of England in South Africa" giving "a clear and factual review of the Church's position" and "the clearest historical, legal, ecclesiastical moral, and scriptural grounds" for his (Bishop Morris's) acceptance of the C.E.S.A.'s invitation to become its Bishop. The letter concluded :

"If your Grace persists with charges of schism against my Church and against myself as Bishop, and if you hold it and me up to fault and opprobrium and thereby refuse to recognize the settled laws of this State, then I formally notify your Grace that an appeal to the proper authorities will be lodged through Her Majesty's representative, the Governor-General of South Africa."

In a formal reply issued on Oct. 4 the "Church of England in South Africa" claimed that it was "the only Church of England in this land as recognized by Courts and Parliament." It declared that Bishop Morris's election had been "entirely legal and regular and based on excellent precedents," and described the Archbishop of Canterbury's interference as "unconstitutional and presumptuous in a sovereign independent State."

B. LONDON. — King George VI Statue.

A statue of the late King George VI, constituting part of the National Memorial to the late Sovereign, was unveiled in London on Oct. 21 by H.M. the Queen. Situated in Carlton Gardens, overlooking the Mall, it is cast in bronze and shows the late King in the uniform of an Admiral of the Fleet, with the mantle of the Order of the Garter. The statue is 9 ft. 6 in. in height and stands on a 9 ft. pedestal approached by a flight of steps. The architect was Mr. Louis de Soissons, R.A.

C. PERSIA. — Formal Accession to Baghdad Pact.

Persia formally acceded to the Baghdad Pact—of which Turkey, Iraq, Pakistan, and the United Kingdom are the other members—on Nov. 3, when instruments of ratification were deposited in Baghdad.—(Times) **(Prev. rep. 14485 A.)**

A. UNITED KINGDOM. — Princess Margaret's Decision against Marriage with Group-Captain Peter Townsend.

The following personal message was issued by Princess Margaret on Oct. 31 from Clarence House, London:

"I would like it to be known that I have decided not to marry Group-Captain Peter Townsend. I have been aware that, subject to my renouncing my rights of succession, it might have been possible for me to contract a civil marriage. But, mindful of the Church's teaching that Christian marriage is indissoluble, and conscious of my duty to the Commonwealth, I have resolved to put these considerations before any others.

"I have reached this decision entirely alone, and in doing so I have been strengthened by the unfailing support and devotion of Group-Captain Townsend. I am deeply grateful for the concern of all those who have constantly prayed for my happiness."

For some considerable time there had been much speculation, both in Britain and the Commonwealth and in foreign countries, as to whether Princess Margaret (who became 25 years of age on Aug. 21) intended to marry Group-Captain Townsend, who had been a personal friend of the Princess for a number of years. Group-Captain Townsend, a Battle of Britain pilot with a distinguished war record, was granted a divorce from his wife in 1952 in an undefended petition, and was given the custody of the two children of the marriage.

Group-Captain Peter Townsend, a commoner with no royal connections, was born in Rangoon on Nov. 22, 1914, the son of Lieut.-Colonel E. C. Townsend, of the Indian Civil Service. Educated at Haileybury and the R.A.F. College, Cranwell, he was commissioned in the Royal Air Force and served before the war in the Far East and Middle East. During the Battle of Britain he shot down the first German plane to be destroyed over Britain, and subsequently shot down three more enemy planes over the North Sea, being awarded the D.S.O. and the D.F.C. and Bar. He was himself shot down over Kent in 1941, but was able to bale out of his machine, though badly wounded. For some time thereafter he was in hospital, and after his release was given command of a training squadron. In 1944 he was appointed an Air Equerry of Honour to King George VI, in conformity with the King's desire to appoint as his equerries young men who had served with distinction in the Forces. The appointment was initially for a few months, but was renewed for an indefinite period because of the King's personal regard for Group-Captain Townsend.

In 1947 Group-Captain Townsend accompanied the Royal Family on their South African tour as acting Master of the Household, and in the following year, by virtue of his office, accompanied Princess Margaret to the Coronation of Queen Juliana of the Netherlands. He was appointed Deputy Master of the Royal Household in 1950, and after King George's death in 1952 became Equerry to the Queen Mother and Princess Margaret. It was subsequently announced that he would become Comptroller of the Queen Mother's Household, but before taking up this post he was appointed Air Attaché in Brussels in July, 1953. He had held the latter post since that date.

In July, 1941, Group-Captain Townsend married Rosemary, the daughter of Brigadier Pawle. There were two sons of the marriage, born in 1942 and 1945. The marriage was dissolved in 1952 on an undefended petition by Group-Captain Townsend.

Until Oct. 12, 1955, when Group-Captain Townsend returned to London on leave from Brussels, he and the Princess had not met for over two years—i.e., since his appointment to Brussels in July 1953. After his return to London he called on several occasions at Clarence House, where he saw both the Princess and the Queen Mother, and also attended several dinner parties and social functions with the Princess at the homes of mutual friends. On Oct. 27 it was announced that Princess Margaret had visited Lambeth Palace and had had a meeting with the Archbishop of Canterbury (Dr. Fisher) lasting about an hour. Four days later the above-mentioned announcement—the text of which, it was understood, had been communicated beforehand both to the Queen and to the Queen Mother—was issued by the Princess from Clarence House. The announcement came shortly after Group-Captain Townsend had called at Clarence House to see the Queen Mother and the Princess.

The possibility of a marriage between Princess Margaret and Group-Captain Townsend had raised questions of major importance, both religious and constitutional. Firstly, the remarriage of a divorced person—even though the person concerned, like Group-Captain Townsend, is the innocent party—cannot be solemnized by the Church of England while the other party to the divorce is still living. Secondly, Princess Margaret is third in the line of succession to the throne, and, in the eventuality of her becoming Sovereign, would constitutionally be head of the Church as well as of the State. Thirdly, Princess Margaret's marriage to Group-Captain Townsend might have involved the question of the Royal Marriages Act of 1772. This Act, passed in the reign of George III, laid down that all descendants of George II—other than the issue of princesses married into foreign Royal families—must obtain the Sovereign's consent if they married under the age of 25. If they married above that age, Parliament could raise objections to the marriage, within one year, if it wished to do so.

The Church of England's doctrine on marriage had been set forth by the Archbishop of Canterbury in evidence presented to the Royal Commission on Marriage and Divorce, and also in a pamphlet published by Dr. Fisher in February last. In giving evidence before the Royal Commission, the Archbishop made the following statement: "The Church of England affirms, according to Our Lord's teaching, that marriage is a union permanent in its nature and lifelong, for better or for worse, till death them do part, of one man with one woman, to the exclusion of all others on either side."

In the above-mentioned pamphlet, Dr. Fisher reaffirmed the Church's doctrine on this matter but admitted that there might be some cases where the remarriage of divorced persons might be justified, even though such marriages could not be solemnized in church. He wrote in this connexion: "Let me say quite frankly that in some cases where a first marriage has ended in a tragedy, a second marriage has, by every test of the Holy Spirit that we are able to recognize, been abundantly blessed. For this very reason I do not find myself able to *forbid* good people who come to me for advice to embark on a second marriage . . The decision is on their conscience. . ."

The Convocations of Canterbury and York ruled in 1938: "In order to maintain the principle of lifelong obligation which is inherent in every marriage contract between Christians, and is expressed in the plainest terms in the Marriage Service, the Church should not allow that service in the case of anyone who has a partner still living."

Although no official statement on the part of the Church of England had been issued before the announcement of Oct. 31, the constitutional and religious issues involved had been set forth in the following statement issued on Oct. 26 by the President of the Methodist Conference, Dr. Leslie Weatherhead:

"Princess Margaret and Group-Captain Townsend are popular young people in love with one another, and everyone would wish that they could have the right of any other young British couple and find happiness in marriage. But clearly the status of the Princess raises difficulties in regard to a fiancé who is divorced and whose wife and two children are living.

Should anything—an aeroplane accident for instance—unfortunately end the lives of Prince Charles and Princess Anne, or if they both died without issue, then at Princess Margaret's death her eldest child would be heir to the Throne. Yet that child would be the fruit of a marriage which many Anglicans would not recognize as valid.

This is bound to be a matter of vital public concern, for, among other things, such an heir would be doomed to disapproval or worse in the eyes of many of the people of this realm. If the State Church approved this marriage, it would break its own rules.

If, however, Princess Margaret renounced all claim to the Throne for herself and her issue, then she would be free, in the eyes of many, to enjoy married happiness with Group-Captain Townsend, though, even then, her example would not make it easier to uphold the ideal of Christian marriage in a land in which divorce is already too lightly regarded, homes too readily broken up, and children too thoughtlessly deprived of the mental security of having two united parents. . . "

The Princess's decision not to marry Group-Captain Townsend was commended by Church leaders of all denominations throughout the Commonwealth. At the same time there was world-wide sympathy for the Princess—expressed by the Churches, newspapers of all shades of opinion, and individuals in all walks of life—in the extremely difficult choice with which she had been confronted in so personal a matter. Although no statement was issued by the Church of England after the Princess's decision was made known, the Archbishop of Canterbury—in a B.B.C. television interview on Nov. 2—stressed that there had been no Church pressure on Princess Margaret in reaching her decision not to marry Group-Captain Townsend. Dr. Fisher added:

"I can say, perhaps, just three things. These underline the things Princess Margaret herself said. First, she said she took this decision alone. That means by her own free will. Of course she took advice. She got plenty of advice, asked for, and a good deal more unasked for. In the end it was her own decision, and she was under no pressure from State or Church.

The second thing I can say is that her decision was purely on the grounds of conscience. She was seeking all the time what God's will was, and when it became clear what God's will was she did it, and that is not a bad thing for people in general to take note of.

The third thing, again from her own statement: she especially thanked those who prayed for her. Only people who have been praying for her can really understand the decisions demanded of her, the problems she had to face, the tearing of the heart one way or another. Those who prayed for her know what she has been through, and those who have not do not."

Statements by other Church leaders in Britain and the Commonwealth are given below:

The President of the Baptist Union of Great Britain and Ireland (the Rev. Henry Cook): "All honour to the Princess that in view of her responsibility to the Commonwealth she has been willing to put aside her own personal feelings. . . . The sacrifice she has made in obedience to her conscience and sense of duty will call forth the admiration and good will of everyone."

The President of the Methodist Conference (Dr Weatherhead) commended the Princess's decision as "very courageous" and "absolutely right." He added: "One feels very sorry for them both. . . . I think everyone must feel deeply sorry that the Princess cannot have the liberty which every other girl in the country enjoys in this respect One feels proud that she has shown the quality of heroism which again and again has characterized the Royal Family."

The Primus of the Episcopal Church in Scotland (Bishop Hanney): "One is very thankful that her sense of duty has prevailed, for quite obviously this was a matter of very great importance to the moral standards of the country."

The Anglican Archbishop of Sydney (Dr. Mowll). "Princess Margaret has upheld the high standards and prestige of the Royal Family. She has enhanced her high office of leadership by putting duty to God, her people, and her family before her own personal inclinations."

The Roman Catholic Archbishop of Sydney (Cardinal Gilroy): "I have always felt that Princess Margaret would do what was right. I congratulate her and Group-Captain Townsend on the decision"

Statements were also made by three Commonwealth Prime Ministers—Mr. Menzies (Australia), Mr. Holland (New Zealand), and Sir John Kotelawala (Ceylon):

Mr. Menzies: "I have very great and affectionate respect for Princess Margaret's character and judgment. She has made up her own mind, as she is entitled to do All I hope now is that the gossip writers will leave her alone"

Mr Holland "The Princess's decision becomes her well for reasons she has plainly stated—the teachings of her Church and the precept of the Royal Family that duty to the Commonwealth is the first call. . . . The Princess has shown that high example and unfading devotion to duty which has secured for the Royal Family its unassailable place in the hearts of the British people everywhere"

Sir John Kotelawala: "Princess Margaret has sacrificed love for duty, and the whole world should appreciate her sense of duty"

British Press comment is given below from *The Times* (editorials of Oct. 26 and Nov. 1), the *Daily Telegraph*, the *Manchester Guardian*, the *Daily Express*, the *Daily Mail*, the *News Chronicle*, the *Daily Herald*, *The Observer*, and the *Sunday Times*:

The Times (Oct. 26): "In the mounting tumult over the assumed wish of the Queen's sister to marry a gallant officer, with nothing to his disadvantage except that his divorced wife is still living, few if any persons holding responsible positions in the Commonwealth have yet expressed an opinion. Their reasons for reticence are clear: they know too little, and they care too much. But now that the reckless magnification of mere guesses has gone so far that the name of the Princess is being bandied about, sometimes in heartless and offensive contexts, far beyond the confines of the British Commonwealth, it will soon be necessary for all who care for the monarchy to form some tentative judgment, even if it must for the time being rest partly upon hypothesis.

The enormous popular emotion that has been generated by the recent happenings is in itself perfectly healthy. It is sentimental, it is ill-informed; but it proceeds from that genuine affection for all the Royal Family which they have inherited and continue to deserve, and which is a principal guarantee of the stability of Kingdom and Commonwealth. The odious whipping-up of these honest and warm-hearted feelings, and their vulgar exploitation for motives of gain, have already dishonoured part of the British Press in the eyes of the world, and deserve only contempt. Though this mass sentiment would be a gratifying proof of the soundness of our institutions if it were allowed to be spontaneous, the only help it can give the Princess in a matter of conscience is the assurance that her choice matters greatly to untold millions of people. For a personal concern can seldom be a private concern when the person is royal; it is part of the sacrifice the whole Royal Family make to the ideal they represent, that they must live their private lives largely in public. Yet personal the choice remains; what is at issue is the future direction of a life, hitherto dedicated That can be determined only by Princess Margaret herself; the inner responsibility can in no way be lightened by any weight of mass opinion, however sympathetic, on one side or the other.

Neither can Her Royal Highness's ultimate decision be much helped, or seriously hindered, by posing the issue in a harshly legalistic light. At present, it is true, the suggested marriage is forbidden by the law of the State without the permission of the Queen, who is its head, and by the accredited authorities of the Church of England, of which she is Supreme Governor. But there is a procedure by which the Princess might release herself from the rigour of the Royal Marriages Act, and the Act itself would be easily set aside by Parliament if it were generally felt that the crucial matter was merely the capacity of the Princess and her issue, in a remote eventuality, to inherit the Crown. The teaching of the Church of England on divorce comes much nearer the heart of the matter, but again not quite for the technical reason that has in some places been advanced. If the objection to the marriage on these grounds derived solely from the constitutional fact that the Queen is Governor of the Church, it would be relevant only to that southern part of the United Kingdom in which the Church of England is established. But the dilemma is felt, and rightly felt, to be the concern of all the Queen's subjects through the Commonwealth, each kingdom of which regards not only Her Majesty herself but the Royal Family as an integral part of its own community The truth is that the public factor in the Princess's personal problem is introduced by something which is neither Church nor State, but a living organism which is broader and more profoundly based than either, but less easily definable in the lawyer's terms. That organism is the many-sided society or family of the Queen's subjects, of which Church and State are no more than ecclesiastical and political aspects.

Now, in the twentieth-century conception of the monarchy, the Queen has come to be the symbol of every side of the life of this society, its universal representative in whom her people see their better selves ideally reflected; and since part of their ideal is of family life, the Queen's family has its own part in the reflection. If the marriage which is now being discussed comes to pass, it is inevitable that this reflection becomes distorted. The Princess will be entering into a union which vast numbers of her sister's people, all sincerely anxious for her lifelong happiness, cannot in conscience regard as a marriage. This opinion would be held whether the Church of England were established or not, and extends to great bodies of Christians outside it. That devout men have argued that it is a wrong interpretation of Christianity is not here relevant. All that matters is that it is widely and sincerely held; and therefore that a royal marriage which flouted it would cause acute division among loyal subjects everywhere. But the Royal Family is above all things the symbol and guarantee of the unity of the British peoples; if one of its members herself becomes a cause of division, the salt has lost its savour.

There is no escape from the logic of the situation. The Queen's sister married to a divorced man (even though the innocent party) would be irrevocably disqualified from playing her part in the essential royal function—a part which she has hitherto played with the utmost charm and devotion On the other hand, the royal service to the people would lose most of its grace if it were felt to be conscript service, nor can representation of a people's unity be sustained with a divided heart. If the Princess finally decides . . that she is unable to make the sacrifice involved in her continued dedication to her inherited part, then she has a right to lay down a burden that is too heavy for her. It would, however, involve withdrawal, not merely from her formal rights in the succession established by law . . . but abandonment of her place in the Royal Family as a group fulfilling innumerable symbolic and representative functions. . . .

But the peoples of the Commonwealth would see her step down from her high place with the deepest regret, for she has adorned it, and is everywhere honoured and loved. Moreover, there would be profound sympathy with the Queen, who would be left still more lonely in her arduous life of public service in which she needs all the support and co-operation that only her close kindred can give. These things said, the matter is, in the last resort, one to be determined solely by Princess Margaret's conscience. Whatever the judgment of that unsparing tribunal, her fellow-subjects will wish her every possible happiness—not forgetting that happiness in the full sense is a spiritual state, and that its most precious element may be the sense of duty done."

The Times (Nov. 1): "The message issued from Clarence House will still further deepen the affection that has never ceased to surround Princess Margaret during all the time when she was believed to be at grips with a harsh personal dilemma. There has been deep sympathy with her throughout the Commonwealth during her lonely ordeal. As her announcement explicitly states, the decision is hers alone Her Royal Highness's language, dignified and reticent as it is, clearly puts the issues with which she has been faced, and she has done the nation a service by the clear and courageous way in which she has given the reasons for her decision.

The reasons that Princess Margaret gives are the highest of those that have been argued, and in the last resort the only ones that are worthy to be considered at so great a moment in her life. They are her duty to God, and, what is a part of it, her duty to the peoples at whose head her family has been set. She is loyal to the teaching of the Church of England on marriage, not because it is established by law, but because it is the Church to which she herself belongs and by whose standards she wishes her life to be judged. She is loyal to the Queen her sister, and through her to the family of many nations which the Queen represents, and which the Princess herself has finely served and will continue to serve All the peoples of the Commonwealth will feel gratitude to her for taking the selfless, royal way, which in their hearts they expected of her. They will pray and hope for her abiding happiness. . . ."

Daily Telegraph (Nov. 1). "All will respect the motives which have led Princess Margaret to decide against marrying Group-Captain Townsend. They include no element of selfishness—it would be quite alien to the Princess's character if she had been actuated by material considerations. It is, therefore, irrelevant that, if the marriage had taken place, she would undoubtedly have had to renounce the succession. Nor can reasons of State have influenced her, since there is no cause for her to contract such a marriage as would ensure the succession. The simple explanation, confirmed by the dignified statement which she issued, is that her own religious convictions caused her to conclude, in accordance with the tenets of the Church, of which she is a devout member, that marriage with a person whose divorced wife is still living would be wrong. The decision has obviously been reached without promptings or pressure from any member of her family. The time taken to reach it is proof of that. . . .

It can also now be said that the affair has been much over-sensationalized. For that, of course, the prolongation of the period of indecision—marked, as it was, by circumstances which led many to believe that the decision would be different—is largely to blame. But this was really not a case, as envisaged by some correspondents, of a Princess fretting to declare the world well lost for love. As all can now know, it was a matter of conscience. Outsiders may well feel that conscience has been the ally of common sense It is no reflection on Group-Captain Townsend to remember that he is 15 years older and the father of two children by his first marriage.

As for the conduct of the Press, the speculation and sensationalism indulged in by some newspapers was indeed nauseating. But it was quite futile to pretend that a matter which was engaging the interest of millions did not exist, or that its outcome was of no more importance than that of an affair between any couple whose names had been linked Factual notice of events was the only possible course to follow Finally, now that a decision has been reached upon grounds that, without impertinence, can be said to be convincing, it remains only to wish that Princess Margaret may, in due course, find elsewhere that happiness which, both as a Princess and as a woman, she deserves."

Manchester Guardian (Nov. 1): "Princess Margaret has decided not to marry Group-Captain Townsend although quite plainly she would like to. She has sacrificed her personal wish to what she conceives to be, or has been told by her family and the head of her Church, the Church of England, is, her duty. . . . Her decision is a personal one which must be respected. All will wish her happiness in the hard path of duty and abnegation she has chosen.

None the less her decision, which has plainly been come to after subtle pressure, will be regarded by great masses of people as unnecessary and perhaps a great waste. In the long run it will not redound to the credit or the influence of those who have been most persistent in denying the Princess the same liberty that is enjoyed by the rest of her fellow-citizens. Even the least cynical among us find it hard to see why an innocent party to a divorce can become the man who appoints archbishops and bishops while the Princess, who merely exercises her social graces and has a very remote chance of succeeding to the Throne, should be denied by ecclesiastical prescription the right to marry an innocent party to a divorce. That odd piece of inconsistency may be typically English but it has more than a smack of English hypocrisy about it. And it must be said frankly that a good deal of the discussion about the proposed marriage has shown a degree of intolerance and dogmatism, clerical and journalistic, that is not pleasant to contemplate England will hardly be won back to the Christian faith by the enforcement of disregarded taboos and the assertion of ecclesiastical authority.

Certainly Princess Margaret by her decision has rescued the Church of England from a rather awkward dilemma and has, perhaps, preserved the Crown from some difficulties But the fundamental questions are unaffected. They need not now be discussed again. There will be time enough when the present affair has blown over. But points are presented which are of great and continuing interest —the trend in the Church of England towards narrower doctrines, the turn of the Methodist Church towards official Anglicanism and away from the old Free Church tradition, the constitutional relations between Church and Royal Family, the affections between royalty and people, and, not least, the unsavoury developments of modern newspaper publicity. For the moment, however, the hour is the Princess's. She deserves all our sympathy and affection."

Daily Express (Nov. 1): "There will be dismay and perplexity at Princess Margaret's moving message to the nation. Dismay that she should renounce a marriage she still so plainly desires. Perplexity at the manner in which this painful decision has been taken. The Princess says that she has chosen entirely alone. But the decision has been reached amid a pressure campaign that would have brought to their knees even more determined personalities than she.

In a single week the Archbishop of Canterbury twice chose to make public affirmations of his uncompromising viewpoint on divorce. He referred to his own pamphlet, in which he rejects Church marriage for divorced persons, even for innocent parties. Then at a society wedding . . . he preached an unrelenting sermon on marriage. . . . And *The Times* launched a full-scale pronouncement of its own, confronting the Princess with a harsh and bitter choice. Marriage to Group-Captain Townsend, said *The Times*, would involve 'withdrawal not merely from her formal rights in the succession . . . but abandonment of her place in the Royal Family. . . .'

Nor was that the end of it. In America the news is printed that the Marquis of Salisbury threatened to resign from the Cabinet if the Royal Marriages Act were amended to facilitate the marriage. So it appears that there has been pressure too from the Government.

How could any girl fail to be influenced by so much opposition? Would the Princess have entered on this reunion with Townsend if it had not been in her mind to marry him? There would have been no point in seeing him again after two years if the decision were to be made on principles which were known to her all the time. Surely the Princess met the Group-Captain to test her emotions Surely she wanted to find out if her affections had changed during his long absence. Her statement shows unmistakably that they have not changed. And that she would marry him tomorrow if she felt able to. If she does not now feel able to marry, the explanation must be sought in the force with which the issues were put to her in these last two weeks.

Yet neither Christian teachings nor constitutional obligations are as unequivocal as they have been presented. The marriage could have taken place without any renunciation by the Princess. It could have taken place in church. And it would have had the full support of the people."

Daily Mail (Nov. 1). "The hard choice has been made. Hard. indeed, and sad it must have been for Princess Margaret to issue the announcement given to the world. . . . We can realize how she feels and how her emotions must have been wrenched only if we try to put ourselves in her place. Her ordeal has been severe The strain on nerve and spirit must have been almost unendurable. . .

Yet who can doubt that the Princess has made the right decision? She has put her duty before her inclinations. Such an example was sorely needed in a world where rights too often take precedence over responsibilities. She has not listened to those voices which . . bade her heed nothing except her own will and pleasure In rejecting them she has immeasurably strengthened the Throne and has rendered an enduring service to Queen and people

It must now be said that this marriage could not have had those effects. If the doctrines of the Church had been set aside and the deep-felt beliefs of millions of people flouted, the place of the Royal Family in our national life must have been diminished Apart from these high matters, the standing of the young couple would have been anomalous. Princess Margaret would have renounced her rights to the succession, but to ask her to retire into private life would have been a harsh demand Yet had she proceeded, as usual, with her accustomed social, official, and public activities, situations would have arisen which would best have been avoided. .

Princess Margaret has faced her problem by herself. She has fought her fight alone. Now, having won it, she has earned the sympathy, gratitude, and understanding of all the British peoples They owe her a debt which they cannot repay Let us never forget the sacrifice she has made for Crown, Constitution, and Commonwealth"

News Chronicle (Nov. 1) ". . The first reaction can only be personal . sympathy for a girl of 25 faced with the mountain of issues involving Church and State by which royalty is surrounded The second contains the seeds of danger. There is bound to be a strong reaction against the Church and possibly against its leaders. Already and before last night's announcement, a national division of opinion had begun to show its head Rightly or wrongly a great section of the public, although Christian by sentiment and tradition, was prepared to view with revulsion any attempt to interfere with or forbid the marriage. . .

One could have wished that some of those influential voices, both in and outside the Church, who have opposed this match, had done so with greater sympathy and understanding. The Princess is intelligent as well as devout. We feel she could have reached her decision without the help of sanctimonious calls to duty from *The Times* or high-pitched injunctions from the minor canons.

Traditionally the British people and those of the Commonwealth look to the monarchy for moral leadership. It is expected of the Royal Family that they should reflect the highest standards of family life. Princess Margaret has remained true to this monarchical imperative It had always been known that she was a practising Christian, and her belief has now survived the harshest personal test. There is also the reference in her statement to the Commonwealth. Royal obligations stretch far beyond the confines of a kingdom, and throughout the Dominions, colonies and protectorates similar divisions must also have occurred. There will be time enough to consider the implications in due course What must be uppermost in everybody's mind today is the feeling of the two young people directly implicated. The sympathy that goes out to both is only part of what Britain and the Commonwealth must feel. To each of them, in different ways, we owe a certain debt; and this debt has not been lightened by Princess Margaret's decision. She is, in her own right as a woman, putting duty, moral obligation, call it what you like, before self. If the purpose of royalty is to serve certain traditions above all else, she is proving herself true. That is why the nation offers affection, sympathy, and respect."

Daily Herald (Nov. 1). "There is little to add to Princess Margaret's own statement of her decision not to marry the man she loves. It is a noble statement. This young woman, standing alone, has been through the ordeal of choosing between love and that high conception of duty which is an enduring basis of the Monarchy. The people of this country and the Commonwealth will accept her decision and will feel for her personally sympathy, affection, and respect."

The Observer (Nov. 6): ". . At the very moment when the freedom of comment and uproar of controversy were beginning to surround the Royal Family with a public hubbub, the two principals in this romantic drama, hitherto silent, spoke—and at once replaced the distorted impressions of the public by a glimpse of the simple, sad, but dignified reality of their story. . . . The Princess was certainly not prevented from marrying by an archaic Act of Parliament—at most a year's delay was involved A disestablished Church of England would not have taken a different view of the irrevocability of marriage · moreover, as far as the question of the succession may have weighed with the Princess, the Commonwealth, containing almost as many Roman Catholics as Anglicans, would not have been indifferent to the divorce issue, even if the leaders of the Church of England had been able suddenly to alter their ideas. In any case, the widely-held public wish that the Royal Family, unlike anyone else in public life, should present an impeccable example may well have been one of the Princess's deepest reasons for thinking that the interests of the Commonwealth and her personal wishes were at variance. . .

Whether the Church's doctrine on divorce or the Church's relationship to the State are right or not—these are highly debatable questions. . . . But it remains obvious that neither the establishment of the Church nor its attitude towards divorce is the creation of persons living today, and that neither factor could have been suddenly altered, even by the most important persons concerned. To blame the Archbishop or any other individual for this situation is not only unfair . it is childishly unconvincing. It also seems clear that the Princess followed her own course throughout the whole wistful story, uninfluenced by *The Times* or the *Daily Mirror*, or by anyone else except those she personally chose to consult. Her personal faith is that of a sincere Anglican ; hence it was natural that she should consult the Archbishop and pay heed to his views. . . .

We feel confident that we speak for many readers in offering Princess Margaret and Group-Captain Townsend our condolence and respect, and our good wishes for their future happiness in the stern course that they have chosen. We offer our sympathy to the Royal Family and to the Group-Captain's family, in what must have been a disturbing time for them all. And we politely suggest that the public search for who is to blame might be discontinued It can serve only as a means to continue discussing a story which genuine sympathy should prompt one to close . . . One thing that this episode has definitely done is to remind us how much dignity can be conferred on such situations by a brave and unselfish attitude "

Sunday Times (Nov. 6) " . . . Now that the orgy of speculation, gossip and rumour is ended, two things are apparent. One is that the allegations that the Princess's decision was influenced by pressure from this, that or the other quarter were baseless ; we have her own word for that. The other is the clear implication that the Princess accepts 'the Church's teaching,' not just because it is the Church's teaching but because she herself believes in that teaching. The battle has not been with external forces, but in her own heart and mind and conscience. Its outcome must be accepted with respect and sympathy. From an ordeal—inseparable perhaps in these days from her station—as appalling as any young woman could face, she has emerged with increased prestige. . . ."

Sir Anthony Eden was asked in the House of Commons on Nov. 1 by Lieut.-Colonel Lipton (Lab.) whether the Government were considering repealing or amending the Royal Marriages Act of 1772. He replied :

" I have had this possibility very much in mind. I should, however, warn the House that this Act is of concern not to the United Kingdom alone but to all the Commonwealth countries of which her Majesty is Queen, and amending legislation could not be undertaken here without their concurrence."

Colonel Lipton then asked : " Has the Government decided, after considering this Act of 1772 in the light of 1955, that it still provides a useful and necessary weapon of control which the Government at the moment are reluctant to abandon, no matter what personal ordeal is involved for anyone ? "

The Prime Minister replied . " In view of Colonel Lipton's imputations, which is what they really are, about the Act, I ought to add that the advice of her Majesty's Government has neither been sought nor given to the Queen during recent events."

Group-Captain Townsend returned to Brussels on Nov. 4 to resume his duties as Air Attaché.—(Times - Daily Telegraph - Manchester Guardian - Daily Express - Daily Mail - News Chronicle - Daily Herald - Observer - Sunday Times)

A. AUSTRALIA. — Trans-Australia Airlines Results.

The annual report of Trans-Australia Airlines, published on Oct. 20, showed that in the financial year 1954-55 the company (which is Government-owned and operated) made a profit of more than £A220,000—nearly double that of the previous year. Its aircraft carried nearly 700,000 paying passengers during the year and flew 322,000,000 passenger-miles—both record figures for Australian domestic airline services. The report said that since its establishment in 1946 Trans-Australia Airlines had carried nearly 4,500,000 paying passengers without a single fatality in its scheduled services.

(Australian News and Information Bureau)

B. FRANCE. — Renewal of British Wool Credit.

It was announced in London on Oct. 26 that a new revolving credit of £7,500,000, which could be increased temporarily to £10,00,000 during the peak of the wool-buying season, had been arranged by Lazard Bros. and Co. with the *Groupement d'Importation et de Répartition de la Laine* for financing French wool purchases in the British Commonwealth during the 1955-56 season. The credit, which was £5,000,000 less than in 1954-55, will be finally repaid in November 1956, the repayment being linked, as hitherto, with the export of French woollen products.—(Times) **(Prev. rep. 13768 A.)**

C. FINLAND. — New Minister of the Interior.

It was announced in Helsinki on Oct. 3 that M. Valto Kakela had been appointed Minister of the Interior in succession to M. Vaino Leskinen, who had resigned. M. Kakela, like his predecessor, is a Social Democrat.—(Le Monde, Paris)

(Prev. rep. 14073 A.)

D. NOBEL PRIZES. — Awards for 1955.

The Nobel Prize awards for 1955 were announced in recent weeks as follows :

Literature Prize. The Literature Prize was awarded to Hr. Halldor Kiljan Laxness (53), the Icelandic author, for " his vivid epic writing which has renewed the great narrative art of Iceland." Halldor Laxness's writings—many of which have been translated into English—deal almost exclusively with life in Iceland, and include *Children of Nature, Olafur Karason, Iceland Bell, Independent People, The Weaver of Cashmere, The Atomic Station*, and *Salka Valka*, the last-named having been filmed A convert to Roman Catholicism, Hr. Laxness has expressed strong Leftist views in many of his works but has denied that he is a Communist. The son of a roadmender, he was born in Reikjavik and was a shepherd-boy in his childhood. Halldor Laxness, the first Icelander to receive the Nobel Prize for Literature, is generally regarded as the leading Icelandic writer of the present day.

Medicine Prize. The Prize for Medicine was awarded to Professor Hugo Theorell (52), the Swedish biochemist, for " his discoveries concerning the nature and mode of action of oxidation enzymes." [Oxidation enzymes—also called " breathing enzymes "—are essential to living matter in helping the cells to burn oxygen, that is, to breathe.] A blood specialist of international repute, Professor Theorell has been director of the Nobel Institute of Biochemistry in Stockholm since its foundation in 1935. In the course of his researches into cell metabolism he evolved the blood-test which is now accepted in the Swedish courts as a test for drunkenness in cases concerning drivers under the influence of drink.

Physics Prize. The Physics Prize was divided between two American scientists—Professor Willis E. Lamb (42), of Stanford University, California, and Professor Polykarp Kusch (44), of Columbia University, New York. Professor Lamb was honoured for his researches into the structure of the hydrogen spectrum, and Professor Kusch for his " precision determination of the magnetic movement of the electron." Both recipients—working independently of each other—have made important contributions to the study of atomic nuclei.

Chemistry Prize. The Chemistry Prize was awarded to an American scientist, Professor Vincent de Vigneaud (54), of Cornell University, for his work on the synthesis of hormones secreted by the pituitary gland. The citation mentioned his success in producing synthetically the gland preparation A C.T.H (Adrenocorticotrophic hormones), which is used in the treatment of rheumatoid arthritis Professor de Vigneaud has done outstanding research on the chemistry of a number of complex substances which are of medical interest.

Peace Prize. The Peace Prize was awarded to the Office of the U.N. High Commissioner for Refugees (Dr. G. J. van Heuven Goedhart, of the Netherlands), which has under its care some 2,000,000 refugees and seeks permanent solutions for their problems It was stated in Geneva (the headquarters of the U N. High Commission) that the award would be used to finance a refugee project which would be named after Alfred Nobel The award was made for 1954 —in which year the Peace Prize was not awarded—and not for the present year. The last occasion on which the prize had been awarded to an organization and not to an individual was in 1948, when the recipients were the American Friends' Service Committee and the Friends' Service Council, London.

The Literature Prize is awarded by the Royal Swedish Academy of Literature ; the Medicine Prize by the Royal Carolinian Medico-Surgical Institute of Stockholm ; the Physics and Chemistry Prizes by the Royal Swedish Academy of Science ; and the Peace Prize by the Norwegian Parliament. The value of the prizes for the present year is about £13,500 each. (Svenska Dagbladet, Stockholm - Berlingske Tidende, Copenhagen - Times - New York Times - New York Herald Tribune)

(Prev. rep. Nobel Prizes, 1954 Awards, 13912 A.)

E. INDIA. — The Konar and Canada Dams.

The Konar Dam, situated in the Hazaribagh district of Bihar, some 23 miles above the confluence of the Konar and Damodar rivers, was officially inaugurated on Oct. 15 by Mr. Nehru. The dam, which is the second of the four multi-purpose dams included in the first phase of the Damodar Valley Project, creates a lake over ten miles square and will provide irrigation in the lower valleys, generate hydro-electric power from the reservoir, and supply water to the thermal power station at Bokaro, which was opened in 1953. It was built at a cost of nearly 100,000,000 rupees.

The Canada Dam, built with funds raised from Canadian assistance to India under the Colombo Plan, was opened on Nov. 1 by Mr. Lester Pearson, the Canadian Secretary for External Affairs. Situated in the jungle district of Santhal Parganas, Bihar, about 160 miles from Calcutta, it harnesses the waters of the Mayurakshi River in a 15 square mile lake, and will provide power for an important hydro-electric scheme for which the equipment will be supplied by Canada. In addition, it will enable 250,000 acres of land to be irrigated, with an ultimate target of 600,000 acres. The dam is 2,000 ft. long and was built at a cost of 160,000,000 rupees.—(The Hindu, Madras - The Statesman, Calcutta) **(14430 A ; 7472 A.)**

A. POLAND. — Premier of Emigré Government in London returns to Poland. - Appeal for Return of Poles Abroad. - Polish Government's Repatriation Offer.

Mr. Hugon Hanke, who had been Premier of the Polish "Government-in-exile" in London since the beginning of August, returned to Poland on September 8.

Mr Hanke (57) held a leading position before the war in the Polish Christian Democratic Party and the Christian trade unions, and was known as a staunch Catholic. He fought in the Polish campaign of 1939, escaped to France after the fall of Poland, was captured by the Germans in 1940, but succeeded in escaping to Britain, where he joined the Polish First Armoured Division He was subsequently on the staff of the Polish Ministry of Internal Affairs in London, and settled in Britain after the war. Shortly after his appointment as Premier of the Government-in-exile (Aug. 8, 1955) he visited Rome, where he saw the Polish (i.e émigré) Ambassador to the Holy See; on leaving Rome on Sept. 5, however, he did not return to Paris, as had been expected, but went on to Warsaw instead Immediately after his arrival he saw Mr. Nowak, First Deputy Premier in the Polish Cabinet.

On Sept. 10 Warsaw Radio broadcast a statement by Mr. Hanke in which he explained his reasons for returning to Poland, strongly criticized the émigré Government in London, and appealed to all Polish émigrés abroad to return to their country. He explained that he had returned to Poland not only to rejoin his wife and children, from whom he had been separated for many years, but also because he could not accept the policies of the émigré Government; at the same time he insisted that he remained a convinced Catholic and a non-Communist. Extracts from his statement are given below.

"Sixteen years ago, as a result of the September [1939] defeat, I found myself abroad During the war I served in Polish Army units in France and Britain. After the war I held different posts in émigré circles in London, including those of chairman of the Christian Association of Trade Unions and deputy chairman of the Christian Democratic Party. In 1953 I became a Minister in General Odzierzynski's Government. In July of this year I was asked by Mr. August Zaleski [the Polish President-in-exile] whether I would accept the post of Prime Minister of the émigré Government in London. I accepted this post at the beginning of August.

Being well acquainted with the life of our émigrés in the West, I had had doubts for some time as to the correctness of the road taken by their leaders. . . . Every day I could see more clearly that the émigré politicians were placing all their hopes on a third war But I did not want a third war which would destroy Poland. The shock which the Geneva Conference was for the émigré leaders made it clear to me beyond any doubt that, apart from a third war, the émigré leaders had no political line or conception. The repatriation campaign, initiated a few weeks ago by the authorities in Poland [see below], showed me the way out for all Polish émigrés and for myself personally—the way of returning to Poland.

I deluded myself into thinking that . . . I might be able to induce the émigré Government to support the repatriation campaign. In August I called a meeting of the Council of Ministers. . . In spite of profound hesitation among the émigrés, I did not succeed in winning over a majority of the London Government for the cause of repatriation. I did not restrict myself to this attempt, and on Aug. 26 I called a conference of representatives of all the political groups, together with the members of the Government. At this conference I saw once again how much selfishness and stubbornness existed with regard to the problem of repatriation among those present Under the circumstances I resolved to go back to Poland and thus set an example to all those who are still hesitating. My decision was hastened by the announcement of official circles in the Polish People's Republic that the Polish authorities would not victimize those coming back for their previous activities. . . "

Shortly before Mr. Hanke's return to Poland, the Polish Government had invited all émigrés abroad to return to Poland, and had promised to "forget and forgive" any past offences of which individuals had been guilty.

Specifically, it was announced that repatriates would be helped by the Polish Government to travel back to Poland and would receive non-repayable grants and allowances from the Government to enable them to settle down. They would be given free food and medical attention until they had found jobs, and would also be helped to find homes. Those who possessed no professional or trade qualifications would receive suitable vocational training, whilst returning farmers would be assured individual farms or work on State farms, with any necessary financial assistance All repatriates would be eligible for old-age and disability pensions, equally with other Polish citizens; and those who had served in the Polish or Allied armed forces during the war would retain the military rank which they held at the conclusion of hostilities with Germany, irrespective of the national forces in which they had served. A Government Plenipotentiary for Repatriation Problems was appointed to co-ordinate the decisions concerning the care and settlement of repatriates.

During recent months many Polish émigrés in Britain, France, and other countries had received appeals to return to Poland, coupled with assurances that they would be given full opportunity to resettle in civilian life and that there would be no victimization for any past activities.

In the case of Polish émigrés in Britain (who number about 140,000) the appeals were particularly directed towards such persons as former political leaders, former high officials, writers, and journalists, and were in some instances signed by university professors and priests. These and other émigrés were promised "a life of decent and dignified employment" in Poland instead of "dish-washing" in Britain.

It was announced by Warsaw Radio in mid-October that over 100 émigrés, the majority from Britain and France, had returned to Poland during the past three weeks. Among those returning from Britain were Dr. Adam Szczpiorski, formerly a leading member of the Polish Ex-Servicemen's Association in Britain, and Mr. Jerzy Wlodarezyk, chairman of the Polish Peasant Party in London. The British Home Office had announced on Sept. 29 that a deportation order had been made against Mr. Malicki, general secretary of the Polish Cultural and Social Association in Britain, an organization sponsored by the Polish Government (i.e. the Government in Warsaw); although no reasons were given for his deportation, it was believed to be connected with his activities in trying to persuade Polish émigrés in Britain to return to Poland.

The Polish Council of National Unity in London issued a statement on Sept. 12 describing Mr. Hanke's return to Poland as an "act of treachery and stupidity," and calling upon Polish émigrés to resist Communist appeals to return to Poland. Count Raczynski (the former Polish Ambassador to Britain) also issued a statement in London on the same day declaring that Mr. Hanke's defection had produced a "sense of injury" among Poles engaged in the struggle for their country's liberation from Communist rule. He asserted that most of the Poles in Britain had been opposed to Mr. Hanke's appointment as Premier of the Government-in-exile.—(Polish Embassy Press Department, London - Times - Manchester Guardian)

B. PAKISTAN. — Cabinet. - New Appointments.

Further Cabinet changes were announced in Karachi on Oct. 17, as follows: Chaudhri Mohammad Ali, the Prime Minister, took over the portfolio of Kashmir Affairs and States and Frontier Regions, in addition to Defence and Economic Affairs, but relinquished the Finance Ministry; Mr. Syed Amjad Ali (formerly Ambassador in Washington) became Minister of Finance; Mr. M. R. Kayani (a member of the North-West Frontier Province Ministry) was appointed Minister of Communications; and Mr. Fazlul Huq, the Minister of the Interior, was also placed in charge of the Education portfolio. The former Minister of Communications and States and Frontier Regions, Dr. Khan Sahib, and the former Minister of Education and Kashmir Affairs, Colonel Abid Hussain, left the Central Government to join the Ministry of the newly-created Province of West Pakistan.

(Pakistan High Commissioner's Office, London) **(14405 E.)**

C. EGYPT. — Suspension of Coptic Patriarch.

The Egyptian Government decided on Sept. 21 to suspend the Patriarch of the Coptic Church (Amba Yussab II), in accordance with a resolution recently passed by the Copt Holy Synod which had demanded the dismissal of the Patriarch and had accused him of using church revenues for his own benefit. As the Patriarch had been elected for life he could not be deposed, and the Government therefore decided to entrust the direction of the Coptic Church for the time being to a committee of three church dignitaries to be elected from among members of the Holy Synod. The Patriarch, who is 82, was removed on the following day to a desert monastery. An attempt had been made on his life on Sept. 20, and in 1954 he had been kidnapped by members of an extremist Coptic group, but released after a few days. (Le Monde, Paris - Times)

D. FRANCE. — Acquittal of Mme. Ollier.

Mme. R. M. Ollier, formerly Second Secretary at the French Embassy in Canberra, was acquitted by a military tribunal in Paris on Oct. 20 of the charge of having "failed to reveal acts prejudicial to national defence." As a result of the disclosures made by M. Petrov when he defected from the Soviet Embassy in Canberra, Mme. Ollier had originally been charged with "having intelligence with a foreign power," but this was subsequently changed to the above charge.—(Le Monde, Paris)

(Prev. rep. 14446 A.)

E. WESTERN GERMANY. — Lower Saxony. - New Minister of Education.

The *Landtag* of Lower Saxony approved on Sept. 14 the appointment of Dr. Richard Tantzen (Free Democrat) as *Land* Minister of Education to fill the vacancy caused by the resignation of Herr Schlüter.—(Frankfurter Allgemeine Zeitung)

(Prev. rep. 14339 A.)

A. ISRAEL. — Economic Development. - Discovery of Oil Deposits. - Mineral Prospecting in the Negev. - Reopening of King Solomon's Mines. - The Negev Water Pipeline. - New "Potash Road" to Dead Sea.

The first discovery of substantial oil deposits in Israel occurred on Sept. 23, when oil gushed 60 ft. into the air from borings near Huleiquat, south-east of Ashkelon (the biblical Askalon) and close to the northern border of the Egyptian-held "Gaza strip." The oil was struck at a depth of 4,900 ft.—about 2,000 ft. deeper than drillings carried out at the same place by the Iraq Petroleum Company, which abandoned oil prospecting in Palestine in 1947.

The concessions previously held by the Iraq Petroleum Company (covering some 66 acres) passed to the Government of Israel when the company abandoned operations. They were re-parcelled into areas available for drilling and leased to private companies, the Government remaining entitled to a royalty of 12½ per cent on any oil produced. The oil strike of Sept. 23 was made on a concession belonging to the Lapidoth Oil Company, an American-Israeli concern in which the Israel Trade Union Confederation (the *Histadruth*) is a substantial shareholder.

The discovery of oil in Israel was greeted with nation-wide enthusiasm in view of the possibility that the country might eventually become independent of oil imports—at present costing between $40,000,000 and $50,000,000 a year, or about one-sixth of Israel's total import bill

On July 19 the biggest irrigation project yet undertaken in Israel was officially inaugurated by President Ben-Zvi, when a 68-mile water pipeline was opened between Rosh Haayin, in central Israel, and the northern areas of the Negev (the arid desert which extends from the Beersheba area to the Gulf of Akaba). Built in two years at a cost of $24,750,000, the pipeline harnesses the waters of the Yarkon River to irrigate a large area of potentially fertile land—about 100,000 acres—which had lain waste for centuries. The water supplies will benefit about 8,000 farming families, and, according to Israeli estimates, should ultimately make possible the settlement of 300,000 to 400,000 people in the northern Negev.

The Yarkon River, rising in the Judean Hills and flowing into the Mediterranean north of Tel-Aviv, has an annual flow of about 200 million cubic metres, half of which will henceforth be diverted southward to the Negev through the new pipeline. At its northern end (Rosh Haayin, near the site of the Herodian city of Antipatris) the pipeline draws water supplies from 450 wells and 1,000 springs near the headwaters of the river. The project involved the laying of nearly 72,000 sections of pipes (of Israeli manufacture), each weighing ten tons; the construction of three big pumping-stations, each with three 2,050-h.p. Diesel engines, and the building of three reservoirs. For security reasons, the pumping stations were built deep underground. Over 60 agricultural settlements in the Beersheba and Lachish areas will be connected with the pipeline.

The U.S. Government granted $4,500,000 for the purchase of equipment for the Yarkon-Negev pipeline and associated water-supply projects, whilst the Israeli Government allotted $9,350,000 from counterpart funds accruing to Israel from the sale of commodities received from U.S. grants. Another $14,850,000 was raised by the United Jewish Appeal in America.

Mineral prospecting in the Negev during the past three or four years had disclosed the presence of important mineral deposits, including phosphates, iron, copper, manganese, gypsum, felspar, and kaolin (china clay). Together with the potash deposits in the Dead Sea region (see below), they gave promise of the ultimate establishment of important chemical, iron, and copper industries, on which, in some cases, work has already begun; e.g., the Fertilizer and Chemical Company (Haifa) is now producing superphosphates from rock phosphate found in the Negev. Moreover, numerous borings have disclosed the presence of considerable subterranean sources of water in the Negev, which can be tapped to irrigate the desert. The Government of Israel has also been engaged in opening up communications in the area, and a road running through the Negev to the port of Eilat, at the head of the Gulf of Akaba (see map, page 14436), was opened in the autumn of 1954.

The Minister of Development (Dr. Joseph) had announced in September, 1953, that the Government intended to exploit the large copper reserves of the southern Negev, amounting to about 100,000 tons; a pilot extraction plant had already been set up, and it was hoped in due course to achieve an annual output of 6,000 tons, resulting in a saving of approximately $4,000,000 a year in foreign exchange. Dr. Joseph added in this connexion that the historic King Solomon's Mines, near the modern port of Eilat, would be brought into production again after having been unworked for 3,000 years. [The copper mines of the southern Negev were worked in the time of Solomon, who built a copper refinery and a seaport and naval base—Ezion-Geber—near the site of modern Eilat.]

A new 50-mile road running from Beersheba to S'dom (the biblical city of Sodom), at the southern end of the Dead Sea, was opened on March 27, 1953, to facilitate the exploitation of the important potash deposits of the area.

The road, described by a correspondent of *The Times* as "the most extraordinary in the world," drops from 1,390 feet above sea-level to 1,250 feet below sea-level at Sodom, and runs between deep canyons and jagged mountains, for eight miles of its course it is cut out of the solid rock in its descent into the deepest gorge in the world. Its construction presented engineering problems of exceptional difficulty, complicated by the fact that all food, water, and other supplies for the workers had to be brought from considerable distances, and that the workers themselves (most of whom were recent immigrants) had to work in conditions of intense heat and discomfort. To allow heavily-laden trucks to drive through the passes, the road had to be constructed without sharp bends or gradients.

Before the Palestine War which followed the establishment of the State of Israel, the potash extracted from the southern end of the Dead Sea was carried by barge to its northern end, near Jericho, and transported from there by road and rail to Haifa *via* Jerusalem The potash plant at the northern end of the Dead Sea was, however, destroyed in the Palestine War, and this area, together with the town of Jericho, is now part of the Kingdom of Jordan. As the only remaining potash works in Israeli territory were those at Sodom, it was necessary to build a new road avoiding Arab-controlled territory for transporting the potash supplies.

Until 1948 potash exports exceeded citrus exports in value, and the Israeli Government aims at raising potash production to 15,000 tons a month.—(Times - Manchester Guardian - New York Times - New York Herald Tribune)

B. WESTERN GERMANY. — Bremen Elections.

Elections for a new *Bürgerschaft* in Bremen (the smallest *Land* of the Federal Republic) were held on Oct. 9. Although Bremen had for several years been governed by a "grand coalition" between the Social Democrats, the Christian Democrats, and the Free Democrats, under the leadership of Herr Kaisen (Social Democrat), the Christian Democrats and Free Democrats opposed the Social Democrats in the present elections, and, together with the right-wing German Party, tried to wrest control from them and to form a new *Land* Government based on the same coalition as the Federal Government. The Social Democrats, however, gained nine seats and secured an overall majority over all other parties, the results being as follows.

	Bürgerschaft seats 1955	1951
Social Democrats	52	43
German Party	18	16
Christian Democrats	18	9
Free Democrats	8	12
Communists	4	6
Refugee Party	—	2
Others	—	12*

* Including eight for the Socialist Reich Party, which were declared vacant when the Federal Constitutional Court suppressed that party as unconstitutional in January, 1952.

At the dissolution of the former *Bürgerschaft* there were 46 Social Democrats, 15 German Party, 9 Christian Democrats, 10 Free Democrats, 6 Communists, 5 Refugee Party members, and one non-party member.

The number of votes was as follows, those in the 1951 *Bürgerschaft* and the 1953 *Bundestag* (Federal) elections being shown for comparison:

	1955 *Bürgerschaft*	1953 *Bundestag*	1951 *Bürgerschaft*
Social Democrats	174,123	137,608	130,471
German Party	60,557	60,283	49,007
Christian Democrats	65,750	88,062	30,172
Free Democrats	31,486	26,680	39,432
Communists	18,229	13,730	21,244
Refugee Party	10,570	11,548	18,744
Others	3,986	16,085	44,430

Polling percentages in the three above-mentioned elections were respectively: Social Democrats, 47 8 (1955), 38.9 (1953), 31.9 (1951); German Party, 16.6, 17.0, 14.7; Christian Democrats, 18 0, 24.9, 9.0; Free Democrats, 8.6, 7.5, 11.8; Communists, 5.0, 3.9, 6.4; Refugee Party, 2.9, 3.2, 5 6, Others, 1.1, 4 6, 13.3.

The electorate totalled 438,953, of whom 84.2 per cent went to the polls.

Despite the Social Democratic victory, Herr Kaisen stated on Oct. 10 that he was still in favour of continuing the coalition with the Christian Democrats and Free Democrats if those parties wished to remain in it. He would not, however, include the German Party, which had ruled itself out by its "attitude to democracy" during the election campaign.

A. LITERATURE. — Book Selections for October.

Selected books published in Great Britain, the United States, France, and Italy during October are given below:

Great Britain. Bates, H. E.—"The Daffodil Sky." Collected Short Stories. (Michael Joseph, 12s. 6d.)

Bertelsen, Aage—"October '43." The Mass Escape of the Danish Jews from German-occupied Denmark. Translated from the Danish. (Museum Press, 12s. 6d.)

Blake, Robert—"The Unknown Prime Minister: The Life and Times of Andrew Bonar Law." (Eyre & Spottiswoode, 42s.)

"Boswell on the Grand Tour, 1765-66: Italy, Corsica and France." The Boswell Papers, fifth volume. (Heinemann, 25s.)

Boyle, Andrew—"No Passing Glory." A Biography of Group-Captain Leonard Cheshire, V.C. (Collins, 16s.)

Bruce, David—"Sixteen American Presidents: From Washington to Lincoln." (Sidgwick & Jackson, 25s.)

Ferrier, Winifred—"The Life of Kathleen Ferrier" (Hamish Hamilton, 15s.)

de Gaulle, General Charles—"The Call to Honour, 1940-42" War Memoirs, translated from the French. (Collins, two volumes. Memoirs, 18s., Documents, 25s.)

Hartley, L. P.—"A Perfect Woman." (Hamish Hamilton, 12s. 6d.)

Maclean, Alistair—"H.M.S. *Ulysses*." (Collins, 12s. 6d.)

Mann, Thomas—"Confessions of Felix Krull, Confidence Man" (Part I). Translated from the German and published posthumously (Secker & Warburg, 18s.)

McVeagh, Diana—"Edward Elgar The Man and his Music." (Dent, 18s.)

Owen Tanney, F. D.—"Isle of Cloves: A View of Zanzibar." (Longmans, 18s.)

Postgate, Raymond—"Story of a Year. 1848." (Cape, 21s.)

Rowse, A. L.—"The Expansion of Elizabethan England." The Elizabethan Age, Volume II. (Macmillan, 30s.)

Thomson, Sir George—"The Foreseeable Future" (Cambridge University Press, 10s. 6d.)

Tolkien, J. R. R.—"The Return of the King." The Lord of the Rings, Volume III. (Allen & Unwin, 21s.)

United States. Gunther, John—"Inside Africa." (Harpers, New York, $6.00.)

France. Murciaux, Christian—"Le gros lot." (Plon, Paris, 420 francs.)

Italy. Scotellaro, Rocco—"Contadini del Sud." (Laterza, Bari, 900 lire.)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14439 D.)**

B. INTERNATIONAL SUGAR AGREEMENT. — Export Quotas for 1955 - World Sugar Production in 1954. - Greek Ratification of International Agreement.

At a meeting of the International Sugar Council in London on Sept. 20, attended by delegates from 23 countries and observers from four others, it was announced that the International Sugar Agreement had been ratified by Greece. Earlier, on July 9, Brazil had notified the Council that she did not intend to ratify the agreement owing to dissatisfaction with the export quota allotted to her.

The Council had announced on April 29 that, in view of changed market conditions and the better balance prevailing between demand and supply, world quotas for sugar exports would be raised from the existing level of 3,709,000 metric tons (at which they had been fixed in November, 1954) to 4,153,000 metric tons. At the same time the quotas of individual exporting countries would be raised from 80 per cent of the countries' basic export tonnages to 90 per cent.

Owing, however, to a subsequent fall in prices, which dropped below the minimum of 3·25 cents per lb. fixed under the International Sugar Agreement, the total world export quota was again reduced on July 5 to 3,925,750 metric tons, and the quotas of individual exporting countries were cut by 5 per cent each. A further 5 per cent cut in individual quotas was made on Aug. 11.

World production of sugar in 1954 was estimated by the U.N. Food and Agriculture Organization at 33,600,000 metric tons—higher than any year except 1953, when production reached 43,200,000 metric tons.—(Economist - Financial Times)

(Prev. rep. 13658 D.)

C. TUNISIA. — Néo-Destour Party. - Expulsion of M. Salah Ben Youssef.

M. Salah Ben Youssef, the secretary-general of the Néo-Destour, was removed from his post and expelled from the party on Oct. 12, on the grounds (*a*) that by his opposition to the recent Franco-Tunisian Conventions he had pursued a policy contrary to that approved by the political bureau, and (*b*) that he had attempted to create divergencies and sow confusion among the membership. As a counter-move, the "Liberation Committee of the Arab Maghreb" (see 13577 A), meeting in Cairo on Oct. 15, expelled M. Bourguiba (president of the Néo-Destour) and the members of the party's political bureau, and announced that it recognized M. Salah Ben Youssef as the only legitimate representative of the Néo-Destour. M. Salah Ben Youssef himself had refused to recognize his expulsion from the Néo-Destour.—(Le Monde, Paris) **(14427 A.)**

D. UNITED STATES.—President Eisenhower's Illness.

President Eisenhower suffered a heart attack on Sept. 24 while on holiday in Colorado, the attack being described by General Snyder, the President's personal physician, as "a mild coronary thrombosis" affecting the anterior portion of the heart. The President was taken to the Fitzsimons Army Hospital in Denver and Colonel Thomas Mattingley, a heart specialist at the Walter Reed Military Hospital, immediately flew to Denver from Washington. Dr. Paul Dudley White, of Boston, a leading American heart specialist, was also called in.

Subsequent bulletins reported a slow but steady improvement in the President's condition. On Oct. 1 he was able to sign some official documents for the first time, and on Oct. 3 he conducted official business with his assistant, Mr. Sherman Adams. On Oct. 8 he had a meeting with Vice-President Nixon, which was followed by meetings with Mr. Dulles, the Secretary of State, and other members of his Cabinet. President Eisenhower left his room in a wheelchair for the first time on Oct. 10, and a medical bulletin on Oct. 23 stated that he would probably be able to leave hospital within 2½ weeks for a prolonged period of convalescence.

Messages of sympathy were sent to the President from all parts of the United States and from many foreign countries. They included messages from Queen Elizabeth II, the Kings of Sweden, Denmark, Norway, Belgium and Greece, the Queen of the Netherlands, the Emperor of Japan, the Presidents of France, the Federal German Republic, Italy, Austria, Switzerland, Yugoslavia, the Irish Republic, and Turkey, his Holiness the Pope, the President of the U.S.S.R. (Marshal Voroshilov), and the Soviet Prime Minister (Marshal Bulganin).

The President's illness caused much political speculation in the United States, where it had hitherto been assumed that General Eisenhower would run for a second term as President and would thus be the Republican candidate in the 1956 election. On Oct. 9 Dr. Paul White said that it was impossible yet to say whether it would be physically possible for President Eisenhower to run for a second term, as it was too early to know for certain whether he would make a complete recovery.

(New York Times - New York Herald Tribune)

E. FINLAND - SOVIET UNION. — Ratification of Porkkala Agreement and 20-Year Extension of Finnish-Soviet Friendship Treaty. - Aviation Agreement.

President Paasikivi of Finland ratified on Oct. 7 the protocol on the 20-year extension of the Soviet-Finnish treaty of friendship and the agreement on the Soviet evacuation of the Porkkala base, which had been signed in Moscow on Sept. 19. Both documents were ratified on Oct. 11 by the Supreme Soviet.

The Finnish Diet had ratified the two documents on Oct. 4 without a division. The Prime Minister (M. Kekkonen) disclosed during the debate that the Finnish delegation had raised with the Soviet Union the possibility of a revision of Finland's eastern (Karelian) frontier, but that there had been no response from the Russian side to these representations.

An aviation agreement between the two countries was signed on Oct. 19. It provided for a direct air service between Helsinki and Moscow with Finnish and Soviet aircraft, Finland thus becoming the first non-Communist country whose aircraft were allowed to fly on a regular traffic route to the Soviet capital. Hitherto the Moscow-Helsinki service had been operated only by *Aeroflot*, the Soviet civil airline.

F. SOVIET UNION. — New Minister of Agriculture.

It was announced in Moscow on Oct. 17 that M. Vladimirovich Matskevich, Deputy Minister of Agriculture, who had recently led a Soviet agricultural delegation to the United States and Canada, had been appointed Minister of Agriculture. The post had been vacant since March, when the Minister of State Farms, M. Kozlov, was dismissed for inefficiency and replaced by M. Benediktov, who was then Minister of Agriculture; in the meantime M. Lobanov, a Deputy Premier, had been placed in general charge of agricultural affairs.—(Times)

G. WESTERN GERMANY. — Refugee Party goes into Opposition. - New Party Chairman.

A congress of the All-German Bloc (Refugee Party), held on Oct. 15-16 at Kassel, unanimously decided (1) to request Dr. Adenauer to dismiss Herr Kraft and Professor Oberländer from their ministerial posts, following their action in leaving the party's parliamentary group; and (2) to go into opposition to Dr. Adenauer's Coalition Government. Herr Friedrich von Kessel was elected chairman of the Refugee Party.

NOVEMBER 5—12, 1955

A. CYPRUS. — Field-Marshal Harding appointed Governor of Cyprus. - Breakdown of Discussions with Archbishop Makarios. - Continuation of Terrorist Activities. - British Troop Reinforcements. - Passive Resistance Campaign sponsored by Ethnarchy Council.

The Colonial Office in London announced on Sept. 25 that Field-Marshal Sir John Harding, Chief of the Imperial General Staff, had been appointed Governor of Cyprus in succession to Sir Robert Armitage. The announcement was worded as follows:

"H.M Government have reviewed the existing arrangements for supreme control of the administration in Cyprus. In view of the importance of the island as a base for the discharge of H.M. Government's obligations in the Eastern Mediterranean, including their obligations as a member of the North Atlantic alliance, and having regard to the need for concerted action by all security forces in the island in order to maintain internal law and order, they have decided that in present circumstances the Governorship should be held by a high-ranking Service officer"

After announcing Field-Marshal Harding's appointment, the statement continued: "A new civilian post of Deputy Governor will also be created. It will be the special duty of the Deputy Governor to assist the Governor in normal administrative work unconnected with security measures A further announcement will be made shortly about the appointment to this post.

"Sir John Harding will proceed to Cyprus very shortly to take up his new duties. Arrangements have been made for General Sir Gerald Templer to assume office as Chief of the Imperial General Staff before the date of Nov. 1 previously announced.

"The present Governor of Cyprus, Sir Robert Armitage, will take up another appointment, which will be announced later"

A further announcement on Sept. 29 stated that Mr. George Sinclair, Regional Officer for the Trans-Volta Togoland Region, Gold Coast, had been appointed Deputy Governor of Cyprus.

Field-Marshal Sir John Harding (59) commanded the 7th Armoured Division at Alamein, and was subsequently Chief of Staff to Field-Marshal Alexander in Italy. Before his appointment as C.I.G.S. in 1952 he had been successively G.O.C.-in-C., Southern Command, C.-in-C., Far East Land Forces, and C.-in-C., British Army of the Rhine As C.I.G.S. he had advised Ministers on strategic problems of the Eastern Mediterranean area

Sir John Harding arrived in Cyprus on Oct. 3 and was sworn-in as Governor on the same day. A few hours after his arrival he announced that he would be meeting Archbishop Makarios (the leader of the *enosis* campaign) on the following day for "man to man" discussions, and expressed the hope that "the position will be clearer to both sides" as a result of these talks. He added that he had three main objectives as Governor of Cyprus: (1) the maintenance of law and order, so that people could go about their business in peace without fear of threats or oppression; (2) social and economic progress; and (3) a readiness at all times to discuss the constitutional development of the island "in the terms of the proposals already made by the British Government."

The Governor had three meetings with Archbishop Makarios —who had previously expressed his willingness to meet Sir John Harding—at the Ledra Palace Hotel in Nicosia on Oct. 4, 7, and 11. In addition, Sir John Harding met the leaders of the Turkish Cypriot community at Government House on Oct. 5. On Oct. 11, however, after the third meeting between the Governor and the Archbishop, it was announced that they had "stated their separate views without being able to reach agreement." The following statement was issued by Sir John Harding the same evening:

"It is with deep regret that I have to announce that discussions with Archbishop Makarios have come to an end without agreement. During our first talk we exchanged views on all aspects of Cyprus's problems. The Archbishop made certain suggestions . . . which were immediately transmitted to London. At the second meeting I explained to him that H.M. Government's position was as stated in the proposals announced at the London tripartite talks. At today's meeting the Archbishop told me he was unable to accept H.M. Government's proposals and his position remained the same as stated. I repeated that H.M. Government's position also remained the same. In reply to the Archbishop's questions I further explained certain passages in the British proposals, but after discussion we were unable to reach agreement on the basis of which we could co-operate for the future well-being of the people of Cyprus.

The breakdown of these discussions is a very serious matter, since I believe that the proposals of H.M. Government were both reasonable and practicable. Before parting, the Archbishop and I agreed that the discussions had not been entirely fruitless, as we had got to know and understand each other. I told the Archbishop that I was always ready to meet him again at any time.

Meanwhile, the life of the people of Cyprus must go on under peaceful conditions. It is my duty as Governor to maintain law and order, and this I intend to do. I call on all law-abiding citizens to exercise restraint and to carry out their duty in preventing terrorism, disturbances, and intimidation. Police and troops have direct orders from me to exercise proper restraint. But law and order must, and will be, maintained"

A statement on the breakdown of the discussions was also made by Archbishop Makarios on Oct. 12.

The Archbishop said that he had submitted to Sir John Harding a plan which declared the right of self-determination to be the indispensable basis for a solution of the Cyprus question. After recognition of this principle, he continued, he (the Archbishop) would be ready to co-operate with the British Government in framing a Constitution for Cyprus which would operate during the transitional period pending the application of the principle of self-determination. Sir John Harding had conveyed these views to London, and at their second meeting had informed the Archbishop that H.M. Government rejected them and insisted on the Macmillan proposals [i.e. those put forward by Mr. Macmillan at the London tripartite conference—see 14413 A.] He (the Archbishop) had replied that these proposals had already been rejected by the Greek Government and by the people of Cyprus, and that in no circumstances should a solution to the question be sought within the framework of the tripartite conference, "the consequences of which have been so sad."

Continuing, Archbishop Makarios said that he had suggested to Sir John Harding that the question should be placed on a new basis, and in no circumstances on "implacable British plans which have already been tried and failed." After declaring that he could not discern in the "Macmillan plan" any possibility of development from a colonial constitution to self-government and self-determination, the Archbishop claimed that his views were fully supported by the Ethnarchy Council and by all Greek Cypriots At his meeting with the Governor on the previous day (i.e. the third meeting on Oct. 11) he had made it clear that new discussions would only be possible "on the basis of self-determination"

The Archbishop expressed his "sincere regret" at the breakdown of his talks with Sir John Harding, and added: "We realize that the consequences will be unpleasant, both to H.M. Government and to the people of Cyprus, but our conscience remains clear." In reply to questions, he said that he would always be ready to meet the Governor if another basis for discussion could be found, but that the initiative would have to come from the Government

In his first broadcast to the people of Cyprus, Sir John Harding declared on Oct. 9 that he would shortly be submitting to the British Government specific proposals for the island's social and economic development. He gave a warning, however, that nothing could be done to further the island's prosperity "if conditions of disorder prevail." After asking the Cypriots to reflect upon the prospects for self-government which had been submitted at the London conference, he continued:

"I am fully aware that it has been represented to you that these proposals were wholly negative and slammed the door in the face of the people of Cyprus. This is not true. On the contrary, they threw wide open the door to self-government, and the path through that door is safeguarded. Beyond that, the future is left open. No-one is asked to commit himself.

It is for you to consider to what destination your steps should be directed after you have passed through the door of self-government. Through your elected representatives you will be completely free to express your views to H.M. Government. Our proposals hold out the promise that freely elected representatives of the Cypriot people can take the main responsibility for the management of their internal affairs. They also look forward to a time when, self-government having been effectively established, elected representatives of Cyprus will be in a position to express their views on the island's future to H.M. Government.

I recognize the close cultural links of the people of Cyprus with Greece and Turkey. I hope, too, that Cyprus feels proud of her place in the British Commonwealth, which is the most powerful association of like-minded nations there has ever been in the world. The road to peace, prosperity, and self-government lies wide open before you, It is for each one of you to decide for yourselves what to do."

Finally, Sir John Harding called upon the people of Cyprus to play their full part in eliminating terrorism, and declared that "there can be no more worthy task than to participate in creating conditions wherein fear no longer exists and everyone can live in peace"

[The broadcast, delivered in English, was also translated into Greek and Turkish. Its text was made known in advance to Archbishop Makarios]

Meanwhile, both before and after Sir John Harding's appointment, terrorist activities by the illegal *Eoka* organization had continued in different parts of the island, leading to the arrest of several hundred persons and to the imprisonment, for terms of up to five years, of individuals found in illegal possession of arms. These and other recent developments in Cyprus are described below under cross-headings.

Terrorist Activities and Security Operations. The principal incidents during the period covered (mid-September to the first week of November) were as follows:

Sept. 17.—The British Institute in Nicosia was destroyed when a crowd of pro-*enosis* demonstrators, mainly youths and young men, set fire to the premises. Serious rioting broke out in Metaxas Square, in the centre of the city, when British troops and Cypriot police were called out to restore order About 40 persons were arrested and a number of policemen and demonstrators injured. Three youths were subsequently sentenced to imprisonment for up to two years for setting fire to the British Institute

Sept. 21.—Rioting villagers at Amiandos (45 miles S.W. of Nicosia) stoned British Commandos who had been sent to the village to remove arches and banners, bearing anti-British slogans, which had been

erected in the main street; the British troops were forced to open fire after the mob refused to disperse, one villager being wounded. In south-east Cyprus, 1,000 troops searched villages in the Akhna area (near Famagusta) after masked terrorists had attacked a police station and escaped with rifles and ammunition.

Sept. 29.—A 24-hour general strike, supported by the Nationalist and Communist trade unions, took place on this date in protest against the refusal of the U.N. General Assembly to debate the Cyprus question (see page 14465) Apart from some clashes with demonstrators at Nicosia, no serious disorders occurred in the island generally. A water-pipe for a British camp was blown up near Limassol, and military vehicles were stoned at road-blocks.

Oct. 5.—A Greek Cypriot policeman was shot by a terrorist in Famagusta, and subsequently died in hospital; the assailant (Savva Karaoulis, a 22-year-old clerk) was arrested Elsewhere in Cyprus, a masked terrorist shot and severely wounded Mr. Stanley Hollowday, the British chief engineer of the asbestos mines at Amiandos.

Oct. 6.—The hill village of Neokhorio, in the extreme north-west of Cyprus, was cordoned off by a detachment of the Royal Scots while a house-to-house search was made for suspected terrorists and arms. British troops had been sent to the village the previous evening to remove Greek flags and anti-British slogans hoisted in the main street; they were pelted with stones and bottles by a crowd which sheltered behind a number of women, and the troops accordingly withdrew for fear of injuring the women if they opened fire.

Oct. 10.—A number of armed and masked terrorists broke into a War Department store at Famagusta, overpowered the Turkish watchman, and escaped with nine cases containing Bren guns, Sten guns, rocket-launchers, and a number of empty Bren-gun magazines A note, bearing the *Eoka* emblem, was left behind acknowledging "the delivery of nine cases of arms from the British Government" and saying that payment would be made "when this island is liberated"

Oct. 20 —Famagusta was placed under a curfew (maintained for the next nine days) after an R.A F. officer had been shot and badly wounded while garaging his car, the assailant escaping. A hand-grenade was thrown into a bar at Nicosia frequented by British troops, the only casualty being a Turkish Cypriot boy who was slightly wounded.

Oct. 22-24.—A number of bomb explosions at Limassol and Famagusta caused injuries to several persons, four of whom were British. A Turkish special constable was severely wounded at Limassol by a hand-grenade, the town being placed under a curfew —continued for several days thereafter—as a result of these incidents.

Oct. 26.—In a broadcast on this date, Sir John Harding announced that assemblies and demonstrations would be banned on Oct. 28 and Oct. 29 during the present conditions in the Colony "created by the forces of disorder and lawlessness." [October 28, the anniversary of Greece's rejection of the Italian ultimatum in 1940, was to have been celebrated by the Greek Cypriots, and Oct. 29, the anniversary of the founding of the Turkish Republic, by the Turkish Cypriots.] At the same time Sir John Harding deplored the "disgraceful record of indiscipline and rowdiness" of some secondary schools in Cyprus, and said that the Government were unable to accept assurances that the school authorities were able to guarantee their pupils' good behaviour.

Earlier in the day some 500 students and schoolboys had staged a "token strike" at Famagusta in protest at the curfew imposed on the town, and had refused to disperse when called upon to do so by the police. Troops were called in and the students were dispersed by riot-sticks and tear-gas.

Oct. 27.—A soldier of the Royal Scots Regiment—Lance-Cpl. Angus Milne, the first British soldier to lose his life as a result of Cypriot terrorism—died in hospital at Paphos from wounds received when a grenade was thrown at a military lorry near the town. In Limassol, where a 24-hour strike had been called by trade unions as a protest against the curfew, two Royal Marine Commandos were wounded by a bomb thrown from a roof-top, a military car was set on fire and destroyed, and an attempt was made to burn down a Naafi store.

Oct. 28.—The Government's ban on processions and assemblies was defied in a number of places, notably in Nicosia, Famagusta, Limassol, Larnaca, and Morphou, and serious rioting occurred in many parts of the island. In Nicosia, the police used tear-gas and batons to disperse groups of youths who had assembled in Metaxas Square and had begun to stone policemen and to erect road-blocks. In Famagusta serious disorders broke out when a mob of several thousand stoned the police and soldiers and threw several sticks of dynamite; the demonstrators were dispersed by baton charges, tear-gas, and fire-hoses and some 500 persons arrested, mostly youths. In Larnaca, some 300 persons—mainly schoolchildren—paraded the town carrying banners with pro-Greek and anti-British slogans, whilst in Limassol a crowd assembled outside the church and sang the Greek national anthem. The most serious disorders occurred at Morphou (a coastal town 25 miles west of Nicosia), where a big crowd attacked the police station, which was reinforced by men of the Gordon Highlanders; three British soldiers were wounded by a hand-grenade, and three demonstrators wounded when the troops opened fire after the mob refused to disperse. Over 300 people were arrested, about 40 Greek Cypriots wounded, and seven British soldiers injured during the day.

A special assize court sitting in Nicosia imposed the death sentence on Savva Karoulis for the murder of the policeman in Famagusta on Oct. 5 (see above). Karoulis was given leave to appeal. The court consisted of Sir Eric Hallinan (Chief Justice of Cyprus), a Greek Cypriot judge, and a Turkish Cypriot judge.

Oct. 30.—The post office in Famagusta and adjacent Government buildings were damaged by a time-bomb which had been placed in a post-box. There were no casualties. The curfew was lifted in Famagusta after having been in force for ten days.

Nov. 7.—An Army communiqué stated that valuable information concerning the organization, equipment, tactics, and supply system of the *Eoka* terrorists had been gained during a successful large-scale operation carried out by troops and police in the mountainous area east of Kyrenia between Oct. 31 and Nov. 6. It was disclosed that 1,700 troops took part in the operation, together with police forces, that six camp sites used by the *Eoka* organization had been discovered; that a number of persons had been detained for interrogation; and that a quantity of arms and equipment had been seized, including two sacks of explosives, some rifles, pistols and daggers, smoke-bombs, police uniforms, and steel helmets. Helicopters and "spotter" aircraft assisted the troops taking part in the operation, who included men of the Royal Marine Commandos, the Royal Leicestershire Regt, the Royal Norfolk Regt, and the 40th Field Regt., Royal Artillery. The communiqué said. "There is no doubt the operation disrupted the *Eoka* organization in the area, and that a satisfactory beginning was made in getting to terms with the terrorists and their under-cover supporters."

British Troop Reinforcements. The British garrison in Cyprus was further reinforced during October by the arrival of the 1st Bn. Gordon Highlanders from Edinburgh, the 1st Bn. Royal Norfolk Regt. from Colchester, and the 1st Bn. Royal Leicestershire Regt. from the Sudan The reinforcements brought the total number of British troops in the island to about 12,000, in addition to 2,000 R A.F personnel.

Major-General A. H. G. Ricketts, Military Commander of the Cyprus District, was given on Sept 28 the new appointment of Director of Public Security, with responsibility for co-ordinating all security forces, troops and police in the island.

Special Court for Political Offences. A special court was set up in Cyprus on Nov 2 to deal with all political offences such as terrorism, illegal processions and assemblies, possession of firearms, and thefts of weapons and explosives. The court was given jurisdiction to try summarily any specified offence punishable by imprisonment not exceeding seven years, defendants having the right of appeal to the Supreme Court. The special court was instituted because the Cyprus courts were overburdened with political cases

Extension of Detention Law. The Government of Cyprus issued an Order-in-Council on Oct. 13 extending for six months (until April 30, 1956) the law under which suspected terrorists can be detained without trial pending investigation of their activities, the persons concerned having the right of appeal to an advisory committee. The law was due to expire on Oct. 31.

"Passive Resistance" Campaign. In a sermon at Kalopsida (25 miles from Nicosia) on Sept 25, Archbishop Makarios announced his intention of sponsoring a "passive resistance" campaign throughout the island which would be "so intense that it would disrupt the machinery of government." Declaring that the "struggle for Cyprus" would be fought in the island after the breakdown of the London tripartite conference, he said that the Cypriot people would "not abandon the struggle even if the whole island is turned into one great prison," and that the passive resistance campaign would "paralyse all life in Cyprus and certainly compel the British to change their views."

Addressing the Ethnarchy Council on Sept. 27, the Archbishop said that his campaign involved the gradual withdrawal of all Greek Cypriots from village boards, municipal councils, advisory committees, school boards, and other public bodies. The Ethnarchy Council approved this proposal and called upon all *Mukhtars* and *Azas* to resign their posts as a first step in the campaign. [*Mukhtars* and *Azas*—equivalent to village headmen—are appointed by the Government to superintend village administration; their duties, which are unpaid, include registration of births, marriages and deaths, the drawing up of local taxation lists, assessment of damage to property, etc] A large number of these officials resigned their functions during succeeding weeks in response to the Ethnarchy Council's appeal.

Archbishop Makarios's Contacts with Communist Mayors. The British Colonial Office stated on Sept. 28 that it had definite evidence that Archbishop Makarios was enlisting Communist support in his campaign against the Government in Cyprus, and that he was arranging to receive three Communist mayors in interview. A spokesman of the Ethnarchy Council denied the allegation that the Archbishop was enlisting Communist support for the *enosis* campaign, but admitted that he had recently seen the three Communist mayors at their own request. The three Communist mayors in Cyprus are those of Famagusta, Larnaca, and Limassol.

Resignation from Cyprus Executive Council. Sir Paul Pavlides, a prominent merchant of Limassol, resigned from the Cyprus Executive Council on Sept. 19 "in view of Britain's failure to recognize the right of the Cypriot people to determine their own future."

The Executive Council (which advises the Governor) consists of seven members, of whom four are Government officials appointed by the Governor, two are Greek Cypriots, and one is a Turkish Cypriot. Sir Paul Pavlides had been one of the Greek Cypriot members since 1946.

Sir John Harding flew to London on Oct. 30 to report to the Cabinet on the Cyprus situation. He returned to Cyprus on Nov. 10.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Cyprus, 14413 A; U.N. Assembly, 14461 A.)

A. UNITED KINGDOM. — Labour Party Conference. - Debates and Resolutions. - Mr. Gooch elected Chairman of Labour Party. - Mr. Gaitskell re-elected Treasurer. - Dissolution of Labour League of Youth. - Party Membership Figures.

The 54th annual conference of the Labour Party was held at Margate on Oct. 10-14 under the chairmanship of Dr. Edith Summerskill, M.P., chairman of the National Executive Committee. Over 400 resolutions were submitted, together with more than 100 amendments, and a large number of matters had to be remitted to the Executive without debate, notably resolutions dealing with housing, education, agriculture, and the health service. The proceedings of the conference are summarized below :

Party Treasurer. Mr. Hugh Gaitskell, M P., was re-elected to the party treasurership, receiving 5,475,000 votes against 1,225,000 votes for Mr. Aneurin Bevan, M P., his only opponent Mr. Gaitskell thus had a majority of over 4,000,000 votes, as against one of 2,300,000 votes over Mr Bevan in 1954. Mr. Gaitskell was nominated by seven trade unions and 18 constituency parties, whilst Mr. Bevan's nomination was put forward by four unions and 33 constituency parties. The unions nominating Mr. Gaitskell were the Amalgamated Engineering Union (A.E.U.), the Transport and General Workers' Union (T.G.W.U.), the National Union of General and Municipal Workers (N.U.G.M.W.), the National Union of Mineworkers (N.U.M.), the United Textile Factory Workers' Association, the National Union of Boot and Shoe Operatives, and the Transport Salaried Staffs Association (T.S.S.A.)—which together have a total vote of more than 2,000,000 Those nominating Mr. Bevan were the National Union of Vehicle Builders, the National Union of Public Employees, the Association of Cinematograph and Allied Technicians, and the Electrical Trades Union (E.T.U.)—which have a combined voting strength of about 206,000. The National Union of Railwaymen (N.U.R), which in 1954 was one of the few large unions to support Mr. Bevan's candidature, switched its support in 1955 to Mr. Gaitskell.

Elections to National Executive. There were three changes in the trade union section, all other members of the National Executive being re-elected. The new Executive will be composed as follows :

Constituency Members. Mr Harold Wilson, M P. (1,066,000 votes), Mrs. Barbara Castle, M.P (1 034,000) ; Mr Anthony Greenwood, M.P (969,000) ; Mr. Richard Crossman, M.P. (897,000) ; Mr. James Griffiths, M.P (853,000) ; Mr. Tom Driberg (790,000) ; Mr Ian Mikardo, M.P. (777,000). Mr. Sydney Silverman, M.P. headed the list of unsuccessful candidates.

Trade Union Members Mr W. A. Burke, M.P. (Union of Shop, Distributive and Allied Workers) ; Mr. H Earnshaw (United Textile Factory Workers Association), Mr. J. W. Stafford (N.U.R.) ; Mr. E. G. Gooch, M.P. (National Union of Agricultural Workers) ; Mr. G. I. Brinham (Amalgamated Society of Woodworkers), Mr. Sam Watson (N.U.M.) ; Mr. J. Cooper (N.U.G.M.W.) ; Mr. F. Cousins (T.G.W.U.) ; Mr. W. M. Tallon (A E.U.) ; Mr. R. J. Gunter (T.S.S.A.); Mr. E. Irwin (E.T.U.) ; Mr. D H. Davies (British Iron, Steel and Kindred Trades Association).

The three new members were Mr. Cousens, Mr. Tallon, and Mr Gunter, who replaced Mr. A. E. Tiffin, of the T.G.W.U. (recently elected to the General Council of the T.U.C.—see 14440 A), Mr. Percy Knight, National Union of Seamen, and Mr. J. Haworth, T.S S.A. (both retiring from the Executive).

Socialist, Co-operative and Professional Organizations. Mr. Arthur Skeffington, M.P. (Royal Arsenal Co-operative Society and National Association of Labour Teachers).

Women Members. Miss Margaret Herbison, M.P , Miss Alice Bacon, M.P., Dr. Edith Summerskill, M.P., Mrs. Jean Mann, M.P., and Miss Alice Horan.

Ex-officio Members. Mr Clement Attlee, M.P , leader of the Parliamentary Labour Party, Mr. Herbert Morrison, M.P., the deputy leader, and Mr. Hugh Gaitskell, M.P., the party treasurer.

Future Policy. The debate took place on the following motions : (1) that all policies should have a Socialist content and that banking, iron and steel, textiles, engineering and shipbuilding, chemicals, and building should be nationalized (moved by Mr. H. Selby, Glasgow, Govan) ; (2) that a special committee be appointed to recast and reinstate, in the light of present-day conditions, the basic principles of Socialism in such terms as to inspire and attract young people into the Labour Party (moved by Mr. C. G. Barson, Harrow) ; (3) that the next Labour Government's policy should include legislation to end all air pollution injurious to the nation's health and economy (moved by Mr. R. E Winterbottom, Brightside) ; (4) that the Executive should compile a policy statement on the role of the Co-operative movement in the formulation of Socialist policy for consideration at the next annual conference (moved by Miss Thomas, Wirral), (5) that the Executive should adopt as the party's official policy the proposals put forward by Co-operative M.P.s to the last Parliament for establishing a Ministry of Consumers' Welfare (moved by Mr. T. I Boagey, Hartlepools).

For the Executive, Mr Griffiths recommended the conference to accept or to remit to the general council—subject to minor qualifications—all the resolutions with the exception of the one from Govan. It was essential, he said, that a new policy should be devised which would be relevant to contemporary problems, would inspire enthusiasm in the party, and would clearly take them " on the next great step towards realizing a Socialist society." Changes were taking place with great speed. Ten years ago the Welfare State, with its twin supports of full employment and comprehensive social services, was only a promise in a political programme Now that it existed it was taken too much for granted. The Labour Party would oppose any attempt to whittle it away, as they regarded it not as a luxury to be discarded in time of stress, but as an essential part of life in any civilized society.

Although he did not want to go into the causes of the defeat at the general election, Mr. Griffiths believed that Labour had, in part, been the victims of their own successes. The present problem for the party was to adjust their thinking and apply their ideals and principles of Socialism to the new environment which their past successes had created. In particular, they must attract youth, who now took security for granted. The problem would be to get a policy which would go onwards from security The party had never regarded the Welfare State as an end in itself but as the means of creating security, which would release great creative energies and harness them in the service of the country and of mankind. In their future policy they must show how to proceed to a society in which there was equality of opportunity and also equality in the ownership of wealth and property.

Urging the conference to reject the Govan resolution, Mr. Griffiths said : " The task at this moment is not to draw up lists of industries to be nationalized. We need to survey, to analyse from our experience, and from there to decide what is the future role of public ownership as an instrument of planning, as the means by which we can bring about greater equality in the ownership of wealth. The Executive think that what we ought to be doing is to examine public ownership in all its roles. We have not devoted as much attention as we ought to have done to the possibilities of methods other than those which we have adopted, not least that of the Co-operative movement. We must now re-examine public ownership in the light of experience . . . We must consider both industries already publicly owned and the other industries which we shall bring under public ownership. In the light of this we must decide what kind of organization we want to control and administer nationalized industries."

Mr. Griffiths then announced that the Executive had rejected the idea of seeking to bring to the next conference a general, comprehensive statement of policy, and proposed instead to prepare a number of reports on specific subjects and to present them at the annual conferences in the course of the next three years. These reports would be on the following subjects : equality, the ownership of industry, housing, the publicly-owned industries, social security (and, in particular, pensions), planning and controls, the nuclear age and automation, education, agriculture, and the individual and society.

The resolutions from Harrow, Brightside, and Wirral were agreed to ; that from the Hartlepools was remitted to the Executive ; and the Govan resolution was defeated by a large majority.

The Right to Strike. Two resolutions on the right to strike were rejected by large majorities The first, moved by the Surrey Federation of Labour Parties, proposed that the conference should resist " with every means at its disposal, including industrial action, any attempt by legislation or otherwise to interfere with the workers' right to strike, whether official or not " ; that the principle should be recognized that negotiations should take place whilst workers were still on strike ; and that the Parliamentary Labour Party should press for an immediate repeal of the Emergency Powers Act of 1920. The second, moved by Mr. W. Malloy (Barons Court), proposed that the conference should resist any attempt to remove, or to interfere with, the workers' right to withdraw their labour.

The resolutions were opposed by many trade union delegates, including Mr. T. Williamson (N.U G M.W), and Mr. Tom O'Brien, M.P. (National Association of Theatrical and Kine Employees), both of whom emphasized the damage done to the trade union movement by unofficial strikes. Mr. F. Cousins (T.G.W U) maintained that the matter was one for the T.U.C. and not for the party conference.

Mr. Sam Watson (N.U.M.), replying for the Executive, appealed for the rejection of both resolutions on the grounds that the first was extremely dangerous and would place on the Executive responsibility for giving an instruction that they could not fulfil, whilst the second said almost the same in different terms. The Executive were not questioning the right to strike, but he thought that it would be " a sorry day " if the party took on themselves a fundamental right that really belonged to the trade unions.

Defence Policy and the Hydrogen Bomb. The following motions were considered by the conference :

(1) A composite resolution opposing the manufacture by Britain of the hydrogen bomb and all nuclear weapons, and condemning " the Government's policy of using those weapons unconditionally in the event of war " (moved by Mr. M. S. Davidson, Wycombe).

(2) A resolution instructing the Executive to obtain from the International Court of Justice an advisory opinion on the legality of (*a*) manufacturing nuclear and other weapons of mass destruction, and (*b*) testing nuclear weapons (moved by Mr R. J. Waterton, Kingston-on-Thames).

(3) A composite resolution declaring that recent developments on atomic and hydrogen weapons had shown that there could be no victors in a world war, which would mean the end of civilization, and calling for speedy action in the United Nations with a view to the peaceful settlement of disputes, the immediate reduction of armaments, and the banning of hydrogen and other weapons (moved by Mr. E A C. Roberts, Amalgamated Engineering Union).

(4) A composite resolution suggesting that Russia and the U.S.A. should be brought together to dissipate their mutual fears ; that the policy of trying to be " a poor third " among the world Powers manufacturing the hydrogen bomb was economically wasteful and militarily futile ; accepting the political risk of a British initiative for

negotiations with Russia and China for a general settlement and peaceful co-existence, "supported by readiness to go ahead on our own and refusing to be committed to war by the U.S.A."; and instructing the Executive to set up a working party, including members of the Socialist Medical Association, to collect and analyse all information on the effects of nuclear bomb tests (moved by Mr. K. Zilliacus, M.P., Gorton).

(5) A resolution demanding the abolition of compulsory National Service (moved by Mr. J. Hepplewhite, United Society of Boilermakers and Shipbuilders)

(6) A resolution calling on the party to take immediate action to reduce the period of National Service and to secure an independent inquiry into its conditions (moved by Mr. F. S. Winchester, National Union of Vehicle Builders).

Mr. Attlee, who opened the debate, said that he had never regarded the argument for banning particular weapons as "a very fruitful line." What the world needed was a general agreement for disarmament down to the point of the absolute minimum required for the preservation of law and order "We are not going to get real agreement on armaments without broad political agreements and, to put it no higher, co-existence," he declared. "As Socialists we want to go beyond co-existence to world brotherhood, but co-existence is a start; for that reason we pressed for top-level talks. It is not enough to have just an agreement. It has to be enforced, and if there is agreement that there should be no war and for reduction of those weapons, inspection must be accepted by all concerned.

"The question facing humanity today is: 'Is it going to survive or is it going to be destroyed by its own inventions?' First we have to get agreement between those Powers which have the hydrogen bomb or can make it, but the whole matter has also to come before the United Nations . . . I believe that the signs are more hopeful for getting agreement today on world disarmament than ever before, because I think all Governments are facing up to realities. We shall continue to press for high-level talks with a view to bringing about all-round disarmament" He did not believe, however, that this could be done by disarming and hoping other countries would follow. Such a policy was unrealistic, and one had to get agreement all round.

Turning to the question of National Service, Mr. Attlee said that there was a case for some reduction in the period of service. "In our view," he added, "given the conditions of modern atomic and hydrogen warfare, the conception of sending masses of troops across the Channel to fight in Europe is out of date." Referring to Sir Anthony Eden's announcement about the age of call-up [made at the Conservative Party conference—see 14493 A], Mr. Attlee said: "I think this is really evading and dodging the issue. It is putting it off for a year or so, and doing so in a way that makes the worst of both worlds. It is not going to be a great help to industry or education. The Government have failed to meet their responsibility. Therefore we are pressing for a full examination. We are prepared to take our full responsibility in the House for looking into this in full. Defence is a matter which concerns us all."

In conclusion, Mr Attlee spoke of the dangers of atomic and hydrogen bomb tests, saying that "we do not realize all the dangers of these modern weapons." The Labour Party believed that there should be an international agreement to stop tests of these weapons.

Mr. Herbert Morrison replied for the Executive at the end of the debate. He said that whilst an agreement was needed on the manufacture of nuclear weapons, the Executive could not support the idea that Britain should take unilateral action. If Britain were the only country to cease manufacturing these weapons, she would be at the mercy of Powers who had them, both in diplomacy and in times of stress and strain. Describing Mr. Zilliacus's resolution as "muddled and confused," Mr. Morrison emphasized that the Labour Government, when in power, had never accepted dictation from the U.S A., and that the Executive would not support any policy which would cut off a future Labour Government from co-operation with other friendly Powers.

The Executive considered that the resolution demanding the ending of National Service was premature, but recommended adoption of the other resolution on this subject, being convinced that there was a case for reducing the period.

Resolutions (3) and (6) were carried, but the other four were defeated by large majorities.

Automation and Nuclear Developments in Industry. Three resolutions were debated on this subject: (1) A composite resolution noting "with concern" that an increase of productivity through automation would ensue without a corresponding increase in the demand for labour; recognizing that only by economic planning could the benefit of this increase in productivity be made available to all the people; and calling on the Executive, in consultation with other sections of the Labour movement, to examine the political and economic implications of these new technological developments and issue a policy statement in time for the next Labour conference (moved by Mr. J. H. Williams, Association of Supervisory Staffs, Executives and Technicians). (2) A resolution demanding a campaign for introducing automation as swiftly and as universally as possible, making unlimited national funds available for the development and introduction of labour-saving techniques, and introducing shorter working days, longer holidays, and earlier retirement as automation became installed (moved by Mr. Lewis, Sutton and Cheam). (3) A resolution asserting that increased productivity through automation would bring mass unemployment if industry continued to be privately owned; declaring the conference to be in favour of converting all industry to public ownership and control; and pledging full support to trade unions in their attempts to secure for workers the full benefits of increased productivity (moved by Mrs. Lena Jeger, M.P., Holborn and St. Pancras South).

Mr. Herbert Morrison, for the Executive, attacked the provision in Mrs. Jeger's resolution which called for the public ownership of all industry. "That is all very fine," he said. "Only, if we are to put in our programme that the next Labour Government will go for public ownership of all industry, let [the] conference face up to considering not only whether it is right for such a policy to be adopted, but whether you are going to get a chance to bring it about. I don't know one member of the Executive . who really believes in such a policy. We had a policy document some years ago in which there was a whole section devoted to privately-owned industry, and it contemplated deliberately and consciously a mixed economy for at any rate a long time to come This policy was accepted . . . but that does not mean that the Executive have turned their backs on public ownership. It means that we have to consider it on the merits of each case." Mr Morrison said that it might be that public ownership would emerge. arising from automation and other new developments, in that case it would have to be justified, as in the case of the application of atomic energy for civil purposes.

The first resolution was agreed to, but the other two were rejected by large majorities.

Fuel and Power. The conference accepted a composite resolution, moved by Mrs. A. Roberts (Barkston Ash) and seconded by Mr. Ernest Jones (N U M), which deplored the Government's "failure to ensure an adequate supply of labour for the mining industry"; their inability to insist on fuel economy by industry; and the "decision to import 12,000,000 tons of coal involving a loss to the community, and charging the loss on imported coal against the mining industry."

Mr Sam Watson, for the Executive, agreed that manpower was dwindling, and attributed this partly to a full economy. If a Socialist State wished to get men to work in the industry, he said, it must address itself to the reason why men would not work in it The campaign of "blaming the miner" was slowly taking effect, because the country had been used too long to an abundant and cheap supply of coal. "This question of finding an adequate supply of labour," he added, "is neither wholly the fault of the Conservative Government nor of the miners, but partly also the fault of the community. which is not prepared to send its sons into mining."

Nationalization and Nationalized Industries. Two resolutions on this subject were agreed to (1) calling for a comprehensive report not later than 1957 on nationalized industries, with particular attention to management, including workers' participation, industrial relations, and compensation, and suggesting that this could be a guide to the extension of public ownership (moved by Mr. G. Foster, Sunderland); (2) declaring that not enough was being done by the Labour Party to inspire confidence in the nationalized industries, and that the party should put the favourable facts before the electorate more forcibly (moved by Mr. F. Tyler, South Hendon).

On behalf of the Executive, Mr. Gaitskell said that they were "absolutely confident" that the policy of nationalization carried out by the 1945 Labour Government was essential to the country's economy. Already a great measure of success had been achieved in those industries. "I get a bit tired of the sniping at the industries from the Tories," he said, "but also of our failure to defend them." With regard to future nationalization, Mr. Gaitskell said: "It is, and will remain, our policy when we take industries into public ownership to pay fair compensation. If we ever departed from that policy I can think of no better gift to the Tories for the next election. But in this inquiry [i.e. the inquiry proposed in the first resolution] we will examine the methods of compensation which have been adopted, and go into the whole question of probable improvements."

Continuing, Mr. Gaitskell said that it might "clear the air" if the party asked itself why it was that people were prepared to accept nationalization proposals in 1945 but not in 1950-51 and 1955. He suggested that it was not because the electors in 1945 had been converted to a belief in Labour's fundamental principles, but because Labour had convinced them that in those particular industries nationalization was the right course. In 1950-51 and 1955, however, Labour had failed to get their proposals across to the people, and had probably lost rather than gained votes as a result of those proposals. After saying that the industries which they were now tackling were not "problem children" in the same way as the older basic industries had become, Mr. Gaitskell declared: "It is not enough just to repeat mechanical slogans to the modern electorate. They want more We have to show that nationalization is related to the standard of living, and it may well be that automation will play a large part in this new age. We have to show that it is related to economic security and to greater equality, a new spirit in industry, and the necessity for economic planning . . . Nationalization to me is a means and not an end in itself."

Foreign Policy. A debate on foreign policy was initiated by Mr. Ernest Jones (N.U M.), who moved a resolution which (*a*) noted with concern the development of the hydrogen bomb and other weapons of mass destruction, and called on the Government to take fresh initiatives for talks between the Powers to bring about the relaxation of tension and the abolition of such weapons through general disarmament under effective international supervision; (*b*) stated that a Far Eastern settlement required the admission of China to the U.N. and the withdrawal of Chiang Kai-shek's forces from Formosa; (*c*) welcomed the stand taken by the Parliamentary Labour Party against the danger of an arms race in the Middle East; and (*d*) called on the Government to do their utmost to achieve German reunification.

Mr. John Burns (Fire Brigades Union) moved an amendment declaring that a peaceful solution of the German problem could be obtained only within the wider framework of measures designed

to ensure the security of all the European States; that German reunification must be achieved in such a way as to prevent the rebirth of German militarism; and that reunification through free elections and the limitation of German military forces must be agreed upon simultaneously.

Two other resolutions were also discussed: (1) recognizing that war was incompatible with Socialism, and declaring the adherence of the conference to a policy of pacifism in foreign affairs (moved by Mrs. B. Lowton); (2) urging the party to press the Government to resume normal trading relations with China (moved by Mr A. Booth, Tynemouth).

Mr. Sam Watson, for the Executive, said that they accepted the resolution on trade with China, but could not accept that on pacifism. They also accepted the N.U.M resolution, but they must oppose the amendment because of the conditions it sought to impose on the reunification of Germany and free elections. Referring to the Middle Eastern situation, Mr. Watson said that Labour's policy was to press for a defence pact with Israel similar to those which Britain had with Iraq, Turkey and Persia. They wanted to defend the Socialist experiment now going on in Israel, but that could "not be done with balloons when the other guy has got tanks and guns."

The N.U.M. resolution was agreed to, Mr. Burns's amendment being rejected by 4,968,000 votes to 1,669,000. The resolution on pacifism was defeated, and that on trade with China accepted.

Racialism in South Africa. The conference agreed, without discussion, to a resolution which stated: "This conference is of the opinion that the policy of *apartheid* now being practised in South Africa is more than an expression of colour prejudice. It is a dangerous and immoral doctrine which condemns certain races as unfit to assume the same responsibilities or enjoy the same democratic principles as others, and sets them apart as inferior human beings, restricting them to a life of servility. Therefore the time has now come for our movement to urge the British Government to officially express its strong disapproval of this policy on two grounds: its incompatibility with the principles of the British Commonwealth, and its violation of the Declaration of Human Rights subscribed to by a majority of States within the U.N. Organization."

Cost of Living. A resolution (moved by Mr. P. Stafford, Ogmore) was adopted, instructing the Executive to press for measures to stabilize the cost of living, and declaring that the next Labour Government would prevent monopolies and price rings from forcing up prices.

Local Government. This matter was debated on two resolutions: (1) expressing concern at the loss of powers by local authorities to such bodies as regional hospital boards, and calling for area conferences, followed by a national conference of representatives of councils, to formulate a Labour Party policy on local Government reform (moved by Mrs. Joan Sterne, Kent Federation of Labour Parties); (2) expressing concern at the lack of consultation between Labour groups throughout the country, and asking for one full session of each annual conference to be devoted to local government affairs (moved by Mr. H Collins, Bristol).

Mr. M Cooper, for the Executive, agreed that local government was an urgent problem which the party had to face. On his advice the conference agreed to the first resolution but rejected that from Bristol.

Pensions and National Insurance. This subject gave rise to one of the most lively and important debates of the conference. Three resolutions were put forward:

(1) A composite resolution expressing concern at the inadequate increases in national assistance allowances, which denied to the majority of old-age pensioners the full amount of the increase in national insurance benefits, and urging the Executive to press the Government to grant immediately the full amount in national assistance allowances (moved by Mr. T Eccles, N.U.G.M.W.). An amendment to add "and to ensure that these are kept in step with any future rise in the cost of living" was moved by Miss A. Brierly (Knutsford).

(2) A composite resolution calling on the party to press for an immediate review of all pensions because of the continued rise in the cost of living, and urging that women widowed before 1946 and now receiving 10s. a week pension should have their pensions raised to the same rate as widows whose husbands were insured under the National Insurance Act, 1948 (moved by Mr F. O. Roberts, Oxford).

(3) A resolution, moved by Mr. Aneurin Bevan, M.P. (Ebbw Vale), urging that the national insurance scheme should be reviewed, and declaring (*a*) that "the scheme should be removed from its present actuarial basis and be financed wholly through the Exchequer, and the principle of equal benefits should be strictly adhered to"; and (*b*) that "the earnings rule regarding retirement pensions should be abolished and all pensions should be related to the cost-of-living index."

In moving his resolution, Mr. Bevan said that the time had come for the Labour movement to review its whole approach to the financing of insurance. "I am not suggesting this in criticism of what we have done," he said, "because I was one of the authors, nor that what we did was immortal. There are some modifications and improvements we should make, and one conclusion we should now reach is that when everybody is in, when insurance is universal and compulsory, it is no longer insurance." If everyone was in, said Mr. Bevan, there was no reason why 26,000 Civil Servants should be employed to count them; people said that it was necessary to defend the fund and keep it on an actuarial basis, but that was "a lot of nonsense." "There ain't no fund," Mr. Bevan added. "Gaitskell knows it better than any of us. Once you raise money on such a scale as this, you have to invest it. When we had a discussion in the Cabinet there were some comrades who suggested we might meet the increased cost of the service by making a contribution from the insurance fund which had grown to enormous proportions. But the Treasury had to tell us that there was no fund. It is just an actuarial fiction."

Sir Alfred Roberts (United Textile Factory Workers' Association) opposed Mr. Bevan's resolution on behalf of his union. From the inception of the national insurance scheme, he said, the T.U.C. General Council had accepted the insurance principle. If the Exchequer took over the liability, the Treasury would have to find £436,000,000 a year by taxation. The first danger in Mr. Bevan's proposal was the arrangement of an adequate subsistence basis of benefit; in a period of depression or slump a Chancellor would have to make cuts, and benefits would therefore be reduced when they were most needed. The second danger was that there would no longer be benefit as of right, since, if the money were to be raised and "doled out" as benefits, it would inevitably be done on the basis of a means test.

Mr. Richard Crossman, M.P., for the Executive, recommended the conference to accept the first composite resolution and its amendment, and to remit to the Executive the second composite resolution and also that proposed by Mr. Bevan—though he emphasized that this did not mean that the Executive accepted the principle of the resolution. There were, he said, two problems to solve: (1) What kind of pensions—a flat-rate or a differing scale? (2) How should the scheme be financed? The grave danger in a flat-rate tax, under which the lowest-paid and the highest-paid made the same contribution, was that the pension would be only what the lowest-paid worker could afford to pay for. There was also serious objection to complete transference of the scheme to the Exchequer. He did not know what a Socialist Chancellor would feel if he had to raise income tax by two or three shillings in the pound to pay for this, thereby limiting all the other jobs Labour had to do in education and health.

It was unrealistic (Mr Crossman continued) to say that the State pension was the only one available in Britain, for half the men who now retired from industry at 65 were receiving some form of superannuation in addition to their old-age pension. One possible plan for Labour would be to leave the private schemes as they were and to try and arrange through the Ministry of National Insurance for a scheme under which any worker who did not belong to a private scheme could belong to a Government scheme. They could go even further. Nationalization of insurance was still technically a part of Labour's programme, and if there were an issue on which he could see the advantage of public ownership, it was in insurance. They had to consider not only what sort of basic pension they could afford, but whether they could work out a scheme of national superannuation so that everyone could look forward to a basic pension and, in addition, a form of superannuation—a full-scale, nationally-owned scheme if that were possible "We had hoped to have a better pensions policy in our election programme," Mr. Crossman added. "We could not have it because we could not reach agreement on these basic problems. We must try to reach agreement very soon."

The first composite resolution was accepted, and the other resolutions remitted to the Executive.

Resolutions remitted without Debate. In addition to the resolutions on housing, education, agriculture, and the health service mentioned above, a number of resolutions were remitted to the Executive without debate because of the lack of time to discuss them. They included resolutions urging that Justices of the Peace should be paid subsistence and loss-of-time allowances; instructing the Executive to prepare a scheme for a full-time organizer in every marginal constituency; affirming that the tradition that the Speaker's seat should not be contested was outdated and should no longer be observed; demanding lower interest rates on loans to local authorities; and urging the abolition of capital punishment.

At the first meeting of the new National Executive, Mr. Edwin Gooch, M.P. (Norfolk North), president of the National Union of Agricultural Workers, was elected chairman of the Labour Party for the coming year, and Miss Margaret Herbison, M.P., vice-chairman. (Mr. E. Irwin, the next in seniority for the party chairmanship, had stated that he did not wish to stand for the office for health reasons.)

At a private session of the conference on Oct. 13 it was decided to abolish the Labour League of Youth as a separate organization, and, in its place, to have youth sections integrated into the constituency parties. It was announced that the National Executive would set up a committee to encourage the formation and education of youth sections. The private session also discussed party finances and expressed general approval for an increase in the affiliation fee as recommended by the Wilson Committee (see 14468 A). Mr. Morgan Phillips (the party secretary) stated after the meeting, however, that the changes necessary in the party's constitution before the increase could be made would have to await the next annual conference. Mr. Phillips also stated that resolutions on the *Daily Herald* had been remitted to the Executive for discussion.

On Sept. 21 a deputation from the National Executive had laid complaints about the *Daily Herald* before the T.U.C. directors of the paper. The main criticism was that not enough space or prominence had been given to political news during the general election and for some time before it. The T.U.C. holds 49 per cent of the shares of the

Daily Herald and appoints four of the directors, whilst Odhams Press, who print and publish the paper, hold the remaining 51 per cent of the shares and appoint five directors. There is an agreement that the paper shall follow the policy of the T.U.C. on industrial matters and of the Labour Party on political matters.

The annual report of the National Executive, published on Sept. 13, showed that individual membership of the Labour Party fell by 71,028, from 1,004,685 in 1953 to 933,657 in 1954, whilst affiliated membership rose by 473,033, from 5,019,337 to 5,564,370. The decline in the number of the League of Youth branches continued, the total (237) being 129 fewer than in the previous year. Party income in 1954, excluding the income of certain other funds, was £206,133 (£7,715 more than in 1953), whilst expenditure amounted to £202,069 (£9,845 more).—(Daily Herald - Times - Manchester Guardian) **(Prev. rep. Wilson Committee Report, 14468 A ; 1954 Conference, 13823 A.)**

A. NETHERLANDS. — Anti-inflationary Measures.

The Netherlands Government announced on Oct. 20 several measures—officially described as an "amber light"—against certain dangerous aspects of the economic situation which indicated that the economy was becoming overstrained, and that domestic expenditure was approaching or exceeding the level of available resources. The measures proposed were :

(1) Depreciation allowances on all new capital investments of industrial and commercial undertakings would be cut from 33⅓ per cent (the rate hitherto prevailing) to a maximum of 10 per cent per annum. ["Capital goods" include office buildings, factories, and office equipment, a depreciation allowance of 33⅓ per cent of their cost price having hitherto been allowed annually.]

(2) The preliminary levy on the annual tax assessment of commercial and industrial firms was increased from 50 per cent to 75 per cent of the previous year's tax. It became payable within the first seven months of the fiscal year, instead of after nine months as was previously the case.

The Government's statement added that restrictions on domestic consumption would at the present time have only a partial anti-inflationary effect because factors abroad were largely responsible for the present favourable world economic situation. It added a warning, however, that if inflationary tendencies became more pronounced the Government would have to enforce further measures affecting all categories of expenditure. (Netherlands News Agency)

B. ITALY. — Joint Action Agreement between Monarchists and Neo-Fascists.

It was announced in Rome on Aug. 28 that the Monarchists and the neo-Fascist M.S.I. (*Movimento Sociale Italiano*) had decided to investigate the possibility of a joint action agreement between the two parties in "the political, parliamentary, and trade union spheres," and that the two party secretaries had been asked to work out a definite understanding. After discussions lasting several weeks the joint action agreement was approved on Oct. 17 by the central committee of the M.S.I. and the national executive of the Monarchists. The agreement, whilst stressing the independence of the two parties as regards their political ideology and organization, contained detailed provisions for "unity of action by the two groups," it being announced that they would wage "a radical fight" against both the Christian Democrats and their allies (the Democratic Socialists, Liberals, and Republicans) on the one hand and against the Communists and "Nenni" Socialists on the other.

The Monarchists, led by Signor Covelli, have 30 deputies in the Chamber and the neo-Fascists 29, thus giving the new Rightist bloc 59 seats out of a total of 590. In the Senate they control 28 seats out of 237. The dissident Monarchist group, under Signor Lauro, remained outside the new alliance.
(Giornale d'Italia, Rome - Corriere della Sera, Milan)
(Prev. rep. Monarchist Party, 13633 B.)

C. AUSTRIA. — New Right-wing Party.

It was announced in Vienna on Oct. 18 that negotiations between the three Right-wing Opposition groups—the Independents, the "Liberal Rally" led by Herr Stubers, and followers of the former Nazi Minister, Herr Reinthaller—had resulted in an agreement to form a new national unity party representing the entire Right-wing Opposition. A committee headed by the former Major-General Franz Rainer was set up at the same time. (Neue Zurcher Zeitung)

D. NYASALAND. — New Governor.

Sir Robert Armitage, lately Governor of Cyprus, was appointed Governor of Nyasaland on Sept. 26 in succession to Sir Geoffrey Colby, whose term of office expires in March, 1956.—(Times) **(Prev. rep. Sir Robert Armitage, 14513 A.)**

E. EGYPT - SYRIA.—Provisions of Defence Pact. - Syrian Ratification. - Saudi Arabian Loan to Syria.

The provisions of the defence pact signed on Oct. 20 between Egypt and Syria were released in Cairo on Oct. 22. They comprised the following 13 Articles :

Art. 1. The two countries affirmed "their devotion to the maintenance of peace and security and their determination to resolve all their international disputes by peaceful means."

Art. 2. Any armed aggression against the forces of either country would be regarded as an aggression against the other. In such an eventuality, each party would render immediate aid to the other, and bring to bear "all means at its disposal, including recourse to armed force, to repel the aggression and restore peace and security."

Art. 3. Egypt and Syria would consult each other, at the request of either party, "whenever international affairs become disturbed to a degree affecting the security of any Arab part of the Middle East or the territorial integrity, independence, or peace of either of the parties."

Art. 4. "In the event of sudden aggression against the frontiers or armed forces of one of the contracting parties, both States will take immediate steps to bring this treaty into force in addition to taking military action to repel the aggression."

Art. 5. To realize the objectives of the agreement, Egypt and Syria agreed to set up (1) a Supreme Council, (2) a War Council, and (3) a Joint Command.

Art. 6. The Supreme Council would consist of the Ministers of Foreign Affairs and Defence of both countries. It would constitute "an official authority to which the C.-in-C. of the Joint Command shall be responsible."

Art. 7. The War Council would consist of the Chiefs of Staff of the two countries. It would be a consultative body to the Supreme Council

Art. 8. The Joint Command would be headed by a Commander-in-Chief, who would have at his disposal units [of the two countries] which would be placed at the disposal of the Joint Command. This Command would have "a permanent character and would function in peace-time as well as in wartime."

Art. 9. Egypt and Syria agreed to place at the disposal of the Joint Command, in peace-time as well as in wartime, "all forces under arms that they possess, including troops stationed on the Palestine frontier."

Art. 10. To cover the expenses of the Joint Command, the two countries agreed to establish a common defence fund which would be distributed equally between the two States. Egypt would contribute 65 per cent of the fund and Syria 35 per cent.

Art. 11. "The treaty contains no stipulation affecting, or capable of affecting, the rights and obligations of the two States under the U.N. Charter, that derive from or might result from responsibilities assumed by the Security Council for safeguarding peace and international security."

Art. 12. The treaty would have a duration of five years, and would be renewable by mutual agreement.

Art. 13. It would be ratified according to the constitutional processes of both countries, and would come into force on the exchange of instruments of ratification, which would take place in Damascus not more than 30 days after the signing of the treaty.

General Abd-el Hakim Amr, Egyptian Minister of Defence and C.-in-C. of the Egyptian armed forces, was appointed Supreme Commander of the Joint Egyptian-Syrian Command set up under the treaty.

The Syrian Parliament ratified the defence pact on Nov. 5, and on Nov. 10 approved a Bill allocating £15,000,000 (Syrian) for the Defence Ministry and for equipping the Army. On Nov. 8 the Saudi Arabian Government granted Syria a loan of $10,000,000 (£3,571,000) to enable her to meet her current economic difficulties and her commitments under the defence pact with Egypt.—(Le Monde, Paris - New York Times - Times) **(Prev. rep. 14485 A.)**

F. MALTA. — Budget. - Introduction of National Insurance and National Assistance.

Mr. Mintoff, the Maltese Prime Minister and Minister of Finance, presented his first Budget to the Legislative Assembly on Nov. 7. It showed income at £8,968,000 and expenditure at £11,160,000, leaving a deficit of £2,192,000 which, Mr. Mintoff said, would be made good with British Government assistance, no new taxation being proposed. The Budget envisaged the introduction of national insurance and a national assistance board, an increase from 2 to 2½ per cent in Government savings bank interest rates, salary increases for the police, fuller technical education, and harbour development. (Times - Daily Telegraph) **(Prev. rep. British Aid, 12563 A.)**

G. PUERTO RICO. — U.S. Supreme Court rejects Appeals by Nationalist Leaders against Prison Sentences.

The U.S. Supreme Court rejected on Oct. 24 the appeals of 12 Puerto Rican nationalist leaders against the sentences of six years' imprisonment which they had received in October, 1954, on charges of seditious conspiracy to overthrow the Government of the United States. The appellants included the four nationalists convicted in connexion with the shooting incident in Congress.—(New York Herald Tribune) **(13898 B.)**

A. UNITED KINGDOM. — The Prime Minister's Guildhall Speech. - Statement on Arab-Israeli Dispute. - British Offer to guarantee Arab-Israeli Frontiers. - Criticism of Soviet Attitude to German Reunification.

A review of the international situation, with special reference to the tension between Israel and her Arab neighbours, was made by Sir Anthony Eden on Nov. 9 at Guildhall, on the occasion of the annual banquet given by the new Lord Mayor of London (Alderman Cuthbert Ackroyd). In the course of his speech Sir Anthony announced that Britain would be prepared to give a formal guarantee to both sides if an acceptable arrangement could be reached for settling the frontiers between Israel and the Arab States. He also spoke of the lack of progress at the four-Power conference of Foreign Ministers at Geneva (which had opened on Oct. 27), and, in this connexion, condemned the Soviet refusal to agree to the holding of free all-German elections as a prior condition for German reunification.

". . . Since my famous predecessor spoke to you a year ago," Sir Anthony said, " we have seen the free nations of the West happily welded together. The Federal Republic of Germany has joined NATO and the Western European Union. It is sad that the first Supreme Commander of the North Atlantic Forces, President Eisenhower, should at this moment be laid aside by illness. It is an unhappy conjunction of events that at this time two of the world's wisest and bravest statesmen, the President of the United States and the Chancellor of the Federal Republic of Germany, should be absent from our counsels through illness. We look forward eagerly to their full recovery.

We in this country are indeed fortunate that, in spite of lively controversy in our political life, there is profound agreement between us on those matters which affect our country's safety and its place in the world. In this instinctive unity we are at one with our fellow nations of the Commonwealth. I am happy that it has been possible to arrange a meeting of the Commonwealth Prime Ministers in London in June next year. . . .

It has been the hope of us all that at Geneva the welcoming smiles of summer would be interpreted into solid agreements. . We all welcome the easier personal relationship established by the Heads of Government in Geneva, but we have always made it plain that it will be upon the results of these more detailed meetings that judgment will finally be pronounced. I have, therefore, only three comments to make on the present state of the discussions at Geneva.

First, to attempt to keep Germany divided for a further indefinite period, ten years after the war is ended, adds to the dangers in Europe and is no contribution to peace.

Secondly, Germany, like any other country, must be free to make her own decision as to her political future by the free voice of her people. In other words, she is entitled to free elections. It is indefensible to hold that free elections cannot take place because the Communist system must be preserved.

Thirdly, the Western nations and Soviet Russia cannot but recall the experience of past years. Mutual undertakings should therefore be given and taken against any act of aggression in Europe. This is the most effective assurance we have been able to devise. If it can be improved upon, let other suggestions be made.

We in this country have had something to do with the authorship of the proposals put forward by the West at Geneva, but of course we do not suggest that they are unalterable. But any alternative, to be of real value, must take account of the three essential elements I have described.

Meanwhile, the discoveries of science underline the responsibilities of statesmen. . . There is no leader of any one of the great Powers of the world who does not know how utterly destructive to all mankind any conflict between them must be. We pray that this knowledge will bring prudence. In a measure it has probably already done so, but it is not enough for the great nations to hold back from the final act that leads to war They must lead, guide, and restrain those whose conflicts may begin on a minor scale but could yet wrap the whole of the world in flames.

Here I have to discuss a grave situation Between Israel and Egypt lies an area of dangerous tension. During the past seven years we have been trying to bring about some kind of settlement in that part of the world, and to prevent competition in armaments there. We have not been entirely unsuccessful. Despite frontier incidents from time to time, some more serious than others, there has been no war since 1948. The level of arms has been kept relatively low. This applies especially to the more modern weapons. There has been some kind of a balance, though naturally each side proclaims it is less favoured than the other.

I had hopes that many people in these lands were beginning to see that a way to peace must somehow be found in all their interests. We have been working for a long time past without publicity to promote such a result. In this connexion, the reception given to Mr. Dulles's proposals [see 14392 A] was by no means discouraging. It should be followed up.

But now, into this delicate situation, the Soviet Government have decided to inject a new element of danger and to deliver weapons of war—tanks, aeroplanes, even submarines—to one side only. It is fantastic to pretend that this deliberate act of policy was an innocent commercial transaction. It is no such thing. It is a move to gain popularity at the expense of the restraint shown by the West. By this means it is intended to make it easier for Communism to penetrate the Arab world. Its consequences should be clear for all to see. Many proud States, some of which have not long enjoyed independence and national identity, will be threatened with submergence in the Communist empire if they fall victims to these tactics. For our part we find it impossible to reconcile this Soviet action with protestations that they wish to end the ' cold war ' in the new spirit of Geneva.

The authors of these actions must have known well enough in advance what the effect of the sudden arrival of these large quantities of arms must be It has brought a sharp increase of tension with very dangerous possibilities, particularly between Egypt and Israel. Yet when nations face each other in hostility it is not much use blaming them for getting arms wherever they can. It is not the recipients, it is the suppliers, who must be held mainly responsible.

The immediate task is to prevent the outbreak of war. General Burns, the U N Chief of Staff in Palestine, has been tireless in his efforts to keep the forces of the two sides apart. He and his staff have shown patience and courage in this hazardous work, and we are most grateful to them General Burns is urging both sides to withdraw their forces from the El Auja demilitarized zone. We are giving him full diplomatic support for his present proposal in the capitals concerned. Let there be no mistake. Were any country to reject counsels of moderation, it would forfeit the sympathy of this, and I believe every other, peace-loving nation. Once lost. this sympathy might be hard to regain.

I have never known a situation where it was clearer that neither party has anything to hope for in the long term from any military conflict. It is in the interests of both to put the demilitarized zone between them I saw General Burns when he was in London three days ago, and he knows that if there is any further help we can give him, we shall be glad to do so.

It will be a great gain if the risk of frontier incidents can be reduced. It will be a greater gain if the tragic problem of the refugees can be dealt with. I much regret that the hard work which Mr. Johnston, of the United States, has devoted to preparing irrigation schemes has not yet been accepted by those concerned It should be, for it is in the interests of all, Israeli and Arab alike. We are ready to help here also, as we have done with the Arab refugees But beneath the volcanic crust of these smouldering dangers lies a deeper peril still. The hostility between Israel and her Arab neighbours is unreconciled. Here, time has proved no healer. There is no progress to record since the armistice agreements six years ago. If it were not for these harsh and enduring sentiments, the countries of the Middle East could give all their efforts to their economic and social plans. They could then all concentrate on building up happy and prosperous societies in their lands.

As I have said, we have tried for a long time past to find common ground for some kind of settlement. I think that the time has now come when the acute dangers of the situation force us to try again. We must somehow attempt to deal with the root cause of the trouble. Our country has a special responsibility in all this, for we have a long tradition of friendship with the Middle East. I believe that it should be possible for us to find common ground between the two positions.

There is, after all, one interest the parties ought to share Neither Israel nor her Arab neighbours want to see their differences turned to the advantage of anyone else. From that starting-point, can we not all look once again at the proposals which the U.S. Government and we ourselves have advocated. We have only one desire in this, if our Arab and Israeli friends would but believe us It is to help to find a means of living which will enable the peoples concerned to dwell side by side in peace.

If, for instance, there could be accepted an arrangement between them about their boundaries, we, and I believe the United States, and perhaps other Powers also, would be prepared to give a formal guarantee to both sides. This might bring real confidence and security at last. Our countries would also offer substantial help—financial and other—over the tragic problem of the refugees.

Can we not now move even a little further than this ? The position today is that the Arabs take their stand on the 1947 and other U.N. resolutions. They have said that they will be willing to discuss terms with Israel on that basis. The Israelis, on the other hand, found themselves on the Armistice Agreement of 1949 and on the present territories which they occupy. Between these two positions there is a wide gap, but is it so wide that no negotiation is possible to bridge it ? It is not right that U.N. resolutions should be ignored. But equally, can it be maintained that the U.N. resolutions on Palestine can now be put into operation as they stand ?

The stark truth is that if these nations want to win a peace which is in both their interests, they must make some compromise between these two positions I am convinced that it is possible to work this out, and if we could do so it would bring relief and happiness to millions The sooner the better. If we fail to do so, none can tell what the consequences may be. Her Majesty's Government, and I personally, are available to render any service in this cause. If there is anything we can do, we will gladly do it for the sake of peace."

Sir Anthony Eden informed the House of Commons on Nov. 10 that the conference of Commonwealth Prime Ministers —referred to in his Guildhall speech—would open in London on June 27, 1956.—(Times - Daily Telegraph) **(Prev. rep. Sir Winston Churchill's 1954 Guildhall Speech, 13900 A; Middle East Situation, 14485 A.)**

A. ISRAEL. — New Cabinet formed by Mr. Ben-Gurion. - Statement of Policy. - Peace Offer to Arab States. - Government Programme.

A new Israeli Cabinet was formed on Nov. 2 by Mr. David Ben-Gurion, the leader of the Israel Labour Party (*Mapai*). It comprised 16 members, of whom nine were drawn from the *Mapai*, two from each of the Left-wing parties, the *Mapam* and *Ahdut Avoda*, two from the orthodox *Mizrachi - Hapoel Hamizrachi* group, and one from the Progressives (Liberals), its membership being as follows:

Mr. David Ben-Gurion (*Mapai*)	Prime Minister and Minister of Defence.
Mr. Moshe Sharett (*Mapai*)	Foreign Affairs.
Mr. Israel Bar-Yehuda (*Ahdut Avoda*)	Interior.
Mr. Pinhas Rosen (Progressive)	Justice.
Mr. Levi Eshkol (*Mapai*)	Finance.
Mr. Pinhas Saphir (*Mapai*)	Commerce & Industry.
Mrs. Golda Myerson (*Mapai*)	Labour
Mr. Kadish Looz (*Mapai*)	Agriculture.
Mr. Mordecai Bentov (*Mapam*)	Development.
Mr. Israel Barzilai (*Mapam*)	Health.
General Moshe Carmel (*Ahdut Avoda*)	Transport.
Mr. Josef Burg (*Mizrachi* group)	Posts.
Mr. Moshe Shapiro (*Mizrachi* group)	Social Welfare and Religious Affairs.
Mr. Behor Shitreet (*Mapai*)	Police.
Mr. Zalman Aranne (*Mapai*)	Education.
Dr. Perez Naphtali (*Mapai*)	Minister without portfolio.

Mr. Ben-Gurion (who is 69) was Israel's first Prime Minister from May, 1948, until December, 1954, when he retired into private life. He rejoined the Cabinet in February last (see 14063 C), when he was appointed Minister of Defence in Mr. Sharett's Government. Mr. Sharett, the former Prime Minister, retained the portfolio of Foreign Affairs, a post he has held uninterruptedly since the establishment of the State of Israel.

A statement of policy was made by Mr. Ben-Gurion to the *Knesset* on Nov. 2, the greater part of his speech dealing with the tension between Israel and her Arab neighbours. Mr. Ben-Gurion strongly criticized the supply of arms to Egypt by the Communists, emphasized that Israel would defend her freedom and independence by all means in her power, but at the same time offered to meet the Prime Minister of Egypt (Colonel Nasser) and any other Arab rulers in order to reach a settlement of Arab-Israeli problems.

After a warm tribute to the work done by the outgoing Prime Minister, Mr Sharett, Mr. Ben-Gurion said that the Government was ready to conclude a lasting peace settlement and to enter into long-term political, economic and cultural co-operation with Israel's neighbours. The Egyptian Government, and other Arab countries, "now have the opportunity to show the world what they really want, war or peace," and he was prepared to meet Colonel Nasser and other Arab rulers as soon as possible in order to work out "a mutual settlement without any prior conditions."

Mr. Ben-Gurion continued: "If the other side should not yet be ready to go so far, we would agree to a limited settlement ensuring the full implementation of the armistice agreements, the mutual elimination of all acts of hostility, including boycott and blockade, the observance of the freedom of seas, and such other arrangements as may be agreeable to both sides. The Government is prepared, as in the past, to observe faithfully all the provisions of the armistice agreements, both in the letter and in the spirit.

"But this is an obligation which is also binding on the other side. An agreement which is violated by the other side will not then be binding on us. If the armistice lines are regarded as being open to the passage of murderers and saboteurs from one side, they can by no means remain closed to the defenders of the other side. If our rights are affected by acts of violence on land or sea, we shall reserve our freedom of action to defend them in the most effective manner. Our aim is peace, but not suicide. . . . We have never initiated a war against anyone, and never will. We do not covet a single inch of foreign soil, just as we shall not permit anyone to deprive us of a single inch of our soil as long as we remain alive."

Deriding the Communist assertion that the supply of arms to Egypt by Czechoslovakia was a mere "commercial deal," Mr. Ben-Gurion said that he had too much respect for the political understanding and realism of the Czechoslovak Government to believe that it was unaware of the use to which Egypt would put the tanks, aircraft, guns, submarines, and other armaments now being supplied to her. "But," he added, "in fairness to the Prague Government, I am bound to say that they acted not entirely of their own volition but also by the decision and initiative of the Soviet Union." Mr. Ben-Gurion also criticized Britain for selling to Egypt arms which were denied to Israel, and the United States for supplying arms to Iraq, "a country which has gone so far as to refuse to sign even an armistice agreement with us."

"It is my duty," Mr. Ben-Gurion declared, "to tell the Powers that rule the world—all of them without exception—that the people of Israel will not be led like cattle to the slaughter. . . . Many peoples have fought for their freedom and existence, as this small people of Israel has fought and will fight for its freedom and existence. What Hitler did to the 6,000,000 helpless Jews of Europe's ghettoes will not be done by any foe of the House of Israel to the community of free Jews rooted in their own land. Any aggressive design against our freedom and existence is bound to lead to a dangerous explosion, the results of which cannot be foreseen. The responsibility will then fall both on those who supply arms to the many aggressors and on those who deny arms to the few defenders . . . "

The parties represented in Mr. Ben-Gurion's Cabinet (which command 75 of the 120 seats in the *Knesset*) issued an agreed programme of Government policy which included the following principles:

(1) Encouragement of immigration from countries where the present position of the Jewish population was difficult; (2) progress towards economic independence; (3) settlement of uninhabited areas, particularly the Negev; (4) security, peace, and friendly relations with all countries, (5) full employment, with steps to lower the cost of living; (6) encouragement of education and science, (7) strengthening of democracy and the independence of Israel. The programme also declared, *inter alia*, that the Government would seek to establish Eilat as a port with free access to the Red Sea; that it would meticulously observe the Arab-Israeli armistice agreements and insist on their observance by neighbouring countries, and that it would take "effective measures for the protection of frontier settlements and the relief of tension along the borders, and work untiringly for the achievement of peaceful relations and co-operation between Israel and the Arab States."

The programme also declared that the Government of Israel "will not lend its support to any aggressive trend or alliance directed against any State whatsoever." Foreign observers commented that this was an apparent indication of the growing influence of the Left-wing Socialist parties (the *Mapam* and *Ahdut Avoda*), both of which advocate a "neutralist" foreign policy.—(Times - Manchester Guardian - New York Times)

(Prev. rep. Elections, 14370 B; Cabinet, 14308 A.)

Corrigendum. In the last paragraph of 14370 B, dealing with the politico-religious parties in Israel, it was erroneously stated that the *Mizrachi* and *Hapoel Hamizrachi* group is of a more strictly orthodox character than the *Agudat Israel* and *Poalei Agudat Israel* group. The converse is in fact true, the last-mentioned group being the more orthodox of the two.—(Ed. K.C.A.)

B. UNITED KINGDOM. — Parliament. - Unseating of Sinn Fein Members. - Seats taken by Ulster Unionists.

Lord Justice Black and Mr. Justice Sheil, of the High Court of Northern Ireland, ruled at Enniskillen on Sept. 2 that Mr. Philip Clarke, the successful Sinn Fein candidate in the Fermanagh and Tyrone division at the general election, was legally incapable of having been elected, and that the unsuccessful Ulster Unionist candidate, Lieut.-Colonel Robert Grosvenor, should have been returned. A similar decision was given by the same two judges at Omagh on Oct. 7, when they ruled that Mr. Thomas Mitchell, who had been returned for Mid-Ulster as a Sinn Fein candidate at both the general election and the subsequent by-election (see 14357 C), was also incapable of having been elected, and that his seat should have gone to Mr. Charles Beattie, the unsuccessful Ulster Unionist candidate.

Petitions for the unseating of Mr. Clarke and Mr. Mitchell had been presented to the High Court of Northern Ireland on behalf of Lieut.-Colonel Grosvenor and Mr. Beattie respectively, on the ground that neither of the Sinn Fein members were legally capable of election because they were serving ten-year sentences for treason-felony for taking part in the arms raid on Omagh barracks in 1954. Neither Mr. Clarke nor Mr. Mitchell chose to appear in court or to be represented.

Mr. Beattie and Lieut.-Colonel Grosvenor accordingly took their seats in the House of Commons on Oct. 25, after the Speaker had been officially notified by the High Court of Northern Ireland that the election of the two Sinn Fein members was invalid and that the Ulster Unionist candidates should have been returned. A Government motion to amend the electoral return for Fermanagh and South Tyrone (i.e. to unseat Mr. Clarke and to declare Colonel Grosvenor elected in his place) was adopted by 280 votes to 99, a number of Labour back-benchers opposing. The motion to amend the electoral return for Mid-Ulster (i.e. to unseat Mr. Mitchell and declare Mr. Beattie elected) was passed without a division.

The return of Mr. Beattie and Colonel Grosvenor increased the Government's majority by two, and meant that all 12 Northern Irish constituencies were represented by the Ulster Unionists. Party strengths in the House of Commons at the beginning of November (excluding the Speaker and four vacancies) were thus: Conservatives and associates (including 12 Ulster Unionists), 345; Labour, 274; Liberals, 6. The four vacancies were caused by the deaths of Mr. Hector McNeil (Lab., Greenock), Mr. William Whiteley (Lab., Blaydon), Mr. J. T. Hall (Lab., Gateshead West), and Mr. Charles Williams (C., Torquay).—(Times - Daily Telegraph - Belfast Telegraph)

(Prev. rep. 14357 C.)

A. PAKISTAN. — Establishment of Province of West Pakistan. - Interim Cabinet formed by Dr. Khan Sahib.

Under an Order issued on Oct. 5 by the Governor-General of Pakistan, Major-General Mirza, the unified Province of West Pakistan came into being on Oct. 14. The Governor of the new Province, Mr. M. A. Gurmani, an interim Cabinet of seven members headed by Dr. Khan Sahib, and the judges of the new High Court of West Pakistan, led by the Chief Justice (Mr. S. A. Rahman) took the oath of office at Lahore on the same day. To mark the occasion the Governor-General granted an amnesty to all prisoners detained under martial law, special prayers were said in the mosques, and all Government offices in West Pakistan were closed for the day.

The main provisions of the Establishment of West Pakistan Bill, which had been given a third reading in the Constituent Assembly on Sept. 30, were as follows:

(1) The Governor-General was empowered to declare by public notification the integration into a new Province of West Pakistan of (*a*) the Governors' Provinces of the Punjab, the North-West Frontier, and Sind; (*b*) the Chief Commissioner's Province of Baluchistan, (*c*) the Federal Capital area of Karachi, subject, however, to the provisions under (3) below; (*d*) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (*e*) the Tribal Areas of the N.W. Frontier; and (*f*) the Frontier States of Amb, Chitral, Dir, and Swat.

(2) The Governor-General was empowered to rename the Province of East Bengal as East Pakistan.

(3) The Federal Capital area, to be demarcated by the Governor-General, would be situated in or near Karachi, and would continue to be administered by the Central Government as the supreme authority. Accordingly, the Governor-General would have power to suspend or modify any provision of any Provincial or Central law in its application to the Capital area

[It was subsequently explained that the new site at Gadap, on which the main Federal Government buildings would be situated (see 14427 B), fell within the present city limits of Karachi, and that the capital would continue to be known as Karachi or New Karachi.]

(4) The Tribal Areas of Baluchistan and the N.W. Frontier Province, and the States of Amb, Chitral, Dir, and Swat, were declared "special areas," the boundaries or administrative structure of which might be changed by the Governor-General only after consultation with the representatives of the areas concerned.

(5) All laws in force in West Pakistan at the time of its formation would remain valid, unless changed by an Order of the Governor-General or by the competent Legislature.

(6) The Governor-General was empowered to adapt existing laws for the administration of the new Province during a transitional period of six months, and to delegate to the Governor of the Province powers to modify laws so as to ensure efficient administration.

(7) A single High Court of Judicature for West Pakistan would be established from a date to be proclaimed by the Governor-General, and the High Court at Lahore, the Chief Court of Sind, the Judicial Commissioners' Courts in the N W. Frontier Province and Baluchistan, and any other court functioning as a High Court within West Pakistan, would be abolished. The new High Court would consist of judges of the Lahore High Court, the Sind Chief Court, and the Judicial Commissioner's Court in the N.W. Frontier Province, and would have the same original, appellate, and other jurisdiction, and the same powers and authority in respect of West Pakistan, as the Lahore High Court had possessed hitherto within the territories in which it exercised appellate jurisdiction. The new Court would establish benches which would sit in circuit at various places in the new Province.

(8) Pending the election of a Provincial Assembly by adult franchise, which would require the delimitation of constituencies and the establishment of electoral machinery, an Interim Provincial Assembly of 310 members would be chosen by indirect election The distribution of seats would be as follows.

(*a*) Punjab—124 (including four women and three non-Moslems), elected by the members of the existing Provincial Assembly.

[The Bill thus implemented the concession earlier made by the Punjab to accept, for a 10-year period, a representation equivalent to only 40 per cent of the Legislative Assembly, instead of the 56 per cent to which it was entitled on a strict population basis—see 14972 A.]

(*b*) Sind—57 (including two women and six non-Moslems, one of whom would represent the Scheduled Castes), elected by the members of the existing Provincial Assembly.

(*c*) North-West Frontier Province—42 (including two women), elected by the members of the existing Provincial Assembly.

(*d*) Khairpur—4, elected by the members of the existing State Assembly.

(*e*) Bahawalpur—23 (including one woman), elected by non-official members of the Bahawalpur, Bahawalnagar, and Rahimyarkhan District Boards.

(*f*) Frontier Province Tribal Areas—22, elected by the Councils of Elders (*Jirgas*) of the various areas and agencies.

(*g*) Baluchistan—8, seven of whom would be elected by *Jirgas* of the various areas, and one by non-official members of the Municipal Committee and Cantonment Board of Quetta.

(*h*) Frontier States—9, elected by the *Jirgas* of the States of Chutral, Dir, and Swat (the State of Amb will not elect any representative).

(*i*) Baluchistan States Union—7, elected by the *Jirgas* of the States of Kalat, Kharan, Las Bela, and Makran.

(*j*) Karachi—14 (including one woman and one non-Moslem), elected by the Municipal Corporation and the non-official members of the Karachi Cantonment Board.

Members of the existing Legislative Assemblies of the Punjab, Sind, and the N.W Frontier Province would form electoral colleges on a district basis to choose representatives to the Interim Legislature, the number of seats allocated to each district and area being specifically laid down; election would be by majority vote. Elections by the *Jirgas* would be conducted in accordance with arrangements to be made by the Governor of West Pakistan.

The Establishment of West Pakistan Bill had been introduced into the Constituent Assembly on Aug. 23 by Sardar Amir Azam Khan, Minister of State for Parliamentary Affairs. It was adopted after debates lasting more than a month, during which the Bill was strongly opposed by Awami League and Independent members.

Sardar Amir Azam Khan, opening the debate on Aug. 24, said that Pakistan could not justify its claim to be a nation "unless we cease to think in terms of groups divided." But for the geographical peculiarity of the country, the ideal form of government for Pakistan would have been unitary; a two-unit Federal Government, which could only be achieved by the integration of West Pakistan into a single unit like East Pakistan, was, however, the next best alternative The solution of this problem had been the chief obstacle to the drafting of a Constitution providing for a maximum measure of regional autonomy consistent with national solidarity. As regards the economic advantages of integration, the Minister said that the removal of provincial barriers would stimulate trade and the flow of capital, eliminate artificial scarcities, and stabilize basic levels. Integration, he concluded, would give future generations a common national outlook and a pride in their heritage

Supporters of the Bill in the ensuing debate included **Mr. Khuhro** (Chief Minister of Sind), **Mr. Daultana** (a former Chief Minister of the Punjab), **Mr. B. K. Das** (a Congress member from East Bengal), and members from the Tribal Areas, the Baluchistan States Union, and Bahawalpur. **Mr. Jaffar Shah** (a former Education Minister in the Frontier Province) and **Mr. Fazlur Rahman** (a former Central Minister of Commerce), however, both demanded that the Bill should be submitted to a referendum, a demand which was supported by **Mr. Mujibur Rahman,** of the Awami League.

Mr. Firoz Khan Noon (a former Chief Minister of the Punjab), who claimed to be one of the originators of the integration plan, said that, with West Pakistan consolidated into a single unit like East Pakistan, greater autonomy would be given to the two areas, ensuring speedier administration. Nevertheless, he criticized the Government for not having consulted the public, and asserted that a good scheme had been spoilt by bad handling on the part of the Moslem League Strong opposition to the inclusion of the Federal Capital in West Pakistan was expressed by a number of members from East Bengal, who pointed out that Karachi, as the national capital, belonged to East as well as to West Pakistan

Chaudhri Mohammad Ali (the Prime Minister), replying to the debate on Sept. 15, said that all members were agreed on the principle of the unification of West Pakistan, and that the only difference of opinion was whether West Pakistan should have a unitary form of government or zonal federation. The latter proposal was, however, impracticable from a financial and administrative point of view, as there was no justification for having eight or nine administrative units in West Pakistan. The Bill would ensure that all the people of West Pakistan would have the same standard of administration and the same degree of development and social progress. He emphasized that he wished to see democracy at all levels, extension of local self-government, and Divisional Boards with wide powers for the divisions of West Pakistan, and announced that an Electoral Reforms Commission would shortly be appointed to ensure free and fair elections under the new Constitution.

The Bill passed its first reading on Sept. 17 by an overwhelming majority, after Opposition amendments demanding a referendum and the reference of the Bill to a Select Committee had been rejected.

Mr. Suhrawardy (leader of the Awami League and Leader of the Opposition), speaking during the second reading debate on Sept. 21, appealed for an all-party conference to consider the Bill before it was "rushed through." He alleged that support for the Government's plan had been obtained by threats of arrest and other forms of persecution; maintained that there was need for a referendum; and strongly opposed the inclusion of Karachi in West Pakistan, declaring that such a step would force the Bengalis to demand the transfer of the capital in Dacca.

A number of amendments were adopted on Sept. 22, including one providing for the continued administration of Karachi by the Central Government; another stipulating that the Governor-General should consult the people of any special area before altering its boundaries or amalgamating it with any other area in West Pakistan; and a third, moved by Mr. Abdus Sattar, laying down the procedure for district-wise election of members of the new Interim Legislature of West Pakistan, and finalizing the distribution of members as between the different Provinces, States, and Areas. The Bill passed its second reading on Sept. 29 and its third on Sept. 30 (by 43 votes to 13), and received the Governor-General's assent on October 8.

In the final debate on Sept. 30, **Mr. Suhrawardy** gave an assurance that he would co-operate with the Government if it worked for the interests of the nation. His offer was warmly welcomed by the **Prime Minister**, who pointed out that the Assembly would now turn to the much bigger issue of drawing up the new Constitution.

Three members of Dr. Khan Sahib's interim Cabinet—Sardar Abdul Hamid Khan Dasti, Mr. Mohammed Ayub Khuhro, and Sardar Bahadur Khan—had previously been the heads of the provincial Ministries in the Punjab, Sind, and the N.W. Frontier Province respectively, which were automatically dissolved with the establishment of West Pakistan. The remaining members were Mian Mumtaz Mohammed Khan Daultana, Khan Qurban Ali Khan, and Syed Abid Hussain Shah. Dr. Khan Sahib assumed responsibility for general administration and for law and order, and Khan Qurban Ali Khan for tribal affairs; the distribution of the other portfolios was postponed until after the election of the Interim Provincial Assembly, when it was proposed to expand the Cabinet to its full strength of 15 members.

Under an Order issued by the Governor-General on Oct. 6, West Pakistan was divided into ten divisions (Peshawar, Dera Ismail Khan, Rawalpindi, Lahore, Multan, Bahawalpur, Khairpur, Hyderabad, Quetta, and Kalat), which were subdivided into 50 districts under deputy commissioners. An Order of Oct. 9 established the High Court of West Pakistan, and provided that it should have its seat at Lahore and permanent benches at Karachi and Peshawar.

It was officially announced on Oct. 28 that the basic principle of the new administration of West Pakistan was to be the establishment of a Welfare State, and that a policy directive had been issued to all District Commissioners, heads of departments, and other senior officials to take measures to level up the present standards of social and economic progress.

Outside the Constituent Assembly, an agitation against the unification of West Pakistan was conducted by the "Redshirt" organization, led by Khan Abdul Ghaffar Khan (Dr. Khan Sahib's brother), the Frontier Awami League, and a number of other organizations, which maintained that provincial autonomy was fundamental to the concept of Pakistan and demanded that the Bill should be submitted to a referendum. Khan Abdul Ghaffar Khan was arrested on Sept. 17 for entering Baluchistan in defiance of an Order issued by the Provincial Government, but was released ten days later.—(Pakistan High Commissioner's Office, London - Dawn, Karachi) **(Prev. rep. West Pakistan, 14179 A; Constituent Assembly, 14371 A.)**

A. UNITED STATES. — Population Figures.

Figures published by the Census Bureau on Oct. 23 showed that the population of the United States had risen by nearly 12,000,000—from 150,697,361 to 162,409,000—between the census on April 1, 1950, and July 1, 1954.

All but seven of the 48 States showed population increases, the greatest absolute increase being in California, where the population rose by 1,914,000 (18 per cent) to 12,500,000. The territory of Alaska showed the greatest percentage increase (62 per cent), other large increases being recorded in Nevada (31.3 per cent), Arizona (23 8 per cent), Florida (19 1 per cent), Delaware (15 7 per cent), Maryland (11 per cent), Utah (10.6 per cent), and Michigan (10.3 per cent).

The seven States whose population declined were Arkansas (5.8 per cent), Oklahoma (2.7 per cent), Maine (2.6 per cent), Mississippi (2.4 per cent), Alabama (2 0 per cent), West Virginia (0 8 per cent), and Vermont (0.3 per cent).

The total U.S. population rose by 7 per cent over the four years, at an average rate of 1.6 per cent a year.
(New York Times) **(Prev. rep. 12331 B; 11290 A.)**

B. UNITED KINGDOM. — Travel Allowances.

The Treasury announced on Oct. 28 that tourist travel allowances for the year beginning Nov. 1, 1955, would remain unchanged, viz.: £100 basic travel allowance for all countries outside the dollar area; £70 for children under 12; and allowances of £35 and £15 respectively for motor cars and motor cycles. There was also no change in the list of countries for which the basic travel allowance was available; in the special allowances available for travel in Norway, Sweden, Denmark, the Faroes, and Greenland; or in the maximum limit (£10) which could be taken out of the U.K. in sterling notes.—(Financial Times) **(Prev. rep. 14175 B; 13827 C.)**

C. YEMEN. — Friendship Treaty with Soviet Union.

A five-year treaty of friendship between the Soviet Union and the Yemen was signed in Cairo on Nov. 1 by the respective Ambassadors in the Egyptian capital, M. Daniel Solod and Abdul Rahman abu-Taleb. It provided for economic, cultural, and diplomatic relations between the two countries and, as earlier stated by M. Solod (see 14486 B), replaced a treaty which expired in 1954.—(Times) **(Prev. rep. 14486 B.)**

D. SOVIET UNION. — M. Molotov's Admission of Mistaken Interpretation of Communist Theory - Criticism by "Communist" and "Pravda." - Speech by M. Kaganovich.

M. Molotov, the Soviet Foreign Minister, in a letter dated Sept. 16 and published on Oct. 8 in *Communist* (the Soviet Communist Party's leading political and theoretical journal), admitted having made a statement that was "theoretically mistaken and politically harmful" before the Supreme Soviet on Feb. 8, 1955, the day M. Malenkov resigned as Prime Minister. The text of M. Molotov's letter was as follows:

". . . In my report to the session of the Supreme Soviet . . on Feb 8, 1955, a mistaken formula on the question of building a Socialist society in the U S.S.R. was permitted by me In the report it was said: 'Together with the Soviet Union, where the foundations of a Socialist society have already been built, there are also those people's democratic countries which have taken only the first but very important steps in the direction of Socialism.'

This mistaken formula leads to incorrect deductions that allegedly a Socialist society has still not been built in the U.S.S.R.—that only the foundations of a Socialist society have been built This does not correspond with reality and is at variance with repeated evaluations of the results of building Socialism in the U.S.S R., given in party documents. For instance, as early as 1932 it was pointed out in the decision of the 17th party conference that the building of the basis of Socialism had been achieved in the U S.S.R., and that the Leninist question of 'who is who' had been decided against capitalism and in favour of Socialism fully and irrevocably in both towns and countryside.

On the basis of further successes of Socialist construction, the 18th congress of the All-Union Communist Party noted that the U.S.S.R. had entered a new field of development, the field of perfecting the building of Socialism and of the gradual transfer to a Communist society During the period which followed, enormous success in perfecting the building of a Socialist society in the U.S S.R has been achieved by the Soviet people under the leadership of the Communist Party. The material and technical bases of a Socialist society have immeasurably grown and consolidated. . .

These successes in Socialist construction in the U.S S.R. are also reflected in the charter of our party adopted at the 19th congress of the Communist Party of the Soviet Union, in which it is declared that the party 'has guaranteed the building of a Socialist society,' and that 'today the main task of the Communist Party of the Soviet Union consists in building a Communist society by means of a gradual transfer from Socialism to Communism.'

In connexion with the above, I consider that my formula of Feb. 8, 1955, on the question of building a Socialist society in the U S.S.R. from which the conclusion can be drawn that only the foundations of a Socialist society have been built, is theoretically mistaken and politically harmful The political harmfulness of this formula lies in the fact that it brings confusion into ideological questions and . . . throws doubt on the presence of a Socialist society, which has already been built in the main in our country."

An editorial in the same issue of *Communist* declared that anyone who denied that the Soviet Union had achieved Socialism "ignores real life and minimizes the great economic, political and ideological achievements of Soviet society and of our regime."

The editorial went on to say that such a conception "can bring harm to our cause because it distorts the prospects for development and leads to under-estimation of the forces and possibilities of Socialist structure. . . . The party attaches enormous importance to correct Marxist evaluation of the contemporary stage of the struggle for Communism. Therefore the party unmasks the theoretical falsity and political harmfulness of attempts to transfer to the present period formulae and evaluations of a long-past age, which present things as though we have allegedly only built the basis of Socialism —that is, the foundation alone."

Pravda, in an article on Nov. 4, also condemned the "political harmfulness" of the view that only the foundations of Socialism had so far been built in the Soviet Union, saying that the Soviet Union had now reached "the completion of the building-up of Socialism, and of the gradual transfer from Socialism to Communism."

An interpretation of Communist theory in the field of foreign affairs was given by M. Lazar Kaganovich, a First Deputy Premier, when delivering the customary annual review of the nation's policies on Nov. 6—the eve of the anniversary of the 1917 revolution. In the course of his speech he reiterated that the Soviet Union stood by its policy of "peace and the co-existence of different social and economic systems"; declared that people who talked about the export of revolution were "either fools or provocateurs" because revolutionary ideas "know no frontiers—they travel without visas and without fingerprints"; and expressed his conviction that Communism would in any event triumph abroad. He ended his speech by declaring that "the peoples and working-folk of all countries can rest assured that the Soviet Union . . . has been and remains a reliable bulwark for peace, friendship, and brotherhood of the peoples of the whole world."—(Times - Manchester Guardian - Soviet Weekly) **(Prev. rep. 14059 A.)**

A. AUSTRALIA. — Petrov Case. - Debate on Report of Royal Commission on Espionage. - Statements by Mr. Menzies and Dr. Evatt. - Announcement of General Election in December.

A debate on the report of the Royal Commission on Soviet Espionage in Australia (see 14446 A) was opened in the Federal House of Representatives on Oct. 19 by Dr. Evatt, Leader of the Opposition. During the course of a bitter attack on the Royal Commission and on the Prime Minister, Mr. Menzies, Dr. Evatt repeated his allegations that the defection of Petrov had been engineered by Mr. Menzies with the 1954 elections in view, and announced that he had been in communication with the Soviet Foreign Minister, M. Molotov, who had assured him that the documents handed over by Petrov to the Australian authorities were, in fact, forgeries. Mr. Menzies, who replied on Oct. 25, described Dr. Evatt's appeal to M. Molotov as "a new Communist technique" in which Dr. Evatt was "against the Prime Minister of his own country and for the Soviet Foreign Minister," and declared that "the man now on trial in the Petrov affair" was Dr. Evatt himself.

Dr. Evatt said that the report required "forthright analysis and plain speaking." Two foreigners, the Petrovs, and one foreign-born spy, Dr. Michael Bialoguski, had made a lot of money, but the forum in which they had appeared had cost the taxpayers £A140,000, plus unlimited security expenses. Moreover, the nation had suffered a heavy loss of trade and the rupture of diplomatic relations with a great Power, there had been attempted "smearing" of many innocent Australians; and grave inroads had been made on Australian freedoms by attacks on political nonconformity. No spies had been discovered, however, and not a single prosecution recommended

"It is now clear," Dr. Evatt continued, "that the Prime Minister must have known when appointing the Commission that there would be no legal evidence to warrant the prosecution of any person; that there was, in fact, no security ground for an inquiry. It is abundantly clear that Mr. Menzies knew many months before April 13, 1954, when he made his melodramatic, coldly calculated announcement, that Petrov's defection was being deliberately organized by security agents under his ministerial control. But he waited and sprang the announcement on the very last sitting night of Parliament before the general election, and completely deceived the House into rushing through legislation to appoint the Royal Commission."

Dr. Evatt went on to say that the outstanding question was the genuineness of the documents produced by Petrov. Being determined to ascertain the truth, he [Dr. Evatt] had communicated with M. Molotov, pointing out that the Soviet Government could testify to the genuineness of the documents The reply on behalf of M Molotov said that the documents "can only be, as it had been made clear at the time and was confirmed later, falsifications fabricated on the instructions of persons interested in a deterioration of Soviet-Australian relations and in discrediting their political opponents."

"I attach grave importance to this letter," Dr. Evatt declared, "which shows clearly that the Soviet Government denies the authenticity of the Petrov documents. The matter cannot be left where it is. If possible some form of international commission should be established by agreement with Russia to settle the dispute once and for all. The Soviet Union, which was not represented before the Royal Commission, will then be in a position to prove clearly, definitely, and unequivocally that the letters are fabricated."

Dr. Evatt added that he had checked the authenticity of one document alleged by Petrov to have been written by M. Sadovnikov, of the Soviet Embassy, by submitting it with genuine specimens of M. Sadovnikov's handwriting to Dr. Charles Monticone, a Sydney handwriting expert, who had found that the documents had been written by two entirely different persons. These two matters provided overwhelming ground for his demand that all the Russian documents produced by Petrov should be immediately tabled in the House.

With regard to the timing of the Prime Minister's announcement about the defection of Petrov, Dr. Evatt contended that Mr. Menzies had known of "Operation Petrov" at least seven months earlier. In his statement to the House on April 13, 1954 (see 13540 A) Mr Menzies had said that Petrov had applied for asylum "some days before," and had referred to "a comparatively few days since Petrov came to our security people." These "carefully worded phrases," Dr. Evatt said, had been "deliberately misleading"; at the "most conservative estimate" Petrov had come to the security authorities and had been under the control of Bialoguski at least seven months before, and Bialoguski had been working for Petrov's defection since the middle of 1951.

Dr. Evatt went on to contend that the opening address to the Royal Commission by Mr. Windeyer (the Australian Government's chief counsel) had obviously been prepared after consultations with Mr. Menzies, and asserted that the Prime Minister must take personal responsibility for all the "exaggerations and deceptions" and for giving specific instructions that the payment of £A5,000 to Petrov should not be disclosed until after the election. Dr. Evatt also attacked the Australian security service, in which connexion he recalled a statement by Dr. John Burton (a former Secretary of the External Affairs Department) that intelligence officers did not shrink from "smearing" anyone who might influence public opinion in ways contrary to the policies which they favoured, and declared that there was a threat to individual liberties in the whole Petrov affair.

Mr. Menzies, in reply, said that Dr. Evatt had made a "monumental exhibition" of himself, and warned "all Labour men who believe in decent standards" against being misled by "false and hopeless loyalties" into telling people that many of the judges on the Royal Commission were incompetent or dishonest The Prime Minister said that before appearing professionally in front of the Royal Commission, Dr. Evatt had clearly made up his mind to attack it, to lower its reputation in the public mind, and, if possible, to destroy its findings in advance. Dr. Evatt's real function before the Commission, as the political exponent of certain viewpoints, had made him the instant ally of all the Communists involved in the inquiry. In a recent speech he [Dr. Evatt] had defended Dr. John Burton, whose published political views could not sensibly be regarded as finding favour, except with Communists, Mr. Sharkey, a leading Communist, against the well-founded charge that he had received $20,000 from Moscow as recompense for the costs incurred in his campaign, conducted in the closest collaboration with Dr Evatt, against the Communist Party Dissolution Bill; and Mr. Clayton, who had been found by the Royal Commission, on the clearest possible evidence, to be the chief member of a Communist spy ring in Australia Mr. Menzies added that Dr. Evatt, suffering from delusions of persecution, was "introducing Parliament into a world of sheer fantasy."

Referring to Dr. Evatt's charge that he [Mr Menzies] had had a hand in the preparation of Mr. Windeyer's opening address to the Royal Commission, Mr Menzies said that the one meeting he had had with Mr. Windeyer was on the Saturday or Sunday before the address was delivered, and he had given him no directions except on four points. First, he had decided that there should be no Press interview with the Petrovs, and, second, that references in the Moscow documents to Mme Ollier should be communicated to the French Ambassador. Thirdly, not having known before this occasion of the payment of £A5,000 to Petrov, he had told Mr. Windeyer that he considered that it was a matter to be proved publicly, in its proper setting, when Petrov was examined. To have opened with the payment to Petrov, except in association with the surrounding circumstances, would have invited gross misrepresentation Fourthly, he had also told Mr. Windeyer that it would not be proper to mention the name of any individual before the Commission until after the elections.

Dr. Evatt's theory was that the whole matter had been "cooked up" to defeat him at the 1954 elections. If this were true, he [Mr. Menzies] could have mentioned the names of persons directly or indirectly associated with Dr. Evatt, and the political reaction would have been tremendous. Dr. Evatt would not be in Parliament today, and the Labour Party would be united. When, early in the campaign, some reference had been made to the Petrov affair on the election platform (Mr. Menzies continued), he had asked every Government candidate to keep it out of the campaign. If he had cunningly schemed to produce Petrov on the eve of the election, why, he added, should he thus go to all sorts of trouble to defeat his own scheming? He had never heard of Petrov before his defection in April, 1954. Early in February, the Solicitor-General and the Secretary of the Department of External Affairs had been warned of the possibility of a defection, and he [Mr. Menzies] had been told of this, but the identity of the person concerned had not been disclosed, nor had Petrov then asked for it.

Turning to Dr. Evatt's charges against the security service, Mr. Menzies said that counter-espionage required great character, great courage, great skill, and considerable freedom of action. The Australian security organization had been so effective in the past six years that practically no information had been obtained by Communist agencies. In the United Kingdom, the United States, and Canada its reputation was very high, and its handling of the Petrov case had been the subject of commendation and congratulation. Without mutual trust and confidence between the security services of those countries and Australia, information would have been withheld from Australia, as it frequently was before the establishment of the security service.

"It is a wicked thing," Mr. Menzies went on, "that such a consistent campaign should have been conducted by the Communist Party outside this House, and by Dr. Evatt inside it, for the express purpose of weakening confidence in Australian security, and so rendering it less effective for counter-espionage. This is one of Dr Evatt's principal purposes in this matter. He has not concealed his violent hatred of that service, or of the people who make it up. It will be clear that should he become head of the Government of this country, the present senior personnel of the service will be dismissed and the possibility of getting adequate recruits perhaps permanently destroyed. The Government regards these security officers as men of capacity, integrity, and patriotism, and will do everything in its power to protect them.

"It is the very fury of Dr. Evatt's obsessions against the security service that has led him to make his celebrated appeal to M. Molotov. It would be childish were it made by an obscure nonentity. It becomes atrocious when made by a party leader who is an aspirant to the Prime Ministership. It is as if, after a person in the dock has been convicted by a jury, Dr. Evatt springs up and says to the convicted person: 'Were you guilty?' and he replies: 'I was not.' Dr. Evatt then denounces the judge, denounces the jury, denounces the counsel, denounces all the witnesses for the Crown: in an ordinary court such conduct would be regarded as some evidence of eccentricity, and would certainly lead to a process of contempt of court. It represents a studied insult to Australian judges, Australian judicial procedure, and an Australian report."

Mr. Menzies went on to say that too little attention had been given to the valuable results of the Petrovs' defection. Information provided by the Petrovs, only some of which came within the scope

of the Royal Commission, had proved invaluable to other democratic countries. Petrov had supplied more information than any previous single defector about the espionage activities of the M.V.D., and much of it had been confirmed by information held abroad. It had enabled material additions to be made to the British security authorities' information, and scores of Soviet intelligence operatives working in democratic countries had been identified as a result of the Petrovs' disclosures. In all the circumstances, it would have been astonishing had no money been paid to the Petrovs for their protection and maintenance.

"Public opinion," concluded Mr. Menzies, "will acquit those charged by Dr. Evatt beyond question, but it will not acquit the man who made these reckless charges If there is a charge to be made, it is this: Dr. Evatt has from first to last in this matter, for his own purposes, in his own interests, and with the enthusiastic support of every Communist in Australia, sought to discredit the judiciary, subvert the authority of the security organization, cry down decent patriotic Australians, and build up a fifth column of our enemies. I am compelled to say to Australia—in the name of all good and honourable men, in the name of public decency, in the name of safety—that the man on trial in this debate is Dr. Evatt himself."

On Nov. 26, the day after the close of the debate on the Royal Commission's report, Mr. Menzies announced that he had advised the Governor-General to dissolve the House of Representatives, and that elections for a new House and for half the Senate (30 members) would be held on Dec. 10.

Explaining the Government's decision, the Prime Minister pointed out that until the double dissolution of Parliament in 1951 it had been normal for elections to the House of Representatives and the Senate to be held simultaneously, but since that time elections for either the House or the Senate had become necessary every 18 months. This situation was not helpful for long-term policy, or to concentration by Parliament and the Cabinet on the executive and legislative problems of the nation. The achievement of the Government's economic policy, which he had announced recently, required firm action, and the Government wanted a clear mandate to deal with the economic problems Another important factor in the decision to dissolve Parliament was the fact that New South Wales, Queensland, South Australia, and Western Australia must have elections before May, 1956, which was the latest month in which the next Senate election could be held It was obviously undesirable to have a national campaign preceded by some months of State campaigning, and to hold the Federal elections "in an atmosphere of political exhaustion" Moreover, an election just before the opening of the new financial year in July would tend to increase uncertainty in business planning

Dr. Evatt agreed that elections for the two Houses should be synchronized, and welcomed the election on behalf of the Opposition. He asserted, however, that the "economic crisis" was "an imaginary crisis caused by Government mismanagement," and accused the Government of "trying to seize a political advantage to capitalize on political deception."

A. UNITED STATES. — Defence Appointments.

It was announced in Washington on Oct. 17 that Lieut.-General Randolph McCall Pate had been appointed Commandant of the U.S. Marine Corps as from Jan. 1, 1956, in succession to General L. C. Shepherd, retiring. General McCall Pate had hitherto been Deputy Commandant.

The appointment of Vice-Admiral Alfred M. Pride as Commander of the U.S. Pacific Fleet Air Force, in succession to Vice-Admiral H. M. Martin, was announced on Oct. 19. Admiral Pride had hitherto been Commander of the U.S. Seventh Fleet, in which capacity he directed the evacuation of Chinese Nationalist civilians from the Tachen Islands in February last. It was also announced that the new Commander of the Seventh Fleet would be Admiral Stuart H. Ingersoll, Deputy C.-in-C., Atlantic Fleet.—(New York Times) **(Prev. rep. 14234 A.)**

B. BURMA. — Waiving of War Claims against Siam.

It was announced in Rangoon and Bangkok on Oct. 5 that the Burmese Government had decided to waive all war claims against Siam arising out of the Siamese occupation of certain Burmese territory during the Second World War. A joint communiqué said that the decision had been taken after a review of the position and in view of "the close and friendly relations so happily existing" between the two countries.
(Burmese Government Information Department, Rangoon)

C. PARAGUAY. — Outlawing of Communism.

A law for the repression of Communism, and outlawing all forms of Communism under penalty of imprisonment from six months to five years, came into effect in Paraguay on Oct. 26. Prohibited activities include the spreading of Communist doctrine, membership of Communist associations, and the financing and distribution of Communist propaganda.
(New York Herald Tribune)

D. AUSTRIA. — Reopening of Vienna Opera House and Burgtheater.

The Vienna Opera House, completely rebuilt after having been almost entirely destroyed during the last months of the war, was officially reopened on Nov. 5 in the presence of President Korner, the Austrian Chancellor (Dr. Raab), members of the Cabinet, and many distinguished composers, conductors, and opera singers from a number of countries, including Dmitri Shostakovich, Gian-Carlo Menotti, Arturo Toscanini, Jacques Ibert, Bruno Walter, and Mme. Lotte Lehmann. One of the finest and most commodious opera houses in the world, it is decorated in the traditional red, gold and cream of the Hapsburg monarchy, seats 2,200 people, and incorporates many modern features as compared with the old Opera House, which closed its doors in July 1944. It was rebuilt at a cost equivalent to £3,500,000, its reopening coinciding with the re-emergence of Austria as a fully independent State.

The Vienna State Opera reopened with a performance of Beethoven's *Fidelio*, the precursor of a four-weeks' operatic festival which will include Mozart's *Don Giovanni*, Verdi's *Aida*, Wagner's *Die Meistersinger*, and Strauss's *Die Frau ohne Schatten* and *Der Rosenkavalier* The director of the new Vienna Opera is Dr. Karl Bohm.

The *Burgtheater*—one of the leading German-language theatres, and the home of the traditional State repertory company of Vienna—had been reopened on Oct. 17, at a cost approximating to £1,600,000, after having been gutted by fire during the fighting of April 1945. The theatre reopened with a gala performance of *Konig Ottakars Glück und Ende*—the 13th-century drama by Grillparzer, the Austrian national poet—which was attended by President Korner, members of the Government, and distinguished representatives of the theatre from all parts of Europe. (Wiener Zeitung)

E. SWEDEN. — Abolition of Drink Rationing.

Drink rationing in Sweden, which had been in force for 41 years (since 1914), was abolished on Oct. 1 under legislation previously enacted by the Swedish Parliament. The principal changes caused by the abolition of rationing were as follows:

(1) Adult Swedes (both men and women) were no longer required, as hitherto, to possess ration-books entitling them to a specified amount of "hard" spirits (i.e. those with a strong alcoholic content, such as schnapps, gin, and whisky) from State-controlled liquor shops The ration was three litres a month, except where more was authorized on a doctor's prescription.

(2) Persons could consume any reasonable quantity of spirits in restaurants, cafés, etc., after 4 p.m., provided they ordered at the same time a meal costing a certain minimum amount. Previously adult Swedes had been restricted in the amount of spirits they could consume in restaurants, the quantity for women having been smaller than for men. The new regulations, however, retained the previous requirement that persons ordering spirits in restaurants and cafés had to consume a certain amount of food at the same time.

(3) Strong beer became available for the first time in restaurants, cafés, and retail shops, with the proviso that persons ordering it would also have to order a certain amount of food—e.g., a sandwich. Previously strong Swedish beer was available for export only, or on a doctor's prescription, and only weak beers and ales could be bought. The lifting of this restriction meant that British beers, ales and stouts became available on the Swedish market, as well as Austrian, Belgian, Czech, Danish, Dutch, German, and Irish beers.

(4) Restaurateurs and café proprietors would have to ensure that no intemperate drinking took place on their premises, and would forfeit their licences if they permitted excessive drinking by customers.

All advertisements for alcoholic beverages were banned for a 60-day period beforehand, in order to "cushion" the impact of the abolition of drink rationing. To forestall undue celebrations, all liquor-shops were closed on the day when drink rationing was abolished (a Saturday), with the result that customers could only take advantage of the new regulations on the following Monday.—(Svenska Dagbladet, Stockholm)

F. UNITED KINGDOM. — Gold and Dollar Reserves in October. - Fall of $48,000,000.

The sterling area had a gold and dollar deficit in October of $48,000,000 after taking into account (*a*) the receipt of $3,000,000 in U.S. defence aid; (*b*) the payment of $80,000,000 to the E.P.U., representing that part of the September deficit which had to be settled in gold or dollars; (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,297,000,000 on Oct. 31.

Provisional figures for the E.P.U. October settlement showed that the U.K. had a deficit of $42,000,000 (£15,000,000), which would be settled in November three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.
(Treasury Press Office, London) **(Prev. rep. 14453 A.)**

NOVEMBER 12—19, 1955

A. MIDDLE EAST.—Renewed Tension on Israel-Arab Borders. - Clashes between Egyptian and Israeli Forces. - Fighting at El Auja. - Reactions in America and Britain. - Statements by President Eisenhower and Sir Anthony Eden. - Mr. Ben-Gurion rejects Eden Proposals. - U.N. Proposals for Easing of Border Tension.

The situation on the border between Egypt and Israel, which had been relatively quiet since the Gaza clashes in August, again deteriorated during the last week of October, when further incidents occurred in different parts of the frontier area. The tension culminated on Nov. 3 in sharp fighting in the El Auja demilitarized zone, in which a number of casualties was suffered by both sides. Developments in the border area during the period covered (mid-September to Nov. 12) are described below.

Sept. 20. Despite the Security Council's resolution of Sept. 8 (see 14419 A), in which the erection of a " physical barrier " between the forces of the two sides had been recommended, neither Egypt nor Israel took any immediate measures towards its implementation. Although Israel accepted the U N. suggestion in principle, Egypt opposed the erection of a barbed-wire barrier along the whole length of the demarcation line—as had been suggested by General Burns, chief of the U.N Truce Supervisory Organization—on the ground that it would imply some degree of recognition of that line as a permanent frontier between the two countries On Sept 20, however, the Egyptian Prime Minister (Colonel Nasser) announced (*a*) that he had ordered Egyptian troops in the Gaza area to withdraw at least 500 metres from the demarcation line, and (*b*) that he had also ordered the erection of barbed-wire obstacles at " certain vital points " in this area. He explained that such barriers would be set up a short distance inside Egyptian territory and not on the demarcation line itself.

Sept. 21-22. A small number of Israeli troops entered the El Auja demilitarized area, where for a short time they occupied the headquarters building of the Egyptian-Israeli Mixed Armistice Commission The Israeli Foreign Minister (Mr Sharett) subsequently sent an apology to General Burns explaining that the Israeli unit had entered the building in error and had withdrawn immediately they became aware of their mistake. At the same time Mr. Sharett informed General Burns that the Israeli unit would be withdrawn from El Auja if the Egyptians withdrew two of their outposts which, he alleged, had been established inside the demilitarized zone for some time

The village of El Auja, the scene of heavy fighting during the Palestine War, is strategically important because it is astride one of the two roads linking Egypt and Israel Under the armistice agreement of 1949 the village and a small surrounding area were proclaimed a demilitarized zone, and El Auja became the headquarters of the Egyptian-Israeli Mixed Armistice Commission Since the area was demilitarized there had been frequent controversies in which each side had accused the other of infringing the 1949 agreement

Sept. 26. General Burns sent messages to the Egyptian and Israeli Governments calling upon them to withdraw their forces from the El Auja demilitarized area simultaneously and immediately, under U N. supervision He declared in these messages that " both Egyptian and Israeli military forces have taken up positions in the demilitarized zone in flagrant violation of the armistice agreement between Egypt and Israel "

Oct. 2. In compliance with General Burns's request, both Egypt and Israel withdrew their forces from the demilitarized zone simultaneously, the withdrawal being carried out under the supervision of U N observers.

Oct. 7. The Israeli Foreign Ministry issued a statement claiming that the Government of Israel was in possession of information proving that the Egyptian authorities had decided, after the cease-fire arrangements of Sept. 4 (see 14419 A), to continue raiding operations against Israel by gangs of saboteurs (*fedayeen*) from the " Gaza strip," and also to organize similar guerrilla attacks from the territory of other Arab States. After listing a series of raids carried out in recent weeks from the " Gaza strip " and from Syria, Lebanon, and Jordan, which had resulted in the death of three Israelis, the wounding of 11 others, and the destruction of houses and water installations, the statement warned Egypt that if she did not put an " immediate and total end " to these attacks she would be responsible for breaking the cease-fire agreement, and would oblige Israel to take " all necessary steps for the protection of her citizens." The statement pointed out that the *fedayeen* gangs had originally been formed as " suicide squads " to attack British troops in the Suez Canal Zone, and were now incorporated in the Egyptian Army

Oct. 28. In retaliation for two Egyptian attacks on an Israeli frontier post in the El Auja area, an Israeli battalion attacked and captured the Egyptian frontier post of El Kuntilla, in the Sinai desert 60 miles south of El Auja and four miles inside Egyptian territory. The attacking force withdrew into Israel after taking 27 prisoners, destroying 15 Army vehicles, and capturing a considerable quantity of arms, including machine-guns, automatic rifles, and ammunition. It was stated on the Israeli side that ten Egyptians were killed and four Israelis wounded—one of whom subsequently died—in the operation.

The Israeli Foreign Ministry said that the attack on El Kuntilla had been carried out " after two successive days of Egyptian aggression against Israeli territory " in the El Auja area. On Oct. 26, it was stated, an Egyptian unit had overrun an Israeli police post and killed an Israeli policeman, wounded three others, and taken two prisoners before withdrawing, on the following day, Oct 27, other Egyptian units had returned to the area and established themselves one mile inside Israeli territory, where they still remained. The statement added " The purpose of the Israeli counter-action [at El Kuntilla] was to emphasize what should have been clear to Egypt—that attack on Israel will be met by counter-attack If they leave us alone, we will leave them alone If they want us to leave them alone, let them leave us alone The Israeli action was directed against an Egyptian post which carried out attacks against Israeli territory By contrast with Egypt, whose soldiers are still in Israeli territory, the Israeli forces returned to Israel "

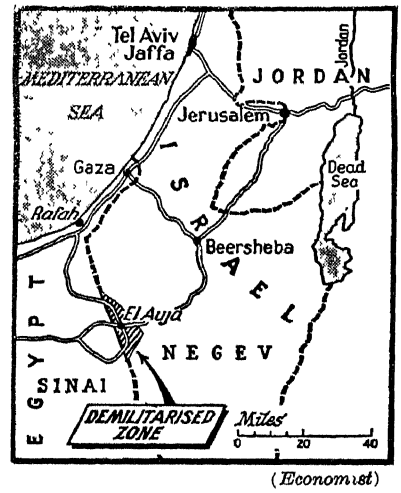
In Cairo it was denied that Egyptian forces had occupied Israeli territory in the El Auja area. Egyptian casualties at El Kuntilla were stated to be four men of the Egyptian Camel Corps killed and 27 taken prisoners.

Oct. 30. General Burns (who was then on a visit to U.N. Headquarters in New York for discussions with the U.N Secretary-General, Dr. Hammarskjold) called upon Egypt and Israel to end clashes on their borders, pointing out that continued aggressive actions might have the gravest consequences He said that the Egyptian forces bore the responsibility for the latest series of clashes, which had led to retaliation by Israel, and formally appealed to both sides to stop fighting in the demilitarized area

Nov. 1. Three Egyptians were killed when they crossed the demarcation line in the " Gaza strip " and clashed with an Israeli military patrol The Israel Army authorities stated that the three men were in the uniform of *fedayeen* irregulars, that they carried identity cards bearing their names and showing that they had come from Gaza, and that the bodies had been handed over to the U.N. Truce Organization.

Nov. 3. The heaviest fighting since the end of the Palestine War occurred on this date, when Israeli forces launched an attack with the objective of dislodging Egyptian troops from the El Auja demilitarized zone After several hours' fighting the Israeli forces withdrew after taking 49 prisoners and capturing a large quantity of military equipment, including 20 vehicles, four heavy mortars, two 6-pdr guns, two 30 mm. anti-aircraft guns, a quantity of light mortars, a number of machine-guns of Belgian, Swedish, and Spanish manufacture, and a large quantity of small arms and ammunition The Egyptians tried to bring up reinforcements, including eight *Sherman* tanks (two of which were destroyed), but were unable to reach the defenders in the zone

Discrepant versions of the fighting were given by the Israeli and Egyptian sides Whilst the Israeli military authorities stated that Egyptian forces had been ejected from the demilitarized zone with the loss of 50 killed, against Israeli casualties of four killed and 19 wounded, the Egyptian High Command claimed that 200 Israeli soldiers had been killed and a number captured, that Egyptian troops, supported by armour and heavy guns, had recaptured positions at El Sabha (an outpost on the border of the demilitarized zone), and that the Egyptian forces were " in complete control of the battlefield " Egyptian losses were given in Cairo as 70 men killed and missing.



(*Economist*)

The following comment was made by the Jerusalem Correspondent of *The Times* " This latest attack by Israel has the excuse that Egyptian troops have been moving steadily into the Auja demilitarized zone since Oct. 26, in defiance of the terms of the armistice and subsequent agreements. . . . Repeated appeals by the [U N.] truce organization to the Egyptians to withdraw have been consistently ignored. It seems clear that the Egyptian military forces have no right to be in the zone. In fact, no military forces have a right to be there. What is less clear is the political status of the area. Israel claims that it is her sovereign territory; it is, indeed, situated on the Israeli side of the old international frontier. . . . On the other hand, it is pointed out by U N officials that the demilitarized zone was defined as such, and as nothing more, in the armistice agreement. Its intention was to cover the Auja crossroads and to serve as a means of preventing direct military access along the Beersheba - Ismailia road towards either of those two points. . . ."

Nov. 4. The border remained quiet after the fighting of the previous day, apart from a small-scale Egyptian attack against an Israeli outpost near the " Gaza strip," which was repulsed.

Nov. 8. Egyptian and Israeli forces clashed near the Israeli port of Eilat, at the head of the Gulf of Akaba, contradictory versions of the incident being given by the two sides. The Israeli authorities said that an Egyptian force had crossed into Israel from the Sinai desert and attacked an Israeli mobile patrol, but had been driven back

across the frontier, with no casualties to the Israeli forces. The Egyptian authorities said that an Israeli force had crossed the frontier at Ras el-Naqb (five miles N W. of Eilat), supported by four armoured cars and aircraft, but had been repulsed after losing four men killed and eight wounded.

Incidents also occurred during October on the Israeli-Syrian border, apart from attacks inside Israeli territory by sabotage (*fedayeen*) groups apparently operating from the Lebanon and Jordan.

Sept. 23. Three civilians, including an American tourist, were killed when an armed gang held up a bus near Meron (on the Haifa - Safed road, in northern Israel) and flung hand-grenades at it. Following a complaint by the Israeli authorities, who expressed the belief that the attackers had crossed the frontier from the Lebanon, an investigation was begun by the Israeli-Lebanese Mixed Armistice Commission.

Oct. 22-23. A border clash occurred on the Syrian frontier, apparently in retaliation for an earlier incident on Oct. 18 in which Syrian troops had captured an Israeli soldier on the Israeli side of the frontier and carried him off into Syria The U N. Truce Organization, reporting on the incident of Oct. 22-23, quoted a Syrian statement that one officer and two Syrian soldiers had been killed, six soldiers wounded, and five others listed as missing After placing responsibility for the incident upon Israel, and stating in this connexion that investigations had shown that the attack had been carried out by two Israeli platoons which advanced about a kilometre into Syrian territory, the U N. communiqué recalled that General Burns had "strongly condemned the policy of retaliation, the consequences of which are here so tragically illustrated." The Israeli Army authorities announced that five Syrian soldiers had been captured during the night of Oct. 22-23 and would be held as hostages for five Israeli soldiers in Syrian hands. [Five Israeli soldiers had been captured by the Syrians in December last, one of whom subsequently took his life in his prison cell; U N efforts to obtain the release of the other four had proved unavailing The fifth Israeli soldier in Syrian hands was the one captured on Oct 18.]

Nov. 5. A group of armed Jordanians tried to blow up houses in the Israeli frontier village of Sde-Hemed, causing some damage but no casualties An inquiry was instituted by the Israeli-Jordanian Mixed Armistice Commission

Nov. 13. Another group of Jordanians blew up a house at Rosh Haayin, near the northern terminal of the Negev water pipeline (see 14511 A). There were no casualties A strong Israeli protest was made to the Mixed Armistice Commission.

The Israeli delegation at the U.N. announced on Oct. 23 that it had protested to the Security Council against the "grave situation" which had arisen on the Israeli-Syrian border. The Israeli memorandum referred particularly to the abduction of the Israeli soldier on Oct. 18 (see above), which, it charged, was "the latest in a series of aggressive acts committed by Syria against Israel during the past few months." It added:

"A particularly dangerous feature of this situation is the evidence which has come to light of Syrian complicity in the campaign which has been waged in northern Israel in the past few weeks by Egyptian-controlled *fedayeen* operating from bases in Syria, the Lebanon, and Jordan. The Government of Israel has for some time been aware of an Egyptian plan to continue the operations of these gangs from bases in other Arab countries, in addition to those at Gaza, and it is known that Egypt has solicited, and received, both support and material in this connexion from Syria."

U.N. Proposals for Easing of Tension.

Proposals for easing the tension between Egypt and Israel, drawn up by Dr. Hammarskjold after discussions with the British, U.S., and French representatives at the U.N., were conveyed by General Burns to Mr. Ben-Gurion (the new Prime Minister of Israel—see 14520 A) in Jerusalem on Nov. 9 and to Colonel Nasser in Cairo on Nov. 10. Although they were not officially made public, it was understood that they involved the withdrawal of all troops from the demilitarized zone at El Auja and the demarcation of the Egyptian-Israeli frontier in that area. While in Cairo, General Burns also had discussions with the British and U.S. Ambassadors (Sir Humphrey Trevelyan and Mr. Byroade) and with the Canadian Secretary of State for External Affairs, Mr. Lester Pearson, who had arrived in the Egyptian capital in the course of a tour of European and Asian countries.

It was stated at U.N. Headquarters on Nov. 4 that Dr. Hammarskjold had had meetings with the Israeli and Egyptian delegates at the U.N., and had expressed to the Israeli delegate his "grave concern" at the Israeli attack at El Auja. In addition, it was announced that "the Secretary-General, in his protest, drew attention in particular to the restrictions placed by the Israeli authorities on the free movement of U.N. observers in the El Auja area immediately before and during the attack."

Sir Humphrey Trevelyan had two meetings with the Egyptian Foreign Minister (Dr. Fawzi) on Nov. 6-7, and, it was understood, urged the Egyptian Government to accept the U.N. proposal for the withdrawal of all troops from El Auja.

Reactions in the United States. - Statement by President Eisenhower.

The Egyptian and Israeli Ambassadors in Washington were called to the State Department on Nov. 5 for separate discussions with Mr. George V. Allen, Assistant Secretary of State for Near Eastern Affairs. The following communiqué was issued after the meetings:

"During recent weeks, especially during the last few days, the United States has noted with deep concern the increasing tempo of hostilities between Israel and Egypt According to our information there have been violations of the General [Armistice] Agreement by both Israel and Egypt which have led to bloodshed and loss of life The United States deplores resort to force for the settlement of disputes.

The U.N Secretary-General and General Burns have put forward proposals to Israel and Egypt which are designed to ease the present situation along their common border. The U S A. strongly supports the U.N. efforts to achieve a settlement by peaceful means, especially the current proposals of General Burns.

Recent reports have also been received that U.N. observers who are under General Burns's direction have been prevented from carrying out their assigned functions. The U S.A continues to believe that these observers should have full liberty to perform their peaceful functions

Assistant Secretary Allen informed the Ambassadors of Israel and Egypt of the attitude of the United States, and asked for information with respect to their Governments' intentions regarding these matters"

A prepared statement by President Eisenhower—then recovering from his recent illness—was released in Denver on Nov. 9 by Mr. Herbert Hoover jr., Under-Secretary of State.

"All Americans," said the President, "have been following with deep concern the latest developments in the Near East. The recent outbreak of hostilities has led to a sharp increase in tensions. These events inevitably retard our search for world peace Insecurity in one region is bound to affect the world as a whole

While we continue willing to consider requests for arms needed for legitimate self-defence, we do not intend to contribute to an arms competition in the Near East, because we do not think such a race would be in the true interest of any of the participants The policy which we believed would best promote the interests and the security of the peoples of the area was expressed in the tripartite declaration of May 25, 1950 This still remains our policy.

I stated last year that our goal in the Near East, as elsewhere, is a just peace. Nothing has taken place since which invalidates our fundamental policies—policies based on friendship for all the peoples of the area We believe that true security must be based upon a just and reasonable settlement. The Secretary of State outlined on Aug 26 [see 14392 A] the economic and security contributions which this country was prepared to make towards such a solution On that occasion I authorized Mr Dulles to state that, given a solution of the other related problems, I would recommend that the United States join in formal treaty engagements to prevent any effort by either side to alter by force the boundaries between Israel and its Arab neighbours

Recent developments have made it all the more imperative that a settlement be found The U.S.A will continue to play its full part and will support firmly the United Nations, which has already contributed so markedly to minimizing violence in the area. I hope that other nations of the world will co-operate in this endeavour, thereby contributing significantly to world peace."

The following declaration was issued by the State Department on Nov. 10: "The United States has let it be known that we will be strongly opposed to the side which starts a war in the Middle East, and very favourably disposed to the side which convinces the United States that it desires to maintain peace. We are doing everything we can to convince both sides that to start a war would be utter folly on their part."

British Reactions. - Statement by Sir Anthony Eden.

Mr. Nutting, Minister of State at the Foreign Office, had separate meetings on Nov. 3-4 with the Egyptian and Israeli Ambassadors in London, to whom he expressed the grave concern of H.M. Government at the deterioration of the situation. He also had a meeting on Nov. 4 with General Burns, who was returning to the Middle East after his visit to U.N. Headquarters.

A Foreign Office communiqué said that Mr. Nutting and General Burns had "a most useful talk about ways of restoring tranquillity on the Israel-Egypt border"; that Mr. Nutting had expressed "H M. Government's appreciation of General Burns's great efforts to this end, and assured him of their fullest possible support"; and that Britain would make "strong diplomatic representations in Israel and Egypt in support of the proposals put forward by the U.N. Secretary-General in connexion with the situation in the El Auja area."

In the House of Commons, Mr. Arthur Henderson (Labour) suggested on Nov. 15 that, in view of the tension between Egypt and Israel, H.M. Government should propose a conference under U.N. auspices to secure a peaceful settlement of Middle East problems. This suggestion was rejected by Sir Anthony Eden, who made the following statement:

"A conference such as that suggested can, I think, only have any hope of success if the parties concerned have previously shown willingness to compromise. It is for this that we are working. In my speech at the Lord Mayor's banquet [see 14519 A] I tried to set out as accurately as possible the conflicting points of view which impede a settlement of the long-standing Palestine dispute. I think the House will agree that this dispute lies at the heart of all troubles in the Middle East It has been our policy, in close co-operation with the U.S. Government, to seek some means of bringing about a settlement. The proposals put forward by Mr. Dulles in August, and fully supported by us, were such a step My deliberate purpose last week was to give a new impulse towards a settlement.

"I stated what I believed to be the Arab and Israeli positions with regard to the negotiations. I said that the Arabs stand on the 1947 and other U.N. resolutions, whereas the Israelis base themselves on the Armistice Agreements of 1949 and the present *status quo*. . . . The gap between the two positions is certainly wide But how can there ever be a peaceful settlement unless both sides are willing to compromise? Peace and conciliation are so urgently necessary for the peoples of the Middle East that sacrifices by both sides must be in the ultimate interest of both It is in that conviction that I have appealed to them to work together with us and our American allies for peace."

Mr. Robens (Lab.) asked the Prime Minister whether he had in mind "considerable changes" or "small changes" in the boundaries between Israel and her Arab neighbours, in view of his (the Prime Minister's) appeal to both sides to compromise. Sir Anthony replied. "As to how far either party should move, I did not attempt to lay down anything and I would not attempt to do so now If both parties are willing to consider moving from the fixed positions they have taken, negotiations may have a chance."

Mr. Shinwell (Lab.) drew attention to the fact that Egyptian and other Arab spokesmen had recently declared that they would never be content until the State of Israel was destroyed, and asked how it was possible to effect a settlement while such an intransigent attitude continued In reply, the Prime Minister said that that was one of the problems which had to be considered, if there was a discussion about boundaries, there had to be "acceptance on both sides of the existence of States which have boundaries"

Mr. Grimond (Liberal) asked the Prime Minister to make a statement on his proposal for a guarantee of Israel's frontiers Sir Anthony made the following written reply "The position of the Government is that they are prepared to guarantee Israel's frontiers after a settlement which includes an agreement on what those frontiers are to be That is also the position of the U.S Government, as will be seen from President Eisenhower's statement on Nov 9 [see above] . . . If we can get an arrangement between Israel and the Arab States we should be ready to guarantee it."

Mr. Ben-Gurion's Rejection of Eden Proposals. - Statement by Israeli Embassy in London.

Mr. David Ben-Gurion, speaking in the Israeli *Knesset* on Nov. 15, rejected Sir Anthony Eden's offer to mediate between Israel and her Arab neighbours on the ground that it was designed "to truncate the territory of Israel for the benefit of her neighbours" and therefore had "no legal, moral, or logical basis."

Mr. Ben-Gurion said that Sir Anthony Eden's proposals, instead of fostering better relations and bringing peace nearer, were more likely "to encourage and intensify Arab aggression and lessen the likelihood of peace in the Middle East." He emphasized that Israel could not conduct negotiations on the basis of those proposals, which, he said, involved the "dismemberment of Israel's territory" and were tantamount to "bestowing a prize upon the aggressors." He added: "The invasion by the Arab States [i.e. in 1948] has made all U.N. resolutions on Palestine null and void They cannot be brought back to life, any more than the thousands of Jewish defenders who gave their lives"

Quoting Sir Anthony Eden's criticism of the Soviet Union, Mr. Ben-Gurion said that it was disquieting that he [Sir Anthony] had "deliberately ignored the grave danger which the supply of weapons of war to one side only meant for Israel." Although Sir Anthony had placed the whole responsibility on the suppliers and not on the recipients—"as if the purchasers of the arms had bought them for decorative purposes only"—he had apparently forgotten that "for a long time his Government, too, had been sending arms to one side only—and there is no indication in his statement that it will not do so again in future."

The British Prime Minister (Mr. Ben-Gurion added) had not seen fit to point out that Israel, which was the victim of aggression in 1948, harboured no hostility towards her neighbours after the end of the fighting, and had stretched out the hand of peace "That hand is still outstretched," said Mr Ben-Gurion, "but when Sir Anthony Eden asks for a compromise between the frontiers of 1947 and the frontiers of 1949, his request may be described as fitting his own definition of an innocent commercial transaction as applied by Russia to the Czech arms deal with Egypt."

A statement on the U.N. resolutions of 1947, to which Sir Anthony Eden referred in his Guildhall speech, was issued on Nov. 10 by the Israeli Embassy in London.

The statement recalled that the Arab leaders had rejected the U.N. resolutions at the time, after the withdrawal of the mandatory Power (Britain); had attacked Israel to prevent them from being enforced; and had only supported the U.N. resolutions after the failure of their invasion of Israel. Israel's title to the territories she had occupied at the end of the defensive war, the statement declared, was at least as valid as that by which Egypt had occupied the "Gaza strip," which had not been given to her under the U.N plan, or that by which Jordan had annexed part of mandatory Palestine without U.N authority. It reaffirmed that Israel would accept the existing armistice lines and would be ready, in the course of general negotiations for a peace settlement, "to make necessary minor adjustments of those boundaries . . to facilitate the solution of local problems and to make the 'line' more workable" The statement added, however: "Israel does not admit any claim on the part of the Arabs, whether alone or supported by other Powers, to any of the territory Israel now holds" At the same time it reiterated the offer "to meet Arab representatives, without pre-conditions on either side, for the amicable discussion of a just and lasting peace"

Following his discussions with Mr. Macmillan and Mr. Dulles in Paris, Mr. Sharett, the Foreign Minister of Israel (then Prime Minister), had meetings in Geneva on Oct. 27 and subsequent days with Mr. Macmillan, Mr. Dulles, and M. Pinay, and on Oct. 31 with M. Molotov. No official statements were issued, but it was understood that assurances had been given to Mr. Sharett by the Western Foreign Ministers that the tripartite declaration of 1950 constituted an adequate guarantee to Israel against any attack by her Arab neighbours. [Under the tripartite declaration, the U.S.A., Britain, and France agreed to take joint action in the eventuality of any aggression in the Middle East, whether from the Arab or the Israeli side.] After his conversation with Mr. Molotov—which was understood to have dealt with Communist arms supplies to the Arab countries—Mr. Sharett said that "nothing unexpected had occurred."

A spokesman of the Israeli Foreign Ministry stated on Nov 7 that Mr. Sharett was leaving for the U S A with a "completely revised" arms policy, which had "become inevitable the moment Egypt made her deal with Soviet Russia for Czechoslovak arms" The spokesman added "Previously we had been favourable to a limitation of armaments in the Middle East, now we ask for the right to a balance in arms" Mr Sharett arrived in New York on Nov. 10 for a fortnight's speaking tour on behalf of Israel development bond issues.

The Israeli Ambassador in Washington (Mr Eban) said at a press conference on Nov. 8 that Israel would ask the U.S.A. for a "significant quantity" of arms to ensure Israel's security.

No official statement was made by any of the Arab States in response to Sir Anthony Eden's offer to mediate in the Arab-Israeli dispute. Colonel Nasser, however, issued a statement on Nov. 3 declaring that the Israeli attack at El Auja proved that Mr. Ben-Gurion was "not sincere" in his appeal for peace (see 14520 A), which had been delivered only a few hours before the attack was launched. He described Mr. Ben-Gurion's appeal as "a smoke-screen designed to conceal his aggressive intentions," and said that "it seems that Ben-Gurion wants to force peace on us." (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris) **(Prev. rep. A. PORTUGAL - UNITED KINGDOM. — State Visit to Britain by President of Portugal.

The President of Portugal (General Craveiro Lopes), accompanied by Madame Craveiro Lopes, paid a three-day State visit to Britain on Oct. 25-27.

During their first day in London, the President and Mme. Craveiro Lopes laid wreaths on the Tomb of the Unknown Warrior, visited the Queen Mother at Clarence House, received addresses at St. James's Palace from the London County Council and the Mayor and Corporation of Westminster, and in the evening attended a State banquet given at Buckingham Palace by H.M. the Queen and the Duke of Edinburgh.

On Oct. 26 the President and Mme. Craveiro Lopes received the High Commissioners of Commonwealth countries and the Ambassadors of foreign countries at Buckingham Palace, attended a luncheon given in their honour at Guildhall by the Lord Mayor (then Sir Seymour Howard) and Corporation of the City of London, visited the Exhibition of Portuguese Art at the Royal Academy (Burlington House), and in the evening gave a dinner to H.M. the Queen and the Duke of Edinburgh at the Portuguese Embassy in Belgrave Square.

In the morning of Oct. 27 the Portuguese President visited the Atomic Energy Establishment at Harwell and the R.A.F. station at Benson, Oxfordshire, whilst Mme. Craveiro Lopes visited a children's day nursery in Westminster, followed by a visit to the Wallace Collection. In the evening General and Mme. Craveiro Lopes, accompanied by the Queen and the Duke of Edinburgh, attended a gala performance of Smetana's *The Bartered Bride* at the Royal Opera House, Covent Garden.

President and Mme. Craveiro Lopes travelled to Britain on board the Portuguese sloop *Bartolomeu Dias*, returning to Lisbon on Oct. 28 by air. (Times - Daily Telegraph)

A. FRENCH MOROCCO. — Abdication of Sultan Moulay Ben Arafa. - Return of Sultan Mohammed Ben Youssef after Recognition by French Government. - M. Dubois succeeds General de Latour as Resident-General. - Suppression of Riff Revolt. - French Allegations of Spanish Aid to Rebels.

Sidi Mohammed Ben Youssef, who had arrived in France on Oct. 31 from his exile in Madagascar, returned to Morocco on Nov. 16 after the French Government had formally recognized him on Nov. 6 as the legitimate Sultan. The Sultan's return and reinstatement brought to an end the controversy caused by his deposition on Aug. 20, 1953. Developments in Morocco since the establishment of the Council of the Throne on Oct. 15 are described below.

The Council of Guardians of the Throne was formally installed on Oct. 17, and two days later invited Si Fatmi Ben Slimane, a leading independent nationalist, to form a Government.

Ben Slimane, who accepted the Council's invitation on Oct. 22, is a member of a prominent Moroccan ruling family, and was appointed president of the Supreme Sherifian Court at Rabat in 1945, and subsequently Pasha of Fez. In June 1953 he publicly protested against the intrigues then being conducted against the Sultan Mohammed Ben Youssef, and in consequence was removed from office by the new Sultan immediately after his accession in August of that year He was a member of the nationalist delegation which visited Madagascar in September last for negotiations with Ben Youssef.

Although the Democratic Independence Party expressed its willingness to serve in the new Government, its formation was delayed by the attitude of the Istiqlal (the other nationalist party), which refused to recognize the Council of the Throne on the grounds that its composition differed from that agreed upon at the Aix-les-Bains conference, and that Ben Youssef had not yet been allowed to leave Madagascar. In reply to these objections, Si Bekkai (the nationalist representative on the Council) published on Oct. 22 a telegram from Ben Youssef approving of the Council as constituted, whilst Ben Slimane announced on the same day that Ben Youssef's departure for France was imminent.

Popular dissatisfaction with Ben Youssef's continued exile and with the composition of the Council had led to serious riots at Marrakesh and Rabat, and to an increase in terrorist activities in Casablanca, Rabat, Meknès, and other cities. The political situation, however, was dramatically transformed on Oct. 25 when Hadj Thami El-Glaoui (the Pasha of Marrakesh), after visiting the Council of the Throne at Rabat, publicly announced his support for the restoration of Ben Youssef. This development came as a complete surprise, as El Glaoui had been Ben Youssef's bitterest opponent since 1950, had led the movement for his deposition, and had violently opposed any suggestion that Sultan Moulay Ben Arafa should abdicate.

In his statement El Glaoui said : " My visit to the members of the Council of Guardians of the Throne must not be interpreted as a recognition of the Council, the legitimacy of which I have never ceased to deny. I share the joy of the entire Moroccan people at the announcement of His Majesty Sidi Mohammed Ben Youssef's return to France. I associate myself with the desire of the Moroccan nation for the speedy restoration of Sidi Mohammed Ben Youssef and his return to the throne, which alone can unify the nation in heart and spirit...."

Similar declarations of support for Ben Youssef were issued during the next few days by almost all his former opponents, including the religious leader El Kittani, Prince Moulay Abdallah (whom Ben Arafa had entrusted with the Royal seal on his departure to Tangier), Si Abderrahaman El Hajoui (former director of protocol to Ben Arafa), and many pashas and caïds The *ulema* of Fez (the religious body which elects the Sultan) proclaimed on Oct 26 that prayers should be offered " in the name of the legitimate Sultan Sidi Mohammed Ben Youssef."

On Oct. 29 the Sultan Moulay Ben Arafa announced his decision to abdicate in a letter to President Coty, which was worded as follows :

" The situation in Morocco obliges us to take a further step along the path of self-effacement on which we have entered in our people's interests. In view of the unanimity of our beloved people, and of the will of a nation to which France has given unity and prosperity, we now consider it our duty . . . to renounce all our rights, whilst calling upon our subjects to rally, now that all obstacles have been removed, to the person of Sidi Mohammed Ben Youssef."

Following the publication of this letter on Oct. 31, the French Government issued a communiqué stating that El Glaoui's declaration and Ben Arafa's decision had fundamentally modified the dynastic problem, which it had always regarded as a " strictly Moroccan problem," and noting with satisfaction "the possibilities which are now offered of ensuring calm and orderly development in Morocco."

El Glaoui's declaration was followed by mass demonstrations in all the large towns, which continued until Oct. 31 and gave rise to a number of incidents ; several people were killed and wounded in clashes at Oujda and Marrakesh, although in general the demonstrations passed off peacefully. Terrorist attacks, however, continued, in one of which the vice-president of the Moroccan section of *Présence Francaise* (Mustapha ben Raissi Bouchaid) was killed by a gunman

Ben Youssef arrived at Nice by air from Madagascar on Oct. 31, and was welcomed by Ben Slimane and other Moroccan notables and by representatives of the French Government. On the following day he proceeded to St. Germain-en-Laye, near Paris, where he was installed as the French Government's guest and where he later received M. Pinay, the French Foreign Minister, who had returned for the purpose from the Geneva conference of Foreign Ministers. In a statement issued after their meeting Ben Youssef declared that he welcomed with " immense pleasure " the Moroccan people's " unanimous desire to achieve the full exercise of its democratic liberties, within the framework of its sovereignty and of a Franco-Moroccan inter-dependence freely elaborated in justice, friendship, and respect for each other's interests, as the French Government, in accordance with our wishes, proposed on Oct. 1."

The members of the Council of the Throne tendered their resignation to Ben Youssef on Nov. 2, stating that they considered their task to be accomplished. During the next three days Ben Youssef received a number of delegations representing different sections of Moroccan opinion.

To representatives of the Istiqlal and of the Democratic Independence Party he gave an assurance that he favoured the institution of a democratic regime and a constitutional monarchy in Morocco On Nov. 4 he informed two representatives of the French community that he regarded the French settlers as " an essential component of the Moroccan community," and that he considered that " no durable progress can be made in the definition of their rights and duties without their co-operation " On Nov. 5 he received two officials of the World Jewish Congress, to whom he gave a pledge that Moroccan Jews would enjoy complete equality of rights with Moslems ; in this connexion he recalled that during the war he had resisted pressure by the Nazis and by the Vichy regime to introduce discriminatory measures against the Jews of Morocco

The French Government issued a communiqué on Nov. 5 recognizing Ben Youssef as Sultan, in the following terms : " The French Government is happy to state that the crisis which has long divided Morocco can now end with the unanimous agreement of the Moroccan people. With the return of his Majesty Sidi Mohammed Ben Youssef to the Sherifian throne, the way is now open for constructive negotiation. The sovereign, who is at present the guest of France, will soon return to Morocco. The French Government, which remains faithful to the policy laid down in its declaration of Oct. 1, 1955, and to the principles expounded by the Prime Minister before the National Assembly on Oct. 8, 1955, will work for the development of Morocco into a modern, free, and sovereign State, within a framework of interdependence with France, in accordance with the guiding principles which formed the subject of the letters exchanged between General Catroux and H.M. Sidi Mohammed Ben Youssef on Sept. 8-9, 1955, at Antsirabé." The text of the Antsirabé correspondence was published at the same time.

General Catroux's letter of Sept. 8 defined the objectives of the French Government's policy as " to confirm by indisputable acts the principle of Moroccan sovereignty, and to lead Morocco to the status of a modern, free, and sovereign State, united to France by the permanent bonds of a freely accepted interdependence ; with the reservation that, in view of the indissoluble nature of the bonds uniting the two countries, the rights and major interests of France in strategic, political, diplomatic, economic, and cultural matters shall be guaranteed, and that Frenchmen settled in the [Sherifian] Empire shall be granted a status proportionate to the important contribution which they have made and will continue to make to Morocco's general well-being." During their conversations (the letter recalled) Ben Youssef had completely approved this policy ; had stated that " the permanence of France's presence in Morocco and of her rights and prerogatives was not a subject for discussion, as the two countries were inseparable " ; and had agreed that Frenchmen in Morocco should have "a different status from foreigners."

In his reply, dated Sept 9, Ben Youssef reaffirmed his support for this policy, for the appointment of a Council of the Throne " without thereby abandoning any of our rights," and for the formation of a representative Government.

On Nov. 6 M. Pinay received Ben Youssef at the Château of La Celle-St. Cloud, near Paris, and officially informed him that the French Government recognized him as the *de jure* Sultan of Morocco and that he was free to return to Rabat. They then returned together to the Sultan's temporary residence at St. Germain-en-Laye, where the Sherifian flag was hoisted and a military guard of honour was posted. A joint statement issued after the ceremony announced that the

Sultan had authorized the Council of the Throne to conduct Government business pending his return to Rabat; that he would establish a representative Government entrusted both with negotiations with France and with reforms creating a democratic State and a constitutional monarchy in Morocco; and that "France and Morocco would build their common future together, without the intervention of any third party, affirming their sovereignty, mutually guaranteeing their rights and those of their citizens, and respecting the treaty rights of foreign Powers."

The right-wing settlers' organization, *Présence Française*, issued on Nov 7 a communiqué declaring that it officially recognized Ben Youssef as Sultan "for the first time," and putting forward the following demands. "The future status of the French population of Morocco must be based on numerically equal representation for Frenchmen and Moroccans in internal assemblies, the Council of Government, municipal councils, etc. This status must be negotiated under the aegis of France, but directly between the spokesmen of the French population and of the Moroccans The Frenchmen of Morocco will never recognize any statute or agreement concluded without their participation. Regular elections must be organized for the formation of a Council of the French of Morocco The task of this Council will be to discuss the future status of the French population with the future Sherifian Government."

El Glaoui travelled to France and presented himself before the Sultan on Nov. 8, asking on his knees for pardon and declaring that he had been "deceived" The Sultan, in reply, assured him that "the past is forgotten" and that "you will be judged by what you do in the future." A large number of pashas and caïds who had taken part in the Sultan's deposition also appealed for, and received, his pardon on the same day.

Si Allal El Fassi, the exiled leader of the Istiqlal, sent the Sultan a telegram of congratulations from Cairo on Nov 8 assuring him of his loyalty, but in a Press statement on the same day criticized the reference to "permanent bonds with France" in the joint statement issued by the Sultan and M. Pinay two days earlier A delegation from the Istiqlal was received by the Sultan on Nov. 9, and subsequently issued a communiqué noting with satisfaction the French undertaking to lead Morocco to the status of an independent State, emphasizing that the first objective of Franco-Moroccan negotiations must be the replacement of the Treaty of Fez of 1912 by a new agreement, and claiming that a complete identity of views existed between the Sultan and the Istiqlal on this matter.

On subsequent days the Sultan had another meeting with El Glaoui on Nov. 11, and with M. Balafredj (secretary-general of the Istiqlal) and M. Ouazzani (of the Democratic Independence Party) on Nov. 12. On the latter date it was announced in Rabat that, on behalf of the Council of the Throne and on the orders of Sultan Ben Youssef, M. Ben Slimane had notified the members of the *Makhzen* (i.e. the Moroccan members of the Council of Viziers and Directors) that they would no longer be required to attend any official functions, and that their offices would be terminated as from Nov. 15.

The French Government announced on Nov. 9 that it had accepted the resignation of General de Latour, the Resident-General in Morocco, and had appointed M. André Dubois as his successor with immediate effect.

M Dubois (52), a Civil Servant born at Bône (Algeria), had been Prefect of the Paris police since July 1954, and in that capacity had become well known for prohibiting the use of motor-horns in Paris (see 13948 D)

Sultan Ben Youssef returned by air to Morocco on Nov. 16, being received at Rabat (the capital) by the members of the Council of the Throne, M. Ben Slimane, M. Dubois, and several hundred notables from French and Spanish Morocco and the International Zone of Tangier. He was enthusiastically welcomed by vast crowds—including large numbers of Berber tribesmen—lining the route from the airport to the palace.

Addressing the crowds from the palace, the Sultan declared: "Like you, we have kept faith; like you, we have done our duty. Behold us now before you, the same as you have always known us, ever devoted to the service of our homeland. Praise be to Allah, who in his mercy has brought our trials to an end."

Later in the day the Sultan held an official reception at which M Dubois reaffirmed the intention of the French Government to lead Morocco to the position of an "independent State, united with France by permanent links of inter-dependence based on free consent."

In reply, the Sultan declared that M. Dubois could always count on his support in effacing the causes and consequences of the past two years of crisis—a crisis, he affirmed, essentially political in character. His own desire was to be "the constitutional monarch of a modern, democratic, and independent State." He asked the Resident-General, as representative of France, to assuage the anxieties of the French settlers in Morocco and to assure them of his desire that they should live in fruitful co-operation with his subjects in "a new but ever hospitable Morocco."

On the previous day M. Dubois had announced an amnesty for 1,700 prisoners convicted on minor charges, and had empowered prison governors to shorten the sentences of other convicts. The three-year ban on the newspaper *El Allam*, the daily organ of the Istiqlal, was lifted by M. Dubois on Nov. 14.

Despite the relaxation of tension caused by the Sultan's return, and his appeal for the preservation of law and order, clashes and terrorist activities continued in various cities. During the first week of November 28 people were killed and 59 injured by terrorists, a higher total than for any corresponding period since August. Casualties through acts of terrorism during the weekend Nov. 12-13 numbered 18 killed and 11 wounded, including 13 killed and 6 injured in 29 terrorist attacks at Casablanca.

The Riff Revolt.

In the Riff area, where an uprising had broken out on Oct. 1-2, the French forces launched a fresh offensive on Oct. 23 to the east of Tizi Ouzli, as a result of which the last considerable insurgent force still at large was driven across the frontier into Spanish Morocco. A group of rebels from Bou Zineb (a French *enclave* in Spanish Morocco) made a successful raid on Oct. 25 on a French unit near Boured, but on Nov. 3 Bou Zineb was reoccupied by French troops, most of the insurgents having fled. Total rebel casualties from Oct. 1-15 were estimated by the French authorities at 100 killed and 2,000 wounded in the Riff area, 40 killed and 100 wounded in the Middle Atlas, and three killed and 15 wounded in the Taforalt area.

Although the French authorities announced, at the beginning of November that the Riff rebellion was virtually over, another serious clash occurred on Nov. 11 north of Boured, near the Spanish Moroccan border, when a rebel force about 300 strong and armed with automatic weapons twice attacked a unit of French Moroccan troops, French casualties were 10 soldiers and n c.o.s killed, 16 injured, and several missing

Franco-Spanish Note Exchanges.

The disturbances in the Riff led to exchanges of Notes between the French and Spanish Governments, the former complaining at the alleged help given to the rebels from the Spanish zone of Morocco, and the latter repudiating these allegations.

The Spanish Government protested to France on Oct 15 against "the systematic campaign of false information conducted by the French Press and radio," and against allegations by General de Latour and General Billotte (the French War Minister) that the Riff revolt was receiving support from Spanish Morocco The Note claimed that strict border control was being exercised by the Spanish authorities to prevent any infiltrations into French Morocco by trouble-makers, and declared that Spain might be obliged to take the matter to the U.N if the French press campaign against Spain continued The High Commissioner of Spanish Morocco (General Valino) stressed that those sections of the frontier affected by the Riff revolt had been completely closed by the Spanish authorities.

In reply, General de Latour declared on Oct 16 that "it is notorious that the Moroccan rebels have found help and refuge in the Spanish zone of Morocco." He added: "The most patent fact, which no-one can deny, is that the French post of Bou Zineb, which was only an observation post in the Spanish zone, was attacked by rebels, and that the neighbouring Spanish post, which is responsible for maintaining order in the area, did not intervene." General de Latour also alleged that a French unit had been fired upon from the Spanish zone on Oct 14. The Spanish Note was rejected by France

A reply to General de Latour's statement was issued on Oct. 17 by the Spanish Foreign Ministry, which pointed out that the nature of the terrain made it impossible to define the frontier with exactitude, and therefore difficult to prove that French forces had been fired upon from the Spanish zone. It added "The Resident-General complains that the Spanish position near the advanced post of Bou Zineb did not help that post when it was attacked by rebels. Yet the French Government, when it violated treaties to depose the legitimate Sultan, cannot now call upon Spain for assistance in military operations intended to suppress the discontent provoked by this obtuse policy . . ." The Spanish Consul-General at Rabat protested to General de Latour on Oct. 18 against three recent incidents in which French artillery or aircraft were alleged to have bombarded Spanish territory. The allegations were denied by the French authorities.

During his stay at St. Germain-en-Laye the Sultan received the Spanish Ambassador in Paris (the Count of Casa-Rojas) and expressed his gratitude to General Franco and to the Spanish Government for having continued to recognize him throughout his exile.—(Le Monde, Paris - Le Figaro, Paris - Times - Daily Telegraph - New York Herald Tribune)

A. UNITED KINGDOM. — Purchasing Power of £.

The Economic Secretary to the Treasury (Sir Edward Boyle) stated in a parliamentary answer on Nov. 10 that, taking the value of the £ as 20s. in 1938, it was estimated that the internal purchasing power for 1946 (for which monthly figures were not available) was 11s. 10d.; for May 1952, 8s. 6d.; for February 1955, 8s.; and for September 1955, 7s. 10d. This estimate was based on the consumer price index, supplemented by the interim index of retail prices.—(Times) **(13025 E.)**

A. BRAZIL. — Army Coup d'Etat. - Deposition of Acting President Luz. - Senhor Nereu Ramos appointed President of Brazil until January, 1956. - New Cabinet. - Final Presidential Election Results.

President Café Filho took indefinite leave on Nov. 8, having suffered a heart attack a few days earlier, and on the same day Senhor Carlos Coimbra da Luz, the President of the Chamber of Deputies, became acting President of the Republic under the provisions of the Brazilian Constitution. On Nov. 11, however, Senhor Luz was deposed by a *coup d'état* led by the Minister of War, General Teixeira Lott, and Senhor Nereu Ramos, President of the Senate and constitutionally next in line of succession to the presidency of the Republic, was elected Acting President by Congress; the voting was 185 to 72 in the Chamber of Deputies and 44 to 19 in the Senate. President Ramos will serve until Jan. 31, 1956, when Senhor Kubitschek—who was elected to the presidency in the recent elections—formally takes office.

President Ramos (66), a close friend of the late President Vargas, belongs—like both Senhor Luz and Senhor Kubitschek—to the *Partido Social Democratica*. A professor of constitutional law, and a former Governor of the State of Santa Catarina (where he owns a number of newspapers), he was elected to the Chamber of Deputies in 1930 and to the Senate in 1954.

The *coup* was organized by the Army, as the traditional defenders of the Constitution, because of a movement by influential officers and politicians who were strongly critical of the results of the recent elections in which Senhor Kubitschek and Senhor Goulart were returned as President and Vice-President. Senhores Kubitschek and Goulart had been supported not only by the parties which backed the late President Vargas but also by the Communists, who, although banned as a political party, are still allowed to publish propaganda and otherwise to express their views publicly. Because of this support there had been moves to have the election results declared invalid, and these attempts were believed to have been favoured by the Navy and the Air Force.

The immediate events leading up to the Army *coup* originated in a speech on Nov. 1 by Colonel Mamede, one of the signatories of the "manifesto of the colonels" at the beginning of 1954 which had led to the resignation of Senhor Goulart as Minister of Labour in the Vargas Cabinet, and had initiated the political crisis that ended in President Vargas's suicide. In his speech Colonel Mamede publicly advocated a rising to prevent the installation of Senhor Kubitschek and Senhor Goulart in January. General Teixeira Lott, determined to keep the Army out of politics, demanded that acting President Luz should transfer Colonel Mamede to some less influential post, but the President supported the Colonel and refused to take action against him. General Teixeira Lott thereupon resigned as Minister of War and subsequently staged the *coup d'état*.

Army forces under the command of generals occupied the central police headquarters and the mayor's office in Rio de Janeiro, whilst other Army contingents surrounded Government buildings, the radio station, the post office, and several newspaper buildings. In a statement General Lott claimed that the Presidents of the Supreme Court and of Parliament had declared their "solidarity with the movement tending to return the situation to that of a normal constitutional regime," and that his action was supported by all the officers of the garrison in the capital, by the commanders of the central and northern military zones, by the 5th Infantry Division, and by the Governor of the State of Minas Gerais.

The Navy and Air Ministers, on the other hand, issued a statement declaring that they considered the Army's action to be "illegal and subversive," and pledging the support of their forces to President Luz. Marines with field guns were deployed in strategic positions around the Air Ministry, and defensive positions were established at the Galeao air base, outside the capital. Later, however, the Navy Ministry informed Congress that it would support General Lott and abide by the decision of Congress, and the Galeao air base surrendered without opposition.

The *coup* was carried out without any fighting, although a number of senior officers were arrested, including Lieut.-General Alvaro Fuiza de Castro, who had briefly succeeded General Lott as War Minister. Senhor Luz left Rio de Janeiro aboard the cruiser *Tamandare* on Nov. 11, but subsequently returned to the capital and on Nov. 14 resigned his position as President of the Chamber of Deputies, though retaining his seat in Congress. No action was taken against him or against others who had opposed the *coup*, and all arrested persons were later released. Senhor Carlos Lacerda (the editor of *Tribuna da Imprensa*), however, who had openly favoured a *coup* of the sort which General Lott's action had been designed to prevent, remained in the Cuban Embassy, where he had taken refuge.

On assuming the presidency, Senhor Ramos reinstated General Teixeira Lott as Minister of War and retained Senhor Camara as Minister of Finance, but otherwise completely reorganized the Government. The following new appointments were announced on Nov. 12: Foreign Affairs—Senhor José C. Macedo Soares; Justice—Senhor Francisco Mendez Pimentel; Labour—Senhor Nelson Omegna; Navy—Rear-Admiral Antonio Alves Camara jr.; Air—Brigadier Jasco Alves Secco.

Shortly before these events, the final results of the recent Presidential elections had been officially announced as follows: Senhor Juscelino Kubitschek, 2,878,345; Major-General Juarez Tavora, 2,543,067; Senhor Adhemar de Barros, 2,188,781; Senhor Plinio Salgado, 697,931. In the Vice-Presidential elections the voting was: Senhor João Goulart, 3,413,651; Senhor Milton Campos, 3,253,194; and Senhor Danton Coelho, 1,127,907.—(New York Times - New York Herald Tribune - Times - Le Monde, Paris) **(14479 A.)**

B. CYPRUS. — Economic Development Programme.

Details of a comprehensive economic and social development programme for Cyprus, costing about £38,000,000, were announced by the Governor (Field-Marshal Sir John Harding) in a broadcast on Nov. 16. The main features of the programme, which had been approved by the British Colonial Secretary (Mr. Lennox-Boyd), were as follows:

(1) Development of rural areas, with emphasis on irrigation and water-supply programmes. A sum of £500,000 had been allotted for this purpose during the next 12 months.

(2) Agricultural research and the expansion of forestry, to enable the island to rely to a much greater extent on its own timber resources than hitherto.

(3) Expansion of electrical supply and inland telecommunications.

(4) Port development, in which connexion Sir John Harding said that there was "no reason why a first-rate modern port should not help to make Cyprus the busiest and most prosperous island in the Mediterranean." Plans for such a port were at present being drawn up by a firm of consulting engineers.

(5) A first-class network of trunk roads capable of carrying all types of modern vehicles.

(6) Improvements at Nicosia airport.

(7) Improvements to school buildings, the establishment of technical high schools in the four main towns outside Nicosia, and the conversion of the technical trades' school at Nicosia into a technical institute. As regards higher education, a "liberal and extensive" range of scholarships would be provided for residential courses at universities and other institutions in the United Kingdom.

(8) The provision of funds to provide small dwelling houses on hire-purchase terms. In addition, measures for social insurance would be announced shortly.

Sir John Harding emphasized that the British Government were determined both to restore law and order and to develop the island's economy so as to ensure a substantial rise in the standard of living. No progress in the betterment of economic and social conditions, however, could be made without the restoration of public security and confidence, and in this connexion immediate measures would be taken to build up an adequate police force, which had hitherto been lacking. The Governor ended his broadcast with an appeal to all Cypriots to co-operate in achieving prosperity and the development of "this lovely island."

The new development plan was an expanded version of one that had been worked out earlier between the Colonial Office and the former Governor, Sir Richard Armitage.

C. JORDAN. — Expansion of Armed Forces. - Acquisition of Jet Aircraft from Britain.

The Jordanian Prime Minister (Said el-Mufti) announced on Nov. 1, when reading the Speech from the Throne on behalf of King Hussein, that Jordan intended to reinforce her armed forces with heavy modern weapons and to build up an effective air force. He declared that the Government's policy with regard to Palestine was based on the principles of the Arab League, that Jordan regarded herself as the Arabs' "front line against the Zionist danger," and that a solution to the Palestine problem should be found within the framework of a complete understanding between the Arab countries.

It was stated in Amman on Nov. 6 that Britain had agreed to supply the Jordanian Air Force with ten *Vampire* jet aircraft.

D. UNITED STATES. — President Eisenhower leaves Hospital. - Convalescence at Gettysburg.

President Eisenhower flew to Washington on Nov. 11 from Denver, where he had been recovering from his heart attack on Sept. 24, and was given an enthusiastic welcome by large crowds. On Nov. 14 he drove to his farm at Gettysburg (Pennsylvania), some 75 miles from the Federal capital, for an indefinite convalescence. A temporary office for the Administration was established at Gettysburg under Mr. Sherman Adams, the President's Assistant, until the President could resume his duties in Washington. (New York Times) **(Prev. rep. 14152 D.)**

A. JAPAN. — Party Mergers. - Establishment of Two-Party System.

After a four-year split, the two Japanese Socialist parties—the Right-wing and Left-wing Socialists—merged on Oct. 14 as a unified Socialist Party, with 155 seats in the House of Representatives (the Lower House) and 70 seats in the House of Councillors (the Upper House). On Nov. 15 the Democratic and Liberal parties merged under the name of the Liberal Democratic Party, with 302 seats in the House of Representatives and 115 in the House of Councillors. As a result of these developments, a two-party political system emerged for the first time in Japanese parliamentary history.

Merger of Socialist Parties. The merger of the two Socialist parties had been agreed upon in January last, and was effected after many months of negotiations which ended in agreement on a programme acceptable to both groups. Whereas the Left-wing Socialists had based themselves on the Marxist conception of the "class struggle" and had demanded the complete disarmament and neutralization of Japan, the Right-wing Socialists had worked for the establishment of Socialism by parliamentary processes, and had supported limited rearmament and the recognition of Japan's dependence on the United States for security purposes During the three months preceding the merger, the gap between these points of view had gradually narrowed, largely as a result of major concessions by the Left-wing Socialists

Eventually, both groups accepted a programme of which the principal points were as follows : (1) internal policy—the achievement of Socialism by democratic and peaceful processes, accompanied by far-reaching economic and social reforms ; (2) foreign policy—the termination of the U S.-Japanese security pact, and its replacement by a "Locarno-type" pact for the Pacific and Far East which should include the Soviet Union and the People's Republic of China as well as Japan and the United States , (3) defence policy—support for world disarmament, opposition to Japanese rearmament, a halt to the present expansion of the armed forces, and the creation of a security police force for internal protection The two principal objectives of the Socialist Party were defined as (1) "to change the present capitalistic structure of the country into one of socialistic form through democratic and peaceful methods," and (2) "to recover complete independence for Japan." Whilst the party's constitution stipulated that the Socialist Party was based on the working-class, and was of a working-class character, it reaffirmed that its principles were not compatible with Communism, which was strongly denounced in the preamble to the party's programme.

The two parties formally dissolved themselves on Oct. 13, the unified Socialist Party coming officially into existence on the following day Mr Suzuki, formerly head of the Left-wing Socialists, became chairman of the unified party, whilst Mr Asanuma, formerly secretary-general of the Right-wing Socialists, assumed the same post in the unified party

Merger of Democratic and Liberal Parties. Negotiations for the merger of the Democratic Party (the Government party headed by the Prime Minister, Mr. Hatoyama) and the Liberal Party, which began last spring, ended on Nov. 13, when the Liberals finally approved the merger Both parties formally dissolved themselves on Nov 14, and the Liberal Democratic Party—which is Conservative in character —came officially into existence on the following day. A six-point programme was adopted which included the attainment of economic independence, the establishment of a Welfare State, measures to combat bureaucracy, revision of the post-war Constitution to permit Japanese rearmament, and the eventual revision of the U.S.-Japanese security pact

The principal obstacle to the unification of the two parties had been a dispute about the party leadership, which remained unresolved The Democrats wanted Mr Hatoyama to become party chairman, with Mr. Ogata (the leader of the Liberals) as his deputy, whilst the Liberals had demanded the open election of officers When a deadlock on this matter threatened to wreck the merger of the two parties, it was agreed, as a compromise, that the new party should be headed by a four-man executive committee comprising Mr. Hatoyama, Mr. Ogata, and two other members—Mr. Kishi, a Democrat, and Mr. Ishii, a Liberal. It was agreed that this arrangement should continue until the spring of 1956 Mr. Kishi, formerly secretary-general of the Democratic Party, was appointed to the same post in the new party, whilst Mr Ishii, his former Liberal counterpart, was appointed chairman of the executive committee

Two prominent Liberals—Mr. Yoshida, the former Prime Minister, and Mr. Sato, a former secretary-general of the Liberal Party—refused to accept the arrangements for a joint executive committee, and announced that they would sit in the Diet as Independents.

As a result of the mergers, party strengths in the two Houses of the Japanese Parliament were as follows · (*a*) House of Representatives (467 members)—302 Liberal Democrats, 156 Socialists, eight others (including two Communists), one vacancy; (*b*) House of Councillors (250 members)—115 Liberal Democrats, 70 Socialists, 47 *Ryukufukai*, 18 others, five vacancies.—(Japanese Embassy, London - Times - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. Political Parties, 14005 A ; Elections, 14133 A.)**

B. ALBANIA. — Population Figures.

Tirana Radio announced on Nov. 12 that a recent national census had shown the population of Albania to be 1,894,310, an increase of 175,867 since 1950. (Times)

C. EUROPEAN TRANSPORT. — Formation of "Eurofima" Company. - Convention signed.

At the third meeting of the European Conference of Ministers of Transport, held in Berne from Oct. 18-20 under the chairmanship of Dr. Lepori (the Swiss Minister of Communications), the Transport Ministers of 14 European countries signed the international convention formally establishing the "Eurofima" Company for the financing of railway rolling-stock, with headquarters in Basle. The signatory countries were Austria, Belgium, Denmark, France, the German Federal Republic, Italy, Luxemburg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and Yugoslavia. The only European countries represented at the conference which did not sign were Greece, Turkey, and the United Kingdom.

The company's capital of 50,000,000 Swiss francs, divided into 5,000 shares of 10,000 francs each, will consist of A shares (payable in cash) and B shares (for which payment is to be made by bringing in goods wagons). The largest participations will be those of the German Federal Railways and the French National Railways Company (1,300 B shares each), followed by the Italian State Railways (700 B shares) and the Belgian National Railway Company (550 B shares). The Swiss Federal Railways will hold 400 A shares ; the Netherlands Railways 300 B shares , the Swedish State Railways, the Spanish Railways, the Luxemburg National Railway Company, and the Yugoslav Railways 100 A shares each , the Portuguese Railway Company 20 A shares ; and the Austrian Federal Railways, the Danish State Railways, and the Norwegian State Railways 10 A shares each It was stipulated that the B shares would have to be converted into A shares within 10 years.

The value of the goods wagons to be brought in will be : German and French Railways, 11,700,000 Swiss francs each ; Italian Railways 6,300,000 frs. ; Belgian Railways 4,900,000 frs , and Netherlands Railways 2,700,000 frs. The wagons brought in will be rented back by the various national systems.

According to its articles of association, "Eurofima" will procure new uniform rolling-stock for the railway administrations holding shares in the company. For this purpose it will place orders for goods wagons either for its own account or for the account of the participating railway administrations or similar undertakings. Any rolling-stock bought for its own account will be let or sold to the railways of member-countries. In addition to its own capital, "Eurofima" may take up loans and credits.

The lifetime of the "Eurofima" Company was fixed at 50 years. The members of the board of administration will be elected irrespective of their nationality. Each member-country holding at least two per cent of the shares (i.e , shares with a nominal value of 1,000,000 Swiss francs) will be entitled to two seats on the board Any dividends paid on A shares out of net profits will be limited to a maximum of four per cent The railways of any other countries adhering to the convention may be admitted to membership by decision of the Company's general meeting. In an additional protocol it was stipulated that payments for share subscriptions and rents of goods wagons would be settled outside any bilateral or multilateral payments agreements.

The conference also considered the co-ordination of investments in roads and road transport, as well as certain projects for waterways of European importance. It elected Dr. Lepori as chairman of the Council for the next 12 months.
(Neue Zurcher Zeitung - Le Monde, Paris)

D. UNITED KINGDOM. — University of Exeter.

The University College of the South-West of England, at Exeter, was reconstituted on Oct. 29 as the University of Exeter under a Royal Charter granted by H.M. the Queen.

The new university—the origins of which go back to 1865, and which became a university college in 1922—will initially have faculties of Arts, Law, Science, and Social Studies, and will be developed on a 200-acre site on the northern outskirts of the city. The existing buildings will be supplemented by a large building for the Faculty of Arts, to be built at a cost of £300,000, and a university chapel to be built from a benefaction by Mr. E. Vincent Harris, the former college architect.

The University of Exeter has at present over 1,000 full-time students. Its first Chancellor will be the Duchess of Devonshire. (Manchester Guardian) **(Prev. rep. Universities, 13601 A.)**

E. LIBYA. — British and U.S. Arms Supplies.

The Prime Minister of Libya (Mustafa ben Halim) announced on Nov. 16 that the British and U.S. Governments, in response to a request by the Libyan Government, had decided to supply the Libyan Army with full equipment for one battalion, including armoured cars. He added that there were no conditions of any kind, and that the arms supplies were "a new proof of the strong ties which bind Libya with Britain and America."—(Times - Daily Telegraph - New York Times)
(Prev. rep. 13790 B ; 13046 D.)

A. AUSTRIA - SOVIET UNION. — Soviet Return to Austria of Former German Industries and Oilfields. - Agreements on Austrian Compensation Payments. - Treaty of Commerce and Navigation. - Trade and Payments Agreements.

About 350 industrial enterprises which had been seized by the Soviet Government as former German property at the end of the Second World War were formally handed over to Austrian public administration on Oct. 13 under the terms of the Austrian State Treaty.

The enterprises included the 319 so-called "USIA" undertakings, 28 oil wells and refineries in N.E Austria, and the shipping and installations of the Danube Steamship Company in the former Soviet zone, as well as some 1,000 railway trucks and over 4,000 acres of land. The number of workers employed by the enterprises totalled some 50,000 According to reports by Austrian officials, the oil installations and refineries were found to be in "good shape," but in many of the factories returned to Austrian control the equipment was obsolete and worn out, whilst in some cases factories had been closed down and denuded of everything movable.

The annual production of the four oilfields returned to Austrian control was stated to have reached 3,540,000 tons in 1954 (including 2,500,000 tons from the Matzen field), making Austria the largest oil producer on the European Continent, underground oil reserves in the whole of the Soviet zone are estimated at between 50,000,000 and 100,000,000 tons. In addition, there are large reserves of natural gas, including an estimated 20,000,000 cubic metres at the Zwerndorf gas field. The other undertakings handed back comprised factories in the following industries . iron and steel, metal-goods manufacturing, metal smelting, machinery and other engineering, railway equipment, building and building accessories, electro-engineering, leather and leather goods, and glass.

The return of these assets had been preceded by the conclusion of two agreements, one specifying the manner in which Austria would pay to the Soviet Union the sum of $150,000,000 as compensation for the industrial enterprises, and the other covering Austrian oil supplies to the Soviet Union in compensation for the return of the oilfields and oil refineries. The two agreements (which had been signed in Moscow on July 12) implemented the Soviet-Austrian agreement of April 15 (see 14154 A) which preceded the final negotiations on the Austrian State Treaty.

An official communiqué was issued in Moscow on July 12 giving the following details of the two agreements :

(1) Under the first agreement Austria would supply to the Soviet Union goods valued at $25,000,000 annually for six years, the goods concerned being rolling-mill equipment, paper manufacturing machinery, wood manufacturing equipment, electric compressors, chemical apparatus, special motor vehicles, control and measuring instruments, steel sheet, tinplate, rolled copper, electric cables, oil, lacquers, rayon yarns and textiles, and footwear

(2) Under the second agreement, Austria would also deliver to the Soviet Union 1,000,000 tons of crude oil annually for ten years.

(3) Simultaneously with the negotiations on the abovementioned agreements, discussions had also taken place for the conclusion of a treaty of commerce and of a trade and payments agreement, both covering a period of five years.

It was announced in Vienna on the same date that it had been agreed at Austria's request that if, as a result of shortages of raw materials, the actual deliveries of goods or of oil should not reach the annual totals laid down in the agreements, Austria would be entitled to make up the difference by cash payments in dollars; these payments would correspond to the world market prices of the goods or oil that Austria had failed to supply

As security for the fulfilment of the agreements by Austria, the Austrian Government deposited with the Soviet Ministry of Foreign Affairs on Aug. 9 300 bills of exchange totalling $150,000,000. In addition, the Austrian Government subsequently agreed to repay to the Soviet Union the equivalent of nearly $20,000,000 which, it was claimed, had been advanced by the Soviet military bank in Vienna to the USIA enterprises.

Although Article 22 of the State Treaty provided that the rights, properties and interests to be relinquished to Austria by the Soviet Union would be transferred without any charges or claims on the part of the U.S S.R., and although it was impossible for Austria to obtain any check as to how the amount had been computed, the Austrian Government agreed to settle it after a reduction of 33 per cent (i e., from 760,000,000 schillings to 509,000,000 schillings) had been obtained.

The treaty of commerce and navigation and the trade and payments agreements between Austria and the Soviet Union, referred to in the Moscow communiqué, were signed in Vienna on Oct. 17.

Treaty of Commerce and Navigation. Under this treaty the two countries granted each other most-favoured-nation treatment as regards both trade and shipping, undertaking not to apply in their imports from or exports to each other any restrictions or prohibitions which would not also apply *vis-à-vis* all other countries. Most-favoured-nation treatment would also be granted in respect of all Customs duties, import and export charges, and taxes on imported goods, this concession applying even if the goods were sent *via* third countries. The only exceptions from the most-favoured-nation treatment would be special concessions (*a*) granted to neighbouring countries with a view to facilitating frontier traffic, or (*b*) resulting from any Customs union which either of the countries might enter. The treaty also regulated the status of legal entities and commercial corporations set up by one country or its nationals in the territory of the other, contained provisions on arbitration in commercial disputes, and defined the status of the Soviet trade organization in Austria and its responsibility for legal obligations and contracts entered into by it.

Trade and Payments Agreements. Under the trade agreement, Soviet exports to Austria will include cereals, coal and other solid fuel, hides, platinum, miscellaneous machinery, motor vehicles, caviare, chemicals, medicinal herbs, bristles, printed products, and cinema films Austrian exports to the Soviet Union will include machinery for light industries and the foodstuffs industry, woodworking equipment, turbines, hydro-electric equipment, spares for motor buses, steel wire and cables, steel pipes, veneers, kerosene, diesel fuel, leather, woollen yarns, and ship repairs.

The payments agreement provided for dollar clearing accounts with a permitted "swing" of $5,000,000

The treaty and the agreements were for five years, and subject to six months' notice of termination. They will continue in force for further five-year periods until one year's notice is given by either party.—(Wiener Zeitung - Neue Tageszeitung, Vienna - Neue Zurcher Zeitung) **(Prev. rep. State Treaty, 14193 A; Moscow Agreement, 14154 A.)**

B. UNITED KINGDOM. — Disposal of Japanese Assets. - Distribution of Proceeds to Former P.O.W.s.

Mr. Turton (Under-Secretary, Foreign Office) stated in a written parliamentary answer on Nov. 14 that about £5,500,000, representing the value of Japanese assets in neutral and ex-enemy countries, had been handed to the International Committee of the Red Cross in Geneva, and that the committee would distribute these funds in accordance with Article 16 of the Japanese Peace Treaty to appropriate national agencies for the benefit of former prisoners-of-war and their families. The committee were checking the lists of P.O.W.s and, as soon as this had been completed, the U.K. share, which might be about £1,250,000, would be handed to the Ministry of Pensions and National Insurance for distribution. It was hoped that a distribution to individual former prisoners would be possible in April 1956.

The Minister of Pensions and National Insurance (Mr Peake) announced in a statement circulated on the same day that up to the end of October a total of £2,615,000 had been paid to 57,490 beneficiaries under Article 14 of the treaty. He proposed to admit further claims until March 31, 1956, and until that closing date would not be able to give a precise appreciation of the financial position. In the meantime, however, to meet needs which were now arising, he proposed to make the following allocations to voluntary funds especially concerned with the interests of former P.O.W.s of the Japanese : The Far East Prisoners of War Central Welfare Fund, £10,000; the Returned British Prisoners of War Association, £3,000; the King's Fund (1940), £10,000. The proportionate amount for benevolent purposes for civilian internees was £4,000, and it was proposed to place this in a special fund to be administered through the King's Fund.

Mr. Peake added that, although it had been envisaged that the second distribution to individuals would be a final distribution, he would bear in mind the possibility of a further distribution when all claims received up to March 31, 1956, had been met and the financial situation was clearer. Any surplus, however, would be used entirely for the benefit of prisoners-of-war.—(Times - Daily Telegraph) **(Prev. rep. 13934 B.)**

C. JORDAN - SYRIA. — Joint Declaration by Prime Ministers. - Agreement on Defence Policy.

The Prime Ministers of Jordan and Syria (respectively Said el-Mufti and Said el-Ghazzi) issued a joint declaration in Amman on Oct. 31 stating (*a*) that the policy of both Governments was "based on the consideration that the armistice demarcation line [in Palestine] is a single Arabic defence line"; (*b*) that "any aggression against any part of that line shall be considered aggression against the whole of it"; and (*c*) that the Syrian and Jordanian representatives had "studied the practical steps that should be taken to fulfil this policy, their viewpoints being identical." It was stated in Damascus—but not confirmed in Amman—that the two countries had agreed in principle to a joint command of the Syrian and Jordanian forces on the frontier with Israel.—(Times - Le Monde, Paris) **(Prev. rep. Egypt-Syria Pact, 14518 E.)**

A. SWITZERLAND. — General Elections.

General elections to the Swiss National Council (the Lower House of the Swiss Parliament) took place on Oct. 30, the results being as follows:

	1955 Seats	1951 Seats
Social Democrats	53	49
Radical Democrats	50	51
Catholic Conservatives	47	48
Farmers', Traders', and Citizens' Party	22	23
Liberal Conservatives	5	5
Independents' Party	10	10
Democrats	4	4
Communists	5	4
Evangelical People's Party (Zurich)	1	1

The Social Democrats gained four seats (one each in Zurich, Baselland, Berne, and Vaud) and thus became the strongest party The Radical Democrats, who dropped to second place, lost two seats (one in Zurich to the Catholic Conservatives and one in Vaud to the Social Democrats), but gained one in Schwyz from the Catholic Conservatives, who, in turn, lost three seats (Schwyz to the Radical Democrats, Aargau to the Independents' Party, and Vaud to the Communists) and gained two (in Zurich and Geneva), a net loss of one. The Farmers', Traders', and Citizens' Party likewise lost one seat (Baselland, to the Social Democrats), whilst the Independents' Party maintained its position, losing one seat in Berne to the Social Democrats but gaining one in Aargau from the Catholic Conservatives. The Communists lost two seats (one in Zurich to the Social Democrats, and the other in Geneva to the Catholic Conservatives) and gained one (in Vaud), their representation being reduced to four seats, two of which are in Vaud. Only nine seats in seven cantons changed hands, the results showing that 80 per cent of the electorate continued to support the four leading parties.

Elections to the Upper House (the Council of States) also took place on Oct. 30 in 14 cantons out of 25. In six of the cantons the returns were unopposed, whilst in three of the remaining eight (Valais, Baselland, and Lucerne) the results of the first ballot were indecisive and a second ballot took place on Nov. 6. The new composition of the Council of States was as follows, previous party strengths being shown for comparison:

	New	Old
Catholic Conservatives	17	18
Radical Democrats	12	12
Social Democrats	5	4
Farmers', Traders', and Citizens' Party	3	3
Liberal Democrats	3	3
Democrats	2	2
Non-party	2	2

The Radical Democrats won a seat from the Catholic Conservatives in Lucerne (a canton hitherto represented exclusively by Catholic Conservatives), whilst the Social Democrats gained a seat from the Radical Democrats in Baselland

The combined strength of the two Houses forming the Federal Assembly (which elects the Federal President and the members of the Federal Council—i.e. the Cabinet), will thus be as follows, former party strengths being shown in parentheses. Radical Democrats, 62 (63); Catholic Conservatives, 64 (66); Social Democrats, 58 (53); Farmers', Traders', and Citizens' Party, 25 (26); Independents' Party, 10 (10); Liberal Democrats, 8 (8); Democrats, 7 (7); non-party, 6 (7).
(Neue Zürcher Zeitung) **(Prev. rep. 11806 A.)**

B. CEYLON - CHINA. — Revised Prices for Rubber and Rice under Five-Year Trade Agreement.

Revised prices for rubber and rice under the trade agreement between Ceylon and Communist China were announced in Colombo on Oct. 18 by Mr. Corea, the Ceylonese Minister of Commerce and Trade, on his return from negotiations in Peking.

Mr. Corea said that China had agreed to pay higher prices for rubber from Ceylon in the second half of 1955 and in 1956, and that these would be on a sliding scale, with a minimum of 27d. a lb and a premium on the average Singapore monthly price when this average rose above 22d. For the second half of 1955 the premiums would be as follows 5d. if the price was between 22d and 34d. a lb.; 4d. if it was between 35d. and 39d.; and 3d. if it rose above 40d In 1956, the 5d. premium would only apply in the price range 22d. - 27d.; the 4d. premium would be paid if prices were between 28d. and 39d., and the other premiums and the guaranteed minimum would be unchanged.

With regard to Chinese rice deliveries, Mr. Corea said that "an entirely new formula for price fixing" had been adopted, because "at a time when rice prices in world markets are falling it is neither easy nor wise to fix a price with a supplier who is not a main exporter of rice." "We have therefore agreed with China," he said, "on a formula for fixing rice prices for 1956 which will preserve for us complete flexibility of obtaining our rice requirements for 1956 at world prices."
(Ceylon Government Information Department, Colombo)
(Prev. rep. 13900 B.)

C. CANADA. — Formation of Transoceanic Development Corporation by U.S., Canadian, and European Interests.

The formation of a new international finance company, to be known as Transoceanic Development Corporation Ltd., was announced on Oct. 4. The new corporation, which will be backed solely by private capital from the United States, Britain, and a number of other countries, was formed by Kuhn, Loeb & Co. (New York), the First Boston Corporation (New York) and S. G. Warburg & Co (London), with the support of a large number of banks and issuing and investment houses in the United States, Canada, Britain, France, Western Germany, Belgium, the Netherlands, and Switzerland, including the following.

U.S.A.—American Metal Company, Ltd, Bear, Stearns & Co.; André Istel & Co, Model, Roland & Stone, Pennroad Corporation; White, Weld & Co

U.K.—Helbert, Wagg & Co, Ltd., London, N. M. Rothschild & Sons, London

Netherlands.—Amsterdamsche Bank, Amsterdam; Heldring & Pierson, Amsterdam; Nederlandsche Handel-Maatschappij, Amsterdam.

France—Banque de Paris et des Pays Bas, Paris; De Rothschild interests, Paris.

Belgium.—Banque Lambert, Brussels

Switzerland.—Credit Suisse, Zürich

Western Germany.—Deutsche Bank Group, Frankfurt, Dusseldorf and Hamburg, Deutsche Union Bank, Frankfurt, Sal Oppenheim Jr. & Cie, Cologne.

Canada.—Royal Bank of Canada.

The corporation was registered in Canada (where it could secure double tax advantages) with an authorized capital of 10,000,000 Canadian dollars. U.S. and Canadian shareholders provided about three-fifths of the capital and the European participants the remainder. The corporation's charter envisaged both investment in existing companies and the promotion, financing, and development of new enterprises.

Sir William Wiseman, a partner in Kuhn, Loeb & Co., was named as chairman of the corporation; Mr. George D. Woods, chairman of the First Boston Corporation, as vice-chairman; and Mr. Siegmund G. Warburg, chief officer of S. G. Warburg & Co., as chairman of the portfolio committee.—(Financial Times - Economist - New York Times - Montreal Star) **(13168 E.)**

D. CENTRAL AFRICAN FEDERATION. — Loan for Rhodesia Railways.

Sir Roy Welensky, the acting Federal Prime Minister, announced on Oct. 16 that the newly-formed Anglo-American Rhodesian Development Corporation was to invest £5,000,000 in rolling-stock for the Rhodesia Railways—£750,000 for trucks which had been delivered in 1955, £3,500,000 for trucks in 1956, and an immediate advance of £750,000 for the purchase of tank cars and other miscellaneous types of rolling-stock needed by the railways. Sir Roy said that the rolling-stock paid for by the Corporation would be hired by the railways at agreed rates for 25 years—a period which could be extended—and that responsibility for maintaining the wagons would rest with the railways.

"I regard the agreement as one of great significance in the economic development of the Federation," Sir Roy declared. "It will contribute materially to the necessary expansion of our basic economic service. It will be recalled that in November last year Rhodesian Anglo-American Ltd. lent the Rhodesia Railways £1,000,000 for the purchase of 500 high-sided trucks. Sir Ernest Oppenheimer's companies have thus, in the last 10 months, helped us to the extent of £6,000,000. They have also indicated their willingness to help in other directions"

Sir Roy Welensky added that the Corporation had agreed to discuss a similar agreement for the railways' needs from 1957 onwards.—(Federal Information Department, Salisbury)
(Prev. rep. 14256 C; Rhodesia Railways, 12860 A.)

E. INDONESIA. — Army. - New Chief of Staff.

It was announced in Jakarta on Oct. 31 that President Soekarno, in his capacity as Supreme Commander, had sanctioned the appointment of Colonel Abdul Nasution as Chief of Staff of the Army. Colonel Nasution (36), a nominee of the Army, had been Chief of Staff from December 1949 until December 1952, when he was put on reserve because of his responsibility for the Jakarta disturbances in October of that year in connexion with the Army's demonstrations against the Indonesian Parliament. During his period of suspension he had been one of the sponsors of the IPKI Party (*Ikatan Pendukung Kemerdekaan Indonesia*—the Association of Supporters of Indonesian Independence).—(Indonesian Embassy, London)

A. SAUDI ARABIA - UNITED KINGDOM. — The Buraimi Oasis Dispute. - British and Saudi Arabian Statements on Suspension of Arbitration Tribunal's Inquiry. - Occupation of Buraimi Oasis by British-led Forces. - Saudi Arabian Protests to Britain and U.N.

The British Foreign Office issued on Oct. 4 a statement on the dispute between the United Kingdom and Saudi Arabia over the ownership of the Buraimi Oasis area, giving details of the allegations of attempted bribery by Saudi Arabia which Britain had brought in September before the international arbitration tribunal appointed to consider the dispute.

After recalling that the United Kingdom had asked the tribunal to consider its complaints of repeated violations by Saudi Arabia of the arbitration agreement of July 30, 1954, in view of the Saudi Government's failure to take action on British diplomatic representations, the statement said that "the main charges which the United Kingdom made against Saudi Arabia were that the latter had tried to overthrow the Ruler of Abu Dhabi by force in favour of a Saudi nominee, and that they had been engaged in a deliberate, systematic, and persistent policy of large-scale bribery calculated to subvert the people in the disputed areas from their allegiance to the Ruler of Abu Dhabi or the Sultan of Muscat" Evidence given by Sheikh Hazza (the brother of the Ruler of Abu Dhabi), which counsel for Saudi Arabia had not attempted to refute, had shown that in 1954 the cadet branch of the ruling family, which was not well disposed towards the present ruler, had gone to Saudi Arabia and had been given a very large sum of money and facilities for obtaining arms. On their return to Dubai, a sheikhdom bordering on Abu Dhabi, they had attempted to secure support for an armed entry into Abu Dhabi with a view to overthrowing the present Ruler.

Although evidence showed that as much as 5,000 rupees a month was being paid to certain individuals as the price of their adherence to the Saudi cause (the statement continued), the campaign of bribery was particularly directed against members of the ruling family of Abu Dhabi, notably Sheikh Zaid bin-Sultan, a brother of the present Ruler and his representative in Buraimi. On March 30, 1955, Abdullah al-Quraishi (ostensibly a clerk in the Saudi police at Buraimi, but known to be a high political officer) had promised Sheikh Zaid that if he would throw in his lot with the Saudis he would be assured of his position in Buraimi, and would receive funds from the Saudis and 50 per cent of the profits from any oil that might be discovered there, he had also said that should the arbitration go against the Saudis, they would take the area by force. On Aug 4 Quraishi had said that King Saud would give Sheikh Zaid 400,000,000 rupees (about £30,000,000) if he would prevent the Iraq Petroleum Company from operating in the disputed territories and leave the field open to Aramco (the Arabian-American Oil Company, which holds the concession for operating in Saudi Arabia). Evidence to this effect had been given before the tribunal both by Sheikh Zaid and by Captain Clayton (the commander of the Abu Dhabi and Muscat police detachment in the Buraimi zone), to whom he had reported these approaches, neither witness being shaken in cross-examination. A similar attempt at bribery had been made against two of the principal sheikhs of the Dhawahir tribe, who had been offered a monthly payment of 100,000 rupees each

Counsel for Saudi Arabia, the statement emphasized, had not denied that a substantial sum of money had been distributed, and had made no attempt to refute the evidence of Sheikh Hazza or of the two sheikhs of the Dhawahir tribe. Quraishi had admitted in evidence that there had been meetings between himself and Sheikh Zaid, but said that they had been asked for by Sheikh Zaid because he wanted advice about how to make his peace with Saudi Arabia, and had denied that he had ever made any offers of money.

When the British Government had laid their case before the tribunal at Geneva, the statement alleged, Sheikh Yusuf Yasin (the Saudi member of the tribunal) had had to be called to order by the president for sending a note to the Saudi agent during a sitting of the tribunal, whilst Quraishi had admitted under cross-examination that his first act on arriving in Geneva had been to get in touch with Sheikh Yasin. The statement said that there could be "little doubt that the evidence he [Quraishi] subsequently gave was carefully rehearsed with the Saudi arbitrator," who had made it abundantly clear that he was conducting the proceedings on behalf of the Saudi Arabian Government and "was representing that Government on the tribunal rather than acting as an impartial arbitrator." Although Sheikh Yasin had also stated that Quraishi was his official, for whose acts in Buraimi he accepted responsibility, he nevertheless claimed that he had "forgotten" to take action on three British protests against Quraishi's presence in the Buraimi zone Finally, confirmation had been secured of the British Government's suspicion that attempts had been made to tamper with the impartiality of the tribunal behind the president's back, and in these circumstances Sir Reader Bullard (the British representative on the tribunal) had had no choice but to declare that he could not continue as a member of the tribunal.

The Saudi Arabian Embassy in London, in a statement issued on Oct. 7, completely denied the British allegations, and accused Sir Reader Bullard of withdrawing in order to prevent the tribunal from recording its judgment.

The statement said that since the sessions had been private and the president of the tribunal had been specially asked by the parties not to make public disclosures of information about its proceedings, it could not reply in detail to the British charges. The allegation that the British witnesses had not been shaken in cross-examination, however, would be shown to be "absolutely false" by the tape-recording of the proceedings. Sir Reader Bullard's resignation had taken place "at the very last moment, after the hearing had been concluded and the decision of the tribunal had been drafted by the three neutral members," and had alone prevented the tribunal from issuing its decision with respect to these "fantastic charges." If the British Government had been truly persuaded of the validity of its accusations, the statement observed, "it might have induced its member to remain for another half-hour, to enable the tribunal to record its judgment" Sheikh Yasin's dual capacity as Saudi arbitrator and Deputy Foreign Minister had been known to the British Government and to the tribunal for more than a year, and had been seized upon at the last minute to justify the British member's resignation and to keep the tribunal's decision from becoming a matter of public knowledge No evidence had been cited in support of the allegation that attempts had been made to tamper with the impartiality of the tribunal, which the statement described as "utterly untrue and unworthy of the Government of the United Kingdom." In conclusion, the statement observed that although Saudi Arabia had originally wished to settle the dispute by a plebiscite in the disputed area, it had accepted the British proposal for arbitration, and was still willing to proceed with it if Britain would abandon "public recrimination and the campaign of intimidation it has carried on in the areas adjacent to those in dispute"

The Buraimi Oasis was occupied on Oct. 26 by forces of the Ruler of Aba Dhabi and the Sultan of Muscat, which were commanded by British officers and supported by the Trucial Oman levies. Some fighting occurred in which two of the attacking force were killed and three wounded. The Saudi Arabian force of 15 police stationed in the Oasis, two of whom were wounded, were taken prisoner and subsequently repatriated.

Sir Anthony Eden stated in the British House of Commons on Oct. 26 that Dr. Dihalgo, one of the two remaining neutral members of the arbitration tribunal, had resigned, and that as the Saudi Arabian authorities had "systematically disregarded" the agreed conditions of arbitration, a fair and impartial arbitration had not been possible. The British Government had therefore felt obliged "in the exercise of its duty, which is to protect the legitimate interests of the Ruler of Abu Dhabi and the Sultan of Muscat, to advise them that the attempt to reach a just compromise by means of arbitration has failed," and their forces had accordingly resumed control of the Oasis and areas to the west of it. "I regret that this step should have been necessary," Sir Anthony concluded, "but as negotiations and arbitration have both failed, we have no other means of honouring our obligations and standing by our friends."

The British Foreign Secretary (Mr. Harold Macmillan) also made a statement to the House of Commons on Nov. 7 in which he said that the situation in the Buraimi Oasis was "completely quiet and normal" since the Ruler of Abu Dhabi and the Sultan of Muscat had reasserted their rights in the area. After referring to Sir Anthony Eden's statement that the actions and conduct of the Saudi Arabian Government amounted to a repudiation of the arbitration agreement, Mr. Macmillan added, in reply to a question by Mr. Grimond (Liberal):

"This conclusion was based partly on the widespread corruption and bribery which had taken place among the inhabitants of the disputed area and had clearly rendered any genuine expression of their wishes impossible, and partly upon the attitude of the Saudi Government towards the tribunal itself. Our position has been fully justified by the evidence obtained as a result of the re-entry of the forces of the Ruler of Abu Dhabi and the Sultan of Muscat into Buraimi In the first place, a large sum of money was found in the possession of the Saudi police detachment there, far in excess of anything that could have been required for the maintenance of this small post. The sum of money is being returned to the Saudi Government. Secondly, many documents came into our possession which gave ample confirmation of the charges we have made."

The Emir Feisal (Crown Prince, Premier, and Foreign Minister of Saudi Arabia), who was visiting Cairo at the time, said on Oct. 27 that Britain, "to throw dust in our eyes," had informed Saudi Arabia after the suspension of the tribunal's sittings that she would adhere to the arbitration agreement; while they were awaiting the next move in arbitration, however, Britain had "sent a military expedition to a peaceful oasis" and had thereby committed "an aggression against its inhabitants." After discussing the matter with the Egyptian Prime Minister, Colonel Nasser, the Emir flew to Jeddah on Oct. 31 for consultations with King Saud, but said that he would return to Cairo for an emergency meeting of the Arab League, which would consider the Buraimi situation. The Egyptian Press published the text of a telegram to King Saud in which Colonel Nasser "deplored" the British attitude on the Buraimi question and said that Egypt "wholeheartedly" supported the King's attitude "*vis-à-vis* these aggressors."

The Saudi Arabian Government sent Notes of protest to Britain on Oct. 29 and Nov. 9, and also drew the attention of the United Nations to the situation in the Buraimi Oasis, reserving its right to convene a meeting of the Security Council to consider the matter. The British Government's point of view was explained in a letter sent by Sir Pierson Dixon (permanent British delegate at the U.N.) to the president of the Security Council, couched in similar terms to Sir Anthony Eden's statement of Oct. 26. The Political Committee of the Arab League, meeting in Cairo on Nov. 14, decided to give "complete support" to Saudi Arabia against Britain on the Buraimi Oasis question, and recommended the resumption of arbitration in the dispute.

The Sultan of Muscat stated on Oct. 31 that the administration of the Buraimi Oasis was in the hands of his representative, "who will restore peaceful and orderly government and will advise me on steps which may be required to bring about the economic development of the area, which had been unfortunately interrupted by the Saudi invasion."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14445 A.)**

A. AUSTRALIA - INDONESIA. — Mr. Casey's Visit to Jakarta. - Meetings with Indonesian Foreign Minister. - Bursaries for Indonesian Students in Australia.

Mr. Richard Casey, the Australian Minister of External Affairs, visited Jakarta from Oct. 29 to Nov. 2 for discussions with the Indonesian Foreign Minister, Mr. Anak Agung Gde Agung.

A joint communiqué stated that the two Ministers were agreed "that their respective countries had . . . a joint responsibility in the promotion of real co-operation between Australia and Indonesia", that they were "convinced that a policy based upon mutual respect would prove to be to the benefit of each country", that, accordingly, each country should refrain from any interference in the other's internal affairs, and that, "while maintaining their respective views on the question of West Irian (Dutch New Guinea), the matter should be dealt with by means of peaceful discussions and with the firm desire to uphold peace and stability in South-East Asia."

The communiqué also announced that the Australian Government would make available an additional 120 bursaries for Indonesian students; that Cultural Attachés would be exchanged by the two countries; and that other means for improving friendly relations between them had been discussed.

It was semi-officially stated that 127 Indonesian students had completed their training in Australia, with another 63 still studying there; that 190 more were shortly due to begin their studies; and that the 120 students mentioned in the communiqué would be sent in addition, making a total of 500 Indonesian students who would have received training in Australia by the beginning of 1957, at a cost of £A.400,000. The total funds so far made available by Australia to Indonesia under the Colombo Plan amount to £A.1,500,000.

An Indonesian goodwill mission, led by Dr. Mohammed Rum (the former Foreign Minister), left for Australia towards the end of October. (Indonesian Embassy, London)

B. CHINA. — Territorial Claim to Macao.

Peking Radio broadcast on Oct. 25 an article from the Peking newspaper *People's Daily* in which it was claimed that the Portuguese Colony of Macao (on the coast of Kwangtung province) was Chinese territory, and that the Chinese people had the right to demand that Portugal should return it to them.

"The Chinese people," said the article, "have never forgotten Macao, nor have they forgotten that they have a right to demand the recovery of this territory from Portugal . . . The fact that Macao has not yet been returned to China does not mean that the Chinese people can tolerate the continued occupation of Macao. Apparently the Portuguese authorities in Macao mistake the Chinese people's peace policy for a sign of weakness. . . ."

Portuguese plans to commemorate in November the 400th anniversary of the Colony's accession to Portugal were denounced by the Chinese paper as an "outrageous attempt to show off" which the Chinese people "will never tolerate."
(New York Herald Tribune)

C. BELGIAN CONGO.—Establishment of University.

A decree establishing a University for the Belgian Congo was signed on Nov. 8 by King Baudouin of the Belgians. The University, situated at Elisabethville (Katanga province), will be open to both African and European students and will have branches in other parts of the Congo. A new University College (known as the *Centre Universitaire Lovanium* and closely connected with the University of Louvain) had been opened in February last at Kimuenza, near Leopoldville. (La Nation Belge)

D. UNITED KINGDOM. — Coal Industry. - Quarterly Statistics. - Joint Committee on Coal Production. - Union Demand for "Miners' Charter." - Successful Off-Shore Drillings. - Winter Coal Stock Position.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the third quarter of 1955:

	Saleable Mined Coal Produced Tons	Plus Open-cast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers† Tons
July ..	3,157,200	251,050	3,408,250	3,399,000	275,000
August .	3,439,380	258,920	3,698,300	3,352,800	283,600*
September	4,128,700	268,800	4,397,500	3,789,500	306,700

	Wage-earners on colliery books		No. of shifts worked per	Output per manshift at		Percentage of
	Total	at coal-face	wage-earner	coal-face Tons	overall Tons	absenteeism
July	702,975	286,675	3.79	3 267	1 174	12.64
August ..	702,040	287,660	4.18	3.146	1.160	14.63
September	700,575	287,225	4.79	3.341	1.228	12.75

† Including fishing vessels, but excluding coastwise bunkers.
* Average of five weeks

Other recent developments in the coalmining industry are summarized below.

Coal Production Inquiry. It was announced on Sept 17 that the committee appointed jointly by the National Coal Board and the National Union of Mineworkers to inquire into problems of production and manpower would consist of Sir Hubert Houldsworth and Mr J. Bowman (respectively chairman and vice-chairman of the N.C.B.), Mr W. H. Sales (the member of the Board responsible for industrial relations), and Mr. Ernest Jones, Mr Ted Jones, and Mr. Arthur Horner (respectively chairman, vice-chairman, and secretary of the N.U.M.). The committee would begin its work immediately.

N.U.M. Proposal for "Miners' Charter." The N U.M. executive sent to the N.C B on Sept. 22 the draft of a "miners' charter," based on resolutions adopted at the union's annual conference in July. The charter provided for (1) reduction of the present 7½-hour working day for underground workers to 7 hours, and of the present 42½-hour working week for surface men (excluding mealtimes) to 40 hours, including mealtimes; (2) sick pay at full wage rates up to six weeks' absence; (3) three weeks' paid holiday annually instead of two; (4) consolidation of the "bonus shift" into ordinary shifts. [It was explained in the Press that, with the aim of discouraging absenteeism, miners who worked five shifts weekly were at present paid as if for six shifts, whilst any miner missing a shift (except through illness, etc.) was paid only for the shifts actually worked. The union's proposal meant, therefore, that the "bonus shift" should be abolished and that the payment for each of the five shifts actually worked should be correspondingly increased.]

The cost of these demands, together with that of other claims and demands outstanding, was unofficially estimated at about £60,000,000 a year. It was explained, however, that the pay increases and other reforms specified would not be demanded all at once, and that the "charter" was, in effect, a "plan of campaign," it being intended that the union executive should decide "from time to time in the light of events" the order in which the demands should be presented.

Submarine Mining. The N C B. announced on Oct. 19 that, after six months' drilling, coal had been found 2,000 feet below the Firth of Forth about 1½ miles off-shore from Kirkcaldy (Fife). The operations—the first major out-to-sea drillings undertaken in the U.K.—had been carried out in order to gauge the extent of a new coalfield being developed at Seafield (near Kirkcaldy), which was estimated to possess reserves for a daily output of 5,000 tons over 60 years. Another boring would be attempted 1½ miles further out to sea, followed by borings off the Durham coast and possibly also off the coasts of Cumberland and Kent, and in the Dee estuary of North Wales.

The Minister of Fuel and Power (Mr. Geoffrey Lloyd) announced on Nov. 1 the Government's plans to deal with any coal shortage which might arise in the coming winter through severe weather and disappointing colliery output.

Mr. Lloyd stated that distributed coal stocks totalled slightly over 19,000,000 tons at the end of October, or about 1,750,000 tons more than on Oct. 31, 1954, but gave a warning that shortages might nevertheless develop if the weather became severe and coal production did not pick up quickly enough. In this event, preferential supplies would be given to vital services and industries and to the house-coal market, leaving less essential industry to carry the burden of the shortage. He stressed, however, that industry could "make it less likely that the plans need ever be put in operation by making the coal go further," and declared that, with little or no capital expenditure, many firms could cut their consumption by at least 10 per cent, thus saving about 2,000,000 tons of coal during the winter, equivalent to coal imports worth £14,000,000.

Mr. Lloyd added that coal imports during 1955 were expected to amount to 12,000,000 tons and exports to only 11,000,000 tons, this being the first time that Britain had had to import more coal than she exported.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. Coal Industry, 14428 A; Undersea Coal Borings, 13528 A.)**

A. UNITED NATIONS. — Unesco Loyalty Cases. - Reinstatement of dismissed U.S. Employees.

The administrative tribunal of the International Labour Office, acting as the recognized appeals tribunal, ordered the U.N. Educational, Social, and Cultural Organization in Paris on April 26 to reinstate three officials of U.S. nationality whose fixed term contracts had not been renewed upon their expiry at the end of 1954. The three officials concerned were Mr. David N. Leff, Mr. Peter Duberg, and Mrs. Annette Wilcox, and the decision not to renew their contracts had been taken because they had failed to appear before the U.S. loyalty board at the U.S. Embassy in Paris, and had thus "lost the confidence" of the Director-General of UNESCO (Dr. Luther Evans). The tribunal (which has no statutory powers to enforce reinstatement) also ordered UNESCO to pay the following damages if the reinstatement order were not complied with: Mr. Leff—$12,800, plus children's allowances for two years, the whole with interest at 4 per cent a year as from Jan. 1, 1955; Mr. Duberg—$15,500, also with children's allowances for two years and interest at 4 per cent from Jan. 1, 1955; Mrs. Willcox—$15,500, with interest at 4 per cent from Jan. 1, 1955. Each of the three officials was also awarded $300 towards costs.

Although the UNESCO staff regulations specify that a fixed term contract expires on the date specified therein, without any need for the Director-General to give notice or to state the reasons for non-renewal, the three appellants claimed to have an "acquired right" to the extension of their contracts This claim was based on the assumption—as in some previous cases concerning the U.N. Organization—that if the post occupied by the appellant was maintained and the appellant's professional performance judged satisfactory by his immediate superiors, there was no justice if his contract were not renewed upon expiry. The Director-General of UNESCO maintained, however, that by refusing to co-operate in measures of investigation and to appear before the loyalty board, the three employees had adopted an attitude "incompatible with the high standards of integrity required of those who are employed by the Organization," and one which was "capable of harming the interests of the Organization."

The tribunal, in its judgment, said that "loyalty towards a State" was entirely different from the idea of "integrity" embodied in the staff regulations and rules of UNESCO. The staff regulations clearly established "the entire freedom of conscience" of international officials in respect of "both their philosophical convictions and their political opinions," but at the same time imposed on them "the duty to abstain from all acts capable of being interpreted as associating them with propaganda or militant proselytism in any sense whatever." There was no evidence that the appellants had engaged in, or were engaging in, activities that could be shown to constitute misconduct under the staff regulations and rules It was irrelevant to inquire whether or not they had engaged in "militant political activities" before being appointed to the international service and at a time when they were not bound by the obligations involved in joining that service, unless it had been proved that they had been guilty of "dishonourable or criminal acts." The tribunal held, therefore, that the complaint adduced by the Director-General of UNESCO for the non-renewal of the appointments was "entirely unjustified"

In a similar decision on Oct. 29, the administrative tribunal ruled that Dr. Evans's suspension on Dec. 10, 1954, and subsequent dismissal, of three other U.S. employees of UNESCO with long-term contracts—Miss Ruth Froma, Mrs. Kathryn Pankey, and Miss Helene van Gelder—for failure to appear before a U.S. loyalty board was unwarranted. All three persons, together with a fourth (Mrs. Kathryn Bernstein, whose case was heard separately), were awarded damages in lieu of reinstatement to their posts, as follows: Miss Froma—$10,000; Mrs. Pankey—1,638,000 French francs; Miss van Gelder—2,260,000 French francs; Mrs. Kathryn Bernstein—2,600,000 French francs.

The tribunal said in its judgment that under the UNESCO Constitution the responsibilities of the staff, including the Director-General, were exclusively international, and that each member-State undertook to respect such responsibilities. If, however, any one of the 74 members of UNESCO chose to bring an accusation of disloyalty against one of its nationals, then the Director-General, having once established a precedent, would be required to withdraw his confidence from such an official. If this happened in matters of conscience, a state of uncertainty and insecurity would arise, prejudicial to the performance of the duties of the Organization and "liable to provoke disturbances in the international administration such as cannot have been imagined to have been the intention" of those who drew up the Constitution of UNESCO. Referring to the Director-General's failure to produce to the tribunal the report made on the three cases by a special advisory board, the judgment said that if the board's opinion was to be restricted to the Director-General alone, then the additional guarantee given to the staff of UNESCO against arbitrary decisions was unavailing.

In the separate case of Mrs. Bernstein the tribunal found that the action taken against her was "a wrongful exercise of power and an abuse of rights."

The United States, supported by the United Kingdom, Canada, Cuba, Pakistan, Iraq, China (Nationalist), and Argentina, presented a resolution to the U.N. General Assembly's Administrative and Budgetary Committee on Oct. 17 proposing that new machinery be set up to review decisions handed down by the U.N. administrative tribunal. It was proposed (*a*) that member-States should have the right to demand a review of any of the tribunal's judgments if they felt that the tribunal had erred or exceeded its powers, and (*b*) that a committee, composed of delegates from 15 States, should act as a "screening" committee on requests for review, and should refer approved cases to the International Court of Justice. The resolution was approved by the committee on Oct. 25 by 27 votes to 18, and by the General Assembly on Nov. 8 by 33 votes to 17, with nine abstentions.—(New York Times - New York Herald Tribune) **(Prev. rep. Unesco Employees, 14084 A.)**

B. UNITED KINGDOM. — Committee of Inquiry into Procedure of Administrative Tribunals.

Sir Anthony Eden announced in the House of Commons on Nov. 1 the appointment of a committee, under the chairmanship of Sir Oliver Franks (formerly Ambassador in Washington), to review the constitution and working of administrative tribunals. Its terms of reference were as follows:

"To consider and make recommendations on (*a*) the constitution and working of tribunals, other than the ordinary courts of law, constituted under any Act of Parliament by a Minister of the Crown or for the purposes of a Minister's functions, (*b*) the working of such administrative procedures as include the holding of an inquiry or hearing by or on behalf of a Minister, on an appeal or as a result of objections or representations, and in particular the procedure for the compulsory purchase of land."

The members of the committee, apart from Sir Oliver Franks, were:

Lord Balfour of Burleigh, formerly chairman of Lloyds Bank; Mr. Roderic Bowen, Q.C., M.P (Liberal, Cardiganshire), Mr J C. Burmer (a former Lord Mayor of Birmingham), representing local authority interests, Dame Florence Hancock, chief woman officer, Transport and General Workers' Union, and a former president of the T.U C.; Mr. Douglas Johnston, Q C, M P. (Labour, Paisley), formerly Solicitor-General for Scotland in the Labour Government; Sir Geoffrey King, formerly Permanent Secretary, Ministry of Pensions and National Insurance, Lord Linlithgow, director, Eagle Star Insurance Co., and a landowner; Major John Morrison, M P (Conservative, Salisbury); Miss K. M Oswald, secretary, National Citizens' Advice Bureaux Committee, National Council of Social Service; Lord Justice Parker, a Lord Justice of Appeal; Mr. H. Wentworth Pritchard, member of the council of the Law Society, Mr. Charles Russell, Q.C.; Lord Silkin, formerly Minister of Town and Country Planning in the Labour Government; Mr. Alan Symons, chairman, Tootal, Broadhurst, Lee and Co, representing industry; Professor Kenneth C. Wheare, Gladstone Professor of Government and Public Administration, University of Oxford.

The appointment of the committee implemented a policy pledge in the Conservative election manifesto, repeated in the Queen's Speech in June and reaffirmed by a resolution passed at the Conservative conference in October. The demand for an inquiry of this kind arose mainly out of the Crichel Down case. (Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Crichel Down, 13705 A; Conservative Election Manifesto, 14199 A; Queen's Speech, 14255 A; Conservative Conference, 14493 A.)**

C. SWEDEN. — Cabinet Changes.

Following the resignation of Mr. Skold, the Finance Minister, the Swedish Government headed by Mr. Erlander was reorganized on Sept. 25 as follows: (*a*) Mr. Gunnar Strang, the Minister for Social Affairs, became Minister of Finance, being succeeded in his former portfolio by Mr. John Ericsson, hitherto Minister of Commerce; (*b*) Mr. Gunnar Lange, hitherto Civil Minister (a post corresponding to that of Permanent Secretary of the Treasury in the British Government, and carrying with it the functions of head of the Civil Service), became the new Minister of Commerce in place of Mr. Ericsson.
(Svenska Dagbladet, Stockholm) **(Prev. rep. 11780 B.)**

D. RELIGIOUS LIFE. — Church of England. - New Bishops of Bradford and Worcester.

It was announced from 10, Downing Street, on Oct. 25 that the Queen had approved the appointment of the Rev. Lewis Mervyn Charles-Edwards, Vicar of St. Martin-in-the-Fields, London, as Bishop of Worcester in succession to the late Dr. W. W. Cash, who died in July, and of Dr. Frederick Donald Coggan, Principal of the London College of Divinity, as Bishop of Bradford in place of Dr. Alfred Blunt (76), who was resigning through age and ill-health.—(Church Times) **(14032 E.)**

NOVEMBER 19—26, 1955

A. WESTERN POWERS - SOVIET UNION.—Geneva Conference of Foreign Ministers. - Failure to reach agreement on Implementation of "Summit" Directives.

In conformity with the directives issued by President Eisenhower, Sir Anthony Eden, Marshal Bulganin, and M. Faure at the end of the Geneva "summit" conference (see 14325 A), the conference of the Foreign Ministers of France, the Soviet Union, the United Kingdom, and the United States (respectively M. Pinay, M. Molotov, Mr. Macmillan, and Mr. Dulles) opened at Geneva on Oct. 27 to discuss the three-point agenda agreed upon by the Heads of Government: (1) European security and German reunification, (2) disarmament, and (3) contacts between East and West. After three weeks of discussions, in which it proved impossible to reconcile the Western and Soviet viewpoints, the conference ended on Nov. 16 without reaching agreement on any of the subjects on the agenda.

Prior to the opening of the Geneva Conference, Mr. Dulles, Mr Macmillan, and M Pinay met on Sept 27-28 in New York, where the 10th session of the U.N General Assembly was then in progress. A joint communiqué stated (1) that the three Foreign Ministers had reviewed the preparations for the Geneva Conference and were in "complete accord", (2) that they were agreed that priority should be given to the reunification of Germany, within the framework of a plan for European security, and (3) that they would meet the members of the North Atlantic Council in Paris before going to Geneva The communiqué added that Dr von Brentano (the West German Foreign Minister) had taken part in the discussions in so far as they concerned Germany.

The Western Foreign Ministers also issued the following statement in connexion with matters arising out of the agreements concluded between the Soviet Union and Eastern Germany on Sept 20 (see 14451 A)

"They wish, in the first place, to emphasize that these agreements cannot affect the obligations or responsibilities of the Soviet Union, under agreements and arrangements between the three Powers and the Soviet Union, on the subject of Germany and Berlin. The Soviet Union remains responsible for carrying out these obligations.

"The three Foreign Ministers reaffirm that the Federal Republic of Germany is the only German Government freely and legitimately constituted and therefore entitled to speak as the representative of the German people in international affairs Their three Governments do not recognize the East German regime nor the existence of a State in the Soviet Zone.

"Finally, as regards . . . the frontiers of Germany, the three Foreign Ministers reaffirm the repeatedly expressed position of their Governments that the final determination of frontiers must await a peace settlement for the whole of Germany."

Mr Dulles, Mr. Macmillan and M Pinay had a further meeting in Paris on Oct 21, at which Dr von Brentano was also present. On the following day, before going to Geneva, they attended two meetings of the North Atlantic Council, which heard and approved statements of policy by the three Foreign Ministers. Mr Dulles presented the views of the three Western Powers on the question of European security and the reunification of Germany; Mr. Macmillan put forward the Western Powers' views on disarmament; whilst M Pinay discussed the Western Powers' attitude to the question of promoting contacts between the Western countries and the Soviet Union.

M Molotov broke his journey to Geneva for discussions on Oct. 25 with Herr Grotewohl and other members of the East German Government.

At the first meeting of the Foreign Ministers on Oct. 27, it was agreed that the chairmanship should rotate between them from day to day for the duration of the conference. The introductory speeches of the three Western Ministers and of M. Molotov were, in effect, restatements of the positions of the four Powers with regard to the questions on the agenda, and were broadly similar to those made by the Heads of Governments at the "summit" conference. The subsequent proceedings of the conference are described below in the order of the three-point agenda.

I.—European Security and German Reunification.

Two sets of proposals—one Western and one Soviet—were introduced on Oct. 28. The Western proposals were in the form of a draft treaty on Germany, and envisaged (*a*) a European security pact, and (*b*) a concurrent agreement to unite Germany through free elections, as provided in the "Eden plan" presented at the Berlin conference of 1954. The Soviet proposals—which made no mention of all-German elections or the eventual reunification of Germany—provided for (*a*) a collective European security treaty, with the United States as a member and the People's Republic of China as an observer, and (*b*) the dissolution of the NATO, the Western European Union, and the Warsaw Treaty Organization after an interim period following the coming into force of the European security treaty.

Western Proposals for Draft Treaty on Germany.

The Western proposals were in the form of a draft "Treaty of Assurance on the Reunification of Germany," the provisions of which were as follows:

Preamble. "At the Geneva conference [in July] the Heads of Government recognized, in their directive to the Foreign Ministers, the common responsibility of the four Powers for the reunification of Germany by free elections in conformity with the national interests of the German people and the interests of European security

France, the United Kingdom, and the United States have striven unceasingly for the reunification of Germany in freedom in order to promote real stability in Europe They put forward, in the 'Eden plan,' proposals which offer the German nation the means to recover its unity in accordance with the rights of peoples and the liberty of the individual They renew these proposals.

Free elections leading to the formation of a single Government for the whole of Germany are the right way of ensuring the full participation of the German people in the solution of the German problem, which the Soviet Government says it also desires If agreement in principle is reached during the present conference, it should be possible to settle without delay questions concerning the electoral law and the supervision of the elections, which could take place as early as 1956

Without German unity, any system of European security would be an illusion The division of Germany can only perpetuate friction and insecurity as well as grave injustice France, the U.K., and the U.S.A. are not prepared to enter into a system of European security which . . . does not end the division of Germany.

At the [summit] conference, the Soviet Government expressed concern about the policy and associations of a reunified German Government. The Soviet Union appears to fear that a unified Germany, established by free elections and free to choose its associates in collective defence, would constitute a threat to the security of the Soviet Union and Eastern Europe The fact is that the NATO and the Western European Union are strictly defensive organizations. Far from constituting a threat to peace, they contribute to the security not only of their members but of all States. This is evident from the limitations and restrictions which the members of the W.E.U. have assumed, and from the restraint on individual action which the NATO system imposes on its members. If a reunified Germany elects to associate itself with these organizations, the inherent obligations of restraint and control would enhance rather than detract from Soviet security.

Nevertheless, to remove any possible grounds for Soviet refusal to reunify Germany promptly, France, the U.K., and the U.S.A. are prepared to take further steps to meet the concern expressed by the Soviet Government. They accordingly propose the conclusion of a treaty in the terms set forth below, concurrently with the conclusion of an agreement to reunify Germany under the 'Eden plan' This treaty would comprise undertakings to refrain from the use of force and to withhold aid from an aggressor, provisions for the limitation and control of forces and armaments, and the obligation to react against aggression

The treaty would enter into force only in conjunction with the reunification of Germany. It would be carried out by stages. Its signature would be concurrent with the signature of the agreement on the 'Eden plan.' The final stage would become effective when a reunified Germany decides to enter NATO and the W.E.U

France, the U.K., and the U.S.A. are convinced that these proposals could lead to an agreement satisfactory to both sides. If the Soviet Union's concern over immediate German reunification is primarily security, these proposals should constitute an acceptable basis for negotiation since they provide a system of controls in which the Soviet Union would directly participate, and reciprocal assurance from which the Soviet Union would directly benefit Such a settlement, by creating confidence in an area vital for world security, would facilitate the solution of even wider problems.

The treaty, which would be concluded concurrently with an agreement on the reunification of Germany under the Eden plan, would cover the following subjects:

1. Renunciation of the Use of Force. Each party would undertake to settle by peaceful means any international dispute in which it might be involved, and to refrain from the use of force in any manner inconsistent with the purposes of the United Nations

2. Withholding Support from Aggressors. Each party would agree to withhold assistance, military or economic, to any aggressor, and any party could bring the aggression to the attention of the U.N. and seek such measures as are necessary to maintain or restore international peace and security

3. Limitation of Forces and Armaments. In a zone comprising areas of comparable size, depth, and importance on both sides of the line of demarcation between a reunified Germany and the Eastern European countries, levels for armed forces would be specified so as to establish a military balance which would contribute to European security and help to relieve the burden of armaments There would be appropriate provisions for the maintenance of this balance In parts of the zone which lie closest to the line of demarcation, there might be special measures relating to the disposition of military forces and installations

4. Inspection and Control. The parties would provide information on an agreed progressive basis on their armed forces in the zone. There would be agreement on procedures of mutual inspection to verify such data and to warn against any preparation for surprise attack.

5. Special Warning System. In order to provide added depth to the surveillance system on both sides, and thus give further protection against surprise attack, provisions could be made to establish:

(*a*) In the Western part of the zone mentioned in Paragraph 3, a radar warning system operated by the Soviet Union and the other Eastern members of the treaty.

(*b*) A like system in the Eastern part of that zone, operated by the NATO members of the treaty

6. Consultation. There would be provision for consultation among the parties to implement the treaty.

7. Individual and Collective Self-defence. It would be provided that nothing in the treaty would impair or conflict with the right of individual and collective self-defence recognized by the U N Charter and treaties under it No party would continue to station forces in the territory of any other party without the latter's consent, and upon request of the party concerned any party would withdraw its forces within a stated period, unless these forces are present in the territory concerned under collective defence arrangements.

8. Obligation to react against Aggression. Each party would agree that armed attack in Europe by any party, which is also a NATO member, against any party which is not a NATO member, or *vice versa*, would endanger the peace and security which is the object of this treaty, and that all the parties would then take appropriate action to meet that common danger.

9. Entry into Force by Stages. The provisions would come into effect progressively at stages to be agreed."

Attached to the Draft Treaty was a statement of the " Eden Plan " for the reunification of Germany, as set forth below ·

The Eden Plan.

" German reunification and the conclusion of a freely negotiated peace treaty with a united Germany should be achieved in the following stages :

I. Free elections throughout Germany.
II. The convocation of a National Assembly resulting from these elections.
III. The drafting of a Constitution and the preparation of peace treaty negotiations.
IV. The adoption of the Constitution and the formation of an all-German Government responsible for the negotiation and conclusion of the peace treaty.
V The signature and entry into force of the peace treaty.

I. Free Elections throughout Germany. Free and secret elections should be held throughout Germany, including Berlin, at the earliest possible date. These elections must be held in conditions of genuine freedom. Safeguards must be agreed to assure this freedom before, after, and during the elections. The elections must also be supervised in such a manner as to make sure that these safeguards are observed and that the elections are properly conducted.

Preparation for the Elections.

(A) The Electoral Law.

The electoral law should be prepared by France, the U.S.S.R., the U.K., and the U.S A. in consultation with German experts, taking into consideration the electoral laws already drafted for this purpose by the *Bundestag* of the Federal Republic and the Soviet zone *Volkskammer*. When approved by the four Powers, it would be published throughout Germany. Elections should take place as soon as possible thereafter.

(B) Guarantees for Free Elections

The draft electoral law must contain provisions which will guarantee the genuine freedom of the elections These include, amongst others ·

Freedom of movement throughout Germany.
Freedom of presentation of candidates.
Immunity of candidates.
Freedom from arbitrary arrest or victimization.
Freedom of association and political meetings.
Freedom of expression for all.
Freedom of the press, radio and television, and free circulation of newspapers, periodicals, etc.
Secrecy of the vote.
Security of polling stations and ballot boxes.

(C) Supervision of the Elections.

Supervision should be carried out by a Supervisory Commission throughout the whole of Germany. There should be a central body with subordinate bodies at *Land* and local levels All votes should be counted and verified at local headquarters in the presence of the Supervisory Commission.

(i) Composition of Supervisory Commission—The Commission should be composed of representatives of the four Powers, with or without the participation of neutrals, assisted by Germans in a consultative capacity.

(ii) Organization of the Commission—The Commission should work on a committee basis. Its decisions should be taken by majority vote.

(iii) Functions and powers of the Commission—The principal task of the Commission will be to ensure that the elections take place in genuine freedom and in strict conformity with the provisions of the electoral law.

Method for completing the above preparations.

The Foreign Ministers must in the first place agree on the principles contained in this plan. They will then give instructions accordingly to a working group, consisting of the principal representatives in Germany of the four Powers, or members of their staffs, which will work out the necessary details and submit a report. This report should include, in particular ·

(i) The draft of the all-German electoral law.

(ii) Detailed recommendations regarding the supervision of the elections.

The working group should begin work not later than two weeks after the Foreign Ministers have agreed on the principles contained in this plan It should submit its report to the four Governments not later than one month after beginning its work.

II. The National Assembly. The all-German elections will establish an all-German National Assembly.

During the period between the end of the elections and the full assumption of control by the all-German Government, it will be desirable for part of the supervisory machinery to remain in operation, in order to prevent action after the elections which would impair the conditions of genuine freedom under which they will have been held, as provided above Recommendations on this subject should be included in the report of the working group

III. Drafting of a Constitution and Preparation of Peace Treaty Negotiations. The National Assembly will begin drafting a Constitution as soon as possible after its first meeting. Meanwhile, it may form a provisional all-German authority charged with assisting the Assembly in drafting the Constitution and with preparing the nucleus of the future all-German executive organs The authority may also open with the four Powers preliminary negotiations for the peace treaty.

IV. Adoption of the Constitution and Formation of an All-German Government. The draft of the Constitution will be submitted to the Assembly as soon as possible Immediately after it has been adopted, an all-German Government will be formed This Government will then be responsible for the negotiation and conclusion of the peace treaty. At the same time such other institutions as may be provided for in the Constitution shall be established.

As soon as the all-German Government has been formed, the National Assembly will determine how the powers of the [West German] Federal Government and the German authorities in the Soviet zone shall be transferred to the all-German Government, and how the two former shall be brought to an end.

The all-German Government shall have authority to assume or reject the international rights and obligations of the Federal Republic and the Soviet zone of Germany, and to conclude such other international agreements as it may wish. The four Powers will support any application of the all-German Government to accede to the U.N Organization

Each of the four Powers will exercise, with respect to the National Assembly, the provisional all-German authority, and the all-German Government, only those of its rights which relate to the stationing of armed forces in Germany and the protection of their security, Berlin; the reunification of Germany, and a peace treaty. [A footnote to the document said . The provisions of this plan are subject to any provisions of a security agreement concluded in connexion with the reunification of Germany]

Decisions of the National Assembly, the provisional all-German authority, and the all-German Government in carrying out this plan will not require the approval of the four Powers. Such decisions may not be disapproved except by a majority vote of the four Powers.

V. Signature and Entry into Force of the Peace Treaty. The signatories to the treaty should include all States, or the successors thereof, which were at war with Germany. The treaty should enter into force when ratified by the four Powers and by Germany."

Soviet Proposals for European Collective Security Treaty.

The following draft of a proposed European collective security treaty was presented by M Molotov ·

Preamble. " For the purpose of ensuring peace and security and of preventing aggression against any State in Europe ;

For the purpose of strengthening international co-operation in conformity with the principles of respect for the independence and sovereignty of States and non-interference in their internal affairs ,

Striving to achieve concerted efforts by all European States in ensuring collective security in Europe instead of the formation of groupings of some European States directed against other European States, which gives rise to friction and strained relations among nations and aggravates mutual distrust ;

Bearing in mind that the establishment of a system of collective security in Europe would facilitate the earliest possible settlement of the German problem through the unification of Germany on a peaceful and democratic basis ;

European States, guided by the purposes and principles of the U.N. Charter, conclude a general European treaty on collective security in Europe, the basic provisions of which are as follows .

Treaty Provisions. (1) All European States, irrespective of their social systems, and also the United States, may become parties to the treaty provided they recognize the purposes and assume the obligations set forth in the treaty.

Pending the formation of a united, peace-loving, democratic German State, the German Democratic Republic [Eastern Germany] and the German Federal Republic [Western Germany] may be parties to the treaty, enjoying equal rights with other parties thereto. It is understood that after the unification of Germany the united German State may be a party to the treaty.

The conclusion of the treaty on collective security in Europe shall not affect the competence of the four Powers to deal with the German problem, which shall be settled in accordance with decisions previously taken by them.

(2) The parties to the treaty undertake to refrain from aggression against one another and also to refrain from having recourse to the threat or use of force in their international relations, and, in accordance with the U.N. Charter, to settle any dispute that may arise among them by peaceful means and in such a way as not to endanger international peace and security in Europe.

(3) Whenever, in the view of any party to the treaty, there is danger of an armed attack in Europe against one or more of the parties to the treaty, they shall consult one another in order to take effective steps to remove the danger and to maintain security in Europe

(4) An armed attack in Europe against one or several parties to the treaty by any State or group of States shall be deemed an attack against all the parties In the event of such an attack, each of the parties, exercising the right of individual or collective self-defence, shall assist the State or States so attacked by all the means at its disposal, including the use of armed force, for the purpose of re-establishing and maintaining international peace and security in Europe

(5) The parties to the treaty undertake jointly to discuss and determine as soon as possible the procedure under which assistance, including military assistance, shall be provided by them in the event of a situation in Europe requiring a collective effort for the re-establishment and maintenance of peace in Europe.

(6) The parties to the treaty, in conformity with the provisions of the U N Charter, shall immediately inform the Security Council of any action taken or envisaged for the purpose of exercising the right of self-defence or of maintaining peace and security in Europe

(7) The parties to the treaty undertake not to participate in any coalition or alliance and not to conclude agreements the objectives of which are contrary to the purposes of the treaty on collective security in Europe.

(8) The parties to the treaty undertake to promote economic and cultural co-operation among themselves, as well as with other States, through the development of trade and other economic relations and the expansion of cultural ties on a basis excluding any discrimination or restrictions which hamper such co-operation

(9) To implement the provisions of the treaty concerning consultation among its parties, and to consider questions arising in connexion with the task of ensuring security in Europe, the following shall be provided for ·

(*a*) Regular, or, when required, special conferences at which each State shall be represented by a member of its Government or by some other specially designated representative.

(*b*) The setting-up of a Permanent Consultative Political Committee, the duty of which shall be the preparation of appropriate recommendations to the Governments of the States which are parties to the treaty.

(*c*) The setting-up of a Military Consultative Organ, the terms of reference of which shall be specified in due course.

(10) Recognizing the special responsibility of the permanent members of the U.N Security Council for the maintenance of international peace and security, the parties to the treaty shall invite the Chinese People's Republic to designate representatives to the organs set up in accordance with the treaty, in the capacity of observers.

(11) The treaty shall not impair in any way the obligations of European States under international treaties and agreements to which they are party, provided the principles and purposes of such agreements are in conformity with those of the present treaty.

(12) The parties to the treaty agree that during the first period (two or three years) of the implementation of measures for the establishment of the system of collective security in Europe under the present treaty, they shall not be relieved of the obligations assumed by them under existing treaties and agreements At the same time, the parties to existing treaties and agreements which provide for military commitments shall refrain from the use of armed force and shall settle by peaceful means all the disputes that may arise between them. Consultations shall also take place between the parties to the corresponding treaties and agreements, in case any differences or disputes arise among them which might constitute a threat to the maintenance of peace in Europe.

(13) Pending the conclusion of agreements on the reduction of armaments and the prohibition of atomic weapons, and on the withdrawal of foreign troops from the territories of European countries, the parties to the treaty undertake not to take any further steps to increase their armed forces on the territories of other European States under treaties and agreements concluded by them previously.

(14) The parties to the treaty agree that on the expiration of an agreed time-limit from the entry into force of the present treaty, the Warsaw Treaty of May 14, 1955, the Paris Agreements of Oct. 23, 1954, and the North Atlantic Treaty of April 4, 1949, shall become ineffective.

(15) The duration of the treaty shall be 50 years "

In the ensuing discussion on Oct. 28 the Soviet proposals were criticized by the Western Foreign Ministers, notably on the ground that they made no provision for free all-German elections and the subsequent reunification of Germany, whilst the Western draft treaty was criticized by M. Molotov.

Mr. Macmillan emphasized that the continued division of Germany created " a state of tension in Europe which is dangerous to us all," and declared that it was essential as a first step to reach agreement on unification. " At the same time," he continued, " we in the West have given very careful thought to whether we can devise a system of security which would meet the Soviet Government's fears. These proposals are set out in the Western Governments' paper [i.e. the draft treaty on Germany].

" May I say first of all that the Western Powers cannot possibly admit that in order to give security to the Soviet Union they must abandon their own. . . . Nor do the Soviet proposals really provide for the reunification of Germany. There are no concrete proposals for reunification. On the contrary, the Soviet plan provides for the continued division of Germany. Thus the main cause of insecurity is not removed. It is prolonged. The Western Powers have a more satisfactory solution in mind. They propose the conclusion of a treaty of assurance, concurrently with an agreement to reunify Germany under the Eden plan This treaty would comprise undertakings to refrain from the use of force and to withhold aid from an aggressor, provisions for the limitation and control of forces and armaments, and obligations to react against aggression.

" In order that the benefits of this treaty should be felt as soon as possible, its entry into force would be linked to the reunification of Germany, and the two processes would go forward together by stages. . . . Naturally, if such an agreement is to be effective, France, the U K , the U.S.A., the Soviet Union, and a reunified Germany must be parties. But we shall be ready to consult with Mr. Molotov and our own allies on how the membership might be widened to the general advantage.

" In order to establish a military balance and thus contribute to a sense of security, we should work out arrangements for the limitation of forces and armaments in a zone, the precise limits of which are to be determined, lying on either side of the line of demarcation between a reunified Germany and the Eastern European countries. We believe this interchange of facilities marks a real step forward in establishing confidence. If the Soviet Union is truly concerned with security, these proposals should offer a good basis for negotiation."

M. Molotov declared that a settlement of the German problem could only be achieved by " the establishment of an effective system of security in Europe and a gradual *rapprochement* between the two existing German States—the Democratic Republic and the Federal Republic " The creation of such a collective security system, in which the two German States should participate, would " facilitate the creation of the pre-requisite for the development of a peaceful Germany, and would at the same time create confidence among the European nations that the destiny of Germany would not again pass into the hands of the forces which once drove her along the path of aggression and military adventure."

After stating that the Soviet Government would submit proposals on the German question at a later stage of the conference, M Molotov continued " The Soviet delegation welcomes the fact that the Governments of Britain, the U.S A., and France have admitted the necessity of raising not only the German question but also the question of European security Some provisions in the [Western] document call for further discussion, and we shall study them thoroughly. Nevertheless, even now certain points with regard to this document suggest themselves. First of all, it is necessary to point out that the very formulation of the proposals is not in conformity with the directives of the Heads of Government of the four Powers, where the first emphasis is placed on European security. The new proposals [by the Western Powers] do not accord with the demands for the creation of an effective European collective security system , moreover, their implementation would aggravate the situation in Europe still further and would add to the tension in the relations between States. It would lead in fact not only to the preservation of the existing military groupings in Europe, but also to their consolidation.

" The proposal clearly envisages the unification of Germany only if the whole of Germany proceeds along the path of remilitarization. At the same time it is predetermined that such a Germany must necessarily be a party to the North Atlantic bloc. . . . The acceptance of this proposal would mean that the Soviet Union, as well as a number of European States, would assist in the resurrection of German militarism, in handing to the German militarists a united Germany, and in strengthening the military groupings directed against those States. One can hardly expect it to be taken seriously. ."

Mr. Dulles emphasized that the " military blocs " denounced by M. Molotov were in reality associations for the collective security of their members, purely defensive in character and sanctioned by the provisions of the U N. Charter. " It is suggested," he continued, " that these collective defence associations are a cause of increased military expenditures, and in support of that figures are given [from the Soviet side] showing that in some of our countries our military budgets went up very sharply between 1948 and 1951 But it should not be forgotten that some things happened during that period other than the formation of collective security associations. There were the events which took place in Czechoslovakia, there was the blockade of Berlin, there was the attack upon the Republic of Korea. It was such events as these that led to the increase of military budgets, and not the creation of collective security associations. . . .

" We have come here to deal with two problems, the solution of which would serve the interests of consolidating peace. We have put on the table the proposal for the unification of Germany, which reflects in essence the Eden plan put forward at Berlin, and the new proposals to give security assurance in connexion with the reunification of Germany. The suggested treaty on the reunification of Germany is new, and represents an honest, sincere, painstaking effort to carry out the directive in that respect and to meet what we recognize to be a legitimate preoccupation—of the Soviet Union and, indeed, of all of us—against the possibility that Germany might again become a militaristic State.

" I was very glad to hear Mr. Molotov say that he would study these proposals more carefully, because it is quite obvious that his initial reaction is based upon an inadequate understanding of the document. As I understand Mr. Molotov, his basic objection to the proposal is that it requires Germany to become a party to the North Atlantic Treaty Organization . . . . Let me say that there is nothing whatsoever in the treaty which conflicts with the provision of the Eden plan

that the all-German Government shall have authority to assume or reject the international rights and obligations of the Federal Republic and the Soviet zone of Germany There is nothing whatsoever in the treaty which requires Germany to become a member of NATO. It is recognized that a reunified Germany will be free to accept or reject existing obligations with reference either to NATO, to Brussels, or to Warsaw That is a complete freedom, and nothing in our proposals is in any way contrary to that."

In conclusion, Mr. Dulles said that the Western Powers would "carefully examine" the Soviet proposals, although they seemed to be "in no way connected with the reunification of Germany."

M. Pinay spoke as follows: "... Free elections and the constitution of a freely chosen single Government are the two essential stages necessary to any reunification of Germany. They are based on a logic so obvious and so time-tested that it is difficult to see how such a method could be contested without ulterior motives If the French Government is convinced that the re-establishment of German unity must be brought about as rapidly as possible, it is no less convinced of the necessity of seeing that this reunification takes place under conditions which ensure the security of all. It is convinced that these conditions would be fulfilled if a reunified Germany were integrated in the Western defensive organizations.

"NATO and the Western European Union are defensive organizations which have as their object the assurance of the security of their members. Moreover, they provide effective security guarantees to all other States, whether they are members or not. For the first time in history we are in the presence of organizations whose members cannot act in their individual capacity on the political level, any more than their military forces can take isolated action.

"Nevertheless, the Soviet Government appears to want a reunified Germany to adhere to a collective system which would bring the Soviet Union a certain number of additional guarantees which it considers necessary to its own security. To take account of this Soviet concern, the Heads of Government last July accepted the principle of a security agreement that will enter into force at the same time as an agreement on the reunification of Germany. It is indeed essential that this shall take place simultaneously, as, without the reunification of Germany, no security system can be based on a lasting foundation. . . ."

On Oct. 31 and Nov. 2 M. Molotov presented two new sets of proposals: (*a*) for a European security pact embracing the four Powers, all the other parties to the Western European Union and the Warsaw Treaty, the two German States, and possibly Denmark and Yugoslavia, (*b*) for the setting-up of an All-German Council on which both German States would be represented. The Western Powers presented a proposal on Nov. 4 calling for free all-German elections in September 1956. None of these proposals was acceptable to the other side, and, as a result of the *impasse*, the discussions on the first item on the agenda ended on Nov. 15 without agreement being reached.

Before presenting his new proposal for a European security pact, **M. Molotov** urged on Oct 31, that the conference should invite the Prime Minister of the German Democratic Republic (Herr Grotewohl) and the Chancellor of the German Federal Republic (Dr. Adenauer) to take part in the conference in order "to expedite a solution of the German problem" and "to achieve a *rapprochement*" between the two German States The **Western Foreign Ministers,** however, declined to invite the East German Government on the grounds that it was not representative of the German people, as it had not been freely elected, and that the Western Powers had no diplomatic relations with Eastern Germany.

M. Molotov then tabled the following "Draft Treaty on Security in Europe," consisting of eight Articles and an Annexe dealing with the creation of a demilitarized zone

Second Soviet Draft Treaty on European Security.

"**Art. 1.** The parties to the treaty undertake not to use armed force against one another, to refrain from having recourse to the threat of force in their relations with each other, and to settle by peaceful means any dispute that may arise among them

Art. 2. In the event of any party or parties to the treaty being subjected to an armed attack in Europe by any State or group of States, the other parties to the treaty shall immediately render the State or States so attacked all such assistance, including military assistance, as may be deemed necessary for the purpose of re-establishing and maintaining peace and security in Europe.

Art. 3. The parties to the treaty undertake to refrain from rendering, under any pretext, any direct or indirect assistance to the attacking State in Europe.

Art. 4. The parties to the treaty shall consult one another whenever, in the view of any one of them, there arises the danger of an armed attack in Europe against one or more of the parties to the treaty, in order to take effective steps to remove any such danger. They shall immediately undertake the necessary consultations whenever agreed steps may be required for the re-establishment of peace, in the event of an attack on any party to the treaty.

Art. 5. The signatory States shall establish, by common consent, a special body (or bodies) for the purpose of holding the above-mentioned consultations and also of taking such other steps to assure security as may be found necessary in connexion with the fulfilment by the States of their undertakings under the treaty.

Art. 6. The parties to the treaty agree that their undertakings under the treaty shall not infringe the undertakings assumed by them under existing treaties and agreements

Art. 7. The assumption of undertakings under the treaty shall not prejudice the rights of the parties to individual or collective self-defence in the event of an armed attack, as provided for in Article 51 of the U N Charter.

Art. 8. The treaty is of a provisional character and shall remain in effect until replaced by another, more extensive treaty on European security which shall replace the existing treaties and agreements

Proposal for Demilitarized Zone. (1) The zone of limitation and inspection of armaments in Europe shall include the territory of the German Federal Republic, the territory of the German Democratic Republic, and the territories of all or some neighbouring States.

(2) The agreement on the zone shall envisage maximum levels for the strength of the U S , Soviet, British, and French troops stationed on the territories of other States in this zone

(3) The obligations pertaining to the limitation and control of armaments, assumed by the States under an appropriate agreement, shall be agreed upon by those States which are free to take decisions in this matter in accordance with their sovereign rights

(4) To fulfil the obligations pertaining to the limitation of armaments on the territories included in the zone, there shall be joint inspection over the armed forces and armaments of the parties to the agreement"

At the resumed session on Nov 2 **Mr. Dulles** pointed out that, although there was some degree of parallel thinking between the Western and Soviet viewpoints on the question of security, no progress was being made on the question of German unification All three Western Foreign Ministers dwelt on the necessity for free and unhampered all-German elections **M. Molotov** reiterated his plea for the representation of Eastern and Western Germany at the conference, declaring that their exclusion was "tantamount to closing the door on fruitful discussion of the German problem" He insisted that the essential thing was to ensure security against a revival of German militarism, and in this connexion made the following points. (1) the Western proposals (i e for a guarantee to Russia against German aggression, if a unified Germany joined NATO) contained no guarantee that a unified and remilitarized Germany would not break the agreement, (2) they supplied neither the Soviet Union nor Germany's neighbours with any assurance of security; (3) the "Eden plan" for free elections was meaningless since it was only part of an agreement which would come into force when Germany joined the NATO.

M. Molotov asserted that the Soviet proposals, unlike those of the Western Powers, took account of "hard facts" because they recognized the existence of two sovereign German States, each with its own political and social system He then presented the following proposals for the creation of an All-German Council which would "facilitate the settlement of the problem of Germany's reunification" and permit the two German States "to co-ordinate their efforts in the political, economic and cultural life of the German people and in regard to other States in the consolidation of peace":

Soviet Proposals for All-German Council.

"(1) An All-German Council shall be formed, composed of representatives of the Parliaments of the German Democratic Republic and the German Federal Republic, as a consultative body to discuss matters in the solution of which the German Democratic Republic and the German Federal Republic are interested.

(2) Mixed committees shall be set up under the All-German Council, consisting of representatives of the Governments of the German Democratic Republic and the German Federal Republic, on matters relating to economic and cultural ties between the two German States, German currency and intra-German financial transactions, Customs, posts and telegraphs, transport, etc.

(3) The All-German Council shall bring about accord on matters relating to the strength, armaments and location of the units required to ensure the defence of the frontiers and territories of the German Democratic Republic and the German Federal Republic.

(4) The All-German Council shall bring about accord on matters relating to the participation of the German Democratic Republic and the German Federal Republic in measures designed to consolidate European security, and shall consider, by mutual agreement, questions pertaining to the bringing about of pre-requisites for the unification of Germany as a peaceful and democratic State."

At the session on Nov 3, the Western Foreign Ministers said that the Soviet proposal for an All-German Council offered no prospects of reunifying Germany, and reiterated that it was unnatural that the German people should continue to be divided. **Mr. Macmillan** declared in this connexion: "During the last century the German people united themselves as one nation It cannot be right to put back the clock of history by now holding them apart by artificial means. . . . If we wait, conditions will not improve—they will deteriorate. The German people will become more and more frustrated, intolerant, and unbridled in their national aspirations. We shall be living in an increasingly explosive situation. With each year that passes the chances of a sane solution in co-operation with the German people will become more and more remote."

Mr. Dulles, speaking in support of early all-German elections, produced a ballot paper used in the East German elections, pointing out that there was only a single list of names and that the electors had no opportunity to vote for anyone else. **M. Molotov,** in reply, said that the single-list system might not be a model for all countries, but it worked very well in the Soviet Union and he saw "no reason to regret it"; in Tsarist Russia, he added, there had been a system of many lists, which was unsatisfactory.

Western Proposals for All-German Elections.

On Nov 4 the three Western Foreign Ministers presented the following proposal " as a first step in order to carry out the reunification of Germany " :

(1) Free and secret elections shall be held throughout Germany during September, 1956, for the selection of representatives for an all-German National Assembly to draft a Constitution and to form a Government thereunder for a reunified Germany.

(2) Each of the four Powers will designate a representative to a commission to prepare, in consultation with German experts, the electoral law for such elections, including effective provisions for safeguards and supervision to ensure the freedom of such elections.

(3) The commission shall undertake its functions promptly and shall submit its report to the four Powers by January, 1956."

M. Molotov said that he would comment on the Western proposals at a later date. After recapitulating the points on which the Western and Soviet security proposals were closest to each other, he said that there were two " main questions " which had to be answered before any further progress could be made (1) Why should the West talk of unification only on condition that Germany must enter NATO ? (2) Why should the West not provide security guarantees against German aggression to Germany's neighbours ?

The conference adjourned for three days on Nov. 5-7, during which M. Molotov returned to Moscow for consultations with his Government, whilst Mr. Dulles visited Yugoslavia for a discussion with President Tito (see 14552 E).

When the Foreign Ministers met again on Nov. 8, **Mr. Macmillan** said that the Western Powers did not believe it possible to impose demilitarization on Germany , it might be that the Germans themselves would desire to remain unarmed, but it would be more prudent if, in making their plans, the four Powers assumed that the Germans would exercise the normal right of independent States and maintain an army. " Surely, therefore," he added, " the practical course is to devise arrangements which will ensure that a rearmed Germany does not constitute a menace to her neighbours " Dealing with the specific objections raised by M Molotov, Mr. Macmillan said that the Western Powers had deliberately refrained from specifying the membership of their proposed security treaty, as they felt that this was a matter to be discussed with the Soviet Union and with their own allies They regarded it as desirable, however, that Poland and Czechoslovakia on the one hand, and Germany's Western neighbours on the other, should become parties to the treaty.

As regards M. Molotov's question as to what would happen if a remilitarized Germany violated the treaty, Mr. Macmillan pointed out that the Western proposals, like those of the Soviet Government, provided for joint action by all the signatories to meet the common danger—on this point there was no difference between the Western and Soviet proposals With regard to M Molotov's point that the Western proposals required the integration of a united Germany in NATO, Mr Macmillan stressed that in framing the proposals it was natural for the Western Powers to relate them to the contingency which was most distasteful to the Soviet Union. " We felt," he added, " that the practical thing to do was to deal with the most extreme case. Of course, the Western Powers are not dictating to the Germans. Under the Eden plan, the Germans are left free to make their own choice , nothing in the Treaty of Assusrance limits that choice "

M. Molotov, in an uncompromising speech, described the Western proposals for free all-German elections in September, 1956, as " unreal," " dangerous," and " artificial." He asserted that the real aim of those proposals was to ensure the remilitarization of the whole of Germany and to bring both Eastern and Western Germany into NATO, which was directed against the U.S S R. and other countries. This plan did not commend itself to the Soviet Union, which " knew too much about German militarism." After accusing the Western Powers of " ignoring realities," M. Molotov said that the question of all-German elections was " not yet mature," that it could not be implemented " without the agreement of the two Germanies that now exist," and that " a mechanical merger of the two Germanies by so-called free elections, conducted according to the Eden plan with the presence of foreign troops, would violate the legitimate interests of the working people of the German Democratic Republic." He declared that the East German workers would " never permit the disappearance of their Government and its achievements," and that the Soviet Union " cannot agree to deprive the workers of the German Democratic Republic of their factories, their plants, their lands, and their wealth "

After asserting that the " Eden plan " would " provoke a general dislocation in Germany, which none of us desires," M. Molotov said that all-German elections involved not merely " a case of changing Governments but the question of the fate of Germany as a whole." He added in this connexion . " It is a question of whether Germany shall be a democratic and peace-loving State or whether she shall once again take the road of militarism. There does not exist between the two parts of Germany the mutual confidence which is essential to the restoration of German unity. It will take time. We have to be patient and consistent. . . ."

Throughout his speech M. Molotov reiterated that German unity could only be brought about by agreement between the East and West German Governments—" when the Germans in East and West find a common language and take the task of preparing a settlement into their own hands." To this end he again proposed the establishment of an All-German Council to bring about a *rapprochement* between the two German States. He admitted that the Soviet Union had proposed all-German elections at the Berlin Conference of 1954, but said that it had since rejected this because Western Germany had entered NATO and had begun to rearm against the Soviet Union.

After M. Molotov had spoken, Mr. Dulles (who was in the chair) said that " the implications of what M. Molotov has said are so serious, both in terms of our directive and as regards the hopes with which we came here, that I prefer to study the matter overnight before making any comment." Mr. Macmillan and M. Pinay concurred with Mr. Dulles, and the conference adjourned until the following day.

When the discussions were resumed on Nov. 9, the three Western Foreign Ministers described M. Molotov's speech of the previous day as amounting to a direct repudiation of the directives given by the four Heads of Government, in view of his refusal to discuss the holding of free all-German elections. Extracts from the speeches of Mr. Macmillan, Mr. Dulles, and M. Pinay are given below :

Mr. Macmillan : " . . . Up to now we have been discussing at considerable length, but without acerbity, the twin problems of European security and German unification, which were entrusted to us by the Heads of Government. Up to now we have assumed . . that the directives which were agreed upon by the Heads of Government last July marked a distinct advance on any previous negotiations. We have also assumed that the directives would be loyally followed That, indeed, is what we meant by the Geneva spirit—a determination to move out of the immobility which had characterized so much previous discussion into a field of flexible negotiation. . . .

" But it now appears that there has been what amounts to a repudiation of the directives The Soviet Government no longer accepts free elections throughout Germany. This is a very grave statement and marks a very grave situation I do not see how we can usefully continue the discussion on Item 1 And since this item is the one of over-riding importance, our failure on this must gravely affect the spirit in which we approach Items 2 and 3. Nevertheless, it would be right to sum up the position and the result of our work up to now.

" On the credit side we have had a valuable exchange of views, in the course of which we have made some advance We now know that, if the Soviet Government should ever make up its mind that there is no need to disrupt the defence arrangements of the West, and that it is in the interests of all of us to have a contented, united Germany, it should not be too difficult to reach speedy agreement on an effective security system. That is a gain which we value

" On the other side, there is a heavier loss. It is a loss of confidence for the future. For, unless M. Molotov has something fresh to say at this late hour, the following views of the Soviet Government will remain on record

" What is it that the Soviet Government has really said ? It is this.

" First, Germany cannot be reunified until NATO and the Western European Union have been abolished. The Soviet Government is prepared to use the happiness, unity, and independence of the German people as pawns in its game to break up the defensive system of the West.

" Secondly, even if NATO and the W.E.U. were to be destroyed, the Soviet Government would still not give the German people freedom or independence. There will be no choice of their future for the German people even then. They must accept the odious system which has been imposed on Eastern Germany, or else continue to remain divided Because, if the German people were ever allowed to express their feelings at free elections, the puppets who are held in power in Eastern Germany by Soviet arms would be swept away.

" The brutal fact is that, for the Soviet Government, the only acceptable guarantee for the reunification of Germany is the Bolshevization of the whole country. This is the only contribution which the Soviet delegation could find to add to what was agreed by our Heads of Government in the summer. This is their contribution to the Geneva spirit

" But I must assure M. Molotov that his Government is making a very grave error. The Western Powers are not prepared to give up NATO and the Western European Union. The German people are not prepared to accept an alien political and social system and the loss of their independence as the price of their unity. They want to be a free and united people, not a satellite in a Communist constellation Therefore, so long as the Soviet Government persists in its policy, the present state of affairs can only continue with all its dangers and with diminishing hopes of a just solution. I earnestly beg the Soviet Government not to incur so grave a responsibility before history."

Mr. Dulles began with two observations : (i) The Soviet position, if persisted in, would perpetuate conditions which put in jeopardy the people of Europe ; (ii) it struck " a crippling blow " at the possibility of developing relations of confidence with the Soviet Union. Amplifying these two points, he went on :

" The Soviet Union says in the most categorical manner that the security of Europe is best assured by a continued division of Germany, at least until Germany can be unified under conditions which would Sovietize the whole of Germany. . . . The directive which brought us here, and which ought to guide us, did not ask us to judge the relative merits of social systems as between that of the Federal Republic of Germany and that of the so-called German Democratic Republic. It told us to reunite Germany in the ' national interest.' Thus, the German people themselves will determine under what system they want to live."

After declaring that the Western proposals, based on a reunified Germany, would "give Europe a security which it has not known for hundreds of years," Mr. Dulles recalled that M Molotov, speaking on Oct. 31, 1939, after the outbreak of World War II, had referred to what he called the "German efforts to break the fetters of the Versailles treaty," and had declared that that treaty had "in the long run led to the present war in Europe." Mr. Dulles remarked in this connexion :

"The Versailles treaty did impose certain fetters upon Germany. But nothing that the Versailles treaty did compares with the cruelty and injustice of dividing the German people by the separation from Germany of the Soviet zone, comprising 17,000,000 Germans The anguish of this is demonstrated by the fact that 2,704,680 Germans, at the cost of great sacrifice and risk, have fled from the Soviet zone into Western Germany. The situation, thus dramatized, cannot be indefinitely perpetuated without grave risk. . . . We urge upon the Soviet Government that it should not perpetuate the injustice of a divided Germany, with the menace which it carries to European security. Can we not learn from the lesson of Versailles ? We make that plea, and we shall go on making it, in the hope, and indeed in the expectation, that before it is too late wisdom will prevail. . ."

Mr. Dulles continued : "The U.S Government believes that the refusal of the Soviet Government even to discuss seriously the reunification of Germany involves a grave breach of the agreement of the Heads of Government. The effect of this is bound to affect adversely the overall relations of the Soviet Union with other countries, including the United States I would be less than frank if I did not say that, so far as the U.S A. is concerned, what has happened here has largely shattered such confidence as was born at the 'summit' conference at Geneva.

"There can, of course, be peace and a limited degree of working relations between nations which have no confidence that agreements between them—even though made at the highest level—will be honoured. However, relations under those conditions are bound to be difficult and restricted. Let me illustrate what I say by referring to what remains to be discussed at this conference We are directed to go on to discuss the problem of disarmament and the development of contacts between East and West. But I fear that these discussions will profit us little when we feel that we cannot make agreements between us which are dependable."

Mr. Dulles ended by saying : "It is not the desire or intention of the U.S.A., so far as we can control it, to revert to the conditions which existed prior to the meeting of the Heads of Government last July It is our purpose to continue to strive by all the means in our power for a just and durable peace But I do deplore the setback to European security and the damage to the spirit of Geneva which has been inflicted by the Soviet Union When the issues are as great as those here at stake, we shall not easily be discouraged. It is still our hope that the Soviet Union, if not now, then soon, may give loyal substance to the agreement of the Heads of Government that Germany shall be reunified by free elections. When that day comes, European security can be assured, and the spirit of Geneva will have borne a major part of the good fruit which it seemed to offer to the world."

M. Pinay said that M Molotov's speech had at least "the merit of clarity" He had made it clear that the policy of the Soviet Union was simply to consolidate the Communist regime in Eastern Germany and to prepare for the extension of Communism throughout Germany. M. Molotov had admitted that free elections would threaten the existence of the Communist regime, and it had become clear that Russia's alleged fears of German militarism were only a cloak for a policy based on political considerations.

Discussion of the first item on the agenda ended on Nov. 15, when the three Western Foreign Ministers declined to revive the discussion on European security. Emphasizing that they had been directed by the Heads of Government to link the question of security with that of German reunification, they declared that further debate would be profitless as M. Molotov had refused to discuss the question of free all-German elections.

M. Molotov tabled a last-minute proposal involving a 50 per cent reduction in foreign troops in Germany, limitation of forces in Eastern and Western Germany, a non-aggression pact between the NATO and the Warsaw Treaty Organization, and a draft agreement on security setting out the following six points on which the Western Powers and the Soviet Union were in agreement : (1) Renunciation of the use of force; (2) joint assistance against an aggressor; (3) refusal of assistance to an aggressor; (4) the establishment of a zone between East and West in which there would be maximum levels of armaments, and inspection; (5) joint consultation; (6) recognition of the rights of States to individual and collective self-defence. The Western Foreign Ministers promised to study the document, but no further debate on the subject was held during the remainder of the conference.

II.—Disarmament.

Discussion of the second item on the agenda began on Nov. 10, when two sets of proposals on disarmament were presented by the Western Foreign Ministers and M. Molotov respectively.

M. Molotov, opening the debate on Nov. 10, said that the Soviet Government could not accept President Eisenhower's proposals (i.e. for aerial inspection and the exchange of blueprints, as put forward at the "summit" conference) for the following reasons : they did not contribute to disarmament; they did not cover the foreign bases of the U.S.A.; their implementation would be a costly and prolonged operation; they would increase suspicion rather than increase confidence; they provided no guarantees against a surprise attack. He added, however, that the Soviet Government would give favourable consideration to the Eisenhower proposals if they formed part of a comprehensive plan for disarmament; moreover, careful consideration would also be given to the proposals put forward at the "summit" conference by M. Faure and Sir Anthony Eden.

Mr. Dulles said that the U S. delegation intended to comply loyally with the "summit" directive on disarmament, "despite the loss of confidence resulting from Soviet action under Item 1" He appealed to the Soviet Government to accept President Eisenhower's proposals in conjunction with Marshal Bulganin's plan for ground inspection, as a first step towards creating an effective system of inspection and control After pointing out that major aggression was unlikely "unless the aggressor has the advantage of surprise and can hope to strike a blow that will be devastating because it is unexpected," he said that the combined Eisenhower-Bulganin proposals would constitute "a decisive initial step" in providing against the possibility of a surprise attack

M. Pinay doubted whether the conference was in a position to implement a general disarmament plan, in view of M. Molotov's rejection of the Western proposals for European security and German unity. Nevertheless, he believed that "preliminary measures" could be taken immediately without any major difficulties, and suggested that these measures should consist of : (1) the Eisenhower plan for aerial reconnaissance and exchange of blueprints; (2) the Bulganin plan for setting up ground posts at strategic points, (3) the budgetary control measures suggested by M. Faure; (4) the appointment of inspection teams over a specified area on either side of the East-West German border, as proposed by Sir Anthony Eden M Pinay thought that the Eisenhower and Bulganin plans were "very close" to each other and offered the answer "in almost identical terms" for safeguarding against a surprise attack.

Mr. Macmillan pointed out that the U N. Disarmament Subcommittee, despite lengthy discussions, had been unable to make any progress on the vital question of control and inspection, for two reasons : (1) the Soviet proposals seemed to the West wholly inadequate, whilst the Soviet representative had been unable to comment on the Western proposals; (2) because of the real difficulties which arose in any attempt to control the production of nuclear weapons

Western Proposals on Disarmament.

The three Western Foreign Ministers presented the following declaration which, it was suggested, should be issued jointly by the four Powers :

"The four Ministers of Foreign Affairs :

(1) Note that their representatives on the sub-committee of the U N. Disarmament Commission, in the pursuit of their efforts to establish a satisfactory system of disarmament, have followed the directive given by the Heads of Government at Geneva on July 27, 1955

(2) Take note of the work this sub-committee has accomplished during its meetings in New York from Aug. 29 - Oct. 7, 1955, and express their appreciation of its efforts

(3) Express their agreement on the following :

(*a*) the renunciation of the use of nuclear weapons and all other weapons in any manner inconsistent with the U.N. Charter.

(*b*) the need to arrive at limitations and reductions of armaments and armed forces;

(*c*) the need to devote to the peaceful economic development of nations, for raising their well-being, as well as for assistance to less developed countries, the material resources that would be released by agreements in the disarmament field;

(*d*) the fact that an effective system of inspection and control is the keystone of any disarmament programme, and, consequently, the need to establish an organ responsible for the inspection and control of agreed measures of disarmament under effective safeguards;

(*e*) the fact that there are possibilities beyond the reach of international control for evading this control and for organizing the clandestine manufacture of atomic and hydrogen weapons, even if there is a formal agreement on international control;

(*f*) the need for continued scientific research by each State, with appropriate consultation between Governments, for methods which might be derived from evolving scientific knowledge that would make possible a thoroughly effective inspection and control system of nuclear material as part of a disarmament programme covering all kinds of armaments.

(4) Declare their intent to continue to seek agreements on a comprehensive programme for disarmament which will promote international peace and security with the least diversion for armament of the world's human and economic resources.

(5) Recognize that inspection, control, limitation, and reduction of armaments can best be achieved in an atmosphere which is free from fear and suspicion.

(6) Propose accordingly that, as a contribution to such an atmosphere and as a prelude to a general programme, the States concerned :

(*a*) should agree promptly to put into early operation, in order to help prevent a surprise attack : (i) a plan for exchange of military blueprints and aerial inspection on the basis of the proposal of the President of the United States of July 21, 1955; and (ii) a plan for establishing control posts at key points, as suggested in the proposals of the Chairman of the Council of Ministers of the U.S.S.R. of July 21, 1955;

(*b*) should also agree : (i) to arrange for the exchange and publication of information regarding military expenditures and budgets, as suggested in the proposals made by the Prime Minister of France

on July 22, 1955; and (ii) to study how best to gain practical experience regarding the problems of inspection and control, as suggested by the Prime Minister of the United Kingdom on July 21, 1955.

(7) Direct their representatives on the U N Disarmament Commission to request that its sub-committee be reconvened at an early date and continue to seek an acceptable solution to the problem of disarmament."

Soviet Proposals on Disarmament.

At the same session (Nov. 10) M. Molotov presented Soviet proposals which were virtually identical with those presented by Marshal Bulganin at the "summit" conference, and which, in addition, called for consideration of the Eisenhower, Faure, and Eden proposals and for agreement on the banning of nuclear weapons. The text was as follows:

"To lessen tension in the relations between States, to consolidate mutual confidence between them, and to remove the threat of a new war, the Governments of the Soviet Union, the United States, Great Britain, and France . . . have agreed on the following:

I.

(1) The level of the armed forces of the U.S.A., the U S.S.R., and China shall be established at 1,000,000 to 1,500,000 men for each, and that of Great Britain and France at 650,000 men for each. The level provided for China, as well as other questions bearing on the armed forces of China, shall be the subject of consideration in which the People's Republic of China shall participate. The level of the armed forces of all other States shall not exceed 150,000 to 200,000 men, and shall be agreed upon at an appropriate international conference.

(2) After armed forces and conventional armaments have been reduced to the extent of 75 per cent of the agreed reductions, a complete prohibition of atomic and hydrogen weapons shall come into effect. The elimination of such weapons from the armaments of States, and the destruction of those weapons, shall be completed in the course of the reduction of armaments covering the final 25 per cent of the agreed reductions. All atomic materials shall thereafter be used exclusively for peaceful purposes.

(3) Simultaneously with the initiation of measures to effect the reduction of armaments and armed forces, and before the entry into force of the agreement on the complete prohibition of atomic and hydrogen weapons, the four Powers shall solemnly pledge themselves not to use nuclear weapons, which they shall regard as prohibited to them. Exceptions to this rule may be permitted for purposes of defence against aggression, when a decision to that effect is taken by the U.N. Security Council.

(4) As one of the first measures for the execution of the programme for reducing armaments and prohibiting atomic weapons, States possessing atomic and hydrogen weapons shall pledge themselves to discontinue tests of these weapons.

(5) Effective international control shall be established over the implementation of measures for the reduction of armaments and the prohibition of atomic weapons.

II.

The Foreign Ministers of the four Powers have recognized the need to strive for the necessary agreement on the still outstanding questions of the above-mentioned convention, subject to consideration by the U.N. Organization. Being guided by the desire to reduce international tension, to consolidate confidence among States, and to put an end to the armaments race, the Foreign Ministers agree that it is necessary in this connexion to consider the provisions contained in:

(*a*) the proposal of the U S.S R. of May 10, 1955, on the reduction of armaments, the prohibition of atomic weapons, and the elimination of the threat of a new war;

(*b*) the proposal by the President of the United States of July 21 on aerial photography and exchange of military information;

(*c*) the proposals by Great Britain on disarmament, submitted on July 21 and Aug. 29; and

(*d*) the proposal by France on financial control over disarmament and the allocation of the released resources for peaceful purposes.

III.

The Governments of the Soviet Union, the United States, Great Britain, and France . . . solemnly declare:

'Pending the conclusion of an international convention on the reduction of armaments and the prohibition of atomic weapons, the Soviet Union, the United States, Great Britain, and France assume an obligation not to be the first to use atomic and hydrogen weapons against any country, and call upon other States to join this declaration.'"

When the debate was resumed on Nov. 11, the argument centred mainly on the relationship between disarmament and the means to control and supervise it. No common ground was found between the Western and Soviet viewpoints, and discussion on the second item was abandoned.

Mr. Macmillan pointed out that the levels proposed by the U.S.S.R. for the armed forces of the Great Powers had originally been proposed by the West as long ago as 1952. The Western proposals had been put forward at that time on the explicit understanding that it would be practicable to conclude a comprehensive disarmament agreement, including the abolition of all nuclear weapons. Unfortunately the technical and political situation had changed since 1952, and the Soviet Government itself had stated categorically that it was scientifically impossible at present to guarantee effective control over nuclear weapons. The Western Powers had "therefore been compelled to see in what way a practical start could be made on disarmament in the new situation," and their proposals would be presented to the U.N. Sub-committee on Disarmament.

As regards the level of forces, Mr. Macmillan pointed out that Britain had reduced her armed forces from nearly 4,000,000 in 1945 to 682,000 in 1951. "The Korean aggression," he continued, "compelled us somewhat to reverse this process. But since the Korean war ended, British forces were once again reduced from 870,000 in 1953 to 790,000 in 1955; and it was announced by Sir Anthony Eden recently that these forces would be further reduced to 700,000 by 1958. Whilst welcoming the Soviet announcement that they are reducing their forces by 640,000 men, I must point out that this only represents the belated adoption on a modest scale of the policy long pursued by the Western Powers. Nor is it possible, since the strengths of the Soviet armed forces are never published, to know exactly the level that will result from this reduction. For purposes of comparison, M. Molotov might reciprocate and tell us what that figure will be."

Mr. Macmillan concluded by putting the following questions to M Molotov. "Does the Soviet Government agree that international inspectors should be established in the territory of all States which are parties to the proposed disarmament agreement, and that these inspectors should be ready to work before disarmament actually begins?" (2) "What rights of access and of communications would the Soviet Government allow to the staff of the international control organ?"

M. Molotov criticized the Western proposals on the following grounds, among others: they did not put an end to the arms race, or ban atomic weapons; the West was (he alleged) using technical difficulties as an excuse for inaction; Mr. Dulles had failed to answer his [M. Molotov's] objections to President Eisenhower's proposal for aerial inspection, it was not clear how the Faure plan (for budgetary control) or the Eden plan (for the inspection of forces) were to be put into practice. As regards nuclear weapons, M. Molotov agreed that it was virtually impossible to prevent the stockpiling of such weapons for a surprise attack; he maintained, however, that the Soviet proposals met this difficulty through the establishment of control points, as proposed by Marshal Bulganin, and by the force of "moral condemnation." He added that the Soviet Government would give detailed answers to Mr. Macmillan's questions in the U.N. Sub-committee on Disarmament.

Mr. Dulles said that the Soviet disarmament proposals were "a cruel deception," in view of the general recognition of the impossibility of evolving an effective system of control in present circumstances. He urged that the proper way to proceed was "to discuss and agree on what could be controlled, and then control it," since it was useless to press for a type of agreement which could not be controlled. "Let us find what we can control, and then proceed to disarm accordingly," he declared. In the course of his statement Mr. Dulles told M. Molotov that the United States was willing to extend President Eisenhower's inspection plan to U.S. foreign bases, if the Soviet Union accepted the plan itself.

III.—East-West Contacts.

Discussions on the third item on the agenda began on Oct. 31, when the Western Foreign Ministers and M. Molotov presented separate memoranda designed to foster contacts between the Soviet Union and the Western countries in the fields of cultural and trade relations, tourism, etc. Although the two sets of proposals were referred to a sub-committee of experts, the Soviet and Western viewpoints remained irreconcilable and no progress was made.

Western Memorandum on East-West Contacts.

The following memorandum, containing 17 points for promoting contacts between East and West, was tabled jointly by Mr. Dulles, Mr. Macmillan, and M. Pinay:

"The Foreign Ministers of Great Britain, France, and the United States, mindful of the directive issued by the Heads of Government, express a desire to explore, together with the Soviet Foreign Minister, measures designed to bring about a progressive elimination of barriers which interfere with free communications and with peaceful trade between peoples, and to bring about such freer contacts and exchanges as are to the mutual advantage of the countries and peoples concerned.

The three Ministers wish to point out that their Governments have consistently favoured the free communication of information and ideas, the free exchange of persons, and the development of peaceful trade, as constructive means of promoting an atmosphere of confidence among States and a better understanding among peoples. Their Governments have always sought to foster free expression of thought, to promote the free development of the individual conscience, and to encourage, through free competition of ideas, the development of objective opinion. They are confident that a constructive development of contacts with the Soviet Union, together with a progressive resolution of those issues which constitute causes of international tension, can contribute to the establishment of a durable peace, desired by all mankind. . . .

Accordingly the Western Powers consider that it is essential, in agreement with the Soviet Union, to determine forthwith areas in which it appears most appropriate to proceed with exchanges that are to the mutual advantage of the peoples of Eastern Europe and of the West. It is with this intention that the three Western Governments submit . . . the following concrete propositions:

(1) The freer exchange of information and ideas should be facilitated. All censorship should be progressively eliminated. The obstacles which hamper the flow of full factual information and varied comment between the peoples of the West and the Soviet Union should be removed

(2) Arrangements should be made for the four Powers to open information centres, on a basis of reciprocity, in each other's capitals, where these do not already exist. Everyone should be allowed the full use of these centres without hindrance or discouragement from their own Government.

(3) The four Powers, where they do not already do so, should permit the publication and facilitate the distribution to public institutions and private individuals in each other's countries of official periodicals in English, French, or Russian.

(4) Exchanges of books, periodicals, and newspapers between libraries, universities, and professional and scientific bodies in the Soviet Union and the three Western countries should be encouraged. Such books, periodicals, and newspapers should also be available for general and unimpeded public sale in the Soviet Union on the one hand, and in the three Western countries on the other.

(5) There should be a substantial increase in the exchange of Government publications. Full lists, catalogues and indexes of such publications should be made available by Governments where they do not already do so.

(6) Film producers of the three Western countries are ready to make films available to the Soviet Union at normal commercial prices and on normal commercial terms. Soviet films are already accepted in the West on these terms.

(7) There should be exchanges of exhibitions between the Soviet Union and the three Western countries.

(8) The systematic jamming of broadcasts of news and information is a practice to be deplored. It is incompatible with the directive of the Heads of Government, and should be discontinued.

(9) The Soviet Union and the Western Powers should consider the desirability of exchanging monthly uncensored broadcasts on world developments This could take the form of half-hours for the Soviet Union on Western broadcasting systems, with reciprocal arrangements for the Western Powers on the Soviet system.

(10) The censorship of out-going press despatches, and the denial to journalists of access to normal sources of information, are serious barriers to the free circulation of ideas. The four Governments, where appropriate, should take immediate steps to remove such barriers

(11) Private tourism should be increased. This will require more liberal procedures as regards travel restrictions and other administrative practices. Above all, it will require reasonable rates of currency exchange

(12) There should be further exchanges of persons in professional, cultural, scientific, and technical fields.

(13) Meetings of outstanding scientists and scholars of the four countries at international congresses should be facilitated.

(14) There should be cultural and sporting exchanges on a reciprocal basis, drawing on the best each has to offer under the auspices of the principal cultural institutions and sporting organizations on both sides.

(15) A beginning should be made with exchanges of students, particularly those engaged in language and other area studies. It should be possible for students to share fully and freely the student life of the country they visit.

(16) Restrictions on the ability of members of diplomatic missions of the four Governments to travel in each other's countries should be removed on the basis of reciprocity.

(17) Agreement should be reached in principle for reciprocal exchanges of direct air transport services between cities of the Soviet Union and cities of the three Western countries.

So far as trade is concerned, the Western Powers sincerely desire to see an improvement in the commercial relations between the countries of Eastern Europe and themselves, leading to an increase in mutual trade in peaceful goods To this end they have made freely available to the countries of Eastern Europe a wide area of trade with respect to exports and imports.

That only small advantage so far has been taken of these opportunities is, in their view, basically a reflection of the policies and conditions within the countries of Eastern Europe. While they feel, therefore, that the major initiative in securing an increase in East-West trade must be taken by the countries of Eastern Europe, they are, for their part, prepared to consider sympathetically any proposals which seem likely to lead to a mutually beneficial development of peaceful trade. In particular, the Western Powers would urge the Soviet Government to make it less difficult for Western private traders to engage in and to develop opportunities for East-West trade to the advantage of both sides."

Soviet Memorandum on East-West Contacts.

The following memorandum was presented by M. Molotov on the same day on behalf of the Soviet Government :

" In accordance with the directives issued by the Heads of Government, the Foreign Ministers of the four Powers. . . . have agreed on the following :

(1) Measures should be taken to facilitate the development of international trade with a view to eliminating the existing obstacles and restrictions in international trade between East and West, and to apply the most-favoured-nation principle in the field of trade and navigation.

(2) The four Powers will do their utmost to facilitate free passage of merchant ships of all countries through seas, straits, and canals of international importance, and to remove the existing restrictions in sea communications with certain States [This was an apparent reference to the Chinese Nationalist embargo on the passage of Soviet and " satellite " oil tankers through the Formosa Straits to Communist China]

(3) Measures shall be taken to broaden international scientific and technical relations, in particular, in the field of peaceful use of atomic energy, through holding conferences with the participation of specialists, etc. Appropriate steps shall be taken by the representatives of the four Powers in international organizations dealing with international co-operation in the field of science and technology As an immediate measure, the four Powers should convene in 1956 an international conference on the use of atomic energy in the field of health.

(4) The four Powers declare themselves in favour of the participation in international specialized agencies [such as the I.L.O , UNESCO, W H O., etc] of all States desiring to co-operate in the work of these organizations.

(5) The following measures shall also be encouraged, including those possible in U.N. organs and agencies, to facilitate the strengthening of contacts between East and West in the spheres of industry, agriculture, cultural relations, and tourism

(*a*) Mutual exchanges of delegations and reciprocal visits of representatives of industry, agriculture, and trade, for the purpose of exchanging experience and getting acquainted with the achievements of the respective countries in these fields

(*b*) Development of cultural relations for the purpose of wider intercourse between men of science and culture, having in view the desirability of concluding appropriate agreements among States on cultural co-operation

(*c*) Expansion of mutual exchanges of publications (books, magazines, newspapers, etc) between scientific research institutions, libraries, scientific and cultural associations, public organizations, and individuals

(*d*) Measures for a wider development of international tourism, and of sporting encounters between nations.

(*e*) Measures for eliminating the existing artificial barriers in the field of immigration and other regulations hampering the expansion of the above-mentioned contacts between States."

As stated above, the Foreign Ministers agreed to remit the two memoranda to a sub-committee of Western and Soviet experts. After 18 meetings, however, the sub-committee failed to reach any agreement, and the Foreign Ministers dropped the subject after an acrimonious debate on Nov. 14-15 during which M. Molotov described the Western proposals for freer exchange of ideas as " freedom of propaganda for war " and as being " incompatible " with peace.

Mr. Macmillan, in a lengthy speech on Nov. 14, said that the reports of the experts showed that there was no satisfactory response from the Soviet side to any of the Western proposals. " The longer the discussions proceeded," he said, " the clearer it became, not merely that the Western and Soviet representatives had a radically different view of what subjects it would be most important to discuss, but a radically different approach even to the subjects on which it might have been thought that we should have something in common." The Foreign Secretary continued : " Of the 17 Western points, no fewer than 12 made a sincere and specific offer to the Soviet Union of greater opportunities for contact or improved facilities. The remaining five, which called for the removal of restrictions, asked for no more than that the Soviet Union should match existing practice in the three Western countries. We made positive proposals on censorship, on jamming, on the exchange and sale of books, on the sale and showing of films, on the exchange of official publications, on restrictions on diplomatic missions, and on the encouragement of private tourism in either direction. We added what might be regarded as less radical requests . that the rouble rate should be adjusted , that the working journalist and the travelling businessman should be granted more facilities ; that there should be exchanges of students ; that we should exchange direct air services. We had no satisfactory response on any of these subjects.

" Why has the result been so negative ? The attitude of the Soviet representatives in the sub-committee gives the answer only too clearly. The Heads of Government instructed us in the first place to seek to remove barriers to free communication and peaceful trade. Yet the only barriers which the Soviet Government could suggest as important to remove were the strategic controls, which were clearly excluded from the directive Except on trade, where they harped continually on the strategic controls—to the exclusion, I would almost say, of all other business—they sought to avoid a discussion of subjects which they said were not common ground between us. Out of the 18 meetings, the Soviet experts could be persuaded to devote only two to subjects such as censorship and jamming—and these on the basis of whether they were admissible for discussion at all . . . I am reluctantly led to the conclusion that the proposals set out in the Soviet memorandum are the frills with which the Soviet delegation seek to clothe the *nakedness* of their ideas on how ordinary, simple, unaffected intercourse between the peoples of East and West can be made into a reality."

On the subject of East-West trade, Mr. Macmillan said : " I agree that trade is important. We want to see it increased. But the short answer to the Soviet delegation is—if they want more trade, they should trade more. Our experts asked them for positive proposals on this subject. The Soviet delegation had none to offer, beyond the abolition of the strategic controls, which we are not willing to negotiate. We suggested that the Soviet Union should afford our businessmen better facilities—a lower rouble rate, protection for their patents and copyrights, greater freedom to travel and to obtain

commercial information—matters which are normal commercial practice in our community. The Soviet delegation was unresponsive. If the Soviet delegation proclaims the doctrine of free trade, this is certainly in itself a respectable, if rather old-fashioned, principle. But what are we to make of an attitude which proclaims unlicensed freedom in trade, which announces, as the Soviet delegation did—I quote the Soviet words—'All trade is peaceful trade,' and then asks us to accept as beyond question prohibitions and controls of the most illiberal nature in all the other fields of human intercourse?"

As regards the jamming of broadcasts, Mr. Macmillan declared "We are not claiming to force our opinions on the Soviet people We are making the modest request that the Soviet people should be allowed to know what they are. We want them to be able to listen to our broadcasts in the way that our people can listen to Soviet broadcasts The Soviet delegation's first comment on this was that their people should be protected against subversion and corruption My answer is that not only do I repudiate this charge, but that our broadcasts are jammed—not on the basis of what they contain, but systematically jammed

"To jam everything is not censorship Censorship implies selection. To jam everything implies exclusion Recently the B B C recorded statements by the Soviet Minister of State Farms and by the Deputy Minister of Agriculture of the R S F S R, and also a sermon by the Metropolitan of Minsk, while these gentlemen were visiting Britain They were jammed Even more extraordinary, a statement which the B.B.C recorded here in Geneva by Marshal Bulganin and Mr Khrushchov was jammed when broadcast by the B B C That is not even censorship It is *lèse-majesté* While this is going on on the one side, on the other side the Soviet Union broadcasts, without the slightest impediment, 103 hours a week in the English language, of which 31½ hours are beamed to the United Kingdom For 14 hours a week there is a broadcast by the B B C to Russia. That is always jammed by the Soviet Union But more than that, the B B C. broadcasts in Finnish, Hebrew, Turkish, and German are also jammed.

"It seems that the Soviet Union is to be the judge, not only of what its own people, but of what other people are to hear This is jamming, not only in the import market, but in the export market Finally, the Soviet delegation complained that we disturb the air by using too many frequencies This is a most preposterous claim . . It is putting a very small cart before a very large horse If you force a man to talk to you through a brick wall, you can hardly complain if he raises his voice"

On the question of censorship, the Foreign Secretary said that the Soviet delegation had replied that this subject was not within the purview of the conference, and had declared that the Soviet people must be protected against subversion and corruption in all its forms. "What are we really proposing?" said Mr Macmillan "We are proposing that the ordinary Soviet citizen should have freely available our books, periodicals, and newspapers Is this a claim to 'corrupt and subvert?' If so, the Soviet Union practices it towards us; for its literature is available in the U.K. to all who seek it. The fact is really that the censorship is applied, like the jamming, not selectively but wholesale"

"Finally, may I say a word about the rouble rate. We are bound to point out that, so long as the present [exchange] rate continues, it effectively bars all but a chosen few from visiting the Soviet Union It makes our Embassy in Moscow the most expensive for its size in the world It is equally discouraging to newspapers who would like to maintain correspondents in Moscow, and to businessmen who might like to travel or establish a representation there; and, of course, above all, to private tourists travelling at their own expense. At a rough calculation, the cost of living for a foreigner at the current rate of exchange is four times in Moscow what it is in London. Even for visitors who receive special vouchers and other reductions, a hotel with meals costs about £7 a day. . . ."

Mr. Macmillan ended as follows: "The third item of our agenda is, in a sense, bound up with the other two. . . Some real progress on this third item might well have assisted, even if indirectly, progress on the first two items. That is why I greatly regret the negative result which has emerged from this prolonged discussion of the whole problem by our expert committee."

Mr. Dulles supported Mr. Macmillan's denunciation of the Soviet jamming of radio broadcasts from other countries, and said that the experts' studies in the fields of transport and trade had been frustrated by the negative Soviet attitude. Ignoring the directive issued by the Heads of Government, the Soviet representatives in the experts' sub-committee had "confined their approach to an openly political attack upon the Western system of security controls over the exportation of a relatively small range of strategic commodities."

Mr. Dulles continued: "It was precisely to avoid disputes and recriminations over these controls, and to direct attention to the vast problems of economic relationships between East and West, that the directive of the Heads of Government speaks of 'peaceful' trade. The fact is that the economic policies pursued by the Soviet Union, and directed towards ensuring the greatest degree of self-sufficiency, leave for export no important stocks of consumer and other goods which normally enter into international trade. This consequence of Soviet economic policy, and not the small percentage of goods covered by strategic controls, has been and remains the chief limitation on any important development of trade with the Soviet Union." In an obvious reference to the Czechoslovak-Egyptian arms deal, negotiated with Soviet support, Mr. Dulles added:

"Apparently the Soviet Union at the present time does, however, have large stockpiles of discarded arms resulting from the production of new models for the Soviet's own use It would be a matter of utmost concern to the other nations of the world if the Soviet bloc should try to meet its large import needs, and serve its other aims, by exporting these surplus arms throughout the world."

In his concluding passage Mr Dulles said "I have often expressed the friendship of the American people for the Russian people. Our countries have never been at war. Our people have never fought each other And we do not believe that we could ever be brought to fight each other if only we know each other The great danger comes from the carrying on year after year of a persistent campaign which distorts the minds of the Russian people"

M. Molotov made no response to the Western appeals for freer exchanges of ideas and for the cessation of radio jamming, press censorship, and other discriminatory practices After saying that "various measures of a discriminatory nature" were being taken by a number of Western countries, and above all by the U S.A, in their trade relations with the U S.S R., he declared that no normal development in East-West contacts could be achieved "without the elimination of these barriers" "This," he added, "is precisely what the proposals of France, Britain, and the U.S A lack. Only . unhindered trade will correspond to the lessening of tension and to the directives of the Heads of Government on this question."

M Molotov went on to allege that the Western memorandum contained "a number of proposals to interfere in the internal affairs of individual States"—"to change in one way or another the legislation and administrative regulations of individual States, and also to alter the exchange rate of the currency of individual States." The Soviet delegation, he declared, was "unable to agree to the consideration of such claims," and regarded them as "inappropriate." After denying that his Government was trying to isolate the Soviet people from contacts with the outer world, M. Molotov continued:

"We do not conceal, however, that the Soviet Union has not granted previously, and will not grant in future, such 'freedom of exchange of ideas' as would mean freedom of propaganda for war, or propaganda imbued with a hatred of mankind calling for atomic attack We cannot agree to such 'freedom' as would result in the unleashing of subversive activities by the dregs of society who have been thrown out of the countries of Socialism and the people's democracy, although, as is known, millions of dollars are sometimes spent to this end . . No supporter of democratic principles can agree to the assertion that radio stations disguised under the name of 'Free Europe,' and so forth, actually contribute to the cause of the freedom of peoples. Every honest man must agree that such radio stations serve, not the ends of freedom, but the ends of arch-reactionaries—the instigation of hatred among nations, the undermining of peace, and the preparation of a new war . ."

M. Pinay presented French proposals which stressed the desirability of cultural, scientific, and sporting exchanges between East and West, exchanges of students, and an increase in tourism **M. Molotov** promised to consider them, and on the following day (Nov. 15) presented a draft declaration recommending "the creation of conditions suitable for peaceful trade"; measures "to facilitate the free passage of ships through straits and canals of international importance"; measures to facilitate the exchange of books, newspapers, films, and broadcasts "in accordance with agreements which may be of a bilateral or multilateral nature"; cultural, scientific, professional, and sporting exchanges; visits between representatives of industry and agriculture; exchanges of professors and students, and the development of tourism.

Mr. Dulles pointed out that the new Soviet draft rejected the substance of all but five of the original 17 proposals, including everything of importance relating to the free exchange of ideas **M. Pinay,** similarly, observed that after all concrete plans had been rejected, M Molotov's latest proposals were merely generalizations on subjects which did not permit of rapid or important progress. **M. Molotov,** however, claimed that his new proposals were designed to create the basis for a co-ordinated decision by the four Ministers, and represented an attempt to meet M. Pinay's suggestions "halfway" and to "fulfil our directive" No further action, however, was taken on the proposals of either M. Pinay or M Molotov.

In a second speech, **Mr. Dulles** commented as follows with regard to M. Molotov's opposition to the free exchange of ideas: "We had thought that Socialism was fully established in the Soviet Union, so that it would not topple if, perchance, some contradictory ideas found their way into the Soviet Union. But, apparently, Socialism is not as strongly established as we had thought. . . The nervousness and fear of the Soviet Government for its own future is something we shall have to take into account and evaluate when we consider the possibility of further contacts."

At the opening of the discussion on the third item, Mr. Dulles had announced that the U.S. Government was taking the following measures to develop East-West contacts:

(1) The lifting of restrictions on travel by U.S. citizens to the Soviet Union and Eastern European countries, with the result that U S. passports would be valid for the U.S S.R. and all East European countries with which the U.S.A. had diplomatic relations (i.e. Poland, Czechoslovakia, Rumania, and Hungary, but not Bulgaria and Albania) (2) The lifting of the restrictions on the movement of Soviet citizens in the U.S.A., provided the Soviet Union gave reciprocal treatment to U.S. nationals in the U.S.S.R. In addition, the U.S. Government was prepared to simplify certain of the procedures governing exports to Eastern Europe.

Ending of Geneva Conference. - Final Speeches.

The Geneva conference ended on Nov. 16, when final speeches were made by the Foreign Ministers. Extracts are given below:

Mr. Dulles.

"We must all feel the seriousness of this moment, as our conference draws to an end The indispensable premise of our security proposal was the reunification of Germany, without which we feel there can be no solid peace in Europe. The Soviet Union made no effort whatsoever to meet this point, or to comply with that portion of our directive which called for the reunification of Germany by free elections. The Soviet delegation refused to discuss the provisions of our reunification proposal, and never submitted a reunification proposal of its own It pointed to alleged obstacles to German reunification, such as the existence of NATO and the Western European Union, but it never said that it would permit the reunification of Germany, even if these alleged obstacles were done away with Rather, it took the position that it would not permit the so-called German Democratic Republic, the regime which the Soviet Government has installed in Eastern Germany, to be subjected to the test of free elections.

"The Soviet refusal even to contemplate free elections in Eastern Germany . . . high-lights, as no words could, the situation throughout Eastern Europe. If the so-called German Democratic Republic cannot stand the test of the people's choice, no more can the regimes imposed on the other peoples of Eastern Europe This topic was not on our agenda. . . . But we were all conscious of the fact that Soviet preoccupation with its problems in Eastern Europe weighed heavily upon it at this conference

"Last July Marshal Bulganin agreed that there was a close link between German reunification and European security; that the four Powers have a responsibility for the reunification of Germany; and that Germany should be reunified by free elections. The U S Government and people will find it hard to understand why in the light of this, Marshal Bulganin sent to this conference a delegation which was apparently under orders not to discuss seriously the matter of German reunification.

"Conditions in Eastern Europe may be such that the Soviet Union feels that it cannot now agree to free elections in any area it controls, because that would have a contagious effect But we think it unfortunate that this was not foreseen by the Soviet Government before it agreed, at the highest level and under the most solemn circumstances, that Germany should be reunified by free elections.

"The second item of our directive was disarmament. In this matter primary responsibility was not given to the Foreign Ministers' Conference. The Heads of Government agreed to work together through the sub-committee of the U.N. Disarmament Commission to develop an acceptable system for disarmament. The Foreign Ministers were given what might be called a watching and supporting role.

"Nevertheless, I believe that our discussions on disarmament have been useful. I hope they have led the Soviet delegation to realize the sincerity of U S purpose We have made it clear that we are determined to seek the reduction of armaments, but we want a reduction that can be checked and controlled, so that it will not be one-sided. President Eisenhower's proposal for an exchange of blueprints and aerial inspection was presented as a start towards that goal.

"The Soviet Union has suggested the giving of pledges not to wage an atomic war. We pointed out that the four of us here, and indeed most of the nations of the world, are already pledged not to wage any war in violation of the U.N. Charter. The great weight of world opinion and the potency of moral judgment should be directed against the initiation of any war, and not merely wars with particular weapons. Any war is horrible. And any Government which defied world opinion by going to war in violation of its solemn pledges could not be relied upon to keep its new pledge not to use atomic weapons. Therefore, in the case of atomic as of other weapons, the primary task is to find means of supervision and control. Pledges alone are not enough. . . .

"Item III of our agenda dealt with the development of contacts. Here again there is no agreement to record. It is apparent that there has been little change in the sensitiveness of the Soviet Government to the introduction into the Soviet Union of any ideas which conflict with the official ideology. . . .

"International conferences rarely produce as much as people hope from them. . . . Having lived through more conferences than are the lot of most human beings, I have learned not to be discouragod. . . . This conference has had its merits. We have talked plainly. We have in the main discussed seriously and without vituperation. Our talks have not been wholly barren The U.S. Government and people want to develop better relations with the Soviet Union. Our hope for the future derives from our belief that the Soviet Government will, sooner or later, come to see that the advantage to it in better relations with the West is far greater than the local and passing advantages which it could gain at the price of forfeiting the good relationship which, at the summit conference, the Soviet rulers seemed to want. . . ."

Mr. Macmillan.

After commenting that the conference of Heads of Government had "sent a thrill of hope and expectation round the world," the Foreign Secretary continued: "What struck the imagination of the world was the friendly meeting between the Heads of the two great groups into which the world is divided. These men, carrying their immense burdens, met and talked and joked together like ordinary mortals. It was not from some new and profound political decision or formula that the Geneva spirit was born. It was from the ordinary human contacts of the leaders of vast organizations of mankind. . . .

"What I fear we must recognize as the immediate result of our meeting during the last three weeks is that, instead of taking another step forward, at the best we are locked again in a stalemate; at the worst, we have taken a step backwards. I am not so much concerned that we have failed to agree on all the questions which we were instructed to discuss What worries me is that the Soviet delegation do not seem to mind our failure"

On European security and German unification, Mr Macmillan said that the Ministers had actually succeeded in doing what they were bidden to do: they had discussed both subjects under a single heading. "On the security part of the problem," he added, "we seemed even to be making progress. We were like two men trying to do a jigsaw puzzle together. We were looking for the pieces to try to fit them into the right place. Indeed, many of the details of our proposals were similar; the zone, the system of inspection and control, the limitation of armaments within the zone, the interchange of radar facilities, and all the rest It is true that the Soviet delegation demanded the dissolution of NATO. But this in their second paper they were prepared to postpone. . . Moreover, the Soviet delegation accept the principle of 'the inalienable right of States to individual or collective self-defence.' NATO is an organization for collective self-defence.

"In the light of all this, I felt, and still feel, that there would be no difficulty in writing a security treaty which would satisfy East and West, if the freedom and unity of Germany could be secured. But when Mr Molotov returned from Moscow, the real division between us emerged with brutal frankness This division is political, not military or strategic. But here, alas, there is a great gulf fixed. We thought the [summit] meeting had done something to narrow it, but now again it seems wide and deep The real problem is our radically different approach to German reunification. We believe that individuals and nations should be free. The Soviet Government, however, continues to believe in its right, nay, its duty, to impose political and economic systems on other nations.

"The passages that I have had with Mr Molotov on the subject of free elections and the varying merits of the single-list and the open-candidature system have been illuminating. It is clear that we are back in that strange nightmare where men use the same words to mean different things. 'Peaceloving,' 'democratic,' 'freedom,' all these splendid words, which we have inherited through the long history of civilized Europe, have clear and inspiring meanings to us, with deep undertones They appear to have a wholly different significance to the Soviet Government. And so that contact, that meeting of minds and almost of hearts, which seemed to have taken place four months ago, is—for the moment—broken. We stand looking at each other across the great divide.

"Yet I do not feel altogether discouraged. I feel that there are many new forces operating in the Communist world and in the satellite countries which they control. There is an old saying, which Mr. Molotov may know: 'He admires the sea, who stays at the edge of the forest.' I cannot help thinking that last summer's Geneva idyll was not a sham affair. There was a genuine longing on both sides of the Iron Curtain to break down the wretched thing; to let the free current of thought and human contacts, which have so long been cut off between us, start again. But when it comes to the point, the Soviet Government has not set out to sea. They have stayed at the edge of the forest.

"I feel that the Russian delegation and the Russian Government really do want pacification and security. But they are not prepared as yet to accept the consequences of what they wish. The German people must be allowed to live their own lives, to choose their own economic and social system, to decide their own foreign policy. Guarantees the Germans, and those with whom they may be allied, may properly be asked to give. But freedom the Germans have a right to demand. I have been driven to feel that the Soviet Government does not accept that right."

Turning to the free movement of ideas and persons, Mr. Macmillan cited a saying which we had heard recently: "The terrible thing is that the Russian Government fears our friendship more than our enmity." "Yet," he added, "this isolation cannot last for ever. Western books cannot always be excluded as subversive, or Western newspapers always be banned as corrupting. Information cannot, year after year, be classed as espionage, or travel restricted to hand-picked groups. After all, this is medievalism—or a parody of medievalism."

On disarmament, Mr. Macmillan declared that the exchange of views had been useful, but it would be wrong to suggest that agreement was at hand. Two things were necessary: confidence and controls.

Finally, Mr. Macmillan said, there must be a new spirit. "A vague *bonhomie* or a few phrases are not enough. These are words or gestures, outward things. The Geneva spirit, if it is anything, is an inward spirit. Its light is not bright today. It burns low. But it burns. It has not been extinguished. Like those street lamps which I remember as a child, it needs but one sincere touch of the lamplighter to set it once more aflame."

M. Pinay.

"If the meeting has not permitted us to reach a conclusion on any of the points which the Heads of Government instructed us to study, at least it has given us the chance to define our respective positions with clarity. . . . The proposals presented by the Soviet delegation regarding security are not inspired by a realism comparable to that which inspired us, since they concentrate on two main themes: the eventual dissolution of the Atlantic Pact, and the perpetuation of the division of Germany. Such is the path which, according to M. Molotov, should lead us to the security of Europe.

" In fact, these two exigencies are of a political order and have no relation to the organization of security. Security, for us, consists in giving everyone a real guarantee that no individual aggression will take place in Europe, and that, if such an aggression should come about, it would be strangled by collective and instantaneous action.

" So long as there exists in Eastern Europe a bloc of Powers so closely welded one to another that an individual voice can never be heard in any domain, the peoples of Western Europe will see in their own defensive organizations the irreplaceable basis of their security. Behind the formulas ' Europe for the Europeans ' and ' Europe united in security ' hides in fact the desire to deprive the Western countries of the collective defence system imposed on them by the existing balance of forces in Europe. I repeat that the existence of regional security systems does not in itself in any way constitute a danger of aggression—quite the contrary.

" I am convinced that the Soviet Government, if it now gives careful attention to the proposals we have made, will measure the consequences of an indefinite adjournment of the settlement of the German question, from which would result, in the centre of Europe, a constant cause of friction and a pretext for all kinds of rivalries. Such a policy would lead precisely to the rebirth of German nationalism and militarism, which the French Government could not admit It is the duty of the four Powers to prevent such an evolution. . . ."

M. Molotov.

" . . . The principal question we faced was European security, and in this connexion the German question. There is no problem more important than that of strengthening peace among nations and preventing the threat of another war. It is particularly true as far as Europe is concerned, where in the past two world wars were unleashed. This is precisely the premise from which the Heads of Government of the four Powers proceeded. It follows from the text of their directives, which establish a connexion between these two questions, that the first place is given to European security For the nations of Europe the problem of European security naturally comes at the top

" The German question, as related to this problem, is of subordinate importance. If European security is assured, then security for the German people will be assured, and also the most favourable conditions for the settlement of the German problem as a whole, including German unity.

" In the course of the entire meeting the Soviet delegation sought to convince the representatives of France, Britain, and the U S A. . . . that the setting-up of military groupings like the North Atlantic bloc and the Western European Union would lead to no good Such actions compel other European States to set up groupings of their own Only a system of collective security embracing all European States, irrespective of differences in their social structure, can meet the interests of peace and security in Europe.

" If some Western States are not yet prepared for the establishment of an organization for collective security for the whole of Europe, a start could be made with a security pact for a part of Europe, which would embrace both existing German States and those European countries that are prepared to join. This is also clearly indicated in the directives of the Heads of Government. . . . However, no agreement was reached.

" On the part of the representatives of the U S.A., France, and Britain, there was displayed a tendency which in no way conformed with the decisions of the Heads of Government. There was insistence to obtain our consent not only to the remilitarization of Western Germany, which is already being carried out under the Paris Agreements, but also to the remilitarization of Eastern Germany and to the inclusion of the whole of Germany into the military groupings of the Western Powers All this was proposed to be put into effect by means of all-German elections to be carried out under the ' Eden Plan.'

" The settlement of the German problem and the unification of Germany are related to the question of what course of development a unified Germany should take; its transformation into a military State joined to the military groupings of certain Powers, or its development as a peace-loving and democratic State which does not take part in any military blocs and which co-operates with other States in consolidating peace. He who evades the answer to this question delays the settlement of the German problem. The discussions on the German problem were doomed to failure if only for the reason that they took place in the absence of representatives of both Western and Eastern Germany. . . It is impossible to settle the German question and at the same time to disregard the fact that there exist two German States with two different social structures. One should not ignore realities . .

" The proposals of the Western Powers boil down to the absorption of Eastern Germany by Western Germany under the ' Eden Plan.' We stand for the restoration of German unity on the basis of free all-German elections. We cannot assist the plans for the remilitarization of any part of Germany, and moreover of the whole of Germany, and for its inclusion into military groupings directed against the Soviet Union and other peace-loving States. We were presented with a plan of German reunification that ignored the principal task —that of reuniting Germany as a peace-loving and democratic State. We were offered a draft under which the very reunification of Germany was made dependent on the remilitarization of the whole of Germany and on the membership in the NATO bloc not only of Western Germany but of Eastern Germany as well, to which the German Democratic Republic vigorously objects. . . .

" The directives of the Heads of Government say that the settlement of the German problem and the reunification of Germany should be carried out ' in conformity with the national interests of the German people and the interests of European security.' On the other hand, the proposals of the Western Powers clearly contradicted the actual situation existing in Germany and the interests of ensuring peace and security in Europe . . . The discussion of European security and Germany has not yet brought us to agreed conclusions. But we hope that this discussion will be useful, that the settlement of these questions will not be protracted, and that we shall come to agreed conclusions and decisions.

" On the disarmament question . . . we cannot boast of the results achieved. The proposals of the Western Powers do not say a word about ending the arms race or about reducing armaments. They make no mention of the need to prohibit atomic weapons, though the U.N. declared its positive attitude in this respect as far back as 1946. . . . Attempts have been made to present the case in such a way as if it is impossible at the present time to implement a general disarmament programme, and it has been proposed that we confine ourselves to the institution of inspection without taking any measures for the reduction of armaments. This approach cannot yield positive results

" The Soviet Union proceeds from the premise that the principal task in the field of disarmament is the implementation of practical stages aimed at putting an end to the arms race and delivering nations from the threat of an atomic war. This can be achieved only by putting into effect the earlier decisions unanimously adopted by the United Nations . But the Soviet Union believes that even in existing circumstances there is a possibility of making substantial progress in the field of disarmament . . Under present conditions, pending the conclusion of a general convention providing for the complete prohibition of atomic weapons, the moral and political condemnation of the use of such weapons would be of great significance. If such a condemnation were adopted by the U.N on the initiative of the four States represented here, it would be impossible to disregard it. .

" On the third item of the agenda the Soviet delegation submitted proposals aimed at eliminating the barriers between East and West which hamper the development of trade and economic relations. It also submitted a number of proposals on the development of contacts in the fields of culture, science, the press, radio, art, sport, tourism, and so forth However, they found no support from the delegations of the Western Powers, whose proposals moved away from the spirit of co-operation which characterized the conference of the Heads of Government . . . The three Western Powers kept on insisting on proposals which dealt with matters within the competence of the respective States. Since they concerned the internal affairs of States, they naturally could not be a subject of discussion for this meeting.

" But we still believe that the discussion on contacts at this meeting will help in arriving at agreed decisions in future The Soviet Government, without waiting for such decisions, will carry out practical measures for the development of contacts with those countries which seek them. We hope for positive results in this respect. . . ."

In conclusion, M. Molotov said that although the Foreign Ministers' conference had been " quite different from the spirit of Geneva." it had nevertheless been " helpful in drawing the attention of the public to the most urgent problems of our time," which " cannot but have a positive effect " He ended : " It is not only obstacles that have become more discernible, but also the broad possibilities that exist for the successful settlement of such problems as ensuring European security, disarmament, a settlement of the German question, and the expansion of economic and cultural ties between the East and West. We are convinced that this meeting will be helpful for the development of international co-operation and for the further lessening of international tension."

Final Communiqué. - Joint Declaration on Disarmament. - Western Declaration on Germany.

The following agreed communiqué was issued at the end of the conference :

" In compliance with the directive issued by the four Heads of Government in July, the Foreign Ministers of the French Republic, the United Kingdom, the Union of Soviet Socialist Republics, and the United States of America met in Geneva from Oct. 27 to Nov. 16, 1955. They had a frank and comprehensive discussion of the three items entrusted to them in the directives, namely : (1) European Security and Germany ; (2) Disarmament ; and (3) Development of Contacts between East and West

" The Foreign Ministers agreed to report the result of their discussions to their respective Heads of Government, and to recommend that the future course of the discussions of the Foreign Ministers should be settled through diplomatic channels."

The four Foreign Ministers also issued a joint declaration on disarmament, worded as follows :

" Guided by the desire to contribute to the lessening of international tension, to strengthening confidence between States, and to reducing the burden of armaments, the Foreign Ministers . . . remain convinced of the need to continue to seek agreement on a comprehensive programme for disarmament which will promote international peace and security with the least diversion for armaments of the world's human and economic resources.

" Their discussions showed that while there was agreement on this objective, it was not yet possible to reach agreement on effective methods and safeguards for achieving it.

" The Ministers will transmit the record of these discussions to their representatives on the U.N. Disarmament Sub-committee, They believe that their exchange of views has been useful in clarifying their respective positions and should assist the sub-committee in its efforts to reach agreement. . . . In the meantime, the Ministers agree that the studies of methods of control which are now proceeding in different countries should be designed to facilitate a settlement of the disarmament problem.

" The Ministers further reaffirmed the obligation of their Governments to refrain from the use of force in any manner inconsistent with the U N. Charter."

In addition, the following declaration on Germany was issued by the three Western Foreign Ministers :

" The Foreign Ministers of France, the United Kingdom, and the United States tried to reach agreement with the Soviet Foreign Minister on what the four Heads of Government, in July, agreed were the closely linked problems of German reunification and European security. To this end they made a proposal for the reunification of Germany by free elections in 1956, and for a Treaty of Assurance giving the Soviet Union far-reaching safeguards against aggression when German was reunified.

" Marshal Bulganin, in July, had agreed that the reunification of Germany was the common responsibility of the four Powers and should be carried out by means of free elections. The Soviet Foreign Minister, however, despite the directive of the Heads of Government, made it plain that the Soviet Government refused to agree to the reunification of Germany, since that would lead to the liquidation of the East German regime He made counter-proposals which would have involved the continued division of Germany, as well as the eventual dissolution of the Western security system It is for this reason that the negotiations have failed

" The Foreign Ministers of France, the U K , and the U S A. are aware that this result must bring a sense of cruel disappointment to the German people, East and West of the zonal border which now unjustly divides them. However, they believe that the Soviet Government will come to recognize that its own self-interest will be served by ending the injustice of a divided Germany They believe that the Soviet Government will realize that so long as it persists in withholding unity from the German people, thus perpetuating the division of Europe, there can be no solid security in Europe, nor indeed in the world

" The three Western Powers themselves will not cease their efforts to end the injustice and wrong now being done by dividing the German people, and will continue to stand ready to contribute to the security which can be enjoyed by all only when Germany is reunified."

German Reactions to Geneva Conference.

Deep disappointment was expressed in Western Germany, both by the press and by leaders of the political parties, at the failure to make any progress on German reunification. The Federal Government issued a statement on Nov. 9 declaring that M. Molotov had dealt " a ruinous blow " to the spirit of Geneva, and had " shown unequivocally that he would give the German people freedom of decision neither in domestic nor in foreign affairs." An official spokesman in Bonn said on Nov. 16 that the Federal Government was grateful to the Western Powers for having " made the cause of German unity their own," for having emphasized " the demand for reunion of the divided parts of the country," and for having shown themselves " dependable allies of the German people."

Over 50,000 Berliners demonstrated on Nov 20 outside the West Berlin City Hall in protest against the failure of the Geneva conference to reach agreement on German reunification. The Chief Burgomaster (Dr Suhr) declared that " the world will not find peace until Germany is unified," and appealed to the world to allow the German people the right of self-determination guaranteed to all peoples under the U.N Charter Speeches in support were made by the chairman of the West Berlin trade unions, the president of the West Berlin City Assembly, and other prominent personalities.

While the Geneva Conference was in progress, the East German Government presented on Nov. 1 proposals for German reunification which were virtually identical with those introduced by M. Molotov.

The proposals envisaged, *inter alia*, an All-German Council to bring about a *rapprochement* between the Democratic and Federal Republics , direct negotiations between the East German *Volkskammer* and the West German *Bundestag* for the creation of such a council , the eventual reunification of Germany on the basis of merging the existing capitalist and communist economies, so that the united country would contain both types of enterprise ; and military neutrality between the East and the West. The proposals were planned to run concurrently with the security pact proposed by M. Molotov, and were accompanied by a letter protesting at the exclusion of the East German Government from the conference and reserving its right to participate in future conferences on Germany. The East German proposals—described by Mr Macmillan as a *Diktat*—were rejected by the Western Foreign Ministers.

On the same day on which these proposals were presented (Nov. 1), the central committee of the Socialist Unity Party in Eastern Germany issued a statement declaring that there could be no question " in present circumstances " of holding all-German elections as a prelude to the reunification of Germany. After denouncing Western Germany's membership of NATO and the W.E.U., and the plans for West German rearmament, it went on to declare that all-German elections were being proposed by the Western Powers " to enslave the German people in preparation for a third world war " , that the status of a united Germany must be settled before reunification took place, on the basis of the " successful struggle of the German people to combat militarism in Western Germany " ; and that German reunification should be accompanied by the establishment of a European collective security system The statement emphasized that the East German Government would be prepared to negotiate with Western Germany only on a basis of equality, and that it would not surrender any of the " achievements of the German Democratic Republic."

Dr. von Brentano visited Geneva on Nov. 8 for discussions with Mr. Dulles, Mr. Macmillan and M. Pinay, and subsequently reported to the Federal Cabinet. On the previous day Mr. Dulles had had a meeting in Geneva with Herr Ollenhauer (the leader of the German Social Democratic Party), who, it was understood, discussed with the Secretary of State his party's attitude to the question of German reunification.

A. FRANCE. — Arms Shipments resumed to Egypt.

It was announced in Paris on Nov. 13 that France would resume deliveries of arms to Egypt, which had been temporarily suspended for two months owing to the hostile tone of Cairo broadcasts to French North Africa. A spokesman of the Quai d'Orsay said that the decision resulted from an improvement in Franco-Egyptian relations ; that the arms shipments to Egypt—details of which were not given—all arose out of contracts which were more than a year old ; and that similar shipments to Israel had not been and would not be disrupted.

An article in *Le Monde* (Nov. 14) said that the easing of tension in Morocco had led to a " more normal basis " in the relations between France and the Arab States It added in this connexion : " It must be stated . . . that the amelioration of our relations with the Arab States is in no way directed against Israel. Relations with that country remain what they have always been—cordial. It is not our intention to favour one side to the detriment of the other , this explains the continuation of the normal deliveries promised to Israel."

For some weeks beforehand the Egyptian press and radio had adopted a more moderate tone in their comments on the North African situation, and had ceased to attack France and French policy.—(Le Monde, Paris) **(Prev. rep. 14452 B.)**

B. UNITED KINGDOM. — British Transport Commission accepts Principle of Equal Pay for Women Employees of British Railways.

The British Transport Commission announced on Oct. 6 that, as a result of negotiations with the Transport Salaried Staffs Association and the National Union of Railwaymen, it would be " prepared to agree in principle to the introduction by stages of equal pay for equal work as between men and women in the administrative, technical, and clerical staffs of British Railways." The Commission stressed, however, that the proposal was " subject to the clear understanding that it will apply only to those posts where there is equal responsibility in all respects."

It was stated in the Press that about 20,000 women were employed in the grades affected, compared with about 75,000 men. At present women received about four-fifths of the men's rate, but it was " extremely unlikely " that all of them would qualify for equal pay. Proposals for implementing the scheme were being worked out, and it was hoped to introduce it early in 1956 on the basis of reaching parity between men's and women's scales by seven yearly instalments.

The British Transport Commission is the first body controlling a nationalized industry to follow the lead of the Civil Service in granting the principle of equal pay.—(Times)

C. UNITED STATES - SOVIET UNION. — Exchange of Books and Periodicals.

Mr. Martin E. Malia, Assistant Professor of Russian History at Harvard University, announced in Moscow on Oct. 27 that, for the first time since the end of World War II, major research libraries throughout the Soviet Union had agreed to exchange books and newspapers with comparable U.S. institutions. Professor Malia, who was visiting the Soviet Union on behalf of the Library of Congress and a group of U.S. universities (including Harvard, Yale, Columbia, and the University of California), said that the U.S. institutions would supply their own publications and such representative American newspapers as the *New York Times* to research libraries in Moscow, Leningrad, Kiev, Tiflis, Erivan, Baku, Tashkent, and Alma Ata. In return, they would receive publications of university and scientific bodies in those cities, as well as Soviet provincial newspapers. He added that although Harvard had been sending 300-400 volumes annually to the U.S.S.R. since the end of the war, the supply of Soviet publications to the U.S.A. had hitherto been " totally inadequate." (New York Times)

A. TURKEY. — Cabinet Appointments and Resignations. - Split in Democratic Party. - "Freedom Party" formed by Dissident Democrats.

The Turkish Minister of the Interior, M. Namik Gedik, resigned on Sept. 8 following the anti-Greek riots in Istanbul, Izmir, and Ankara two days earlier. M. Ethem Menderes, the Defence Minister, resigned from that post on Sept. 16 and was appointed Minister of State in succession to M. Osman Kapani, who had previously tendered his resignation, the Defence portfolio was taken over by Professor Koprulu, who retained the posts of Deputy Premier and Minister of State. On Sept. 30, however, M. Ethem Menderes was appointed Minister of the Interior and M. Fahrettin Ulas became Minister of State.

A crisis within the Democratic Party (the Government party) came to a head at its national congress, which was held in Ankara on Oct. 15-16.

The congress decided on Oct. 15 to expel nine deputies who had urged the repeal of a Government-sponsored Press law which made it a criminal offence for newspapers to insult or undermine the prestige of the Government or of Government officials, and which denied newspapers the right to present evidence supporting the authenticity of their allegations in criminal libel cases brought against them. The expelled deputies included M. Karaosmanoglu, a former Minister of the Interior, and M. Ustundag, a former Minister of Health. Twelve other Democratic deputies subsequently resigned from the party in sympathy with those expelled.

M. Karaosmanoglu, the leader of the dissidents, sent a letter to M Adnan Menderes (the Prime Minister) accusing him of "dictatorial methods" and alleging that nothing had changed since the Popular Party had been replaced by the Democratic Party He added. "The same totalitarian regime exists, if anything it is worse. The Democratic Party came to power pretending freedom Now, even within the party, there is no freedom."

M. Menderes, in his opening address to the congress, had stressed the necessity for Turkey to maintain her national unity and, while promoting free institutions, to be watchful lest freedom should degenerate into anarchy For this reason, he said, the Democratic Party must maintain strong discipline within its own ranks and see to it that the right of criticism and free discussion should not undermine national unity.

In his closing speech to the congress, M Menderes accused the dissident Democratic deputies of having tried for a long time to sow discord within the party, and of having used the Press legislation as a pretext to put the Government in a difficult position The Government's position, however, was stronger than ever, and they were quite prepared if necessary to hold a new general election to test the confidence of the Turkish people

M. Menderes was re-elected leader of the Democratic Party by an almost unanimous vote.

The 21 former Democrats who were expelled from the party, or who had resigned in sympathy with the expellees, constituted themselves on Nov. 19 as a new political group under the name of the Freedom (*Hurriyet*) Party. They issued a statement of policy which laid special emphasis on the introduction of truly democratic institutions in Turkey, including the independence of the judiciary and freedom of the Press; political impartiality in administration and the police; and a non-partisan broadcasting system. As a result of the secession, there are now five political parties in Turkey: the Democratic Party, which has been in power since 1950; the People's Party, which was in power from 1923 to 1950; the National Party, which has three members in the Grand National Assembly; the Peasant Party, which is unrepresented in Parliament; and the new Freedom Party, with 21 members in Parliament.

Prior to these developments, the secretary-general of the People's Party (the principal Opposition party), M. Kasim Gulek, had been arrested on a public prosecutor's warrant on Aug. 13 but was provisionally released three days later.

It was officially announced that the charges against M. Gulek related to a statement made by him at a press conference in which he had said: "We have decided . . . to abstain from participating in the forthcoming local elections, and wish circumstances were different, allowing us to take part in those elections They [meaning the Democrats] know better than we do how they won the 1954 general election; I much prefer not to say anything more on this subject." The public prosecutor charged that this remark implied that the last general election had been conducted unfairly and that therefore the present Grand National Assembly did not represent the Turkish people.

Professor Köprülü, speaking in Ankara on Aug. 13, had accused the Opposition of systematic misrepresentation of facts and of a deliberate attempt to disrupt public order. Such an attitude, he added, trespassed on the limits of legitimate opposition and verged on high treason, and the Government was determined to take drastic measures against anyone who tried to undermine the country's political and economic stability. (Turkish Embassy Press Bulletin, London - Times - Le Monde) **(Prev. rep. Cabinet, 14384 E; Democratic Party, 13597 A.)**

B. UNITED STATES. — Navy. - Launch of U.S.S. "Saratoga." - Commissioning of U.S.S. "Forrestal" and Guided Missile Cruisers.

The aircraft-carrier *Saratoga* (59,600 displacement tons), the most powerful warship in the world, was launched on Oct. 8 by flooding the dry-dock at the New York Navy Shipyard. The *Saratoga*, the sixth U.S. warship to bear the name, is a sister-ship of the *Forrestal* (which was commissioned on Oct. 2, 1954) but will develop greater horsepower. When completed she will have cost about $207,000,000.

The first U.S. warship to carry anti-aircraft guided missiles —the 13,600-ton cruiser *Boston*—was re-commissioned at the Philadelphia Navy Yard on Nov. 1. A sister-ship—U.S.S. *Canberra*—is also being converted as a guided missile warship, and will be re-commissioned for this purpose during 1956. The commanding officer of the *Boston* disclosed that the missiles had a range of 20 miles, were able to "home" on their target by a radar device, and possessed a high rate of fire, being fitted with an automatic loading device.

The U.S. Chief of Naval Operations (Admiral Burke), speaking at the re-commissioning of the *Boston*, said that the U.S. Navy would have an atomic-powered surface fleet within two years, and that it was intended to "extend nuclear power . . . to guided-missile cruisers, frigates, and aircraft-carriers," in addition to atomic-powered submarines such as the *Nautilus* and her sister vessels. He also stated that the giant aircraft-carrier *Forrestal* would carry "very effective" air-to-air guided missiles, as well as "any one of many types of atomic weapons," and that the first guided-missile squadron of the U.S. Navy would comprise the *Boston*, *Canberra*, and another cruiser at present undergoing conversion.

It was disclosed by Admiral Burke that the *Boston* carried guided missiles of the type known as "Terriers." In addition, the Navy possessed the supersonic air-to-air "Sparrow"; the surface-to-surface missile known as the "Regulus", carried in submarines, cruisers, and aircraft-carriers; and the air-to-underwater missile known as the "Petrel." With these developments, and the application of nuclear power, the U.S. Navy would soon "pack a terrific wallop."—(New York Times - New York Herald Tribune) **(Prev. rep. 13976 B; 12349 D.)**

C. RHODESIA AND NYASALAND FEDERATION. — Federal and Southern Rhodesian Cabinets.

The complete membership of the Governments of the Federation of Rhodesia and Nyasaland and of Southern Rhodesia is given below.

Rhodesia and Nyasaland Federation.

Viscount Malvern ..	Prime Minister, External Affairs, and Defence.
Mr. D. Macintyre ..	Finance.
Sir Roy Welensky ..	Transport and Communications.
Sir Malcolm Barrow ..	Commerce and Industry, and Power.
Mr. J. M. Greenfield ..	Law and Education.
Mr. J. M. Caldicott ..	Agriculture and Health.
Mr. F. S. Owen ..	Home Affairs.

Southern Rhodesia.

Mr. R. S. Garfield Todd	Prime Minister.
Mr. P. B. Fletcher ..	Native Affairs.
Mr. G. A. Davenport* ..	Mines, Lands and Surveys.
Mr. C. J. Hatty ..	Treasury.
Mr. G. Ellman-Brown ..	Roads and Road Traffic, Irrigation, and Housing.
Mr. A. R. W. Stumbles	Justice and Internal Affairs.

* In a letter to the Prime Minister dated Oct. 31, Mr. Davenport asked to be released from the Cabinet as he wished to retire Mr. Todd, in reply, asked Mr. Davenport to remain in office until the end of January 1956, "by which time I hope to have the work of Government reorganized under five ministries."

Although there were no changes in membership, the various portfolios held in Southern Rhodesia show a number of changes from those given in previous articles.—(Federal Information Department, Salisbury) **(Prev. rep. Federal Cabinet, 14151 C; 14279 C; 13856 A; 13333 A; 13133 A; Southern Rhodesian Cabinet, 13950 A; 13399 D.)**

D. FRANCE. — New Paris Daily Newspaper.

L'Express, hitherto a well-known weekly, appeared for the first time on Oct. 13 as a Paris daily newspaper. Politically a "Left-Centre" organ, it gives strong support to M. Mendès-France and will carry regular signed leaders by him. The editor is M. Jean-Jacques Servan-Schreiber, who also edited the paper when it was a weekly. (Le Monde, Paris)

A. UNITED KINGDOM. — Press. - "Daily Mirror" Group acquires Controlling Interest in Glasgow Newspapers. - "Daily Mirror" and "Sunday Pictorial" to publish Manchester Editions. - "Daily Dispatch" taken over by "News Chronicle." - "Sunday Chronicle" ceases Publication.

Daily Mirror Newspapers Ltd., and its associated company Sunday Pictorial Newspapers Ltd., jointly announced on Nov. 9 that they had acquired from Kemsley Newspapers Ltd. the controlling interest in Scottish Daily Record and Evening News Ltd. of Glasgow, publishers of the *Daily Record, Glasgow Evening News,* and *Sunday Mail.* The announcement added that the three newspapers would "retain their distinctively Scottish character" and that Mr. C. B. Livingstone, who had been associated with Kemsley Newspapers for 31 years, would remain managing director. Kemsley Newspapers Ltd. stated on the same day that it was retaining a financial interest in the three Glasgow papers.

It was also announced on Nov. 9 that Kemsley Newspapers Ltd. had signed a 10-year contract with the Daily Mirror group for the printing of Northern editions of the *Daily Mirror* and *Sunday Pictorial* in Manchester. On the same day Kemsley Newspapers Ltd. informed the printing trade unions that publication of the company's Manchester daily newspaper, the *Daily Dispatch,* would cease from a date still to be decided, and that its two Sunday papers in Manchester, the *Sunday Chronicle* and *Empire News,* would be amalgamated under the latter name.

The *Daily Dispatch* was founded by Mr. (later Sir) Edward Hulton in 1900. By devoting special attention to the business and commercial interests of Manchester and the surrounding industrial area, it eventually acquired the largest circulation of any provincial daily newspaper. It was sold by the Hulton interests to the first Lord Rothermere in 1923, and was acquired by Allied Newspapers Ltd.—later renamed Kemsley Newspapers Ltd.—in 1924. The present circulation figure is about 463,000.

The *Sunday Chronicle,* founded by the first Mr. Edward Hulton in 1885 as a weekly, with special emphasis on sporting news, acquired a strong political flavour (Socialist) between 1887-1891, when Robert Blatchford contributed a daily column, and built up a large circulation. The paper subsequently developed along similar lines to other popular Sunday newspapers, and was acquired by Allied Newspapers Ltd. in 1924. After the incorporation of the *Sunday Referee* in 1939 the circulation of the *Sunday Chronicle* increased considerably, but subsequently dropped sharply. Its present circulation is about 830,000.

The *Empire News,* founded in 1917, has a present circulation of about 2,049,000

It was announced on Nov. 21 that the title, goodwill, and relevant copyrights of the *Daily Dispatch* had been bought from Kemsley Newspapers by the Daily News Ltd., proprietors of the *News Chronicle.* From the same date the Northern editions of the *News Chronicle* (published in Manchester) were published as the *News Chronicle and Daily Dispatch,* incorporating many *Daily Dispatch* features.

The acquisition of the Glasgow group of newspapers and the arrangements made for publishing Northern editions of the *Daily Mirror* and *Sunday Pictorial* in Manchester marked a new departure for the Daily Mirror group, which had hitherto had no publishing interests in Great Britain outside London. In other Commonwealth countries, however, the group has for some years controlled the *Melbourne Argus* (daily) and *Australian Post* (weekly), as well as three newspapers in Nigeria, two in the Gold Coast, and one in Sierra Leone. It also has a controlling interest in large pulp and paper mills in Quebec and Ontario.

Owing to increases in printers' wages and other production costs, the prices of the *News Chronicle, Daily Herald,* and *Daily Mirror* were raised from 1½d. to 2d. from Sept. 19, that of the *Daily Worker* from 2d. to 2½d. from Oct. 10, and that of the *Observer* from 3½d. to 4d. from Oct. 23. The increases were described as "the most widespread increases in the prices of London newspapers since May 1951."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Kemsley Group, 12625 B; Newspaper Prices, 11472 A.)**

B. SYRIA - SOVIET UNION. — Trade and Payments Agreement. - Legations raised to Embassy Status.

A one-year trade and payments agreement was signed in Damascus on Nov. 16 providing for Syrian exports to the U.S.S.R. of cotton, wool, tobacco, vegetables, and dried fruits, against Russian deliveries to Syria of motor vehicles, tractors and other agricultural machinery, wood-pulp, and various non-industrial products. The two countries also agreed to raise their respective Legations in Damascus and Moscow to the status of Embassies. (Neue Zürcher Zeitung)

C. INDONESIA. — Visits of Malayan and Singapore Government Missions. - Cultural and Economic Agreements.

A goodwill mission from the Federation of Malaya, led by the Malayan Prime Minister, Tengku Abdul Rahman, visited Indonesia from Nov. 8-16. During its stay in Jakarta, Tengku Abdul Rahman had talks with the Indonesian Foreign Minister, Anak Agung Gde Agung, and other members of the Indonesian Government. A joint communiqué issued on Nov. 14 said that the mission had "helped to strengthen the bonds of brotherhood between the two peoples," and announced the following agreements between the two Governments:

Culture and Education. Both Governments would co-operate in efforts to develop the Indonesian language (*Bahasa Indonesia*) and the Malayan language (*Bahasa Malayu*) with the eventual aim of fusing the two languages They would also exchange educational and linguistic experts, cultural and educational material, and exhibitions

Agriculture. The two Governments had agreed "in principle" on the exchange of technical information in agriculture; the exchange of agricultural experts, and the exchange of information on the cultivation and processing of rubber.

Commodities. The two Governments would also attempt to co-operate in the international sphere, with particular reference to tin and rubber; to arrange for consultations on the development of tin production; and to improve trade relations between North Sumatra and Penang.

The Indonesian Foreign Ministry announced on Nov. 14 that the Indonesian Consulate in Kuala Lumpur (the capital of the Malayan Federation) would be raised to the status of a Consulate-General.

The Malayan mission's visit was preceded by a mission from Singapore, which stayed in Jakarta from Sept. 8-12 and was headed by Mr. David Marshall, the Chief Minister of Singapore.

After discussions between the mission and members of the Indonesian Government, a joint communiqué was issued on Sept. 12 stating (*a*) that a full-scale economic mission from Singapore, in conjunction with one from the Malayan Federation if the latter desired, would visit Indonesia in December; (*b*) that both sides had agreed to reconsider certain regulations affecting their present trade relations, including foreign exchange regulations and the restriction of exports of rubber from Sumatra.

The Singapore Government also agreed to the opening of a branch of the Indonesian State Bank in Singapore, whilst Indonesia expressed the wish for the appointment of a Singapore Trade Commissioner in Jakarta, with a view to establishing permanent trade relations between Indonesia and Singapore. (Indonesian Embassy, London - New Commonwealth)

D. SPAIN - UNITED STATES. — Mr. Dulles's Visit to Madrid. - Meeting with General Franco.

At the invitation of the Spanish Government, Mr. Dulles flew on Nov. 1 from Geneva—where he was attending the Foreign Ministers' Conference—to Madrid, where he had discussions with General Franco during the course of a five-hour visit.

A communiqué issued by the Spanish Foreign Ministry said that Mr. Dulles and General Franco had reviewed "the principal problems which affect the peace and security of the free nations," and had found themselves in mutual agreement on these questions. It added: "Discussions were also held on matters within the framework of the agreements on mutual defence assistance, economic aid, and defence support concluded between Spain and the United States in 1953. The meeting affirmed the spirit of collaboration which resulted in the signing of these agreements between the two countries."

The Secretary of State was accompanied by Mr. Livingston Merchant, Assistant Secretary of State for European Affairs, and Mr. John D. Lodge, the U.S. Ambassador in Madrid. On the Spanish side, the Foreign Minister (Señor Artajo) and the Ministers of Commerce, Agriculture, War and Air took part in the discussions in addition to General Franco.
(New York Times) **(Prev. rep. 14185 C; 13527 B; 13157 A.)**

E. PAKISTAN. — Civil Aviation Agreements with Syria and Turkey.

An agreement between Pakistan and Turkey for the establishment of a direct air link beteen Ankara and Karachi was signed on Nov. 2. An air agreement between Pakistan and Syria had been concluded at the end of October.
(Pakistan High Commissioner's Office, London)

F. NATIONALIST CHINA. — Ending of State of War with the German Federal Republic.

Nationalist China formally ended the state of war with the German Federal Republic on Oct. 27.—(New York Times) **(Prev. rep. 4921 A.)**

A. UNITED KINGDOM. — Aircraft Industry. - Government Decision to abandon Vickers-1000 Jet Transport. - Fighter Aircraft Development. - Future Aircraft Policy. - Abandonment of "Princess" Flying-boat. - British, U.S., and Canadian Collaboration on Long-range Turbo-prop Airliner.

The Ministry of Supply announced on Nov. 11 that the Government had decided to abandon both the military and civil versions of the *Vickers-1000* long-range jet transport aircraft, and had cancelled orders already placed for one prototype and six further aircraft for Transport Command. Instead, Transport Command would acquire six *Britannia* Mark-250 aircraft of the long-range type, to be built by Short and Harland, Ltd.

The announcement explained that it had taken longer than anticipated to overcome certain problems in connexion with the specifications laid down for the *V-1000*: that there was an urgent need to re-equip Transport Command; and that the long-range *Britannia* could be made available earlier. Also, it was not intended to develop a civil version of the *V-1000*, since the B.O.A.C. had no use for it.

A Ministry spokesman stated that the *V-1000* had originally been conceived as a military transport, but with a civil application, in development, however, its weight had grown so fast that it had outstripped engine capacity, although this also had increased. Its civil application depended on potential customers, and B.O.A.C had decided to base its transatlantic operations on the *Comet IV* and the long-range *Britannia*.

It was stated in the Press that the prototype of the *Vickers-1000* would have been ready to begin trial flights in 1956, and that the civil version, the *VC-7* (the specification of which had been developed in conjunction with B.O.A.C), would have been designed for non-stop transatlantic crossings, carrying 100 first-class or 150 tourist-class passengers at a high subsonic speed. The Government's decision meant that for some years ahead Britain would have no long-distance turbo-jet airliner capable of making non-stop transatlantic crossings, whereas the two new U.S jet airliners recently ordered by Pan-American Airways—the *Douglas DC8* and *Boeing 707* (see 14483 B)—were expected to be able to do so. Another result of abandoning the *Vickers-1000* would be that there would be no aircraft specially designed to use the Rolls-Royce *Conway* engine, the first large "by-pass" jet engine to be produced in any country, though it was possible that this engine might later be fitted to one of the V-class bombers.

Mr. G. R. Edwards, managing director of Vickers-Armstrong, declared on Nov. 11 that by the Government's decision Britain had "abandoned to the Americans without a struggle a highly important market," the future size of which "could be of the order of £19,000,000," and that this was "a decision we shall regret for many years." The *V-1000*, he added, could have been available by 1960 and could have been "better in some ways than the American aircraft because the *Conway* engine around which it is built is better than the American engine." Moreover, it would have been able to fly the Atlantic in a westbound direction, whereas "with 100 passengers the Americans, in our view, are unlikely to have engines capable of the non-stop westbound Atlantic crossings before that date."

A Ministry of Supply statement reviewing recent British progress in military and civil aviation, and outlining policy for the British aircraft industry, was also published on Nov. 11. Its main points are summarized below:

Rocket Interceptor Aircraft. Two new fighters—the *Saunders-Roe SR-53* and the *Avro-720*—had been evolved powered by combined jet engines and rockets, but it had been decided to concentrate on the development of the *SR-53*.

[It was explained in the Press that the object of using "mixed" power plants was to improve the performance of interceptor fighters, particularly at very high altitudes. Aircraft thus equipped would show exceptional performances in take-off, climb, forward speed, acceleration, operating altitude, and manoeuvrability in the stratosphere. Whereas the power of jet engines fell off seriously at great heights, the thrust of rockets improved with altitude, and by using the jet engines for the take-off and early part of the climb, and adding the rocket thrust when the rate of climb began to deteriorate seriously, the time taken to gain height to intercept bombers could be considerably reduced. Alternatively, the climb could be performed by the jet engine alone, and the rocket fuel conserved for extended combat at high altitudes.]

The P.1. Jet Fighter and Fairey Delta Research Plane. These aircraft had both attained supersonic speeds in climbs as well as in level flights. The *P-1* would be followed by a fighter developed from the *SR-53* rocket-jet plane (see above).

The Javelin Delta Wing All-Weather Fighter. Development troubles had been solved, and these aircraft would shortly be released for service.

Future Policy. Development and production of both airliners and R.A.F. transports would be concentrated on turbine-propeller (turbo-prop) types, and development of "pure jet" airliners would be suspended for the time being. Research and development of jet engines would, however, be continued, and much research was now in progress on supersonic aircraft. Aircraft production in Britain had increased 2½ times in the past five years, but now that R.A.F. expansion had reached its peak the industry would have to face a big contraction in military orders over the next few years.

The Government's decision in 1954 to suspend work on the development of the *Princess* flying-boat was disclosed in the report of the Comptroller and Auditor-General (Sir Frank Tribe), published on March 14, 1955.

After recalling that the original estimate of the cost of building three large flying boats, including engines, had been about £2,800,000, the report explained that the estimate had increased to £4,500,000 by the end of 1947 and to £10,800,000 by June 1950. Work on the second and third airframes had been suspended in 1952, and they had been "cocooned" and stored. When the first flying boat was tested in 1954 it had been decided that its *Proteus* engines would have to be developed further, but as this could not be done without delaying development of the engines of other super-priority aircraft, the *Princess* project had been shelved. Total expenditure on the main contracts up to March 31, 1954, had amounted to over £8,000,000, and some further expenditure had been incurred since then.

The Bristol Aeroplane Company announced on Nov. 21 plans for Anglo-U.S.-Canadian collaboration to produce a long-range turbo-prop aircraft capable of flying the Atlantic non-stop.

The announcement said: "The Bristol Aeroplane Co., Ltd. and the U.S. General Dynamics Corporation announce that, following discussions between Bristol, Convair, and Canadair in London, Montreal, and New York, progress has been made towards long-term collaboration of their aviation interests, including, as a first stage, work on a joint specification for a new exceptionally long-range transport aeroplane." It was explained that the new aircraft would be "in the 500 m.p.h. class"; that it would be designed around four Bristol *BE-25* turbo-prop engines, and that a joint engineering group working at San Diego, with the background of the experience of the Bristol Company on the long-range *Britannia*, would complete the technical specification in January 1956.

The statement added that the three companies intended that the aircraft and engines should be produced on both sides of the Atlantic.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Vickers-1000, 12904 A; U.S. Jet Airliners, 14483 B; "Princess" Flying Boats, 12541 A; Aircraft Developments, 14397 A.)**

B. SOVIET UNION. — Executions in Georgia.

It was announced on Nov. 22 by Tiflis Radio that six leading security officials in Georgia, including two former Ministers of the Georgian Soviet Republic, had been executed after having been found guilty on charges of "high treason," terrorism, and counter-revolutionary activity." The persons concerned were N. M. Rukhadze, formerly Minister of Internal Security; A. N. Rapava, formerly Minister of State Control; Tsereteli, a former Deputy Minister of Internal Security; Stavitsky and Khazani, police prosecutors; and Kriman, a police interrogator. Two others were sentenced to life imprisonment. All the condemned persons were said to have been supporters of the late Lavrenti Beria, who was executed in December 1953.

Two of the condemned men, Rukhadze and Rapava, had held high office in Georgia for many years before their downfall. Rukhadze, formerly a member of the Georgian Politburo, had been arrested in March 1953—a month after Marshal Stalin's death—and was succeeded as Minister of Internal Security by M. Dekanozov, who, in turn was "purged" at the time of Beria's arrest and later executed. Rapava was removed by Rukhadze in 1952 from the post of Minister of Justice on the ground of "criminal offences against the State," but was subsequently reinstated by Beria as Minister of State Control after it had been announced that the earlier charges against him were "fabricated." In July, 1953, Rapava was again arrested for "loyalty to Beria."—(Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Georgia "Purges," 13468 A; 13029 A; Beria, 13363 A; Abakumov, 13978 A.)**

C. INDIA - PAKISTAN. — Canal Waters Dispute. - New Interim Agreement.

The Governments of India and Pakistan announced on Nov. 3 that a new interim agreement covering the winter cropping period had been signed in Washington on Oct. 31 by the leaders of the delegations of the two countries which were negotiating on the division of the waters of the Indus river system. The new agreement continued from Oct. 1, 1955 to March 31, 1956, the arrangements establishing *ad hoc* amounts for additional canal withdrawals by India from the three eastern rivers (the Ravi, Beas, and Sutlej) on similar lines to those laid down by the previous agreement, which expired on Sept. 30. The announcement also stated that the terminal date for the discussions on the preparation of a comprehensive plan had been extended to March 31, 1956, by agreement between the two Governments and the International Bank. (Indian and Pakistani High Commissioners' Office, London - International Bank, Washington) **(14303 A; 14484 D.)**

A. UNITED KINGDOM. — Trade Unions. - Recognition as Legal Entities. - The Bonsor Case.

The House of Lords unanimously ruled on Nov. 7 that trade unions constituted legal entities distinct from their individual members, and could therefore be effectively sued by members for breach of contract. The decision arose out of the rejection by the courts of a claim for damages by a Mr. Harry Bonsor (who had since died) against the Musicians' Union, which had expelled him. Mr. Bonsor had based his claim on the ground that, as the union was a "closed shop" union, he had been unable to obtain any employment as a musician after his expulsion, and had been obliged to seek entirely different work. The case was subsequently brought before the House of Lords by Mr. Bonsor's widow, who appealed against the decision of the Court of Appeal.

Lord Morton of Henryton, giving the decision of the House of Lords, said that the Court of Appeal had dismissed Mr Bonsor's claim for damages because they held themselves to be bound by an earlier decision of the Court of Appeal in *Kelly v National Society of Operative Printers and Assistants* (1915) He was, however, of the opinion that Kelly's case had been wrongly decided in so far as the plaintiff's claim for damages was rejected The basis of that decision was that the plaintiff had contracted, not with the trade union—which was merely an unincorporated society of individuals—but with each and every one of its members, including himself, so that if he sued the trade union for the act of one of its agents he was suing himself among others. In his (Lord Morton's) opinion, however, Kelly's case was an action by a member against his union as an entity recognized by the law, and distinct from the individual members thereof, for breach of a contract between the plaintiff and his union. If that was so, there was no foundation for the refusal of damages

After quoting the Taff Vale case (1901) and other precedents in support of his argument, Lord Morton of Henryton said that the authorities quoted had led him to the following conclusions

(1) The Musicians' Union, though it was not an incorporated body, was capable of entering into contracts and of being sued as a legal entity, distinct from its individual members.

(2) When Mr. Bonsor applied to join the union, and his application was accepted, a contract came into existence between him and the union whereby he agreed to abide by the rules of the union, and the union agreed, by implication, that he would not be excluded by the union or its officers otherwise than in accordance with the rules.

(3) The union had broken this contract by wrongfully expelling Mr Bonsor, and he was suing the union as a legal entity. Mr. Bonsor was not suing all the members of the union at the date of the writ other than himself (many of whom must have joined since the breach of contract), or all the members of the union including himself.

(4) There was no reason in law why Mr. Bonsor should not be granted against the union all the remedies appropriate to a breach of contract.

(5) The Court of Appeal in Kelly's case should have awarded damages to the plaintiff.

The appeal by Mr. Bonsor's widow having been granted, the case was remitted to the Chancery Division for the assessment of damages. (Times - Manchester Guardian)

B. NEW ZEALAND. — Sale of Government Shareholding in British Petroleum Company of New Zealand.

It was announced in Wellington and London on Nov. 15 that the New Zealand Government was selling its 51 per cent shareholding in the British Petroleum Company of New Zealand to the British Petroleum Company of London, at par.

Mr. J. Watts, the N.Z. Minister of Finance, stated that the additional finance required by B.P. of New Zealand for development meant that the Government had either to increase its investment in the company, or to withdraw from it. After careful consideration they had decided to withdraw, and the additional finance would now be found from the existing resources of the group.

The N.Z. Government hold 1,275,000 £1 shares in the company, which was formed in 1946 to import, store, and distribute petroleum products. (Financial Times)

C. PAKISTAN. — Left-hand Driving to continue.

It was announced in Karachi on Nov. 9 that, on reconsidering the matter, the Pakistani Government had decided that left-hand driving should continue in Pakistan. It accordingly rescinded its earlier decision to change over to right-hand driving as from Jan. 1, 1956.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14390 D.)**

D. EGYPT - HUNGARY. — Full Diplomatic Relations.

It was announced in Cairo on Oct. 24 that the Egyptian and Hungarian Governments had decided to exchange Ministers Plenipotentiary. Hitherto their respective diplomatic missions in Budapest and Cairo had been headed by Chargés d'Affaires. (Le Monde, Paris)

E. UNITED STATES - YUGOSLAVIA.—Mr. Murphy's Belgrade Visit. - Mr. Dulles's Meeting with Marshal Tito.

Mr. Robert Murphy, U.S. Deputy Under-Secretary of State, visited Belgrade from Sept. 26 to Oct. 3 for discussions with President Tito and other Yugoslav leaders and officials. The talks dealt with U.S.-Yugoslav relations in the light of the recent improvement of Yugoslavia's relations with the Soviet Union, and with misunderstandings between the two countries resulting from U.S. insistence on the inspection of the use to which her military aid to Yugoslavia was put.

A joint communiqué said that there had been a "frank and fruitful discussion of a wide range of problems of mutual interest to Yugoslavia and the United States," as a result of which "differences of opinion had been ironed out and a clearer understanding of reciprocal positions reached" This had been achieved in "a very cordial atmosphere" and would establish "a solid basis for future co-operation between the two countries." The communiqué added . "The meetings gave further evidence of the co-operation of the two countries and of the confidence and mutual respect which has been established between them in recent years"

Mr. Murphy stated at a press conference that the controversy over the inspection of U.S. arms deliveries to Yugoslavia had been caused by a misinterpretation of the word "inspection", that the U.S.A. in no way wished to "dominate" the Yugoslav forces , and that a "completely satisfactory formula" had been found to settle the dispute. He also stated that Yugoslavia had asked for further supplies of U.S. wheat, and announced that Yugoslav scientists would visit the U.S.A. to study the industrial uses of atomic energy.

Mr. Dulles, the U.S. Secretary of State, flew on Nov. 6 from Geneva (where he was attending the four-Power Foreign Ministers' conference) to Yugoslavia for discussions with President Tito on Brioni Island.

On the eve of the meeting, Mr. Dulles broadcast a message over Belgrade Radio in which he said : "Yugoslavia's fight to win and keep her independence is a dramatic chapter in history. Your country has made it clear that it will be no-one's satellite. We applaud this stand. You want to be independent, to progress, and to be free to choose your destiny. That is what we Americans also want for Yugoslavia, for ourselves, and for every nation That creates a common bond between our peoples, a bond which I hope will grow ever stronger."

Although no communiqué was issued after the Brioni meeting, it was understood that Mr. Dulles had reported to President Tito on the progress of the Geneva discussions, and that the two statesmen had also considered other international questions, including the Middle East and the Soviet "satellite" countries of Eastern Europe. Mr. Dulles stated that he and the President had found a "common accord" in recognizing the principles of independence for the Eastern European "satellites," of non-interference in the internal affairs of those countries, and of their right to develop their own social and economic systems in ways of their own choosing.
(Tanjug Agency, Belgrade - New York Times) **(14358 A.)**

F. FRENCH MOROCCO. — Moslem Population.

Detailed results of a census of the Moslem population of French Morocco, taken in 1952 and published on July 2, 1955, showed that it numbered 7,442,110 (3,691,180 males and 3,750,930 females), of whom 5,770,480 were living in rural areas and the remainder in urban areas. The Moslem population of Casablanca (the largest city) was 472,020, out of the city's total population of 682,388. Nearly 48 per cent of the Moslem population (3,563,790) were under 20 years of age, 3,362,715 between 20 and 60, and 515,605 over 60. (Le Monde, Paris) **(Prev. rep. 13315 E.)**

G. SOUTH AFRICA. — South-West Africa Elections.

Elections to the South-West Africa Legislative Assembly were held on Nov. 16 and resulted in an overwhelming victory for the National Party, which increased its representation by winning Swakopmund from the United Party. The state of the parties in the new Assembly will therefore be : Nationalists, 16 ; United Party, two—compared with 15 and three previously. Of the 28,000 voters in the territory—all White—70 per cent are Afrikaners, 22 per cent German-speaking, and eight per cent English-speaking.—(Times - Daily Telegraph) **(11076 A.)**

H. SWIMMING. — New Cross-Channel Record.

The record of 14 hours 6 minutes for the England-to-France swim, set up in August by Mr. William Pickering, was beaten on Oct. 11 by Miss Florence Chadwick, of California, who swam from Dover to Calais in 13 hours 55 minutes and thus beat Mr. Pickering's time by 11 minutes. The new record was officially recognized by the Channel Swimming Association.

NOVEMBER 26—DECEMBER 3, 1955

A. ARGENTINA. — Coup d'Etat. - General Lonardi displaced as President by General Aramburu. - Cabinet Changes. - Ex-President Perón's Flight to Panama. - Dr. Prebisch's Report on Argentina's Economic Position. - Peso Devaluation. - "La Prensa" returned to Paz Family.

General Eduardo Lonardi, who had been Provisional President of Argentina since the overthrow of the Peronista regime, was himself deposed in a bloodless *coup d'état* on Nov. 13 and was succeeded by General Pedro Eugenio Aramburu, Chief of the General Staff. The coup was organized by political and military leaders of liberal convictions, after increasing criticism of the over-tolerant attitude of President Lonardi towards former Peronista supporters and of the appointment of ultra-nationalistic Roman Catholic Ministers to his Cabinet. Matters first came to a head on Nov. 9, when General Bengoa, the Minister of War, was dismissed and replaced by Colonel Ossorio Arana. General Bengoa had been criticized by liberal elements for his slowness in investigating alleged corruption in the Army, and for his wish that such investigations should not be pursued too far for fear of weakening prestige and discipline. President Lonardi had at first supported General Bengoa's attitude, but had eventually given way and asked for his resignation.

The subsequent *coup* was precipitated by President Lonardi's action on Nov. 12 in dismissing the Minister of the Interior and Justice, Dr. Eduardo Busso, and appointing in his place Dr. Luis Maria de Pablo Pardo as Minister of the Interior and Dr. Bernardo Velar de Irigoyen as Minister of Justice. Both men were generally regarded as extreme Catholic Nationalists, Dr. Velar de Irigoyen having served at one time as Treasury lawyer under President Perón. At the same time liberal elements expressed concern at a speech made by President Lonardi advocating tolerance towards former Perón supporters.

In the course of this speech President Lonardi had said: "The deposed dictator unquestionably had at one time a great part of the Argentine people on his side, especially on the eve of his first presidential period, and before the opposition which always arises against authority had embittered his power and pride It is not possible to apply the epithets 'unpatriotic' or 'partisans of tyranny' to all who supported the dictator disinterestedly and in good faith. The great majority of the Argentine people should be allowed to participate in the country's civic life unrestricted, even though some, often against their will, supported the deposed regime . . ."

The National Advisory Committee (representing all Argentine political parties except the Peronistas and Communists), which had been appointed to assist President Lonardi after Congress had been dissolved following the September revolt, resigned in protest against Dr. Busso's dismissal. All the judges of the Supreme Court also resigned following the appointment of Dr. Velar de Irigoyen as Minister of Justice. In view of these developments General Aramburu had prolonged discussions with military and political leaders, as a result of which President Lonardi was presented with an ultimatum demanding that he should either dismiss the extreme right-wing members of his Cabinet or should himself resign. Shortly afterwards it was announced from the *Casa Rosada* (Government House) that the "armed forces have accepted the resignation of General Eduardo Lonardi as Provisional President of the nation," and that General Aramburu had succeeded to the presidency.

In a brief speech after taking the oath of office President Aramburu said that "as the result of difficulties which could not be overcome," General Lonardi had "given back to the armed forces the responsibility for selecting a new interpreter of his revolutionary concepts." His [the new President's] "unalterable aim" would be" to restore the democracy inherited from the war of independence," and he would choose as his collaborators men of "irreproachable antecedents"

General Lonardi issued a brief statement after his deposition in which he said: "I want to make it known that it is untrue that I presented my resignation as Provisional President, or that my health had anything to do with my departure from the *Casa Rosada*. This has been an act ordered exclusively by a decision made by a part of the armed forces."

The Argentine Secretariat of Press and Cultural Activities, in a statement on Nov. 13, asserted that General Lonardi had been under the influence of extremist totalitarian groups whose ideas were "incompatible with the democratic convictions of the revolution of liberation." These groups, it was alleged, had succeeded in obtaining key posts in the leadership of the country, had stultified healthy revolutionary opinion, and had been leading Argentina "along a dangerous path which can end only in a new dictatorship."

On assuming the presidency General Aramburu confirmed in office the three Service Ministers—Brigadier-General Ossorio Arana (Army), Vice-Commodore Amada Abrahim (Air), and Rear-Admiral Teodoro Hartung (Navy)—and appointed them as a Revolutionary Junta, with himself as head, to govern the country. Vice-President Rojas was confirmed in office and also made a member of the Junta. In addition to the three Service Ministers, the following were appointed to President Aramburu's Cabinet:

Dr. Luís A. Podestá Costa ..	Foreign Affairs.
*Dr. Julio Alizón García .	Finance.
Sr. Eugenio A. Blanco ..	Treasury.
Dr. Eduardo Busso	Interior and *ad interim* Justice.
Sr. Juan Llamazares . ..	Trade.
Captain Sadí Eduardo Bonnet	Transport.
Sr. Pedro Mendiondo ..	Public Works.
Dr. Raúl Migone	Labour.
†Dr. Alberto Mercier	Agriculture and Livestock.
†Ing. Luís María Ygartúa ..	Communications.
†Dr. Atilio Dell'Oro Maini ..	Education.
†Brigadier-General Manuel A. Argibay Molina	Health and Social Welfare.

* Appointed by President Lonardi on Oct. 10 and confirmed in office. † Confirmed in office.

Dr Podestá Costa is a professor of international law, a career diplomat, and a former permanent Under Secretary-General of the League of Nations. Dr. Alizón García is a former research manager at the *Banco Central*.

General Juan José Uranga, Minister of Transport in General Lonardi's Government, was arrested with his family on Nov. 20 after he had issued a statement asserting that General Lonardi had been the victim of a "treacherous conspiracy"

The powerful Argentine Confederation of Labour (C.G.T.), which had been built up by President Perón and the late Eva Perón, and which formed one of the main supports of the Peronista regime, called a general strike against President Aramburu's Government at midnight on Nov. 14. Among the reasons given for calling the strike were that the Confederation's headquarters in a number of cities had been taken over by "free" labour leaders without any preventive action by the police. The Confederation also protested against the action taken against its newspapers, notably *La Prensa*, which had been confiscated from its rightful owner by President Perón and handed over to the Confederation in 1951 (see 11419 C).

The Confederation's action in calling the strike was generally regarded as designed to stem the steady loss of influence which it had suffered since the overthrow of the Perón regime. The taking over by anti-Perón factions of the control of a number of unions, including the important Meat Workers' Union, led to strikes in the meat-packing plants on Oct. 5 and to the occupation of the plants by troops in order to prevent clashes On the same day, however, the Minister of Labour (then Dr. Cerruti Costa) announced that the secretariat and executive committee of the C G T , headed by Señor Hugo de Pietro, had resigned and that new elections would be held by all trade unions within 120 days. In the meantime, the C.G.T. would be directed by Señor Andres Framini (Textile Workers' Union) and Señor Luis Nattalini (Utilities Workers' Union), and Peronista leaders would be allowed to remain in office in the constituent unions.

Despite this arrangement, anti-Perón groups continued to take over trade union premises in a number of cities, as a result of which the C.G.T. called a general strike for midnight on Nov. 1. This strike was called off at the last minute, however, after the Confederation had reached an agreement with the Government under which (*a*) Señores Framini and Nattalini would remain in charge of the C.G.T., whilst a Government-appointed trustee would protect its material and financial assets and see that the newspapers controlled by it remained neutral in the forthcoming union elections; (*b*) in those unions where so-called "free union" elements had seized control, the Government would appoint a neutral controller, who would be aided by a committee including "free unionists" and Peronista members; (*c*) in unions where there was no internal conflict, the incumbent C.G.T. officer would remain in control, though with Government observers; (*d*) all union leaders now under arrest would be freed immediately, except those detained on criminal charges.

In reply to the Confederation's call for a general strike on Nov. 14, the new Government of President Aramburu immediately broadcast a statement in which it declared that it would "in no case tolerate certain sectors using workers to achieve political aims." The statement advised the trade unions to "state their grievance clearly" and take it to the proper authorities; declared that the Government, whilst recognizing the right to strike, did so only when all other methods of reaching agreement had failed; and gave a warning that all other types of strike were illegal and that the instigators would suffer "all the penalties of the law."

Although the strike was effective in certain industries—notably in the meat-packing plants, breweries, metal works, and tyre factories, where 100 per cent absenteeism was reported—many other workers ignored the strike call; transport ran as usual, banks and Government offices remained open, and newspapers appeared normally. The Government nevertheless acted promptly to deal with the situation and on Nov. 16 the headquarters of the C.G.T. were occupied by Marines, supported by tanks; all the C.G.T. officials were dismissed and many arrested (including, it was reported, Señores Framini and Nattalini); and Captain Alberto Patrón was named as special federal director of the organization.

The new Minister of Labour (Dr. Migone) declared in a broadcast that the C.G.T. had served " tyranny " more than it had its 6,000,000 members, and blamed it for many of the country's economic difficulties. He nevertheless promised that Labour's future claims would receive an " honest hearing " from the Government, and guaranteed the unions a " fair deal " provided that they remained " unpolitical."

As a result of the Government's action, the trade union leaders met the Minister of Labour on Nov. 17 and agreed to call off the strike if all workers who had been dismissed for striking were reinstated and all arrested union leaders released. The Government promised to consider these requests and to release all arrested strikers unless they had been charged with common crimes, and the strike was accordingly called off on the following day.

The former secretary-general of the C.G.T., Señor Hugo de Pietro, was arrested on Nov. 23 as a result of investigations by a committee inquiring into the methods by which former trade union leaders had rapidly acquired large fortunes.

President Perón's Exile.

Prior to the events described above, ex-President Perón, —who since his overthrow had taken refuge on board a Paraguayan gunboat in Buenos Aires harbour—had been given a safe-conduct by the Argentine Government and had left the country. He was first granted asylum in Paraguay, but subsequently took up residence in Panama. In Argentina, meanwhile, a military court of honour tried the ex-President *in absentia* for alleged offences committed whilst he was in office, and after finding him " guilty " on Oct. 31 deprived him of his rank of general of the Argentine Army and barred him from ever wearing the Argentine uniform again. The court accused him of having taken advantage of his official position to enrich himself and to live a life of luxury, of having incited violence, and of having sown hatred among the Argentine people. It also condemned him for his affair with a girl, Nelida (Nelly) Rivas, when she was only 14 years old, and for having lived for two years a " marital life " with her in the presidential palace following the death of Señora Perón (see below).

After spending 12 days on board the gunboat *Paraguay* in Buenos Aires harbour, during which time negotiations took place between the Argentine and Paraguayan Governments on the conditions under which the latter would grant him a safe-conduct, ex-President Perón left Argentina on Oct. 2 in a Paraguayan flying boat for Asunción, the capital of Paraguay. Shortly after his arrival there he asserted in a press interview on Oct. 4, that he was still the " constitutional President " of Argentina, and denied that he had ever resigned. " I would have remained in my country if a minimum of guarantees existed there," he declared, " because I have nothing to reproach myself for." After saying that the revolution against his regime was carried out by " the parasitic class against the producing class," he added · " The oligarchy contributed their money, the clerics their sermons, and a section of the armed forces—dominated by the ambition of certain chiefs—the arms of the Republic." Asked whether he planned to remain head of the Peronista party, the ex-President replied : " If some day it occurs to me to return to politics, I would go back to my country and act there."

On Oct. 6 the Argentine Foreign Minister (then Dr. Amadeo) announced that a Note had been sent to the Paraguayan Government advising it that a prolonged stay by General Perón in Paraguay would damage that country's relations with Argentina, and suggesting that " the lodging of General Perón in any country beyond the bounds of this continent would redound to the benefit of Argentina's internal tranquillity " as well as to " the harmony among our countries." Dr. Amadeo also announced that the Argentine Chargé d'Affaires in Asunción had been instructed to inform the Paraguayan Government that Argentina considered it " a grave violation of its obligations " to allow General Perón to make political statements while he was a political exile in Paraguay.

The Paraguayan Government, in its reply (Oct 8), rejected the Argentine request that General Perón should not be allowed to stay in Paraguay, declaring that the question of asylum was one for the Paraguayan Government to decide. The Note expressed regret, however, at the statements made by General Perón, and explained that they had been made " despite precautions." It added : " Paraguay will take all necessary steps to prevent a repetition of such incidents, including stricter vigilance, and awaits advice from the Argentine Government whether to proceed with the internment of the refugee." Accepting this offer, the Argentine Government formally requested Paraguay on Oct. 10 to intern General Perón " at a distance sufficiently removed from the Argentine-Paraguayan frontier so that his presence does not create disturbances."

On Oct. 17 General Perón was accordingly taken to a place of residence on the outskirts of Villarrica, in central Paraguay. A fortnight later, however (on Nov. 2), he left Paraguay in a Paraguayan military aircraft and flew to Panama to take up residence in exile in that country. In a statement in Panama on Nov. 6, Señor Perón asserted that the revolt against him had been financed in Uruguay by the Argentine " oligarchy," but denied that he had any intention of trying to regain the Argentine presidency.

On Oct. 3, after General Perón's arrival in Asunción, the Paraguayan Government had announced its recognition of the new Government in Argentina.

Argentine Economic Position.

One of the most important problems facing General Lonardi's Government after taking over from the Perón regime was the country's economic and financial position. To deal with this question, Dr. Raúl Prebisch (executive director of the U.N. Economic Commission for Latin America) was invited on Oct. 2 to examine and report on the matter. Dr. Prebisch was a former general manager of the Argentine Central Bank, but had gone into exile in 1943 after General Perón's rise to power.

A preliminary report on the economic state of Argentina, submitted by Dr. Prebisch to President Lonardi on Oct. 24, said that Argentina was going through " the most acute crisis in all its economic history," and that an " intense and prolonged effort " would be needed to " re-establish the country's vigorous production rhythm." It referred to the precarious exchange position, the mistaken investment policy, and the internal inflation, and said that immediate action would have to be taken to relieve the present precarious state of affairs, whilst long-term plans should be drawn up to correct the structural flaws in the economy. Extracts from the report are brought below.

Balance of Payments. Pointing out that the national income per head in 1955 (according to estimates based on figures for the first six months of the year) was barely 3 5 per cent higher than in 1945, the report said that the fundamental problem in Argentina's economy was the need to attain a vigorous rate of growth which would enable her great economic potentialities and the population's productive abilities to be realized. To achieve this aim, large obstacles would have to be surmounted—obstacles which lay principally in the precarious exchange position, the power shortage, and the " decapitalization " of transport.

It was estimated that the balance of payments deficit for 1955 would amount to $186,000,000 (U.S.), which, added to existing liabilities, would bring outstanding liabilities at the end of the year up to $757,000,000. Of this latter amount, $233,000,000 represented the use of credits under bilateral agreements, and $409,000,000 liabilities for imports on deferred payment. The greater part of the total was in short-term liabilities, $260,000,000 falling due in 1956 and $173,000,000 in 1957. As against this, Argentina's gold and foreign currency reserves amounted to only $451,000,000 ($360,000,000 in gold, $91,000,000 in foreign exchange), compared with $1,682,000,000 in 1946. This pronounced decline was due not only to balance-of-payments deficits and to repatriations of foreign capital, but also to the fact that the reserves had been deprived of about $150,000,000 which the Central Bank had had to release in order to meet the consequences of the suspension of overseas payments in 1949.

Three principal factors had led to the present precarious exchange position : (1) the considerable decrease in exports and the deterioration of their relative prices ; (2) the over-emphasis placed on industrialization : (3) the sharp increase in petroleum imports, caused by the country's failure to make the most of its resources. The report pointed out that the volume of Argentine exports during the five years 1950-54 amounted to barely 64 per cent of those during the five years immediately preceding the Second World War. Moreover, taking account of the increase in Argentina's population, exports per head in recent years amounted to only half the pre-war volume.

Agriculture and Industry. One of the most serious mistakes in Argentine economic policy had been a disregard for the close connexion between industrial expansion and technical progress in agriculture. Agriculture had received neither the incentives nor the resources necessary to pursue its technical progress, and had been deprived of the necessary labour force. The essential importance of rural production as a support to the policy of industrialization had been ignored; although attempts had later been made to rectify this mistake, they had not been carried out " to the extent, nor with the determination, required by the magnitude of the harm done to the productive mechanism."

With regard to industrialization, Dr. Prebisch said that policy should have been directed towards reducing the traditional vulnerability of Argentina's economy to foreign influences. Plans for the establishment of an Argentine steel industry had been drawn up before the Second World War, but the initiation of the scheme had been delayed until recently. The same was true of certain basic chemical industries, paper, cellulose, and other industries of primary importance, where action had been " late, slow, or inadequate."

Fuel and Power. Commenting on the slowness with which petroleum production had increased relatively to the rapid growth of consumption, the report said that imports of petroleum and coal during the past five years had formed about 20 per cent of total imports, compared with only 10 per cent in the five years immediately preceding the war. The share of imports in the total consumption of fuel and power had similarly risen from 39 per cent pre-war to 49 per cent during the last five years. To this growing dependence on foreign oil supplies should be added the shortage of electric power from which the country was suffering, and which had become more serious from year to year. Although an increase in electricity supplies was planned, consumption was also increasing, and no appreciable relaxation of the present restrictions could be expected.

" In short," Dr. Prebisch declared, " the State has neither made the investments needed to provide the country with the fuel and power supplies required for its economic growth, nor created favourable conditions for private enterprise to make such investments, nor even, in certain cases of critical importance, undertaken the complete technical study of these problems, which has resulted in considerable delays in arriving at appropriate solutions."

Transport. Referring to the running-down of the capital of the railways, Dr. Prebisch said that renewals of rolling-stock were 25 years in arrears and permanent-way renewals even further behind-hand. Experts had indicated the urgent need for a modernization plan involving a total cost of 22,000,000,000 pesos, much of which would be needed for imported material. The poor state of Argentina's transport system dated back many years, and was not confined to the equipment The "outdated administration" of the British companies had been followed by the "impressive inefficiency" of Government intervention, and added to this was the "age and inefficiency" of the country's motor-lorry fleets.

The report pointed out, moreover, that apart from the problem of renewals there was also a considerable working deficit in the operation of the transport services, both of the railways and of the urban passenger services in Buenos Aires This deficit was estimated for the current year at 3,500,000,000 pesos, of which 2,000,000,000 pesos represented the actual financial loss and 1,500,000,000 pesos the amount that should be allowed for calculating amortizations on the basis of the replacement value of equipment rather than of its original cost. The experts who had been consulted considered that if present-day tariffs and fares and the existing organization were maintained, and the above-mentioned renewals programme fully carried out, it would take 15 years to cancel the deficit, using only the revenue earned by the transport system.

Use of Foreign Assets. Argentina's "huge" capital requirements at the end of the war had not been met to the extent or in the manner required by her economic expansion. In fact, said the report, a large proportion of the gold and exchange reserves accumulated during the war, and of those earned immediately after the war through the great improvement in Argentina's terms of trade, had been devoted to the repatriation of foreign capital already established in the country, instead of to the acquisition of new capital assets With the exception of the purchase of the railways, where the accumulation of blocked sterling had enabled Argentina to realize an old national ambition, the repatriation operations had been premature and they had been made while agriculture, transport, and fuel and power were short of the machinery and equipment essential to their normal development The total value of the repatriations effected, including the railways, was $764,000,000, they generally represented commitments with slow amortization and low interest rates, whereas Argentina's present foreign debts generally involved high interest rates and peremptory payment within relatively short terms.

State Intervention and Inflation. "The excessive and disorderly intervention of the State," said Dr. Prebisch, "has seriously upset Argentina's economic system, to the detriment of its efficiency, and together with inflation has engendered extraordinary profits which are at variance with the direction given to social policy. . . . The control of imports by means of exchange permits, the control of prices to check the consequences of inflation, the regulation of internal and external financial movements, a series of measures that hamper the fluidity of productive factors in both urban and rural economic activities, and other forms of intervention, have led the State unnecessarily to engage in commercial and industrial operations These activities have resulted in the bureaucratic perversion of private economic activity and have encouraged certain tendencies that disrupt the healthy development of the economy and of the administration ..

"The granting of exchange permits at rates differing greatly from those ruling in the official market, and authorizations to import without the release of exchange, have produced a considerable volume of profits for those favoured by such permits or authorizations Besides what this means in itself, the effects on the working of the economic system are very serious, for they tend to divert effort towards this type of easy transaction away from productive operations and from the pursuit of improvements in efficiency and increases of productivity, which are the essential justification for profit in economic activity"

The report went on to point out that although the decline in productivity in the Argentine economy was frequently made out to be the responsibility of the workers alone, this was only a one-sided explanation. The fact was that the easy profits which inflation had brought in recent years for large classes of employers, and which certain groups had obtained by means of official regulations, had until quite recently taken away all incentive to improve productivity and reduce costs. Apart from this indirect responsibility for the decline in productivity, the State had a direct responsibility in administrative operations.

Referring to the "appreciable number of redundant employees" in the public administration, the report said that this was one of the factors that had prevented the adjustment of wages and salaries in the public services In the Buenos Aires transport system it was estimated that about 15 per cent of the 48,000 employees could be dispensed with, whilst in the railways there were some 200,000 workers, of whom an estimated 10 per cent, taken on during the years of greatest activity, continued in their jobs although they were not really needed. Similarly, it seemed that there was surplus staff in the meat-packing plants, and this was one of the factors which had led to the State subsidy, now amounting to about 470,000,000 pesos a year.

With regard to inflation, Dr. Prebisch said that this had also resulted from the "ill-directed intervention" of the State in the country's economic life, notably the Government's monetary and wages policy. On the monetary side the excessive creation of currency arose principally from the losses incurred by the State in its operations with agricultural produce and its management of transport, and also from the manner in which mortgage operations had been financed. These three factors would lead in 1955 to an increase of about 9,700,000,000 pesos in the money supply, of which 3,500,000,000 pesos would come from losses on grain trading, 2,000,000,000 pesos from losses on transport (not including the deficit of 1,500,000,000 pesos calculated for amortizations at replacement cost, mentioned above), and 4,200,000,000 from the financing of mortgage operations.

In addition to these inflationary factors, there had also been an expansion of credit for private investments, e g, in 1954 the creation of additional money supply amounted to 13,714,000,000 pesos, of which 4,832,000,000 pesos were reabsorbed, leaving a net increase of 8,882,000,000 pesos. The report noted, however, that the Administration's budget had not been a direct inflationary factor, since the authorities had resorted to the placing of Government bonds with the pension funds in order to maintain equilibrium from the monetary point of view

The consolidated national debt officially shown amounted to 47,000,000,000 pesos, but to this sum should be added another 28,000,000,000 pesos for the Government's debt to the banking system under various headings The total of the consolidated and floating public debt thus amounted to over 70,000,000,000 pesos, compared with 9,000,000,000 pesos at the end of 1945.

The second main inflationary factor was the "massive salary and wage increases," which, where not accompanied by an increase in productivity or not met out of employers' profits, had been immediately translated into higher prices Nevertheless, the effect on real wages had been different in various industries, for though the real wage of industrial workers had been maintained despite the rise in prices, the real income of public employees, for example, must have declined. "The case of the industrial workers has special characteristics," Dr. Prebisch continued. "Whereas the real income *per capita* for the whole country has increased by only 3.5 per cent during the last 10 years, the real income of industrial workers has increased during the same period by 47 per cent, or 37 per cent without counting pension fund contributions If an appreciable sector of the population has been able to improve its real income in this manner at the same time as there has been an insignificant growth in the average income per inhabitant, it is obvious that other groups have suffered a decline in average real income. These are the groups that have been overtaken by inflation, and they include, particularly, agricultural producers and extensive sectors of middle-class workers."

Immediate Remedial Measures. Among the remedial measures which Dr. Prebisch recommended should be taken immediately were the following:

(1) Strong incentives to agricultural production. Prices should be appreciably increased by means of an adjustment in the rates of exchange—which had artificially overvalued the peso—thus enabling farmers to increase their small capacity for capital formation. They must also be permitted to import, without restriction, the necessary production equipment if it was not manufactured adequately by local industry

(2) Re-establishment of a free exchange market in order both to encourage new exports, especially industrial products, and to facilitate the importation of urgently needed capital goods and spares. Imports of motor-cars should be restricted so that imports of production goods could have precedence. It could not be expected, however, that the free market would provide for the importation of all the urgently needed capital goods, and it would therefore be necessary to seek credits abroad.

(3) Special investments in the petroleum industry, including the building of pipelines, to overcome the present serious supply problem, which lay not so much in production as in distribution. At the same time plans should be drawn up for increasing future production from further exploration and from new wells. These extraordinary investments above the normal operating expenditure would require $200,000,000 in imports and $3,000,000,000 pesos in local expenditure.

(4) A start should be made on dismantling by stages the mechanism of State intervention.

(5) There was no doubt that the modification of exchange rates would cause prices to rise, but there was every indication that the rise would be moderate Any considerable wage and salary adjustments through which the spiral of costs and prices would receive new impetus, should be prevented at all costs, though it would be wrong to ignore the position of certain groups of workers whose earnings had not been adjusted satisfactorily or in a manner compatible with the current situation. In such cases it would be necessary and expedient to adjust their remunerations cautiously.

(6) The possibility that could be glimpsed 10 years ago of Argentina reaching a stage of maturity in which the need for foreign capital would be reduced to insignificant proportions had receded for a number of years. If she was to emerge rapidly from the present crisis, private loans and investments from abroad were needed. To negotiate foreign loans, it would be essential to establish favourable conditions, starting by halting inflation and taking severe measures to achieve equilibrium in the balance of payments. On the other hand, if there was no desire to accept such loans, the country must be content to continue indefinitely in its present precarious position.

On Oct. 27 the Government of President Lonardi issued a series of decrees in immediate implementation of certain recommendations of the Prebisch report. The most important of these involved the devaluation of the peso by abolishing the three buying and selling rates of exchange previously ruling in the official market, and replacing them by a single rate of 18 pesos = 1 U.S. dollar and 50.28 persos = £1 sterling. In addition, a new free exchange market was created in which the rates would be determined by supply and demand. [When

this free market opened on Nov. 3 the U.S. dollar was quoted at around 30 pesos.] The decrees also provided (*a*) for a surcharge on certain goods imported at the free rate of exchange, and (*b*) for a levy on the peso proceeds of certain exports. The surcharge—introduced only as a temporary measure—was designed to provide some protection to Argentine industry, while the export levies would be paid into a National Economic Recovery Fund and used (*a*) to develop agricultural and pastoral production, and (*b*) to pay temporary subsidies on certain essential commodities in order to mitigate the social effects of higher prices caused by the new exchange regulations.

Official Exchange Rate. This would apply to the greater part of Argentina's exports Of these, the principal items subject to the new export levy would be grains, oilseeds, and other arable farm products (10 per cent of the export proceeds), meat, most dairy products, carded wool and wool tops, and pastoral by-products (15 per cent), scoured wool (20 per cent); greasy wool, dry and salted hides, timber, and re-exports (25 per cent). For imports, the official rate would apply to a long list of items, including fuels, essential raw materials, certain foods, paper and newsprint, drugs and chemical products, a wide range of iron and steel goods, musical instruments, certain types of agricultural machinery and spares, tractor spares, and aircraft spares.

Free Exchange Rate The Central Bank issued two lists of goods that might be imported at the free market rate of exchange without the need for a prior exchange permit The first list, comprising goods which would attract no surcharge, included spices, aromatic, synthetic and vegetable essences, printed music and books, some chemicals, spare parts for bicycles, and electrical generating equipment. The second, attracting a surcharge of 20 pesos per U S dollar or the equivalent in other currencies, included spare parts for motor vehicles, for certain types of industrial and non-industrial machinery, and for motor cycles. Imports of motor-cars would be permitted at the free market rate on payment of surcharges to be established later by the Central Bank.

The free market rate would also apply (*a*) to financial remittances and other inward and outward movements of funds, with the exception of funds, investments and other property in Argentina belonging, on Oct. 27, to holders resident abroad, which would remain subject to the control of the Central Bank until the situation on the free exchange market permitted them gradually to be released; (*b*) to the negotiation of the proceeds of certain exports not included in the official market list, provided that materials used in their manufacture and previously imported into Argentina represented no more than 20 per cent of their export value.

Political Measures.

Following the flight of General Perón, the Lonardi Government took a number of measures designed to abolish the legacies of the Perón regime. These measures included the granting of a "full and general amnesty" to all persons sentenced for political offences between June 4, 1946 (when General Perón assumed the presidency) and Sept. 28, 1955, and to all persons prosecuted for such offences up to Sept. 28, 1955 (Sept. 28); the abolition of the "state of internal war" which had been decreed by President Perón in 1951, and which deprived Argentine citizens of many of their civil liberties (Oct. 1); the dissolution of the Argentine Supreme Court, which had been appointed by President Perón (Oct. 5); the dissolution of the Peronista Party itself (Oct. 24); and the annulment of the law of *desacato* (disrespect), under which anyone making a remark that could be constructed as disparaging against a public official could be imprisoned (Oct. 18).

President Aramburu's Government also issued a decree on Nov. 30 confirming the dissolution of the Peronista Party.

A number of other developments in Argentina since the overthrow of President Perón are summarized below.

Proceedings against ex-President Perón and Associates. A Federal judge, Dr. Luis Botet, requested the Argentine Foreign Ministry on Nov 21 to apply for the extradition of the ex-President to stand trial on charges of treason. The request was based on the preliminary findings of an investigating commission which had been set up by President Lonardi to examine treason charges brought against ex-President Perón and 269 of his principal associates. Dr. Botet also asked for the extradition of Señor Angel Borlenghi (the former Minister of the Interior, who had fled to Cuba) and of Señor Saul Gonzales Ruiz (a former Government tax assessor, who had taken refuge in the Paraguayan Embassy), and for the arrest of Señor Alberto Teisaire, the former Vice-President. [Señor Teisaire, formerly a Rear-Admiral, had been deprived of his rank and of his right to wear uniform by a naval court of honour on Nov. 3 The court had found him guilty of having tarnished the honour and prestige of the Argentine Navy by publicly and repeatedly showing obsequiousness towards ex-President Perón, and of condoning acts of violence against fellow-citizens.]

On Sept. 30 the police had announced the arrest in a Buenos Aires suburb of a 16-year old girl (subsequently identified as Nelly Rivas), alleged to have been the ex-President's mistress, and the seizure of jewels and currency worth 635,000 pesos given to her by Señor Perón, together with two love letters which he had written to her whilst he was taking refuge on the Paraguayan gunboat in Buenos Aires harbour. On Oct. 13 jewels and other possessions amassed by President Perón and the late Señora Eva Perón were exhibited to the Press at the presidential palace; the jewels alone were estimated to be worth £1,250,000, whilst other exhibits included 400 suits and dresses, 600 hats, and large numbers of handbags and shoes

Señor Jorge Antonio, one of ex-President Perón's closest friends and advisers, who from obscure beginnings had become one of the country's richest men in a few years, and who was chairman of the Argentine subsidiary of the Mercedes-Benz motor company and many other concerns, was refused a safe-conduct by the Argentine Government after he had sought refuge in the Uruguayan Embassy, and was reported on Oct 7 to have been arrested In refusing a safe-conduct the Argentine Foreign Ministry rejected Señor Antonio's claim for political asylum on the ground that he was a "common criminal."

Dr. Ronald Richter, who in 1951 claimed to have discovered a revolutionary method of producing atomic energy (see 11397 A, 13932 B), was described by an investigating committee on Oct 7 as knowing nothing whatever of physics and of having manufactured an "atomic journalistic bomb" The commission stated that the theories which Richter had put forward to President Perón emanated from other people who had rejected them as impossible several years earlier

Two former Perón Cabinet Ministers, General Humberto Sosa Molina (Defence) and General Franklin Lucero (Army), were arrested on Nov. 22

Church-State Relations. - Restoration of Religious Holidays. Relations between the Argentine Government and the Roman Catholic Church, which had been severely strained during the past 12 months as a result of the Perón Government's action against the Church (see 13983 A, 14066 D, 14277 A), were re-established on Nov. 4 when a new Argentine Ambassador to the Holy See, Dr Maximo Etchecopar, arrived in Rome Dr Etchecopar, who had already served as Ambassador to the Vatican, expressed his intention of starting immediate negotiations for the conclusion of a concordat

The two Roman Catholic prelates who had been dismissed from their posts and expelled from Argentina by the Perón Government—Mgr. Manuel Tato, Auxiliary Bishop of Buenos Aires and Vicar-General of the diocese, and Mgr Ramon Novoa, the assistant Vicar-General—had returned to Buenos Aires on Oct 23.

The Lonardi Government announced on Oct. 9 that the Peronista decree removing religious festivals from the list of Argentine public holidays (see 14277 A) had been revoked, and that these holidays had consequently been restored. The Government also decreed that Oct. 17, proclaimed by President Perón as "Loyalty Day" to mark his release from temporary imprisonment in 1945, should no longer be observed as a public holiday. [Strong measures were taken by the Government to prevent any disorders on Oct 17, troops being called out and placed in strategic positions. About 33 per cent of the workers stayed away from work, but no disorders were reported.]

It was disclosed on Oct. 2 that the burning of the Argentine flag outside the Congress building on June 11, which took place after a Corpus Christi procession and was falsely imputed to Roman Catholics (see page 14277, second column), had in fact been ordered by President Perón's police

Closing of Press Secretariat. - "La Prensa" returned to Dr. Gainza Paz. The Secretariat of Press and Cultural Activities, the organ responsible for censorship and propaganda under President Perón, was dissolved under a decree issued by President Aramburu's Government on Nov. 18. A preamble to the decree said that it was the Government's firm intention "to re-establish, assure, and respect fully the right to the free expression of thoughts, writings, and speech." Señor Adolfo Lanus (who was on the editorial staff of *La Prensa* before the paper was confiscated in 1951 and handed over to the General Confederation of Labour) was appointed Presidential Press Secretary and entrusted with the task of liquidating the propaganda apparatus of the former Secretariat and of ensuring that the aim of providing "freedom of Press and access to sources of information" was achieved

The newspaper *La Prensa*, the leading newspaper in Latin America before its confiscation by the Perón Government in 1951, was returned to its lawful owner, Dr. Gainza Paz, on Nov 30, by a decree of President Aramburu's Government The decree, a preamble to which declared that *La Prensa* had been the victim of "one of the most implacable campaigns of persecution perpetrated under dictatorship," repealed the law under which the paper had been expropriated, and ordered all the newspaper's property and rights to be restored immediately. Dr. Gainza Paz himself returned to Argentina from exile on Dec. 1, to resume the direction of *La Prensa*

The Socialist paper *La Vanguardia*, closed down in 1950, the Independent *El Intransigente*, of Salta, closed down in 1949, and *El Norte*, also of Salta, all resumed publication after the fall of the Peronista regime.

Repeal of Law on Crimes against State Security. The Government of President Aramburu announced on Nov. 24 that it would repeal the law on crimes against the security of the State, which had been issued by President Farrell in 1945 when Señor Perón was Minister of Labour, and had been one of the latter's principal weapons in suppressing opposition to his own regime when he became President. Among the law's 50 articles defining "crimes against the security of the State" was one which made it a punishable offence to advocate any changes in the country's constitution or basic principles, and another (aimed against the Press) which involved imprisonment for up to three years for "anyone who, by whatever means, publishes or despatches abroad, or from abroad, tendentious or false information with intent to disturb the order, economy, and security of the country."

Cancellation of Five-Year Plan. A decree was issued on Oct. 11 cancelling President Perón's second five-year plan by repealing the law which had brought it into operation in 1952. The decree was based on the grounds that the plan had been used as a political instrument.

Dissolution of State Economic Organizations. The Minister of Trade, then Dr. Cesar Bunge, announced on Nov. 3 that the *Instituto Argentino de Promoción del Intercambio* was to be dissolved, and that the *Instituto Nacional de Granos y Elevadores* and the *Instituto Nacional de Carnes* were to be reorganized with a view to the possible transfer of their functions to the Ministry of Trade and the Ministry of Agriculture and Livestock.

Among new diplomatic appointments made after the deposition of President Perón, in addition to that of Dr. Etchecopar (see above), were those of Dr. Adolfo Vicchi as Ambassador to the United States (Oct. 2), and of Señor Alberto Candioti as Ambassador to the United Kingdom (Oct. 5). Dr. Vicchi is Professor of Constitutional and Administrative Law at the University of Guyo, whilst Señor Candioti, a prominent member of the Radical Party, is a career diplomat who was dismissed from the diplomatic service by President Perón. Rear-Admiral Toranzo Calderón, who had been sentenced to life imprisonment by the Perón Government for leading the naval attack on Government House in the June rising, was appointed Ambassador to Spain on Sept. 29.

(Prev. rep. Argentina, 14437 A.)

A. UNITED KINGDOM. — Government Rejection of Major Recommendations of Royal Commission on Capital Punishment.

Major Lloyd-George, the Home Secretary, announced in a written reply on Nov. 10 that, after further considering the report of the Royal Commission on Capital Punishment, the Government had decided that it could not accept the following major recommendations:

(1) That the age-limit below which sentence of death might not be imposed should be raised from 18 to 21.

(2) That in all other cases the jury should be given discretion to decide whether there were such extenuating circumstances as to justify the substitution of sentence of imprisonment for sentence of death.

(3) That the test of criminal responsibility laid down (so far as concerned England and Wales) by the McNaghten rules should be abrogated.

The second group of the Committee's recommendations (the Home Secretary added) consisted of a number of less important proposals which could not be implemented without legislation. The Government saw no prospect of being able to introduce legislation on the matter in the near future, and proposed to defer a decision on these recommendations until an opportunity for legislation could be found.

The third group, however, consisting of recommendations to which effect could be given administratively, had in the main been accepted and were being put into effect. In particular, he had authorized the Prison Commissioners to proceed with plans for a special institution for the detention and treatment of psychopaths and other mentally abnormal prisoners. Moreover, arrangements were now in force for persons charged with murder, should there be any doubt about their mental state, to be seen by a psychiatrist from outside the prison service as well as by a doctor or doctors from within the service.

Major Lloyd-George added that his statement applied only to the position in England and Wales.
(Times - Daily Telegraph) **(Prev. rep. 14285 A.)**

B. COCOS ISLANDS. — Australian Sovereignty.

The Cocos Islands, in the Indian Ocean some 1,300 miles north-west of Australia, were formally transferred to Australian sovereignty on Nov. 3 after the enactment of enabling legislation by the U.K. and Australian Parliaments. Lieut.-Commander H. J. Hull, of the Royal Australian Naval Reserve, was appointed Administrator of the Islands by the Australian Government. During the Bill's passage through the Australian Parliament, Mr. Hasluck (Minister for Territories) stated that the rights of the Clunies-Ross family (the traditional rulers of the islands) would remain unaltered; that Singapore laws in force at the time of the transfer would be continued; and that the Malay institutions, customs, and usages of the islands would be preserved.—(Australian News and Information Bureau - Times) **(Prev. rep. Cocos Islands, 11545 B.)**

C. CANADA. — Increase in Bank Rate.

The Bank of Canada raised its bank rate on Nov. 19 from 2¼ to 2¾ per cent, this being the third increase in four months.
(Financial Times) **(Prev. rep. Bank Rate, 14467 C.)**

D. UNITED STATES. — Membership of Loyalty-Security Investigating Commission.

The members of the commission set up by Congress to investigate the Government's security and loyalty programmes were announced on Nov. 10 as follows:

Appointed by President Eisenhower —Mr James P. McGranery, Attorney-General under President Truman in 1952, Mr Franklin D. Murphy, Chancellor of the University of Kansas, Mr Carter L. Burgess, Assistant Secretary of Defence in charge of manpower and personnel; and Mr Louis S. Rothschild, Under Secretary of Commerce in charge of transport.

Appointed by Vice-President Nixon:—Senator John C. Stennis (Dem.), Representative Francis E. Walter (Dem.), Senator Norris Cotton (Rep.), and Mr. Loyd Wright, a past president of the California Law Association.

Appointed by Mr Sam Rayburn, Speaker of the House of Representatives —Dr Susan B. Riley, Professor of Education at the Peabody College for Teachers at Nashville, Tennessee, Representative William M. McCulloch (Rep.), Mr James L. Noel jr., a lawyer from Houston, Texas, and Mr. Edwin L. Mechem, a former Governor of New Mexico.

The commission's terms of reference include the examination of laws, Executive Orders, and departmental regulations which have governed the security and loyalty programmes, and also the conduct of Congressional investigations.
(New York Times) **(Prev. rep. 14482 A.)**

E. POLAND-YUGOSLAVIA.—Economic Agreements.

A number of economic and technical co-operation agreements between Poland and Yugoslavia were signed in Warsaw on Nov. 14.

A **trade agreement** for 1956 provided for commercial exchanges totalling $14,000,000 in both directions, thus doubling Polish-Yugoslav trade as compared with 1955. Poland will export coal, coke, rolled iron, chemicals, machinery, and consumer goods to Yugoslavia, whilst Yugoslavia will supply Poland with lead, zinc, concentrates, pyrites, chrome ores, and other minerals, machines, tobacco, hemp and maize; and such consumer goods as footwear, garments, wines, and fresh and dried fruit.

An **agreement on scientific and technical co-operation** between the two countries provided for the exchange of technical specifications, specialists and students, and scientific material.

Other agreements dealt with (*a*) air communications, (*b*) the settlement of mutual debtors' and creditors' claims covering the period 1945-1955, and (*c*) tourist traffic between the two countries.

During the negotiations Poland also expressed readiness to supply Yugoslavia with industrial equipment for food processing factories, railways, and mines, on credits to be repaid in yearly instalments at 2 per cent interest.

It was stated that the air transport agreement would be supplemented by an agreement between Polish Air Lines and the Yugoslav Aerotransport Company for the opening of direct air services between Warsaw and Belgrade *via* Budapest.
(Polish Embassy, London - Tanjug Agency, Belgrade)

F. BAHAMAS. — The Freeport Area. - £12,000,000 Dockyard Project.

The Governor of the Bahamas (Lord Ranfurly) disclosed on Nov. 30 that plans had been drawn up for a £12,000,000 dockyard on the island of Grand Bahama (the northernmost island of the group) capable of handling the world's largest vessels. He also announced that a chemical lime plant with an annual capacity of at least 100,000 tons would be built in the same area.

The dockyard and chemical plant will constitute the first industrial projects in the development of "Freeport," a new area of some 50,000 acres created by Bahaman legislation in August with the aim of fostering industrial development in the Colony. Special incentives are offered to commercial and industrial enterprises establishing themselves in the area, e.g., companies and individuals will be exempted from all taxes (corporate, personal, or property) for 30 years, and concerns will not be subjected to import duties, excise stamps, or export taxes for 99 years. "Freeport" is operated by the Grand Bahama Port Authority, which was created by the above-mentioned legislation.

Both projects—the dockyard and the chemical plant—are being undertaken by the D. K. Ludwig interests of America. Affiliated interests are National Bank Carriers, Inc., American Tankers Corporation of Delaware, Seatankers Inc., and Universe Tankers Inc.

The interests at present involved in the development of Freeport are all American, and the special incentives to establish industries in the area are aimed primarily at attracting American concerns.—(Times - Daily Telegraph)

G. FINLAND - SPAIN. — Diplomatic Relations.

It was announced in Madrid on Nov. 25 that the Finnish and Spanish Governments had decided to re-establish diplomatic relations, which had been in abeyance for over ten years.
(A.B.C., Madrid)

A. UNITED KINGDOM. — Civil Aviation. - B.O.A.C. Report and Accounts, 1954-55. - Net Surplus despite Withdrawal of "Comet" Fleet. - New Deputy Chairman.

The report and accounts of the British Overseas Airways Corporation for the year ended March 31, 1955, were published on July 27. They showed that the Corporation's operational revenue totalled £36,866,199 (compared with £38,361,337 in 1953-54) and the operational surplus £1,362,180, compared with £2,012,792. After deducting £1,100,493 for interest on capital, the net surplus for 1954-55 amounted to £261,687, compared with a net surplus of £1,065,397 in 1953-54. Allowing for a capital loss of £282,401 [the net result of adjustments following the grounding of the *Comet I* fleet] the accumulated deficit was increased by £20,714 to £861,974.

The report explained that the financial year had been "bedevilled" by the withdrawal of the *Comets* from service early in April, 1954, and that, whereas "the Corporation's principal competitors increased their seat-mileage offered for sale, in some cases by 20 per cent, the Corporation's output suffered a severe decline." Relatively, therefore, B.O.A.C had "lost much ground through the failure of an aircraft which it had pioneered into service and in which the whole country had such a big stake." In order to ensure that adequate fleet capacity would be available until the new British aircraft now on order (see below) were in service, an emergency fleet programme had been worked out and additional second-hand *Constellations* and *Stratocruisers* ordered; these, however, required extensive modification and only some of them could be brought into service by March 31, 1955, although the remainder should be in service during 1955-56, thereby providing B.O.A.C. with 16 aircraft of each of these types Meanwhile the utilization of other aircraft in the Corporation's fleet had been stepped up; *Hermes* airliners had been recalled for a brief period; the Corporation's Commonwealth partners—Qantas Empire Airways and South African Airways—had provided an increased share of the capacity on the Australian and South African routes; and the South American services had been temporarily suspended As a result of all these measures, the capacity provided had dropped by only 2 6 per cent as compared with 1953-54, although the *Comets* had been scheduled to provide 21 per cent of the total capacity for 1954-55.

Salient points from the report are summarized below:

Revenue. Passenger revenue declined from £24,202,328 to £22,900,117, and mail revenue from £9,058,879 to £8,800,630, but freight revenue increased from £2,942,294 to £3,453,042. The report attributed the fall in passenger revenue to the inability of the airliners which replaced the *Comets* to match the latter's "unique passenger attraction," as well as to the temporary suspension of the South American services. Similarly, the loss of the *Comets* had largely accounted for the decline in mail revenue, since it had entailed the transfer of much first-class mail to other operators The fact that the substitute airliners had greater cargo capacity than the *Comets* partly explained the increase in revenue from freight

Traffic. The number of passengers fell from 304,980 in 1953-54 to 291,136, 45.2 per cent of the total were tourist-class passengers, compared with 32.5 per cent in 1953-54. The passenger load-factor was 61.6 per cent (63.5 per cent in 1953-54).

Cargo carried had increased from 5,409 tons to 6,003 tons, the report stressing that the carriage of cargo, particularly of livestock and birds, had become "an essential part of the Corporation's business."

Mail had increased slightly to 3,407 tons, but first-class mail had fallen by 5 per cent, second-class and parcel mail, however, had both increased by about 10 per cent

Capacity-Ton-Miles and Load Factor. Owing to the redeployment of fleets following the *Comet* withdrawals, the capacity provided by the Corporation fell from 220,530,209 capacity-ton-miles in 1953-54 to 214,924,282 in 1954-55 The volume of traffic on scheduled services fell from 136,067,520 ton-miles to 132,343,250, and the overall load factor from 64.5 per cent to 63 7 per cent.

Costs. Operating costs rose from 39 2d. per capacity ton-mile in 1953-54 to 39.9d. The rise—the first for several years—was ascribed to (*a*) the premature writing-off of expenditure connected with the introduction of the *Comets*, and reorganization and re-training costs following their withdrawal; (*b*) the Corporation's inability to offset rising costs of labour and materials by increasing the aircraft capacity offered.

Capital Losses. The report stressed that it was "impracticable to estimate precisely the financial effect of the withdrawal of the *Comets*." Residual development expenditure amounting to £619,936 had had to be written off; there was a direct capital loss of £1,730,259 on *Comet I* fleet and equipment, as well as a loss of revenue which the aircraft would have attracted. In addition, the replacement aircraft could only be bought at "top of the market" prices, which in many instances were greater than the cost of the same aircraft when new, leaving "a legacy of high operating costs to be borne during the continuing life of these aircraft in the Corporation's fleet."

There had been a further loss of £406,587 on disposal of the *Hermes* fleet, but those capital losses had been partly offset by a capital profit of £1,113,158 on disposal of the older *Constellations*, and by surpluses amounting to £233,956 on other disposals during the year. After taking account of these items and of adjustments in respect of previous years, the accumulated deficiency had been increased by only £20,714 (see above).

Relations with Associated Companies and Private Operators. The Corporation had given much attention to the promotion and development of regional airlines overseas, and to the strengthening of subsidiary and associated companies in the Middle East and Western Atlantic areas It had also supported two British independent companies in the development of all-freight services—Airwork Ltd., operating across the North Atlantic, and Hunting-Clan Air Transport Ltd. operating to Africa—and had participated with them in regional airline operations

Staff. The Corporation's staff at March 31, 1955, numbered 17,062 (13,080 at home and 3,982 overseas), compared with 17,255 employees in 1953-54.

Fleet. Owing to the withdrawal of the *Comets*, the Corporation's revenue-earning fleet at March 31, 1955, numbered only 43 aircraft—22 *Argonauts*, 11 *Constellations*, and 10 *Stratocruisers*. The utilization of these airliners had been so stepped up, however, that revenue flying-hours on scheduled passenger services totalled 133,428, compared with 135,010 in the previous year.

Contracts for New Aircraft. During the year the Corporation had increased its order for Bristol *Britannias* from 25 to 33 (15 *100's*, 7 *300's*, and 11 *Long-Range 300's*) Four of the *100's* were expected to be delivered by the end of 1955, with delivery of the remainder promised between January and August 1955, sufficient crew training and route flying should be possible to enable scheduled services to begin in April 1956 Deliveries of the *300's* had been promised for the second half of 1956 and of the *Long-Range 300's* (designed to operate non-stop between London and New York with 64 first-class or 83 tourist passengers) between October 1956 and April 1957. Orders had also been placed with the Bristol Aircraft Company for 60 *B E.25* engines for re-engining the *300's* and *Long Range 300's*

Besides "reaffirming its faith in the de Havilland *Comets*" by ordering 20 Mark IV's (see 14397 A), which would be able to operate the longer sectors of B O A.C.'s Commonwealth routes, the Corporation had also placed an order for 10 *Seven Seas* airliners with the U S. Douglas Aircraft Co, for delivery between October 1956 and May 1957. This had been done "as an insurance that the Corporation is not left without aircraft capable of operating non-stop over the North Atlantic," if delays occurred in the delivery of the British aircraft on order The Ministry of Transport and Civil Aviation had, however, been given an undertaking that the Douglas aircraft would be sold as soon as the *Britannia Long Range 300's* were in scheduled service.

Since the close of the 1954-55 financial year, the Corporation's original order for four Vickers-Armstrong *Viscounts* had been increased to 16, of which four would be for British West Indian Airways and 12 would be used by the Corporation's subsidiary and associated companies in the Middle East and West Atlantic areas.

The Corporation, therefore, was now awaiting delivery of 79 airliners—33 *Britannias*, 20 *Comets*, 16 *Viscounts*, and 10 Douglas *Seven Seas* Contracts outstanding for British aircraft, engines, and spares represented business for the British aircraft industry amounting to nearly £85,000,000.

Sir Miles Thomas (chairman of B.O.A.C.), commenting on the report, pointed out that for the fourth year in succession sufficient profit had been earned "to provide in full for all depreciation and meet all interest charges"; in addition, a "substantial surplus" had been shown "without the aid of an Exchequer grant," and despite the loss of the *Comets*. He stressed that it was entirely due to the Corporation's success in improvising a replacement service after the withdrawal of the *Comets*, and to the soundness of its financial structure, that it had been able to "absorb a crippling blow and yet end the year financially stable."

It was announced on Oct. 4 that Mr. Whitney Straight, deputy chairman of B.O.A.C., was leaving the Corporation to become executive vice-chairman of Rolls-Royce Ltd. Mr. Boyd-Carpenter (Minister of Transport and Civil Aviation) announced on Nov. 15 that Lord Rennell, a partner in the banking firm of Morgan, Grenfell and Co., and a part-time member of the B.O.A C. board since March 1954, would succeed Mr. Straight as the Corporation's deputy chairman.
(B.O.A.C. Annual Report - Times - Daily Telegraph)
(Prev. rep. 1953-54 Report, 13880 A; Aircraft, 14397 A.)

B. RUMANIA. — Reduction of Military Service.

It was officially announced in Bucharest on Nov. 22 that the Rumanian Government had decided to reduce the period of military service from Dec. 1, as follows: (*a*) conscripts in the Army would in future serve for two years instead of three years; (*b*) those in the Navy would serve for two years instead of four years. The period of service in the Air Force, the anti-aircraft formations, and the frontier guards remained unchanged at three years.—(Le Monde, Paris) **(Prev. rep. 14393 B.)**

C. SWITZERLAND. — General Elections. - Corrigendum.

In the tabulated results of the recent Swiss general elections, given in 14533 A, the figures for the Communist Party should be transposed—i.e., the figure "4" should come under the column for 1955, and the figure "5" under the column for 1951. As explained in the article, the Communists suffered a net loss of one seat.
(Ed. K.C.A.)

A. SUDAN. — Sudanese Proposal for Plebiscite on Self-determination. - British and Egyptian Approval. - Withdrawal of British and Egyptian Forces. - Resignation and Reappointment of Azhari Cabinet. - Suppression of Equatoria Mutiny. - Commission of Inquiry.

The Sudanese Parliament adopted unanimously on Aug. 29 a resolution expressing the opinion that "a direct plebiscite is the best method of ascertaining the true wish of the Sudanese as regards self-determination," and calling upon the Government to convey this opinion to the British and Egyptian Governments.

The Prime Minister, Mr. Azhari, suggested on Oct 18 that the decision on the Sudan's future and the drawing-up of a Constitution and electoral laws should be entrusted to the present Parliament instead of to a Constituent Assembly as envisaged by the Anglo-Egyptian agreement of 1953, thereby making a plebiscite unnecessary [In making this proposal, it was believed that Mr. Azhari was partly influenced by the situation in Equatoria province, where the unsettled conditions caused by the recent mutiny would make it impossible to hold either a plebiscite or elections for some time]

In a subsequent Press statement on Oct 29, Mr Azhari reiterated his suggestion that the present Parliament should take the decision on the independence of the Sudan and should then seek the approval of the co-domini An outline of this view—which, he emphasized, was "an idea only"—had been put before a joint parliamentary committee for consideration by all parties, but it might be some time before it was fully explored, until it was accepted or rejected, the Government would continue on the assumption that the country's future would be decided by plebiscite or along the lines laid down in the 1953 agreement

On Oct. 21 the Egyptian Government invited Czechoslovakia, India, Norway, Pakistan, Sweden, Switzerland, and Yugoslavia (the seven countries chosen by the Sudanese Parliament to supervise the process of self-determination) to serve on the international commission, but enclosed draft terms of reference which ignored the Sudanese Parliament's recommendation for a plebiscite. In London, it was pointed out by the Foreign Office on Oct. 22 that the invitations had been sent without consultation with Britain, and that the commission could not convene until the condominium Powers [i.e. Britain and Egypt] had agreed on its terms of reference. The Indian Government accordingly informed Egypt on Nov. 2 that it was unwilling to serve on the commission unless its terms of reference were acceptable to Britain.

In a Note to Britain, published on Oct. 29, the Egyptian Government stated that it approved the holding of a plebiscite and wished to negotiate the necessary amendment of the 1953 agreement; it was suggested that the plebiscite should be accompanied by the election of a Constituent Assembly to draw up the Constitution and a permanent electoral law. The British Government announced on Nov. 4 (*a*) that, in view of Mr. Azhari's statement of Oct. 29, it had accepted the proposal for a plebiscite; (*b*) that it would invite the Governments chosen by the Sudanese Parliament to take part in the international commission; and (*c*) that it was ready to discuss with Egypt the amendment of the 1953 agreement. Invitations to serve on the commission were accepted on Nov. 9 by the Indian Government, which nominated Colonel E. H. Zaidi (a former Indian representative at the U.N. General Assembly) as its representative, on Nov. 15 by Czechoslovakia, and on Nov. 22 by Switzerland.

Following discussions between the British Ambassador in Cairo (Sir Humphrey Trevelyan) and the Egyptian Minister of the Interior (Colonel Mohieddin), it was announced in the Egyptian capital on Nov. 29 that Britain and Egypt had reached agreement for a plebiscite on self-determination in the Sudan. Specifically, Britain and Egypt had agreed on (1) the amendment of the 1953 Anglo-Egyptian agreement on the Sudan in connexion with the holding of a plebiscite; (2) the formation of an international commission to supervise the plebiscite; and (3) the terms of reference of the international commission.

The withdrawal of the British and Egyptian armed forces from the Sudan was completed on Nov. 13. British and Egyptian Army units had been stationed in the country since 1898, and R.A.F. units since 1923.

Other recent developments in the Sudan are summarized below under cross-headings:

Resignation and Reappointment of Azhari Cabinet.

Mr. Azhari's Government resigned on Nov. 10 after it had been defeated in the House of Representatives by 40 votes to 45 during the Budget debate. The Government's defeat was caused by the fact that four parliamentary under-secretaries, who had resigned from the Government (but not from the National Unionist Party) on the previous day, voted with the Opposition. In a statement issued at the time of their resignation they had announced their support for the demand, which had been put forward by all the Opposition parties, for the formation of a national all-party Government for the remainder of the transitional period.

The Opposition agreed on Nov. 11 to form a coalition Government under the leadership of Mr. Mirghani Hamza, who had formed the Independent Republican Party after his dismissal from the Government in December 1954 (see 13969 A). When a vote was taken on Nov. 15, however, three of the four under-secretaries supported Mr. Azhari, who, in consequence, was re-elected Prime Minister by 48 votes against 46 for Mr. Hamza. Mr. Azhari's new Cabinet, which was sworn in on the following day, was the same as before, except that Mr. Buth Diu was appointed to the post of Minister of Animal Husbandry, which had been vacant since June.

Suppression of Equatoria Mutiny.

During the first few days of September units of the Sudan Defence Force reoccupied without opposition the areas of Equatoria province affected by the mutiny in August. The rounding-up of the mutineers, many of whom had returned to their villages or taken to the bush, proved a slow process, and an ultimatum was issued to the chiefs of the province to assist in bringing in members of their tribes. When this expired on Sept. 20, however, only about 400 of the garrison of Torit (originally numbering nearly 1,000) had surrendered, in addition to about 150 mutineers who had given themselves up at the Uganda border. The Government subsequently announced on Nov. 3 that 959 of the mutineers had given themselves up, but that about 360 were still at large.

Mr Lennox-Boyd, the British Colonial Secretary, told the House of Commons on Oct. 26 that 167 soldiers and between 2,000 and 3,000 civilians from the South Sudan had fled into Uganda The *Daily Telegraph* correspondent in Kampala, however, reported on Oct. 30 that the number of civilian refugees given by Mr Lennox-Boyd was a considerable underestimate, and that the number of tribesmen who had entered Uganda was smaller than that of those who had fled to the Belgian Congo and to French Equatorial Africa.

A Commission of Inquiry, consisting of a member of the judiciary, a Southern chief, and the Khalifa Maghoub (a former police officer and deputy agent in London) was appointed by Mr. Azhari on Aug. 29 to determine the causes of the mutiny. As a result of the commission's investigations, which opened in Khartoum on Sept. 17, fuller details of the mutiny and of the events leading up to it became available.

Daoud Abdel Latif (Governor of Bahr-el-Ghazal province and a former Governor of Equatoria), giving evidence on Sept. 19, suggested the following contributory causes of the mutiny: the "separatist" policy of previous administrations, the alleged encouragement of enmity towards the Moslem Northerners by Christian missionaries; the hopes of advancement raised among the Southerners by party politicians; subversive propaganda by the Egyptian Government; and the present Sudanese Government's failure to co-operate with Northern administrators in the Southern provinces and to heed their repeated warnings. Army officers and police officials gave evidence that documents had been discovered several days before the mutiny revealing the existence of a secret organization headed by a local chief and a Government official, and including Southern officers, n.c.o.s, and men of the Equatoria Corps among its members. This organization, it was alleged, had received funds from outside sources and had distributed leaflets calling for a massacre of Northerners. Moreover, it was alleged that forged documents, purporting to contain confidential instructions from Mr Azhari to Northern officials that the Southerners should be expelled, and killed if they resisted, had been circulated in the South, and had also been broadcast by Cairo Radio and published in certain Egyptian newspapers.

Another contributory cause of the mutiny was believed to be the intensified agitation in support of federalist or separatist aims conducted by Southern politicians in recent months, in preparation for the Sudanese Parliament's decision on self-determination Witnesses before the commission alleged that contacts had existed between the soldiers who planned the mutiny and the Southern Liberal Party; that Eliya Kuse, a Southern member of Parliament, had received sums of money from Major Salah Salem (the former Egyptain Minister for Sudanese Affairs) in December 1954, and from an Egyptian Army officer in April; and that this officer had visited Torit early in August. A violent propaganda campaign against Mr. Azhari and his Government had been carried on immediately before the mutiny by Mr. Aliet (the former Minister of Animal Husbandry), Mr. Benjamin Lwoki (president of the Southern Liberal Party), and other Southern politicians, both in Cairo and in Khartoum (see 14377 A).

Unrest among the Equatoria Corps and the police had led to a number of incidents from the end of July onwards, and requests were made for Northern troops to be sent to Equatoria. When a company of Southern troops was ordered on Aug. 18 to move north from Torit they mutinied, killing three officers, and a rumour was then circulated that the Northerners were massacring the Southerners. The mutineers were joined by almost all the Equatoria Corps (totalling 1,100 men) and by the majority of the local African police force (totalling 400 men), whilst thousands of armed tribesmen launched

attacks, apparently planned beforehand, against Government buildings. After three days' fighting the mutineers held the whole of Equatoria except the town of Juba, which was defended by a small Northern garrison, and over 450 people were murdered in a general massacre of Northern officers, officials, and traders, together with their wives and children. At Torit all the Northern traders and their families (except 30 people who had taken refuge in an Italian Roman Catholic mission) were shot down with machine-guns, only three men surviving. The revolt, however, was confined to Equatoria province (which contains only 28 per cent of the population of the Southern Sudan), and the garrison at Wau (the capital of Bahr-el-Ghazal province) resisted attempts to persuade them to mutiny.

The mutineers were tried by a military court consisting of four senior officers assisted by an Indian judge, whilst the major civilian offenders were tried by three special courts presided over by Sudanese judges. Minor offences, such as looting, were dealt with by the district commissioners' and chiefs' courts. All court proceedings were subject to scrutiny by the Chief Justice of the Sudan, and all death sentences to confirmation by the Governor-General.

The Times Correspondent at Juba (southern Sudan) reported on Dec. 2 that about 1,800 prosecutions had been made in Equatoria; that at Yei 43 men had been sentenced to death, 19 to terms of imprisonment from five to 10 years, and 175 to lesser terms; and that at Torit (the centre of the worst massacres committed by the mutineers, including the machine-gunning of over 70 men, women and children), 83 men had been sentenced to death. In London, Mr. R H. Turton (Under-Secretary, Foreign Office) stated in a parliamentary written answer on the same date that 30 executions were reported to have taken place up to Dec. 1 for crimes committed during the mutiny, and that 19 death sentences had been commuted by the Governor-General. It had been reported from Khartoum on Nov. 25 that of a total of 163 death sentences so far passed, 72 had been confirmed by the Governor-General, the remaining cases being still under consideration.

By the beginning of December conditions in Equatoria were reported to have largely returned to normal.

A. LITERATURE. — Book Selections.

Selected books published during November in Great Britain, the United States, and France are given below.

Great Britain. Butler, D. E.—"The British General Election of 1955." (Macmillan, 24s.)
Carrington, Charles—"Rudyard Kipling His Life and Work." (Macmillan, 25s.)
Carson, Rachel—"The Edge of the Sea" (Staples, 18s)
Clifford, James L—"Young Samuel Johnson." (Heinemann, 25s.)
Daniel-Rops, Henri—"Jesus in His Time." Translated from the French (*Jésus en Son Temps*) (Eyre & Spottiswoode, 30s)
Gunther, John—"Inside Africa" (Hamish Hamilton, 30s)
Hanson, Lawrence and Elisabeth—"Portrait of Vincent. A Van Gogh Biography." (Chatto & Windus, 15s)
Kendall, Paul Murray—"Richard the Third" (Allen & Unwin, 30s.)
Linklater, Eric—"The Ultimate Viking." The Story of Sweyn Asleifsson (Macmillan, 21s)
Scott, J. M—"Sea-Wyf and Biscuit." (Heinemann, 12s. 6d.)
Symons, Julian—"Horatio Bottomley A Biography." (Cresset Press, 21s)
Wilson, Edmund—"The Scrolls from the Dead Sea." (W. H. Allen, 10s. 6d.)
Wrench, Sir Evelyn—"Geoffrey Dawson and Our Times." (Hutchinson, 30s)

United States. Acheson, Dean—"A Democrat Looks at his Party." (Harper, New York, $3.00)
Brinnin, John Malcolm—"Dylan Thomas in America · An Intimate Journal." (Little, Brown & Co, Boston and New York, $4.00.)
Kantor, MacKinlay—"Andersonville." (World Publishing Company, Cleveland and New York, $5.00.)
Truman, Harry S.—"Year of Decisions, 1945." Memoirs, Volume I. (Doubleday, New York, $5.00.)
White, Walter—"How Far the Promised Land?" Foreword by Ralph J. Bunche. (Viking Press, New York, $3.50.)

France. Dhotel, André—"Le pays où l'on n'arrive jamais" *Prix Fémina.*
La Varende—"M. le duc de Saint-Simon et sa Comédie Humaine" (Hachette, Paris)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14512 A.)**

B. YUGOSLAVIA. — Accession to Austrian Treaty.

The Federal Council of the Yugoslav National Assembly ratified at the beginning of November Yugoslavia's accession to the Austrian State Treaty signed on May 15 by Great Britain, the U.S.A., France, the Soviet Union, and Austria.
(Tanjug Agency, Belgrade) **(Prev. rep. 14412 D.)**

C. SWEDEN. — Referendum on "Rule of the Road." - Large Majority for Continuation of Left-hand Driving.

A national referendum was held on Oct. 16 in which all adult Swedes over 21 were asked whether they wished left-hand driving to continue (Sweden is the only country on the European continent where road traffic keeps to the left) or whether they desired a change-over to right-hand driving, as had been recommended by a committee of transport experts appointed by the Government. It resulted in a large majority for the continuance of left-hand driving, the results being: for left-hand driving, 2,111,342 votes (83.2 per cent); for right-hand driving, 386,017 votes (15.2 per cent); undecided, 1.6 per cent. Only 52 per cent of the electorate, however, voted in the referendum.

Although legislation approving right-hand driving in principle had been passed by the *Rigsdag* in 1953, a committee of road traffic experts was subsequently set up to report on the matter, it being provided that its recommendations should be submitted to a national referendum The committee recommended a change-over to right-hand driving by 1959, principally on two grounds (1) the large number of accidents caused by Danish and Norwegian drivers becoming confused by Sweden's left-hand system, (2) the fact that about 90 per cent of all vehicles in Sweden had the steering-wheel on the left-hand side The opponents of the scheme argued that the cost of changing over to right-hand driving would be excessive, and urged that the money could be better spent in improving roads and abolishing unguarded railway level-crossings, which had caused over 3,000 accidents in the past five years

The results of the referendum were not binding on the Government, but the Prime Minister (Hr. Erlander) indicated that the question had been shelved for the time being.
(Swedish Embassy, London - Svenska Dagbladet, Stockholm)
(Prev. rep. 13373 D.)

Note. The only other European countries to use left-hand driving (apart from Sweden) are the United Kingdom, the Irish Republic, Iceland, and Malta. Outside Europe, left-hand driving applies in all countries of the British Commonwealth except Canada, in a number of Asian countries (including China, Japan, Burma, Siam, and Indonesia), and in one Latin American country, Paraguay.
(Times - Daily Telegraph)

D. UNESCO.—Agreement on Extraterritorial Status of New Paris Headquarters.

Instruments of ratification of an agreement between the U.N. Educational, Scientific, and Cultural Organization (UNESCO) and France, recognizing as "international" the site on which UNESCO's new headquarters building will be erected in Paris, and thereby exempting the property and correspondence of UNESCO from French jurisdiction, were exchanged on Nov. 23 after the agreement had been ratified by the UNESCO conference and the French Parliament. On the same day the foundation-stone of UNESCO'S new headquarters building in the Place de Fontenoy was laid by Dr. Luther Evans (Director-General of the Organization) in the presence of a large gathering of academic and diplomatic representatives, including Dr. Jaime Torres Bodet the former Director-General of UNESCO and now Mexican Ambassador in Paris. The ground on which the building will be erected has been leased by the French Government to UNESCO for 99 years at a nominal rent of 1,000 francs a year.
(Le Monde, Paris) **(Prev. rep. 12680 A.)**

E. TUNISIA. — Ending of State of Siege. - Political Amnesty Bill passed by French National Assembly.

On the advice of the Acting French C.-in-C. in Tunisia, in his capacity as Tunisian Minister of Defence, the Bey of Tunis issued a decree on Sept. 21 ending the state of siege in Tunisia, which had been in force since 1939.

The French National Assembly passed a Bill on Nov. 23 granting a complete amnesty for "all offences of any kind committed on the territory of Tunisia between Jan. 1, 1952, and Aug. 3, 1955, and connected with the political events which took place in that country during this period." The voting on the Bill was 391 to 199, the opponents belonging to the Right-wing parties.—(Le Monde, Paris) **(14427 A.)**

F. UNITED KINGDOM. — Sir Malcolm Trustram Eve appointed Commissioner of Crown Lands.

Sir Anthony Eden announced in the House of Commons on Nov. 3 that the Queen had approved the appointment of Sir Malcolm Trustram Eve, Q.C., as Commissioner of Crown Lands with a view to his subsequent appointment as chairman of the proposed board of trustees. Sir Malcolm (61) is First Church Estates Commissioner and chairman of the Road Haulage Disposal Board.—(Times - Manchester Guardian)
(Prev. rep. 14296 A.)

A. AUSTRIA. — Withdrawal of Occupation Forces. - Permanent Neutrality Law. - Formation of Austrian Army. - Soviet Return of Military and Civilian Prisoners.

Vienna was completely evacuated by the Allied troops on Sept. 19, when the last British and Soviet units left the Austrian capital. All the French occupation forces had been withdrawn from Austria some time earlier, whilst the U.S. forces, some 5,500 strong, had left the country for Italy during August and early September, with the exception of a few rearguards. The last organized units of the Soviet Army withdrew from Austrian territory on Sept. 19, whilst the last British troops left Klagenfurt on Oct. 24.

October 25—on which date the 90-day period for the withdrawal of the occupation forces ended, and Austria became a completely free and sovereign country—was celebrated throughout Austria as the "Day of the Flag." It was announced that the day would be celebrated in future every year.

The National Council (the Lower House of the Austrian Parliament) met on Oct. 26 and finally passed by an overwhelming majority the constitutional law pledging the Austrian Federal Republic to remain permanently a neutral country, in accordance with the undertaking given by the Austrian delegation at the negotiations with the Soviet Government in Moscow in May last. The Federal Council (the Upper House) passed the Bill on Oct. 28.

The Neutrality Bill—the first draft of which had been referred to the appropriate parliamentary committees before the summer recess in July—was adopted in the following version.

"With the object of the lasting maintenance of her independence from without and the inviolability of her territory, Austria declares of her own free will her perpetual neutrality She is resolved to maintain and defend it with all means at her disposal

Austria, in order to secure these objectives, will join no military alliances and will not permit the establishment of military bases of foreign States on her territory. The Federal Government is entrusted with the implementation of this constitutional law"

The Bill was supported by the two parties of the Government coalition (the People's Party and the Socialist Party), as well as by the four members of the Communist-led "People's Opposition" group. The Right-wing League of Independents, although it did not object to neutrality as such, opposed the Bill because it objected to the phrase "of her own free will," and asserted that Austria had been more or less forced to accept neutrality as a condition of regaining her freedom.

Dr. Raab (the Federal Chancellor) stated during the final debate that the declaration of Austria's permanent neutrality had been incorporated in a special constitutional law, not only in order to bind the Legislature and the Executive in future, but also because it was a matter of such supreme importance that the Government had considered it appropriate to leave the ultimate decision to Parliament He emphasized, however, that neutrality as the basis of the country's foreign policy only imposed obligations on the State as such, but not on the individual citizens. Consequently the Neutrality Law would in no respect curtail the basic rights and liberties of the individual citizen, the freedom of the Press, or freedom of speech, nor was any obligation to maintain an ideological neutrality involved "Our military neutrality," he added, "includes no liabilities or restrictions in the economic or cultural spheres"

After reiterating Austria's request for membership of the United Nations, and stressing that the undertakings under the Bill had been given voluntarily in order to guarantee peace and well-being to the country, Dr Raab expressed Austria's gratitude to the U.S.A. for the American help given in the difficult post-war period, to the Soviet Union for changing its stand and making the completion of the Austrian Treaty possible; and to Britain and France for their constant proofs of friendship "Now that the troops of the four great Powers have left our country," he added, "we may say: 'Long have we had to wait for our freedom, but we have parted as friends' Our sincere friendship with all the four great Powers will be an important factor in our neutrality policy and will constitute a guarantee of our independence. I would like to state, however, that we would welcome an express joint guarantee of the inviolability and integrity of our territory by the four great Powers."

Speaking of Austria's relations with her neighbours, Dr Raab paid tribute to Switzerland's friendship and help; expressed the hope that outstanding questions with the German Federal Republic would be solved in a friendly spirit and in "an atmosphere of calm and mutual confidence"; and spoke of the improvement in relations with Czechoslovakia and Hungary, expressing Austria's willingness to maintain understanding and neighbourly co-operation. As regards Yugoslavia, he referred to the "sincere friendship and mutually fruitful economic and cultural exchanges" which had developed during the post-war period, and expressed the hope that the forthcoming negotiations with that country on Austrian property would lead to a satisfactory solution. With regard to Italy, with whom Austria was connected by "sincere friendship" in the economic and cultural spheres, Dr. Raab referred to the Austro-Italian agreement of 1946 on South Tirol, and the differences which had since arisen in its interpretation and implementation; he welcomed, however, the understanding shown by the Italian Government in recent talks in Rome, and expressed the hope that Italy would understand the interest which Austria felt in all matters relating to South Tirol.

Other developments in connexion with the regaining by Austria of her full sovereignty are described below.

Formation of Armed Forces. The National Council passed on Sept 7 a Defence Bill, details of which had been worked out between the two Coalition parties The voting was 147 to 18, the opposition comprising the 14 Right-wing deputies (including those belonging to the League of Independents) and the four members of the People's Front The Bill was approved by the Federal Council on Sept 14.

Under the Bill all male Austrian citizens between the ages of 18 and 51 became liable to nine months' military service, but without supplementary training periods when they were placed on the reserve Volunteers will be accepted for longer periods of service up to nine years, and these regulars will supply n.c o.s and the personnel of training cadres Active officers will all be regulars

The normal call-up age will be 19, but university students and others preparing for a profession will be allowed to postpone their service until they are 25 or (for doctors) 28 Conscientious objectors will be required to perform 12 months' service without weapons

The Bill vested supreme command over the Federal Army in the Federal President It laid down that any powers not exercised by the President himself would be exercised by the competent Federal Minister, within the authority given him by the Government

A National Defence Council will be set up, attached to the Federal Chancellery, to decide on all basic questions of defence It will meet under the chairmanship of the Federal Chancellor and will include the Vice-Chancellor, other Ministers concerned, two defence officials, and two representatives of each of the major political parties.

Other provisions of the Defence Law dealt with (*a*) the setting-up of a Complaints Commission, comprising representatives of the principal political parties under the chairmanship of the competent Federal Minister, and acting as an independent forum to which complaints in all Army matters might be submitted; (*b*) the election of "soldiers' representatives" who would co-operate with local commanders in all matters concerning pay, clothing, accommodation, food, leave, complaints, and disciplinary matters, without, however, prejudicing the rights of individual servicemen to put forward their wishes and complaints; (*c*) the preservation of their civilian jobs and rights of promotion for called-up servicemen.

The basis for the formation of the new Army had been laid on July 21, when some 6,500 cadets of the *gendarmerie* schools in Western Austria passed formally from the jurisdiction of the Ministry of the Interior to that of the newly-created Defence Office of the Federal Chancery (see 14309 B). Dr Raab said in a Press statement on Oct 8 that Austria's armed forces would be limited for the time being to 24,000 men, who would be called up in two stages He also stated that the new Army would be supplied with arms and equipment from all the four former occupation Powers (see below)

Civil Aviation. The Allied Council decided on June 10 to return full control over civil aviation to the Austrian Government On Sept 17 it was officially announced in Vienna that Austria had regained complete sovereignty in the air, and that the last civil aviation restrictions in the Soviet Zone had been abolished

Arms Supplies by Allied Powers. It was officially announced on Sept 15 that "at the request of the Austrian Government" the Soviet Union had offered to provide arms and ammunition for the new Austrian Army, and that the supplies would include rifles, machine-guns, howitzers, tanks, aircraft, ammunition, and spare parts.

An agreement under which the U.S.A. handed over to Austria all buildings, roads, utilities, and related installations constructed by the U S. occupation forces was signed in Vienna on Sept 26. The cost of the installations, etc., transferred, which included the big Roeder Camp, near Salsburg, was estimated at about $22,000,000. In return the Austrian Government agreed to take over all costs incurred by the U.S. forces in connexion with rail transport and communications within Austria, terminal rents after Aug. 31, and the restoration of real estate and claims for damage remaining unsettled; the total cost of these obligations was estimated at about $1,500,000. It was stated that the agreement was not concerned with the "large amount" of military equipment which had been made available from U S. reserve stocks to Austria.

As stated by Dr. Raab (see above), arms and equipment were also supplied by Britain and France, no details, however, were announced.

Return of Prisoners by Soviet Union. In accordance with the Moscow agreement, the Soviet Union returned to Austria, between June 5 and Aug 7, a total of 693 Austrian military and civilian prisoners held in the Soviet Union, among them 46 women. The civilian prisoners, many of whom had been sentenced on charges of alleged espionage and anti-Soviet activities, included Dr. Margarete Ottlinger (departmental head in the former Ministry of Economic Planning during the occupation period), who had been abducted from the Western sectors of Vienna in 1948, and Chief Police Inspector Anton Marek, who had been detained while on an official visit to the Soviet authorities Whilst the great majority of the prisoners were freely released, 74 who had been condemned for serious war crimes, and to whom the Russians refused an amnesty, were handed over under escort to the Austrian Ministry of the Interior.

The last Austrian to be released (on Oct. 17) was Dr. Alfred Sokolowski, a Vienna city councillor and official interpreter to the Vienna municipal administration, who had been arrested by the Soviet occupation authorities on Jan. 15, 1955.

It was announced in Berne on Nov. 24 that the Swiss Government had officially recognized Austria's perpetual neutrality.—(Wiener Zeitung - Neue Zürcher Zeitung - Times - Daily Telegraph - Le Monde, Paris - New York Times)

(Prev. rep. State Treaty, 14193 A; 14376 B; Soviet-Austrian Relations, 14532 A; Defence, 14309 B.)

A. NORWAY. — Cabinet Changes.

Hr. Jens Haugland was appointed Minister of Justice on Oct. 28 in succession to Hr. Jens Hauge, who had resigned three days earlier.

Hr Hauge's resignation followed a vote in the Storting concerning 183 Norwegian officials who had belonged to Quisling's *Nasjonal Samling* during the war and had been suspended from their duties for a time after the war. The officials concerned had claimed compensation in the courts for the salaries which they lost during the period of their suspension, on the ground that they had resigned from the *Nasjonal Samling* before Nov 24, 1944, the date on which the Norwegian Government—then in exile in London—had issued a decree declaring that all officials belonging to National Socialist organizations would forfeit their salaries The Norwegian Supreme Court had approved their claim, and Hr Hauge, in consequence, had recommended to Parliament that their back pay should be allowed to them The Storting, however, by 72 votes to 66, rejected this proposal and adopted another resolution, moved by members of the Labour Party (i e , the Government party), declaring that the claims in question had " lapsed "

Hr. Hauge, a lawyer, was one of the leaders of the Norwegian resistance movement during the war, heading the clandestine military organization. From 1945-52 he was Defence Minister in the first Gerhardsen Cabinet. When Hr. Torp became Prime Minister, Hr. Hauge was appointed a member of the Supreme Court, but on the formation of the present Gerhardsen Cabinet in January 1955 he entered it as Minister of Justice.

Earlier, at the beginning of July, Hr. Gudmund Harlem had been appointed Minister for Social Affairs in succession to Fru Rakel Seweriin (who resigned), whilst Fru Aase Bjerkholt was appointed Minister for Family and Consumer Affairs and Hr. Gunnar Bråthen Minister for Wages and Prices, both new portfolios.—(Aftenposten, Oslo - Norwegian Embassy, London)

(Prev. rep. Cabinet, 14013 D.)

B. WESTERN GERMANY.—Appointment of Minister for Atomic Questions. - Plans for Nuclear Reactors at Karlsruhe and Munich.

It was announced in Bonn on Oct. 12 that Herr Franz-Joseph Strauss, the Federal Minister without portfolio, had been appointed Minister for Atomic Questions.

In a letter to Dr. Hogner, the Chief Minister of Bavaria, which was reported in the Press on Aug. 21, Dr. Adenauer approved the Bavarian Government's plan to set up an atomic experimental reactor in Munich, additional to the one to be established at Karlsruhe under Federal auspices. On Oct. 11 it was officially announced that it had been decided to transfer the Max Planck Institute for Physics from Göttingen to Munich, where it would conduct research at the new atomic reactor station. The head of the Institute is Professor Werner Heisenberg, the eminent physicist and Nobel prizewinner.

Professor Ophuls, who led the West German delegation to the recent International Conference on the Peaceful Uses of Atomic Energy in Geneva, announced on Aug. 24 in Bonn that West Germany's first two reactors (i.e. those at Karlsruhe and Munich) would be purchased in the United States.
(Frankfurter Allgemeine Zeitung - Daily Telegraph - New York Times) **(Prev. rep. Cabinet, 14400 A; 13243 B; German Atomic Energy Projects, 14360 A.)**

C. SOVIET UNION. — The Leningrad Metro.

Leningrad's first underground railway, known officially as the V.I. Lenin Metro, was opened on Nov. 15. Built since the war, it is seven miles long, has eight stations (including the two termini), and connects all the city's main-line railway stations. Like the Moscow Underground, which was opened in 1935, each station on the Leningrad Metro is decorated with murals illustrating a special theme, e.g., subjects of historical, revolutionary, or literary interest. A decree was signed by President Voroshilov on Nov. 25 whereby the Moscow Metro was also given the name of the Lenin Metro. Hitherto the Moscow underground railway system had been named after M. Lazar Kaganovich, who was largely responsible for its construction. (Soviet Weekly - Daily Telegraph)

(Prev. rep. Moscow Metro, 1653 C.)

D. ITALY. — Approval of NATO Agreements.

The Italian Chamber of Deputies approved on Nov. 11 the agreement of June 19, 1951, on the status of NATO forces in Italy, against Communist and Left-wing Socialist opposition. It also approved a Bill ratifying the NATO agreement of Aug. 29, 1952, for the establishment of international military headquarters in Italy—i.e., Supreme Headquarters, Allied Powers, Southern Europe, which is installed at Naples. Both agreements had previously been ratified by the Senate.
(Corriere della Sera, Milan) **(Prev. rep. 11269 A; 9890 A.)**

E. NORTHERN IRELAND. — Salary Increases for Ministers and M.P.s. - New Salaries for Senators.

The Northern Ireland House of Commons approved regulations on Nov. 29 which increased the salaries of M.P.s from £200 to £400 a year, and established a new salary of £400 a year for Senators. Tax-free expense allowances of £300 a year for M.P.s, and £2. 5s. for each attendance by Senators, remained unchanged. [Hitherto, members of the Senate whose annual income from all sources (excluding the Senate attendance allowance of £2. 5s. a day) fell short of £600 were entitled to an annual payment to make up the deficiency, or £200, whichever was less, on making a declaration to the Speaker.]

The House also gave a second reading to the Ministerial and Other Offices Bill, which increased the salaries of the Prime Minister from £2,850 to £4,000; of the Attorney-General from £2,800 to £3,000; of Cabinet Ministers from £1,700 to £2,500; of the Minister in the Senate from £1,200 to £2,500; of the Speaker of the N.I. House of Commons from £2,000 to £3,000; and of the Speaker of the Senate from £1,000 to £2,000.

The increased salaries and the new salary for Senators will come into effect on Jan. 1, 1956. They were based on the recommendations of a Select Committee which had been appointed in June and presented its report on Oct. 5.

(Belfast Telegraph - Northern Whig)

F. POLAND - EASTERN GERMANY. — Agreements on Görlitz and Stettin. - Establishment of Consulates.

An agreement between the Polish and East German Governments was announced on Nov. 8 under which Poland agreed to return to the German Democratic Republic the eastern part of the city of Gorlitz (Zgorzelec), on the right (Polish) bank of the Neisse River, whilst the East German Government undertook to settle in that district of the city Germans who were at present living in Poland. The agreement also provided for a joint German-Polish commission to work out a plan for the common administration of the port of Stettin (Szczecin). It was also agreed that Poland would open Consulates in Leipzig, Dresden, Gorlitz, Erfurt, and Rostock, and that Eastern Germany would establish Consulates at Wroclaw (Breslau) and Gdansk (Danzig).—(Le Monde, Paris) **(14321 D.)**

Note. The city and port of Stettin, near the mouth of the Oder, was annexed by Poland in 1945 It lies on the left bank of the river and thus forms an *enclave* in German territory west of the Oder-Neisse frontier.

G. UNITED KINGDOM. — Foreign Trade. - Figures for September, October, and Third Quarter of 1955.

Imports into the United Kingdom in September totalled £304,400,000, exports £243,200,000, and re-exports £10,600,000, the adverse visible balance for the month thus amounting to £50,600,000. Total imports during the third quarter were £985,500,000, and exports and re-exports amounted to £758,900,000; the adverse balance was thus £226,600,000, bringing the total adverse balance for the first nine months of the year to £686,600,000.

Imports in October totalled £333,400,000, exports £267,800,000, and re-exports £12,800,000, the adverse visible balance thus amounting to £52,800,000.

H. CANADA. — Bank Merger.

Plans to amalgamate the Imperial Bank of Canada and Barclays Bank (Canada) were announced in Toronto on Oct. 11. The statement said that the amalgamation would first have to be approved by the shareholders of each bank and then by the Dominion Government, and that, on completion of the merger, both businesses would be continued under the name of the Imperial Bank of Canada. Barclays Bank in London and Barclays Bank, D.C.O., are already shareholders in the Imperial Bank of Canada and own the whole of the share capital of Barclays Bank (Canada)—(Montreal Star)

(Prev. rep. 14186 B.)

I. NATIONALIST CHINA. — Cabinet Appointment.

Kiang Piao, an economist, was appointed Minister of Economic Affairs in the Chinese Nationalist Government on Formosa on Nov. 4 in succession to Mr. K. Y. Yin.

J. CEYLON - SIAM. — Diplomatic Relations.

An agreement for the establishment of diplomatic relations was concluded between the Governments of Ceylon and Siam on Nov. 20.—(Ceylon Government Information Dept., Colombo)

A. MALAYA. — Inauguration of New Legislative Assembly. - Amnesty Offer to Malayan Communists. - Meetings between Government and Communist Representatives. - Sultan of Johore's Denunciation of Malayan Nationalism. - Further Outbreaks of Terrorist Activities. - Operations renewed by Security Forces.

Developments in the Malayan Federation since the beginning of August, when Tengku Abdul Rahman formed his "Triple Alliance" Government after the Federation's first general elections (see 14376 A), are described below under cross-headings.

Inauguration of New Legislative Assembly.

The new Legislative Assembly held its first session at Kuala Lumpur on Aug. 21 in the presence of the British Colonial Secretary, Mr. Lennox-Boyd (who was then visiting Malaya and Singapore), and the High Commissioner of the Federation, Sir Donald Macgillivray.

In his inaugural speech, Tengku Abdul Rahman called upon the British Government to appoint a special independent commission on Malayan constitutional reform, and also urged early talks in London on such matters as the "Malayanization" of the public services and the transfer to Malayan control of all matters pertaining to internal security and local defence. He stressed that the "Triple Alliance" of Malay, Chinese, and Indian organizations would take part in such talks only as equal partners in the affairs of Malaya, claimed that only by acceding to these demands could Malaya be "helped along the road to peace and prosperity and saved from Communism"; and said that the British Government must be prepared either to foster the growth of a "genuine nationalism" or to hand Malaya over to Communist control.

After declaring that it was "not unreasonable" for the Federation Government to expect independence for Malaya within a target date of four years, the Chief Minister added "If it is delayed beyond this period you will help the spread of Communism, since Communism thrives and flourishes on colonialism It will be a sorry day indeed, not only for us here but for the British people, if the Communists ever get a foothold in this country. They have already infiltrated into the rubber estates, mines, towns, and villages, and, what is worse, into our schools. Unless these infiltrations can be checked in time, the Communists will consolidate their position and constitute a real menace to the peace of Malaya and of the world."

Amnesty Offer to Malayan Communists.

In a statement on Aug. 23, Tengku Abdul Rahman announced that the Federation Government proposed to offer an amnesty to the Malayan Communists.

After stating that he had discussed this matter with Mr Lennox-Boyd, Sir Donald Macgillivray, and General Sir Geoffrey Bourne (the Director of Operations), Tengku Abdul Rahman stressed that the Government had no intention of recognizing the Malayan Communist Party or of negotiating with its leaders; he added, however, that he was prepared—in the capacity of a private citizen, and not as Chief Minister—to meet the Communist leader at an agreed rendezvous in the jungle. Although he did not think there could be any place for a Communist party in a self-governing Malaya, he said that the Communists could participate in the country's political life on the following conditions: (1) that they gave proof of their loyalty to Malaya; (2) that they respected legal and constitutional authority, (3) that they accepted the Malayan way of life; (4) that they conformed to a Malayan political system recognized by the Government; (5) that they ceased to be members of the Malayan Communist Party.

The Chief Minister's proposal for an amnesty was supported by Mr. Lennox-Boyd, Sir Donald Macgillivray, and General Bourne, the terms of the amnesty being broadcast by the High Commissioner on Sept. 8. They were as follows:

(1) Terrorists who surrendered would be given a free pardon for crimes committed under Communist direction before, or in ignorance of, the amnesty offer

(2) Terrorists could surrender to whom they wished, including members of the public

(3) Although there would be no general cease-fire, the security forces would be on the alert to help those who accepted the offer, and local cease-fires would be arranged for this purpose.

(4) The Government would conduct an investigation into those who surrendered. Individuals who showed that they genuinely intended to be loyal citizens, and to give up Communist activities, would be helped to regain a normal position in society and would be reunited with their families. As regards other persons, restrictions would be placed on their liberty, but if any wished to be sent to China their requests would be given consideration

(5) Terrorists could surrender in any of 186 designated "safe" areas, in which no troops would be present. [The designated areas included stretches of road and railway-line, rubber estates, tin mines, vegetable gardens, temples, etc.]

(6) There would be no time-limit to the amnesty, its termination depending upon the progress made.

Sir Donald Macgillivray said in his broadcast that the Government would repeal the emergency regulations "to the extent circumstances justify if it is satisfied that the response to the [amnesty] offer is such as to remove or reduce the need for these regulations." Emphasizing that the amnesty offer constituted "a major step," he added: "The Government realizes that people who have committed treason and murder in furtherance of Communist terrorism will escape prosecution. But it feels that this unusual act of clemency should be accepted to hasten the end of the emergency and thereby to lessen dangers to which law-abiding citizens are now exposed."

Immediately after the High Commissioner's proclamation over 20,000,000 leaflets were dropped by air over suspected Communist hide-outs in the jungles, giving details of the amnesty terms and safe-conduct passes for those who surrendered. Millions more leaflets were distributed by hand in villages where the inhabitants were known to be in contact with terrorists. Simultaneously, offensive military action against the terrorists—though not defensive action—came to a virtual standstill, whilst loyal aborigines were flown into the jungle to set up reception centres for terrorists who surrendered.

The response to the amnesty proved, however, to be very disappointing, little more than 30 terrorists—out of an estimated total of some 3,000—having surrendered by the end of November. Moreover, terrorist attacks—both on the security forces and against civilians—continued in different places after the proclamation of the amnesty, culminating on Nov. 21 in a large-scale attack on a village in the Cameron Highlands (see below). As a result, the security forces recommended full-scale military operations against the terrorists on Dec. 1, although officially the amnesty continued to remain in force.

Meetings between Government and Communist Emissaries.

It was announced in Kuala Lumpur on Sept. 28 that letters had been received by Tengku Abdul Rahman and other members of the Malayan Government, including Sir Cheng Lock Tan (president of the Malayan Chinese Association), stating that the secretary-general of the Malayan Communist Party, Chin Peng, was willing to send an emissary to negotiate with the Government on the restoration of peace in Malaya. Though the letters were unsigned, they were accepted as having come from Chin Peng. They were posted in the village of Klian Intan (northern Perak), a few miles from the Siamese frontier, and dated Sept. 24.

After consultations with Sir Donald Macgillivray and General Bourne, Tengku Abdul Rahman subsequently agreed to send emissaries to discuss the amnesty offer with Chin Peng, or representatives of the latter, at an agreed rendezvous. As a result of further correspondence between the Chief Minister and Chin Peng, a preliminary meeting took place on Oct. 17 at Klian Intan between Chin Peng, who was accompanied by a guide, and two representatives of the Malayan Government—Mr I. S Wylie, Deputy Police Commissioner for the Federation, and Mr. Too Joon Hing, Assistant Minister of Education. Mr. Wylie and Mr. Too were flown back to Kuala Lumpur after the meeting and reported to Tengku Abdul Rahman. [Mr. Wylie was parachuted into Malaya during the Japanese occupation and was personally acquainted with Chin Peng, both having fought in the resistance movement. The whereabouts of Chin Peng—the leader of the Communist rebellion, on whose head a large price had been put—had not been known for seven years.]

Two further meetings took place at Klian Intan on Nov. 17 and Nov. 20 between Mr. Wylie and Mr. Too, on the one hand, and Chen Tian, an emissary representing Chin Peng, on the other. In statements issued after these meetings, Tengku Abdul Rahman said that Chin Peng had suggested direct peace talks between them at an agreed spot—preferably Kuala Lumpur—and had also suggested that the Chief Minister of Singapore, Mr. Marshall, should take part in the discussions. In addition, the Communist leader had asked that the security of himself (Chin Peng) and other Communist emissaries at such talks should be guaranteed; that an international commission should be set up to implement any peace terms that might be negotiated; and that the Government's amnesty should be made "more liberal."

Commenting on these proposals, the Chief Minister said that he might meet Chin Peng towards the end of December, though not in Kuala Lumpur, and that the safety of the Communist emissaries would be guaranteed. He emphasized, however, that while he was ready to explain the amnesty terms to the Communist leader, and to consider any proposals the latter might put forward, he was "not going to negotiate or treat with Chin Peng as an equal," nor would there be any question of recognizing the Malayan Communist Party. Chin Peng's proposal for an international commission was dismissed by Tengku Abdul Rahman as "nonsense."

Sultan of Johore's Denunciation of Malayan Nationalism.

The octogenarian Sultan of Johore, speaking at Johore Bharu (the State capital) on Sept. 17 during the celebration of his diamond jubilee, gave a strongly-worded warning against premature Malayan independence and against the "dire consequences" which would result if the British left the country.

After denouncing those of his subjects who co-operated with the Communist terrorists and who clamoured for immediate independence, he declared that if Britain left Malaya the Communists would immediately take over, with a result that would be "99 times worse than the Japanese occupation." "It is all very well to clamour for

merdeka (freedom)," he declared, " but where are your warships, your planes, your armies to withstand and repel aggression from outside ? " After saying that he often wondered why the British people should continue to send their sons to be killed in Malaya, the Sultan declared : " If I were British I would leave Malaya today. But if the British go today, someone else will come in tomorrow."

The Sultan's speech was made in the presence of Tengku Abdul Rahman and other members of the Federation Government who were attending the celebrations The Chief Minister and the other Ministers subsequently boycotted the State banquet and other official functions to which they had been invited.

Terrorist Activities. - Operations by Security Forces.

As stated above, terrorist activities in different parts of Malaya—notably in Johore and Negri Sembilan—continued after the amnesty proclamation, and in some areas were on a bigger scale than for many months previously.

During the first fortnight of October terrorist bands in Johore wrecked a number of lorries and other equipment in attacks on estates and plantations, destroyed rubber trees, and clashed on several occasions with the local security forces. On Oct. 13 a British officer (a captain in the Royal Welch Fusiliers) and two other ranks were killed, and another soldier seriously wounded, in an ambush near Seremban (Negri Sembilan), whilst on Oct 20 terrorists seriously wounded Mr. C. G Stanley, the British manager of a rubber estate near Labis, in Johore Two other European planters, Mr. J. Hall and Mr. E King, were seriously wounded on Nov. 16, when terrorists attacked a rubber estate in the Rengam area of Johore. During the night of Nov. 20-21 over 100 armed terrorists attacked the new village of Kea Farm, in the Cameron Highlands, killed a policeman in an exchange of fire, murdered a villager, and escaped with a number of weapons, over 600 rounds of ammunition, and large quantities of food.

To combat the intensified terrorism in the jungle areas of central Johore, two additional infantry battalions (the 1st Bn. Hampshire Regt and the 1st Bn. Northern Rhodesia Regt.) and a squadron of parachute troops of the Special Air Service Regt were flown to the Kluang area in mid-October from other parts of the Federation. The reinforcements, totalling some 1,300 men, brought the number of troops in Johore State—British, Malay, Gurkha, African, and Fijian —to nearly 3,000.

Following the attack on the Cameron Highlands village (see above), General Bourne announced that full-scale operations against the terrorists would be resumed from Dec 1. On the latter date British and Gurkha troops accordingly launched a large-scale operation against terrorist hideouts in the jungles of Negri Sembilan, which were heavily bombed from the air

Australian and New Zealand Reinforcements.

The British and Imperial Forces in Malaya were reinforced in October and November by the arrival of the 2nd Bn. Royal Australian Regt. and by a New Zealand parachute squadron. It was announced on Oct. 19 by Far East Land Forces H.Q., Singapore, that the Australian and New Zealand reinforcements would join the 28th Commonwealth Independent Infantry Brigade Group, " the Army component of the Commonwealth Far East strategic reserve."

The formation of this Brigade Group, comprising British, Australian, and New Zealand forces, had been announced on Sept. 10 by the British War Office, which stated that it would consist of the 1st Bn. Royal Lincolnshire Regt , 1st Bn. Royal Scots Fusiliers, 2nd Bn. Royal Australian Regt., a squadron of the Royal Engineers, an Australian field battery, and New Zealand units

Terrorist-free Areas.

The Federation Government announced on Oct. 28 that a wide area of central Malaya—3,464 square miles, in Pahang State—had been declared " white," i.e., cleared of terrorists and no longer subject to emergency restrictions.

After pointing out that this area had formerly been one of the worst terrorist-infested regions of Malaya. the announcement added : " In the remainder of the Federation, too, good progress has been made. Throughout the country there are now 2,465,000 people, or nearly half the total population, living in ' white ' areas. In 1951, when the Communist organization reached its zenith, terrorist incidents averaged about 500 a month. In the worst month, June (1951), they reached a peak of 606. Now they average 60 a month,"

The announcement added that the Communists' strength in Malaya had been reduced from about 8,000 in 1951 to about 3,000 at the present time, and that " their organization has, in fact, been largely disrupted."—(Times - Daily Telegraph - New Commonwealth) **(Prev. rep. Malaya, 14376 A; 14309 A.)**

A. PAKISTAN. — Abolition of Visas for Travel to Denmark, Sweden, Holland, and Western Germany.

It was announced in Karachi on Nov. 1 that Pakistan and Sweden had agreed to abolish visas for nationals of one country visiting the other. Similar agreements had previously come into effect between Pakistan and the Netherlands (May 1953), Denmark (Oct. 1, 1954), and the German Federal Republic (May 1, 1955).—(Pakistan High Commissioner's Office, London)

B. UNITED KINGDOM. — Motor Industry. - Sir Miles Thomas joins Board of Harry Ferguson Research Ltd. - The Ferguson Car.

It was announced on Nov. 20 that Sir Miles Thomas, chairman of the British Overseas Airways Corporation, had joined the board of Harry Ferguson Research Ltd., a company formed by Mr. Harry Ferguson (designer of the Ferguson tractor) to develop motor vehicle design. The statement added that the Minister of Transport and Civil Aviation, Mr. Boyd-Carpenter, had agreed to Sir Miles's assumption of this extra responsibility, and that his position as full-time chairman and chief executive of B.O.A.C. would not be affected.

Sir Miles Thomas explained that the chairmanship of B O.A.C. would remain his " main preoccupation," but that, owing to " the back knowledge accumulated in 27 years' experience of the motor industry," he was in a position " to give advice on the production and marketing of the new Ferguson car " His position with Fergusons would be purely advisory and non-executive, and his director's fees would be refunded to the B O.A C. He added : " This car, which introduces many new characteristics important to safety and road holding, is of considerable military and export importance, and that is why the Minister has allowed me to do this." Negotiations for the production of the car were " reaching a decisive stage."

Mr. Ferguson explained on the same day that British motor manufacturers would be given the first opportunity of producing the new Ferguson vehicle. Discussions had taken place between Lord Chandos (chairman of the Northern Ireland Development Council) and himself on the possibility of manufacturing the vehicle in Northern Ireland, but it had been agreed that no decision could be made until plans had been considered for production on a wider basis, and that the next step was to bring British motor manufacturers into close consultation. So far, however, only preliminary conversations had been held, as the full range of Ferguson inventions had only recently been completed for demonstration in prototype vehicles.

In the House of Commons on Nov. 23 Mr. Boyd-Carpenter answered a number of Opposition questions about the decision to allow Sir Miles Thomas to take up part-time employment with a private firm.

The Minister said that the appointment of chairmen and members of public boards on a full-time basis did not preclude permission being given to them to accept membership of other boards, public or private. The essential point was whether such membership might affect the proper discharge of their duties. He was satisfied that in the case of Sir Miles Thomas the small amount of additional work involved in his membership of two outside boards would in no way affect the discharge of his duties as chairman of B.O.A.C. The position of boards of nationalized industries was quite distinct from that of Civil servants [who are not allowed to take outside part-time jobs], and there were a number of precedents of full-time members of these boards accepting seats on other boards.

It had been announced in 1954 that Mr. Ferguson had sold his interests in the Ferguson tractor (manufactured by the Standard Motor Company) and would concentrate on a group of inventions expected to revolutionize road vehicles.
(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Sir Miles Thomas, 14558 A.)

C. CEYLON - NETHERLANDS. — K.L.M. Participation in Air Ceylon Corporation.

Agreements were signed in The Hague on Nov. 21 under which the Air Ceylon Corporation (the official Ceylonese airline) will resume international operations in February 1956 by reopening a weekly service between Colombo and London, with the co-operation and technical assistance of K.L.M. (Royal Dutch Airlines). It was also agreed (*a*) that K.L.M. would become a shareholder in Air Ceylon for an initial period of 10 years ; (*b*) that effective control of Air Ceylon operations and a substantial interest in the Corporation would, however, remain vested in Ceylon ; (*c*) that K.L.M. would assist in the training of Ceylonese personnel, pending which time Air Ceylon aircraft would be manned by K.L.M. personnel ; and (*d*) that schemes had also been prepared for the future development of Air Ceylon services and for the purchase of modern four-engine aircraft. (Ceylon High Commissioner's Office, London)

D. UNITED STATES. — Appointment of New Commissioner of Internal Revenue.

The Secretary of the Treasury, Mr. Humphrey, announced on Oct. 25 that he was recommending to President Eisenhower the appointment of Mr. Russell C. Harrington as Commissioner of Internal Revenue in succession to Mr. T. Coleman Andrews, whose resignation had been announced on Oct. 16. Mr. Harrington (64) is a partner in an accounting firm at Providence, Rhode Island.—(New York Times) **(Prev. rep. 12777 B.)**

DECEMBER 3—10, 1955

A. BAGHDAD PACT. — First Meeting of Baghdad Pact Council. - Creation of Council of Deputies and Military and Economic Committees. - Permanent U.S. Liaison with Baghdad Pact Organization. - Persian Rejection of Second Soviet Protest against Persia's Adherence to Pact.

The first meeting of the Council of the Baghdad Pact was held in Baghdad on Nov. 21-22 under the chairmanship of the Prime Minister of Iraq, Nuri es-Said. The chief representatives of the five member-countries were—*Great Britain*: Mr. Harold Macmillan, the Foreign Secretary, and General Sir Gerald Templer, Chief of the Imperial General Staff; *Iraq*: Nuri es-Said, the Prime Minister, and Major-General Rafiq Arif, Chief of the General Staff; *Pakistan*: Choudhri Mohammad Ali, the Prime Minister and Minister of Defence, and General Mohammed Ayub Khan, the C.-in-C. of the armed forces; *Persia*: M. Hussein Ala, the Prime Minister, and General Hidayat, Chief of the General Staff; *Turkey*: M. Adnan Menderes, the Prime Minister, and General Tunaboylu, Chief of the General Staff.

The State Department in Washington had announced on Nov. 19 that, in reply to an invitation from the members of the Baghdad Pact, the United States had decided to establish military and political liaison with the organization. The statement expressed the hope "that this new organization will develop increasing strength, enabling it to fulfil its defensive purpose." It was also announced that the U.S. Ambassador to Iraq, Mr. Waldemar J. Gallman, and the C.-in-C. of U.S. Forces in the Eastern Atlantic and Mediterranean, Admiral John Cassidy, would attend the Council meeting as political and military observers respectively.

At the end of its deliberations the Council issued the following communiqué announcing the setting-up of a Permanent Council of Deputies, a permanent Military Committee, and an Economic Committee:

"(1) The inaugural meeting of the Baghdad Pact Powers . . was held in Baghdad on Nov. 21-22 under the chairmanship of the Prime Minister of Iraq, Nuri es-Said.

(2) The U.S. Government, having accepted the invitation of the Baghdad Pact Powers to take part in their proceedings in the capacity of observers, was represented on the Council by the U.S. Ambassador at Baghdad and on the Military Committee by a U.S. Service representative.

The Council welcomed the intention expressed by the U.S. Government to establish permanent political and military liaison with the Council and to have an observer present at the organizational meeting of the Economic Committee.

(3) The Government of Iraq emphasized that . the responsibilities of Iraq under the pact and as a member of the Council are in full accord with her obligations under the Treaty of Joint Defence and Economic Co-operation between the Arab League States. The other member Powers were glad to note this.

(4) The Council decided that the Baghdad Pact, the Special Agreement concluded under the Pact between Iraq and the United Kingdom, and the Instruments of Accession of the Powers who have joined the Pact, should be registered by the Government of Iraq with the United Nations.

(5) The five Governments reaffirmed their intention, as provided in the Pact and consistently with Art. 51 of the U.N. Charter, to work in full partnership and with united purpose for peace and security in the Middle East, to defend their territories against aggression or subversion, and to promote the welfare and prosperity of the peoples in that region.

(6) The five Governments reviewed the critical world situation, particularly in the light of the Geneva Conference, and resolved in consequence to maintain constant contact and even closer co-operation in the face of any threat to their common interests.

(7) The five Governments set up a Permanent Council as provided for in Article 6 of the Pact. The Council will be deemed to be in continuous session. Ministerial meetings will take place at least once a year. Iraq as host country will provide the first chairman until the end of 1956, and the chairmanship will be held thereafter in alphabetical order of the other Powers for a period of one year. If, however, additional meetings were to be held elsewhere than in the capital of the regular chairman, the host country will be asked to provide the chairman for that meeting.

(8) The permanent seat of the Organization and its dependent bodies shall be in Baghdad.

(9) Each Government will appoint a deputy representative to the Council with Ambassadorial rank.

(10) The Council, through their Permanent Deputies in Baghdad, shall meet at any time to discuss any matters of political, economic and military interest to the five Governments.

(11) The Council agreed that a permanent Secretariat for the Baghdad Pact Organization should be established in Baghdad.

(12) The Council established a permanent Military Committee, responsible and subordinate to the Council and charged with carrying out such directives as may be entrusted to it. The representatives of the five Governments on the Military Committee will be their Chiefs of Staff or their Deputies.

(13) The Military Committee at its first meetings laid the foundations of a military organization to ensure the security of the region.

In this connexion the Council noted that the Governments of Iraq and the United Kingdom have concluded a Special Agreement under the Pact on April 4, 1955. By this agreement Iraq assumed full responsibility for her own defence and took over the command and guarding of all defence installations in Iraq. Withdrawal of U.K. forces from the bases at Habbaniya and Shaiba is proceeding according to plan and as stipulated in the Special Agreement. . . . The Council further noted that the U.K. is affording Iraq help in building up her armed forces and maintaining them in a state of readiness for the defence of Iraq.

(14) The Council took note with appreciation of the generous and valuable help extended to each of them by the U.S. Government in the form of free aid in the provision of arms and other military equipment to enable them to strengthen their defence against aggression, and of the support and encouragement of the U.S. Government in their efforts to co-operate for peace.

(15) An Economic Committee was set up to develop and strengthen the economic and financial resources of the region. In particular, the Economic Committee will consider ways and means of sharing experience in the field of development, and how a regional approach to some of the problems involved would be of common benefit, including discussion on a regional basis with the World Bank, the W.H.O., UNICEF, and other specialized agencies.

(16) In this connexion the Council viewed with satisfaction the practical progress already made in this field. They noted, for example, that the U.K. has decided to assist Iraq by making available gold to constitute a reserve of £5,000,000 during the next two years, and by other forms of financial co-operation.

(17) The Council noted the statement of the U.K. representative that his Government are ready to use their experience in the field of atomic energy to assist other countries with their own atomic energy projects for the peaceful application of this science, and, particularly, that they were ready to assist the Baghdad Pact countries in the application of atomic technique, with special reference to local and regional problems. The Council welcomed this offer and directed the Economic Committee to consider its practical application.

(18) The five Governments expressed their gratification for the extensive economic assistance which has been freely accorded by the U.S. Government.

(19) The Council decided to meet again in special session in Teheran during April, 1956. They directed the Military Committee and the Economic Committee to report progress at that session."

As stated in the communiqué, the U.S. Government, in addition to maintaining permanent political and military liaison with the Council of the Baghdad Pact, also declared its intention to establish permanent liaison with the Economic Committee. Mr. G. E. Larsen (economic adviser at the U.S. Embassy in Baghdad) was nominated as permanent liaison officer.

Mr Gallman said in a press statement on Nov 23 that in present circumstances the U.S. Government did not intend to join the Baghdad Pact organization, although its eventual adherence was not excluded; at the moment, however, the U.S. Government considered that it could make a more efficacious contribution by staying outside the pact.

In addition to their official meetings, the four Prime Ministers and Mr. Macmillan also had private meetings at which they informally discussed the position in the Middle East. Mr. Macmillan broke his return flight to London for discussions in Beirut with President Chamoun and the Lebanese Prime Minister, M. Rashid Karameh.

The Soviet Government, in a Note handed to the Persian Chargé d'Affaires in Moscow on Nov. 26, reiterated its earlier protest against Persia's accession to the Baghdad Pact.

The Note expressed regret that Persia had decided to join the Baghdad Pact despite "the friendly and repeated warnings of the Soviet Union". Persia, it said, had thereby become "a member of a military grouping which constitutes an instrument of certain aggressive circles," and had "tied her interests to alien forces whose aim it is to maintain and re-establish the colonial dependence of the countries in that area." The Note declared that Persia's membership of the pact was "incompatible with the interests of consolidation of peace and security in the Near and Middle East and with the treaty obligations of Persia", referred specifically to Article 3 of the Russo-Persian Neutrality Treaty of 1927, which said that each side undertook not to take part in alliances or agreements directed against the other; gave a warning that Persia's adherence to the Baghdad Pact "inflicts serious damage" to Soviet-Persian relations; and said that Persia must "bear full responsibility for the consequences of joining the pact." "The situation created is fraught with danger to the Soviet frontiers," the Note concluded, "and the Soviet Government cannot be indifferent to Persia's accession to the Baghdad Pact."

The Soviet protest was again rejected by Persia in a Note published in Teheran on Dec. 6.

The Note said that Persia "cannot see any valid reason for anxiety by the Soviet Union over the situation created by Persia's accession to the Baghdad Pact." It emphasized once again the defensive nature of the pact, reiterated Persia's allegiance to the United Nations, denied that there had been any secret agreements, and refuted the assertion that Persia's adhesion to the pact would open the door to "colonial influence" in Persia. It went on to recall the continued presence of Soviet troops in Persia after the war—when they had

prolonged their stay beyond the wartime Anglo-Soviet occupation justified by the German threat—and accused the Soviet Union of trying at that time "to disintegrate Azerbaijan and Kurdistan," and of encouraging and supporting the formation of "traitorous and subversive bands." As regards the 1927 treaty, the Note said that the U.S.S.R had violated it in the past and could not base on it objections to the Baghdad Pact, which was in accordance with the U.N. Charter and contained no provisions threatening Soviet interests. The Note concluded: "The responsibility for any act detrimental to the relations between the two countries, which may ensue as a result of the incorrect interpretation given by the Soviet Government to Persia's accession to the Baghdad Pact, will devolve entirely on the Soviet Union"

Before leaving Baghdad for London, Mr. Macmillan announced that the Permanent Council set up at the Baghdad meeting would consist of the Ambassadors of Britain, Turkey, Persia, and Pakistan in the Iraqi capital, and the Iraqi Foreign Minister, who would be chairman for the first year of the organization's existence.—(Press Division, Foreign Office, London - Times - Daily Telegraph - Pakistan High Commissioner's Office, London - New York Times - Turkish Embassy, London - Le Monde, Paris) **(Prev. rep. 14505 C.)**

A. SOVIET UNION. — Hydrogen Bomb Test.

It was officially announced in Moscow on Nov. 26 that "tests of new types of nuclear and thermo-nuclear (i.e. hydrogen) weapons" had recently been carried out in the Soviet Union, and that they had "fully justified the corresponding scientific and technical calculations, showing the important new achievements of Soviet scientists and engineers." The announcement stated that the tests had ended with the explosion of a hydrogen bomb, described as "the most powerful of all explosions so far carried out"; that the bomb had been exploded at a great height to avoid radioactive fall-out; and that at the same time "wide research was conducted into questions of the defence of the population."

The following statement by the Soviet Government was appended to the announcement:

"The Soviet Government stands for the prohibition of atomic and thermo-nuclear weapons, with the establishment of effective international control Such a decision would permit the use of atomic energy to be directed towards exclusively peaceful aims. Proposals for the unconditional prohibition of atomic and thermo-nuclear weapons were made by the Soviet Union both in the United Nations and at the recent Conference of Foreign Ministers in Geneva, but were not accepted. The Soviet Union also submitted a proposal for the moral and political condemnation of atomic and hydrogen weapons. The Western Powers also refused to accept this proposal...

The Soviet Union will continue to strive for agreement in the U.N. on the prohibition of atomic and hydrogen weapons, on the reduction of all other types of armaments, on the further reduction of international tension, and on the establishment of confidence between States, as well as for the consolidation of peace generally."

Mr. Khrushchov (who was paying an official visit to India at the time, together with Marshal Bulganin) confirmed on Nov. 27, in a speech at Bangalore, that the Soviet Union had exploded a bomb "of unprecedented power" equivalent to "millions of tons of conventional explosives," and said that Soviet scientists and engineers had succeeded in achieving "the maximum explosion with the use of the minimum of atomic power." He reiterated, however, that the U.S.S.R. desired the total prohibition of all atomic and thermo-nuclear weapons, and gave an undertaking that it would not be the first country to use them.

Although no statement on the Soviet atomic tests had been made in the U.S.S.R. prior to the announcement of Nov. 26, three statements had previously been issued by the U.S. Atomic Energy Commission.

The first U.S. statement (Aug. 4) said that the Soviet Union had resumed tests of nuclear weapons "in the past few days," and that this might mean "the beginning of a new test series." The second statement (Sept. 25) said that "another Soviet nuclear explosion occurred in recent days, indicating a continuation of their tests of atomic weapons." In its third statement (Nov. 23) the A.E.C. said that the latest explosion in the Soviet test series was "the largest thus far in the U.S S.R." and "in the range of megatons" [a megaton is equivalent to the explosive force of 1,000,000 tons of T.N T.], indicating "an increasingly intensive effort by the Soviet Government to develop their nuclear-weapons potential." All three statements were issued by Rear-Admiral Lewis Strauss, chairman of the Atomic Energy Commission.

A Moscow radio commentator declared on Nov. 28 that the Soviet Union "cannot discontinue the production and testing of nuclear weapons so long as the United States and Britain manufacture such weapons and test them." He added, however: "The proposals which the U.S.S.R. has put before the United Nations stipulate a total ban on nuclear weapons and their removal from conventional armaments. As one of the first steps towards this, the U.S.S.R. suggests that the countries which possess nuclear weapons should undertake to discontinue their testing. We are ready to do so here and now if the other Powers possessing such weapons agree to do the same."

In Britain, the Prime Minister was asked by Mr. Attlee (Leader of the Opposition) on Nov. 30 whether, in view of the Moscow broadcast, he would approach the Soviet Union and the U.S.A. with a view to stopping tests of hydrogen bombs.

Sir Anthony Eden, in reply, said that the terms and scope of the Moscow broadcast were "far from clear" and "might have appeared in a better light if it had been made before the recent Soviet explosion, of which Mr Khrushchov has spoken in such enthusiastic terms" No communication had been received from the Soviet Government suggesting an agreement with Britain and the U S.A to stop further hydrogen-bomb tests, but H.M. Government were ready at all times to discuss these matters. In such discussions, however, regard would have to be paid to the number and nature of the tests which each country had already made, as well as to the number and nature of tests proposed. It remained the view of H M. Government that a comprehensive agreement on disarmament was the only final solution to these problems.

Mr. Attlee: "As I understand it, nothing that is not official is allowed to be said over Moscow radio, and therefore we are allowed to take this statement as authoritative from the U.S S R. Government In view of the fact that there is still considerable doubt among scientists whether these explosions may not have very deleterious effects, should we not take any opportunity there is to try to halt these experiments? Surely this gives an opportunity for an approach?"

Sir Anthony Eden. "I said deliberately that the terms of this statement were not clear. The words 'nuclear weapons' were used several times—which, in the language originally used, means atomic weapons as well as hydrogen weapons As the House will see readily, the abolition of all tests of atomic weapons as well as hydrogen ones would be an entirely different matter from the banning of hydrogen-bomb explosions It is for that reason we are ready to discuss this question at any time or place, but we must take some account of our position in relation to these discussions"

The Prime Minister was again asked on Dec. 6, by Mr. Roy Mason (Lab.), (*a*) whether, at his forthcoming meetings with Marshal Bulganin [i.e. during the Soviet Prime Minister's visit to Britain in the summer of 1956—see 14369 A] and President Eisenhower (see 14566 B) he would propose limiting atomic and hydrogen bomb tests to "one per country per year," and (*b*) whether he would suggest to them the cessation of all such tests. Sir Anthony replied:

"I would remind the House that our decision to manufacture the hydrogen bomb was announced in the Statement on Defence on Feb. 17 this year, which was approved by this House on March 2 H.M. Government have no intention of departing from this decision, for they still regard our manufacture and possession of the hydrogen bomb as a deterrent to war.

While H M. Government will at all times welcome arrangements which contribute to world security, they are not prepared to accept agreements which would put the U.K. in a position of decisive inferiority to other great Powers, a position which is not justified by the state of our scientific knowledge and resources. H.M. Government are, however, prepared to discuss methods of regulating and limiting test explosions which take account of their own position as well as that of other Powers."

The U.S. Secretary of State, Mr. Dulles, was asked at a press conference on Nov. 29 to comment on the Moscow radio statement that Russia would cease A-bomb and H-bomb tests if other countries did the same. In reply, Mr. Dulles said that the U.S. Government had for many months been studying the possibility of an agreed suspension of tests, but so far no formula had been found to meet two essential criteria: (1) whether any agreement on the suspension of tests would be dependable; and (2) whether it would be in the best interests of the United States and the world. The subject involved many highly technical problems, and no conclusions had yet been reached.—(Times - Le Monde, Paris - New York Times)

B. UNITED KINGDOM. — Sir Anthony Eden and Mr. Macmillan to visit the United States and Canada.

Sir Anthony Eden informed the House of Commons on Dec. 5 that he had accepted an invitation from President Eisenhower to visit Washington for discussions towards the end of January, 1956; that he would be accompanied by the Foreign Secretary; and that both he and Mr. Macmillan would visit Ottawa after leaving Washington, in response to an invitation from the Canadian Prime Minister. (Times)

C. NORWAY. — Golden Jubilee of King Haakon.

The 50th anniversary of the accession of King Haakon VII was celebrated throughout Norway on Nov. 25. The King (who is 83) was in hospital at the time recovering from a fractured thigh caused by a fall five months earlier.
(Aftenposten, Oslo)

A. WESTERN GERMANY. — Defence Legislation. - The Volunteers Act and Soldiers' Bill. - Civilian "Vetting" Committee for Higher Military Appointments. - Herr Blank's Statement on Defence Policy. - Four-year Programme for Armed Forces. - Cabinet Defence Council. - Formal Rebirth of German Army.

Following the coming into force of the London and Paris Agreements, and the entry of the German Federal Republic into NATO and the Western European Union, a number of measures for the creation of West German armed forces were taken by the Federal Government and Parliament, as described below under cross-headings.

The Volunteers Bill.

On May 28 the Federal Government presented to Parliament a temporary measure—the Volunteers Bill—designed to enable the Government to proceed immediately with the raising of armed forces until such time as the necessary permanent defence legislation had received parliamentary approval. As originally presented, the Volunteers Bill was a short measure containing the following provisions :

(1) (i) The formation of the fighting forces of the German Federal Republic would begin with the enrolment of volunteers. (ii) Until the promulgation of definitive legislation, these volunteers would have the status of "officials on probation," and the legislation on the rights and duties of Civil Servants would be applicable to them *mutatis mutandis* (iii) Soldiers would take the following oath of service . "I swear to uphold the Basic Law of the Federal Republic of Germany, to serve faithfully, and to defend freedom and the Fatherland valiantly with my life, so help me God "

(2) Rates of pay for volunteers would be determined by legal ordinance, pending future legislation on Service pay, and would be related to corresponding grades in the Civil Service.

(3) The Bill would enter into force on the day of its promulgation, and would cease to have effect upon the entry into force of the Soldiers' Law (*Soldatengesetz*)—see below—and the Soldiers' Pay Law, and, in any case, on March 31, 1956 at the latest

The Bundesrat (Upper House), after endorsing numerous criticisms of the Bill by its Committee on European Security, refused to give a final opinion on the measure and returned it to the Federal Cabinet on June 10.

In his report to the Bundesrat on the latter date, the chairman of the European Security Committee—Dr Sträter (Christian Democrat), Minister for Federal Affairs in the *Land* Government of North Rhine-Westphalia—described the Volunteers Bill as a "*blitz* Bill in three paragraphs," and criticized the "unworthy haste " with which such an important measure had been presented to Parliament Specifically, he made the following criticisms of the Bill (*a*) it made no provision for parliamentary control of the armed forces, nor did it give an assurance that their administration would be in the hands of the civilian authorities , (*b*) it did not give clear expression to the legal status of members of the armed forces, a defect which might "seriously prejudice their future " , (*c*) it sought to regulate only one part of the problem, without dealing with the defence structure as a whole ; (*d*) it did not indicate "how the military forces are to fit into the structure of our State and society."

A resolution recapitulating these criticisms, and demanding that decrees implementing the Bill should be subject to its approval, was unanimously adopted by the Bundesrat At the same time, however, the Bundesrat declared (with only the four Hessian representatives dissenting) that it was "of the same opinion as the Government that the Paris treaties should be implemented without delay," and that it was willing to take its full legislative responsibility in this matter

Despite the Bundesrat's criticisms, the Federal Government announced on June 15 that it intended to present the Volunteers Bill to the Bundestag (Lower House) unaltered and in its original form. The Bill was accordingly introduced in the Bundestag on June 27.

On the previous day (June 26) the Free Democratic Party announced that they would insist that the Federal Government should abide by its undertakings on defence legislation which it had given to the coalition parties early in 1954—specifically, that the President of the Federal Republic should become Commander-in-Chief of the German armed forces, a condition on which the Free Democrats had placed special emphasis [Under pressure from the Free Democrats, Dr Adenauer had agreed at the time that constitutional amendments should be written into the Basic Law to regulate the questions of the C.-in-C. of the armed forces, the territorial structure of the forces, and the defence administration. The Free Democrats had insisted that the Chancellor should give a written undertaking to this effect, subscribed to by all the coalition parties, and this was accordingly done on Feb 26, 1954]

In presenting the Bill to the Bundestag, Herr Theodor Blank, the Defence Minister, made a declaration on the Government's defence policy in general.

Herr Blank expressed the Federal Government's view that, as defence was a sovereign function of the State, responsibility for it was subject to the principles laid down in the Basic Law, and that accordingly the armed forces were "part of the Executive." Although certain functions belonged to the Federal President as head of State (e.g the right of reprieve), whilst other functions (e.g. the right of appointment) could be assigned to him, the armed forces as such came under the responsibility of the Federal Government and thus under parliamentary control Within the Federal Government, the Federal Chancellor's task of determining the basic outlines of policy was also applicable to defence matters, whilst the Federal Defence Minister—within the same principles—would have full responsibility for all defence matters and would direct the armed forces.

Referring to the international agreements on the rearmament of Germany, and to the strength of the future German forces Herr Blank recalled that under the Paris Agreements the Army would consist of 12 divisions totalling 370,000 men , that the Air Force would have about 70,000 men and 1,326 front-line aircraft, whilst additional units would also be required for the telecommunications and ground organization of NATO ; and that the Navy would have 20,000 men, with only light warships He added that territorially the military organization would be divided into six areas, in conformity with the borders of the *Länder* ; that the Federal Government would attempt to man and distribute the various units in such a way that men were stationed in their own *Land* , but that technical transport personnel might necessarily be required to serve outside their home areas The Federal Government would also consult the *Länder* Governments on the stationing of garrisons, the construction of aerodromes, and the building of other defence installations, so as to meet their wishes as far as possible.

On the question of military service, Herr Blank pointed out that universal military service would become necessary at a later stage—i e , after the basic cadres, to be recruited from volunteers, had been formed and trained The peacetime obligation for service would extend between the ages of 18 and 45, though for officers and n c.o s a longer period was contemplated ; men would normally be called up at the age of 20 for 18 months' service ; reasons for deferment or exemption would be clearly defined , and the right of conscientious objection to military service would be recognized.

Dealing with the legal status of the members of the future armed forces, Herr Blank outlined the principles to be laid down in the Soldiers' Law which the Government had already submitted to the Bundesrat. He mentioned, *inter alia*, that the problem of the individual soldier's dilemma when faced with a criminal order—a problem which arose in many cases of war crimes—would be dealt with in the *Soldatengesetz* ; that the power of command would be "expressly tied to law and justice " ; and that the *Soldatengesetz* would "itself deprive a criminal order of its binding force "

Though the obligation of defence might be a necessary evil, Herr Blank continued, "the soldier must not be a necessary evil in the mind of the citizen " To regard the soldier as an evil would be "precisely what we want to avoid—namely, the isolation of the armed forces from the community." In its preparatory work on the "inner structure " of the fighting forces, the Government had sought to preserve civil liberties within the forces to the maximum extent permitted by the soldier's task Special attention would be paid to the selection of officers for the higher posts, so as to ensure that those posts would be filled only by men who, in addition to possessing the necessary qualities of leadership, were also "convinced supporters of the democratic order." In a defence of the former German soldier, Herr Blank declared, amidst applause : "The German soldier did his duty bravely, loyally, and obediently He believed himself to be doing it for his Fatherland. He was misused by a criminal State leadership. There lies his tragedy "

Turning to defence policy in general, Herr Blank stressed that the character of the new forces would be determined not only by legislation but also by the persons who were to occupy the leading positions, and that the Federal Government fully recognized the importance attached to the selection of these men Accordingly it was intended to form a Personnel Committee, composed of a number of well-known personalities in public life, as well as former professional officers who could themselves no longer be actively employed in leading posts in the forces. This civilian committee would examine the character and political suitability of all candidates for commissions from the rank of colonel upwards, and no-one would be recommended for appointment if he was vetoed by the committee.

After dealing with questions of military discipline, the right of soldiers to put forward complaints, and disciplinary courts (which, he said, would be under the chairmanship of independent judges), Herr Blank pointed out that all administrative tasks in connexion with the armed forces would be handled by a civilian organization, and that questions of supply and equipment would likewise be handled by civilian authorities under the direction of a special new Federal Office.

Finally, Herr Blank expressed the Federal Government's view that the raising of armed forces did not, on legal grounds, require any "formal amplification " of the Basic Law. After pointing out that permanent legislation for the raising and maintenance of armed forces would have to be embodied in ten separate Bills, he stressed that the Volunteers Bill was purely a transitional measure designed to enable the Government to make a start upon its task while consideration of the permanent legislation was still going on. About 6,000 men were needed for military purposes before March 31, 1956, and the present Bill was designed to form provisionally the legal basis for their recruitment and employment. In the main, these 6,000 volunteers were needed to take over American material, to prepare fixed local military installations, to undergo initial courses of instruction, to strengthen the Ministry of Defence, and to provide the first personnel for international staffs and international study courses. He could not agree with the Bundesrat's view that the Bill anticipated future decisions on the permanent defence administration, nor did he share the Bundesrat's misgivings on the Bill as a whole.

The Bill was given a first reading by the Bundestag on June 28 and, against Social Democratic opposition, was referred to the Bundestag's Committee on European Security Questions for detailed study, after a 10-hour debate in which it was strongly criticized both by Government and Opposition members.

Dr. Richard Jager (a leader of the Christian Social Union in Bavaria), the principal Christian Democratic spokesman, regretted that the Government had not seen fit to amend the Bill, despite the criticisms to which it had been subjected in the Bundesrat. He expressed particular opposition to the proposed "soldier's oath" which volunteers would be required to take under the Bill, and urged that it should be replaced by a written declaration of loyalty. Dr. Jäger insisted that this question was of special importance in the rebuilding of the new German Army, in view of the manner in which Hitler had utilized the former *Reichswehr* oath of loyalty to turn it into an oath of personal allegiance to himself. He also expressed the hope that there would be no revival of certain features of the German Army of the past—e g , that officers would no longer be "decorated like Christmas trees," and that there would be no separate military flag distinct from the national flag. Speaking as a Bavarian, he criticized the harm which had been done to Germany in the past by the Prussian military tradition.

Herr Ollenhauer (leader of the Social Democrats) attacked the timing, method, and purpose of the Government's defence programme; declared that neither the 6,000 volunteers nor the projected 12 divisions would afford protection to Germany against atomic air attack; and complained that too little was being done for civilian air defence Denouncing the Volunteers Bill as a "monstrosity," he declared that the Government's only concern was "to get the Bill into force as soon as possible, regardless of the consequences that the realization of the Paris Agreements would have on the chances of reunification." The Bundestag, he declared, should be discussing the best way of bringing about the unification of Germany, instead of a Bill which, if not amended, "might bring about the possibility of an absolutely ideal alliance of the military and the bureaucracy against Parliament" **Herr Erler** (the S D.P 's expert on military affairs) recalled that the Defence Committee of the *Bundestag* had expressed itself unanimously against reintroducing the "soldier's oath," and criticized the Government for including it in the Bill in defiance of the committee's known views. After stressing that the decisive factor for the attitude of the Social Democrats would be the way in which civilian control over the armed forces was to be secured by law, he asked the Bundestag to reject the Volunteers Bill and to request the Government to produce its first Bills regulating the whole organization of future defence legislation

The former **General von Manteuffel** (Free Democrat) urged that the Federal President should be C.-in-C. of the German defence forces, that his orders should be counter-signed by the Federal Chancellor, and that a Federal Defence Council should be created to assist the Government—an innovation which had also been suggested by Dr Jäger Other Free Democrats, as well as a number of Christian Democrats, insisted that an independent committee should be set up by special legislation to "screen" all appointments of higher officers in the new German Army, instead of leaving this matter to Executive action.

Dr. Adenauer, in a brief reply to the debate, recalled that Parliament had overwhelmingly voted for the Paris Agreements, and said that he had hoped that the Social Democrats would co-operate with the Government in the difficult task of rearmament. After deploring the hostile tone of Herr Ollenhauer's speech, the Chancellor claimed that events had shown the correctness of the Federal Government's policy, since it had brought about the unity of the free Western world, the Geneva "summit" conference, and his (Dr. Adenauer's) invitation to Moscow. Amidst strong protests by the Social Democrats, Dr Adenauer asserted that the policy of the S.D P would have led the 50,000,000 Germans in the Federal Republic and the 18,000,000 in the Soviet zone "like lambs to the slaughter-house," and that their recommendation to "do nothing and wait" was "the worst possible counsel that could be given to the German people in a world full of perils."

After being drastically amended and, in effect, rewritten by the Bundestag's Committee on European Security Questions, the Bill was re-submitted to the Bundestag on July 10 in a form which met the objections expressed by both the Government parties and the Social Democrats. The amended Bill—in the re-drafting of which Dr. Jäger and Herr Erler played a prominent part—contained the following provisions:

(1) The Defence Ministry was authorized to recruit up to 6,000 volunteer officers and n c.o.s. [No limit to the recruitment of volunteers had been set in the original text]

(2) The volunteers would be employed as instructors, trainees on foreign courses, and representatives on international staffs (NATO and the W.E.U.), for the preparation of defence installations, and as specialists in the Federal Ministry of Defence. They would not be formed into military units.

(3) Volunteers would be on probation for a four-month trial period to determine their suitability. During this period their civilian jobs must be kept open for them.

(4) Once chosen, the volunteers would be in the service of the Federal Government, but would have a status corresponding to that of Civil Servants on probation, and not of Civil Servants permanently employed. [The original text had laid down that the status of volunteers would correspond to that of permanent Civil Servants—a provision which had been strongly criticized by the Bundesrat on legal and juridical grounds.]

(5) Volunteers would not take an oath of service, as originally envisaged, but would make a written declaration to defend the Basic Law and to do their duty conscientiously. [It was explained that the question of the soldier's oath would be finally determined in the *Soldatengesetz*]

(6) Rates of pay would be determined by Government decree subject to Bundesrat approval, and would be based on the pay of corresponding grades in the Civil Service. The pay of a general would be equivalent to that of an ambassador [i.e. 2,800 DM a month, or about £2,800 a year] but somewhat lower than that of the highest grade of Civil Servants

(7) Persons who had suffered in their military career under the Nazi regime would, at their own request, be reinstated with the rank which they would have reached in the normal course of events had their military career not been interrupted

(8) Financial provisions for the pay of volunteers would be included in the Supplementary Budget Estimates, whilst any provisional expenditure grants would be subject to the consent of the Bundestag's Committees for the Budget and for European Security Questions They must also be notified to the Bundesrat.

(9) All military appointments from the rank of colonel upwards would be approved by a special committee to be set up under separate legislation (see below) [It was stated that the number of senior officers employed would be 24 generals and 275 colonels]

(10) Organization of defence, especially of the higher structure of the armed forces, would be regulated by special legislation

The Bundestag gave the revised Volunteers Bill a second reading on July 15 and a third reading on July 16, only the Social Democrats opposing—mainly on grounds of foreign policy and, in particular, on the ground that defence legislation should not have been introduced on the eve of the Geneva "summit" conference. In the earlier clause-by-clause voting, however, the great majority of the Social Democrats gave their support. The Bill was passed by the Bundesrat on July 22 and signed on the same day by President Heuss.

Civilian Personnel "Vetting Committee."

In addition to passing the Volunteers Bill, the Bundestag also passed through all its stages on July 15 a Bill setting up a Personnel Vetting Committee (*Personalgutachterausschuss*) of from 30 to 60 civilians to investigate the political background, character, and general suitability of all senior officers of the rank of colonel upwards, and to lay down rules for examining the personal suitability of all other officers, n.c.o.s, and men, as had been recommended in the revised version of the Volunteers Bill (see above). The Bill, drafted by the Bundestag's Committee on Security Questions and approved by Dr. Adenauer and the Federal Cabinet, was introduced by the Christian Democrats, Social Democrats, Free Democrats, and the Refugee Party, and was opposed only by the ultra-conservative German Party on the ground that it involved undue civilian interference in the affairs of the armed forces. The Bill was passed by the Bundesrat on July 22.

The Personnel Vetting Committee—a complete innovation in German military history—will work independently of Parliament; will be empowered to obtain from Government departments and other public authorities any information or files it deems necessary for its task; and will have the right to veto, without appeal against its decisions, any senior military appointments which it considers politically unsuitable or undesirable. The members of the Committee would be appointed by the Federal President on the proposal of the Federal Government, which would require Bundestag approval. It was laid down that members of the committee must not be Government servants, members of the Bundestag, or persons who hoped for military appointments themselves.

The Federal Government accordingly submitted on the same date a list of 38 members of the Committee whom it was proposed to appoint, and all of whom had been approved by Dr. Adenauer personally. This list was approved by the Bundestag immediately after the passing of the Bill setting up the Committee.

The list included members of the anti-Nazi resistance movement, lawyers, professors, retired Civil Servants, and a number of former regular Army officers, among them six generals. The latter included ex-General Adolf Kuntzen, a former *Panzer* commander, now working in the Chancery of the Evangelical Bishop of Hanover (Dr. Lilje), and ex-General von Zenger und Ettolin, formerly Commander of the 14th Armoured Corps at Cassino, who is now a housemaster at Salem School and deputy chairman of the German Society for European Education. Among representatives of the anti-Nazi resistance movement were Herr Fabian von Schlabrendorff, author of a book on the officers' resistance movement (in which he took an active part), and Frau Annedore Leber, the widow of Dr. Julius Leber, a trade union leader executed by the Nazis early in 1945.

The Soldiers' Bill.

The *Soldatengesetz*—the permanent Bill designed to regulate the rights, duties, and status in law of the German soldier—was submitted on July 22 to the Bundesrat. In giving it a first reading, the Upper House raised many objections to the

measure in its present form, demanding specifically that defence administration should not be a Federal subject but should be left to the *Lander*, and that the soldier's oath in the form proposed by the Government should be replaced by a "declaration of loyalty" linking the soldier more closely with the general body of citizens. The Bill came before the Bundestag on Oct. 12 for a first reading, and was referred to the Bundestag Committees for European Security Questions and for Legal and Constitutional Questions.

The *Soldatengesetz* laid down (in Article 3) that soldiers must be appointed and employed "according to their suitability, capabilities, and performance, without regard to birth, race, faith, religious or political views, home area, social standing or connexions" It also laid down that the soldier would have the following duties "to serve faithfully and to defend the Fatherland and freedom valiantly" (Art. 6), "to support the free democratic order as laid down in the Basic Law, and to uphold its preservation" (Art 7); to obey orders, subject to certain qualifications (see below) (Art 9), to "respect the dignity, honour, and rights of his comrades and to help them in distress and danger" (Art 10), to maintain discipline, respect his superiors, behave in a way "conforming to the respect and confidence required by his position as a soldier and the prestige of the armed forces," and to preserve and improve his capability for defence (Art. 11), to "tell the truth in service matters" (Art. 12), and to preserve secrecy on matters which came to his knowledge during his service period, even after he had left the armed forces (Article 12).

Article 9 (see above) was worded as follows "An order may not be followed when it would lead to the commission of a crime or an offence. If, nevertheless, the subordinate obeys the order, his guilt is excluded if he did not know, and if it is also not apparent to him through the circumstances known to him, that a crime or misdemeanour is thereby committed." [A supporting memorandum to the Bill described the principle of responsibility for war crimes laid down by the Allied Control Council's Law No 10 as a "transitory phenomenon" which "need not influence the legal settlement of the question."]

Article 15 laid down that a soldier must not take any active part in favour of a specific political creed while performing his military service, whilst outside his service activities he should show in political matters "that toleration and reserve which his position as a soldier demands" Moreover, he should "not become conspicuous as an active member of a political organization," nor wear uniform when attending meetings of political organizations Under Article 22 soldiers will not be restricted in the exercise of the franchise or in voting in referenda, etc. Any professional soldier who becomes a candidate for the Bundestag, a Landtag, or a local authority will automatically be retired.

It was laid down in Article 8 that officers and n c o s should "set an example by their attitude and fulfilment of duty", look after those under their command, be responsible for the discipline of their subordinates; and see to it that their orders were carried out It was specifically laid down that officers must give orders only "in respect of service matters and with due respect to the existing laws, the rules of international legislation, and service regulations," and that they would be fully responsible for the orders they gave.

The Bill also retained the text of the proposed "soldier's oath" as in the original draft of the Volunteers Bill (Art 16)

During the Bundesrat debate representatives of all parties except the Free Democrats expressed themselves in favour of replacing the proposed "soldier's oath" by a "declaration of loyalty." Objections were also raised on many other points of detail. The Social Democrats reiterated their "serious political and legal doubts" about the *Soldatengesetz*, though promising their co-operation in helping to improve it.

Other recent developments in connexion with the future German armed forces are described below.

Directive on Ethical Standards. The Personnel Vetting Committee published on Oct. 14 a directive on the ethical standards of the future German armed forces, intended as a statement of fundamental principles It laid down that the armed forces should possess the confidence of the whole German people, that they should have no "special position" in the social order, and that individual officers and men must have a clear recognition of the value of personal freedom and should unreservedly accept the democratic system, since freedom and justice could only be defended by men who believed in them. Among the personal qualities expected of officers and men would be "ethical seriousness," "strength of character," "courage and bravery," "love of the Fatherland," "chivalry towards women," and "readiness to help the weak and defenceless."

Special emphasis would be placed on qualities of leadership in recruiting men for the new armed forces. Ex-soldiers applying to join the armed forces would be expected to have displayed "soldierly and humanely unobjectionable conduct" during the war, and the possession of decorations and medals would not in this respect be decisive. Behaviour after the war, in captivity and in civil life, would also be examined, and it would be expected that the family life of candidates should be orderly. In cases of divorce or separation from a wife, inquiries would be made into the conduct of the candidates concerned. It was also laid down that professional soldiers must respect the political and religious convictions of others, and hence "the decision of conscience of the men of July 20, 1944" [i.e. the officers who unsuccessfully attempted to assassinate Hitler.]

The following categories of persons would not be accepted for membership of the armed forces: persons who had committed crimes against humanity at home or abroad; all persons who held the rank of general or colonel in the *Waffen S S.*, and members of parties and associations opposing the free democratic order expressed in the Basic Law Persons who served in the *Waffen S S.* with a rank lower than colonel would be admitted only after special investigation, and in such cases the candidate would have to give proof that he had completely abandoned the tenets of National Socialism.

The decision of the Ministry of Defence would be necessary in the case of certain other categories of candidates, including former members of the *Sicherheitsdienst* (the Nazi security service, which worked in close collaboration with the Gestapo); former members of the "National Committee for Free Germany," a body of German officers formed in the Soviet Union during captivity after the German defeat at Stalingrad; former members of the French Foreign Legion; persons who had been sentenced by non-German courts for war crimes, persons who had belonged to the information services of a foreign Power, and members of defence associations of a political character—in particular, associations "acknowledging a defence policy at variance with these principles"

Defence Appointments. - Progress of Recruiting. Generals Adolf Heusinger and Hans Speidel officially became the first two generals in the new German Army on Nov 10, when their commissions were signed by President Heuss after their appointment had been approved by the Personnel Vetting Committee General Heusinger, chief of the Operations Division of the German High Command during the war, had been adviser on defence questions to Dr Adenauer and head of the military planning department in the Federal Defence Ministry, whilst General Speidel, formerly Chief of Staff to Field-Marshal Rommel, is the Federal Government's military representative at Supreme Allied Headquarters, Europe They will hold the rank of lieutenant-general—the same rank they held in the war, and the highest rank in the new German Army

The Federal Defence Ministry announced on Nov. 9 that 172,000 men had so far volunteered for service in the armed forces, of whom about 140,000 had seen service during the war as officers, n.c o s, or private soldiers. It was, however, pointed out that a big percentage of the volunteers (estimated in some German papers as high as 40 per cent) were ineligible for physical or other reasons, and that the number of recruits was still very far short of that needed to form training cadres for the projected force of 500,000 men

Defence Council. It was announced in Bonn on Oct 6 that a Defence Council had been formed within the Federal Government with Dr Adenauer as chairman and with Dr Franz Blucher (the Vice-Chancellor) and Herr Franz-Josef Strauss (Minister without portfolio, and now Minister for Atomic Questions—see 14562 B) as vice-chairmen The other members would be the Ministers of Defence (Herr Blank), Foreign Affairs (Dr von Brentano), the Interior (Dr. Schroder), Economics (Dr Erhard) and Finance (Herr Fritz Schäffer), whilst other Ministers would be asked to attend if questions concerning their departments were under discussion It was officially stated that the Defence Council would have four main fields of activity —military defence, civil defence, economic questions, and financial questions

Dr Josef Rust, a high-ranking official in the Ministry of Economics, was appointed on Oct. 12 to the new post of State Secretary in the Ministry of Defence

Four-year Time-table for Armed Forces. - Incorporation of Federal Frontier Police. A Bonn announcement of Sept. 21 stated that it had been agreed, as a result of discussions between the Federal Chancellor, the Vice-Chancellor, and the Ministers of Defence, Finance, and Economics, that the 500,000-strong armed forces would be raised over the four-year period beginning on Jan. 1, 1956, in accordance with the following time-table (1) During the 18 months from Jan 1, 1956, to July 1, 1957, the cadre units of 150,000 n.c o.s and other ranks would be formed and trained; (2) in the 18 months from July 1, 1957, to Jan 1, 1959, the first recruits would be called up for 18 months' military service, (3) by the end of the three-year period (i.e by Jan. 1, 1959) there would be an Army of 400,000 trained men, (4) during the fourth year (Jan. 1, 1959 to Jan 1, 1960) the Air Force would be brought up to its scheduled strength of 80,000 men and the Navy to its strength of 20,000, bringing the total strength of the armed forces to the scheduled 500,000 by the end of the four-year period

The cost of rearmament during this period was officially estimated at 51,000,000,000 DM. (£4,250,000,000), of which 36,000,000,000 DM. (i.e. 9,000,000,000 DM. in each year) would be covered by budgetary provisions and about 15,000,000,000 DM. would come from U.S. aid.

A Bill for the incorporation of the Federal Frontier Police (the para-military force of 20,000 men designed for frontier protection) into the German Army was approved by the Federal Government on Nov. 30. It was stated that recruitment would be on a voluntary basis and that there would be no compulsion on individual members of the Frontier Police to enter the Army, although it was anticipated that the great majority would do so.

New Uniforms. The uniforms of Germany's new armed forces were given their first public showing on July 22 after having been approved by President Heuss and the Federal Cabinet. Both in colour and style they differ widely from the former uniforms, except that the Navy retains its traditional dark blue. The Army and Air Force uniforms—both identical except for the insignia—are a medium shade of grey (officially described as "slate grey"), in contrast to the former grey-green Army uniform and the grey-blue *Luftwaffe* uniform. The headgear is peaked caps for officers and n.c.o.s and ski-type caps for other ranks. Two characteristic features of the former German Army are abolished—the *Stahlhelm* (the former steel

helmets with curved brims), now replaced by steel helmets of the American type, and the jackboot, replaced by rubber-soled footwear similar to that used by the U S Army. Another innovation is that German officers and other ranks (except in the Navy) will wear shirts and ties with walking-out dress The German Army's new battle-dress is non-inflammable, proof against infra-red rays, and capable of giving protection against the secondary effects of atomic radiation. It was adopted after successful trials by Belgian Army units

Parliamentary Missions to Britain and America. - Recommendations for Civilian Control of Armed Forces. A Bundestag mission representing the three principal parties (the Christian Democrats, Social Democrats, and Free Democrats) visited Britain in November and the U S A during the previous April to study British and American methods of civilian control of the armed forces, and to inspect British and U S military installations The leading members of the delegation were Dr Jäger (Christian Democrat), chairman of the Bundestag's Committee on European Security Questions and a vice-president of the Bundestag ; Herr Fritz Erler, the Social Democratic Party's expert on military affairs; and ex-General von Manteuffel (Free Democrat), one of Germany's leading tank experts, and commander of the *Grossdeutschland* armoured division during the war.

High tributes to both the British and American systems were paid by the delegations after their return to Bonn from these visits After the visit to Britain, the delegation stated that they were particularly impressed by the British system of parliamentary control over the armed forces and arms supply, and unanimously recommended the institution of Parliamentary Secretaries to the various Ministries concerned with defence, on the British model General von Manteuffel spoke of the excellence of British military equipment, mentioned electronic and aviation equipment as possible fields for German procurement, and praised the " mutual trust " between the British Government, Parliament, and armed forces, describing Britain as " a happy country whether from the standpoint of the parliamentarian or of the former soldier." Herr Erler was impressed by the British system in standardizing equipment and co-ordinating its development, but criticized the " time-wasting " in the British Army on drills and parades. All the delegates were agreed that, although not all British institutions were suitable for adoption in the Federal Republic, it should be a primary aim of German defence policy to establish confidence between the Executive, the Legislature, and the armed forces, as was the case in Britain, combined with full parliamentary control over the armed forces and arms supply.

After the mission's return from the U S A., General von Manteuffel strongly recommended that the Federal Parliament should have powers in the future to summon top-ranking German generals before it for questioning by committees, as was done by the Congressional committees in Washington [This, if adopted, would be a revolutionary innovation in German military history, as the generals had traditionally regarded themselves as immune from interference by anyone except the Supreme Commander] In addition, General von Manteuffel proposed that all departments in the Defence Ministry should be headed by civilians, and that a small Defence Committee should be set up under the Supreme Commander (who should be a civilian) on which all the parliamentary parties should be represented, including the Opposition Finally, he suggested that Germany's new armed forces should be known as the *Bundeswehr*, since the former name of *Wehrmacht* had aroused too much resentment to be used again. [Although the term *Streitkräfte* had been proposed by Herr Blank for the new armed forces—see page 13862, first column—it had not " caught on " with the German public as a whole, and the term *Bundeswehr* had found increasing support, especially in Bavaria]

The above-mentioned parliamentary missions had been appointed following a personal pledge by Dr. Adenauer to the effect that the Army must never again become " a State within a State." The Federal Chancellor had declared that he would do everything in his power to prevent such a state of affairs from ever again recurring in Germany, and that the question of civilian control over the armed forces would be regarded as one of the most vital issues to be faced when rearmament began in the near future.

The German Army was officially reborn on Nov. 12, when the first 100 officers, n.c.o.s and men received their letters of appointment from Herr Blank.—(Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - Welt der Arbeit, Cologne - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune) **(Prev. rep. Defence Minister, 14243 B ; Armed Forces, 13861 A.)**

A. EASTERN GERMANY. — Scientific Council for Peaceful Uses of Atomic Energy.

The East German Government announced on Nov. 10 that it had entrusted responsibility for all atomic questions to the Deputy Premier, Herr Willi Stoph, and that a Scientific Council for the Peaceful Application of Atomic Energy had been set up under Professor Dr. Gustav Hertz, the well-known physicist and Nobel prizewinner. (Neues Deutschland, Berlin)

B. LIBYA. — French Evacuation of the Fezzan.

The first contingent of French troops evacuated the Fezzan on Nov. 30 under the terms of the Franco-Libyan agreement of Aug. 11. It was announced that the remainder of the French garrison would be withdrawn by July 1, 1956.

C. UNITED KINGDOM. — Gateshead and Greenock By-elections.

The by-election at Gateshead West, caused by the death of Mr. John Hall (Labour), was held on Dec. 7 with the following result :

Randall, H. E. (Labour) ..	13,196
Wright, D. A. (Conservative)	6,661
No change. Labour majority . .	6,535

Figures at the general election last May were · J. T Hall (Lab.) 22,040, J Quigley (C) 11,701—Labour majority, 10,339 The Labour candidate received 66 45 per cent of the votes in the by-election and the Conservative candidate 33 55 per cent, compared with 65 3 per cent and 34 7 per cent respectively at the general election The Labour proportion of the poll thus increased by 1 15 per cent 42 2 per cent of the electorate voted in the by-election, compared with 72 4 per cent in May. The electorate numbered 46,996, compared with 46,567 at the general election

Mr. Harry Randall, a national officer of the Union of Post Office Workers, was M P. for Clitheroe from 1945 to 1950

The Greenock by-election, caused by the death of Mr. Hector McNeil (Labour), was held on Dec. 8 with the following result :

Mabon, Dr. J. Dickson (Labour) . ..	19,698
MacArthur, Ian (Conservative)	17,004
No change. Labour majority	2,694

Figures at the general election were . H. McNeil (Lab.) 19,378, I MacArthur (C) 18,345—Labour majority, 1,033. The Labour candidate received 53 67 per cent of the votes in the by-election and the Conservative candidate 46 33 per cent, compared with 51.4 per cent and 48 6 per cent respectively at the general election. The Labour proportion of the poll thus increased by 2.27 per cent 75.27 per cent of the electorate voted in the by-election, compared with 77 9 per cent at the general election The electorate numbered 48,760, compared with 48,400 at the general election

Dr. Dickson Mabon (30) is on the staff of the public health and social medicine department of Glasgow University He unsuccessfully contested West Renfrewshire at the general election and Bute and North Ayrshire in 1951

The late Mr. Hector McNeil (48), who died in New York on Oct. 11 while on a visit to the U.S.A., held successive office under the Labour Government as Parliamentary Under-Secretary of State, Foreign Office (1945-46), Minister of State, Foreign Office (1946-50), and Secretary of State for Scotland (1950-51). He was a vice-president of the U N. General Assembly in 1947, and led the British delegation to the Economic Commission for Europe in 1948. A journalist by profession, he had represented Greenock since 1941, and was a Privy Councillor.—(Times - Daily Telegraph - Daily Herald)
(Prev. rep. General Election, 14257 A.)

D. TUNISIA. — New Heir to the Throne. - Death of Prince Mohammed es-Sadok.

Prince Mohammed es-Sadok (72), the Heir-Presumptive to Tunisian throne (*Bey du Camp*), died at La Marsa on Oct. 2. A cousin of the present Bey, he became Heir-Presumptive on July 5, 1953, following the assassination of Prince Azzeddine by nationalist terrorists. According to the right of primogeniture, which governs succession in the Tunisian royal family, the new Heir-Presumptive will be Prince Hassine (62), a brother of the late Bey Moncef, who succeeded to the throne in 1942, was deposed in May 1943 shortly after the Allied liberation of Tunisia, and died in France in 1948.—(Le Monde, Paris)
(Prev. rep. 13037 A.)

E. BULGARIA. — Reduction in Military Service.

It was announced in Sofia on Nov. 9 that the Bulgarian Government had decided to reduce the period of military service from May 1, 1956, as follows : (*a*) from three to two years for all men serving in the Army and Air Force ; (*b*) from four to three years for men serving in the Navy and anti-aircraft units.—(Bulgarian Legation, London)
(Prev. rep. 14441 A ; Rumania, 14558 B.)

F. AUSTRIA. — Four-Power Recognition of Austrian Neutrality.

The British, U.S., French, and Soviet Governments sent Notes to Vienna on Dec. 6 formally recognizing the " perpetual neutrality " of Austria, as defined in the Neutrality Law adopted by the Austrian Parliament on October 26.
(Wiener Zeitung) **(Prev. rep. 14561 A.)**

G. FRANCE. — M. Monteil readmitted to M.R.P.

The national executive of the M.R.P. decided on Oct. 8 to re-admit to the party M. André Monteil (Minister of Health in M. Mendès-France's Cabinet), who had been expelled in September 1954 for his opposition to the E.D.C. project.
(Le Monde, Paris) **(Prev. rep. 13902 B.)**

A. UNITED KINGDOM. — The Burgess-Maclean Case. - Parliamentary Debate. - Appointment of Conference of Privy Councillors to consider Security Precautions in Public Services.

Sir Anthony Eden proposed in the House of Commons on Nov. 7 that a " small informal conference of Privy Councillors from both sides of the House " should be convened to examine the security procedures which were now applied to the public services, and also to consider whether, within the law, any further precautions could properly be taken to reduce the risk of treachery such as had arisen in the case of Burgess and Maclean. The Prime Minister's proposal was made at the end of a debate on the disappearance of Burgess and Maclean, during the course of which both Labour and Conservative speakers had pressed for an inquiry into the security services. The debate followed the publication of the White Paper on the disappearance of the two diplomats (see 14457 A).

Mr. Harold Macmillan (Foreign Secretary), who initiated the debate, said that he thought that many criticisms in the Press and elsewhere of the handling of the case were based on a misapprehension of the rights of a citizen in a free society in time of peace Whilst action against employees, whether of the State or of anybody else, arising from suspicion and not from proof might be taken with good motives and might avert serious consequences, it seemed, judging from what happened in other countries, that the practice soon degenerated into the satisfaction of personal vendettas or a general system of tyranny, all in the name of public safety It had also been said that statements on the case made by Foreign Office spokesmen or by Ministers had been disingenuous or obscure But (Mr. Macmillan pointed out) inquiries by the security service had continued for several years, and while they were in progress a full statement would have indicated to the world the real degree to which they were meeting with success, thereby possibly compromising the investigation itself.

With regard to the conduct of Maclean and Burgess while they were in the Foreign Service, Mr. Macmillan said that it was important to realize that the quality of Maclean's work, prior to his appointment in Cairo in 1948, had been " not only good but outstanding among his contemporaries." During his first 14 years in the Service his conduct had given rise to no adverse comment, and his behaviour in Cairo [referred to in the White Paper] had been interpreted at the time as the result of a prolonged period of overwork and strain As regards Burgess, Mr. Macmillan refuted suggestions that he had been promoted after having been found guilty of serious indiscretions In actual fact, from the time of his establishment [i.e ceasing to be a temporary employee] he had remained a member of the fourth grade of the junior branch of the Foreign Service. He had been recommended for promotion to the Senior Branch by the late Mr Hector McNeil, but as there was a good deal of doubt about his suitability, in view of his slight experience of the ordinary duties of the Foreign Service, it had been decided that he should be given a thorough trial on routine work in the Far Eastern department. While he was working in that department allegations were made that he had been guilty of a serious indiscretion about intelligence matters; after these had been fully investigated, he was severely reprimanded and informed that he would be transferred and that his prospects for promotion would be diminished. He had thereafter been transferred to Washington, but the Ambassador had reported unfavourably both on his office work and on his behaviour outside, and he had been recalled and the conclusion reached that he would have to leave the service. Nevertheless, until the day of his disappearance there had been no grounds to suspect that Burgess was working against the State; he had been indiscreet, but indiscretion was not generally the characteristic of a secret agent

Dealing with the security investigations, the Foreign Secretary said that diligent inquiries had been started in January 1949 immediately after a report had been received that certain British information had become available to the Soviet authorities a few years earlier. In the course of the next two years the security services had narrowed down the field of suspects to one, namely Maclean, but even then the evidence was inconclusive and circumstantial The best, and perhaps the only, chance of obtaining evidence which could have been used to support a prosecution lay in obtaining admissions from him There was, however, no firm starting-point for an interview, and it was highly desirable to obtain further information about his contacts and activities which could be used as a basis for questioning him. A watch had therefore been kept on him, though this had not been extended to his home at Tatsfield because of the technical difficulties of keeping him under observation there and the consequent risk of putting him on his guard.

Turning to the question of whether the two men had received a warning of the investigations into their activities, Mr Macmillan said that whilst the circumstances of their disappearance were certainly explainable in terms of a warning, it was quite possible that they had fled because one or the other had noticed circumstances or a combination of circumstances which aroused their suspicions Nevertheless, the possibility that they had received a warning had to be seriously considered, and searching and protracted investigations into this possibility had been undertaken and were now proceeding.

In this connexion the Foreign Secretary referred to Mr. H. A. R. Philby, temporary First Secretary in the British Embassy in Washington from October 1949 to June 1951, whose alleged " dubious third man activities " had been mentioned in a parliamentary question by Lt.-Col. Lipton (Lab.) on Oct. 25. Mr. Macmillan said that although Mr. Philby had been friends with Burgess from their time as fellow undergraduates at Cambridge, and although Burgess had been accommodated in Mr Philby's home in Washington from August 1950 to April 1951, it should be realized that at no time before he fled was Burgess under suspicion. It had been found, nevertheless, that Mr. Philby had had Communist associations before and after his university days, and in 1951 he had been asked to resign from the Foreign Service. He had subsequently been the subject of the closest investigation, but no evidence had been found that he was responsible for warning Burgess and Maclean. While in Government service he had carried out his duties ably and conscientiously, and there was no reason to conclude that he had at any time betrayed the interests of Britain, or to identify him with the so-called " third man," if there was one.

As regards others whose names had been associated with the affair, he [Mr. Macmillan] had caused them to be carefully studied and investigated No-one was being shielded Had any evidence of guilt been forthcoming, he or his predecessors would not have hesitated to take appropriate action, but no such evidence had been found

Referring to the subsequent disappearance of Mrs Maclean, the Foreign Secretary said that she had been of little importance. Anything that she knew before Maclean left she must have got from him, and she had had no means of obtaining information after he had left Whether she remained in Britain or not made little difference, as she could do no good in this country and little harm abroad

The next question (Mr Macmillan continued) was . What steps were taken to ensure that there should be no repetition of " such a deplorable story " ? Since 1945 a check had regularly been made on all new entrants into the Foreign Service and on all new temporary employees, but from 1951 onwards it had been recognized that more must be done to check the political reliability of those holding important positions in the public service At the beginning of 1951, therefore, a regular system of positive " vetting " had been introduced, under which a detailed search had been made into the whole background of the officer concerned, including his school and university career and any previous employment before joining the Foreign Service Since 1951 some 900 cases, involving the Senior, Junior, and Clerical Branches of the Foreign Office, had been examined. So far, there had been four cases in which an officer's political activities and associations had led to his leaving the service altogether, whilst in six other cases it had been considered prudent to move officers to other work of lesser importance, or to accept their resignations Mr Macmillan pointed out that the " vetting " procedure was not confined to the Foreign Service but was extended to all Government departments having access to classified material involving the security of the State

Immediately after the disappearance of Burgess and Maclean, Mr. Herbert Morrison (then Foreign Secretary) had set up a committee to look into all aspects of the security arrangements in the Foreign Service. This committee, reporting in November 1951, had approved the security check, including the plans for positive " vetting " which had already been prepared. Mr Macmillan emphasized that the committee had considered not only political unreliability in itself, but also the problem of character defects which might lay an officer open to blackmail, or otherwise determine his loyalty and sense of responsibility. Moreover, shortly after the disappearance of Maclean and Burgess, and before the committee had reported, fresh instructions had been issued by the Permanent Under-Secretary of the Foreign Office to heads of missions and other senior officials impressing on them the need to watch, in particular, the forms of behaviour among their staff likely to sap an officer's discretion, sense of responsibility, or his public duty, or to expose him to undue influence or blackmail, or to heighten the tension of his existing behaviour

Turning to the question of recruitment to the Foreign Service, Mr Macmillan said that it was sometimes alleged that the Foreign Service was kept to " a closed circuit " and that its members were taken too narrowly from one social group. This he denied, pointing out that the selection of recruits from all except the most junior grades had for a long time been in the hands of the Civil Service Commissioners, and that the Foreign Service was not a service renewing itself by co-option. Mr Macmillan also denied suggestions that the Foreign Service, like the rest of the Civil Service, was " a sort of closed shop," that its failures were protected, and that there was no means of getting rid of incompetent or unsuitable people. Since the introduction of the Foreign Service Act (1943), he explained, members of the Foreign Service had not enjoyed the same degree of security as the rest of the Civil Service. That Act had introduced arrangements more like those of the fighting Services, which provided for compulsory retirement of established members who did not make sufficient progress to justify their retention or promotion. It seemed, therefore, that the case for a further inquiry into the recruitment and organization of the Foreign Service had not been made out.

With regard to the security service and the inquiries into the whereabouts of the two missing diplomats, the Foreign Secretary emphasized that the search for information had necessitated a search among 6,000 people. They had eventually narrowed it down to one, but, unlike the Fuchs case, had been unable to obtain sufficient evidence to justify a charge; this was to be regretted, but the difficulties under the British system of law were very real. On the more general aspects of security, Mr. Macmillan said that he was satisfied that the new arrangements had enormously strengthened the security system, and doubted whether any substantial improvements could be made within the existing system of law. It could not be ignored, however, that this incident, following upon others in the

world of science, had had a serious effect on Britain's reputation abroad, although many of the allegations made by irresponsible persons were so exaggerated that they carried with them their own refutation, there was a real danger that a feeling might be spread among Britain's allies that her reliability—hitherto regarded as a model—was no longer to be trusted. It was therefore of great importance to the country's defence and safety that successive Governments should be known to have taken all steps within their power to stop any loopholes and strengthen any legitimate methods of defending vital secrets. "It is my belief," Mr Macmillan added, "that every practical means has been taken which is open to the Executive."

In conclusion, the Foreign Secretary expressed the conviction that the measures already taken made a recurrence of such an affair "exceedingly improbable," although he emphasized that these measures did not and could not go beyond the letter and the spirit of the existing law. "Before the limitations of the existing law are relaxed," he concluded, "Parliament would have to weigh carefully the balance of advantage and disadvantage, for it would be a tragedy indeed if we destroyed our freedom in the effort to preserve it."

Mr. Herbert Morrison (Lab.), Foreign Secretary at the time of the disappearance of Burgess and Maclean, said that although he agreed with most of what the Foreign Secretary had said, he was not as fully satisfied as Mr. Macmillan appeared to be. He was inclined to think that Maclean had been warned by someone, because it was a remarkable coincidence that he [Mr. Morrison] should have given the order for the questioning of Maclean on May 25 and that the two men were missing on the same night. In this connexion Mr. Morrison said that he had received a letter from a friend whose judgment of men and affairs he respected. The person concerned had asked that his name should not be mentioned—though it was available to the Foreign Office if they wanted it—because he did not want to be pursued with publicity in this matter. This letter said:

"I was very interested to read your remarks about Maclean and Burgess . . . because I know them both and actually lunched with Maclean the day before he disappeared. The point I wanted to mention to you was that on the day I am sure he had no intention of leaving in the way he did. He spoke to me so normally as to his private affairs, his wife's confinement, and his plans for the immediate future, that I am convinced he was not then intending to leave the country. This makes me feel that, subsequent to meeting me on May 24, he received some warning that he was under suspicion, and immediately left the country with Burgess. It may be, therefore, that someone in the Foreign Office told him on May 25 that you had authorized him to be questioned. Of course, it was not until the Foreign Office knew that the security service knew as well."

In the light of these "unhappy and beastly incidents" (Mr Morrison continued), and in view of public apprehension or even misunderstanding, there should be an inquiry by a select committee or some other suitable body into the administration, recruitment, and promotion in the Foreign Office. The inquiry should also include the problem of the heavy burden that fell on the Foreign Secretary in modern times. There was also a case for examining security, partly in the light of the Burgess and Maclean incidents, and partly to be satisfied that the security services were good. Clearly it could not be a public inquiry, nor could the report be published, as they could not risk divulging the secrets of espionage or counter-espionage. Mr. Morrison thought that there might be an investigation by a judge, or judges, in private, with a private report to the Prime Minister. Both subjects might be covered by a committee of Privy Councillors, representing both sides of the House and with experience that made them specially qualified in these matters. He emphasized, however, that there must be an inquiry, and that the country would not be satisfied unless the inquiry covered an adequate field. The country had a right to know that adequate action was being taken, arising out of an experience that was disturbing and worrying to them all.

Mr. Morrison's suggestion for an inquiry into the Foreign Service and the security service was supported by members from both sides of the House. **Mr. Richard Crossman** (Lab.) contended that the White Paper, instead of defending the Foreign Service, had "put it far deeper into the mire." If, after four years, "this tissue of palpable half-truths and contradictions" was the best they could produce, then the impression of a "cover-up" was more strongly substantiated than ever. The real problem of the Foreign Office was not security, but whether the reforms introduced 10 years ago had produced the right results. **Mr. Tomney** (Lab.) alleged that the White Paper was "an attempt to cover up something within a circle of associates in the Foreign Office, to protect somebody from their follies and mismanagement, misjudgment and neglect." He maintained that there would be no reassurance unless there was an independent inquiry. **Mr. Robens** (Lab.) similarly said that the public and many M.P.s were sure that there was a close circle of people in the Foreign Office who "covered up" for their friends. "How else could it be," he asked, "that a couple of drunks, a couple of homosexuals, well known in London, could for so long have occupied important posts in the Foreign Office?"

Mr. Speir (C.) felt that the security services could be considerably improved, and that it would reassure the country if there was some inquiry into their adequacy. **Lt.-Col. Cordeaux** (C.) maintained that the public's faith in the security services had been badly shaken and that an inquiry was therefore necessary, whilst **Mr. Rawlinson** (C.), referring to the Foreign Service, asserted that it appeared from the White Paper that there had been some "covering up" by bureaucracy because of the feeling that the two people involved belonged to the Service.

Sir Anthony Eden, replying to the debate, said that whether mistakes might or might not have been made, one thing was certain—that nobody at the Foreign Office had at any time covered up any form of disloyalty to the State. If any mistakes had been made, they were not of the kind even remotely tinged with disloyalty. He rejected the suggestion that the Foreign Service should be made part of the Civil Service, saying that such an idea was "absolutely unworkable." The members of the amalgamated Foreign Service undertook to accept service at home or abroad, and this could not be asked of the members of the Civil Service.

After making his proposal for a small conference of Privy Councillors to examine the question of security procedures, the Prime Minister said that "behind the anxieties, fears, misapprehension, and confusion" there was a larger question. He continued: "How far are we to go in pursuit of greater security at the cost of the essential liberties of the British people? Some have said that Burgess and Maclean should not have been allowed to escape. Under the law as it stands today, they could not have been prevented from escaping unless a charge could have been preferred. Would the House like that law altered? Would the House agree that the law should allow any British subject to be detained on suspicion? We have to face these questions. When there is no evidence on which a man can be charged, would the House be willing that people should be held indefinitely by the police while evidence is collected against them? In this case detention would have been justified. But who could tell then whether Maclean was innocent or guilty?

"British justice over the centuries has been based on the principle that a man has to be presumed innocent until he can be proved guilty. Have we got to abandon that principle? Perhaps worst of all, are we to make an exception for political offences? The last thing I would wish to see in this country is the security services having the power to do some of the things which some of our friends in the Press do not seem to realize would flow from what they advocate. It may be true that if the security services had such powers, Burgess and Maclean would not be where they are today. I think it is true. But what would have been the consequences for British freedom, and for the rights this House has so far always determined to defend? I want to make one thing quite clear: I would never be willing to be Prime Minister of a Government which asked those powers of this House."

The Burgess - Maclean case was also debated in the House of Lords on Nov. 22, when a number of Conservative peers criticized the Government's handling of the case.

Viscount Astor, who raised the matter, said that many questions still remained unanswered which, if confidence had to be restored, would be better answered. In particular, he asked whether the conference of Privy Councillors proposed by the Prime Minister would make a report which would be debatable in the House. Declaring that it was the Government's own fault that this matter had continued so long, Lord Astor asserted that they seemed more concerned "to hide the truth than to uncover it," that answers in the House and elsewhere had given the minimum of information, and that inquiries, journalistic and otherwise, had been discouraged. Surely the Crichel Down affair should have shown the Government that the affairs of a great department could not be carried on "veiled in mystery"; it was "far better to get the truth out and be finished with it than attempt to save prestige by hiding it."

Referring to Maclean's conduct in Egypt, Lord Astor said that what was surprising was that after this behaviour he should have been appointed to an important post. The "ridiculous playing down" of the Cairo incident did no credit to anyone. Maclean had continued his extraordinary standard of conduct when in Britain. He had got disgustingly drunk and had twice been engaged in drunken brawls with former left-wing friends, in one of which they were rolling on the floor; in each case the cause of the fracas was that the persons concerned had repudiated former left-wing opinions. Had the Foreign Office had any knowledge of these things, Lord Astor asked, or had they been ignorant? Burgess apparently was an amusing conversationalist, but had also been drunken, dirty, and a sexual inebriate ever since school, and had made no pretence about it either in his conversation or his conduct. Did the Foreign Office know about his conduct and tolerate it, or were they the only people who did not know about it?

In conclusion, Lord Astor said that it was remarkable how slow Britain had been in realizing the theory of Communism and its importance. They had to recognize that for the first time since the reign of Queen Elizabeth I there was a "fifth column" in Britain. It had apparently penetrated the highest ranks of the Civil Service, science, and the Church. They had to face the fact that they had a "cold war," to look again at traditional practices from that point of view, and to ensure that the security service had ample facilities, men, and technical means at its disposal.

Lord Teviot (leader of the Liberal National peers) said that there seemed to be no doubt that Ministers had not been given the information which they should have received. Everything, he declared, must be done to prevent that happening again, and to ensure that men of such low character and with such notorious reputations should never again be promoted or represent Britain.

Lord Conesford (formerly Mr. Henry Strauss, M.P., the Conservative Minister) said that two considerations led him to take part in the debate: the defects and contradictions of the White Paper, and the fact that they had not been wholly remedied and removed by the speeches of the Foreign Secretary and the Prime Minister. Maclean's appointment as head of the American department of the Foreign Office, and his flight from Britain without let or hindrance, cast discredit on the authorities, and the reasons hitherto given in explanation or excuse would not bear examination. Why was it

assumed that his conduct had a purely physical explanation? What excuse was there for not considering treachery as a possible explanation of the strain to which this misconduct had been attributed? A Communist agent would be subject to great strains, and if a breakdown of this nature occurred in the public service the possibility of a mental cause should not be excluded Had an adequate inquiry been made at the time of Maclean's breakdown, Lord Conesford maintained, his Communist sympathies would have been discovered then and not later. After the Cairo incident Maclean should have been dismissed at once, or the most searching inquiry should have been made before he was given another post.

Lord Salter questioned the decision to reinstate Maclean after his serious misconduct in May 1950, saying that a man who was guilty of such conduct was unsuitable by temperament and personal habit to occupy a high position of trust in the public service. It was no answer to say that he had been appointed to a post of no great importance in a department not dealing with questions of major policy. The concern was not that the Foreign Secretary had been guided in decisions of major policy by the advice of Maclean, but that, after what had been disclosed of Maclean's character and conduct, he should have been put in a post in which he had access to most secret papers, and in which personal relations requiring personal discretion were involved. It was "monstrous" not to admit in such cases that the first duty of the employer was to the country and the service, and not to an admittedly flagrantly guilty employee; whilst security of tenure must remain in the Civil Service, it should not prevent dismissal in cases of gross misconduct, gross incompetence, and inability. Ministerial responsibility must be maintained, but officials should present issues fully and with all information for the Minister's decision; when they failed in this respect, the Minister should take appropriate steps

Lord Reading (Minister of State, Foreign Office), replying for the Government, stressed that the House should bear in mind not what had been acquired by knowledge or rumour since the time of Maclean's disappearance, but what had been known to the Foreign Office at the time when the appointment was made, and what reasons there had been for thinking that it was a suitable appointment for him to hold in view of what had taken place in Cairo Referring to the Cairo incident, Lord Reading pointed out that in "this shocking escapade" Maclean had not been in company with any member of the Foreign Service, and that "nothing like the full story" had reached the Ambassador The Ambassador had taken the view that Maclean had had a breakdown and that the moment had arrived—signalized by this bout of drunkenness and some violence—for him to undergo medical treatment As the medical treatment was presumed to have been successful, and as Maclean had been so valuable a member of the Foreign Service, it had been only right that he should have been given a further opportunity of devoting his talents to the public service

It was easy to say, after what had happened, that this was a wrong decision, but it had been taken in good faith and on the basis that Maclean had been, and was capable of continuing to be, a valuable servant of the public and one of the most promising members of the service After his appointment as head of the American department he had been working in London; whilst it might be true that he had indulged in drunken bouts during that period, the Foreign Office had known nothing about them "It seems to me," Lord Reading added, "that a great many people, since Burgess and Maclean disappeared, have been dining out freely on reminiscences of all they knew about them when they were still in the Foreign Office It would have been much more in the public interest if these people had come forward and told the Foreign Office during the time when that information could have been put to proper use."

As a result of this "singularly unhappy business," the disciplinary aspect of the administration of the Foreign Service had been considerably strengthened, and greater emphasis was now placed on personal behaviour than had been the case a few years ago. The new methods of recruitment laid special emphasis on character and personality, and were designed to find out any weaknesses in the individual which might make him unsuitable for the Foreign Service The present case had pointed clearly to a possible connexion between a weakness of character, a particular form of perversion, and security. It was certainly realized now, and perhaps should have been realized earlier, that anyone who was thought to be disposed to homosexual practices was thereby laying himself open to blackmail to an extent which made him an unacceptable security risk. That lesson had now been learned

Lord Reading emphasized, however, that they had no evidence of any kind, and had none up to the time of his disappearance, that Maclean was in any way affected by homosexual impulses. The only thing that had come to their notice since had been a letter from Mrs. Maclean. It might be that Burgess, when in the Foreign Office, had been addicted to these practices, but there again those in authority did not know that this was the case. He had had unqualifying good testimonials from those with whom he had been employed during the previous years He was obviously a person of a brilliant though somewhat erratic turn of mind and character, and had been given a full run—perhaps, in the light of circumstances, too full a run—before it had been decided to remove him from the Foreign Service. The Government had no evidence up to the time of their disappearance to suggest that Burgess had any connexion with Communism or was in any way acting as an agent of Communists.

In conclusion, Lord Reading announced that the report of the Privy Council committee would not be published. The whole object of the report was to concentrate on the present state and the possible future improvement of the security services, and nothing less suitable for publication and debate could be imagined.

The membership of the conference of Privy Councillors to inquire into security precautions in the public services was announced in the House of Commons by Sir Anthony Eden on Nov. 23, as follows: Lord Salisbury, Lord President of the Council; Viscount Kilmuir, the Lord Chancellor; Major Lloyd-George, Home Secretary; Lord Jowitt, a former Lord Chancellor in the Labour Government; Mr. Herbert Morrison, M.P., Deputy Leader of the Opposion; Mr. George Russell Strauss, M.P., formerly Minister of Supply in the Labour Government; and the Permanent Secretary of the Treasury (Sir Edward Bridges). Its terms of reference were: "To examine the security procedures now applied in the public services and to consider whether any further precautions are called for and should be taken."

In reply to **Mr. Bellenger** (Lab), who asked whether there would be any report to Parliament and suggested that the conference was "almost a closed shop," **Sir Anthony Eden** said: "I do not think it is a closed shop It is composed of members of both sides of the House who have had considerable experience in these matters, and I think, rightly, we have both of us excluded in the main those with direct Foreign Office responsibility during the period this matter was under discussion We have also chosen with great care from both sides Home Secretaries and past Home Secretaries with special experience in this matter The report will be made to me, and if the conference recommends changes in the law, or anything of that kind, clearly they would be for reference to the House"

Mr. Turton (Joint Under Seeretary, Foreign Office) stated in a parliamentary reply on Nov. 21 that no officials had been dismissed or transferred as a result of the inquiries into the Maclean-Burgess case. One official, however, had been asked to resign and had received a financial settlement in accordance with the terms of his engagement, whilst another had been permitted to resign in view of his relationship to one of the persons involved, and had been given a gratuity. No names were given by Mr. Turton.

Mr. Philby—who, as stated above, had been referred to by Lt.-Col. Lipton in the House of Commons as the alleged "third man" in the Burgess and Maclean affair—strongly denied on Nov. 8 the charges made against him. On Nov. 10 Lt.-Col. Lipton, in a personal statement to the House, said that as a result of further examination of the question he was satisfied that there was no justification for his allegations against Mr. Philby, that he deeply regretted having made these charges, and that he unreservedly withdrew them.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14457 A.)**

A. UNESCO. — Universal Copyright Convention.

The Universal Copyright Convention, signed at an international conference in Geneva in September 1952 under the sponsorship of the U.N. Educational, Scientific, and Cultural Organization, came into force on Sept. 16, 1955—i.e., three months after the twelfth signatory country (Monaco) had deposited its instrument of ratification. The other 11 countries which had previously ratified the Convention were, in chronological order: Andorra (Dec. 20, 1952—Jan. 22, 1953); Cambodia (Aug. 3, 1953); Pakistan (April 28, 1954); Laos (Aug. 19, 1954); Haiti (Sept. 1, 1954); Spain (Oct. 27, 1954); the United States (Dec. 6, 1954); Costa Rica (Dec. 7, 1954); Chile (Jan. 18, 1955); Israel (April 6, 1955); and the German Federal Republic (June 3, 1955).

The following countries deposited their instruments of ratification after Monaco's deposition; the Vatican (July 5); Luxemburg (July 15); the Philippines (Aug. 19); and France (Oct. 14). In all these cases the Convention will come into force for the countries concerned three months after the date of deposition.—(Unesco, Paris) **(14084 A; 12639 B.)**

B. UNITED KINGDOM. — Creation of Political Office with the Middle East Forces.

The Foreign Office announced on Oct. 11 that the organization and functions of the British Middle East Office would be reconstituted and its name changed to that of Political Office with the Middle East Forces. The announcement added that the present head of the Office, Sir John Sterndale Bennett, was shortly retiring, and that the first head of the new Office would be Mr. J. S. H. Shattock (at present Counsellor at H.M. Embassy in Belgrade), who would be known as the Political Representative. It was also stated (*a*) that the British Middle East Office—which had been functioning in Cairo for many years until 1952, and subsequently at Fayid—had been moved from Egypt to Cyprus in connexion with the evacuation of British forces from the Suez Canal Zone; (*b*) that the Political Representative would represent the Foreign Office with the Commanders-in-Chief, Middle East; and (*c*) that the Information Section of the B.M.E.O. (which had previously been transferred to Beirut) would become the British Regional Information Office for the Middle East, remaining in the Lebanese capital. (Times) **(Prev. rep. Middle East Office, 7575 A.)**

A. CANADA.—Development of Natural Resources and Industry. - Royal Commission on Economic Prospects.

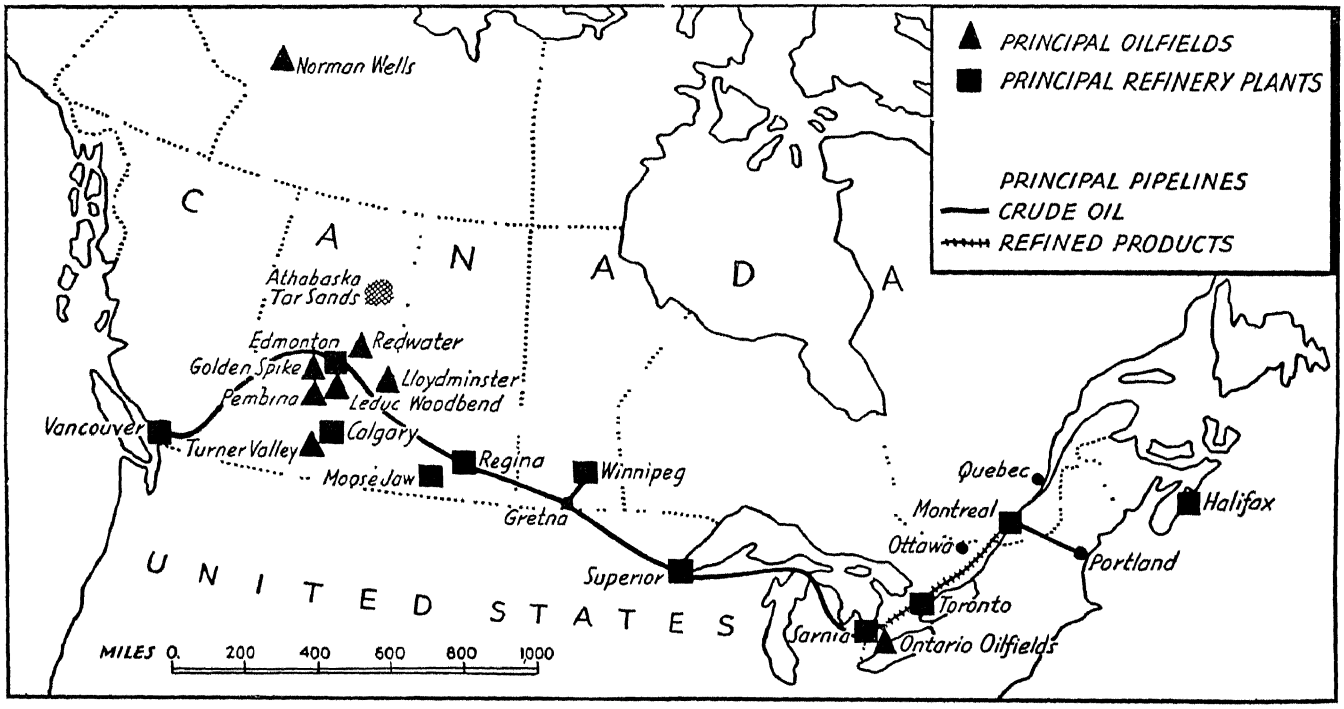
Recent important developments in the exploitation of Canada's natural resources and the expansion of Canadian industry are summarized below :

Hydro-Electric and Aluminium Projects.

Quebec. Mr Duplessis, the Provincial Premier, announced on Sept 10 that work on the Bersimis hydro-electric scheme (see 13053 A) was virtually complete, and that plans had been prepared for utilizing the full power potentials of the rivers Outarde and Manicougagan in north-eastern Quebec, in addition to that of the Bersimis River. He added that the existing Bersimis project would have an output of 1,200,000 horse-power (to be increased later to 1,700,000 h.p), whilst the power potentials of the Outarde and Manicougagan were estimated at 1,000,000 h p. and 2,000,000 h p respectively.

On June 5 Mr. Duplessis had announced that a hydro-electric power plant would be built on the Chicoutimi River at a cost of about $4,750,000 (£1,725,000).

British Columbia. Mr. Nathanael Davis, president of the Aluminium Company of Canada, announced on March 18 plans to expand the production capacity of the company's Kitimat smelter by a further 180,000 tons annually, making—with the existing installed capacity of 91,500 tons, and the further 60,000 tons authorized in October, 1954 (see 13900 C)—a total annual capacity of over 330,000 tons



The Oil Resources of Canada. (*New Commonwealth*)

The cost of the expansion programme was estimated at about $190,000,000, most or all of which would be met from the company's own resources. Mr Davis added that by the end of 1956 production from the Kitimat plant would have increased to 181,500 tons annually, whilst the balance of about 148,500 tons a year would come into operation by stages, the last of which was expected to be completed by 1959.

On Aug. 22, 1954, it had been announced that the Canadian Government had granted to North-West Power Industries Ltd. (a subsidiary of Quebec Metallurgical Industries Ltd. and Frobisher Ltd) a priority permit assuring the company of first consideration for its plans for a vast hydro-electric project in the Atlin Lake area of northern British Columbia. The project, expected to cost about $270,000,000, envisages the ultimate development of 5,000,000 h.p., with the construction of an 880,000 h p. hydro-electric and smelter project 800 miles north of Vancouver as its first stage.

Oil and Natural Gas Deposits. - The Athabaska "Tar Sands."

Alberta. Plans for the immediate exploitation on a commercial basis of the Athabaska "tar sands" in north-eastern Alberta were announced on Aug. 5, 1955, by the Royalite Oil Co Ltd. and the Can-America Oil Sands Development Co. Ltd., which had been granted an option to take over the pilot extraction plant set up by the Albertan Government. The Athabaska "sands," covering an area of about 30,000 square miles, are estimated to contain up to 300,000,000,000 barrels of oil, more than all the known oil reserves of the world. Previous attempts to exploit them commercially had been unsuccessful, since no method could be devised of separating the oil from the rocks and sand with which it is mixed.

British Columbia. Mr. Bennett, the Provincial Premier, announced on Dec. 16, 1954, that a provisional agreement had been signed between the West Coast Transmission Co of Canada and two U.S. companies (the Pacific North-West Pipeline Corporation and the El Paso Natural Gas Company) for the construction of a natural gas pipeline to run from the Peace River district of British Columbia and Alberta to the U.S A. It was explained in the Press that the agreement—described as "the most important economic development in British Columbian history"—provided for the delivery by the Canadian company at the U.S -Canadian border of 300,000,000 cu. ft of natural gas daily ; about 50,000,000 cu ft of this quantity would be delivered in the North-West States of the U S A (Washington and Oregon), and the remainder added to the Colorado-New Mexico pool In addition, about 55,000,000 cu. ft would be used initially in British Columbia, the quantity increasing to over 100,000,000 cu. ft a day by 1958. Mr Bennett added that construction of the pipeline —about 600 miles long, and estimated to cost over $100,000,000— would probably begin in September, 1955, and that the first deliveries of natural gas would be made by December, 1956. The U S companies would build connecting lines from the San Juan basin to meet the British Columbia line at the California border, with a separate line from the border into eastern Washington and Oregon.

Production Figures. Statistics for crude oil and natural gas produced in Canada during 1954 were given by the Federal Bureau of Statistics on Jan. 7, 1955, as follows (1953 figures in parentheses) . *Crude Oil* · Production, 95,480,000 barrels (80,898,000 barrels), value, $246,000,000 ($200,500,000). *Natural Gas* . Production, 122,854,000 cu. ft (101,000,000 cu ft.), value, $12,683,000 ($12,681,000) ,

Mineral Production.

Production Figures The total value of mineral production in Canada during 1954 (including production of oil and natural gas) was given by the Federal Bureau of Statistics on Jan 7, 1955 as $1,454,000,000, compared with $1,336,000,000 in 1953. The value of metallic ores produced rose during the year from about $709,000,000 to $763.000,000. Figures for the principal minerals (apart from oil and natural gas—see above) were as follows, with 1953 figures in parentheses : *Gold* · 4,280,000 fine oz. (4,056,000 fine oz.), value $145,000,000 ($139,000,000) ; *Copper* : 600,000,000 lb. (506,500,000), value $174,000,000 ($151,000,000) ; *Nickel* 320,000,000 lb. (281,300,000 lb.), value $180,200,000 ($160,200,000) ; *Lead* : 442,500,000 lb. (387,500,000 lb.), value $59,000,000 ($50,000,000) ; *Iron Ore* : 7,280,000 tons (6,480,000 tons), value $46,700,000 ($44,100,000) , *Silver* · 31,500,000 oz. (28,000,000 oz.), value $26,260,000 ($23,750,000) ; *Zinc* : 747,700,000 lb. (802,700,000 lb.), value $89,300,000 ($96,100,000) ; *Coal, etc.* . value $96,073,000 ($92,753,000).

Gold Mining. The Federal Minister of Mines (Mr. Prudham) announced on Jan 28, 1955, that, owing to the improved position of the gold mining industry, the emergency subsidies payable to gold mines in 1955 would be reduced from $13.50 to $12.33 an oz. of gold produced, and that the minimum of production costs entitling mines to the subsidies would be raised from $18 to $26.50 an oz. of gold produced.

New Railway in North-Western Quebec. The Quebec Minister of Transport (Mr. Marler) announced on Aug. 14 that the Canadian National Railways had decided to build immediately, with Government assistance, a 289-mile rail extension from St. Felicien, on Lake St. John, to the mining areas of Beattyville and Chibougamau in north-western Quebec, where development of gold, copper, zinc, and iron resources had been retarded by lack of transport. The new railway

was expected to cost $35,000,000, and a grant of $1,250,000 had already been approved by the Provincial Parliament as "a first instalment" of financial assistance.

Industrial and Allied Developments.

Quebec. Mr. Duplessis announced on June 5 that a copper refinery would be built at Chicoutimi at a cost of $20,000,000 (about £7,250,000). On Sept 12 he further announced that the Dominion Steel and Coal Corporation intended to build two subsidiary steel plants in Montreal at a cost of over $2,000,000, and stated that a total of about $23,000,000 was being spent on factories at Valleyfield, Varennes, and Pointe aux Trembles, near Montreal, and at La Tuque, near Quebec City. He added that in the last two years "several hundred million dollars" had been invested in new industry and construction in Quebec Province.

Ontario. Mr Frost, the Provincial Premier, announced on March 13 that in the coming financial year (1955-56) the Ontario Government planned to spend $220,000,000 on roads and $36,000,000 on other public works. In the past 12 years, he pointed out, the population of Ontario had grown by 1,250,000 and the rate of increase had risen from 40,000 annually to 150,000—a higher rate than anywhere else in Canada and more than double the rate in the United States In 1953-54 investment in the province had risen by 2 per cent and salaries and wages by 3 per cent, whilst mineral production had increased and production of pulp and paper had set a new record.

The Minister of Lands and Forests (Mr. Mapledoram) announced on March 31 that, as part of its programme to develop Ontario's forest industries, the Provincial Government had concluded an agreement with British interests controlled by Lord Rothermere whereby the latter undertook, if it proved economically feasible, to build a $50,000,000 pulp and paper mill in the Sioux Lookout district of north-eastern Ontario.

Saskatchewan. Mr. Douglas, the Provincial Premier, stated on Aug. 24 that the Hoesch Company of Dortmund (Western Germany) would build a plant at Regina to manufacture steel pipes, primarily for the transmission of oil and natural gas. The plant—which would initially cost about $3,000,000, but which might be greatly expanded—would be in operation within a few months, and would be the first of its kind on the Canadian prairies and the first to be established by the Hoesch Company outside Germany.

Nuclear Energy.

A statement on developments in connexion with nuclear energy was published by the Canadian Government in August, 1955

The statement explained that the atomic power station at Des Joachims, Ontario (see page 14363), was being operated by the Crown company, Atomic Energy of Canada Ltd. (see 13053 A). The company was engaged in (*a*) the development of nuclear power; (*b*) fundamental research; (*c*) the operation of nuclear reactors and the separation of nuclear fuels (plutonium and uranium-233); (*d*) the production of radioactive isotopes and associated equipment, such as therapy units for cancer treatment. It had at present 1,900 employees, in addition to which a number of engineers and scientists employed by universities, power concerns, and industrial firms were working on atomic energy development. Detailed design had just begun on Canada's first atomic power station, known as Nuclear Power Demonstration (NPD), which was expected to go into production in 1958 Meanwhile preliminary studies for a 100,000 kw. electricity station would be carried out jointly by Atomic Energy of Canada Ltd., the various power companies, and industrial firms Complete information on the design and performance of the NPD station and on the preliminary design study for the larger station would be made available to the Advisory Committee on Atomic Power, which included representatives of the various privately- and publicly-owned power companies throughout Canada.

Aircraft Manufacture.

The rapid recovery of the Canadian aircraft industry after the contraction which followed the end of World War II (when the number of employees fell from about 80,000 to 8,000) is shown by the following list of firms, with their affiliations and products, enumerated by the *Financial Times* in a special Canadian supplement on Nov. 28

Avro Aircraft Ltd. and **Orenda Engines Ltd.** (both of Malton, Ontario), subsidiaries of A. V. Roe (Canada) Ltd, a member of the Hawker-Siddeley group These companies had in production respectively the *Avro CF-100 Mark 4* all-weather, rocket-firing, twin-jet interceptor and the *Orenda* two-stage, axial-flow, turbo-jet engine. Avro Aircraft also had in course of development the *Avro CF-105* delta-wing supersonic interceptor.

Canadair Ltd. (Montreal). This company, a subsidiary of the General Dynamics Corporation of New York, was producing *F-86 Sabre V* and *VI* jet interceptor planes and the *T-33 Silver Star* trainer. In the engineering and planning stage it had the maritime reconnaissance version of the Bristol *Britannia*.

De Havilland Aircraft of Canada Ltd. (Toronto). This organization, an offshoot of the British de Havilland company, had in production the *Otter*, the *Beaver*, and the *L-20 Beaver* for the U.S. Air Force, and the *Chipmunk* for the Royal Canadian Air Force. In the engineering and planning stage it had the *Sentinel* for the Royal Canadian Navy.

Canadian Car and Foundry Ltd. (Fort William, Ont.) This firm, also a subsidiary of A. V. Roe (Canada) Ltd., had in production the *T-34 Mentor* training plane for both the U.S.A.F. and the R.C.A.F.

Rolls-Royce of Canada Ltd. (Montreal), whose parent company was Rolls-Royce Ltd. of Derby, had in production the *Nene* centrifugal turbo-jet engine.

Canadian Pratt and Whitney Ltd. (Longueil, Quebec) This subsidiary of the United Aircraft Corporation, of East Hartford (Conn.), had in production Pratt and Whitney *Wasp* piston engines.

It was announced on July 8 that the Canada Wire and Cable Company would collaborate with the Telegraph Construction and Maintenance Company of London and the General Cable Corporation of New York in the formation of a new company—Telecables and Wires Ltd.—to manufacture telephone wires and cables in Canada. The controlling interest would be held by the Canada Wire and Cable Co., which would act as managers of the new company.

The Federal Department of Trade and Commerce stated in February last that new capital investment in Canada in 1954 had totalled $5,489,000,000, compared with $5,826,000,000 in 1953. The Dominion Bureau of Statistics estimated on March 7 that long-term foreign investment in Canada had reached the record total of $12,000,000,000 at the end of 1954, against $11,422,000,000 in 1953.

Mr. St Laurent, the Federal Prime Minister, announced in the House of Commons on June 17 the appointment of a Royal Commission on Canada's economic prospects. Its terms of reference were as follows:

"(1) To inquire into and report on the long-term prospects of the Canadian economy, i e the probable economic development of Canada and the problems to which such development appears likely to give rise,

(2) to study and report on (*a*) developments in the supply of raw materials and energy sources, (*b*) the growth to be expected in the population of Canada, and the changes in its distribution, (*c*) prospects for growth and change in domestic and external markets for Canadian products; (*d*) trends in productivity and standards of living, (*e*) prospective requirements for industrial and social capital"

The members of the Royal Commission are: Mr. W. L. Gordon (Toronto, Ontario), chairman; Mr. Omer Lussier (Quebec), Mr. A. E. Grauer (Vancouver, B.C.); Mr. Andrew Stewart (Edmonton, Alberta); and Mr. Raymond Gushue (St. John's, Newfoundland).

The Royal Commission began its work by making an aerial survey of the North-West Territories and the Yukon during August. It subsequently held public hearings in Newfoundland and the Maritime Provinces in October, and in Manitoba in November.—(Montreal Star - The Gazette, Montreal - New York Times - Manchester Guardian - Financial Times - Commonwealth Survey - Canadian High Commissioner's Office, London) **(Prev. rep. Economic Development, 13053 A; Kitimat Smelter, 13900 C.)**

A. UNITED KINGDOM. — Royal Commission on Law relating to Common Land. - Membership and Terms of Reference.

The Prime Minister announced on Oct. 25 that Sir Ivor Jennings, Q.C., Master of Trinity Hall, Cambridge, had been appointed chairman of a Royal Commission to inquire into the law relating to common land in England and Wales.

The other members of the Royal Commission were announced on Dec. 1, as follows: Mr. Charles Arnold-Baker, secretary of the National Association of Parish Councils; Mr. T. G. C. Evans, agent to the Duke of Norfolk for the Arundel estate, Sussex; Mr. C. M. Floyd, president of the Royal Forestry Society for England and Wales, Dr. W. G Hoskins, Reader in Economic History, University of Oxford; Mr. Alan Lubbock, a member of the National Parks Commission, Mr Ivor Morris, chairman of the Wool Marketing Board; Mrs. Florence Paton, formerly M P. (Labour) for Rushcliffe; Sir George Pepler, planning consultant; Professor R. A Roberts, Professor of Agricultural Botany, University of Wales; Sir Donald Scott, formerly M.P. (Conservative) for Penrith, and a former Parliamentary Secretary to the Ministry of Agriculture, and Dr. Dudley Stamp, Professor of Social Geography, University of London.

The Royal Commission has the following terms of reference: "To recommend what changes, if any, are desirable in the law relating to common land in order to promote the benefit of those holding manorial and common rights, the enjoyment of the public, or, where at present little or no use is made of such land, its use for some other desirable purpose."

(Times - Daily Telegraph - Manchester Guardian)

B. PAKISTAN. — Rawalpindi Conspirators released.

It was announced in Karachi at the beginning of October that the Governor-General had remitted the unexpired portions of the sentences imposed on the defendants in the Rawalpindi conspiracy case. The prisoners were the former Major-General Akbar Khan; the former Air-Commodore Janjua, the former Brigadiers Sadiq Khan and Latif Khan; the former Lieut.-Colonels Ziauddin and Arbab; the former Majors Hasan Khan and Ishaq Mohammad; the former Captains Khizar Hayat Khan and Zafrullah Poshni; Mr. Faiz Ahmad Faiz; Mr. Sarjab Zaheer; and Mohammad Husain Atta.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14232 A, p. 14234)**

A. SINGAPORE. — Legislative Assembly's Demand for Immediate Self-Government. - Governor's Reply to Assembly Resolution. - London Discussions in 1956.

The Singapore Legislative Assembly adopted a resolution on July 25 demanding immediate self-government for the Colony, and asking the Governor (Sir Robert Black, who had formally taken office on July 3) to convey the request to the British Colonial Secretary, Mr. Lennox-Boyd, who was then on a tour of the Far Eastern colonies and was due to arrive in Singapore in August. The terms of the resolution were as follows :

(1) The Speaker of the Legislative Assembly was asked to convey to the Governor " the view of this House that the people of Singapore are determined to end colonialism and to rule themselves through their elected representatives."

(2) The British Government was asked to adopt " the most liberal Constitution legally permissible in favour of the elected representatives of the people in the interpretation of the Singapore Colony Order-in-Council, 1955." [This Order set up the Legislative Assembly and provided a new Constitution.]

(3) " Where the Governor is required by the said Order-in-Council to consult with the Chief Minister before taking any action, he should act in accordance with such advice "

(4) The Legislative Assembly declared that " the time has arrived for the transference of power from the United Kingdom " and that " a new Constitution providing self-government should be granted immediately."

The Speaker was asked to present the resolution to the Governor and to report back to the Legislative Assembly, which would " thereafter . . . take such action . as circumstances may require "

The resolution, introduced by the right-wing Progressive Party and accepted by the Chief Minister (Mr. David Marshall), was carried with only one dissenting vote—the nominated European member, Mr. G. A. Sutherland. The three official members—Mr. W. A. Goode, the Chief Secretary, Mr. T. M. Hart, Financial Secretary, and Mr. E. J. Davies, Attorney-General—abstained from voting. As originally worded, the resolution called for immediate " independence " for Singapore, but at Mr. Marshall's suggestion it was agreed to substitute " self-government."

Mr. Lennox-Boyd arrived in Singapore from Hong Kong on July 31, and on the following day had discussions on constitutional questions with Mr. Marshall and Sir Robert Black. The Colonial Secretary subsequently left Singapore for a visit to North Borneo, but returned on Aug. 15 and had further discussions on subsequent days with the Governor and the Chief Minister. No official statement was issued about these meetings, but Mr. Marshall said on Aug. 17 that his talks with Mr. Lennox-Boyd had been " very satisfactory " and had " dealt completely with all constitutional issues raised."

Meanwhile, Sir Robert Black had sent a message to the Legislative Assembly on Aug. 2 in reply to its resolution of July 25.

The Governor pointed out that he would continue his discussions with Mr. Lennox-Boyd after the latter's return to Singapore on Aug 15 ; that he was therefore not yet able to send a full reply to the Assembly's resolution, but that he hoped to do so after the resumption of his talks with the Colonial Secretary. He informed the Assembly (1) that he had been asked by Mr Lennox-Boyd to assure members of " the continuing sympathetic interest which H M. Government take in Singapore's problems and of the sincerity of their policy to assist Singapore to achieve self-government within the British Commonwealth ", (2) that he [Sir Robert Black] desired to give the Singapore Government " all possible help in the execution of its policies," and that in doing so he did not propose to exercise his discretionary powers " in a didactic or harsh manner, or in any way calculated to frustrate the Government in discharging responsibilities which it has accepted ", (3) that " valuable and friendly talks " had taken place between Mr. Lennox-Boyd, Mr Marshall, and himself on the matters contained in the Assembly's resolution

After his further discussions with Mr. Lennox-Boyd in mid-August, the Governor sent a message to the Legislative Assembly on Aug. 18 stating—with regard to the Assembly's request for a new Constitution providing for immediate self-government—that " H.M. Government will be glad to welcome to London at a suitable date a representative delegation from Singapore to consider the situation in the light of a year's working of the [existing] Constitution. (This meant, in effect, that a Singapore delegation would go to London about April, 1956, by which time the Colony's constitution would have been in force for a year.) In addition, Sir Robert Black informed the Assembly that where he was required under the Constitution to consult with the Chief Minister, he would accept the latter's advice except where the Constitution provided for the prorogation or dissolution of the Assembly, in which case the Governor's existing powers would be preserved. (This meant that while the Governor's reserve powers—e.g. to prorogue or dissolve the Assembly—would not be affected, the Chief Minister would have complete freedom in deciding on Cabinet portfolios and appointing Ministers.)

Mr. Marshall welcomed the Governor's message as " warming and encouraging "—in particular, the assurance that " our request for immediate self-government will be considered within the next nine months." The Opposition parties, however, complained at what they described as the " calculated ambiguity " of the Governor's message, and asked for time to consult their supporters and " party officials." When this was refused, all 12 Opposition members left the Assembly in protest at Mr. Marshall's " dictatorial conduct " in refusing them the time for which they had asked. A motion expressing the Assembly's thanks for the Governor's message was adopted by the remaining members—the 17 members of the Labour Front Government and the nominated European member, Mr. Sutherland.—(Times - Daily Telegraph - Manchester Guardian - New Commonwealth)

B. UNITED KINGDOM. — Railways. - £10,000,000 Order for Diesel Locomotives placed by Transport Commission.

The British Transport Commission announced on Nov. 22 that, as part of its plan to modernize and re-equip British Railways, it had placed contracts worth nearly £10,000,000 with British manufacturers for 141 main-line diesel locomotives (130 diesel-electric and 11 diesel-hydraulic), as well as for 30 power units to be incorporated in locomotives to be built in British Railways' workshops. The total number of main-line locomotives to be built under the modernization plan would be about 2,500.

It was explained that the 171 locomotives covered by the contracts formed a pilot scheme under which trials would be carried out before any further orders were placed, and that they comprised three main designs . Type A (800-1,000 h p.), for freight ; Type B (1,000-1,250 h.p.), for mixed traffic ; Type C (2,000 h p. and over), for heavy duties.

The contracts for complete locomotives were placed as follows · Birmingham Carriage and Wagon Co. Ltd., Smethwick—20 Type B; British Thomson-Houston Co , Rugby—10 Type A ; Brush Bagnall Traction Co , Loughborough—20 Type B ; English Electric Co., Bradford—10 Type C, 10 Type B and 20 Type A , Metropolitan-Vickers Electrical Co., Manchester—20 Type B ; North British Locomotive Co , Glasgow—10 each of Types A and B, besides 11 diesel-hydraulic locomotives (six of Type B and five of type C). The contracts for power equipment sets were placed with Sulzer Bros., London, a subsidiary of the Swiss firm of Sulzer & Co., Winterthur (10 for locomotives of Type C), and with the British Thomson-Houston Co , Rugby (20 for locomotives of Type B) Delivery time for the first locomotives would vary from 18 months to two years

The types of diesel engines to be used in the locomotives would include products of British makers, but, in addition, the Commission would carry out extensive trials of the Sulzer (Swiss) and M.A.N. (German) engines, both of which were now made in Britain under manufacturers' licences The external form and liveries of the new locomotives had yet to be settled, but the Commission, in conjunction with the makers, were " paying special attention to aesthetic external design."

It was stated that 80 of the diesel locomotives would be used on the London Midland Region, another 80 on the Eastern Region, and 11 on the Western Region.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14024 A.)**

C. AUSTRALIA. — Embassy Status for Legations in Siam and the Philippines.

The Australian Minister for External Affairs, Mr. Casey, announced on Dec. 6 that the Australian Legations in Bangkok and Manila would be raised to the status of Embassies, and that the Legations of Siam and the Philippines in Canberra would have similar status. Mr. Casey said that it was the Australian Government's policy to promote closer relations with the free countries of Asia and to develop full mutual understanding with individual countries in the political, economic, and cultural fields.—(Australian News and Information Bureau) **(Prev. rep. Manila Treaty, 13761 A.)**

D. PAKISTAN. — New Chairman of Commission on Marriage and Family Laws.

Following the death of Khalifa Shujauddin, chairman of the recently-created Commission on Marriage and Family Laws, the Government of Pakistan appointed Mian Abdul Rashid (lately Chief Justice of Pakistan) as his successor at the beginning of November.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14435 A.)**

E. FRANCE. — Armed Forces. - Appointment of New Commanders in Morocco and Tunisia.

It was announced in Paris on Nov. 15 that General Bourgund had been appointed Supreme Commander of the Armed Forces in Morocco. The appointment of Major-General Baillif as Commander of the Armed Forces in Tunisia had been announced on Oct. 4.—(Le Monde, Paris) **(Prev. rep. 14427 A.)**

DECEMBER 10—17, 1955

A. FRANCE. — Faure Cabinet. - National Assembly Approval of Moroccan and Algerian Policies. - Resignation of Gaullist Ministers. - M. Faure's Demand for Early Elections. - Proposals for Simultaneous Electoral Reform. - Debates in National Assembly and Council of the Republic. - Government dissolves Assembly after No-confidence Vote. - General Elections to be held in January. - M. Faure expelled from Radical Party.

After having obtained the National Assembly's approval of its Moroccan and Algerian policies, the Government of M. Edgar Faure was defeated in the Assembly after a prolonged struggle over its proposal to end the Assembly's life six months ahead of the expiration of its normal term of office and to hold general elections before or immediately after the end of 1955. In spite of its defeat over the electoral question (which it had made a question of confidence) the Government decided not to resign but to invoke that provision of the French Constitution authorizing the dissolution of the Assembly and the holding of new elections in the event of the Government having been defeated on a confidence motion by an absolute majority in the Assembly twice within 18 months. This decision led to the resignation of five Radical Ministers, whilst, prior to the Assembly's debate on the Government's Moroccan policy, four of the five Gaullist Ministers had also left the Cabinet because of their disagreement with its handling of the Moroccan situation. These developments are described below.

Cabinet Changes.

Four of the five Social Republican (Gaullist) members of M. Faure's Cabinet resigned on Oct. 6 after the Prime Minister had asked them either to show their complete support of the Government's policy or to resign. The four Ministers who chose to resign were General Koenig (Defence), M. Palewski (Minister attached to the *Présidence du Conseil*), M. Triboulet (Minister for War Veterans), and M. Bayrou (State Secretary for Overseas Territories), all of whom had in recent weeks adopted a critical attitude towards the Government's policy, especially in connexion with Morocco (see 14473 A). The fifth Gaullist Minister, General Corniglion-Molinier (Public Works and Transport), expressed his support for the Government and remained in office.

M. Faure's action followed the publication by the national council of the Social Republican Party (Oct. 5) of a statement calling for "the immediate formation of a Government of public safety, the only Government capable of facing events which threaten the existence both of the Franco-African community and of republican institutions." A deputation from the national council saw President Coty on the following day, and afterwards issued a second statement explaining that the proposed Government should be "placed under the direction of an unchallenged national authority" and should consist of "men belonging to all the national shades of opinion."

General Pierre Billotte (Dissident Gaullist - A.R.S.) was appointed Defence Minister on Oct 6, whilst the following new appointments were announced on Oct. 21 :

M. Pierre July (*non-inscrit*) ..	Minister attached to the *Présidence du Conseil.*
M. Vincent Badie (Radical) ..	Minister for War Veterans.
M. Jean Lecanuet (M.R.P.) .	State Secretary to the *Présidence du Conseil.*
M. Jean Chamant (Independent Republican) .	State Secretary for Foreign Affairs.
M. Henri Laforest (Radical) ..	State Secretary for Defence.

M. July had previously been Minister for Moroccan and Tunisian Affairs, and M. Laforest State Secretary for Relations with the Associated States. Both these posts are now abolished, the responsibility for relations with Morocco, Tunisia, and the Associated States having been transferred to the Foreign Ministry.

General Billotte (49) served with distinction in the campaign of 1939-40, was captured and interned in Germany, and escaped in 1941 *via* the Soviet Union to London, where he became Chief of Staff to General de Gaulle After serving as secretary of the Free French National Defence Committee from 1942-44 he took a prominent part as field commander in the liberation campaign which followed the Allied landings in France. At the end of the war he became Military Governor of the French Zone of Germany, and Deputy Chief of the French General Staff. From 1946-50 he headed the French delegation to the Committee of Chiefs of Staff at the United Nations, taking a prominent part in the negotiations which led to the signing of the Atlantic Pact. He entered the National Assembly as a Gaullist in 1951, but joined the A.R.S. (Dissident Gaullist) group on its formation in the following year.

M. Badie (53), a lawyer, entered the Chamber of Deputies in 1936, voted against the delegation of powers to Marshal Pétain in 1940, and was deported to Dachau in 1943 for his activities in the resistance movement. He was elected to the Assembly after the liberation, and in July last became president of the Radical group. **M. Chamant** (42), a lawyer, and **M. Lecanuet** (35), a former civil servant, were elected to the Assembly in 1946 and 1951 respectively.

The Debate on Morocco.

A debate on the Government's Moroccan policy, on which 18 *interpellations* had been tabled, was opened on Oct. 6 by M. Faure, who had been authorized by the Cabinet to make the question one of confidence.

M. Faure declared that a "concerted campaign" was being carried on against the presence of France in North Africa, as shown both by recent developments in the U.N. General Assembly (see page 14464) and by the uprisings in Algeria and the Riff area, which appeared to have been organized from abroad. The problem of Morocco was not a problem of who should be Sultan, but of defining French policy, and his Government's policy was one of "evolution and reforms." Such a policy, however, pre-supposed the existence of a Moroccan Government containing representatives of both the nationalists and traditionalists. Moroccan nationalism, M Faure emphasized, was a force which could be neither ignored nor suppressed, and it was necessary to lead it towards co-operation with France At the Aix-les-Bains conference the Moroccan spokesmen had not concealed the fact that their ultimate aim was independence, but independence combined with "a free association safeguarding our pride and the Franco-Moroccan community." On the question of the throne, two solutions had to be resolutely avoided . the *status quo*, which could only lead to increased disorders ; and still more, the restoration of the former Sultan. The creation of the Council of the Throne was an "intermediate formula" In conclusion, M Faure said that he had no intention of resigning, since the "public safety" would not be furthered by a Cabinet crisis.

In the ensuing debate the Government was strongly criticized by a number of right-wing deputies, who demanded firmer measures against terrorism, whilst other speakers approved the Government's policy but deplored the weakness and hesitation with which, they maintained, it had been carried out. **M. Savary** (Socialist) declared that in his party's view the Government's task was "to repair the deplorable error of Ben Youssef's deposition and to democratize and modernize Morocco." He suggested that the impunity enjoyed by those responsible for the ex-Sultan's deposition had encouraged crime and rebellion, and asserted that the recall of M. Grandval "under pressure from certain Ministers" had been interpreted as a sign of weakness and (he alleged) had encouraged General de Latour to defy the Government's orders **M. de Moustier** (Ind. Republican) complained that the Government's policy had been frustrated by an "organized gang" forming a "Moroccan lobby," and that no measures had been taken against officials who had refused to obey M Grandval, or against those responsible for the Casablanca riots in July last. **M. Vallon** (*non-inscrit*) strongly criticized the conduct of General de Latour, who, he alleged, had appointed opponents of the Government's policy to high positions, conspired with Marshal Juin and the *Présence Française* to delay the implementation of the Government's plan, and tried to prevent the formation of the Council of the Throne

General Aumeran (*apparenté* to the Independent Republicans) denounced the Government's plan for a representative Moroccan Government and demanded the proclamation of a state of siege throughout North Africa, the appointment of a single Governor for the whole area, and the establishment of itinerant military courts. **M. Pierre André** (Ind Republican) declared that by opening negotiations before terrorism was stamped out France would "lose face," that terrorist murders could not be stopped by reforms, and that the Government should take all necessary measures to track down the authors and instigators of the terrorist attacks and to execute those who committed the murders In reply, **M. July** pointed out that although the Government had sent large reinforcements to Morocco, the terrorists could not be suppressed as long as they enjoyed support from amongst the population, and that only reforms would end this situation. **M. Montel** (Ind. Republican) recalled the massacre at Oued-Zem, which, he said, had been started because some agitators had spread the rumour of an Egyptian troop landing in Morocco. In view of these happenings he doubted whether Moroccans had yet reached sufficient maturity for self-government, and warned the Government against negotiating with men who might have been responsible for the massacre. **M. Bardoux** (*Paysan*) asserted that the Government's measures resulted from "an error in principle" and constituted a violation of the Treaty of Fez. **M. de Bénouville** (Gaullist) maintained that an agreement concluded on Sept. 30 between General de Latour and the *Présence Française* was binding on the Government; this agreement, he said, provided that the Council of the Throne should not be set up, that there should be no modification of the Protectorate Treaty, and that the traditionalists should have a majority on the new Moroccan Government. M. de Bénouville's argument was strongly rejected by **M. Faure,** who pointed out that no agreement could be concluded between the Resident-General and any private organization.

In the continued debate the Government's Moroccan policy was condemned on the one hand by **M. Billoux** (Communist), who particularly denounced the Pasha of Marrakesh, and on the other hand by **M. Quilici** (Ind. Republican deputy for Oran), who described the Istiqlal and the Democratic Independence Party as the "enemies of France," and who declared that the Government would lose any remaining loyalties in North Africa if they did not stop the "series of scuttles before agitating minorities." **M. Dronne** (Gaullist) agreed on the need to modernize the political and social structure of Morocco,

but asserted that the Government's policy was not the right way to carry this out and would only lead to disorder. **General de Monsabert** (Gaullist) called for the appointment of a Commander-in-Chief for the whole of North Africa and the proclamation of a state of siege, but **M. Catroux** (Gaullist) expressed the view that a policy of "order first, then reforms," would alienate both the Moroccan people and world opinion, and would involve France in ruinous military expenditure.

M. Faure, replying to the debate, reaffirmed his view that nothing substantial could be achieved without the support of the nationalists, who spoke for the cities and the younger generation of Moroccans. Despite the recent appeal of Si Allal El Fassi (see 14452 B), it was indispensable to obtain the collaboration of the Istiqlal as well as the other nationalist parties; at present Allal El Fassi did not speak for the whole of the Istiqlal, and it was for France to ensure that "other men disillusioned by Paris do not turn completely towards Cairo." Answering a question by General Aumeran on the meaning of the phrase "independence in interdependence," M. Faure said: "In a short time there will be no more dependent peoples. All wish to move and are moving towards independence. That is also true of the Moroccans, but they are willing to move towards it by stages. At the end of the road there is one possibility which we wish to avoid: separation. We wish, on the contrary, to create a permanent community through an association which is freely accepted, and based on respect for national pride and the interlocking of common interests. If you don't have that, you will have nothing but blood and ruins." To a further question by **M. Dassault** (Gaullist), who asked for an assurance that the French community in Morocco would have the right to take part in public affairs, **M. Faure** replied that it was important to avoid the suggestion of "co-sovereignty," which offended Moroccan susceptibilities; the solution lay in a reciprocity of rights between Frenchmen and Moroccans, similar to that guaranteed by the Franco-Tunisian agreement.

M. Depreux (Socialist) said that it was highly desirable that a majority of the deputies should express themselves in favour of a policy of Franco-Moroccan association, based on the speedy formation of a Council of the Throne and a representative Moroccan Government. The Socialists, however, could not support any motion implying confidence in M. Faure's Government, which, by tolerating disobedience by high officers and officials, had brought about "a certain degradation of the regime." "We accuse you," M. Depreux declared, "not of having governed badly, but of not having governed at all."

The National Assembly then agreed by 360 votes to 205 to give priority to a Socialist resolution, sponsored by M. Depreux, which read as follows:

"The National Assembly . . . (1) considers that the only policy capable of assuring peace in Morocco, and of bringing about association and interdependence between France and Morocco in conformity with the interests of both countries, demands in the immediate future the setting-up of the Council of the Throne and the formation of a Government composed of all Moroccan representative elements, and capable of promoting the modernization and democratization of Morocco and of negotiating the necessary permanent links with France;

(2) approves the Aix-les-Bains agreements;

(3) regrets that the Government has compromised this policy by its hesitations and weaknesses;

(4) and, rejecting any further addition, passes on to the *ordre du jour.*"

This resolution was voted upon sentence by sentence, the first part of clause (1) being adopted without a division, and that part advocating the setting-up of the Council of the Throne by 320 votes to 287. After the latter vote had been taken M. Depreux announced that the Socialists would withdraw clause (3) in order to permit a clear vote for or against Franco-Moroccan understanding. M. Faure then declared that the Government would accept the resolution as thus amended.

After the section dealing with the setting-up of a representative Moroccan Government had been adopted by a show of hands, with only two dissenting votes, section (2) approving the Aix-les-Bains agreements was adopted by 470 votes to 151, and section (4) by 460 votes to 161. The resolution as a whole was put to the vote in the early hours of Oct. 9 and adopted by 462 votes to 186, with 10 abstentions. Those voting in favour included the Socialists, Communists, Overseas Independents, and the majority of the Radicals, U.D.S.R., M.R.P., and Independent Republicans, whilst the majority of the *Paysans,* Independent *Paysans,* Gaullists, and Dissident Gaullists (A.R.S.) voted against.

The distribution of votes on the final division was as follows: For the resolution—103 Socialists, 98 Communists and *Progressistes,* 84 M.R.P., 63 (out of 75) Radicals, 39 (out of 56) Independent Republicans, 21 U.D.S.R., 16 Overseas Independents, four Gaullists, four Independent *Paysans,* seven *Paysans,* five A.R.S., and 13 *non-inscrits.* Against the resolution—55 Gaullists, 13 Independent Republicans, 22 Independent *Paysans,* 13 *Paysans,* 25 A.R.S., five Radicals, and three M.R.P. Abstentions—one Radical, two U.D.S.R., two Gaullists, three Independent Republicans, and two A.R.S. deputies. Six Gaullist deputies did not take part in the vote on the final division.

The Debate on Algeria.

A three-day debate on the Algerian situation, on which 15 *interpellations* had been tabled, opened in the Assembly on Oct. 11.

M. Duclos (Communist) protested against the dissolution of the Algerian Communist Party and the suppression of the newspaper *Alger Républicain,* and appealed for the opening of negotiations either with representatives of the Algerian political parties or with an Algerian Assembly freely elected by proportional representation. **General Aumeran** (*apparenté* to the Ind. Republicans), after demanding the public execution of terrorists, denounced the conception of "integration"—which, he said, would involve the admission of 140 Algerian deputies to the National Assembly—and insisted that Frenchmen and Moslems must continue to receive equal representation in all Algerian institutions. **M. Bendjelloul** (a non-party Moslem deputy) emphasized that there was no question of secession, and that Algerian opinion favoured association with France. The idea of assimilation, however, which the Moslem population had demanded unanimously and which had been refused in 1936, had now become discredited and had been gradually replaced by nationalism As the conception of "integration" was no longer taken seriously, it was necessary to find a new policy by means of free elections.

M. Violette (Radical) warned the Assembly that integration was impossible without popular support, as the Germans' experience in Alsace-Lorraine had shown. M. Soustelle's proposals for administrative and educational reforms meant little to "poor devils dying of hunger," and what was really needed was agrarian reform. Huge estates stretched right across Algeria, whereas in France the size of estates was limited by law; moreover, 99 per cent of Government credits granted to agriculturists in Algeria went to Europeans, and only 1 per cent to Moslems "The time for studying the problem is past," M. Violette concluded. "The experiment which we are going to make is our last chance. If the Government can break down purely selfish opposition, there may still be hope" **M. Fonlupt-Esperaber** (M.R P.) suggested that the most urgent reform was the dissolution of the unrepresentative Algerian Assembly and the holding of free elections as soon as order was restored. He also demanded that the police should be purged of officials "whose morality leaves much to be desired," and that collective reprisals, indiscriminate executions, and the destruction of villages without ascertaining whether they had been evacuated, should be brought to an end." He declared that "integration," "association," and "federation" were vague words, whereas reforms were indispensable and urgent, no matter whether Algeria was later to be "integrated" or "associated" with France. **M. Caillavet** (Radical) described the idea of "integration" as out-of-date, and suggested a round-table conference representing all shades of Algerian opinion. The **Abbé Gau** (M.R.P) referred to the unrest among reservists recalled for service in Algeria and declared that the Government must give them an assurance that they were not being sent to suppress a people's legitimate aspirations towards self-government, to defend "certain economic interests," or to "carry out collective murders involving both the innocent and the guilty."

M. Bourgès-Maunoury (Minister of the Interior), after rejecting any suggestion of negotiations with the rebels, said that if secession were ruled out two extreme solutions were possible. One was assimilation—Algerians enjoying the same rights, duties, and laws as Frenchmen in metropolitan France; the other was federalism—an Algerian nation associated more or less directly with France within the framework of the French Republic. The latter solution, however, as history showed, might tend to violence between the majority and the minority, resulting in autonomy or secession; in that event either the French minority would be expelled, or they would enforce their rule on the Moslem majority. Intermediate solutions existed, but none would work unless it was clearly defined by Parliament and supported by public opinion The Statute of 1947, which had been intended as a step towards integration, had not been enforced as quickly as had been desirable, but the Government's plan of reforms provided for its application as a whole. The Government also proposed to draw up "a new charter for Algeria, on the forefront of which will be inscribed the French citizenship and the French character of the Algerian *département.*"

Turning to the question of reprisals, the Minister admitted that the uprising of Aug. 20 had been followed by "a wave of madness," but claimed that measures to protect the Moslem population had immediately been taken by the Governor-General **M. Benbhamed** (a Moslem deputy) intervened to read a letter from Algeria describing how nine "suspects," including an old man of 90 and his 13-year-old grandson, had been shot by French troops on Sept. 16 and their bodies mutilated, and 12 Moslems, including a young boy who refused to leave his father, had been shot in a nearby village on the same day. **M. Bourgès-Maunoury,** resuming his speech, stated that a strong self-defence movement had developed among the Moslem tribes of the Oran area, and that the Government was supplying them with arms. After referring to the Government's proposals for administrative reforms, he concluded: "The word 'integration' leads, it seems, to misunderstandings. It also arouses many hopes. It is not opposed to either particularism or decentralization. What has a clear meaning is its opposite: disintegration. Let us agree to avoid that in Algeria."

M. Ali Cadi (U.D.S.R.) warned the Assembly that they had "no right to integrate against their will populations which wish to retain their personality, traditions, religion, and language," and that France must "recognize the personality of the Algerian people." **M. Fouques-Duparc** (Gaullist), the mayor of Oran, said that there was complete peace between Europeans and Moslems in his constituency, and that thousands of ex-servicemen had asked for arms to drive out the rebel

fellaghas entering Algeria from Spanish Morocco **M. Lapie** (Socialist) advocated a federal solution, and observed that, apart from security measures, the Government's only remedy for the situation was the word "integration," which M Bourges-Maunoury's speech had shown to be meaningless **M. Benbhamed** gave further examples of alleged atrocities by the Government forces during the suppression of the uprising **M. Cot** (*Progressiste*) maintained that it was illogical to refuse to the Algerians the autonomy which had been granted to the Tunisians and Moroccans; after recalling M. Faure's statement that there would soon be no dependent countries, he asked why Algeria should be an exception.

Replying to the debate on Oct. 13, **M. Faure** said that the essential issue was that of nationality There was no Algerian State, there had long been a large European population in Algeria; and it had always been French policy to treat Algeria, not as a colony, but as a part of France, whilst scrupulously respecting local traditions The majority of the population had remained loyal, but their attitude towards the rebels had not always been "as resolutely hostile as it might have been." The rebels themselves did not consist only of murderers and bandits; many believed that they were fighting in a noble cause, and had been driven to revolt by land hunger, poverty, unemployment, or "a sense of being treated as second-class citizens" In choosing the word "integration" to define its policy, the Government had rejected both secession and assimilation. Secession would be disastrous for both the 1,000,000 French settlers in Algeria and the 300,000 Algerians working in France, whilst total assimilation suffered from two objections—the distinctive qualities of the Moslem population, and the fact that it had been used as an excuse for inaction In the economic field integration implied an investment policy of modernization and industrialization, intended to raise the living standards of the Moslems to the same level as those of the European producers Turning to political problems, he said that the principle that Algeria formed part of the French nation and of the French Republic did not exclude certain special institutions The Statute of 1947 must be applied completely, but otherwise it was for the Assembly to decide on such matters as the status of the Algerian Assembly and the Governor-General. No institutions, however, could function without popular support, and future elections must be free from both terrorist pressure and official interference. In conclusion, M. Faure deprecated talk of federalism, which could give rise to misunderstandings and open the door to more than was intended.

During an all-night sitting on Oct. 13-14 a procedural deadlock arose as the Assembly refused to grant priority to any of the six resolutions submitted. M. Faure then announced that the Government would regard the acceptance of a motion sponsored by M. Gaborit (Radical), which had been refused priority, as a question of confidence.

This resolution, after reaffirming that "Algeria constitutes a group of French *départements*" and that all French citizens resident in Algeria enjoyed the same rights and were subject to the same duties, irrespective of origin or religion, called upon the Government to take firm measures for the restoration of order, whilst avoiding collective reprisals; to submit to Parliament and the Algerian Assembly proposals for the full and speedy application of the 1947 Statute, and for agrarian reforms, to take steps to raise the living standards of the Algerian population; and, in particular, to raise wages and social security benefits by gradual stages to the same level as in France. The Government was also asked to take all necessary measures against foreign countries or groups conducting subversive propaganda in Algeria; to revise the clauses of the 1947 Statute relating to the political, legislative, administrative, and financial system, in collaboration with the Algerian Assembly, in order to "integrate Algeria still more closely with the French Republic, whilst respecting its personality and originality", and to place no obstacles in the way of the expression of "loyal and constructive" opposition.

The vote on the motion of confidence (the first under the new rule forbidding proxy voting on such a motion) was taken on Oct. 18 and resulted in a Government majority of 308 votes to 254, with 20 abstentions. The majority of the M.R.P., Radicals, U.D.S.R., Overseas Independents, Independent Republicans, Independent *Paysans*, *Paysans*, and A.R.S. voted for the Government, whilst the Communists, Socialists, and the majority of the Gaullists voted against.

The distribution of votes was as follows: For—85 M R P., 71 Radicals, 43 Independent Republicans, 27 Dissident Gaullists (A.R.S.), 19 Independent *Paysans*, 14 *Paysans*, 14 Gaullists, 14 U.D.S R, 14 Overseas Independents, and 7 *non-inscrits*. Against—100 Socialists, 91 Communists and *Progressistes*, 39 Gaullists, 6 Independent Republicans, 4 each Independent *Paysans* and *Paysans*, 2 each U.D S.R and Dissident Gaullists, 1 M.R.P., and 3 *non-inscrits*. Abstentions—9 Gaullists, 4 U.D.S.R., 3 *non-inscrits*, 2 Independent Gaullists, 1 *Progressiste*, and 1 Independent *Paysan*.

Advanced Date for General Elections. - Proposals for Electoral Reform. - Parliamentary Debates.

On Oct. 21 the Cabinet approved a proposal by M. Faure that the date of the next general election should be advanced from June 1956 to the first half of December. At a press conference on the same day, M. Faure said that the Government had decided in favour of early elections because it was necessary to take "important and grave decisions affecting national life for a long time ahead" on such questions as Algeria, Morocco, the structure of the French Union, France's position in the United Nations, and relations between East and West. These decisions called for a continuity of policy which must not be at the mercy of a change of parliamentary majority following elections; the present Assembly was at the end of its mandate, and if elections were not held before June 1956 the first half of that year would be largely wasted. The Government, he stated, would not itself put forward any proposals for changes in the electoral law, but the Assembly would be free to do so if it wished.

The Government's Bill, consisting of a single clause terminating the Assembly's mandate on Jan. 2, 1956, was placed before the Assembly on Oct. 25. On the same day, however, M. Faure agreed that two *interpellations* on Government policy should be debated before the Bill. The first of these, which had been sponsored by M. Pineau (Socialist), asked "what measures the Government intends to propose to Parliament to pay for military expenses in North Africa, in view of the already considerable deficit in the State budget"; the other, sponsored by M. Duclos (Communist), called for details of the "unpopular measures" which the Government envisaged that the new Assembly would have to introduce.

Opening the debate on the *interpellations* on Oct 26, **M. Pineau** contended that the budget deficit for the current year totalled 978,000,000,000 francs, and in 1956 would rise to 1,222,000,000,000 fr. **M. Pflimlin** (the Finance Minister) replied that the figure for the current year was actually 875,000,000,000 fr., he maintained that the financial situation was healthy, that production and exports were rising, and that real wages had increased by 21.6 per cent since 1952 In the ensuing debate a number of deputies, on both the right and the left, strongly criticized the Government's foreign and North African policy, citing in particular the result of the referendum in the Saar, El Glaoui's announcement of his support for Sultan Mohammed Ben Youssef, and the anti-French policy of M. Ngo Dinh-Diem in South Vietnam. On a procedural vote, the Assembly gave priority to M. Pineau's motion of no-confidence in the Government by 289 votes to 286; those supporting the motion, in addition to the Socialists and Communists, included M Mendès-France and nine other Radicals, and 60 of the 69 Gaullists When M Pineau's motion was put to the vote on Oct. 28, however, it was rejected by 271 votes to 259, M. Mendès-France's group again voting against the Government.

The Government's proposal to advance the date of general elections led to a prolonged controversy on the reform of the electoral system, which continued in the two Chambers from Oct. 30 to Nov. 17 without any final decision being reached. This controversy arose from the fact that, although a majority in both Chambers was opposed to the system adopted in 1951 (see 11502 A), no alternative system could command a majority in the Assembly. The law of 1951, which provides for a modified form of proportional representation with *apparentements* (electoral alliances between parties), was adopted with the object of weakening the Communists and Gaullists in the elections of that year. This aim was achieved, as alliances between the Socialists, Radicals, M.R.P., and right-wing "moderates" enabled these groups, with only 50 per cent of the votes cast for them individually, to win 63 per cent of the seats in the Assembly, whereas the Communists and Gaullists, with 26 and 23 per cent of the votes respectively, gained only 16 and 19 per cent of the seats. This system, however, was generally recognized to be unpopular in the country, as it was regarded as being unfair or too complicated; moreover, it had failed in practice to produce a coherent majority. Among the political parties, support for the 1951 system was strongest on the right, whilst the Communists and M.R.P., both of which enjoy considerable minority support in many *départements*, favoured the use of some form of proportional representation. The Radical Party, on the other hand, decided on Nov. 5 in favour of a return to the pre-war system of single-member constituencies (*scrutin d'arrondissement*) with two ballots, a similar decision being subsequently taken by the Socialists.

The Assembly's Universal Suffrage Commission decided on Oct. 29, by 22 votes (Communists, Socialists, and M.R.P.) to 19 (Radicals, U.D.S.R., and "moderates") to recommend a system of strict proportional representation, whereby "unspent" votes were distributed on a national basis. [This system had been approved in April 1946 by the Constituent Assembly in the first draft Constitution, which, however, was rejected at a referendum in the following July.] During the debate in the Assembly, which opened on Oct. 30 and concluded on Nov. 3, the Government's Bill in favour of early elections was adopted, but none of the 12 proposals for electoral reforms which were put forward by various deputies succeeded in obtaining a majority. After rejecting by 441 votes to 77 a proposal by M. Caillavet (a member of the Radical group supporting M. Mendès-France) that the debate on the date of the election should be

suspended until a new electoral law had been agreed upon, the Assembly voted against the following proposed systems, which had been put forward as amendments to the Commission's resolution :

(1) Single-member constituencies with one ballot (*scrutin d'arrondissement à un tour*), as in the British system. Proposed by **M. Bruyneel** (Ind *Paysan*) and rejected by 330 votes to 183.

(2) Single-member constituencies with two ballots (*scrutin d'arrondissement à deux tours*), proposed by **M. Bénard** (U.D S R). Under this system, which was that generally used under the Third Republic, an absolute majority is necessary for election on the first ballot and a relative majority for election on the second. It was rejected by 320 votes to 266, the Radicals and Socialists voting in favour and the Communists, the M.R P., and the majority of the "moderates" against

(3) Voting for a list of candidates by simple majority with one ballot (*scrutin de liste majoritaire départemental à un tour*), proposed by **M. Hugues** (Radical) The party list obtaining an absolute majority of votes would win all the seats for the *département*, whilst if no party received such a majority the seats would be distributed by proportional representation. Rejected by 329 votes to 284.

(4) Voting for a list of candidates by simple majority with two ballots (*scrutin plurinominal majoritaire départemental à deux tours*), proposed by **M. Dronne** (Gaullist) The candidates with an absolute majority would be returned at the first ballot, and the remaining seats would go to the candidates receiving the highest vote on the second ballot Rejected by 320 votes to 259.

(5) Voting for a single candidate on a proportional representation basis with one ballot (*scrutin uninominal proportionnel départemental à un tour*), proposed by **M. Denais** (Independent) Candidates would stand as individuals but would be allowed to form alliances with other candidates, the seats being distributed by proportional representation. Rejected by 395 votes to 125.

(6) Single-member constituencies with one ballot and electoral alliances (*scrutin d'arrondissement à un tour avec apparentement*), proposed by **M. Boisdé** (Dissident Gaullist). Candidates might issue a "previous declaration of unity," and the one obtaining most votes (cast for him personally or for candidates allied with him) would be elected. Rejected by 399 votes to 111.

(7) Voting for a list of candidates with two ballots (*scrutin de liste départmental à deux tours*), proposed by **M. Barrachin** (Dissident Gaullist) On the first ballot any list obtaining an absolute majority would be elected. If a second ballot was necessary, lists might be withdrawn or form alliances, and any list obtaining 60 per cent of the votes would secure all the seats, which otherwise would be distributed by proportional representation. Rejected by 328 votes to 263

(8) Single or double-member constituencies with two ballots (*scrutin d'arrondissement*), proposed by **MM. Caillavet** and **Baylet** (Radicals). Constituencies would be so redrawn that the number of deputies returned by each *département* would remain as at present, with certain large constituencies returning two members Rejected by 302 votes to 285.

(9) Election by majority vote with two ballots (*scrutin départemental majoritaire à deux tours*), proposed by **M. Olmi** (Ind. *Paysan*). Candidates might stand as individuals or on a complete or incomplete list. An absolute majority would be necessary for election on the first ballot, and a relative majority on the second Rejected by 323 votes to 243

(10) Multi-member constituencies with one ballot (*scrutin départemental à un tour*), proposed by **M. Delachenal** (Ind. *Paysan*). Candidates would stand as individuals, but might form alliances. Those obtaining an absolute majority would be elected, or, in the absence of an absolute majority, those with the highest average vote. Rejected by 304 votes to 197.

(11) The single-list system (*liste unique comportant toutes les candidatures*), proposed by **M. Defos du Rau** (M.R P.). A single list of individual candidates would be drawn up, on which the voter would leave only the number of names corresponding to the number of seats to be filled. Rejected by 407 votes to 119.

After all the amendments had been rejected, **M. Faure** stated on Nov. 1 that the Government regarded proportional representation as an "admissible" system, but not in the form recommended by the Commission. He therefore proposed that the Assembly should vote on the first section of the Commission's resolution, which read: "The deputies for metropolitan France are elected by party lists on a single ballot with proportional representation." This motion was adopted by 265 votes to 239, with the Socialist deputies abstaining.

M. Faure then announced the Government's support for a modified form of proportional representation under which the electoral law of 1951 would remain in force, except that the system of *apparentements* would be abolished. This proposal, however, was defeated by 459 votes to 145. Immediately after the vote the Prime Minister pointed out that the Assembly had rejected all the electoral systems submitted to it except the Commission's proposals for unrestricted proportional representation, which, he maintained, were unworkable. The Government would therefore ask for a vote of confidence on its Bill to end the Assembly's mandate, and, once this vote of confidence had been given, the debate on electoral reform could be resumed.

The debate on the Government's Bill was opened on Nov 2 by **M. Daladier** (Radical), who stated that he would vote against the Government as a protest against "snap elections and proportional representation with or without *apparentements*" He alleged that the Government wished to prevent a normal election campaign which would enable the deputies "to explain certain problems to the electors" **M. Mendés-France** (Radical) asserted that a vote of confidence meant that elections would be held under the law of 1951, and defended the *scrutin d'arrondissement* on the grounds that it was the most popular system and made for close contact between deputies and electors **M. Duclos** (Communist), whilst emphasizing that the Communists had no confidence in the Government, said that they would vote for the Bill because they believed that the sooner elections were held, the better. **M. Le Bail** (Socialist) accused the Government of calling for elections in order to conceal its lack of a policy, and expressed strong support for the *scrutin d'arrondissement*

M. Faure, in reply, reiterated his argument that very important problems must be solved soon, and that if elections were not held until June 1956 it would cause a gap of several months It was necessary to place the issues before the electorate, but not to spend time on explaining problems which should be devoted to solving them. What was important, he stressed, was to allow the formation of a new Assembly and of a stable Government.

The Government's Bill was adopted in the early hours of Nov. 3 by 330 votes to 211. The Government was supported by 92 Communists and *Progressistes*, 32 Radicals, six U.D.S.R., 78 M.R.P., 12 Overseas Independents, five Gaullists, 43 Independent Republicans, 20 Independent *Paysans*, 10 *Paysans*, 29 Dissident Gaullists, and three *non-inscrits*. The opposition comprised 92 Socialists, 31 Radicals, 12 U.D.S.R., three M.R.P., 47 Gaullists, five Independent Republicans, five Independent *Paysans*, seven *Paysans*, two Dissident Gaullists, and seven *non-inscrits*. One Radical, one U D.S.R., three M.R.P., two Independent Republicans, six Gaullists, and one *non-inscrit* abstained.

The Council of the Republic, after an all-night debate, adopted the Government's Bill on Nov. 9 by 225 votes to 60, with the addition of a clause providing for the elections to be held in single-member constituencies with two ballots (*scrutin d'arrondissement à deux tours*) ; the majority of the opposing votes were cast by the M.R.P. and the Communists. The Bill then went back to the National Assembly, whose Universal Suffrage Commission, however, rejected the Council's text by 25 votes to 18 and decided in favour of the system of proportional representation laid down in the law of 1951, but without *apparentements*. The Commission's report was debated on Nov. 9-10 by the Assembly, which rejected the *scrutin d'arrondissement* by a majority of only five votes, as well as four other amendments. The rejected proposals were as follows :

(1) Single-member constituencies with two ballots. Proposed by **M. Naegelen** (Socialist) and rejected by 298 votes to 293

(2) Voting for a list of candidates with two ballots Proposed by **M. Barrachin** and rejected by 358 votes to 131

(3) Voting for a list of candidates with two ballots and "declarations of unity," proposed by **M. Hugues** (Radical). This proposal meant that before the first ballot "declarations of unity" between party lists might be issued. If a list obtained an absolute majority on the first ballot it would be elected If there was a second ballot, any single list with an absolute majority would win all the seats ; if no single list received such a majority, a "united list" with an absolute majority would win all the seats, if no "united list" received an absolute majority, the seats would be divided by proportional representation Rejected by 383 votes to 223.

(4) Single-member constituencies and the division of "unspent" votes by proportional representation on a national basis. Proposed by **M. Denis** (*non-inscrit*) and rejected by a show of hands.

(5) Proportional representation with *apparentements*, in accordance with the law of 1951. Proposed by **M. Bergasse** (Dissident Gaullist) and rejected by 370 votes to 240.

On behalf of the Socialists, **M. Minjoz** then proposed a return to the system of proportional representation laid down in the electoral law of 1946. **M. Faure** thereupon intervened to announce the Government's support for the Commission's report, as against M. Minjoz's proposal, and stated that he would make the issue one of confidence.

In this form the Government's Bill was adopted by the Assembly on Nov. 12 by 285 votes to 247. The Communists supported the Bill after M. Duclos had reaffirmed that, although they had no confidence in the Government, they favoured early elections, whilst the majority of the Radicals (M. Faure's own party) voted with the Opposition.

Those supporting the Bill consisted of 94 Communists and *Progressistes*, 25 Radicals, two U.D.S.R., 83 M.R.P., 10 Overseas Independents, 22 Independent Republicans, six Independent *Paysans*, nine *Paysans*, 27 Dissident Gaullists, four Gaullists, and three *non-inscrits*. The opposition comprised 94 Socialists, 12 U.D.S.R., one Overseas Independent, 38 Radicals, two M.R.P., 15 Independent Republicans, 15 Independent *Paysans*, nine *Paysans*, three Dissident Gaullists, 51 Gaullists, and seven *non-inscrits*. Six Radicals, three U.D.S.R., 12 Independent Republicans, four Independent *Paysans*, one Dissident Gaullist, one Gaullist, and one *non-inscrit* abstained.

The Council of the Republic, to which the Bill had been remitted in its revised form, again reinstated on Nov. 15 (by 233 votes to 50) its amendment in favour of the *scrutin d'arrondissement* with two ballots (except in the Seine *département*, where proportional representation would remain in force). As amended by the Council, the Bill also provided (*a*) that each *département* should be divided into single-member constituencies, the number of which would be equal to the number of deputies returned under the existing electoral law; (*b*) that the Government's proposals for the re-delimitation of constituencies should be submitted to Parliament for ratification within 12 days of the promulgation of the Act; and (*c*) that the Assembly's mandate should expire on the seventh Tuesday after the ratification of these proposals.

On Nov. 17 the Assembly decided, by 311 votes to 286, to take the Council of the Republic's text into consideration; the vote in favour of the *scrutin d'arrondissement*, which the Assembly had previously rejected, was explained by the fact that the majority of the Gaullists voted in its favour for the first time. The Universal Suffrage Commission subsequently decided, at the suggestion of M. Moisan (M.R.P.), to refuse to discuss the Bill further until the Government had submitted detailed proposals for the re-delimitation of constituencies on the basis of the 1954 census. When this resolution was placed before the Assembly later the same day, M. Faure appealed for a clear decision for or against the *scrutin d'arrondissement*; M. Moisan, however, maintained that the delimitation of constituencies was the key to the electoral system, and that many deputies' attitude towards the *scrutin d'arrondissement* would depend on how it was carried out. The Commission's resolution was then carried by 334 votes to 265, the Communists, M.R.P., and Gaullists voting for it, and the Socialists, Radicals, and U.D.S.R. opposing; the members of the Government also voted against the resolution, whilst the "moderates" were divided.

The Assembly had previously begun a debate on Nov. 15 on a Bill dealing with electoral registration, postal voting, and elections in Algeria, and had adopted, against the Government's advice, two amendments to the Universal Suffrage Commission's text which made voting compulsory under penalty of a fine, and which enabled persons who were prevented by heavy snow from voting in person to vote by post. The Assembly rejected the Government's proposal that the elections in Algeria should take place on the same day as in France, except in districts where conditions were too disturbed to permit it, and on Nov. 17 adopted the Commission's text, which provided that they should be held on the fifth Sunday after the ending of the state of emergency, and that the present deputies for Algeria should retain their mandates until new elections were held.

In view of the Assembly's decision of Nov. 17, the Cabinet decided on Nov. 23 to submit to the Assembly two alternative schemes for the delimitation of constituencies, which had been prepared by the Ministry of the Interior after consultation with the local authorities. One of these schemes, in accordance with the Council of the Republic's vote of Nov. 15, divided the *départements* into constituencies but left each *département* with the same number of deputies as before; the other, following the Assembly's instructions of Nov. 17, re-divided the seats between the *départements* on a basis of one deputy for every 75,000 inhabitants. Under the second scheme, which was based on the results of the 1954 census, the Seine *département* (i.e. the Paris area) would gain 10 deputies; 17 other *départements* (mostly in the industrial areas of the North and East) would gain from one to five deputies; 37 *départements* (mostly in the rural areas of the Centre and South) would lose one or two deputies; and 33 would retain the same representation as hitherto.

The Assembly's Universal Suffrage Commission decided on Nov. 25 to postpone consideration of the new constituency boundaries, whilst the *conférence des présidents* (the committee of party leaders which decides on the Assembly's agenda) voted on the same day to devote Nov. 29 to the discussion of a number of hostile *interpellations* on the Government's general policy, rather than to a debate on the elections as M. Faure had requested. The Cabinet, however, decided to introduce a new Bill under which the Assembly's mandate would expire on the seventh Sunday after the promulgation of a new electoral law; if no such law had been voted by Dec. 31, however, the Assembly's mandate would automatically expire on Feb. 16, 1956. When the Assembly met later in the day M. Faure announced that he would demand priority for the new Bill and would regard the question as one of confidence.

The vote on the motion of confidence (i.e. on the Government's demand that its new Bill should be given priority) was taken on Nov. 29, and resulted in the defeat of the Government by an absolute majority.

M. Ladurie (*Paysan*) declared that his group, although supporting early elections, would vote against the Government because (he alleged) the electoral issue was being used by the Government to prevent the Assembly from discussing international affairs, in which France had recently suffered a number of setbacks, and North African policy. **M. Barrachin** (A.R.S.) asserted that the Assembly's failure to pass an electoral law had been due to the fact that the Government was itself too divided to have a policy on the subject. **M. Mitterand** (U.D.S.R.) accused the Prime Minister of trying to prevent the Assembly from discussing its general policy, of attempting to discredit the Assembly in the eyes of the country, and of secretly wishing to hold elections under the law of 1951. **M. Depreux** (Socialist) alleged that M. Faure wished, "like the English Conservatives, to avoid having to reveal to the electors a disturbing economic and financial situation with a probable deficit of 1,000,000,000,000 francs for 1956"; he also accused M. Faure of "discrediting parliamentary institutions by spreading the insinuation that those who voted against the Government were afraid to face the electorate." **M. Duclos** declared that the Communists would vote against the Government as they did not wish to give implicit approval to a policy which they considered contrary to the national interest. He appealed to the Socialists to co-operate with the Communists in the forthcoming elections to ensure a left-wing victory. **General de Monsabert** (Gaullist) violently denounced the Government's policy in North Africa, and especially in Morocco.

M. Faure, replying to the debate, rejected the allegations that the Government was trying to "paralyse" the Assembly's debates on general policies. He recalled that the Government had already agreed to two full-scale debates on Morocco and Algeria before putting forward its proposals for early elections. Since then it had accepted M. Pineau's *interpellation* of Oct. 26, had left Parliament free to choose an electoral system, and had drawn up the proposals for delimitation of constituencies which it had been asked for.

The Assembly had approved the Government's North African policy, as well as its economic and financial policy, and should therefore now agree on a date for ending its mandate, after which it could decide on the agenda for the remainder of the session.

The motion of confidence was rejected by 318 votes (six more than the required absolute majority of 312) to 218, with 20 abstentions.

Those voting against the Government comprised 92 Communists and *Progressistes*, 97 Socialists, 34 Radicals, eight U.D.S.R., one M.R.P., one Overseas Independent, 51 Gaullists, 12 Independent Republicans, four Independent *Paysans*, seven *Paysans*, five dissident Gaullists, and six *non-inscrits*. The Government was supported by 31 Radicals, six U.D.S.R., 75 M.R.P., eight Overseas Independents, 34 Independent Republicans, 21 Independent *Paysans*, 10 *Paysans*, 25 dissident Gaullists, 3 Gaullists, and five *non-inscrits*. Three Radicals, two U.D.S.R., four M.R.P., three Gaullists, four Independent Republicans two *Paysans*, and two Dissident Gaullists abstained from voting.

Dissolution of National Assembly.

After prolonged discussions under the chairmanship of President Coty, the Cabinet decided on Nov. 30 to dissolve the Assembly and to hold general elections. This decision—which was strongly supported by the M.R.P. and "moderate" members of the Government, but was opposed by six of the eight Radical Ministers—was in accordance with Article 51 of the Constitution, which lays down that if the Government is defeated twice in 18 months by an absolute majority on a vote of confidence or a vote of censure, the Council of Ministers may order a dissolution after consulting the President of the Assembly. [M. Mendès-France's Government was defeated on a vote of confidence on Feb. 5 by 319 votes to 273.] The dissolution was the first in French history since 1877, when the French Parliament was dissolved by President MacMahon shortly after the foundation of the Third Republic.

Radical and Socialist Opposition to Dissolution. - M. Faure expelled from Radical Party.

The Cabinet's decision brought to a head the crisis which had divided the Radical Party since the fall of M. Mendès-France and his supersession as Premier by M. Faure, both leading members of the party. Five of the six Radical Ministers who had opposed the dissolution of Parliament rendered their resignation to the Prime Minister on Dec. 1: M. Bourgès-Maunoury (Interior), M. Berthoin (Education), M. Morice (Industry and Commerce), M. Gilbert-Jules (State Secretary for Finance), and M. Laforest (State Secretary for Defence). At a meeting of the bureau of the Radical Party held on the same day and presided over by M. Herriot, 19 members voted to expel M. Faure from the party for "persistent indiscipline"; six of the bureau's members recommended that M. Faure should only be reprimanded, whilst two opposed his expulsion.

A statement issued after the meeting accused M. Faure of conducting "manoeuvres to bring about a snap election with an obscure and unpopular electoral system, in defiance of decisions of the party congress and of repeated appeals by M. Herriot and a majority of the Radical deputies." M. Faure, who had attended the first part of the meeting, was reported to have said that he had always considered himself to be "on leave from the party" since he had accepted the Premiership; he was also said to have pointed out that he had

done everything in his power to bring about a change in the electoral system to the *scrutin d'arrondissement*—i.e., the electoral system advocated by the Radicals Commenting later on the bureau's decision to expel him, M. Faure declared that it was an unwarranted and unprecedented procedure to expel a Prime Minister because a decision taken by his Government had not been approved by his party. He added that he would appeal against the decision.

Shortly before the announcement of the Assembly's dissolution on Nov. 30, the Government's intention to follow this course had been denounced in a joint statement issued by M. Herriot, M. Mendès-France, and M. Queuille (all former Radical Prime Ministers), as well as by the chairmen of the Radical, Socialist, and U.D.S.R. parliamentary groups (respectively MM. Tony Révillon, Depreux, and Secrétaire), M. François Mitterrand (national president of the U.D.S.R.), and M. Chaban-Delmas (president of the Gaullist group). In their statement they said that, though dissolution of the Assembly might conform to the letter of the Constitution, it "violated its spirit" and constituted a "manoeuvre which tried to utilize the Constitution for the obvious purpose of preventing any electoral reform as desired by the great majority of Frenchmen."

The executive committee of the Socialist Party issued a statement on Dec. 1 strongly condemning the Government's action in dissolving the National Assembly "without having obtained parliamentary approval for the reform of the electoral system."

The Socialist parliamentary party also decided on Dec. 1 to demand an immediate meeting of the Assembly to discuss the abolition of the system of *apparentements*. This demand was supported by the Radical group, and a meeting of the bureau of the Assembly was fixed for the afternoon of Dec. 2 to consider it. In order to prevent the Assembly from meeting, however, the Government published during the morning of Dec. 2 the decree dissolving the Assembly, which it had not immediately promulgated in order to avoid having to hold elections on Christmas Day (i.e. the last Sunday within the 30-day time-limit provided for under Article 52 of the Constitution).

The Ministry of the Interior announced on Dec. 3 that the elections would take place on Jan. 2, 1956; that the elections would be conducted on the basis of electoral lists to be completed by Dec. 10; and that parties wishing to form electoral alliances under the law of 1951 would be required to complete the necessary formalities by midnight on Dec. 10.

After consultations with President Coty, M. Faure informed the five Radical Ministers who had tendered their resignation that he could not accept it under the Constitution, since Article 52 provided that the Cabinet "continues to function" pending the meeting of the new Assembly, and as its composition was therefore unchangeable. The Ministers in question would thus be expected to attend to current business in their Ministries, but would be considered as "prevented" from attending Cabinet meetings, though having the right to participate in such meetings whenever they wanted to prevent measures from being taken to which they were opposed. It was announced at the same time that M. Faure himself would take over *ad interim* those functions of the Ministry of the Interior which concerned the consequences of the Assembly's dissolution —i.e., the elections and Algerian affairs.

Postponement of Elections in Algeria.

Although it was announced on Dec. 3 that elections in Algeria would take place on Jan. 2, simultaneously with those in Metropolitan France, the Government subsequently decided on Dec. 10 to reverse this decision and to postpone the elections in Algeria.

M. Faure explained in a press statement that the decision to postpone elections in Algeria was due to the following reasons: (1) it was considered that *force majeure* (i.e., the present troubled state of Algeria) was legally a sufficient reason to postpone the elections "for a while, though not indefinitely"; (2) the Algerian Assembly had adopted a resolution on Dec. 8, by 67 votes to 10, demanding that elections should not be held in Algeria at the present time; (3) the creation of the new *département* of Bône required a revised delimitation of constituencies which had not yet been carried out, but would start immediately.

It was pointed out in the French Press that the dissolution of the National Assembly automatically terminated the state of emergency in Algeria, in accordance with Article 4 of the Law of April 8, 1951, which contained an express provision to that effect. In consequence, all measures taken under the state of emergency would automatically be annulled, except that military tribunals would continue to deal with crimes or offences which had been referred to them previously. (Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. Electoral Reform (1951), 11502 A; Algeria, 14431 A; Morocco, 14528 A; 14473 A; Cabinet, 14069 A.)**

A. GREECE - TURKEY. — Turkish "Moral Reparation" for Anti-Greek Riots in Izmir.

Two ceremonies intended to make "moral reparation" for the anti-Greek riots in Izmir (Smyrna) on Sept. 6 took place in that city on Oct. 24. During the riots the Greek Consulate had been burned down and Greek officers attached to the South-Eastern European Command of NATO had been attacked and insulted.

At the first ceremony of "moral reparation" the Greek flag was hoisted over the new Greek Consulate building by the Turkish Minister of Communications (who represents Izmir in the Turkish Grand National Assembly), with full military honours The ceremony was attended by the Greek Ambassador in Ankara, representatives of Turkish civil and military authorities, and the Consuls of NATO member-countries

At the second ceremony, later the same day, there was a joint meeting of Greek and Turkish officers at which apologies were tendered to the Greek officers for the insults made to their uniform Turkish and Greek Army units also attended the hoisting of the Greek flag on the Turkish Officers' Club, to demonstrate "the Turkish Army's regard for the Greek Army and officers"

Deep regret for the incidents of Sept. 6, and an expression of Turkey's desire to continue the ties of friendship developed with Greece, had earlier been expressed by M. Menderes (the Turkish Prime Minister) in a statement to the Grand National Assembly on Sept. 12. In the course of his speech M. Menderes emphasized that Turkey had always considered that a Greco-Turkish alliance was a guarantee of the mutual existence of both countries, and that Turkey's views in this respect remained unchanged.

Turkish-Greek negotiations on the question of material reparations to those Greeks who had suffered damage or injury during the anti-Greek riots in Istanbul commenced in October.

A mission of friendship sponsored by the World Council of Churches left Geneva on Nov. 6 to pay a week's visit to the Christian Churches in Turkey. It was stated that about three-quarters of the Greek Orthodox churches in Istanbul had been either destroyed by fire in the disturbances of Sept. 6 or were so badly damaged as to be unusable. The total material damage was conservatively estimated by the World Council of Churches at $150,000,000.—(Times - Daily Telegraph - Le Monde, Paris - Turkish Embassy, London) **(14424 A.)**

B. UNITED KINGDOM. — Torquay By-election.

The Torquay by-election, caused by the death of Mr. Charles Williams (Conservative), was held on Dec. 15 with the following result:

Bennett, F. M. (Conservative)	20,964
Hamling, William (Labour)	10,383
Bessell, P. J. (Liberal)	9,775
No change. Conservative majority ..	10,581

Figures at the general election were: C. Williams (C.) 29,777, R Briscoe (Lab.) 12,547, P J. Bessell (L.) 7,012—Conservative majority 17,230.

The Conservative candidate received 50.9 per cent of the votes in the by-election, the Labour candidate 25 3 per cent, and the Liberal candidate 23 8 per cent, compared with respective percentages of 60.4, 25.4, and 14.2 at the general election. The Conservative proportion of the poll thus fell by 9.5 per cent and the Labour proportion by 0.1 per cent, whilst the Liberal proportion increased by 9.6 per cent.

62.6 per cent of the electorate voted in the by-election, compared with 75.5 per cent at the general election. The electorate numbered 65,702, compared with 65,353 at the general election.

Mr. Frederic Bennett (37), a barrister, represented Reading North from 1951 until the general election last May, when he narrowly failed to secure election for the reorganized Reading constituency.

Mr. Charles Williams (69), who died on Oct. 28, had represented Torquay since 1924, and was previously member for Tavistock (1918-22). He was Parliamentary Secretary to the Ministry of Agriculture in 1921-22, and served as Deputy Chairman of Ways and Means in 1943 and Chairman and Deputy Speaker in 1945. He became a Privy Councillor in 1952. (Times) **(Prev. rep. By-elections, 14570 C.)**

C. CANADA.—Construction of Bridge between Nova Scotia and Cape Breton Island.

A bridge across the Canso Strait, separating Nova Scotia and Cape Breton Island, was formally opened on Aug. 13 by Mr. C. D. Howe, the Federal Minister of Trade and Commerce. The bridge, completed at a cost of $28,000,000 (Can.), owed its inception to the late Mr. Angus Macdonald, Premier of Nova Scotia, and will provide a direct link between the coal-mining areas of Cape Breton and the industrial region around Halifax, Nova Scotia. (Montreal Star)

A. UNITED KINGDOM. — Mr. Attlee's Resignation from Labour Party Leadership. - Mr. Gaitskell elected Leader of Labour Party. - Mr. Morrison's Resignation from Deputy Leadership. - Earldom conferred on Mr. Attlee. - Lord Alexander of Hillsborough elected Leader of Labour Peers.

Mr. Clement R. Attlee (72) resigned on Dec. 7 from the leadership of the Parliamentary Labour Party, which he had held for 20 years. It was announced by the Prime Minister on the same day that the Queen had approved the conferment of an earldom on Mr. Attlee.

Mr. Attlee's decision to resign the party leadership had been announced by him earlier in the day at a meeting of the Parliamentary Labour Party. On the proposal of Mr. Herbert Morrison, seconded by Mr. Tom Williams, the meeting unanimously adopted a resolution placing on record "its high appreciation of the services rendered by the Right Hon. C. R. Attlee over many years both as leader of the party, Prime Minister in the Labour Governments of 1945-51 and to the wider movement outside and the country as a whole."

Clement Richard Attlee was born in 1883 at Putney (London), the son of a solicitor, and was educated at Haileybury and University College, Oxford. He was called to the Bar in 1909, did much social work in the East End of London, and was secretary of Toynbee Hall before the First World War He was also a lecturer in Social Science at the London School of Economics in 1912-13 During the war he served as an infantry officer at Gallipoli, in Mesopotamia (where he was wounded), and on the Western front, ending his service with the rank of major

In 1919 Mr Attlee became the first Labour mayor of Stepney, and in 1922 entered the House of Commons as Member for Limehouse After a period as deputy leader he was elected leader of the Parliamentary Labour Party in 1935 in succession to Mr George Lansbury, holding that post uninterruptedly until his retirement. In 1940 he entered Sir (then Mr.) Winston Churchill's Coalition Government, and played an important part in the direction of the nation's war effort as Deputy Prime Minister and member of the War Cabinet He became Prime Minister in 1945, when the Labour Party came to power with a large overall majority, and remained Premier after the 1950 election, when the Labour majority was reduced to six After Labour's defeat in the election of October, 1951, he became Leader of the Opposition. Since 1950 he had been M P for Walthamstow West, following the abolition of his former Limehouse constituency.

Tributes to Mr. Attlee were paid in the House of Commons on Dec. 8 by the Prime Minister, the leader of the Liberal Party (Mr. Clement Davies), and Mr. Herbert Morrison, who replied on behalf of the Labour Party.

Sir Anthony Eden expressed "the personal regret which Members in all parts of the House sincerely feel at the departure of Mr Attlee from our midst" He continued: "Mr Attlee, in the 33 years he sat here, never made a personal enemy, and I know how many sincere attachments for his gifts were made and felt by us on this side Thirty-three years is a long span in the life of anyone, and Mr Attlee in that period was sometimes on these benches and sometimes on those; sometimes with many companions, sometimes with few That is the lot of political life we all endure But however that fell out, at all times he was a good House of Commons man, and his translation to another place [i.e. the House of Lords] can never really change that For nearly five years I sat with Mr Attlee in the War Cabinet. Times were more often stern than smooth, and although this is not a day for obituary, there were three qualities of the right hon. gentleman which come to my mind from those years—his courage, his patience, and his tenacity. We like to feel that in another place health will be given him for many years to come to continue to serve his party and the nation."

Mr. Clement Davies recalled that he had known Mr. Attlee as a friend for a quarter of a century, and added: "In his partnership with Sir Winston Churchill during the war his loyal devotion to duty and his sound judgment won the respect of all He, together with Sir Winston Churchill, made history.... His outstanding quality was integrity, coupled with great modesty and a complete and unremitting devotion to duty"

[On the previous day the Liberal leader had issued the following statement: "Not only his party, but the nation, and indeed the Commonwealth, are heavily indebted to Clement Attlee. For over 20 years he has borne the heavy burden of leadership. He is in the proud position of being able to say that he was Prime Minister when the great building containing the welfare society of which we are all proud was completed.... It will be a permanent memorial to him."]

Mr. Morrison, on behalf of the Opposition, thanked the Government and the Liberal Party for their tributes to Mr. Attlee. "So far as the official Opposition are concerned," he added, "we owe him a special debt for the services rendered to us over a long period of 20 years, and a number of years before that. The House will agree that he not only served his party, but the country and the world, to the best of his ability.... We shall remember with respect and pride the association of all of us, in all quarters, with the man who served Parliament with great distinction and ability."

Tributes were also paid to Mr. Attlee by many Commonwealth statesmen, among them the Prime Minister of Australia (Mr. Menzies), who described Mr. Attlee as "a great Englishman, a man of singular political skill and high integrity" who deserved well of the whole British people, the Prime Minister of New Zealand (Mr. Holland), who invited Mr. and Mrs. Attlee to visit the Dominion; and the Prime Minister of Ceylon (Sir John Kotelawala), who said that "Mr. Attlee set the seal of statesmanship on British policy in Asia when his Government had the foresight to grant complete independence to Burma, India, Pakistan, and Ceylon."

Three nominations were received on Dec. 8 for the vacant leadership of the Parliamentary Labour Party—those of Mr. Herbert Morrison (67), the Deputy Leader of the party; Mr. Hugh Gaitskell (49); and Mr. Aneurin Bevan (58).

It was made known after a meeting of the Parliamentary Labour Party on Dec 8 that Mr. Bevan had offered to withdraw his nomination in order to secure the unopposed return of Mr. Morrison, if Mr Gaitskell did the same The following statement was issued by Mr Bevan: "I have been approached by Mr. D. R Grenfell, Mr. L Hale, Mr D T. Jones, Mr. C W Key, Sir Frederick Messer, Mr. W Monslow, Mr W. T Paling, Mr E Shinwell, Mr R. R. Stokes, and Mr S P Viant, who have suggested to me that it is desirable in the interests of the Labour Party to avoid a contest for the leadership of the party They have asked whether, if other nominees withdrew, I would also withdraw in order to give an unopposed return to Mr Herbert Morrison. I have informed them that I should certainly be willing to fall in with their suggestion"

Mr. Gaitskell, however, declined to withdraw his candidature and issued the following statement "A number of my colleagues have been good enough to nominate me They have made it plain to me that they would greatly regret it if I were to withdraw I propose to allow my name to stand I have the highest regard for Mr Morrison, but I think the party should have the opportunity of choosing"

[The leader of the Parliamentary Labour Party is elected by the Labour Members of Parliament, who numbered 274 at the time of Mr Attlee's resignation Under party rules, the successful candidate must obtain an absolute majority over all other candidates (i e the votes cast for him must exceed the combined totals of the other candidates) Should an absolute majority not be forthcoming, the candidate with the lowest number of votes drops out, and a new ballot is held until an absolute majority is obtained]

Balloting was completed on Dec. 14, when Mr. Gaitskell was elected leader of the Parliamentary Labour Party in succession to Mr. Attlee, having obtained an absolute majority of votes on the first ballot. The total number of votes cast was 267, the result being as follows

Mr. Hugh Gaitskell	157
Mr. Aneurin Bevan	70
Mr. Herbert Morrison	40

Mr. Gaitskell thus became leader of the Labour Party, and concurrently Leader of the Opposition, at the age of 49.

Born in 1906, Hugh Gaitskell was educated at Winchester and New College, Oxford, taking first-class honours in philosophy, politics, and economics After unsuccessfully contesting Chatham in 1935, he later became head of the Department of Political Economy at University College, London, and Reader in Political Economy in the University of London. He was seconded to the Civil Service after the outbreak of war, and in 1940 was appointed principal private secretary to Dr. Dalton, then Minister of Economic Warfare in Mr. Churchill's Coalition Government. In 1942 he became Principal Assistant Secretary at the Board of Trade when Dr. Dalton became President of that department, retaining the post until the end of the war In the general election of 1945 he was returned for Leeds South with a majority of over 10,000. He became Parliamentary Secretary to the Ministry of Fuel and Power in 1946, and in the following year succeeded Mr. Shinwell as Minister of Fuel and Power.

Following the general election of 1950 Mr. Gaitskell was appointed Minister of State for Economic Affairs, a position of considerable importance in view of the seriousness of the economic situation at the time. In that capacity he frequently deputised for the then Chancellor of the Exchequer (the late Sir Stafford Cripps), who was already suffering from ill-health. After Sir Stafford's resignation in October, 1950, Mr. Gaitskell succeeded him as Chancellor of the Exchequer at the age of 44—the youngest Chancellor since the appointment of Mr. (later Sir) Austen Chamberlain in 1903 He introduced one Budget, which involved a number of taxation increases and which was severely criticized by the Conservative Party.

After the defeat of the Labour Government in 1951 Mr. Gaitskell continued to deal with financial and economic matters from the Opposition front bench. During the subsequent "Bevanite" controversy within the party he strongly supported the official party leadership, voting for the expulsion of Mr. Bevan from the National Executive Committee. With the support of many trade unions, he was elected Treasurer of the Labour Party in 1954 in succession to the late Mr. Arthur Greenwood, obtaining a big majority over Mr. Bevan. At the last party conference in October (see 14515 A) he was re-elected to the party treasurership with a still bigger majority.

After Mr. Gaitskell's election, Mr. Morrison formally tendered his resignation as deputy leader of the Labour Party—a decision which meant that he would no longer be a member either of the Opposition "Shadow Cabinet" or of the party's National Executive Committee. It was agreed that the election of the new deputy leader should be deferred until after the Christmas recess, and that the filling of the vacant seat in the

"Shadow Cabinet" resulting from Mr. Gaitskell's election as party leader should be similarly deferred. A statement was issued by the Parliamentary Labour Party accepting Mr. Morrison's resignation "with regret," and recording the party's "great appreciation of the services rendered by him over so many years."

Addressing the Parliamentary Labour Party after his election, Mr. Gaitskell expressed his thanks to his colleagues and paid the following tribute to Mr. Morrison's work for the Labour movement:

"He has served the party and the country in the most devoted manner for well over 30 years. He has been in many ways the main architect of the party's policy in home affairs as it has developed over this period. He has played the major part in building up the party organization, particularly in the period before and immediately after the war. His work on the L.C.C. and in the London Labour Party set everybody an extraordinarily fine example. We shall miss very much his wise counsel and his great experience, just as we shall miss those qualities in Mr. Attlee."

Mr. Attlee's title was gazetted on Dec. 16 as Viscount Prestwood, of Walthamstow in the County of Essex, and Earl Attlee. The title was taken from the name of the Buckinghamshire village where Mr. and Mrs. Attlee live, and from Mr. Attlee's constituency.

Viscount Alexander of Hillsborough was elected Leader of the Labour peers on Nov. 16 in succession to Earl Jowitt, who had retired on grounds of age. Lord Alexander (who is 70, the same age as Lord Jowitt) represented the Hillsborough division of Sheffield (as Mr. A. V. Alexander) from 1922-31 and 1935-40, and was prominently associated with the co-operative movement. He was First Lord of the Admiralty throughout the Second World War, and held the same position in 1929-31 under Mr. Ramsay Macdonald and in 1945-46 under Mr. Attlee. (Times - Daily Herald - Manchester Guardian) **(Prev. rep. Labour Party, 14515 A; Mr. Attlee, Election to Party Leadership, 1823 B.)**

A BRAZIL. — Failure of Senhor Café Filho's Attempt to resume Presidency. - State of Siege. - Completion of President Nereu Ramos's Cabinet.

Senhor Café Filho, who had taken indefinite leave from the presidency on Nov. 8 after suffering a heart attack, announced on Nov. 21 that he had recovered his health and would resume office. His decision, however, was strongly opposed by those groups who, with the support of the Army, had deposed his successor, Senhor Coimbra da Luz, and had secured the election of Senhor Nereu Ramos as acting President. The opposition to Senhor Café Filho's return arose from the belief that he belonged to those groups who were against Senhor Kubitschek and Senhor Goulart taking office in January 1956 as the new President and Vice-President.

As soon as Senhor Café Filho's intention was made known, troops were called out and surrounded the Presidential palace, the Chamber of Deputies, the War Ministry, and Senhor Café Filho's private residence, whilst guards were mounted at other strategic positions in Rio de Janeiro. The Chamber of Deputies, at a special session, voted on Nov. 22 (by 179 votes to 94) to disqualify him from office and to confirm Senhor Nereu Ramos as acting President, this decision being endorsed by the Senate on the same day by 35 votes to 16. Senhor Café Filho himself, who insisted that he was still constitutionally President and who refused to resign, was placed under house arrest.

At the request of the Army leaders, and in order to prevent Senhor Café Filho's friends from taking action to reinstate him as President, a Bill imposing a state of siege for 30 days was passed by Congress on Nov. 24, the voting being 178 to 91 in the Chamber of Deputies and 35 to 15 in the Senate. The state of siege—a modified form of martial law—provides for press and radio censorship and for the suspension of a number of civil liberties, including *habeas corpus*.

The Cabinet of President Nereu Ramos (see 14580 A) was completed on Nov. 25 with the following appointments: Agriculture—Senhor Eduardo Catalão; Transport—Senhor Lucas Lopes; Public Health—Senhor Mário Pinnotti; Education—Senhor Abiguar Renault. Senhor Mario Brandt took office on Nov. 17 as the new president of the Bank of Brazil.—(Times - Le Monde, Paris - New York Herald Tribune) **(Prev. rep. Brazil, 14530 A.)**

B. NETHERLANDS. — Foreign Service.

It was announced in The Hague during September that the Netherlands Legations in Luxemburg, Chile, Colombia, Egypt, Peru, Greece, and Turkey would be raised to the status of Embassies. (Netherlands News Agency)

C. YUGOSLAVIA-UNITED KINGDOM.—M. Kardelj's Visit to London. - Discussions with British Ministers.

M. Edvard Kardelj, senior Vice-President of the Yugoslav Federal Executive Council, visited London from Nov. 14-20 at the invitation of the British Government. During his stay he had talks on the international situation and on matters of common concern with Sir Anthony Eden, Mr. Macmillan (the Foreign Secretary), and Mr. Butler (the Chancellor of the Exchequer). He met other members of the British Government, was received in audience by H.M. the Queen, and visited the Atomic Energy Establishment at Harwell. M. Kardelj's visit was a continuation of the series of personal contacts between British and Yugoslav leaders, the last such occasion having been President Tito's visit to London in March 1953.

The following statement was issued by the Foreign Office on Nov. 19:

"The full and very cordial discussions which Mr. Kardelj has had with H.M. Ministers have confirmed the extent to which both countries share the same basic aims in the conduct of their foreign relations. They have shown that the U.K. and Yugoslavia attach the same importance to the maintenance of the independence of sovereign States, the reduction of international tension, and the achievement of lasting peace and genuine co-operation between all nations. The points of view of both Governments on the methods of pursuing such common aims have been freely discussed. The conversations have been most valuable and have shown a wide measure of agreement and understanding between the two Governments.

"Mr. Kardelj's visit has served to confirm the sincere friendship existing between the U.K. and Yugoslavia, and the happy state of their relations. H.M. Government and the Yugoslav Government are determined to maintain and develop their collaboration through frequent consultations and in all other appropriate ways. Both Governments are convinced that in this way they will together be able to make an important contribution to the solution of world problems."

It was authoritatively stated that M. Kardelj's conversations with the British Ministers on the international situation had dealt principally with developments after the Geneva Conference of Foreign Ministers, and that M. Kardelj had also discussed new arrangements for the repayment of the British loans to Yugoslavia, totalling £17,000,000.—(Times - Manchester Guardian - Daily Telegraph - Tanjug Agency, Belgrade) **(Prev. rep. 14358 A; U.K. Aid to Yugoslavia, 14162 A.)**

D. PAKISTAN. — Formation of West Pakistan. - Amendment Bill.

The Pakistani Constituent Assembly passed a Bill on Nov. 9 amending the Establishment of West Pakistan Act in certain respects. The principal changes made by the Bill were as follows:

Bahawalpur. The electoral college to choose the 23 Bahawalpur representatives in the Interim Legislature of West Pakistan would not be the District Boards (as laid down in the original Act) but the State Legislative Assembly. It was explained that this Assembly had only been suspended in November 1954 and not dissolved, as had been originally reported (see 13893 A) and as had also been assumed when drafting the West Pakistan Establishment Act. Under the Amendment Bill the members of the State Legislative Assembly were grouped in three district electoral colleges. Bahawalpur (electing nine members, including one woman), Bahawalnagar, and Rahimyarkhan (electing seven members each).

Karachi Federal Area. The electoral college was divided into two, viz., the elected councillors of the Municipal Corporation of Karachi, who would choose 13 representatives to the Interim Legislature (including one non-Moslem and one woman), and the elected members of the Cantonment Boards of Karachi, Drigh Road, Malir, and Manora, who would jointly elect one member.

West Pakistan High Court. The Amendment Bill laid down that the Court would have jurisdiction over the whole of West Pakistan except the special areas, which, as defined by the Act itself, comprise the Tribal Areas of Baluchistan, the Punjab, and the North-West Frontier, and the States of Amb, Chitral, Dir and Swat.

The Amendment Bill was piloted through the Assembly by Mr. Chundrigar (Minister for Law) and Sardar Amir Azam Khan (Minister for Parliamentary Affairs), and was subsequently signed by the Governor-General.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14521 A.)**

E. IRISH REPUBLIC. — Transport Board Report.

The annual report of *Coras Iompair Eireann* (the Irish Transport Board) for the year ended March 31, 1955, published on Nov. 29, showed a loss of £866,535, compared with a loss of £1,021,069 in 1953-54. This increased the Board's indebtedness to the Central Fund to £2,526,000.

In addition to road passenger and freight services, including the Dublin buses, C.I.E. runs the railways in the Irish Republic. It was stated in the report that the number of diesel rail-car units in service had been increased by 20 to 67.
(Irish Times, Dublin) **(Prev. rep. 13585 A.)**

A. BURMA. — Premier U Nu's World Tour.

The Prime Minister of Burma, U Nu, made two extensive tours of foreign countries during the spring and autumn of 1955. In the first of these tours (May 28 - June 23) he visited in succession Israel, Yugoslavia, Britain, the U.S.A., and Japan, whilst on his second tour (Oct. 17 - Nov. 16) he visited the Soviet Union (after brief visits to India and Afghanistan), Finland, Sweden, Norway, Denmark, and Poland. The itinerary for the first tour was also to have included Egypt, but U Nu's projected visit to that country was cancelled in view of the Arab States' objections to his visit to Israel, which he refused to abandon in spite of Arab pressure.

Summaries of U Nu's visits to Israel, Yugoslavia, Britain, the U.S.A., and the Soviet Union are brought below.

Israel. During his eight-day visit (May 29 - June 6), the first to be paid to Israel by the Prime Minister of a foreign country, U Nu had conversations in Jerusalem with Mr Sharett (then Prime Minister of Israel) and other Israeli Ministers, called upon President Ben-Zvi, attended a State banquet given in his honour, and laid wreaths on the tombs of Dr Theodore Herzl, the "father" of Zionism, and Dr Chaim Weizmann, the first President of Israel He also visited Tel-Aviv (where he received the Freedom of the city) and Haifa, as well as agricultural settlements, land reclamation projects, industrial enterprises, schools, and religious institutions

Speaking at a reception before leaving Israel, U Nu thanked the Israeli people for "the extraordinary warmth of the welcome extended to me everywhere in your hospitable country" He expressed particular interest in the work of the *Kibbutzim* (the agricultural settlements in which Israeli farmers hold all land, property, and equipment in common), and announced that he would study "this unique experiment" with a view to encouraging it in Burma

A joint communiqué was issued by U Nu and Mr. Sharett which declared (1) that the Burmese Premier's visit had "reaffirmed the friendly relations so happily existing between the two countries", (2) that the "close and friendly" ties between Israel and Burma "will serve the interests of peace and brotherhood between the nations of Asia and elsewhere", (3) the willingness of the two countries to pool their efforts for their mutual economic, social and cultural advancement, and (4) the dedication of the two countries "to the principles of the U.N. Charter and the ideals of peace, progress, democratic freedom, and social justice"

U Nu held a press conference before leaving for Yugoslavia in which he gave the following message to the people of Israel "Perhaps as an outsider I should avoid making observations, but as a friend I should like to offer a few remarks If firm foundations are to be laid for the new State of Israel, strengthen your faith as much as possible The people of Israel belong to one of the most ancient races of mankind, but in the long course of history they have been subjected to a series of persecutions In spite of these persecutions, the Jews have now recovered their old land and are building their own way of life Adverse circumstances in the past were enough to make you extinct as a race It seems to me that the main reason for your brave refusal to become extinct is your faith in the spiritual values and ideals of Judaism, which has sustained you throughout the ages and should continue to instil in you a new spirit of service to your land."

U Nu disclosed that he had had "intimate talks about economic relations" with Mr. Sharett, details of which would be announced later. He emphasized that Burma was friendly towards the Arab States as well as towards Israel.

Yugoslavia. During a 10-day visit to Yugoslavia (June 6-16) U Nu had discussions with President Tito on Brioni Island, paid visits to Belgrade, Zagreb, Skoplje, and other cities, and inspected a number of factories, farms, hydro-electric projects, etc At the end of the visit a joint communiqué was issued by U Nu and President Tito stating that their discussions had taken place "in a very cordial and friendly atmosphere of complete mutual understanding and identity of views" It continued

"The important events that have recently taken place in the international sphere clearly indicate that tension in the world is continuing to decrease, and that the possibilities for the preservation and consolidation of peace are becoming broader and more definite. Burma and Yugoslavia have made their contribution to such a state of affairs by their consistently peaceful policy. This fully confirms the correctness of the principles on which the foreign policy of the Union of Burma and the Federal Peoples' Republic of Yugoslavia rest, as expressed in the joint statement issued by President Tito and Premier U Nu in Rangoon on Jan. 17, 1955 (see 14040 A)

"It was noted . . . that the policy of active co-existence is gaining increasing support as the only sure way to achieve permanent peace and develop international co-operation The two Governments reaffirm their determination to continue their efforts towards the fullest possible application of the policy of co-existence; to support the settlement of all international problems by negotiation and agreement, in the first place through the United Nations; and to work for the establishment of peaceful relations among nations on a basis of equality.

"Consideration was also given to the further advancement of mutual relations in the economic and mutual fields. Special significance was attached to the development and extension of economic co-operation between the two countries, as an exceptionally important element in the consolidation of friendship and co-operation between them."

The communiqué went on to announce that President Tito and U Nu had signed a protocol on economic co-operation between Burma and Yugoslavia, with the following provisions:

(1) "Competent agencies and organizations" of the two countries would consult each other and take mutually agreed steps towards increasing the exchange of goods

(2) The two countries would conclude a five-year agreement under which Yugoslavia would purchase 50,000 tons of rice a year from Burma "and such other commodities as may be agreed upon," whilst Burma would purchase capital and consumer goods from Yugoslavia.

(3) The two Governments would also conclude agreements on long-term economic co-operation with the aim of "jointly promoting development in industry, the utilization of sources of power and natural resources, and other sectors of the economy."

(4) In addition, Burma and Yugoslavia would conclude a technical co-operation agreement covering such matters as the training of experts for work in each other's countries, the exchange of patents, technological documentation, etc, and the exchange of technological experience

(5) Joint Burmese-Yugoslav Chambers of Commerce would be set up in Belgrade and Rangoon

It was stated that the above-mentioned agreements would be signed by the end of 1955

Great Britain. During his visit to Britain (June 16-23) U Nu was received in audience at Buckingham Palace by H M the Queen, had discussions on international affairs with Sir Anthony Eden at 10, Downing Street, called upon Mr Attlee at the House of Commons and Sir Winston Churchill at the latter's London residence, and was the guest of honour at a banquet given by H M Government In the course of a two-day visit to Scotland he visited the Clydeside shipyards, the new town of East Kilbride, and the Pitlochry hydro-electric scheme in the Highlands, and was given a civic reception by the Lord Provost and Corporation of Glasgow. Before leaving Britain, U Nu presented to the Burma Star Association, through Admiral of the Fleet Earl Mountbatten (the First Sea Lord, formerly Allied Supreme Commander in South-East Asia), a cheque for £1,500 for the benefit of veterans of the 14th Army who fought in Burma

United States. At the invitation of President Eisenhower, U Nu spent three days in Washington (June 29 - July 1) and during his stay had discussions on international affairs with the President and Mr. Dulles. The following joint statement was issued by President Eisenhower and U Nu:

". . The Prime Minister (U Nu), the President, and the Secretary of State reviewed problems of peace and security in Asia They had a frank discussion of the complex economic problems arising from the existence of substantial surpluses of exportable rice both in Burma—one of the world's leading rice-producing countries—and in the United States . The problem of imprisoned American fliers in Communist China was also reviewed. . . .

"There is a wide area of agreement and a traditional friendship between Burma and the U.S A., resting upon certain noble concepts to which both countries subscribe The U S A and Burma share two fundamental goals—a peaceful world and a democratic way of life . . Both countries are deeply concerned with a subject that is predominant in the minds of all responsible world leaders today—the problem of achieving peace with justice, a peace based upon the liberty of human beings and the security of nations. Such a peace can best be achieved by loyal support for the U.N. Charter. . .

"The Prime Minister, the President, and the Secretary of State deplored the conditions which force the peoples of the world to divert their energies from a single-minded effort to improve and expand those cultural and economic opportunities by which men can raise the levels of their existence They renewed their own determination to uphold the principles of the U.N. in its unceasing effort to save mankind from the scourge of future war"

While in Washington, U Nu gave an address to the National Press Club in which he emphasized that Burma's policy of neutralism was "not a negative policy towards world affairs" but a "positive policy of seeking peace and friendship with all countries; of actively seeking to discover, through negotiation, compromise, and accommodation, some acceptable basis on which the peace of the world can be secured" He declared that Burma would join no military blocs or groupings, that she was determined to maintain her independence, and that she relied on the United Nations for protection against any aggression from without. Stressing that the Burmese people preferred their own way of life to any other, he declared . "We do not claim that our way of life is better than that of other people We merely say that it suits us better. We therefore cannot be induced to give it up in exchange for some other way of life—be it the Communist way, the West European way, the American way, or any other way." In reply to a question, U Nu said that Burma was ready to offer her services as mediator in the Formosa dispute if asked to do so by the U S A. and the People's Republic of China.

During his tour of the U.S A, U Nu attended a civic reception given in his honour in New York, lectured to New York University on Buddhism, and visited the Detroit industrial area, the Middle West, the South-West, and California

Soviet Union. During his visit to the U.S.S.R. later in the year (Oct. 20 - Nov 3) U Nu had discussions with Marshal Bulganin and other leaders of the Soviet Government, called upon President Voroshilov, and toured various parts of the country. Speaking on Oct. 22 in the Kremlin, at a State banquet given in his honour, U Nu spoke of the benefits to Burma accruing from the recent Burmese-Soviet trade agreement (see 14408 A), and announced that Soviet technicians and architects would be engaged for various Burmese projects, including the building in Rangoon of a big conference hall for international conferences, and a stadium to hold 100,000 people. On foreign affairs, U Nu reiterated his support for the co-existence of countries with differing political and social

systems, and suggested that the Soviet Government should attend future meetings of the "Bandung countries."

A joint communique was issued by Marshal Bulganin and U Nu on Nov. 3 containing the following points

(1) The Soviet and Burmese Prime Ministers "unanimously condemn the policy of creating blocs, and agree that a policy of non-participation in blocs guarantees security for the peoples and plays a positive part in establishing world peace"

(2) The Soviet Union and Burma would base their mutual relations on the "Five Principles" (*Panch Sila*) agreed upon by Marshal Bulganin and Mr. Nehru during the latter's visit to Moscow (see 14372 A), viz—non-aggression, non-interference in internal affairs; peaceful co-existence, co-operation based on equality and mutual economic benefit; and respect for each other's sovereignty and territorial integrity

(3) Both Premiers welcomed the recent easing of international tension as expressed in such developments as the ending of the Korean and Indo-Chinese wars, the normalization of Soviet-Yugoslav relations, the success of the Bandung Conference of Afro-Asian nations, Mr Nehru's visit to the Soviet Union, and the "summit" conference at Geneva

(4) Both countries were agreed that special attention should be paid to the "problems of Asia and the Far East," including Formosa, and that the Chinese People's Republic should be seated in the U N.

(5) The two Prime Ministers called for the unconditional prohibition of nuclear and thermo-nuclear weapons, substantial reductions in conventional armaments, and "effective control" of disarmament

Before leaving Moscow, U Nu held a press conference in which he pointed out that the Soviet Union was the first of the great Powers to accept Burmese rice supplies in exchange for technical aid He added that Burma was trying to negotiate similar terms with other countries, including Britain and the U.S.A

During U Nu's visit to Warsaw (Nov. 11) it was announced that the Polish and Burmese Governments had agreed to exchange diplomatic missions headed by Ministers Plenipotentiary.—(Burma Weekly Bulletin, Rangoon) **(Prev. rep. U Nu, Visits to China, North Vietnam, Cambodia, 14037 A.)**

A. UNITED KINGDOM. — Wholesale and Retail Prices. - Movements in Third Quarter of 1955.

The movements of wholesale and retail prices in the third quarter of 1955 are shown below:

Wholesale Prices (1930 = 100).	July	August	September
Intermediate products	376 4	382 3	380 4*
Iron and steel	379.0	393 1*	394 3*
Food and tobacco	312.9	305 3	305 2*
All items	342 4	342.5*	342.7*
Retail Prices (Jan. 15, 1952 = 100).†			
Food	125.6	122 4	123 6
Rent and rates	115.0	115.2	115 4
Clothing	96 3	96 4	96 4
Fuel and light	113 0	119.2	120 9
Household durable goods	95.8	95 9	96 4
Miscellaneous goods	101 5	101.5	102.3
Services	115 5	115 7	116.6
Alcoholic drink	102 8	102.8	103.0
Tobacco	100.7	100 7	100 7
All items	113.3	112.5	113.2
All items (June 1947 = 100)	150.1	149.1	150.0

* Provisional † On July 12, Aug. 16, and Sept. 13 respectively

The six-point rise in the fuel and light index in August resulted from the increase of about 18 per cent in the pithead prices of coal (which came into operation on July 18—see 14428 A), together with increased gas prices in many areas.

The Board of Trade Basic Materials index in the third quarter (June 30, 1949 = 100) was 153.8 in July, 156.4 in August, and 155.8 in September.—(Board of Trade Journal - Ministry of Labour Gazette) **(Prev. rep. 14373 A.)**

B. UNITED STATES. — Further New England Floods.

Further severe floods, the second in two months, occurred in the States of Connecticut, New Jersey, New York, Pennsylvania, Rhode Island, and Massachusetts as a result of torrential rain on Oct. 14-16. Southern Connecticut was again the worst-hit area, the towns of Winsted, Naugatuck, Westport, Ansonia, Danbury, Seymour, Norwalk, Stamford, and Westbury —all of which had suffered extensive flood damage in August—again being severely affected. In the stricken area as a whole 48 people lost their lives, 6,900 families were evacuated, and tens of millions of dollars worth of damage done. The Army Corps of Engineers reported on Oct. 17 that 50 per cent of the restoration work completed since August had been destroyed in the new floods.

A final report on the August floods, published on Oct. 30 by the Business and Defence Services Administration of the Department of Commerce, stated that 179 people had lost their lives, 6,992 were injured, and 813 homes were destroyed. The total damage was estimated at $457,674,044.
(New York Times - New York Herald Tribune) **(14456 A.)**

C. NORWAY - SOVIET UNION. — Hr. Gerhardsen's Visit to Moscow. - Soviet-Norwegian Trade Pact.

The Norwegian Prime Minister, Hr. Einar Gerhardsen, arrived in Moscow on Nov 10 for a 12-day State visit to the Soviet Union, being accompanied by Hr. Arne Skaug, the Norwegian Minister of Commerce. During his stay in the Soviet capital he had discussions with Marshal Bulganin, Mr. Mikoyan, and other Soviet leaders.

A joint communiqué issued on Nov 15 stated that the Soviet - Norwegian discussions had covered both questions of direct interest to both countries and international problems, and that in the latter respect there had been "an identity of views on a series of problems now being discussed by the United Nations." The Norwegian Prime Minister had given an assurance that Norway would "not contribute towards a policy which had aggressive aims, and that she would not grant bases on Norwegian territory to foreign forces as long as she was not attacked or threatened with attack." The communiqué added that both countries would co-operate towards a general relaxation of world tension; would develop trade and cultural relations, would continue talks at diplomatic levels on questions relating to the Soviet-Norwegian frontier, and on the use of the Pasvik River (which runs along the frontier) for the generation of electric power, and would take steps to widen Soviet-Norwegian exchanges in science, industry, culture, and sport.

It was also announced that a three-year trade agreement had been initialled between Norway and the U.S.S.R., together with a protocol covering trade exchanges in 1956.

The three-year agreement provided for annual Norwegian exports to the U S.S R aggregating 130,000,000 kroner ($18,300,000) and for Soviet exports to Norway totalling 120,000,000 kroner, the difference being accounted for by Norway's current trade debt to the Soviet Union of about 40,000,000 kroner Norway would export to the Soviet Union chiefly salt herrings and hard fats, as well as tinned fish and cellulose wool, in exchange for Soviet deliveries of bread grains, feeding-stuffs, minerals, and motor-cars

Hr. Gerhardsen said in a press statement on Nov. 15 that the Soviet leaders had given "satisfactory" answers to his questions with regard to a number of Norwegians detained in the Soviet Union. He had been informed that six of these persons had died, four had been released some time ago (though apparently no news had been received from them in Norway), and one was serving a 15-year sentence for "crimes against the Soviet people." The last-named case would be reviewed by the Soviet authorities, who had promised to "do what they could" towards a reprieve. After leaving Moscow Hr. Gerhardsen visited Stalingrad, Volzhsky (a new town adjoining the site of the new hydro-electric station on the Volga, near Stalingrad), Tiflis, and Leningrad, returning to Oslo on Nov. 22.

In a press statement on his return to Oslo, Hr. Gerhardsen pointed out that in his discussions on Norwegian membership of NATO he had merely reiterated Norway's undertaking not to permit foreign military bases on her soil unless she was attacked or felt herself threatened, and that he had used exactly the same words as had been contained in a Note sent to the Soviet Union in 1949 (see 9841 A). Nothing he had said, therefore, implied any change in Norway's policy towards NATO.—(Aftenposten, Oslo - Soviet Weekly - Times - Manchester Guardian - New York Times) **(Prev. rep. 12777 A.)**

D. AUSTRIA. — Retention of Austrian Prisoners by Soviet Union and "Satellite" Countries.

It was reported from Vienna on Nov. 17 that the Austrian Government had informed the National Council (the Lower House of Parliament) that, in spite of the official Soviet claim to have released all Austrian P.O.W.s and civilian prisoners, 421 of the latter were still detained in the Soviet Union, including a considerable number of Austrians whose detention in Siberia had only recently been ascertained through information supplied by returned prisoners. In addition, 59 Austrian nationals were still being detained in the "satellite" countries, principally in Czechoslovakia. All these persons had "disappeared" from Austria during the Soviet occupation.
(Neue Zürcher Zeitung) **(Prev. rep. 14561 A.)**

E. NEW ZEALAND. — Uranium Discovery.

It was announced in Wellington on Nov. 10 that two prospectors had discovered uranium in the Buller Gorge area of South Island, near the small mining township of Berlins some 20 miles from the coast. Although first reports about the quality of the ore and the extent of the find were encouraging, a report to the Government on Nov. 23 by the Director of the Geological Survey said that on present evidence the lode which had been discovered was "not of commercial significance." It nevertheless gave "a valuable lead" as to places in which to search, as some 25 miles of carbonaceous shale beds in the district had registered a low content of uranium and offered scope for careful prospecting.
(Directorate of Information Services, Wellington)

A. UNITED KINGDOM.—Civil Service. - Report and Recommendations of Royal Commission on Pay and Conditions of Employment.

The Royal Commission appointed by the Chancellor of the Exchequer in July 1953 to review pay and conditions of employment in the Civil Service published its report on Nov. 17. The principal changes recommended by the Commission involved (1) pay increases estimated to cost £11,000,000 yearly; (2) the abolition of regular overtime and extra duty allowances, which at present cost about £20,000,000 a year; (3) shorter holidays. The report and recommendations of the Royal Commission, which sat under the chairmanship of Sir Raymond Priestley, are summarized below.

Civil Service Pay.

The report defined the end to be served in determining Civil Service pay scales as "the maintenance of a Civil Service recognized as efficient, and staffed by members whose remuneration and conditions of employment are thought fair both by themselves and by the community they serve." The primary principle should be "fair comparison with current remuneration of outside staffs employed on broadly comparable work, taking account of differences in other conditions of service." A subsidiary principle, to be borne in mind when fixing rates in detail, was "internal relativity" (i.e. the relationship between grades within the service), but this should never be allowed to override the primary principle.

The Commission suggested that the Treasury and the Civil Service associations should from time to time agree upon "an appropriate selection of organizations which employ staff on broadly comparable work and whose rates of pay and other conditions should be taken into account in determining Civil Service pay." The field of selection should include public, semi-public, and private employment, as well as (for some classes and grades) the universities, the teaching world, and professional practice. "Fact-finding" about pay and conditions in the selected organizations should be "a continuous and detailed study by qualified and experienced staffs."

Proposed New Rates. Meanwhile, the Commission proposed the following new rates for the various grades (shown with existing rates, excluding overtime, and present rates plus overtime for comparison):

	Present pay excluding overtime or extra duty allowance	Present pay including overtime or extra duty allowance	Proposed pay
	£	£	£
ADMINISTRATIVE CLASS (London)			
Permanent Secretary	4,500	—	6,000
Deputy Secretary	3,250	—	4,250
Under Secretary	2,600	—	3,250
Assistant Secretary	1,700-2,200	—	2,000-2,600
Principal	1,245-1,595	1,344-1,620	1,300-1,850
EXECUTIVE CLASS			
Senior executive officer			
London	1,125-1,325	1,215,1,431	1,220-1,450
Provincial	1,077-1,257	1,109-1,295	1,140-1,370
Executive officer			
London	312-870	346-940	340-950
Provincial	306-830	315-855	325-900
CLERICAL CLASS			
Clerical officer			
London	195-625	214-685	225-650
Provincial	186-595	193-618	210-610
SCIENTIFIC OFFICER CLASS			
Principal scientific officer			
London	1,245-1,595	1,344-1,620	1,300-1,850
Provincial	1,185-1,567	1,220-1,567	1,220-1,750
Scientific officer			
London	514-925	555-999	575-1,000
Provincial	489-885	504-911	535-950
WORKS GROUP OF PROFESSIONAL CLASSES			
Senior grade			
London	1,470-1,595	1,588-1,620	1,600-1,850
Provincial	1,390-1,571	1,432-1,571	1,500-1,750
Main grade			
London	1,095-1,415	1,183-1,528	1,150-1,550
Provincial	1,055-1,335	1,087-1,375	1,090-1,450
MEDICAL OFFICERS CLASS (London)			
Senior medical officer	2,200	—	2,600
Medical officer	1,595-2,100	1,620-2,100	1,650-2,250

The Royal Commission's findings on the system of "provincial differentiation" (i.e. the system of paying higher rates in London than in the provinces), and on the remuneration of the higher (administrative) and specialist grades of Civil Servants, were as follows:

Pay Differentials between London and Provinces. Arguments in favour of some sort of "provincial differentiation" were conclusive, and the Commission was unable to recommend acceptance of the proposal, put forward by the staff associations, that the London scale of pay should become a national rate. It believed, however, that a national rate, with additions for London and possibly for other high-cost areas, would be preferable to the present system of provincial differentiation, and recommended that negotiations for a change on these lines should be initiated as soon as possible. The Commission also suggested that the adequacy of transfer grants (paid to Civil Servants transferred to other districts) should be examined.

Remuneration of Higher Civil Servants. In determining the remuneration of higher Civil Servants, regard should be had to (1) salaries in industry (both private and nationalized), commerce, and finance; (2) comparison with other public services (e.g. senior posts with local authorities), (3) "the level of remuneration which would be considered reasonable in the light of tradition and convention for the most senior Civil Servants." Account should also be taken of the absence of benefits in kind, such as were enjoyed by comparable staffs outside the Service.

The Commission was satisfied that "a case exists for an increase in the remuneration of the higher Civil Service." Having regard to "the general level of remuneration in industry, commerce, and finance in other areas of public and semi-public employment, and in the professions," it considered that "the salary of a Permanent Secretary should be £6,000 and that of the Permanent Secretary to the Treasury £7,000, an increase of £2,000." In respect of the higher Civil Service generally, it proposed that the range should be £2,000 - £6,000, which it considered would "provide sufficient room in the middle ranks of the service to allow for a proper structure with rates of pay commensurate with those obtaining in outside employment." It should also lead to "rewards which are fair both to the individuals concerned and to the community in general," and should result in a pay structure which would "assist the Civil Service to recruit and retain the number of staff which it requires for the administrative class, including a small proportion each year of really outstanding candidates."

The Commission also recommended the appointment by the Prime Minister (after informal consultations with staff interests) of "a committee of five persons, chosen to reflect a cross-section of informed opinion in the country, with the function of exercising a general oversight of the remuneration of the higher Civil Service." The staff associations should have no right of direct access to the committee, but, in cases where it had proved impossible to reach agreement on any major matter by negotiation, a staff association should be entitled to ask the Treasury to invite the committee to intervene.

The Specialist Classes. Recommending revised rates of pay for certain specialist classes, including scientific officers, the report stressed that the efficient organization and proper staffing of the Government scientific, professional, and technical services would not be achieved by forcing their pay structure into a mould intended for staffs employed on work which was for the most part different in nature and content. The Commission considered that—particularly in the scientific field—the content and quality of the work would justify larger numbers of higher posts, without departing from normal Civil Service practice in the matter of grading specialist work. They therefore stressed the need of as much flexibility as possible to ensure that the Civil Service did not lag behind outside employment in improving the attractions and rewards of a scientific or professional career.

Other Conditions of Service.

Working Hours. The Commission recommended that working hours per fortnight should be 84 gross and 74 net in London, and 88 gross and 78 net elsewhere. The report explained that these hours seemed to the Commission "not unreasonable having regard to outside practice," and that in making its decisions the Commission had been influenced by the difference in the time and stresses of travel in inner London and the country generally.

Mealtime intervals should be 60 minutes in London and elsewhere for lunch, and tea at desks where possible, or otherwise "unofficial" tea breaks of 5-10 minutes.

Annual Leave Allowances. The report stressed that the present leave allowances in the Civil Service were "much more generous than those found in comparable employment outside the service," whilst the pre-war figure of 48 days was even more so. Although recognizing that the present trend in Britain was towards longer holidays, and that alterations in leave and arrangement of hours tended to create administrative problems, the Commission considered that it would be "failing in its duty" if it did not recommend some steps in the direction of greater conformity with outside practice. It therefore proposed the following allowances, related to a 10½-day working fortnight (see below):

Staff on scales with maxima up to and including that of clerical officer.	16 days, after 10 years, 19 days.
Staff on scales with maxima above that of clerical officer up to and including that of senior executive officer.	19 days; after 10 years on 19, 23 days; after 10 years on 23, 27 days; after 10 years on 27, 32 days.
Staff on scales with maxima above that of senior executive officer up to and including that of assistant secretary.	27 days; after 10 years on 27, 32 days.
Staff on scales with maxima above that of assistant secretary.	32 days.

Any Saturday taken as leave outside a period of a fortnight's leave should count as a half-day only, subject to a limit of 12 half-days a year.

The Five-Day Week. The Commission also recommended that the five-day week should be introduced as widely as possible in two stages, the first being the introduction of a 10½-day fortnight, wherever practicable. It suggested that staffs who might frequently have to work on Saturdays should be given compensation in the form of an alternative half-day or shorter hours.

As regards the cost of its proposals, the Commission pointed out that, taken in isolation, the abolition of regular overtime and extra duty allowances would involve a financial saving, whereas the proposed new rates of pay would involve additional cost. It added: "There is, however, a third element in the calculation—namely, the cost of such additional manpower as might be required if our recommendations were brought into operation. We have been unable to obtain or form any estimate on this exceedingly important point. We think it wiser, therefore, not to suggest any figure for the net cost of our recommendations."—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Royal Commission, 13308 C.)**

A. CANADA. — Defence Production Act. - Three-year Extension of Special Powers.

The Canadian House of Commons gave a second reading on July 11 to a Government Bill extending the Defence Production Act beyond July 31, 1956, when it would otherwise have expired. The second reading was given after a 10-day debate (starting on June 7) during which the Progressive Conservatives (the principal Opposition party) strongly opposed the Government's original proposal that the special powers under the Act should be extended indefinitely. Eventually, after a "filibuster" by Opposition speakers, and after repeated appeals by C.C.F. and Social Credit leaders for a compromise solution, Mr. St. Laurent (the Prime Minister) and Mr. Drew (Leader of the Opposition) reached an agreement under which the nine sections of the Act conferring special powers upon the Government would be extended for three years only—i.e., until July 31, 1959. The other sections of the Act, dealing with the setting-up of the Defence Production Department to administer the Government's defence procurement programme, were extended indefinitely, thus making the Department a permanent institution.

The special powers extended for three years enable the Minister of Production, *inter alia*, to compel manufacturers and suppliers to accept defence contracts, to requisition supplies, to appoint controllers to operate defence industries, to allocate essential defence materials, and to fix their maximum prices Among the sections made permanent was one empowering the Minister to acquire or manufacture defence supplies and to do anything he deemed necessary to carry out that purpose.

The House also adopted a second amendment to the Bill, moved by the Government, to provide for parliamentary control of any Orders made under the Act, and laying down that all such Orders would be tabled in both Houses as soon as possible after they were made. After such Orders had been tabled any 10 members could sign a petition for their repeal or amendment, thereby forcing a debate within four days.

In its revised form the Bill was passed unanimously through all its remaining stages.

A statement issued by Mr. C. D. Howe (Minister of Defence Production) on Dec. 27, 1954, showed that Federal expenditure on arms and equipment during 1954 amounted to about Can. $1,000,000,000, a decrease of about Can. $174,000,000 from the post-war spending peak of 1953.—(Montreal Star)
(Prev. rep. Defence Production, 11842 D; 11295 A.)

B. SWITZERLAND. — Compulsory Civil Defence.

A draft Bill providing for compulsory civil defence was approved on Nov. 30 by the Swiss Government. It laid down that all males between the ages of 15 and 65 (including foreigners living in Switzerland) would have to undergo 16 hours' basic training, and thereafter eight hours' basic training every year; that women between 15 and 60 could volunteer for service; and that industrial establishments employing over 50 people would have to organize Civil Defence teams. All communities with more than 1,000 inhabitants were required to set up a Civil Defence organization. (Neue Zürcher Zeitung)

C. SOVIET UNION. — Release of Polish Officers.

It was reported from Moscow on Oct. 25 that the Soviet Government, at the request of the Polish Prime Minister, M. Cyrankiewicz, had agreed to release 3,000 Polish officers, some of whom had been kept in captivity in the Soviet Union since 1939. The majority of the released officers had taken part in the abortive Warsaw rising of 1944. The Soviet Government declared its willingness to pay compensation to the released officers on the ground that their detention had been "a mistake." (Neue Zürcher Zeitung)

D. RHODESIA AND NYASALAND FEDERATION. — Preparation for Start of Shire Valley Scheme.

The Government of the Federation accepted a motion in the Federal Assembly on July 5 asking it to make provision for the early starting of work on the first stage of the Shire Valley project, in Nyasaland. This project, which envisages the control of the waters of Lake Nyasa, the reclamation of the Lower Shire marshes, hydro-electric works on the Shire River, and an appropriate system of communications, had been recommended in a report by Sir William Halcrow and Partners, presented to the Federal Parliament on March 14. The report had estimated the total cost of the scheme at about £78,000,000, and that of the first phase at £23,631,000, including the installation of a hydro-electric power station to produce a peak load of 30,000 kilowatts.

Mr. John Foot (Federal Party, Nyasaland), who introduced the motion on July 5, said that the level of Lake Nyasa—which is about 360 miles long, and the third largest in Africa—varied from time to time and thus prevented the building of jetties, etc, whilst silting had caused serious flooding. By controlling the level these difficulties would be overcome, and the reclaimed areas could be used for growing wheat, sugar, and particularly, cotton. Ships would be able to travel downstream from Lake Nyasa to a land and water terminus at Matope, only 36 miles from Blantyre (the capital of Nyasaland).

Mr Foot pointed out that the total estimated cost of £78,000,000 included £37,000,000 for hydro-electric schemes—which would "undoubtedly produce a great deal more power than Nyasaland now needs", £14,000,000 for work on the Portuguese [i e. Mozambique] part of the scheme, and £2,000,000 to build a pumping station at the outlet of the lake—which was not likely to be necessary at the present stage. That brought the figure down to £25,000,000, which was more or less the original sum it had been intended to spend on the first stage It had been realized, however, that even this sum would be greater than the Federation could afford at the present time, and a further proposal had therefore been put forward to develop the first phase at a cost of £8,000,000 spread over five years, or £4,500,000 leaving out the power station and transmission costs of the Matope barrage hydro-electric scheme

The Federal Minister of Commerce, Industry and Power (Sir Malcolm Barrow) announced during the debate that consultations would take place with the Portuguese Government to ascertain to what extent it wished to participate in the development of the project. Meanwhile the Federal Government would "make every effort" to find the necessary funds to start the early stages of the scheme. The Government supported the motion on the understanding that the funds would have to be found outside the ordinary loan vote.
(Federal Information Department, Salisbury)
(Prev. rep. Kariba Scheme, 14151 C.)

E. UNITED KINGDOM. — Benefactions to Universities of Cambridge and Leeds.

It was announced on Nov. 17 that a gift of £250,000 had been made to the University of Cambridge by Mr. Harold Samuel, chairman of the Land Securities Investment Trust, for the furtherance of research and study in estate management at the University.

Mr. Samuel, a chartered surveyor who owns considerable property in the West End of London, made the gift to the University's Estate Management Department, which was established in 1946 and is headed by Mr. Noel Dean, Fellow of Trinity Hall. The money will be paid in seven annual instalments.

On Oct. 19 it had been announced that the Anglo-American Corporation of South Africa, Ltd., had made a gift of £100,000 to the University of Leeds for the foundation of a research institute of African geology.

The University authorities stated that the institute would have as its primary objects "research into the origin of mineral deposits generally, the study of the African geological structure in particular, and the training of post-graduate research geologists by active field work on the problems of African geology."

The research institute will be headed by Professor W. Q. Kennedy, an authority on African geological problems, who led expeditions to Mount Ruwenzori (on the border of Uganda and the Belgian Congo) in 1951 and 1952.
(Times - Daily Telegraph) **(Prev. rep. 13664 D; 13305 E.)**

F. UNITED STATES. — Increase in Bank Rate.

The Federal Reserve Banks in New York, Philadelphia, Atlanta, and Chicago raised their rediscount rate on Nov. 18 from 2¼ to 2½ per cent, a similar increase being subsequently announced by the Reserve Banks in Cleveland, San Francisco, Dallas, Kansas City, Minneapolis, Boston, Richmond, and St. Louis. This was the fourth increase in the rate during 1955, bringing it to the highest level since 1934.—(New York Times)
(Prev. rep. 14448 B.)

DECEMBER 17—24, 1955

A. MALTA. — Report of Round-table Conference. - Support for Maltese Representation at Westminster.

The report of the Round-table Conference on the future of Malta (see 14352 A) was published in London on Dec. 16 as a White Paper (Cmd. 9657). With two dissentients, it recommended that Malta should be represented at Westminster by three Members of Parliament. The report described Malta as "a tower of strength to British causes," and said that the offer of representation at Westminster would be "a recognition by the people of the United Kingdom that they and the people of Malta should enjoy equality of status." The proposals will be submitted to a referendum in Malta and will be debated by the British Parliament before H.M. Government decides upon its policy.

The Round-table Conference (for membership see 14352 A) held its first sitting in London on Sept 19, visited Malta from Oct 16-23, and subsequently returned to London for further meetings The White Paper stated that 12 plenary sessions had been held in London and a further three in Malta, that the Conference had also held 11 closed sessions at which evidence was heard from British Ministers, the Governor of Malta (Major-General Sir Robert Laycock), representatives of the fighting Services in Malta, the Prime Minister of Malta (Mr Dominic Mintoff), and the Leader of the Opposition in the Maltese Legislative Assembly (Dr Borg Olivier), that private discussions had taken place in Malta between members of the Conference and the Roman Catholic Archbishop of Malta, and that evidence had also been heard from representatives of professional and trade bodies in Malta, and from the principal trade union (the General Workers' Union) In addition, the Conference held 12 private sittings in London to discuss their recommendations and prepare their report

The report was divided into the following sections: (1) the present situation in Malta, (2) the evidence submitted to the Round-table Conference; (3) examination of the evidence; and (4) conclusions and recommendations.

The Situation in Malta.

Facts and Figures. Giving "the salient facts and figures with which we are concerned," the report said: "The Maltese Islands (of which Malta and Gozo are the only sizable ones) cover a land area of 122 square miles, which is about the size of the County of London or little more than four-fifths of Rutland or the Isle of Wight The people of Malta, who have their own language, culture, and customs, and their ancient Roman Catholic traditions, have a strong national pride and a history of parliamentary government They have never lost their separate identity. The Islands have held a position of importance in the Mediterranean for many centuries, though always in association with other Powers The total civil population of almost 316,000 is roughly equal to that of Bedfordshire Population density is high—over 2,600 to the square mile, or 3½ times that of England and Wales The natural increase of population is high, but has been partly offset by emigration Over the last five years the net increase has been only one per cent

"The Maltese Islands are rocky and in some parts barren, the soil, though fertile in the low-lying areas, is in the main shallow The Islands are almost treeless and no minerals or other natural resources have been discovered The comparatively low mean annual rainfall of about 20 inches, and the absence of rivers and lakes, means a perennial shortage of water, which is aggravated by the high population density.

"A third of Malta's national income is derived from payments by the U.K Service Departments, and a further important part is indirectly so derived. A quarter of the working population is employed on or in connexion with defence activities About 90 per cent of Maltese imports are paid for by expenditure in Malta of U K Departments or by direct financial aid from the U K. Treasury.

. The standard of living in Malta is generally lower than in the United Kingdom, but higher than in many other Mediterranean countries . . Even with the substantial assistance which she receives from direct and indirect expenditure by the U K, Malta is only able to maintain a level of social and other services considerably lower than that of the United Kingdom.

"The people of Malta freely chose in 1802 to place themselves and their Islands under the protection and sovereignty of the British Crown The Islands were formally annexed in 1814 under the Treaty of Paris. Since the Napoleonic wars, Malta has been in continuous use as a British naval base and fortress. Its fine natural harbours and its strategic position on the sea lanes to the East have been of immense value to the U.K. and the other countries of the Commonwealth and Empire. In the Second World War, the heroic garrison and the indomitable people of Malta were exposed to frequent, heavy and sustained air attacks, and to an intense blockade. In recognition of their courageous resistance and of the exceptional hardships and privations they endured, Malta was awarded the George Cross in 1942.

"Recent years have seen the decision to withdraw British forces from the Suez Canal Zone; the growth of tension and unrest in the Middle East and North Africa, and the establishment in Malta of the Headquarters of the NATO C.-in-C, Allied Forces, Mediterranean. All these factors have combined to emphasize the continued importance of Malta as a pivotal point in the Mediterranean. The strategic importance of Malta, and the events of the last 150 years, have resulted in its economic dependence upon the United Kingdom The degree of this dependence, and the vulnerability of the Maltese economy resulting from the predominance of our military, naval and air requirements, are factors which we have had constantly in mind in considering the future political status of the Islands"

The Present Constitution. The remainder of this section was devoted to an analysis of the present Maltese Constitution (that of 1947—see 8905 A), and to an account of political developments in recent years, culminating in the decision to appoint a Round-table Conference on the future of Malta.

The Evidence.

This section of the report summarized the proposals put forward by the three political parties in Malta—(i) the Malta Labour Party, which is headed by the Prime Minister (Mr. Mintoff); (ii) the Malta Nationalist Party, headed by Dr. Borg Olivier, Leader of the Opposition; and (iii) the Progressive Constitutional Party, headed by Miss Mabel Strickland.

Proposals of the Government of Malta. The following proposals were put forward by the Prime Minister of Malta, the Maltese Government, and the Malta Labour Party

"(1) There should be a unicameral Maltese Parliament, whose members should be elected by adult suffrage in a direct voting system similar to that obtaining in the United Kingdom

(2) All matters other than foreign relations, defence, and (at a later stage, the timing of which would be dependent on the rate of progress of the Maltese economy towards 'parity' with that of the U.K.) direct taxation, should be allocated to the legislative authority of the Maltese Parliament

(3) The overriding powers of the Imperial Parliament over all matters should remain untouched, but their use should be governed by what the Prime Minister of Malta described as the normal conventions which would, in effect preclude their application to matters on which the Maltese Parliament had power to legislate

(4) Malta should be represented in the House of Commons at Westminster by not less than three Members, elected in accordance with U K. electoral laws

(5) H M. Government in the U K should provide economic aid for the capital development of Malta and, by way of subventions, towards recurrent budgetary expenditure Such aid would have among its objects the gradual raising of the standard of living of the Maltese people towards the level of the people in the U K, the ultimate aim being 'parity' and the disappearance of wage discrimination.

(6) There should be a consultative committee in Malta, presided over by a Minister of the Maltese Government, with equal representation of the U K Defence Departments and the Home Office (which would take over from the Colonial Office responsibility for the administration of Maltese affairs), on the one hand, and of the Maltese Government on the other.

(7) There should be a second committee in London, consisting of U K and Maltese Ministers. This committee, on which the U K members would have the majority voice, should have powers of decision, subject to the right of members to consult their respective Cabinets before committing themselves"

Proposals of Malta Nationalist Party. These proposals were as follows:

"(1) Malta should ultimately achieve a new form of full self-government within the Commonwealth in which it would be autonomous in its relations with the U K, but not with Commonwealth and foreign countries Defence and Commonwealth and foreign affairs would be the joint responsibility of the U K. and Malta.

(2) The joint responsibility for handling defence and Commonwealth and foreign affairs, in so far as they affected Malta, would be governed by agreements to be made between the two Governments

(3) The Prime Minister of Malta would be entitled to attend meetings of Commonwealth Prime Ministers when matters affecting Malta were under discussion.

(4) There should be an exchange of High Commissioners between London and Valetta, and the affairs of Malta should become the responsibility of the Secretary of State for Commonwealth Relations

(5) In place of the Governor, there should be a Governor-General who, in the exercise of his powers and functions, would, generally speaking, act in accordance with the constitutional conventions applicable to the exercise of similar powers and functions in the United Kingdom by Her Majesty."

The report added, however, that the Malta Nationalist Party recognized that "some time must pass before a Constitution giving effect to these proposals could be brought into operation" In view of this consideration, the party put forward the following interim proposals "designed to fulfil Malta's immediate requirements for constitutional advance":

"(1) The Maltese Parliament should have power to legislate on all matters other than defence and external affairs (the scope of both terms being subject to strict definition) Its legislation should not be reserved by the Governor for the signification of Her Majesty's pleasure, nor should powers of disallowance be exercised in respect of legislation passed by the Maltese Parliament and assented to by the Governor.

(2) In exercising his powers in the fields of foreign affairs and defence, the Governor would act on the advice of H.M Ministers in the U.K. but should seek the advice of an advisory council consisting of himself, the Prime Minister of Malta, and two other Maltese Ministers. In other matters, the Governor should act on the advice of Maltese Ministers.

(3) There should be a committee in London, consisting of the Prime Minister of Malta and two U K Cabinet Ministers, with the duty of resolving disputes as to whether any matter is a reserved matter (i.e , defence or foreign affairs) or not.

(4) The emergency powers reserved to Her Majesty in Council under Section 59 of the Constitution should be limited to reserved matters.

(5) No powers should be reserved to Her Majesty in Council to revoke, amend, or alter by Order-in-Council any provision of the Constitution, except in accordance with a resolution passed by not less than three-fourths of all the members of the Legislative Assembly.

(6) Malta should receive economic assistance from the U.K. with a view to reducing Malta's dependence on defence expenditure, developing Malta's resources and social services, maintaining full employment, and raising living standards "

Proposals of Progressive Constitutional Party. These were set forth as follows ·

" (1) The present legislative powers of the Maltese Legislative Assembly, including responsibility for fiscal legislation, should not be diminished.

(2) The Maltese Legislative Assembly should be given increased powers in the ' reserved ' field, by a revision of the present definition of defence and foreign affairs and a curtailment of the present list of reserved matters

(3) There should be a closer administrative association in Malta between the Imperial Government and the Maltese Government.

(4) The Privy Council of Malta should be abolished, and the Lieutenant-Governor should be replaced by a Chief Secretary The Prime Minister of Malta should have a seat on the Nominated Council, renamed the Defence Council, in Malta so as to enable him to be kept informed on defence, foreign affairs, and other reserved matters

(5) There should be a separate Malta Office in London, either as an independent department or as a part of the Home Office, with a Minister of State or Parliamentary Under-Secretary of State responsible for Maltese affairs

(6) Attached to the Malta Office, there should be a senior Maltese secretary responsible for liaison with U K. Departments concerned with Maltese affairs. He should be appointed after consultation with the Prime Minister of Malta

(7) There should be a Malta Council in London, comprising Ministers representing a number of U K Departments, and presided over by the U K Minister responsible for Maltese affairs The Council should be responsible for co-ordinating policy matters relating to Malta.

(8) Malta should receive financial aid for economic development and social welfare through a new Malta Development and Welfare Fund, which would be administered by a financial board within the framework of the proposed Malta Council, and monies from which should be available for a period of at least ten years."

Examination of Evidence.

The evidence presented to the Round-table Conference was discussed under three heads: (1) common ground; (2) points of difference; and (3) disagreement on ultimate aims.

Common Ground. " The proposals presented to us," said the report, " disclosed a considerable measure of common ground between the political parties in Malta All witnesses expressed themselves in favour of enhancing the status of the Maltese Parliament and Government by a reallocation of legislative functions between the Imperial authorities and the Maltese Parliament. All agreed that the position of the Roman Catholic Church in Malta should not be diminished. All accepted the need for the Parliament at Westminster to retain, in practice, ultimate power in defence and foreign affairs Again, all witnesses recommended improvements in the administrative and consultative machinery of government, both in Malta and in London. Finally, the Maltese Government and the representatives of the other parties and organizations in Malta were agreed on the need for continued aid from the U K. towards the economic development of Malta, and to promote the improvement of Maltese social services and the standard of living "

Points of Difference. " Within this measure of agreement there were, however, certain differences of detail and emphasis. On the division of legislative functions, the Maltese Government proposed that defence and foreign affairs, and, ultimately, direct taxation, should be exclusively reserved to the Parliament at Westminster. Subject to the continuance of the present over-riding powers of the Parliament at Westminster in all fields, all other matters should be dealt with by the Maltese Parliament The Malta Nationalist Party proposed that, when the interim period came to an end, the Maltese Parliament should have power to legislate in all fields, including defence and foreign affairs, subject only to two conditions. First, under the proposed joint agreements on defence and foreign affairs, H.M. Government in the U.K. and the Maltese Government should exercise a joint responsibility for these matters; secondly, in case of dispute, the last word should rest with H M. Government Under the proposals of the Progressive Constitutional Party, the present form of Government in Malta would be substantially maintained, but the post of Lieutenant-Governor would be abolished and replaced by that of a Chief Secretary. The Governor (and not the Parliament at Westminster) would retain the power to legislate in the fields of defence and foreign affairs in Malta.

" As regards administration of defence and foreign affairs in Malta, the proposals of the Maltese Government imply that the Governor would cease to have executive authority in this field. It would instead be exercised by an ' Imperial Branch ' in Malta, consisting of a representative of the Home Secretary (the Secretary of State responsible for Maltese affairs), representatives of other U K. Departments with branches in Malta, and the heads of the Services The Malta Nationalist Party proposed that the executive power in defence and foreign affairs should ultimately become the joint responsibility of the two Governments, acting in Malta through a U K. High Commissioner and in London through a High Commissioner for Malta Under their proposals for interim constitutional reform, and under the proposals of the Progressive Constitutional Party, the Governor would retain both legislative and executive authority, subject to consultation with the Maltese Government

" There were also differences about the form which arrangements for consultation should take. As regards consultation in Malta, the Maltese Government proposed a committee presided over by a Maltese Minister The Malta Nationalist Party appeared to suggest consultation through a U K High Commissioner in Malta and a High Commissioner for Malta in London, or direct between U K and Maltese Ministers; but in the interim period, when the Governor still retained responsibility for defence and foreign affairs, he should seek the advice on these matters of a new advisory council consisting of himself, the Prime Minister of Malta, and two other Maltese Ministers The Progressive Constitutional Party proposed that the Privy Council should be abolished and that the Prime Minister should be given a place on the Nominated Council, which should be renamed the Defence Council.

" As regards consultation in London, the Maltese Government proposed that there should be a consultative committee of Ministers with powers of decision, the Malta Nationalist Party that there should be a similar body with the power of deciding disputes over the allocation of legislative functions between the Maltese and U K. Parliaments, but only during the interim period; and the Progressive Constitutional Party that there should be a larger and more formal body, with powers of co-ordinating policy

" On the economic side it became apparent that, although all were agreed on the broad lines of economic development, there were differences about the ultimate objective and, more particularly, about the time which would be needed to attain it. The economic objective set by the Maltese Government was to raise the standard of living of the Maltese people towards that of the people of the U.K. over a period of 15 to 20 years, with the ultimate aim of ' parity.' The Maltese Government made it clear, however, that they did not regard this economic aim as meaning immediate and absolute ' parity ' of Maltese wage levels, social service standards, and taxation with those prevailing in the United Kingdom. Both they and the Malta General Workers' Union stressed that ' parity ' did not, in any case, mean equality of wages of Maltese and U K workers, ' parity,' to the Labour Party and the General Workers' Union, meant equivalence of living standards, having regard to local conditions in Malta

" The Malta Nationalist Party and the Progressive Constitutional Party criticized, both on grounds of principle and of practicability, the objective of ' parity ' of wages, social services, and taxation with those in the United Kingdom . . . The economic aim of the Malta Nationalist Party was stated to be viability in accordance with Maltese conditions, and not an artificial standard to be achieved in a pre-determined period of time. The party proposed that viability should be achieved by means of a series of plans assisted by grants from the U.K. Treasury, to be negotiated between the two Governments, they were not prepared to forecast when viability could be achieved, but were confident that success in achieving it would be easily distinguishable.

" Finally, there were important differences of approach between the parties in Malta as to the nature of closer association which they all claimed their proposals were designed to achieve The Maltese Government emphasized that their proposals were intended to maintain and strengthen the responsibility of the Maltese Parliament for such matters as the Roman Catholic Church, religious education, and family life; that they would be opposed to any interference with this responsibility; and that they had given categorical assurances to the Roman Catholic Church in Malta and to the Vatican to that effect. They rebutted the criticisms of the Malta Nationalist Party and the Progressive Constitutional Party, which were strongly opposed to any form of closer association involving the absorption of Maltese political, social, and economic institutions into those of the United Kingdom. In particular, these parties said they were anxious to preserve intact the faith and institutions of the Roman Catholic Church in Malta, and were highly critical of the Maltese Government's proposals on the ground that they ran counter to the real wishes of the Maltese people The Maltese Government denied that their proposals bore any such interpretation and said they would be strongly opposed to integrating Malta with the U.K. in that sense."

Disagreement on Ultimate Aims. " Beyond these differences, there was a strong and profound disagreement on the ultimate constitutional status which Malta should achieve, and about the nature of the constitutional link which should unite Malta and the United Kingdom. Both the Maltese Government and the Malta Nationalist Party made it clear that, in their opinion, the limited proposals of the Progressive Constitutional Party . . . were inadequate [and] would not, in their view, go far enough to meet the desire of the Maltese people for an advance from their present status. It was therefore essential to decide immediately the nature of the ultimate status to be attained.

" The Malta Nationalist Party maintained that the Maltese people could not surrender their inalienable right of self-determination and that the aspirations of enlightened Maltese opinion were for a status of independence. The Malta Nationalist Party, therefore, regarded the normal road towards self-government within the Commonwealth as the proper road for further advance, but recognized that the end, which was most recently achieved by Ceylon, could not be fully

achieved by Malta. We understood them to agree that, in the special circumstances of Malta, whose future is so largely dependent upon defence expenditure, the ultimate goal of complete independence cannot be reached in the foreseeable future, and to have framed their proposals for the ultimate status of Malta in the light of this fact They were strongly opposed, on a number of grounds, to the proposal of the Maltese Government that Malta should be represented at Westminster Their most important criticisms were that, in their view, it would not meet the desire of the Maltese people for more independence, that it could not be a permanent or satisfactory solution, and that it would inevitably involve, if not their complete absorption, at least the domination of Maltese laws and institutions by those of the United Kingdom The Malta Nationalist Party would, therefore continue to oppose representation at Westminster, whatever the outcome of the Conference. In their view, the rights and aspirations of the Maltese people, and the harmony of future relations between the U.K and Malta, could be guaranteed only by the acceptance of proposals on the lines they themselves had put forward.

" On the other hand, the proposals of the Maltese Government included representation at Westminster as their cardinal feature, and were put forward on the ground that they truly met the realities of Malta's unique situation In particular, they argued that their proposals recognized that independence was not an attainable aim, and that the Parliament at Westminster must retain for an indefinite period control over defence and foreign affairs, as well as over-riding powers in all fields Their proposals were accordingly designed to give the Maltese people an opportunity of sharing at Westminster in Parliamentary discussion and decisions on these matters, thereby taking into account their legitimate political aspirations and making manifest the equality of their status and responsibilities with those of the British people . . .

" The Maltese Government maintained that their proposals for the division of legislative powers between the Parliament at Westminster and the Maltese Parliament, and the assurances they had given on religious questions, disposed finally of any Maltese fears They argued that, on the contrary, the presence of Maltese representatives at Westminster, able to draw attention to the interests and faith of the Maltese people, would constitute an added protection which did not exist at present

" Finally, the Maltese Government maintained that their proposals clearly represented the will of the Maltese people, since they were put forward by representatives of the Maltese people freely elected by a majority of votes at a recent general election. They intended, however, to dispose of any contention that they were imposing their solution on the Maltese people, by submitting the matter to a referendum at the appropriate time "

Conclusions and Recommendations.

The conclusions and recommendations of the Round-table Conference were set forth under two heads: (1) economic development, and (2) constitutional changes.

Economic Development.

" All witnesses," said the report, " were agreed that defence expenditure is likely to remain for the foreseeable future the essential basis on which Maltese economy rests. . . . We are, however, convinced of the need for a concerted drive to strengthen the rest of the Maltese economy as a precaution against a possible falling-off in defence expenditure, and to raise Malta's income sufficiently to pay for improved social services. It is therefore important that, subject to the over-riding requirements of urgent defence projects, there should be consultation on, and co-ordination of, the requirements of both Governments to secure the best use of Malta's resources and labour, and to avoid inflation of costs."

Although specific recommendations for the future economic development of Malta were excluded from its terms of reference, the Conference nevertheless put forward some general observations " to relate this aspect of the Maltese problem to the recommendations for constitutional changes " Specifically, the Conference drew attention to (i) the need to improve and expand Malta's water supply, which was at present " dangerously inadequate even for present needs " ; (ii) the possibility of improving agriculture by the scientific application of fertilizers, etc., (iii) the need to improve the Maltese fishing industry, combined with " a vigorous effort to reduce Malta's dependence on imported fish supplies " ; (iv) the " urgent need " for improvements to the civil harbour at Valetta ; (v) the possibility of building up a tourist industry in view of " the natural attractions, beautiful buildings, and historic associations of the Islands " ; (vi) industrial expansion.

On the last-mentioned subject the report said : " Because of the lack of local resources, entrepreneurs, and markets, it is unlikely that there will be a rapid expansion of industries, even light industries, in the immediate future. . There are, however, some measures which the Maltese Government can properly take to encourage industrial development, particularly through the provision of improved basic services, such as water supplies, power and harbour development, and by increasing the flow of skilled workers through improved technical education. Furthermore, certain materials and manufactured goods, at present imported by the Service Departments from the U.K., might be produced in the Islands, thereby helping to stimulate local industry. We recommend that this should be a matter for consultation between the Maltese Government and the Services."

On the question of emigration from Malta (see 13978 B) the report said . " Much of the evidence we have heard drew attention to the serious problems created by the rapidly rising population, and stressed the need for continued emigration on a substantial scale in order to prevent unemployment and a fall in the standard of living. Some witnesses were, at the same time, fearful of the effects of continued emigration . . . on the supply of skilled labour in Malta. We recognize the urgent need for carrying on with the programme of assisted emigration , but we suggest that this should be a balanced programme and so ensure that, as further opportunities for skilled employment in Malta are created by the development of local resources, there is an adequate supply of skilled workers to fill them. . . We recommend that both the Maltese Government and H.M. Government in the U.K should continue to give high priority to the problems of emigration "

After recapitulating the U.K. financial aid already made available to Malta, this section concluded : " It is universally agreed that the task of raising the Maltese standard of living will be a long and arduous one, involving a bold and sustained effort by the Maltese Government and people, with financial and other assistance from H.M Government in the United Kingdom A series of development plans, designed to raise productivity and expand national income, will have to be carefully planned and carried out In this connexion we emphasize the words agreed by all the representatives at the June talks (see 14352 A) ' that the degree of success attained will depend on the hard work and self-discipline of the Maltese people, and on the Maltese Government and people making the best possible contribution from their own resources ' Without continued support from the U K , further development, even along modest lines, would be virtually impossible We are confident that, in this task of economic development and progress, the Maltese people can count upon continued and whole-hearted co-operation and assistance from the Government and people of the United Kingdom."

Constitutional Changes.

" We have not regarded it as our duty," the final section of the report said, " to seek either to describe an ideal Constitution for Malta or to arbitrate between the aspirations of the different Maltese parties. Our primary task has been to decide how far the proposals for closer association and, in particular, those put forward by the Maltese Government, are consonant with the interests and requirements of both the United Kingdom and Malta, and with the responsibilities of the Imperial Parliament. The Prime Minister of Malta has made it clear to us that, in his opinion, representation at Westminster is the crucial issue, and the one which will determine the direction of Malta's future political evolution . We therefore consider it first.

" In the special circumstances of the Islands, we cannot foresee a time when Malta could achieve complete independence There can, therefore, be no question of the Parliament at Westminster abandoning the authority which is now vested in it. At the same time we record our conviction that the discretion which Parliament has shown in exercising its authority during the 150 years since Malta came under the Crown will be continued in the future, and that the inability of Parliament to enter into any convention or binding agreement to devolve powers deriving from that authority need cause no fear that it will invade those legislative fields which are accepted, in practice, as the direct concern of the Maltese Government and people.

" We were impressed . . . by the extent to which defence requirements in Malta are inextricably bound up with the everyday life of the community and thus impinge on the domestic concerns of the Maltese people , and we have had ample evidence of the difficulties which have arisen in the past in the exercise of the Governor's jurisdiction in reserved matters It would be unrealistic to expect that difficulties will not be encountered in the future in determining whether a matter properly lies within the respective competence of the Maltese and the U.K Parliaments This is a problem which has to be faced in any division of functions between two Legislatures. . .

" There are now two distinct governments in Malta, each having legislative and executive powers and operating concurrently within its defined sphere When this system was instituted in 1921, it was thought possible that the respective spheres of the Imperial and Maltese Governments could be clearly defined, and that neither in administration nor in legislation would there be any confusion between their functions, nor any doubt as to their respective responsibilities. Practice has proved otherwise

" Nearly all the friction has arisen from disputes on the interpretation of reserved matters, principally over what is a matter of defence. The Maltese people are naturally jealous of their powers of self-government, and they have been suspicious of the matters reserved to the Maltese Imperial Government being interpreted in such a way as to impinge on those powers. The ever-widening sphere of defence, complicated by the introduction of Allied forces, and the wide scope of the reserved matters as enumerated in the Constitution, have thus undoubtedly involved a practical restriction of Maltese self-government.

" The wider the scope of the authority of the Maltese Parliament and Government, the greater is the possibility of a conflict of interests and jurisdictions between them and the Imperial side. The very nature of government in Malta makes it impossible to devise a Constitution which would entirely separate the requirements of defence from those matters which are within the authority of the Maltese Government, in such a way as to remove all possibility of conflict.

" In the course of their evidence, several witnesses expressed the opinion that it would be desirable for us to limit our constitutional recommendations to those matters on which the three political parties in Malta are in broad agreement. This, it was argued, would meet the needs of the present situation and would avoid the danger of splitting the Maltese people on the one really controversial issue —the ultimate constitutional status of Malta. However, we are

satisfied . . . that both the main parties in Malta are deeply concerned about this question. The desire for prestige and feelings of self-interest are naturally involved; but, given recognition of the wish for an advance in the present constitutional status of Malta, they have a right to know the direction in which it will be possible for them to move and the ultimate goal which they may expect to reach. . . .

"The proposals of the Malta Nationalist Party and of the Maltese Government both include measures which are claimed to be essential to fulfil Maltese aspirations; the former in the direction of Dominion status, the latter through the new conception of representation of the Maltese people at Westminster. Having considered the special circumstances of Malta, we are obliged to reach the conclusion that the road to full self-government is blocked, in that the Parliament at Westminster must, in order to maintain the defences of Malta and the facilities necessary to enable it to fulfil its role as one of the principal Commonwealth and NATO bases in the Mediterranean, exercise overriding powers in Malta in the fields of defence and foreign affairs. These requirements inevitably involve a limitation in possible advances open to the Maltese Parliament itself. We are also obliged to conclude that, having regard to the special circumstances of Malta, the proposals put before us for a 'quasi-Dominion' status would not be workable. They lack essential definition and would inevitably lead to conflicts of interpretation and to embarrassment in relations with Commonwealth and foreign countries. . . .

"We also reject the idea that there might be Maltese representatives in Parliament who would only have the right to ask questions and take part in debates on foreign affairs, and not to vote. This would be repugnant to the dignity and traditions of our Parliament, and would not give the Members from Malta equality of status and responsibility with Members from the United Kingdom. Such an arrangement is also, in our view, unworkable, since it is not in fact possible completely to distinguish matters of defence from more domestic aspects of U.K. affairs, any more than it is possible to do so in Malta. We also feel that there is considerable merit in the argument that Maltese representatives at Westminster would be interested in, if not directly concerned with, many aspects of life in Britain, including the effects of budgetary policy. Finally, we should not wish to encourage . . . the idea that the ties of the Maltese and U.K. peoples, within the Commonwealth and under the Crown, depend only on their common interests in defence.

"We do not think that Malta's desire for a voice in the Parliament at Westminster could be met by enabling one or more representatives chosen by the Maltese Parliament to sit in the House of Lords. A proposal designed to make any formal arrangement for representation of Malta in the House of Lords would have wider implications, involving the general question of the reform of the Second Chamber, and would require legislation. Moreover, such representation would not, in present circumstances, give Malta an effective voice in decisions at Westminster on expenditure affecting the Maltese people and their economy.

"In examining the proposals put before us by the two main Maltese parties we have been left in no doubt about the objections and difficulties seen by many people, both in the U K and in Malta, to offering Malta full representation in the Parliament at Westminster. These objections were made to us with force and authority, and we do not treat them lightly. Indeed, we consider it our duty to bring them to the attention of H M. Government and Parliament, so that their decision on this complex and delicate issue may be taken in the light of all the relevant circumstances.

"We have considered, first, whether there is any merit in the contention that Maltese Members of Parliament, necessarily very few in number, could have little or no influence on the proceedings of the House, and would thus suffer from feelings of frustration and discontent. Similar feelings are not wholly absent from the minds of many of the Members elected for U.K. constituencies, but we are sure that they would be the first to agree that the opportunities for individual Members to express views, and to safeguard the interests of constituents, are a guarantee of democratic freedom. Nor did we find convincing the argument that these few Members from Malta would be able to exploit the balance of power if Government and Opposition were evenly divided.

"Fears have been expressed to us about the possible repercussions elsewhere of the admission to Westminster of representatives from Maltese constituencies. Such repercussions, it has been said, might take the form of claims from Colonial territories which, owing to their small size, lack of natural resources or other reasons, see no prospects of achieving the normal form of constitutional development, to be accorded a status similar to that of Malta. The claim by Malta to representation at Westminster is based on, and justified by, the quite exceptional circumstances and position of Malta. For this reason, we do not consider that claims from other quarters should arise which cannot be dealt with on their own merits.

"We are, however, bound to feel concern about the anxieties of a substantial section of the Maltese people regarding the suggestion that the two countries should be brought closer together by the link of representation at Westminster. We have outlined earlier in our report the fears expressed on the one hand, and the assurances given on the other, about the maintenance of the position of the Roman Catholic faith in Malta. We do not wish to involve ourselves in this question, which in our view is one for the Maltese people themselves; but we have a number of general observations to make on it.

"As we understand the position, there is unanimous desire in Malta for an improvement of economic and social conditions. Similarly, there is widespread agreement on the need for the close association of Malta with the United Kingdom. It is only with regard to the form of that association, and the particular issue of representation, that any fears are entertained about the possible long-term effects on social and religious life in Malta. So far as the Parliament at Westminster is concerned, we do not see that the presence of Maltese Members, elected by a Maltese people devoted to their laws and institutions, would lessen, in regard to religious matters, the restraint and respect which the Parliament at Westminster has shown for the last 150 years. We consider that, on the basis recommended below, the Maltese Parliament should remain responsible for legislation on all domestic affairs and, in particular, on such matters as the position of the Church, education, and family life. Moreover, although the representatives of the Conference were able to discuss the matter with the Archbishop of Malta only on a hypothetical basis, they felt entitled to give him assurances that, in their opinion, the Maltese Parliament would continue . . . to exercise authority in all fields in which the Church is directly concerned, and that the Parliament at Westminster had no desire whatever to intervene in such fields and, following its long-standing tradition, would not so intervene

"Finally, we recognize that a decision to grant representation for Malta in the Parliament at Westminster would not meet the wishes expressed to us by the representatives of a large section of the Maltese electorate. Our sole concern is to devise the best means of meeting the aspirations of the Maltese people, subject to their acceptance of necessary limitations in the fields of defence and foreign affairs, for a higher ultimate constitutional status and a greater stability in future The offer of representation at Westminster would be a recognition by the people of the U K. that they and the people of Malta should enjoy equality of status. Common membership of the Parliament at Westminster—the highest authority under the Crown, which ultimately controls both our destinies—would make this equality manifest and meet the realities of the situation. However, it is for the Maltese people themselves to determine, and to demonstrate clearly and unmistakably, whether the proposals of the Maltese Government do indeed correspond to their own wishes.

"If the principle of representation at Westminster were to be accepted by the Maltese people and by H.M. Government and Parliament at Westminster, the detailed implementation would have to be worked out in consultation between the two Governments. We confine ourselves to stating two considerations which we think must guide such further elaboration. First, having regard to the basis on which the separate parts of the U.K. are represented in Parliament and the size of the Maltese electorate, there should be three Maltese representatives at Westminster. Secondly, Maltese representatives should be elected in exactly the same way, and under the same laws governing representation of the people and electoral practices, as the Members from the United Kingdom.

"We conclude that representation at Westminster is practicable and reasonable, and, subject to the considerations mentioned above, we recommend its acceptance by H.M Government in the United Kingdom and by the Parliament at Westminster."

The report went on to recall that the Round-table Conference had been asked, in its terms of reference, "to consider constitutional and related questions arising from proposals for closer association between Malta and the United Kingdom, and, in particular, from the proposal that Malta should in future be represented in the Parliament at Westminster." Its conclusions on these questions were set forth as follows:

". . . We refrain from commenting on the question whether the Maltese Parliament should continue to be elected by proportional representation or should be elected in the same way as Members of the House of Commons. This is a matter for the Maltese themselves to decide With regard to the other changes proposed [by the Maltese political parties] there is already broad agreement that the legislative scope of the Maltese Parliament should be widened and that there should be provision for regular and continuous consultation, both in Malta and in London, between the Maltese Government and H.M. Government in the U.K. on matters which affect their mutual interests and responsibilities. We consider that reforms in these fields are desirable to ensure a more efficient and cordial relationship between the two Governments.

"As regards the division of legislative functions between the Parliament at Westminster and the Maltese Parliament, we recommend that, subject to the principle of religious toleration as embodied in the Declaration of Rights of 1802 [see Appendix below], and in recent Constitutions, the legislative authority of the Maltese Parliament should extend to all matters other than defence and foreign affairs, and, ultimately, direct taxation. As we have explained, the process of raising Maltese living standards will be slow and gradual, and the attainment of equivalence with the U.K. is difficult to envisage at the present time. For that reason we consider that the question of transferring powers of taxation from the Maltese legislature to the Parliament at Westminster should be left in abeyance for the time being.

"We further recommend that the separation of authority for defence and foreign affairs from authority for those matters which are the direct concern of the Maltese Parliament and Government should not, as at present, take the form of two separate Maltese Governments, one composed of elected Maltese Ministers and the other of the servants of the Imperial Government. This does not, however, dispose of the necessity for an authority in Malta to carry out the decisions of the Parliament and Government at Westminster in the fields of defence and foreign affairs, and for the Maltese Government to recognize the need to ensure the efficient and speedy exercise of responsibility by H.M. Government in those fields. We have not thought it possible, as part of our task, to work out and recommend how this authority should be set up and staffed. This

will require careful study, in consultation with the Maltese Government, but we suggest that the authority responsible for defence and foreign affairs in Malta should be organized on the following general lines.

"The responsibility for Maltese affairs in London should be transferred to the Home Secretary, who should be represented in Malta by a U.K. representative, at the head of a staff constituting the U.K. agency in Malta, with the necessary powers . . . to carry out the decisions of H.M. Government in defence and foreign affairs and to consult and collaborate with the Maltese Government in matters of joint concern. . . .

"The problem as regards legislation is comparatively small, since we understand that the main legislation on foreign affairs affecting Malta relates to diplomatic privileges, and that, in the field of defence, there are a good many provisions in U.K. law which would neither be appropriate nor needed in Malta. We see no reason why legislation on defence and foreign affairs should not, for the most part, be enacted by the Parliament at Westminster, and by Her Majesty in Council legislating for Malta by Order-in-Council, on the advice of a Secretary of State. The power to make subordinate legislation could, subject to the normal safeguards, be devolved on the Home Secretary and, in turn, on his representative in Malta The main difficulty would arise with regard to borderline cases or changing requirements It is thus important to ensure that legislation is not held up by disputes over *vires*. It has been suggested to us in evidence that the Maltese Parliament should be given power of legislation in all fields, subject to the over-riding legislative authority of the Parliament at Westminster This has the merit of simplicity, but might give rise to difficulties and misunderstandings and engender feelings of frustration. It would, in our view, be better not to confuse the normal roles of the two Parliaments. We are therefore more attracted by another suggestion—that provision should be made for the power of the Parliament at Westminster to legislate on defence and foreign affairs to be devolved at discretion on the Maltese Parliament. This suggestion appears to offer a means of dealing with matters (such as the control of transit of strategic materials), the subject of which may normally be one falling to be dealt with by the Maltese Parliament, but the object of which may be for the purpose of defence and foreign affairs.

"Another difficulty which might arise is that the Maltese Parliament might wish to pass a Bill touching on defence and foreign affairs. This difficulty might be overcome by adapting the provisions of Section 34 of the present Constitution to the requirements of the new Constitution—i.e., by providing that any Bill which, in the opinion of the Governor, or, alternatively, on the basis of representations to him by the U.K. representative in Malta, appeared to impinge on the field of defence and foreign affairs, should be referred to the Home Secretary, whose decision, after consultation with the Maltese Ministers, would be final.

"It is even more important that, once legislation is enacted, the exercise of executive authority by the agency in Malta of the Government at Westminster, however it may be constituted, should not be subjected to unreasonable delays owing to differences, however genuine, about the propriety of the action involved. This is one reason why it is important to ensure a regular means of consultation and co-ordination between the U.K. agency in Malta and the Maltese Government—a matter which we discuss below.

"Subject to these requirements, we consider that, once it is accepted that the authority of the Maltese Parliament and Ministers can be enlarged on the lines indicated above, the Governor should no longer have discretion to ignore the advice of Maltese Ministers in matters which are their concern. We therefore recommend that in matters other than defence and foreign affairs, the new Constitution should provide that the Governor should act upon the advice of his Maltese Ministers.

"However, in view of the unique situation of Malta as an island-fortress, we consider that some discretion must be reserved to the Imperial side in the event of an emergency. Strong views were expressed to us by all Maltese witnesses that the present powers of the Governor are too extensive and should be restricted to what is necessary to deal with 'real' emergencies. It was argued that Maltese Ministers would be ready to recognize a situation of emergency and to take the necessary steps to deal with it. They would be fully competent to deal with emergencies caused by fire, flood and other forms of natural disaster; in emergencies involving defence interests, responsibility would in any case fall to H.M. Government.

"On this question we feel that . . . there is an apprehension, rooted in past events, that the present scope of Section 59 [of the Maltese Constitution] could be used to frustrate the will of the Maltese Parliament. We sympathize with the view that any interference, even in times of natural disaster or other emergency, with the authority normally exercised by Maltese Ministers could be justified only in the most serious circumstances. Nevertheless, we are convinced that it would not be in the general interest, particularly when urgent action is required to deal with a threatening situation, if the powers of the Imperial side to deal with an emergency were to be unduly restricted; and we trust that, in the new constitutional framework we are recommending, it will be possible for the Maltese Government to accept this view.

"As regards consultation between the two Governments, we recognize that the avoidance of friction under any constitutional arrangements for Malta will always depend on the ready acceptance of defence needs, which include the needs of foreign forces and of NATO, and on goodwill and mutual trust between the two sides of Government. Nevertheless, we consider that many of the difficulties which have arisen in the past regarding the respective spheres of authority of the Maltese and Imperial sides could be avoided, or dealt with before becoming sources of grievance, if there were machinery both in Malta and London to ensure effective consultation and co-ordination between H.M. Government in the U.K. and the Maltese Government. This would provide a forum in which apparently difficult requirements of either side could be explained, and opportunity taken wherever possible of making mutually satisfactory adjustments. It could also provide a means for consultation on Malta's economic and social problems and for arranging mutual assistance by the two Governments in each other's projects. . . .

"We believe that the Maltese Prime Minister should be kept informed of general developments in the field of defence and foreign affairs in the Mediterranean area to the extent necessary to provide the Maltese Government with the background required for a proper understanding of the requirements of defence in Malta Our first recommendation, therefore, is that there should be set up, in place of the Nominated Council, a new Defence Council, under the chairmanship of the Governor, of which the Maltese Prime Minister, the U.K. representative in Malta, and the Heads of the Services in Malta would be members. The Defence Council should be used both to inform the Maltese Prime Minister of developments in defence and foreign affairs, and to discuss matters of defence policy in Malta on which there might be a conflict of interests with the Maltese Government Secondly, we recommend that, to deal with matters concerning the economic and financial problems involved in the respective activities in Malta of the Service Departments and the Maltese Government, there should be established another committee, presided over by a Maltese Minister, on which representatives of the Services and of the U.K agency in Malta would sit. Both these committees should meet regularly at stated times throughout the year.

"We hope that most of the difficulties which might arise in the future will be resolved when consultative machinery on these lines is set up in Malta. It must be recognized, however, that some important issues, and some problems of particular difficulty, will need to be dealt with by U.K. and Maltese Ministers meeting personally. We therefore recommend, in addition, acceptance of the proposal, broadly agreed by all Maltese parties, that there should be a joint Ministerial committee in London, presided over by a U K. Minister. We think it is important, however, to make it clear that such a Ministerial committee could not function successfully if it were to be regarded, and used, merely as a court of appeal for disputes unresolved by the process of consultation in Malta, or for striking bargains on other disputed questions. It should also be clear that such a committee, like the committees in Malta, would be advisory and consultative in character, and would not have independent executive powers. It should be used for the exchange of information, and for consultation, between the two sides. U.K. Ministers should use it to inform Maltese Ministers of general developments in defence and foreign affairs, and of other important policy matters of which the latter should be aware; and for explaining the need for particular policies which required to be implemented by the U K agency in Malta Maltese Ministers should use it similarly for informing and explaining to U K. Ministers their problems and policies in Malta.

"The sole purpose of such consultative bodies must be to ensure co-ordination of governmental policy They could not alter decisions of Parliament, nor purport to effect *ad hoc* changes in the Maltese Constitution to suit the requirements of particular cases; nor should they be allowed to obscure the responsibilities of Ministers to their Parliaments, nor infringe the doctrine of collective Ministerial responsibility For these and other practical reasons, we recommend that the consultative bodies should be set up administratively rather than by constitutional instrument.

"In our opinion, the solution that we have suggested meets the special situation which confronts us On the one hand, Malta is still a separate entity whose people desire to manage their local affairs, and arrangements for the local government of Malta must have regard to this fact, as well as to the situation of the Islands and their people's way of life. On the other hand, there must be remembered the traditions which Malta has chosen to share with us. She voluntarily came under the British Crown 150 years ago, and continued to accept, with the prestige and material benefits of being a stronghold in the Mediterranean, the difficulties of an island-fortress economy. She has been a tower of strength to the causes which the British and Maltese peoples both believe to be those of the civilization of which Malta has been again and again a bastion. The two world wars of this century have set their seal on Britain and Malta standing together. In these circumstances we believe that the people of Malta are entitled to a special road to political equality, and that that road should be, if they so choose, representation at Westminster."

Two of the 17 members of the Round-table Conference—Mr. John S. Maclay, M.P. (Liberal National) and Mr. Kenneth Pickthorn, M.P. (Conservative)—were unable to agree to Maltese representation in the British House of Commons "at the present stage," though they expressed "general agreement with the economic, consultative, and administrative recommendations in the report."

Statement by Mr. Maclay and Mr. Pickthorn.

The White Paper gave the text of the following statement issued by Mr. Maclay and Mr Pickthorn:

"We consider that there is urgent need for (*a*) revision of the present 'list of reserved matters'; (*b*) improvements in the administrative and consultative machinery of government both in Malta and London, and (*c*) continued aid from the U.K. towards the economic development of Malta and towards the improvement of the Maltese standard of living and social services.

We agree—

(a) that the historic association of Malta with the U.K , and the development of Malta as an island fortress, have produced an island economy which, in relation to the size of the population, means that viability as an independent unit is difficult to foresee ,

(b) that the special characteristics and strategic position of Malta as a fortress require that for the foreseeable future overriding powers of legislation and authority for administration in the fields of external affairs and defence must be retained by the Government at Westminster ;

and that for these reasons one road to the attainment of full self-government by Malta is blocked

While we recognize that representation at Westminster may well prove to be the ultimate answer to the constitutional desires and needs of both the peoples of the U.K and of Malta, we are not convinced that representation in the next Parliament of the U.K. is in accordance with the realities of the present situation

It has been made clear that all shades of opinion in Malta desire authority and responsibility for all matters other than defence and foreign affairs to remain with the Maltese Parliament. The report accepts this view, with which we concur. The report further recommends that the Maltese Parliament should continue to be the authority for raising indirect taxation and, during an indeterminate period, direct taxation

In these conditions, if Malta is represented at Westminster, the Maltese Members of Parliament will have full rights to debate and vote, not only on questions of defence and foreign affairs, but also on all matters affecting the U K., including the voting of supply, direct and indirect taxation, and colonial affairs. They will have equality of function with all other Members of Parliament at Westminster, but they will not have equality of responsibility , they will have no responsibility to their Maltese constituents for Maltese domestic affairs, including taxation, which will remain with the Maltese Parliament . . . Can Maltese membership of the Parliament at Westminster then be justified as a first step towards a degree of integration of the social and economic life of Malta with that of the U K., a degree which would give reality to the concept of equality of function and responsibility of all Members of Parliament at Westminster ?

In our opinion such a step is premature and, in view of the inherent implications of representation at Westminster, could lead to serious misunderstandings in Malta, in the U.K., and possibly in those territories overseas which are directly affected by decisions of the U.K. Parliament.

For the time being we believe that revision of the list of reserved matters, development of the administrative and consultative machinery of government in Malta and in London, and continued economic aid, can together result in very real progress towards the meeting of Malta's economic needs and towards that constitutional advance which is consistent with immediate realities."

Among the Appendices to the report was the text of the "Declaration of Rights of the Inhabitants of the Islands of Malta and Gozo," issued on June 15, 1802 and referred to in the report.

The Declaration of 1802.

This declaration was issued by an elected "Congress of the Islands of Malta and Gozo," convened during the French siege of the islands at the time of the Napoleonic Wars The signatories (comprising "all representatives, deputies, and lieutenants of villages and towns") declared their intention of "fixing a Constitution which shall secure to us and our descendants in perpetuity the blessings of freedom and the rights of just law, under the protection and sovereignty of the King of a free people, His Majesty the King of the United Kingdom of Great Britain and Ireland." It was worded as follows

"We make the following declaration, binding ourselves and our posterity forever, on condition that our now acknowledged Prince and Sovereign shall, on his part, fulfil and keep inviolate his compact with us .

(1) That the King of the United Kingdom of Great Britain and Ireland is our Sovereign Lord, and his lawful successors shall, in all times to come, be acknowledged as our lawful Sovereigns.

(2) That his Majesty has no right to cede these Islands to any Power. That if he chooses to withdraw his protection and abandon his sovereignty, the right of electing another Sovereign, or of governing these Islands, belongs to us, the inhabitants and aborigines alone and without control.

(3) That H.M. Governors or representatives in these Islands and their dependencies are, and shall ever be, bound to observe and keep inviolate the Constitution which, with the sanction and ratification of his British Royal Majesty, or his representative or plenipotentiary, shall be established by us, composing the General Congress elected by the people. . . .

(4) That the people of Malta and Gozo, and their representatives in Popular Council assembled, have a right to send letters, or deputies, to the foot of the Throne, to represent and to complain of violation of rights and privileges, or of acts contrary to the constitution of the Government or of the spirit thereof.

(5) That the right of legislation and taxation belongs to the *Consiglio Popolare*, with the consent and assent of His Majesty's representatives, without which the people are not bound.

(6) That His Majesty the King is the protector of our holy religion, and is bound to uphold and protect it as heretofore, and without any diminution of what has been practised since these Islands have acknowledged His Majesty as their Sovereign to this day ; and that His Majesty's representatives have a right to claim such Church honours as have been shown to the regents of these Islands

(7) The interference in matters spiritual or temporal of no other temporal Sovereign shall be permitted in these Islands , and reference in spiritual matters shall only be had to the Pope, and to the respective Generals of the Monastic Orders.

(8) That freemen have a right to choose their own religion. Toleration of other religions is therefore established as a right ; but no sect is permitted to molest, insult or disturb those of other religious professions.

(9) That no man whatsoever has any personal authority over the life, property or liberty of another. Power resides only in the Law, and restraint or punishment can only be exercised in obedience to law"

The Maltese Parliament passed through all its stages on Dec. 22 a Bill providing for the holding of a referendum in February on the proposals for Malta's integration with Britain and for her representation at Westminster. The entire Opposition walked out before the vote was taken, in protest against the Government's decision to limit the debate on the second reading and during the committee stage of the Bill. A statement was subsequently issued by the Malta Nationalist party complaining that the Government's action had left "a mere 3½ hours for debate on a Bill intended to alter Malta's Constitution fundamentally, and containing many provisions of a controversial nature not in keeping with British electoral law."

The Prime Minister of Malta (Mr. Mintoff), who welcomed the report of the Round-table Conference as "a glorious day for Malta," had visited London on Dec. 17-18 for discussions with the British Colonial Secretary, Mr. Lennox-Boyd.

A. INTERNATIONAL BANK. — Loans. - Bond Issues.

The following loans were made by the International Bank during the fourth quarter of 1955 :

Japan. $5,300,000 on Oct. 26 to the Japan Development Bank, which would re-lend the proceeds to the Yawata Iron and Steel Co. Ltd to assist in financing the modernization of steel plate rolling facilities at Yawata (Kyushu). [The Japan Development Bank is a government agency established in 1951 to supply long-term credit for industrial development and to act as a medium for government guarantees of private foreign borrowing]. The Manufacturers Trust Company of New York participated in the loan, without the International Bank's guarantee, to the extent of $791,000. The loan was guaranteed by the Japanese Government. Terms · 3⅞ per cent p.a. interest, plus 1 per cent p.a. commission, repayable in 15 years, starting on March 1, 1958

South Africa. An agreement was signed in New York on Nov 28 under which South Africa borrowed an amount equivalent to $50,200,000, comprising (a) £9,000,000 sterling, equivalent to $25,200,000, from the International Bank, and (b) $25,000,000 by a bond issue to be offered to the public by an investment banking group headed by Dillon, Read & Co., Inc.—the first such offering by South Africa in the U.S.A. The proceeds of both will be used to finance the current expansion programme of the South African Railways and Harbours Administration.

The International Bank loan, for which the U.K Government agreed to release £9,000,000 from its capital subscription to the Bank, carried 3¼ per cent p.a. interest, plus 1 per cent p.a. commission. It is repayable within 10 years, starting on July 1, 1958.

The $25,000,000 of bonds, which were issued on Nov. 30, consisted of (i) $3,000,000 3-year 3⅞ per cent Bonds, (ii) $3,000,000 4-year 4 per cent bonds, and (iii) $2,000,000 5-year 4¼ per cent Bonds, all issued at par ; and (iv) $17,000,000 10-year 4½ per cent Bonds, issued at 98½ per cent. If unrestricted Swiss francs were available, interest or principal on the Bonds could, at the option of the holder, be collected in Switzerland in Swiss francs, at the fixed rate of 4.30 Swiss francs = $1.

Honduras. $4,200,000 on Dec. 22 for highway maintenance and construction. Terms · 3½ per cent p.a. interest, plus 1 per cent p.a. commission, repayable in nine years beginning on Dec. 1, 1957. This was the Bank's first loan to Honduras.

An issue of 50,000,000 Swiss francs 3½ per cent International Bank Bonds was offered for public sale at par in Switzerland on Nov. 25 by a syndicate of Swiss banks headed by the Union Bank of Switzerland, the *Crédit Suisse*, and the Swiss Bank Corporation. The bonds (the sixth Swiss francs issue) will be repayable in 1965-74 in 10 annual instalments of 4,000,000 francs, plus two instalments of 5,000,000 francs each in 1975 and 1976.—(International Bank, Washington) **(14420 A.)**

B. IRAQ. — Cabinet Reorganization.

The Prime Minister of Iraq, Nuri es-Said, reorganized his Cabinet on Dec. 18 by appointing three new Ministers—Abdul Rassoul Khalisi (Social Affairs), Munir Alqadhi (Education) and Abdul Amir Alawi (Health). Four Ministers of the former Cabinet were dropped—Ali Mahmud (Development), Mohammed Hassan Salman (Health), Colonel Shakir al-Wadi (Social Affairs) and Abdul Majid Mahmoud (Minister of State)
(Times) **(Prev. rep. Iraqi Cabinet, 14234 B.)**

A. UNITED STATES. — Trade Unions. - Merger of A.F.L. and C.I.O.

The American Federation of Labour and the Congress of Industrial Organizations formally merged into a single organization at a founding convention in New York on Dec. 5, thus ending the split in the American trade union movement which had lasted for nearly 20 years. The new organization will be known as the American Federation of Labour and Congress of Industrial Organizations (A.F.L.-C.I.O.). Mr. George Meany and Mr. William F. Schnitzler, formerly president and secretary-treasurer respectively of the A.F.L., were elected to the same posts in the joint organization. Mr. Walter P. Reuther, formerly president of the C.I.O., who had been one of the principal advocates of a united trade union organization, was elected one of the 27 vice-presidents of the A.F.L.-C.I.O.—17 of whom will come from former A.F.L. unions and 10 from former C.I.O. unions.

The merger, which had been agreed upon by the two organizations in February last, had been confirmed by special conventions of the A.F.L. and C.I.O. on Dec. 1 and Dec. 2 respectively. Voting at the A.F.L. convention was unanimous in favour of the merger, but at the C.I.O. convention Mr. Michael J. Quill (president of the Transport Workers Union) opposed the merger on the grounds that the C.I.O. was being "swallowed" by the A.F.L., that all the high offices in the new organization were going to the A.F.L., and that the proposed constitution of the A.F.L.-C.I.O. would give licence to "racial discrimination, racketeering, and inter-union raiding."

In speeches to the founding convention, Mr. Meany and Mr. Reuther reiterated statements made on Labour Day (Sept. 3) to the effect that the new organization would take a more active part in political affairs than the trade union organizations had done hitherto, though it was emphasized that there was no intention of forming a Labour Party.

Mr. Meany asserted that the legislative trend in the past eight years had been backward so far as liberal and remedial legislation was concerned, and declared that it was up to the A.F.L.-C.I.O. to reverse that trend. After referring to the need for better housing, schools and roads, and to the need to amend the Taft-Hartley [Labour-Management Relations] Act, he continued: "Labour not only has a right to raise its voice in regard to policy under which our Federal Government is administered, but we have a duty as citizens to take part in shaping the policies of our Government; and as workers we have a special interest in foreign policy. . . . We are going to use our economic weapon in dealing with the employers, if that is necessary, in order to get a fair share of the wealth that we jointly produce with management. And we are going to meet those who would destroy our movement and who would turn back the clock. We are going to meet them on the political front. . . . [But] I don't see any sentiment for a Labour party, and I don't see any sentiment for labour to take over one of the existing parties . . ."

Mr. Reuther, after saying that politics was "the practical housekeeping job of democracy" and that the American labour movement intended to help "keep democracy in America," declared: "We have said very clearly that we are going to work within the two-party system, endorsing candidates not based upon their party label but based upon the competence and integrity of the individual, and where his party stands on the basic issues as they affect the American people." He added: "To do this we need to work hard to raise the level of political understanding in America on the part of the great mass of people."

The A.F.L.-C.I.O., with a membership of more than 15,000,000, will be the largest trade union organization in the world, excluding the Soviet and Chinese Communist unions. It consists of 141 affiliated unions (109 formerly A.F.L. and 32 formerly C.I.O.), of which the largest are the United Automobile Workers (1,239,000 members), United Steelworkers (1,194,000), International Brotherhood of Teamsters (1,281,000), United Brotherhood of Carpenters (804,000), International Association of Machinists (864,000), and the International Brotherhood of Electrical Workers (630,000). The principal American unions remaining outside the new organization are the United Mine Workers (led by Mr. John L. Lewis), with a membership of some 400,000, and the independent railway unions, with a combined membership of about 500,000.

B. MEXICO. - Currency. - New Stabilization Agreement with the United States.

A new currency stabilization agreement between Mexico and the United States, extending the arrangements initiated in 1941 for a further two years until Dec. 31, 1957, was signed in Washington on Dec. 2. The agreement provided that the U.S.A. would use up to $75,000,000, if needed, in financial operations for the purpose of stabilizing the dollar-peso rate.

C. SOVIET UNION. — Criticisms of "Architectural Extravagance." - Dismissal of Leading Architects.

The Soviet Council of Ministers and the central committee of the Soviet Communist Party issued a statement on Nov. 9 severely criticizing the work of leading contemporary Soviet architects as "wasteful" and "extravagant," and accusing them of wasting public funds through the excessive over-ornamentation of buildings and of "disregarding the needs of the people." The statement said that "tower-like superstructures, numerous ornamental colonnades, and other architectural superfluities" had become "mass phenomena" in the construction of new housing-blocks and other buildings, with the result that "a large amount of Government funds has been over-expended in past years." It was announced at the same time that two of Russia's leading architects, M. Alexander Vlasov and M. Chechulin, had been deprived of their decorations and dismissed from their posts as chief architects of Moscow, and that two others, MM. Polykov and Boretsky (designers of the 28-storey Leningradskaya Hotel in Moscow) had been deprived of their Stalin Prize laureates. M. Vlasov, however, remained president of the Soviet Academy of Architecture.

The statement said that while progress had been made in construction through modern technique, "our achievements in this matter would have been more considerable had they not been hindered by great drawbacks and errors on the drawing-board and in construction itself." After denouncing the "flashy" architecture which had become increasingly popular with Soviet architects, and declaring that this type of architecture "does not correspond with the lines of the party and the Government in architectural building plans," the statement added: "Numerous architects are occupied mainly in ornamenting the façades of buildings . . . and not on improving the internal planning and equipment of dwelling-houses and apartments. They are ignoring the need of creating comfort for the people, the demands of economy, and the normal utilization of buildings."

Earlier in the year M. Khrushchov had publicly criticized the ostentatiousness of much modern Soviet architecture and had called for a less pretentious style of building.

During the following weeks similar criticisms of contemporary Soviet building were made by civic authorities in many parts of the Soviet Union, including Kiev, Kharkov, Lvov, Kishinev, Dnepropetrovsk, Tiflis, and Alma-Ata. In these and other centres resolutions were passed by the city councils denouncing architects for excessive "dado ornamentation" and wasting public funds, and calling for a return to a simpler style of architectural construction. The deputy mayor of Moscow (M. Promyslov), writing in the magazine *Ogonyok*, complained at the unnecessary architectural embellishments on the Moscow Underground railway (e.g. the great numbers of statues, bas-reliefs, panels, and mosaics), whilst Professor I. Nikolayev (a leading architect), writing in *Izvestia*, similarly criticized the architects of the Volga-Don canal system for having wasted "millions of roubles" on "garnishing the structures on the canal and the Volga hydro-electric station with towers, colonnades, sculptured bas-reliefs, and triumphal arches."

M. Vlasov—who, at the time of his dismissal as chief architect of Moscow, was heading a Soviet architectural mission to Western Europe and the U.S.A.—declared in Paris on Nov. 16 that the criticisms of his work were "fully justified," and said that he would be "guided by them in future." The Soviet Architects' Union, after a week's congress in Moscow, adopted a resolution on Dec. 4 declaring that the work of its board of directors had been "unsatisfactory," and elected a new board which included M. Vlasov among its members. A message was sent to the Soviet Government and the central committee of the party stating that Soviet architects were "deeply aware of the gravity of their mistakes", and promising to rectify them. During the architects' congress M. Vlasov said that the Soviet Union was lagging behind America, France, Germany, Italy, and other countries in many aspects of building.

(Times - Manchester Guardian - Le Monde, Paris)

D. UNITED KINGDOM. — Co-operative Societies.

Figures recently published by the Chief Registrar of Friendly Societies showed that there were 1,094 retail co-operative societies registered in 1954 (1,101 in 1953), with 11,316,807 members (11,065,405). Sales in 1954, including purchases from wholesale societies, amounted to £774,447,000 (£747,910,000), the dividends on sales totalling £39,496,000 (£37,099,000). There were 187 wholesale and productive co-operative societies in 1954 (182 in 1953), with 59,812 members (59,302). Sales in 1954 totalled £519,787,000 (£539,325,000), and dividends on sales totalled £8,826,000 (£8,527,000).

(Bradford Chamber of Commerce Journal)

A. NORTHERN IRELAND - IRISH REPUBLIC. — Armed Raid on Roslea Barracks (Fermanagh). - New Measures in Northern Ireland to check Border Raids. - Ban on "Saor Oladh" Organization. - Statements by Lord Brookeborough, Mr. Hanna, and Mr. Costello. - Publicity for I.R.A. banned in Irish Republic.

The Royal Ulster Constabulary barracks at Roslea, Co. Fermanagh (Northern Ireland), a few miles from the Eire border, were raided shortly before dawn on Nov. 26 by about 12 armed men who were believed to be members of the *Saor Oladh* ("Free Ulster") organization, a splinter group of the illegal "Irish Republican Army" operating in Northern Ireland. The raiders were repulsed after an exchange of shots, and subsequently fled across the Eire border in two cars without having captured any arms. A constable of the R.U.C. was severely wounded in the attack and was taken to hospital in a critical condition.

The raiders blew a large breach in the wall with gelignite, entered the barracks through this breach, and called upon the occupants to surrender. The constables on duty, led by Sergeant W. R. Morrow (who was in charge of the station, and who lived there with his wife and two small children), opened fire on the attackers, who fled after an exchange of fire and left behind them a sub-machine gun, a fully loaded American-type automatic weapon, a loaded gas-pistol, three gas masks, and a box containing 11 hand-grenades filled with gelignite. Constable Gordon Knowles was struck by at least seven bullets as he lay half buried in the débris caused by the gelignite explosion. The telephone line to the barracks had been cut by the raiders before the attack.

It was subsequently disclosed that one of the raiders had died of wounds received during the attack and had been buried in Carrickroe churchyard, Co. Monaghan (Eire), after an inquest by the Coroner for north-east Monaghan.

The Government Information Bureau in Dublin issued a statement on Nov. 28 saying that the Coroner had been informed that "the body of an unknown man who appeared to have died from gunshot wounds" was lying in a farmhouse in the district; that an inquest had been held; and that the jury found that the unknown man had "died from shock and haemorrhage, and that there was no evidence to show how the injuries had been received." The Information Bureau did not identify the man by name, nor did it make any mention of the Roslea attack. A week later, however, it was disclosed in the Press that the man concerned was Con Green, a 33-year-old native of Londonderry.

New measures to check border raids by "gangs of would-be murderers" into Northern Ireland, and to reduce the chances of their escape across the border into the Irish Republic, were announced on Nov. 28 by Mr. G. B. Hanna, the Northern Irish Minister for Home Affairs, in a speech in Belfast. They included (1) the immediate imposition of a speed limit of 10 m.p.h. for at least one mile on the Northern Ireland side of all unapproved roads across the border; (2) the erection of "semi-permanent" barricades and obstructions on these roads; (3) a "very substantial" strengthening of border patrols; (4) special police powers to stop all vehicles and to detain any person for a few hours' interrogation. In the course of his speech Mr. Hanna said that the Government of the Irish Republic were "morally responsible" for the Roslea raid by the failure to interfere with illegal drilling by the I.R.A. in County Monaghan, near the Northern Ireland border.

"In recent months," said Mr. Hanna, "members of the Government in the South of Ireland, and the Leader of the Opposition there, have repeatedly made speeches deploring violence, but that Government has refused to take any steps to implement these pronouncements. . . . Illegal organizations such as the I.R.A. can openly recruit and drill in the 26 Counties [i.e. the Irish Republic] and can hold exercises within a short distance of the border. An even more disquieting result is that members of these organizations know that if they can escape across the border, they can find sanctuary there after having committed crimes in this country.

"I wonder what the Government and people of Eire would feel like if the boot were on the other foot, if murderous gangs were to go from Northern Ireland with evil intent, attack places and buildings in the south, and then escape across the border and find sanctuary here. We have never allowed this to happen, nor would we. But we are entitled to expect that the Government of a country which purports to be amicably disposed towards us should reciprocate in some manner. . . . If the Government and people of the South of Ireland want to encourage this co-operation, and the preservation of peace and the maintenance of order on both sides of the border, they will realize that they must take steps to ensure that gangs of would-be murderers cannot find sanctuary in any part of the country. I am afraid, however, that the truth is that all co-operation is being deliberately withheld.

"This afternoon a statement was issued by the Eire Government Information Bureau [see above] to the effect that on Nov. 26 the Coroner for North-East Monaghan held an inquest on the body of an unknown man who had, apparently, died from gunshot wounds and was lying in a farmhouse in his district. The jury found that the unknown man died from shock and haemorrhage. There was no evidence to show how the injuries were received. Surely it is not too much to expect that the police authorities in Eire would have got into touch with our police when this body was discovered almost immediately after the armed raid, of which they cannot but have been aware. . . . The only possible conclusion is that the Southern Government is not willing to co-operate with us in these matters."

Mr. Hanna said that it seemed clear from the place in which the raiders made their escape that the gang was in some way connected with persons who had been drilling in the Scotstown area [Co Monaghan, near the N.I. border] in recent months. The existence of this drilling had been brought to the attention of the authorities south of the border, but they took no steps to stop it. "In these circumstances," Mr Hanna added, "I cannot think that I will be regarded as going too far when I charge the Government in the South as being morally responsible for the raid by reason of their failure to interfere."

Mr. Hanna concluded: "I think I ought to draw attention to one feature of this attack about which coming generations in the South may read in their history books as the glorious battle of Roslea, extolling the courage of the Irishmen who attacked the armed forces of the Crown. Let us look at their bravery. They placed an explosive charge outside the window of the day-room. After the explosion they burst into the day-room, firing machine-guns with the obvious intention of killing whoever might be there. In that building not only were there five members of the R.U.C., but also the wife and two infant children of the sergeant. They fired their guns at the prostrate body of the constable who was on duty, who had been blown from his couch and was lying on the ground, dazed and covered with débris. It took great courage to fire in those circumstances. Outside, they gallantly fired at an old lady who had been awakened by the noise and came down to see what was wrong. But when Sergeant Morrow came on the scene with a Sten gun and opened fire, they ran. Although there were only five policemen in the station, the 12 attackers turned tail at the first hint of counter-attack, leaving guns and other weapons behind. I hope these facts will be recorded for posterity, so that the truth will be known when the story of the famous Irish victory at Roslea is recounted."

The Prime Minister of Northern Ireland (Lord Brookeborough), in a statement on Nov. 29 to the N.I. House of Commons, said that it was "unbelievable" that a neighbouring country [i.e. the Irish Republic] which had outlawed the I.R.A. should be afraid to take action against it. He announced that he would make further approaches to the British Government, if necessary, for an extradition treaty between Eire and Northern Ireland, and said that he had already mentioned the matter to Sir Anthony Eden and the Home Secretary, Major Lloyd-George. After denouncing the "blackguards and scoundrels" who crossed the border to carry out attacks in Northern Ireland, Lord Brookeborough said that conferences had already taken place with the military authorities in Ulster, and that, should the necessity arise, the military would be called out to protect the people against such attacks.

Mr. Hanna informed the House that the *Saor Oladh* organization had been banned in Northern Ireland; that a mobile police force had been set up to deal with attacks on police stations; and that the special constabulary might be increased. He described the *Saor Oladh* as the military arm of *Fianna Oladh* ("Warriors of Ulster"), a political group led by Mr. William Kelly, the Ulster abstentionist M.P. and a member of the Irish Republican Senate.

The Prime Minister of the Irish Republic, Mr. Costello, stated in the Dail on Nov. 30 that the Government would use all means in its power to bring terrorist activities to an end, and that it was "for the Dail and the people of Ireland, in the interest of this generation and of the generations to come, to give us full and unwavering support in the performance of that duty."

Mr. Costello asserted that the problem of the unlawful use of force was one which had been created by the actions of the British Government and Parliament, and by the "unrelenting opposition" of the Northern Ireland authorities to "any reasonable approach to the ending of partition." With reference to the Northern Irish complaint that the Irish Republic was not prepared to enter into an extradition agreement for the handing over for trial of persons accused of offences in the "Six Counties" [Northern Ireland] or in Britain who had taken refuge in the territory of the Republic, Mr. Costello spoke as follows:

"There has never been any serious difficulty about the reciprocal enforcement of warrants in respect of ordinary criminal offences between the British and ourselves. For the first few years after the establishment of the State there was the same reciprocity in the execution of warrants between the Six Counties and the Republic, although there were doubts whether the execution in the Republic of warrants emanating from the Six Counties was in accordance with law. In 1939 the High Court decided that there was no authority for the practice of executing 'Six County' warrants here, and we had no option but to discontinue the practice. As a result, the authorities in the Six Counties ceased to execute our warrants.

"This situation is one that can be remedied only by legislation. We see no objection in principle to such legislation applying to persons accused of offences that have no political complexion, but we think that in any such arrangement provision should be made

for the reciprocal enforcement of maintenance orders and some other matters of the same kind, and that there should be parallel legislation by the British and ourselves."

The question of extradition, however, Mr. Costello went on, stood on a different footing, and was governed by international law. Every State had the right to grant asylum to political offenders and to decide for itself what constituted a political offence, and it was common form for every extradition treaty to include a provision specifically excepting political offences from the category of extraditable offences.

He added : " I must emphasize that there can be no question of our handing over, either to the British or to the Six County authorities, persons whom they may accuse of armed political activities in Britain or in the Six Counties."

Lord Brookeborough issued the following statement on Dec. 1 in reply to Mr. Costello's speech to the Dail :

" It is an elementary principle of international law . . . that a country will not allow its citizens, or the citizens of any other country, to conduct a campaign of attack from within its boundaries against a neighbour. This is all the more necessary when, as Mr. Costello has admitted is the case in Eire today, the conduct of such a campaign constitutes a threat to the established Government of his country. I therefore regret that Mr. Costello did not announce the immediate intention of his Government to enforce the law in regard to illegal drilling and the illegal possession of arms and explosives

" The declared purpose of those who are advocating the use of force is to encourage armed attacks upon Northern Ireland. What possible object, therefore, can be served by any failure to deal promptly with open and undisguised illegal drilling ? Mr. Costello appears to be under the impression that expressions of condemnation from his Government and the Opposition will, of themselves, be sufficient to end the threats to use force. I do not share his optimism in this respect. . . . However, I welcome that part of his speech which appeals to all his people for the abandonment of violence in any form, and I would recommend the wisdom of following this excellent advice.

" I do not want to say anything which might lessen the force of his appeal, and so do not propose to deal at length with the contents of his statement. In spite of this fact, I would be failing in my duty to the people of Great Britain and Northern Ireland if I failed to express my regret that his appeal was prefaced by an attempt to lay the blame for the events and the behaviour which it deplores at our door. I would have much preferred that it had not been necessary for me to repudiate any allegation of the kind. Northern Ireland's Constitution and boundaries were established in 1920 and were freely accepted by the Southern Government and Parliament in the treaty of 1925. It is preposterous to suggest that, because we will not agree to surrender our rights, privilege and duties under that treaty, we are morally responsible for invasions of our territory by armed gangs from the South.

" I have repeatedly urged a policy of good-neighbourly relations between our two areas, based on the recognition that each should refrain from interference with the affairs of the other. We, for our part, have given practical proof of our readiness to co-operate in matters of common interest. The Southern Government must, however, realize that satisfactory relationships between us can never be achieved so long as they exclude from co-operation the supremely important matter of law and order. Their police force, and their local officers concerned with the enforcement and administration of the law, should be permitted and encouraged to extend to us the assistance and co-operation that are normal between friendly and neighbouring States. Such extraordinary happenings as arrangements being made by one party for secret inquests, surreptitious burials, and anonymous death certificates, where it is thought that the facts of such matters might be of assistance to the other, are without honour or profit to anyone.

" I am very glad indeed to note that the Southern Government are now prepared to discuss extradition arrangements between us. I am at a loss to understand what appears to be a suggestion by Mr. Costello that negotiations on this subject reached a deadlock over such matters as the scope of the arrangements and the manner in which effect was to be given to them. We have never, at any time, suggested that wider extradition powers should be provided for than those which are common to all international extradition arrangements, nor have we ever expressed any preference for any one form of machinery rather than another. The plain fact of the matter is that so far, in spite of all our efforts and every possible approach, it has been impossible to bring the Southern Government to the point of starting discussions on the subject. However, I am perfectly willing that we should both now assume that there has been some misunderstanding on one side or the other, without going into the question of which, and proceed to deal with the matter afresh. It will be very much to our mutual advantage if we can bring to an end the existing very unsatisfactory state of affairs."

A conference of newspaper editors in the Irish Republic was convened in Dublin on Dec. 2 by Mr. Costello. After reminding them that the " so-called I.R.A." was an illegal organization, the *Taoiseach* announced that the Government intended to invoke the provisions of the Offences against the State Act (1939) to prevent any publicity being given to the I.R.A. or other revolutionary bodies in the Irish Republic.

An explanatory statement was issued by the Government Information Bureau recalling that the I.R.A. was " an unlawful organization in respect of which a Suppression Order under the provisions of the Offences against the State Act, 1939, was made on June 22, 1939." The statement added : " The Act and Order referred to are still in force, and the Act contains a prohibition against printing or publishing certain kinds of matter . . . in relation to, or purporting to be contributed by or on behalf of, an unlawful organization."

A spokesman of the Ministry of Justice pointed out that the ban on any mention of the I.R.A. and similar organizations would apply not only to Eire newspapers but also to British and foreign newspapers and publications entering the Irish Republic. If such newspapers and publications did not observe the ban, copies of their editions circulating in the Irish Republic would be seized and destroyed, and the periodical concerned would be banned for a period not exceeding three months. The spokesman observed that publicity was the " breath of life " to illegal bodies such as the I R.A., and that the Government's action would " cut off the supply of oxygen " to these organizations.

The effect of the ban meant that no newspaper circulating in the Irish Republic would be allowed to use the description " I.R.A." or to publish any communications from the I.R.A. or other illegal organizations, except when discussed by the Dail. From time to time—e.g., after the raid on the Arborfield camp, in Berkshire (see 14405 A)—the Irish newspapers had published " communiqués " purporting to come from the " I.R.A. Command " and signed by a certain D. Macdiarmada, describing himself as " adjutant-general of the I.R.A." The last such " communiqué " was issued to the Press in Dublin on Nov. 27, when it was stated that the I.R.A. had " no connexion with the incident in Roslea " and that " no member of the army was involved."—(Belfast Telegraph - Northern Whig, Belfast - Irish Times, Dublin) **(Prev. rep. I.R.A., Arborfield Raid, 14450 A ; 14405 A ; Omagh Raid, 13975 A.)**

A. BRAZIL. — Supply of U.S. Agricultural Surplus Products on 40-year Credit.

An agreement was signed in Rio de Janeiro on Nov. 16 under which the U.S. Government agreed to supply Brazil with $41,220,000 worth of surplus agricultural products and to lend 76 per cent of the cruzeiro proceeds from the sale to Brazil, which would repay the money over 40 years.

An official statement said that the U.S.A. would sell to Brazil 500,000 metric tons (about 18,333,000 bushels) of wheat at $31,000,000 ; wheat flour to the value of $1,100,000 ; food grains worth $3,010,000, lard, $1,790,000 ; and tobacco, $250,000. Shipping charges would account for the remaining $4,070,000 Brazil would pay for the goods in cruzeiros as they were shipped, and the U S A would then lend to Brazil 76 per cent of the proceeds at interest rates varying from 3 to 5 per cent according to the method of repayment. Brazil would use the cruzeiros through her National Bank for Economic Development to finance long-term projects, and would repay the loan within 40 years.

The remaining 24 per cent of the cruzeiros (about $9,840,000) would be used to finance a number of U S. activities in Brazil, including the expenses of the U.S. Embassy and other agencies, purchases of strategic materials for the U S. stockpile, " activities related to the expansion and distribution of agricultural products in Brazil," and an expansion of cultural exchanges. The statement added that the agreement would cover Brazil's wheat requirements for the remainder of 1955 and the early months of 1956.

Although no details of the exchange rates to be used in calculating the cruzeiro payments were announced in the official statement, it was reliably reported in the U.S. Press that the rate would be 50.06 cruzeiros to the dollar.

B. WALES. — Cardiff recognized as Capital.

The Government's decision to recognize Cardiff as the capital of Wales was announced on Dec. 20 by the Home Secretary and Minister for Welsh Affairs (Major Gwilym Lloyd-George) in the following written answer to Mr. David Llewellyn (Labour, Cardiff North) :

" The Government have been impressed by the volume of support in Wales for the view that Cardiff is the city which should most appropriately be regarded as the capital of Wales. In deference to these views, the Government are prepared to recognize Cardiff as the capital of the Principality. No formal measures are necessary to give effect to this decision."

Wales, unlike Scotland, had never had an official capital, and the Government's decision to recognize Cardiff as such was warmly welcomed in that city and throughout the Principality. A ballot organized by the Association of Welsh Local Authorities in 1954 on the question of a capital for Wales (see 13575 C) had resulted in 134 votes for Cardiff, 11 for Caernarvon (where the Prince of Wales has been invested since the time of Edward I), four for Aberystwyth, and one for Swansea.—(Manchester Guardian - Western Mail, Cardiff) **(Prev. rep. 13575 C.)**

A. ETHIOPIA. — Silver Jubilee of Emperor Haile Selassie. - Promulgation of New Constitution.

The 25th anniversary of the accession of the Emperor Haile Selassie I was celebrated throughout Ethiopia on Nov. 3-5, a special service of thanksgiving being held in St. George's Cathedral in Addis Ababa. On Nov. 4 the Emperor promulgated a new Constitution—superseding that of 1931, which was adopted after his accession to the throne—at a special session of the Ethiopian Senate and Chamber of Deputies, the ceremony being attended by the Diplomatic Corps and by notables from all parts of the country.

The new Constitution, which had previously been adopted by the Ethiopian Parliament, consists of 131 Articles and introduces a number of important reforms, including the following: the principle of ministerial responsibility to Parliament; the broadening of the Chamber of Deputies; the introduction of free, secret, and universal suffrage; the extension of the franchise to women; the independence of the judiciary; recognition of full civic rights for all Ethiopians without distinction of race or creed; recognition of the fundamental human rights and freedoms, embodied in a special Bill of Rights incorporated in the Constitution; and the suppression of all feudal practices. The Emperor also announced that the civil, penal, commercial, and maritime laws would be codified by European jurists. The Ethiopian Orthodox Church (founded in the fourth century) remained the established State Church, though full religious freedom was guaranteed to all citizens.

Certain important prerogatives were retained by the Emperor, including the supreme direction of foreign affairs, the right to conclude and ratify treaties with foreign Powers, the right to dissolve Parliament, and the appointment of Cabinet Ministers and judges. The Emperor also retained powers to promulgate decrees in an emergency when Parliament was not in session, with the proviso that such decrees would subsequently have to be ratified by Parliament.

The present Ethiopian Chamber of Deputies has 60 members, elected on a restricted franchise and chosen largely by official nomination The 30 Senators are nominated by the Emperor.

In promulgating the new Constitution, the Emperor reviewed Ethiopia's progress during the 25 years of his reign in his speech to the joint session of Parliament. Extracts are given below (cross-headings inserted):

Development of Social Services and Communications. "Nearly a quarter of a century ago we granted to our beloved people the first Constitution in the history of this 3,000-year-old Empire. Today . . . we are pleased to proclaim a revised Constitution consolidating the progress achieved, and preparing the way for further advance. Since our first and foremost objective is the welfare and prosperity of our people, it has been our constant aim to strengthen the economic and educational foundations of our country and to improve the standard of living of our people. In consequence of this programme, the population of the Empire has increased during the period under review. . . . This increase has been due, in part, to the introduction, not only of the latest techniques in medicine and public health, but also of facilities which did not exist here 25 years ago. For instance, the number of hospitals and clinics which existed then did not exceed 48, whereas today there are 240 hospitals and clinics throughout the Empire. The result of these measures has been an increase in the span of life, a reduction of infant mortality, and an overall increase in the national population . .

Today there are 35 times as many schools as existed 25 years ago. Before the war the number of students pursuing their studies abroad was limited to a few score. Today large numbers of our youth are pursuing higher studies abroad Some have completed their studies and are back home, rendering services to their country in various capacities. . . .

We now have a national network of telephone and radio communications. Today there are more roads in Ethiopia than anywhere else in East Africa. To these achievements must be added the outstandingly successful airlines. As a result, Ethiopia is not weeks but hours from the world capitals, and foreign nationals are able to visit our country without difficulty.

Industrial Expansion. Not only have the resourcefulness, initiative, and enterprise of Ethiopian subjects during this period resulted in the introduction and establishment of new industries, but also foreign capital has in recent years been coming to Ethiopia in ever-increasing amounts, although not to the extent of our expectations. The face of our cities and of our countryside is being transformed through the construction of imposing industrial establishments, mining installations, and mechanized agricultural projects. Plans have now reached the stage of execution for an ambitious national programme of hydro-electric development and of irrigation

Trade and Finance. With regard to foreign trade, Ethiopia has won for her products a place in world markets which greatly exceeds our expectations. . . . She has entered these markets with entirely new products and on a scale exceeding the most optimistic predictions of 25 years ago. For example, Ethiopia's exports of fresh vegetables, meat, and other fresh foodstuffs, in one year alone, exceed the entire exports in one year before the war of coffee or hides As regards coffee, the value of the annual crop exported has increased over tenfold in the 25-year period under review. Exports generally have increased by nearly the same amount. Even in the much shorter period of the last nine years, exports have quadrupled, as have imports, the former rising from $37,000,000 in 1946 to $169,000,000 in 1954, and the latter from $36,000,000 to $137,000,000

Similarly, and as a concomitant development, the financial picture has been completely transformed during the past 25 years, notwithstanding the incredible hardships and sacrifices imposed by the occupation and the subsequent bleak years following the liberation Whereas, before the war, the National Budget did not exceed $5,000,000, today it exceeds $100,000,000. Money in circulation has increased from $80,000,000 in 1946 to over $220,000,000 in 1954 In that same period our holdings of gold have increased by approximately 20 times.

Need for New Constitution. It is obvious that Ethiopia, and indeed the Government itself, has burst out of the limits imposed by a Constitution promulgated under vastly different conditions However, this progress calls for increasing governmental supervision and control, as is evidenced by the ever-increasing number of laws governing the protection of property and of national and foreign investments; the legislation governing limited liability corporations; the establishment and supervision of commercial and industrial corporations, guarantees for monetary stability, etc This development is also reflected in the growth of the judicial system. During the last 12 years . . . the courts of our Empire, including Moslem or *Sharia* courts, have grown in numbers from 182 to 593 In other words, this great material development has required a simultaneous development not only of the judiciary, but also of the other branches of government charged with the responsibility of fostering and protecting this thriving plant of national economy.

In yet other ways the developments of the past 25 years have called for an ever-increasing expansion of the Governmental framework. Many of you will recall the state of the organization which existed 25 years ago as regards the Ministries of our Empire. These were not only few in number, but greatly understaffed. Today, although much remains to be accomplished, 14 Ministries, housed under far more adequate conditions and with an ever-growing and increasingly trained staff of Civil Servants, are seeking to cope with the ever-widening perspectives of national development. Similarly, the Army of 25 years ago, although valiant, was inadequately armed and lacked adequate numbers of officer cadres and training. Today that situation has been vastly improved, to the extent even that Ethiopia has been able to send a contingent to participate in the United Nations effort in Korea This development has required an ever-increasing expenditure and heavy sacrifices, but we will resolutely pursue to completion, regardless of cost and obstacles, the programme for the modernization of our armed forces.

The growth in the size and responsibilities of the Government has necessitated the strengthening of the processes of centralization All regions of the Empire are now closely knit together under a single unified direction capable of guiding them along parallel lines of progress and integrating all into a common national endeavour In addition, all vestiges of feudalistic and other class or personal privileges have been wiped out, so that all our beloved subjects may live together as equals and brothers in the same family.

Ethiopia's international horizons have been enormously expanded during our reign. Twenty-five years ago Ethiopia was still a little-known corner of the dark continent of Africa. Through her courageous resistance against aggression, and through our appeal to the world founded on respect for international morality and collective security, Ethiopia has achieved imperishable fame. The world has come to recognize the moral stature and greatness of the Ethiopian people. In consequence, we have been able to rectify certain of the crying injustices perpetrated against our country during the iniquitous period of imperialism against which Ethiopia, under our leadership, had to fight alone. No longer is Ethiopia a land-locked country. Two ports on the Red Sea are being developed to handle the rapidly expanding foreign trade of Ethiopia to which we have referred. With the rectification of 60 years of injustice, and with the return of our devoted Eritrean subjects, Ethiopia has known, once again, that national unity and coherence which she has enjoyed since before the time of Christ.

Here again, however, the increase in population, territory, and national responsibilities has called for a broader concept of governmental organization. For example, problems connected with a maritime frontier, the development of ports, of naval forces and of a merchant marine, did not exist until recently. Today the Government must be remodelled to take these developments into consideration. Engineering skills and administrative supervision of a high order are involved, as well as the establishment of a Naval Academy, a Coast Guard Academy, and Marine and Fisheries Administrations.

In other words, the past 25 years have been characterized by material—including commercial, industrial, and financial—progress, a steeply ascending curve of cultural and political development, an expanded population and national territory, and ever-widening international horizons. Ethiopia, under our guidance, must consolidate this progress. She must do more. She must advance yet further. To assure the progressive welfare of our beloved people is our sole aim in life. There can be no justification for any Government, whatever its form, except that of ensuring and promoting the welfare of its subjects.

The Revised Constitution. Obviously, the structure of the Government itself must grow in size and power To do so we must broaden and strengthen the bases of all three branches of government . the Executive, Legislative, and Judiciary. The revised Constitution which we have promulgated reflects these preoccupations and enlarges and consolidates the Government

In this revised Constitution we have not only sought to provide the essential conditions for effective work by Ministers and Government officials, but at the same time to provide that Ministers shall be responsible to us and to the State for the proper fulfilment of their functions Close collaboration between the Executive and Legislative branches of all modern Governments has become an ineluctable necessity In order to work intelligently in the drafting of laws, Parliament must be acquainted with problems as viewed by the Executive Consequently, we have provided that Ministers, on their own initiative or at the request of Parliament, may appear before it to explain these matters It is our hope that this procedure will serve to co-ordinate the Executive and Legislative processes, and that, with the explanations which our Ministers may from time to time furnish to Parliament, this latter body will be able, more intelligently and with a fuller knowledge of the facts and circumstances involved, to devise legislation more responsive to the exigencies of the present hour and to the needs of the future

We have mentioned the rapid expansion of legislation in social and economic fields New industries, the accumulation of wealth, the acquisition of a maritime frontier and of ports, the existence of new fields of social endeavour, and, finally, problems of international import, including treaties and other international commitments, have all served to broaden the responsibilities of Parliament and to demand from the members thereof greater social, economic, national, and indeed, international vision

To respond to these problems, we have sought in two ways to strengthen the Legislative branch of the Government first, by organizational improvements, and secondly, by a broadening of the parliamentary functions. We have provided for a substantial increase in the size of both Houses of Parliament Perhaps even more important, we have provided for direct elections to the Chamber of Deputies, by secret ballot, throughout the Empire upon the basis of universal suffrage In order that these provisions should be promptly translated into reality, we have prepared a national electoral law for consideration and approval by Parliament.

The Constitution contains provisions to ensure that all parts of the Empire shall receive their due representation in Parliament, and that there shall be no discrimination whatsoever amongst racial or religious groups. Furthermore . . we have provided that there shall be no discrimination among Ethiopian subjects with respect to the enjoyment of all civil rights or citizenship It is our steadfast aim that all citizens of the Empire shall live together as brothers in one large family

In order that every member of Parliament shall feel himself free to carry out his responsibilities to the nation, without fear or favour, we have provided for the traditional system of parliamentary immunities as consecrated by the original Constitution and by the practice in other countries of the world

Finally, by detailed provisions, we have established means for resolving differences of opinion between the two Houses of Parliament. In this matter we have followed time-honoured precedents from the parliamentary systems of other countries with bicameral legislatures. It is essential that the two Houses should work together in harmony for the national interest They should not constitute warring or antagonistic elements. Those elected by the people must also benefit by the advice of those to whom long years of experience in government administration and positions of responsibility have given wisdom and insight

Such, then, are the concepts which we have adopted in respect of the reorganization of Parliament There is, however, another aspect of this problem of strengthening the bases and enhancing the importance of Parliament. We refer to the role which Parliament itself, as reorganized, will be called upon to play in the legislative process. We have envisaged, and provided for, a broadened role of Parliament in respect of the law-making functions. We have continued the well-established precedent that no law may go into effect without the approval of both Houses of Parliament In addition, we have maintained the principle that every decree promulgated for reasons of emergency in the absence of Parliament [i.e. by the Emperor himself] must, in every case, be promptly submitted to Parliament for its consideration . Furthermore, we have provided that all legislation involving an increase in governmental expenditure, or new or increased taxation, shall first come before the Chamber of Deputies.

In the revised Constitution it is provided that, before entering into force, the approval of both House of Parliament shall be required in respect of all treaties and international agreements affecting Ethiopian subjects personally, or modifying existing legislation, or requiring expenditure of State funds, or involving loans or monopolies, or modifying the territory of the Empire or its sovereignty or jurisdiction over any part of its territory, and in respect of all peace treaties.

Although the original Constitution already contained provisions on Human Rights and Fundamental Liberties, the revised Constitution contains provisions adopted in the most advanced countries of the world for the protection of Human Rights. . . . No fewer than 29 Articles have been inserted in the Constitution to provide for the protection of the liberties and rights of the people. For example, we have provided that ' no-one shall be denied equal protection of the laws ', that ' there shall be no discrimination amongst Ethiopian subjects with respect to the enjoyment of all civil rights ', that ' there shall be no interference with the exercise in accordance with the law of the rites of any religion or creed by residents of the Empire '; that ' freedom of speech and of the press is guaranteed throughout the Empire, in accordance with the law ', that ' correspondence shall not be subject to censorship except in time of national emergency.' We have, moreover, confirmed our practice that every person accused of a crime shall be presumed innocent until proved guilty, and that no-one shall be imprisoned for debt except in cases of legally proved fraud.

Unlike many countries of the world, we have given every resident of the Empire the right to sue the Government, or any ministry, department, or agency thereof, for wrongful acts resulting in substantial damage Similarly, everyone in the Empire shall have the right to present petitions to us. So important have we considered these guarantees of Human Rights and Fundamental Liberties that, in the revised Constitution, we have stipulated that not only the courts but, in particular, ourselves, shall at all times assure and protect these Human Rights They constitute principles which no branch of government, be it the Executive, Legislative, or Judiciary, can transgress, and which, in consequence, must be placed under the particular protection of the Sovereign himself. We will always be ready to act positively to ensure respect for these rights by all branches and every official of the Government Thus the lowliest subject of the Empire, the poorest as well as the richest, even the convict in prison, has always the assurance that the Sovereign is at all times vigilant in the protection of his rights and fundamental liberties . . .

We have been alive to the realization that no document, however profound and comprehensive, can of itself bring about far-reaching and fundamental constitutional progress No constitutional progress can take effect unless it is rooted in the traditions, customs, habits, predilections, and legal concepts of the society upon which it is based The great liberal regimes of France and the Anglo-Saxon countries, and the great contributions which they have made in the development of political thought, have been based not only on strictly constitutional concepts, but also on the broader and all-pervading philosophy of civil and penal law, a philosophy based on the sanctity of the individual Conscious of the broader implications of constitutional reform, and of the necessity of providing means by which it may take root, we have called upon the services of the most enlightened jurists of Europe to codify, under our direct supervision and in the light of Ethiopian age-old traditions and of her present-day and future needs, the civil, penal, commercial and maritime laws of the Empire. The work undertaken and already accomplished has been gigantic, and we expect shortly to receive the final fruits of all these labours for the benefit of our beloved people. . "

In addition to the above-mentioned constitutional reforms, four Imperial proclamations were issued on Nov. 13. In the first, the Emperor proclaimed that all peasants working farms up to 40 hectares (98.8 acres) would receive full title to the land, whilst those working farms in excess of 40 hectares would receive ownership title to the greater part of their land. The new peasant proprietors were given exemption from all taxation until 1957. The second proclamation announced the creation of several agricultural credit banks and the abolition of the State monopoly for banking, thereby enabling foreign banks to open branches in Ethiopia. The third proclamation announced a general amnesty for prison sentences, under which persons serving sentences of life imprisonment had them reduced to 20 years, whilst those serving more than ten years' imprisonment had their sentences reduced by three years. Under the fourth proclamation, education was made free and compulsory for all children between the ages of seven and 18. (Imperial Ethiopian Embassy, London - Times - Le Monde, Paris - New York Times - Neue Zurcher Zeitung)

(Prev. rep. H.M. Haile Selassie, 14026 D.)

A. UNITED KINGDOM. — Gold and Dollar Reserves in November. - Fall of $14,000,000.

The sterling area had a gold and dollar deficit in November of $14,000,000 after taking account of (*a*) $2,000,000 received in U.S. defence aid, (*b*) the payment of $32,000,000 to the E.P.U., representing that part of the October deficit which had to be settled in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result, the sterling area's gold and dollar reserves fell to $2,283,000,000 on Nov. 30.

Provisional figures for the E.P.U. November settlement showed that the U.K. had a deficit of $11,200,000 (£4,000,000), which would be settled in December three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.—(Treasury Press Office) **(Prev. rep. 14524 F.)**

B. SOVIET UNION. — Reduction of Armed Forces.

Moscow Radio announced on Dec. 12 that the Soviet Union had carried out its decision, announced on Aug. 13, to reduce the armed forces by 640,000 men to aid industry and agriculture. (Times) **(Prev. rep. 14384 C.)**

A UNITED KINGDOM. — Gas Industry. - Report and Accounts of Gas Council and Area Boards for 1954-55. - Surplus of £2,472,553. - Proposed Use of Gas from Oil Refineries. - Investigations into Use of Natural Gas. - Further Issue of Gas Stock.

The sixth annual report and accounts of the Gas Council and the 12 Area Boards, covering the year ended March 31, 1955, were published on Oct. 18. They showed that the gas industry as a whole had earned a net surplus of £2,472,553 (compared with a net surplus of £2,111,536 in 1953-54), bringing the cumulative disposable surplus since Vesting Day to £10,965,244.

The total net surplus for the year was achieved after charging £18,457,944 for depreciation and £14,761,037 for interest, and after two Area Boards had set aside a total of £150,000 for taxation, whilst two others had transferred back to revenue account £722,489 previously set aside for taxation purposes but no longer required for this. Ten of the Area Boards earned surpluses totalling £2,732,355, but the remaining two—the West Midland and North Thames Boards—incurred deficits totalling £259,802. The largest trading surplus (£1,027,784) was made by the North-Western Board, whilst the Scottish Board reported a trading surplus (£388,874) for the first time since nationalization.

Salient points from the report are summarized below.

Revenue. Gross revenue totalled £325,280,000 (compared with £297,400,000 in 1953-54), comprising £180,600,000 from the sale of gas (£170,100,000), £92,300,000 from disposal of by-products (£83,100,000), £36,600,000 from sales and hire-purchase of appliances, (£29,500,000), and £15,800,000 from other sources (£14,700,000).

Costs and Prices. As a result of higher coal prices and wages, costs increased during the year by £7,165,000 The report estimated that further increases in costs since March 31, 1955, would total about £25,023,000 in a full year, including about £17,700,000 to cover higher coal prices since July In this connexion, the report stated that the gas industry's bill for coal at the pithead would now be about £47,000,000 more than it would have been at Vesting Day prices. All the Area Boards had adjusted their selling prices to take account of the increases

Consumption. Sales of gas totalled 2,636,300,000 therms (2,513,300,000 therms in 1953-54), industrial consumption having risen by 9.3 per cent to 720,000,000 therms, representing 28 per cent of total sales. Sales to domestic consumers rose from 1,347,500,000 therms in 1953-54 to 1,373,500,000 therms.

Capacity and Efficiency of Plant. Total manufacturing capacity increased by 2 2 per cent during the year, but a further 83 small and less efficient gasworks were closed, reducing the number of works in operation to 785, compared with 1,050 taken over on nationalization. In addition, a great deal of older plant was being scrapped and replaced.

Capital Expenditure. The expansion and modernization programmes continued to involve heavy capital expenditure, and £55,300,000 had been spent in 1954-55 on fixed assets, bringing the total amount thus spent since nationalization up to £258,900,000 The report stated, however, that the development programme was now being reviewed in conjunction with the Minister of Fuel and Power, and it was probable that the peak of capital investment had been reached.

Sales of Appliances and Hire Purchase. Sales of appliances reached the record total of £36,620,209, and hire-purchase transactions outstanding had increased from £34,580,004 to £44,220,502. The re-imposition of hire-purchase restrictions in February, however, had had a "substantial effect" on subsequent hire-purchase sales.

Smoke Abatement and Coke Supplies. Stressing that the gas industry intended to produce as much coke as possible as a contribution to the smoke abatement campaign, the report stated that a special panel was now investigating methods of increasing coke supplies, particularly to domestic consumers If enough suitable coal could be obtained at a reasonable price, it was believed that the industry could expand its production of gas and coke sufficiently to solve the problem of the "black" areas in 10 to 15 years.

Gasification of Heavy Oil. In view of the difficulties of the coal position, the gas industry had concentrated its research and development work on the possibility of making more efficient use of coal and on discovering other sources of gas-making. Emphasis had been placed on the gasification of heavy oils, and five plants with a daily capacity of 5,000,000 cu. ft. were already at work, with 16 more with a daily capacity of 26,000,000 cu. ft. on order. It was expected that these plants would together save about 364,000 tons of coal annually.

Employees. The number of persons employed in the industry at March 31, 1955, was 143,373, a reduction of 1,653 during the year and of 4,559 since nationalization. The report pointed out that the 5 per cent increase in gas sales during the year had been achieved in spite of a 3 per cent reduction in the number of employees.

Other recent developments in connexion with the gas industry are summarized below:

Natural Gas. Mr. H. F. H. Jones, deputy-chairman of the Gas Council, stated on Oct. 16 that drillings for natural gas had been made during the year at Crowborough (Sussex) but "could not now be regarded as promising" Drillings would shortly be begun, however, at Hunmanby, near Filey (Yorkshire) He added that the possibility of importing frozen natural gas from the Middle East was still under consideration, and that investigations into transport problems were being carried out by the North Thames and South-Eastern Gas Boards

Gas from Oil Refineries. The South-Eastern Gas Board announced on March 15 that it was investigating the practicability of building a plant at the British Petroleum Co 's Isle of Grain (Kent) oil refinery to convert petroleum products into town gas The initial installation would probably have a capacity of about 15,000,000 cu ft daily (to be increased later to 45,000,000 cu ft), which would be fed into the Board's grid at Strood (Kent) and would help to supply an area covering South London and parts of Kent, Surrey, and Sussex

The Southern Gas Board announced on Oct 18 that it had agreed "in principle" with the Esso Petroleum Co for "tail gas" (at present burnt to waste) from the company's Fawley refinery to be supplied through the Board for domestic use The quantity of gas involved was estimated at about 8,000,000 cu ft daily—enough to supply about 80,000 households, with a probable coal-saving of 70,000 tons annually

The Gas Council announced on July 13 the issue of £100,000,000 British Gas 4 per cent Guaranteed Stock, 1969-72, at 98 per cent, the proceeds of which would be used to repay temporary borrowings of about £70,940,000 by the Council on behalf of the 12 Area Boards, to meet capital expenditure by the Council and the Boards, to provide working capital, and for other authorized expenses. The issue was slightly over-subscribed.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 1953-54 Report, 13877 A.)**

B. JAPAN. — Trade Union Movement.

The Information Bulletin of the Japanese Embassy in London published on Dec. 1 a survey of the Japanese trade union movement, a summary of which is given below.

Of a total of about 7,000,000 trade union members, it was stated that some 3,000,000 were affiliated to the General Council of Trade Unions of Japan (*Sohyo*), which supports the former Left-wing Socialists; that about 670,000 were affiliated to the Japan Trade Union Congress (*Zenro*), which, together with the Japan Federation of Trade Unions (*Sodomei*), supports the former Right-wing Socialists; that about 42,000 workers belonged to the National Federation of Industrial Organizations (*Shin San-betsu*), supporting the former Left-wing Socialists; and that the pro-Communist Congress of Industrial Unions of Japan had about 9,000 members. In addition there were a number of unaffiliated "neutral" unions.

The two largest labour organizations were thus the *Sohyo* and *Zenro*, but, in spite of the recent merger of the two Socialist parties, the antagonism between the trade union groups hitherto supporting one or the other party had so far remained unchanged. The *Sohyo*, at its convention in July, had emphasized the need for unifying the trade union movement, but the *Zenro* remained opposed to any unification centring on *Sohyo* and maintained that, in view of fundamental objections to *Sohyo* policies, the only sound way towards creating a united labour front was the expansion and strengthening of *Zenro* itself. The *Sodomei*, however, adopted a resolution on Oct. 28 recognizing the need to co-operate with the united Socialist Party, and the executive council of *Zenro* had subsequently adopted a similar attitude.

All affiliates of *Zenro* are members of the International Confederation of Free Trade Unions, to which six of the *Sohyo* member-unions are also affiliated. Although the *Sohyo* was previously critical of ICFTU policies, it now advocates co-operation with all trade union organizations on an international scale, regardless of whether they are affiliated to the ICFTU or to the (Communist-dominated) World Federation of Trade Unions.—(Japanese Embassy, London)

(Prev. rep. Socialist Party Merger, 14531 A.)

C. ARGENTINA. — Cabinet Appointments. - New Chief of General Staff.

President Aramburu's Government was completed on Nov. 10 with the appointment of Captain Alvaro Carlos Alzogaray as Minister of Industry. It was subsequently announced that Dr. Laureano Landaburu, jr., had been appointed Minister of Justice (a portfolio held temporarily by the Minister of the Interior, Dr. Busso), and that the Minister of Health and Social Welfare, Brigadier-General Manuel A. Argibay Molina, had resigned and been replaced by Dr. Francisco Martinez.

General Roberto Dalton was appointed Chief of the General Staff on Nov. 15 in succession to President Aramburu.
(Bank of London and South America. - New York Times)

(Prev. rep. 12553 A.)

DECEMBER 24—31, 1955

A. UNITED KINGDOM. — Government Changes.

A major reorganization of the Government—the first since Sir Anthony Eden took office as Prime Minister—was announced on Dec. 20, the new appointments being as follows:

Mr. R. A. Butler . ..	Lord Privy Seal and Leader of the House of Commons.
Mr. Harold Macmillan ..	Chancellor of the Exchequer.
Mr. Selwyn Lloyd ..	Foreign Secretary.
Sir Walter Monckton ..	Minister of Defence.
Mr. Iain Macleod	Minister of Labour and National Service.
Lord Selkirk	Chancellor of the Duchy of Lancaster.
Mr. Patrick Buchan-Hepburn	Minister of Works.
Mr. Nigel Birch ..	Secretary of State for Air.
Mr. J. A. Boyd-Carpenter	Minister of Pensions and National Insurance.
Mr. Robert Turton . .	Minister of Health.
Mr. Harold Watkinson ..	Minister of Transport and Civil Aviation.
Mr. Aubrey Jones .. .	Minister of Fuel and Power.
Mr. John Hare ..	Minister of State, Colonial Office.

Six former Ministers left the Government—Lord Woolton, formerly Chancellor of the Duchy of Lancaster; Mr. Harry Crookshank, formerly Lord Privy Seal and Leader of the House of Commons; Mr. Osbert Peake, formerly Minister of Pensions and National Insurance; Lord De L'Isle and Dudley, V.C., formerly Secretary of State for Air; Mr. Geoffrey Lloyd, formerly Minister of Fuel and Power; and Mr. Henry Hopkinson, formerly Minister of State for Colonial Affairs.

It was also announced that the Queen had approved the conferment of an earldom on Lord Woolton; that viscounties would be conferred upon Mr. Crookshank, Mr. Peake, Mr. J. P. L. Thomas (First Lord of the Admiralty), and Lord De L'Isle and Dudley, V.C.; that a barony would be conferred on Mr. Hopkinson; and that Lord Selkirk, Mr. Harold Watkinson, Mr. Aubrey Jones, and Mr. John Hare would become Privy Councillors. Mr. Jones and Mr. Hare entered the Government for the first time.

Mr Butler (53), who succeeded Mr Crookshank as Lord Privy Seal and Leader of the House of Commons, will be responsible for planning and carrying through the Government's legislation during the next few years, and also for the policy direction of the Conservative Central Office. He will continue, as hitherto, to preside over the Cabinet in the absence of the Prime Minister Mr Butler had been Chancellor of the Exchequer since 1951.

Mr. Macmillan (61), who succeeded Mr Butler as Chancellor of the Exchequer, will have full responsibility—under the Prime Minister—for co-ordinating all aspects of economic policy, internal and external. Mr. Selwyn Lloyd (51), formerly Minister of Defence, and prior to that Minister of State, Foreign Office, took over the Foreign Secretaryship from Mr Macmillan, and will accompany the Prime Minister on his visit to the U S A and Canada in the New Year (see 14566 B). Sir Walter Monckton (64), who took over the Ministry of Defence from Mr. Selwyn Lloyd, had been Minister of Labour and National Service for over four years, in which capacity he had had to cope with many industrial disputes and wage negotiations. The Earl of Selkirk (49), Paymaster-General since 1953, succeeded Viscount Woolton as Chancellor of the Duchy of Lancaster

Mr. Iain Macleod (43), the new Minister of Labour and National Service, had been Minister of Health for over three years His former portfolio was taken by Mr. Robert Turton (52), formerly Parliamentary Under-Secretary of State, Foreign Office Mr. Buchan-Hepburn (54), former Parliamentary Secretary to the Treasury, and Government Chief Whip, succeeded Mr. Nigel Birch as Minister of Works, whilst Mr. Birch (49) became Secretary of State for Air in place of Lord De L'Isle and Dudley

Mr. Boyd-Carpenter (47), formerly Minister of Transport and Civil Aviation, succeeded Mr. Osbert Peake as Minister of Pensions and National Insurance, whilst Mr. Harold Watkinson (45), formerly Parliamentary Secretary to the Ministry of Labour and National Service, succeeded Mr. Boyd-Carpenter as Minister of Transport and Civil Aviation

Mr Aubrey Jones (M.P. for Hall Green, Birmingham) became Minister of Fuel and Power in succession to Mr Geoffrey Lloyd, whilst Mr. John Hare (M P. for Sudbury and Woodbridge) succeeded Mr Hopkinson as Minister of State at the Colonial Office. Mr. Jones (44), the son of a Welsh miner, was educated at a Merthyr Tydfil secondary school and the London School of Economics; he was economic director of the British Iron and Steel Federation at the time of his appointment to the Government. Mr. Hare (44), a brother of the Earl of Listowel, was formerly vice-chairman of the Conservative Party Organization. Both were prominent Conservative back-benchers prior to their ministerial appointments.

The Cabinet continued to have 18 members, as hitherto, whilst 19 Ministers were not of Cabinet rank. The membership of the reconstructed Government was as follows:

The Cabinet.—Sir Anthony Eden (Prime Minister), Lord Salisbury (Lord President of the Council), Mr R. A. Butler (Lord Privy Seal), Mr Harold Macmillan (Chancellor of the Exchequer), Lord Kilmuir (Lord Chancellor), Mr Selwyn Lloyd (Foreign Secretary), Major Gwilym Lloyd-George (Home Secretary and Minister for Welsh Affairs), Mr James Stuart (Secretary of State for Scotland), Lord Home (Secretary of State for Commonwealth Relations), Mr. Alan Lennox-Boyd (Colonial Secretary), Sir Walter Monckton (Minister of Defence), Mr Duncan Sandys (Minister of Housing and Local Government), Mr Peter Thorneycroft (President of the Board of Trade), Mr. Heathcoat Amory (Minister of Agriculture, Fisheries, and Food), Sir David Eccles (Minister of Education), Mr. Iain Macleod (Minister of Labour and National Service), Lord Selkirk (Chancellor of the Duchy of Lancaster), and Mr. Patrick Buchan-Hepburn (Minister of Works)

Ministers not in the Cabinet. Mr. J P. L Thomas (First Lord of the Admiralty), Mr Antony Head (Secretary of State for War), Mr. Nigel Birch (Secretary of State for Air), Mr. Reginald Maudling (Minister of Supply), Mr. Aubrey Jones (Minister of Fuel and Power), Mr Harold Watkinson (Minister of Transport and Civil Aviation), Mr J. A. Boyd-Carpenter (Minister of Pensions and National Insurance), Mr Robert Turton (Minister of Health), Dr. Charles Hill (Postmaster-General), Lord Reading and Mr Anthony Nutting (Ministers of State, Foreign Office), Lord Strathclyde (Minister of State, Scottish Office), Mr. John Hare (Minister of State, Colonial Office), Mr Austin Low (Minister of State, Board of Trade), Lord Munster (Minister without portfolio), Sir Reginald Manningham-Buller (Attorney-General), Sir Harry Hylton-Foster (Solicitor-General), Mr W R Milligan (Lord Advocate), and Mr William Grant (Solicitor-General for Scotland), in addition to the new Paymaster-General (succeeding Lord Selkirk) when appointed.

The following junior ministerial appointments were announced at the same time:

Mr. George R Ward (48) .	Parliamentary and Financial Secretary, Admiralty.
Mr. Christopher Soames (35)	Parliamentary Under-Secretary of State, Air Ministry.
Commander A H P. Noble (47)	Parliamentary Under-Secretary of State, Commonwealth Relations Office
Mr. A. D. Dodds-Parker (47) .	Parliamentary Under-Secretary of State, Foreign Office.
Mr. David Renton (47) .	Parliamentary Under-Secretary of State, Ministry of Fuel and Power
Mr W F. Deedes (42) .	Parliamentary Under-Secretary of State, Home Office.
Mr. J E Powell (43) .	Parliamentary Secretary, Ministry of Housing and Local Government.
Mr. Robert Carr (39) . ..	Parliamentary Secretary, Ministry of Labour and National Service.
Miss Edith Pitt (49) and Mr Richard Wood . .	Joint Parliamentary Secretaries, Ministry of Pensions and National Insurance.
Mr. C. J. M. Alport (43) .	Assistant Postmaster-General
Mr. E. R. G. Heath (39) .	Parliamentary Secretary, H.M. Treasury.

Junior ministerial changes were as follows · Mr. Ward succeeded Commander Noble; Mr. Soames (a son-in-law of Sir Winston Churchill) succeeded Mr Ward; Commander Noble succeeded Mr. Dodds-Parker; Mr Dodds-Parker succeeded Mr. Turton, now Minister of Health; Mr Renton succeeded Mr Joynson-Hicks, resigned, Mr Deedes succeeded Sir Hugh Lucas-Tooth, resigned; Mr Enoch Powell succeeded Mr. Deedes; Mr. Robert Carr succeeded Mr. Watkinson, now Minister of Transport and Civil Aviation; Miss Edith Pitt and Mr. Wood succeeded Mr Ernest Marples, resigned, and Brigadier J. G. Smyth, V C., resigned; Mr. Alport succeeded Mr. David Gammans, resigned, Mr. Heath succeeded Mr. Buchan-Hepburn, now Minister of Works.

The holders of the following junior ministerial offices remained unchanged:

Admiralty—Civil Lord (Mr. Wingfield Digby); Agriculture, Fisheries and Food—Parliamentary Secretaries (Mr. G. H R. Nugent, Lord St Aldwyn, Mr Harmar Nicholls); Colonial Office—Under-Secretary (Lord Lloyd); Defence—Parliamentary Secretary (Lord Carrington); Education—Parliamentary Secretary (Mr. Dennis Vosper); Foreign Office—Joint Under-Secretary (Lord John Hope); Health—Parliamentary Secretary (Miss Patricia Hornsby-Smith), Home Office—Under-Secretary for Welsh Affairs (Lord Mancroft); Scottish Office—Under-Secretaries (Mr Niall Macpherson, Mr. Henderson Stewart, Mr. J. N. Browne); Supply—Parliamentary Secretary (Mr. F. J. Erroll); Board of Trade—Parliamentary Secretary (Mr. D. Walker-Smith); Transport and Civil Aviation—Parliamentary Secretary (Mr. Hugh Molson) and Parliamentary Secretary for Civil Aviation (Mr. John Profumo); Treasury—Financial Secretary (Mr. Henry Brooke), Economic Secretary (Sir Edward Boyle), and Lords Commissioners (Mr. Martin Redmayne, Mr. Richard Thompson, Mr. Gerald Wills, Mr. Peter Legh); War Office—Under-Secretary (Mr. Fitzroy Maclean); Works—Parliamentary Secretary (Mr. J. R. Bevins). There were also no changes in the holders of appointments in H.M. Household.

A further announcement on Dec. 21 stated that the Queen had approved the conferment of baronetcies on Mr. David Gammans (the former Assistant Postmaster-General), Mr. L. W. Joynson-Hicks (the former Parliamentary Secretary to the Ministry of Fuel and Power), and Brigadier J. G. Smyth, V.C. (former Joint Parliamentary Secretary to the Ministry of Pensions and National Insurance), and that Mr. Edward Heath would be made a Privy Councillor. It was understood that Mr. Geoffrey Lloyd had declined a peerage because of his wish to remain in the House of Commons.

The Government changes reduced the average age of the Cabinet from 55 years eight months to 54 years four months. As stated above, the Cabinet continued to have 18 members, the only difference being that the Minister of Works (Mr. Buchan-Hepburn) will sit in the Cabinet instead of the Minister of Pensions and National Insurance. It was announced that Mr. Edward Heath, the new Parliamentary Secretary to the Treasury, would succeed Mr. Buchan-Hepburn as Government Chief Whip. Mr. Heath had been deputy Chief Whip since 1953.

Four by-elections will be necessary as a result of the Government changes—at Gainsborough, Leeds North-East, Hereford, and Taunton, owing to the conferment of peerages on Mr. Crookshank, Mr. Osbert Peake, Mr. J. P. L. Thomas, and Mr. Hopkinson respectively. Two other by-elections are also pending—at Walthamstow West, caused by the conferment of an earldom on Mr. Attlee (see 14583 A), and at Blaydon (Durham), caused by the death of Mr. William Whiteley, the former Labour Chief Whip.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Eden Cabinet, 14129 A)**

A. DENMARK. — The "Copenhagen Clock."

The most accurate and elaborate clock ever made, claimed to lose only one second in 1,000 years, was officially started in Copenhagen Town Hall on Dec. 15 by King Frederick of Denmark. In addition to measuring local time in all parts of the world (Middle European Time, Greenwich Mean Time, etc.) it shows star time for different latitudes, times of sunrise and sunset, the day and year both by the Julian and Gregorian calendars, the positions of the planets and stars, and the phases of the moon. The clock also incorporates a calendar for 570,000 years, showing all movable feasts (e.g. Easter); indicates on which day any date within the next 4,000 years will fall; and indicates where and when eclipses of the sun and moon will take place in any part of the world. One part of the mechanism, called the "Festival Calendar," will tick only once a year—six minutes before midnight on New Year's Eve, when the clock will chime.

The clock was made by Jens Olsen, an astronomical instrument maker who died in 1945 after having worked on it for 30 years. After Hr. Olsen's death the work was completed with funds made available by the Copenhagen City Council, the total cost approximating to £35,000. The clock, which stands in a seven-ft.-high case in Copenhagen Town Hall, is specially insulated against dust, temperature changes, and humidity, and consists of some 15,000 hand-made parts and 445 cogwheels. As the slowest-turning wheel—to measure the equinoxes—would have taken about 26,000 years to complete one revolution, the makers put in only a quarter-wheel, sufficient for 6,000 years. (Berlingske Tidende, Copenhagen)

B. UNITED KINGDOM. — Prices. - Six Months' Guarantee of Price Stability by Cement Industry.

Sir Malcolm Trustram Eve, Q.C., announced on Dec. 14 on behalf of the Cement Makers' Federation (of which he is independent chairman) that it had been agreed to make no increase in the prices at which Portland cement was sold in Britain for at least six months.

Sir Malcolm explained that the cement industry had decided to guarantee stable prices for this period because it believed that "some positive and definite action should be taken to slow down the inflationary spiral," and expressed the hope that its example would be followed by other industries. He pointed out that it was impossible to guarantee stable prices for a longer period because about two-thirds of the industry's costs were outside its control, nearly half being accounted for by coal, electric power, and transport. If cement makers could be certain that the charges of the National Coal Board, the British Electricity Authority, and the British Transport Commission would not be raised for a specified period, the term for which cement prices could be guaranteed might well be extended, and requests for their co-operation had been sent to these bodies and to the trade unions associated with the cement industry. Sir Malcolm added that the production of cement for home use in 1955 was estimated at 10,750,000 tons, the average delivered price being about £5 per ton. In 1956 production was expected to be increased by about 500,000 tons.

A similar guarantee of price stability was given on the same day on behalf of the manufacturers of plaster board, the annual value of whose output, excluding exports, was stated to be about £6,000,000. (Times - Manchester Guardian)

C. UNITED STATES. — Foreign Bids for U.S. Contracts. - New Regulations by Department of Interior. - Rejection of New British Tenders for Chief Joseph Dam.

The U.S. Department of the Interior issued new regulations on Nov. 14 governing the award of contracts to foreign firms tendering in competition with U.S. concerns. Under the Executive Order issued by President Eisenhower in December, 1954, it was laid down that foreign bids should be accepted in preference to U.S. bids if the latter were more than 6 per cent higher, but that this rule could be disregarded if the contract was awarded to a U.S. firm in an officially certified area of "substantial unemployment." Difficulties subsequently developed, however, in deciding how great the difference between a U.S. and a foreign bid needed to be in an area of unemployment for a contract to be nevertheless awarded to a foreign firm. The new regulations therefore fixed a differential of 6 per cent for domestic concerns in unemployment areas, in addition to the normal 6 per cent differential granted under the President's Order. A spokesman of the U.S. Defence Department (the other agency chiefly concerned with foreign bids for contracts) stated on the same day (Nov. 14) that his department had made no similar decision.

The Department of the Interior's new regulations arose out of the rejection at the beginning of November of British and Italian tenders (by the English Electric Co. and the Legnano Electric Corporation respectively) for electrical equipment, and the award of the contracts to U S firms on the ground that they were situated in areas of unemployment. The U.S. Government, however, stopped the award of the contracts to the U S firms, and on Nov. 14, after the new regulations had been issued, it was announced that the two contracts had been awarded to the British and Italian firms, and that two other small contracts had been awarded to Swiss and Italian firms (the Brown Boveri Corporation and Legnano Electric Corporation).

Earlier (Aug 26) it had been announced that the U.S. Defence Department had rejected bids by the English Electric Company for supplying generators and transformers worth some $6,000,000 for the Chief Joseph Dam project in Washington State, and had awarded the contracts to U.S. concerns in order to help relieve unemployment in the Pittsburgh area. The Foreign Office in London stated on Sept 2 that "strong representations" had been made to the U.S. Government expressing the British Government's "deep concern" at the rejection of the British tenders. It was subsequently announced that the British protest had been rejected, but no details of the U.S. reply were published.

The Department of the Interior announced on Sept. 11 that at least 179 contracts, totalling more than $8,000,000, had been awarded to foreign firms in the past four years. Excluding 73 very small Fish and Wildlife Service contracts, contracts had been awarded to firms in the following ten countries: Switzerland, 31; Italy, 22; Austria, 16; United Kingdom, 12; Japan, 6; Canada, 6; Western Germany, 6; France, 3; the Netherlands, 2; Sweden 2. No figures were published for Defence Department contracts.

It was announced in New York on Dec. 27 that the U.S. Army had awarded a $2,080,940 contract for transformers on the Dalles Dam, on the Columbia River near Portland (Oregon), to the British firm of Ferranti. The contract was secured in the face of competition from U.S. companies and a Swiss firm. (New York Times - New York Herald Tribune) **(14030 C.)**

D. NEW ZEALAND. — Adherence to German Debt Agreement.

The N.Z. Minister of External Affairs, Mr. Macdonald, announced on Nov. 30 that New Zealand had acceded to the Agreement on German External Debts, signed in London on Feb. 27, 1953, and that N.Z. creditors could now take steps under the agreement to enforce their rights against their debtors in the German Federal Republic in respect of those debts which were covered by the agreement.—(Directorate of Information Services, Wellington) **(Prev. rep. 12487 A.)**

E. AUSTRIA. — Recognition of Neutral Status.

It was announced in Vienna on Dec. 8 that the German Federal Government had officially recognized the permanent neutrality of Austria. Apart from the four former occupation Powers and Switzerland, other countries which had also recognized Austria's status as a perpetually neutral Power up to Dec. 1 included Czechoslovakia, Hungary, Italy, Yugoslavia, Finland, India, Japan, and Sweden.—(Wiener Zeitung) **(Prev. rep. 14561 A.)**

F. PERSIA. — New Foreign Minister.

The appointment of M. Aliquli Ardalan as Foreign Minister of Persia in succession to M. Abdullah Entezam was announced on Dec. 27 in Teheran. M. Entezam, who was convalescing in Europe at the time, was appointed Deputy Prime Minister and Minister without portfolio.—(Times) **(Prev. rep. 14151 B.)**

A. SOVIET UNION - ASIAN STATES. — Visits by Marshal Bulganin and M. Khrushchov to India, Burma, and Afghanistan. - Soviet Leaders' Attacks on Western Powers, Portugal, and Pakistan. - Statements on Goa and Kashmir. - M. Khrushchov's Denunciations of "Colonialism." - Soviet Economic Agreements with India, Burma and Afghanistan.

The Soviet Prime Minister, Marshal Bulganin, and the First Secretary of the Soviet Communist Party, M. Khrushchov, visited India, Burma, and Afghanistan during November and December. They were accompanied by M. Gromyko, First Deputy Foreign Minister, M. Kumykin, Deputy Minister of Foreign Trade, M. Mihailov, Minister of Culture, and a number of officials. The visits of the Soviet leaders to India and Burma followed those paid to the U.S.S.R. earlier in the year by the Prime Ministers of India and Burma (see 14372 A; 14585 A).

Marshal Bulganin and M Khrushchov made a 12-day tour of India from Nov. 18-30, during which they visited Delhi, Bombay, Madras, Calcutta, and other places They then spent a week in Burma (Dec. 1-7), returned to India for another week's visit (Dec. 7-14), during which period they visited Kashmir, and ended their tour with a four-day visit to Afghanistan (Dec 15-18), returning to Moscow on Dec 21.

During their tour of India and Burma, Marshal Bulganin and, in particular, M. Khrushchov, made a number of political speeches in which they attacked the policy of the Western Powers and in which M. Khrushchov specifically denounced Britain for having, he alleged, "exploited" India and Burma in the past. In addition, the Soviet leaders denounced Portugal for "colonial exploitation" in Goa, upheld India's claim to that territory, and described Kashmir as a part of the Indian Union. M. Khrushchov, moreover, in speeches in Bombay and Rangoon, accused the Western Powers of responsibility for the Second World War by having, he alleged, sought to turn Hitlerite Germany against the Soviet Union. These recriminations and allegations gave rise to strong protests in Britain, the United States, Portugal, and Pakistan, and were refuted in a number of official statements issued in those countries.

Visit to India.

Marshal Bulganin and M. Khrushchov arrived by air in Delhi on Nov. 18, and were given an enthusiastic welcome by great crowds numbering hundreds of thousands. During their first two days in India they called upon President Rajendra Prasad and the Vice-President, Dr. Radhakrishnan; visited many of Delhi's historic buildings and monuments, including the Red Fort and the Jama Masjid mosque; laid wreaths at the shrine of Mahatma Gandhi at Rajghat; and visited Agra to see the Taj Mahal.

On Nov. 21 Marshal Bulganin and M. Khrushchov addressed a joint session of the two Houses of the Indian Parliament, their speeches being delivered in Russian and translated into Hindi. Marshal Bulganin's speech was largely devoted to a recapitulation of Soviet international policy, during which he criticized the policies of the Western Powers, whilst M. Khrushchov spoke mainly on the development of the U S S.R. since the October Revolution and on the role of the Soviet Communist Party.

Marshal Bulganin expressed the Soviet people's friendship and admiration for India, stressed the identity of views between the two countries on all important international questions, and emphasized that their mutual relations were based on the "five principles" of peaceful co-existence. After declaring that the Soviet people had "sympathized whole-heartedly with the courageous struggle which your people waged against colonial oppression," he went on to pay a tribute to the late Mahatma Gandhi and to Mr. Nehru, describing the latter's visit to the Soviet Union as "a great and important event."

The Soviet Prime Minister then spoke of the Geneva "summit" conference and the subsequent conference of Foreign Ministers; recapitulated the Soviet proposals put forward at the latter conference; and said, in connexion with the Soviet proposals for disarmament: "To our great regret our efforts to resolve the deadlock on the question of disarmament and the prohibition of atomic and hydrogen weapons have not so far brought about positive results As a matter of fact, the U S.A., Britain, and France have backed down from what they themselves proposed at the beginning of this year It is necessary to state that on the question of disarmament the Western Powers are moving backwards and . . . are setting the problem back by at least ten years. Despite the difficulties created, the Soviet Government will do its utmost to prohibit atomic and hydrogen weapons and to settle the problem of disarmament"

Marshal Bulganin went on to speak of the "understandable anxiety of all peoples of the world" at the existence of "military groupings" in Europe and the presence of "foreign troops and military bases on the territory of a number of European States." He reiterated the Soviet view that NATO was an "aggressive" organization, accused the Western Powers of seeking to militarize Western Germany through the Paris Agreements, and asserted that the Soviet Union and the Eastern European countries had been forced in self-defence to conclude the Warsaw Treaty. After referring to the evacuation of the former Soviet bases at Port Arthur (China) and Porkkala (Finland), he continued:

"If certain other Powers which have military bases on foreign territories would follow the example of the Soviet Union, it would have been an important contribution to the lessening of tension and a confirmation of the spirit of Geneva by concrete deeds. It is regrettable that here again one has to note the unwillingness of certain circles to follow the spirit of Geneva in their practical activities. This is proved, for example, by efforts to broaden and consolidate the notorious South-East Asia Treaty Organization [SEATO], whose signatories are mainly non-Asian countries It is also proved by the creation of a military bloc in the Near and Middle East near the borders of India and the Soviet Union [i.e. the Baghdad Pact]. . . ."

On the question of Germany, Marshal Bulganin said that it was necessary to take account of the fact that two German States had come into existence in the past decade, with their own political and economic systems "The German question," he declared, "is primarily a matter for the German people themselves to decide, and the task of the great Powers is to help them to carry out the unification of Germany along the road of peaceful and democratic development..." He claimed that the establishment of an All-German Council, as proposed by the U S S.R at the Foreign Ministers' Conference, would have "facilitated the creation of conditions for the settlement of the German question and the unification of Germany by means of free elections, in accordance with the national interests of the German people and the interests of European security."

Marshal Bulganin concluded: "When our people won the October Revolution they set before themselves the aim of achieving economic and cultural change in our motherland, and of converting our country into an industrial and socialist State Under the leadership of the Communist Party, the Soviet people have successfully implemented this historic task You are following your own road You also have the objectives of converting your motherland, which has forever overthrown colonial domination, into an advanced State with a developed national economy and a high standard of living It is with complete sympathy and sincere understanding that the Soviet people regard your efforts to achieve these objectives In our opinion, every possibility is present for further expanding Soviet-Indian co-operation in the fields of economy and culture, as well as in those of scientific and technical research We are prepared to share with you our economic and scientific experience. . . ."

After a visit to the Punjab, where they saw the Bhakra Dam and other public works, the Soviet leaders paid a two-day visit to Bombay on Nov. 23-24, followed on Nov. 25 by a visit to the Indian National Defence Academy at Kharakvasla, near Poona.

Speaking in Bombay (Nov. 24) at a dinner given by the Indo-Soviet Friendship Society, M. Krushchov accused the Western Powers of having "started the Second World War" by sending "the troops of Hitlerite Germany against our country" He also accused the U.S.A., Britain, France, and Japan of having sought by armed intervention to overthrow the Russian revolution in its early stages. At the same time, M. Khrushchov stressed the necessity for co-existence between capitalist and communist States, saying *inter alia* "Neither we nor the capitalist States want to make a trip Mars-wards, so we shall have to exist together on one planet. . . ." After his speech, however, M. Khrushchov apologized to the Chief Minister of Bombay (Mr. Morarji Desai), saying that after-dinner speakers were "like drunkards and do not know how long they are talking."

The Soviet leaders went on Nov. 27 to Bangalore, where M. Khrushchov issued his statement declaring that the Soviet Union had exploded a hydrogen bomb "of unprecedented power" (see 14566 A). On Nov. 28 they visited Madras, where Marshal Bulganin—speaking at a civic reception—described the existence of the Portuguese colony of Goa as "a shame to civilized people."

After saying that "for many decades and even centuries the people of Asia were living under the yoke of foreigners and were fighting for liberty, freedom and national independence," he added: "Now the colonial regimes are collapsing and are slipping into the unreturnable past. But certain European States cannot understand that the time is past and that there can be no return to the old colonial order There is no justification for the continued existence of the Portuguese colony of Goa on the territory of India. This is a shame to civilized people. The sympathies of the Soviet people are always on the side of those fighting colonialism. . . ."

Marshal Bulganin and M. Khrushchov paid a visit on Nov. 29-30 to Calcutta, where they appeared on the platform with Mr. Nehru at a big open-air rally which was addressed by the Indian Prime Minister. In this speech Mr. Nehru stressed India's friendship towards Britain since the achievement of Indian independence, reiterated that India would join no alliance of any description, and emphasized her desire for friendship and co-existence with all countries, irrespective of their social systems.

Mr. Nehru said that India and the Soviet Union had different political and economic structures, but respected each other and co-operated in many ways. Stressing that the ideal of peaceful co-existence was fundamental to the Indian way of life, and was as old as India's thought and culture, he declared: "That is the

reason why we try to be friendly with all countries, whether we agree with them or not. That is the reason why we refrain from criticizing other countries, even when we disagree with their policies, unless circumstances compel us to explain our point of view The great welcome our guests have had in India has alarmed some of our friends in other countries, who cannot help thinking in terms of rival camps and military alliances. I have often said that we don't propose to join any camp or alliance . . ."

In a reference to Indo-British relations, Mr Nehru said · " The British ruled over us for 150 to 175 years We fought them for our independence, but when we became free we ceased to bear them any hostility. Once the problems between us had been solved, we became friends."

Mr. Nehru ended by welcoming the Soviet condemnation of Portuguese " colonialism " in Goa, and declared that India would never regard the question of Goa as closed

After spending a week in Burma (see below) Marshal Bulganin and M. Khrushchov returned to India on Dec. 7, when they visited the Damodar Valley projects in West Bengal, as well as the new industrial township of Sindri and the locomotive works at Chittaranjan. On Dec. 8 they flew to Jaipur, the capital of Rajasthan, and on Dec. 9-10 visited Kashmir at the invitation of Karan Singh, the *Sadar-i-Riyasat* (Head of State), and the Kashmiri Premier, Ghulam Mohammed.

Replying to an address of welcome at Srinagar airport, Marshal Bulganin referred to Kashmir as " this northern part of India " and to its inhabitants as " part of the Indian people." Speaking at a Government reception on the following day, M. Khrushchov also declared that Kashmir was part of India, asserted that former undivided India had been partitioned for " imperialist reasons," and attacked the Government of Pakistan for being, he alleged, under the influence of " American monopolists."

After declaring that " the people of Jammu and Kashmir . . . want to work for the well-being of their beloved country—the Republic of India," M. Khrushchov continued : " The people of Kashmir do not want to become toys in the hands of imperialistic Powers. But this is exactly what some Powers are trying to do under the pretext of supporting Pakistan with regard to the Kashmir question . It made us very sad when imperialist Powers succeeded in bringing about the division of India into two parts—India and Pakistan. Before the Indian people achieved their independence, there existed only one united India The division of India into two parts was not brought about in the interests of the people of India. . . . We are absolutely convinced that, when passions have calmed down and people realize the significance of such an artificial division of India, they will regret it. But the question of the creation of two independent States—India and Pakistan—has already been decided, and if I express my frank opinion about it, it is not because I want this question to be reconsidered "

Continuing, M. Khrushchov asserted that " the question of Kashmir as one of the States of the Republic of India has already been decided by the people of Kashmir." He went on : " Whilst, in the Republic of India, we find an ally in the struggle for the peaceful solution of unsettled problems, unfortunately we cannot say the same about Pakistan. . . . The present Government of Pakistan openly professes its close ties with American monopolistic circles They were among the first to initiate the notorious Baghdad Pact. They have permitted the creation of American military bases on their territory, which cannot but disturb us With the active participation of Pakistan, attempts are now being made to increase the number of States which are parties to the Baghdad Pact. . . . We do not like the Baghdad Pact at all, but we are patient and confident that it will burst like a soap-bubble, and that only unpleasant recollections of it will remain

" Another unfriendly act of the Government of Pakistan has become known to us. The Pakistan Ministry of External Affairs summoned the Soviet Ambassador and suggested to him that I and my friend Bulganin should refuse to visit Kashmir and should reject the invitation from the Head of your State to visit Srinagar. This is a case of unprecedented interference in other people's affairs. We shall not be told where to go and where not to go, what to do and what not to do, or what sort of allies we should choose for ourselves. . . . A representative of the Pakistan Ministry of External Affairs also told our Ambassador that the Government of Pakistan would not like us to visit Afghanistan—a neighbour of ours. This is going a bit too far. . . . Afghanistan is a good neighbour with whom we have had friendly relations for a long time. We should very much like to have similar friendly relations with Pakistan, and it is no fault of ours if such relations have not developed. . . ."

The Soviet leaders returned from Srinagar to Delhi for final discussions with Mr. Nehru, leaving India by air for Afghanistan on Dec. 14. Two communiqués were issued before Marshal Bulganin and M. Khrushchov left India—a 2,000-word statement on international affairs, signed by Mr. Nehru, Marshal Bulganin, and M. Khrushchov, and an agreement on Indo-Soviet economic co-operation.

International Affairs. The joint statement was on similar lines to that issued in Moscow by Marshal Bulganin and Mr. Nehru after the latter's visit to the Soviet Union (see 14372 A). It contained the following points :

(1) **Both countries reaffirmed that their relations were based on the " five principles of peaceful co-existence."**

(2) Disappointment was expressed that the " high expectations " of the Geneva " summit " conference had not been realized at the Conference of Foreign Ministers This disappointment, nevertheless, " need only be temporary," and every effort should be made " to relax international tension, relying solely on the settlement of differences by negotiation."

(3) The two Prime Ministers and M. Khrushchov expressed their conviction that there could be " no lasting peace in Asia until the People's Republic of China is given its rightful place in the United Nations " They expressed the hope that the question of Formosa and the offshore islands would soon be settled in a manner which would " satisfy the legitimate rights of the People's Republic of China " They also agreed that the Korean question should be settled " on the basis of recognition of the national rights of the Korean people and in accordance with the interests of peace in the Far East "

(4) With regard to Indo-China the statement expressed regret that " impediments have been placed in the way of carrying out the Geneva agreements in Vietnam," and that " difficulties had also arisen in Laos " An appeal was made " to all parties and interests concerned to remove the obstacles in the way of the agreements, and to co-operate fully in carrying out their provisions in the letter and the spirit "

(5) Both countries were " strongly of the opinion that the principles of universality should be applied to membership of the United Nations "

(6) Both countries reiterated their support for the " unconditional prohibition of the production, use, and experimentation of nuclear and thermo-nuclear weapons ", for a " substantial reduction " of conventional armaments , and for effective international control of disarmament.

(7) Opposition was expressed to " such regional alliances as have widened the frontiers of the 'cold war,' introduced an element of instability in the areas concerned, and increased fears and tensions "

(8) After welcoming the friendship between the two countries, and urging that it should be expanded by economic and cultural exchanges, the statement referred to the help given by the U.S.S R. to India in building up her steel industry (see 14103 A), and observed that " the Second [Indian] Five-Year, with its emphasis on the development of industry, may reveal further opportunities for such co-operation " In conclusion, the signatories expressed their " faith in the future and their firm resolve to devote their energies to the promotion of peace for the benefit not only of the peoples of their two countries but of the world as a whole "

Economic Co-operation. The provisions of this agreement were as follows ·

(1) India would purchase 1,000,000 tons of steel from the Soviet Union during the next three years (beginning in 1956)—300,000 tons in the first year and 350,000 tons in each of the two subsequent years. Terms and conditions would be settled by later negotiations.

(2) During the same three-year period India would also purchase from the U S.S.R. " such equipment for the production of oil, mining equipment, and other goods as may be agreed upon between the parties." Terms and conditions would also be settled by subsequent negotiations.

(3) The U.S.S.R. would " substantially increase " its purchases of raw materials and manufactured goods from India, on terms to be agreed It was hoped that " the total value of such purchases, including sums which may be required for the maintenance of Soviet official organizations in India, will be equal to the total of goods purchased from the U.S.S R."

(4) Both Governments would grant each other in their trade exchanges the " maximum facilities allowed by their respective laws, rules and regulations."

(5) In view of the increased volume of trade envisaged, regular shipping services would be organized between Indian and Soviet ports.

(6) Delegations would be exchanged at the earliest possible date " to discuss terms and conditions and to enter into agreements to implement the above understandings "

Both Marshal Bulganin and M. Khrushchov made broadcasts before leaving India, in which they affirmed the Soviet Union's policy of non-interference in the internal affairs of other countries. The Soviet Prime Minister described Indo-Soviet relations as " a striking example of friendship and co-operation between States with different political systems."

M. Khrushchov, speaking on Dec. 13 at a function organized by the Hindi Association, said that the Soviet Union had no wish to create discord between India and the Western Powers, and declared that it was " fantastic " to suggest that either he or Marshal Bulganin desired to incite the Asian peoples against Europe. Referring to Western press criticisms of his views on colonialism, he declared : " We do not want to create any conflict between you [India] and the United States or Britain, but this does not mean that we should not speak the truth. The fact that India was suppressed in the past is a historical truth and cannot be denied." After pointing out that India's population was second only to that of China, he asserted that the only reason why India was not in the forefront of world affairs today was because those who had " dominated " her in the past " did not want her to achieve that status." With reference to Goa, he said that the United States had come out " in full support of Portugal," and added : "The Portuguese conquered the territory 400 years ago. They enslaved it by force, violence and fraud. The fact that they did this 400 years ago does not invest the Portuguese with the right to maintain their domination any longer. Goa does not belong to Portugal and will have to go to the people to whom it belongs."

Visit to Burma.

During their visit to Burma (Dec. 1-7) Marshal Bulganin and M. Khrushchov had discussions in Rangoon with the Prime Minister, U Nu, and visited Mandalay, Taunggyi, and Maymyo in a tour of the Shan States and Central Burma.

M. Khrushchov was involved in what the Special Correspondent of the *Daily Telegraph* called a "highly undignified scene" when visiting the Shwe Dagon Pagoda (the greatest Buddhist shrine in the world) with Marshal Bulganin in Rangoon on Dec 21. On being informed that many Burmese temples were 2,000 years old, M. Khrushchov commented: "England did not exist as a country before William the Conqueror, your temples are twice as old as theirs, yet they call you savages and barbarians" He also said that "we Russians are the only ones who fight against colonialism," and expressed his satisfaction that "Burma thinks along the same lines as we do"

After contrasting ancient Burmese architecture with the modern functional architecture of the U.S S R, M Khrushchov said that the Americans and French had made a "stupid mistake" when they tried (he alleged) to persuade the Soviet architect Vlasov not to return to the U S.S.R. after the criticisms which had been directed against his work (see 14595 C). Turning to a French correspondent present (M. Piérard, of the *Agence France-Presse*), M Khrushchov said that he should be "red with shame", when M Pierard replied that he "preferred to remain as I am, pink," M Khrushchov retorted. "As to your political complexion, as far as I am concerned you can be black."

M. Khrushchov was also involved in an altercation with U S press correspondents who, commenting on his denunciation of "colonialism," asked him what was happening in Estonia, Latvia, and Eastern Germany. M. Khrushchov replied: "You do not understand what the East Germans are doing because you are the paid slaves of capitalism. If you wanted to write anything good about Russia you would starve to death because the capitalist press would refuse to print it." Marshal Bulganin was not involved in any of these exchanges

[It was later strongly denied in Moscow, and also by Russian journalists accompanying Marshal Bulganin and M Khrushchov, that the latter had said that the British regarded the Burmese as "savages and barbarians." The Soviet newspaper *Pravda* maintained that Western correspondents had "credited Khrushchov with something that he in fact never said" and had "grossly misrepresented the remark that had actually been made." The incident in the Shwe Dagon Pagoda was described by *Pravda* as follows "Pointing to the majestic spire of the pagoda, one of the Burmese diplomats said: 'When struggling for our independence we often said that when William the Conqueror landed in England our pagoda was already here England did not exist as a nation, while our people were at the height of civilization This memory inspired our people to struggle.' 'Quite right,' Khrushchov noted, 'the heritage of the ancestors must be honoured'"]

In a speech at Taunggyi while visiting the Shan States, M. Khrushchov again denounced "colonialism" and accused the British of having "sat on the necks" of the Burmese people and of having "robbed them of the last piece of bread." In a further speech at Rangoon on Dec. 6, he again accused the Western Powers of having, as he alleged, tried to use Hitlerite Germany as their "watchdog" and to direct it against the Soviet Union. The speech was made at a meeting of the Anti-Fascist People's Freedom League (the ruling party in Burma), over which U Nu presided in his capacity as party chairman.

After saying that the Soviet people had "always given moral support to the Burmese people in their noble struggle against colonial oppression," and referring to the identity of views between the Soviet Union and Burma on international questions, M Khrushchov continued: "Certain gentlemen were greatly displeased by our speeches and frank statements during our visit to India and Burma. But the truth is often not to the liking of everyone... That is why certain organs of the British Press have been irritated by my statements and the statements of Comrade Bulganin in India. They particularly disliked that part of one of my speeches [i.e. M. Khrushchov's speech in Bombay—see above] where I said that certain circles had untied Hitler's hands in the war against the Soviet Union. Yet this is an historical fact

"Could Hitler have started a war if he had been opposed by the united forces of Britain, France, the Soviet Union, and other countries? If the then ruling circles of Britain and France had wanted to restrain Hitler and prevent the unleashing of war, they would have opposed Hitler's seizure of Austria and would not have agreed to the conclusion of the shameful Munich agreement France had a treaty of mutual assistance with Czechoslovakia. However, when Hitler set out to occupy Czechoslovakia the French refused to come to her assistance, although they knew that the Soviet Union was ready to give immediate help in curbing Hitler's aggression. It is no secret that the Soviet armed forces were made ready for action in order, jointly with French troops, to repulse Hitler's aggression against Czechoslovakia. However, the French Government refused to do this.

"The history of the pre-war years shows that the Western Powers made one concession after another to Hitler, nudging him towards the East—against our country. But it so happened that the very one whom Britain, France, and the United States regarded as their watchdog to set on the U.S S.R. broke loose and attacked those who had fed him.

"The question arises whether there is not a certain analogy with the pre-war period if we examine the measures taken with regard to present-day Western Germany Are not the very same methods being used now by the very same countries in an attempt to push Western Germany on to the path of aggression and new adventures? They have drawn Western Germany into NATO They are supplying her with arms. Many Western statesmen even consider it unnecessary to hide the fact that they are preparing the West German Army for use against the Soviet Union. . .

"I should also like to say this: Russia has never started a war against Britain, but Britain has attacked our country, both in the past and in our times It is worth mentioning the Sevastopol war [i e. the Crimean War] as an example The Russians did not invite the British to the Crimea so that they could kill Russian people on Russian soil We can also recall British intervention against our country during the Civil War At a time when the Soviet Republic had not yet firmly established itself, British troops occupied Archangel. . . . All these are also historical facts, which cannot be evaded.

"Let us recall, finally, the notorious directive given by Mr. Churchill at the end of the Second World War to his Commander-in-Chief in Europe Churchill then ordered that all the weapons discarded by the capitulating Hitlerite troops should be gathered up and stocked, and that those troops should be kept in readiness because quite possibly they would be of use in operations against the Soviet Union, although the Soviet Union was Britain's ally. . . .

"All our actions show that we do not want any conflicts with the Western Powers We want to be friends with all the peoples of the world . . . Yet obviously it irritates some people when friendly relations are now developing between us and the peoples of India, Burma, and other countries, not to mention our great friend and brother, the People's Republic of China Some people dislike the fact that we are supporting the countries which have thrown off the colonial yoke . . . Some newspapers do not like the truth about the past, but I am sure that neither do they like the truth about the present. The truth, however, remains the truth, and I must speak about it. The following question, for instance, arises. Why have American troops occupied Taiwan [Formosa] and the outlying islands which are a part of the lawful territory of the People's Republic of China? Why are they preventing the Chinese people from completing the liberation of their country? Not a single bourgeois journalist dares to raise his voice against such actions. Neither are any serious protests voiced in the British press against the atrocities committed by the Portuguese colonialists who illegally hold Goa—an inalienable part of India . . Let no-one think that I am out to lecture anyone. I am merely citing facts And facts are stubborn things

"I should like to go back again to the events of the Second World War. It is common knowledge that when Nazi Germany perfidiously attacked the Soviet Union and we became allies of France, Britain, and the United States in the struggle against Germany, our country honestly and scrupulously fulfilled all its commitments as an ally. The Soviet people shed more of their blood in that war than all our allies together, but we respect and give due praise to the British, French, American, and other troops who fought against Hitlerite Germany and her satellites. The struggle was grim, but our allied armies won a very great victory This experience of joint struggle for a common cause is of great significance The Second World War showed that the British, French, American and Soviet peoples can be the best of friends, not only in good times, but also in the most severe and difficult trials. If we were allies in war, what then can prevent us from being just as good friends in the struggle for the preservation and consolidation of peace? . . ."

A joint statement was issued by Marshal Bulganin and U Nu on Dec. 6 in terms broadly similar to those of the Soviet-Indian declaration. *Inter alia*, it condemned the policy of "creating blocs"; urged the unconditional prohibition of nuclear and thermo-nuclear weapons; and called for the seating of the People's Republic of China in the United Nations, the "return" of Formosa to Communist China, and an immediate political settlement in Indo-China.

Details of a Soviet-Burmese economic agreement were announced in Rangoon on Dec. 7 as follows: (1) the Soviet Government would assist the Burmese Government by providing materials and services for a programme of agricultural development, major irrigation works, and the establishment of industrial plants; (2) the U.S.S.R. would accept payment for such materials and services in the form of rice supplies from Burma, and, where quantities were insufficient, would accept deferred payment in kind spread over a number of years; (3) the Soviet Union would build and equip a technological institute in Rangoon as a free gift to the Burmese people; (4) in return for this gift, U Nu had offered "an appropriate quantity of rice and other products of Burmese origin" as a gift to the Soviet people.

Visit to Afghanistan.

After leaving India, Marshal Bulganin and M. Khrushchov flew on Dec. 14 to Stalinabad, the capital of the Soviet Republic of Tajikistan, and then flew to Kabul for a four-day visit to Afghanistan (Dec. 15-18). On arrival in Kabul, Marshal Bulganin made a statement at the airport praising Afghanistan's "unswerving adherence to a policy of neutrality."

During their stay in the Afghan capital the Soviet leaders were received by King Zahir Shah and had discussions with the Afghan Prime Minister, Sardar Mohammed Daud Khan, and the Foreign Minister, Sardar Naim Khan. Speaking at receptions given by the Afghan Government, Marshal Bulganin expressed his sympathy with Afghanistan in the "Pakhtoonistan" dispute with Pakistan (see 14481 B), and gave it as his opinion that the Pakhtoon (Pashtu) people should be consulted on this matter. He also offered complete equipment for a 100-bed hospital and 15 motor-buses for Kabul.

Three documents, signed by Marshal Bulganin and Sardar Mohammed Daud Khan, were issued on Dec. 18 before the Soviet leaders left Kabul. The first was on international affairs, the second extended the Soviet-Afghan neutrality treaty of 1931, and the third related to Soviet economic aid to Afghanistan.

(1) The joint statement on international affairs said *inter alia* that both countries had decided to expand the friendly political, economic, and cultural ties linking them, that the Soviet and Afghan Governments based their relations on the "five principles" accepted by the Bandung Conference, that both countries stood for universal disarmament and the banning of all nuclear and thermo-nuclear weapons, and that all unresolved questions in the Far East should be settled by peaceful means, taking into account the "legitimate rights" of the Chinese People's Republic, including its admission to the United Nations

A passage in the joint statement spoke of the Geneva "summit" conference as having "yielded positive results," and expressed the hope that similar conferences of Heads of Governments would be convened in the future.

(2) The second document extended the Soviet-Afghan treaty of neutrality and non-aggression for a further ten years. It provided that the treaty would be automatically renewed from year to year thereafter, unless either party terminated it at six months' notice

(3) The economic agreement provided for a Soviet long-term credit of $100,000,000 (about £36,000,000) to Afghanistan "for the fulfilment of an agreed programme of works for the development of the Afghan economy." It was stated that technicians of both countries would examine, in particular, "questions regarding co-operation in the fields of agricultural development, construction of hydro-electric stations, irrigation works, and motor-car repair workshops, as well as the reconstruction of Kabul airport"

In a press statement on Dec. 18, the Prime Minister of Afghanistan said that the visit of the Soviet leaders had in no way changed Afghanistan's policy of neutrality. In reply to questions, he said that Afghanistan was ready to obtain arms from any source as long as no political conditions were attached, but declined to say whether the question of Soviet arms supplies had been raised during the discussions. He welcomed Marshal Bulganin's sympathy with Afghanistan on the Pakhtoonistan question.

The Afghan Foreign Minister also made a statement on the same date emphasizing that Afghanistan desired a peaceful settlement of this question, adding, however: "Afghanistan has no commitments to the Pashtu leaders, but the ties between Pashtus and Afghans are so close that, if there is trouble on the other side, a situation might arise which the Afghan Government could not control"

Marshal Bulganin and M. Khrushchov arrived back in Moscow on Dec. 31 after breaking their journey in Tashkent, the capital of the Soviet Republic of Uzbekistan.
(The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London - Burma Weekly Bulletin, Rangoon - Soviet Weekly - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris) **(Prev. rep. Visits to U.S.S.R. by Mr. Nehru, 14372 A; U Nu, 14585 A.)**

Note. Reactions in Britain, the U.S.A., Portugal, and Pakistan to the various speeches and statements made by Marshal Bulganin and M. Khrushchov during their tour of India and Burma will be described in a subsequent issue.—(Ed. K.C.A.)

A. AUSTRIA. — Further Bank Rate Increase. - Credit Restrictions.

The Austrian National Bank announced on Nov. 17 that it had raised the Bank rate from 4½ to 5 per cent with immediate effect. In addition, all Austrian credit institutions were required from Dec. 1 to keep a minimum of 5 per cent of their holdings at the National Bank.

These measures, which were aimed at intensifying the Austrian Government's "credit squeeze," had been preceded by an agreement between the Finance Ministry and the Association of Banks which provided that all banks would (1) immediately call back outstanding credits; (2) demand an overall reduction of 10 per cent within three months if they agreed to the extension of credits; (3) grant new credits only after a severe scrutiny both quantitatively and qualitatively; and (4) in the case of hire-purchase credits, insist on increased cash-down payments and a reduction of the overall settlement period.

The various measures had been announced by Dr. Kamitz, the Finance Minister, on Nov. 12, and came into force on Nov. 14.—(Wiener Zeitung) **(Prev. rep Bank Rate, 14342 C.)**

B. LITERATURE. — Book Selections for December. - British Book Production in 1955. - Prix Goncourt Award.

Selected books published in Great Britain, the United States, France, and Germany are given below:

Great Britain. Aldiss, Brian W.—"The Brightfount Diaries" (Faber & Faber, 12s 6d)
Findlay, Richard—"Grimaldi. King of Clowns" (MacGibbon & Kee, 21s)
Greene, Graham—"The Quiet American" (Heinemann, 13s. 6d.)
Kenward, James—"The Suburban Child" (Cambridge University Press, 12s 6d.)
Morris, Christopher—"The Tudors" (Batsford, 21s.)
Truman, Harry S.—"Year of Decisions. 1945" Memoirs, Volume I (Hodder & Stoughton, 30s)
Ward, Dame Irene—"F.A.N.Y. Invicta." The Official History of the First Aid Nursing Yeomanry (Hutchinson, 21s)

United States. Dobie, J. Frank—"Tales of Old-Time Texas." (Little, Brown & Co., Boston, $5 00)
O'Hara, John—"Ten North Frederick." (Random House, New York, $3 95)
Lord, Walter—"A Night to Remember" The Loss of the s s *Titanic* (Holt, New York, $3.50)
Stevenson, Elizabeth—"Henry Adams. A Biography. (Macmillan, New York, $6 00)

France. Ikor, Roger—"Les eaux mêlées" (Albin Michel, Paris, 890 francs) *Prix Goncourt* award
Marceau, Félicien—"Les élans du coeur" (Gallimard, Paris, 520 francs) *Prix Interallié* award

Germany. "Briefwechsel Benedetto Croce - Karl Vossler." Translated from the Italian (Suhrkamp Verlag, Frankfurt, 24 DM)

A total of 19,962 books (of which 5,770 were reprints or new editions) was issued by British publishers during 1955, the highest figure ever recorded. The principal categories were as follows (1954 figures in parentheses):

Fiction, 3,702 (4,204); educational, 1,844 (1,680); children's books, 1,756 (1,966), religion and theology, 1,058 (961), medicine and surgery, 785 (737), poetry and drama, 658 (622); politics, 651 (610); trade, commerce and industry, 626 (403); law and parliamentary, 437 (403), sports and pastimes, 433 (383); topography, 399 (360); travel and adventure, 199 (193).

The output of fiction was 1,397 lower than in the peak year of 1937, whilst that of children's books declined for the first time for several years. On the other hand, books on trade, commerce and industry rose by 50 per cent, whilst there was an appreciable increase in religious and theological books. Output of political books surpassed the pre-war figure of 633 for the first time since the war.

The *Prix Goncourt*, the leading French literary prize, was awarded on Dec. 5 to M. Roger Ikor for his novel *Les eaux mêlées* (see above), adjudged by the *Académie Goncourt* as the most outstanding work of fiction published in France during 1955. M. Ikor (44), a schoolmaster, was born in Paris of Russian-Jewish parents. (Ed. K.C.A. - Times - Le Monde, Paris) **(Prev. rep. Book Selections, 14560 A; Book Production in 1954, 13983 B; Prix Goncourt, 13957 B.)**

C. UNITED STATES. — Ford Foundation Gift of $500,000,000 for Medicine and Education.

The Ford Foundation announced on Dec. 12 that it would make a gift of $500,000,000 (£178,000,000)—described as "the largest single philanthropic act in world history"—to all privately-supported colleges, universities, and hospitals in the United States, to be disbursed during the next 18 months. The gift would benefit 4,157 institutions and would be used in the following manner: (1) $210,000,000 to help raise the salaries of teachers in 615 privately-supported colleges and universities, additional to $50,000,000 appropriated for the same purpose in March, 1955; (2) $200,000,000 to improve and extend the services of the nation's 3,464 voluntary non-profit-making hospitals; (3) $90,000,000 to strengthen instruction in privately-supported medical schools.

The biggest bequest to an educational institution was $5,000,000 to New York University. Thirty-six other gifts exceeded $1,000,000, including $4,510,000 to Harvard University, $4,324,200 to the University of Chicago, $4,000,000 to Yale University, $3,386,200 to the Massachusetts Institute of Technology, $3,320,400 to Princeton University, and $3,115,500 to Columbia University.

The new grants far surpassed the $350,000,000 which had been disbursed by the Ford Foundation in the 19 years of its existence.—(New York Times) **(Prev. rep. 12856 A.)**

D. GERMANY. — West German Threat to sever Relations with Countries recognizing Eastern Germany.

It was officially announced in Bonn on Dec. 9 that the German Federal Republic would break off diplomatic relations with all countries which recognized the East German regime, and would refuse to enter into diplomatic relations with any Communist country except the Soviet Union.
(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14425 A.)**

A. UNITED KINGDOM. — House of Commons Debate on Political Broadcasting. - Continuation of "14-Day Rule." - Select Committee to be appointed.

A debate took place in the House of Commons on Nov. 30 on a Government motion declaring that it was "in the interests of Parliament and the nation to preserve the principle of some limitation to the anticipation of Parliamentary debates by broadcasting," and calling for the appointment of a Select Committee "to consider whether any changes are desirable in the present methods of giving effect to this principle."

The debate followed strong criticisms—voiced by the B.B.C., the Independent Television Authority, the Parliamentary Labour Party, the Liberal Party, and many back-bench Conservative M.P.s—of the so-called "14-day rule," which forbids broadcast discussions on political issues during the fortnight before the subject in question is due to be debated in Parliament.

The rule in its present form dates from 1948, but originated in an earlier voluntary decision of the B B C itself. In 1953 the B B.C proposed to the Government that the rule, as such, should be abrogated, and that sole responsibility for deciding what political matters should be broadcast should rest with the B.B.C itself. The leaders of the three political parties decided, however, that they could not agree to this, and that the existing arrangement should be converted into a directive After prolonged but abortive discussions with the B.B.C , the Government accordingly issued a directive to the Corporation and to the I T A. (on July 27, 1955) making the 14-day rule permanent and binding

On Aug. 27 the B B C issued a statement expressing opposition to the 14-day rule and explaining that it had accepted the Government's directive "unwillingly." Protests against the rule were also voiced by the I.T.A. After meetings between representatives of the three political parties and officials of the B B C. and I T A on Sept 14, it was announced that the leader of the Parliamentary Liberal Party, Mr Clement Davies (who had previously supported the rule), had urged its withdrawal The Parliamentary Labour Party decided on Nov 9 to ask the Government to set up a Select Committee to inquire into the working of the 14-day rule

The Postmaster-General, Dr. Charles Hill, moved the Government motion in the House on Nov. 30. He outlined the events leading up to the issue of the Government's directive and surveyed the reasons for the retention of the 14-day rule, though possibly in a more limited form.

Dr. Hill explained that in 1944 the B.B C had decided on its own responsibility not to allow broadcast discussions or *ex parte* statements for 14 days before a debate on a major matter of policy took place The 1948 version of the rule was based on suggestions made by the B B C , and had been agreed between the Corporation and the leaders of the then Government and Opposition Early in 1951, however, after the Beveridge Committee had recommended that the arrangements should be reconsidered, the B B C. had indicated a desire to re-open the matter. In 1953 it had put forward positive proposals (see above), combined with an undertaking not to allow members of either House to broadcast during the 14 days before a debate, and to take particular care to avoid *ex parte* statements or discussion programmes on controversial matters during that period. The Corporation had asked that if its proposals were not approved, the position should be regularized by the issue of a directive In July 1954 the leaders of the three political parties had reluctantly agreed to this course, and although both his predecessor and he himself had tried to persuade the B B.C. to continue the 1948 arrangements and so make a direction unnecessary, the Corporation had insisted on a direction, which had accordingly been issued last July. Dr. Hill added that if the B B.C.'s proposals had been accepted the Corporation would doubtless have acted "with full recognition of its responsibility," but that the party leaders had been unable to agree that the B B.C. alone should have responsibility for working the limitation and modifying it

The questions to be decided (Dr. Hill continued) were · (1) if there were no such rule, would broadcasting encroach on the position of Parliament by prejudicing the Parliamentary discussion of public issues ? (2) was it right to limit anticipation of debates by the 14-day rule or its equivalent ? It had been widely contended by opponents of the rule that a restriction on the B.B.C. could not be justified if it was not also applied to the Press. The latter, however, consisted of "a miscellany of competing and diverse organs," and views expressed by one organ could be challenged or refuted in another, whereas the air was controlled by a single agency which selected the speakers, and was not available to all and sundry. Similarly, broadcasting differed from public meetings because the audience was much larger, and speakers addressed audiences which could not reply.

"If it be accepted that broadcasting has immense influence," Dr. Hill went on, "and if it be also accepted that the limited number of people who appear are selected for special qualities not necessarily related to the knowledge or authority with which they speak, is there not a real danger that if these persons are free to broadcast on matters shortly to come up for discussion in the House, before the Ministers or the Opposition have deployed the facts or arguments, Parliamentary discussion will be prejudiced and the authority of Parliament will suffer ? "

As regards the argument that this risk ought to be taken in the interests of free speech, Dr. Hill pointed out that it had never been held that the B.B.C. itself ought to be free to express its own views. "Whose freedom then is involved ? ", he asked "It is not the freedom of the ordinary man, for he has no right to a place on the air Nor is it the freedom of the M P , who has the right to catch the Speaker's eye, and in any case can only appear on the air if he satisfies the broadcasting service. This direction is not the beginning of censorship but is designed to protect the public from having views thrust on them by a few people, sometimes unrepresentative, sometimes not fully informed, and often trying to cover a vast problem in a few minutes "

In conclusion, Dr Hill said that although he did not think that the existence of a second television programme affected the main arguments for retaining some limitation on broadcast discussions, a new situation would arise if television developed so as to give it the variety and diversity of the Press. Meanwhile, a good case could be made out for limiting the rule to the items of business announced by the Leader of the House on Thursdays, and then only to the end of the following week, or until Parliament had disposed of the subject in the week after It had also been suggested that the rule should be limited to M P s These matters could be dealt with by the proposed Select Committee Once the committee had reported, it was possible that the B B C and the programme companies might agree to adopt its recommendations without a specific direction from the Postmaster-General

Support for the motion was expressed by **Mr. Attlee** (then leader of the Opposition), who, however, explained that he spoke for himself only He pointed out that the 14-day rule had "worked perfectly well until it was reduced to writing ", stressed the need to "maintain Parliament as the right forum for debating measures and policies ", and gave a warning that irresponsible or ill-informed broadcasters might endanger delicate negotiations at home and abroad and inflame situations He considered, however, that although it was important that there should be no broadcast discussions on Government Bills before the second reading, this restriction should not apply to private members' Bills Among other Labour supporters of the motion were **Mr. Gordon-Walker, Mr. Pannell,** and **Mrs. Jean Mann,** whilst Conservative speakers in its favour included **Mr. McAdden** and **Mr. Orr-Ewing.**

An amendment advocating the appointment of a Select Committee to consider "what changes are desirable in the limitation of broadcasts in anticipation of Parliamentary debates," but refraining from endorsing the principle of limitation of broadcasting rights, was moved by **Mr. Donnelly** (Lab) He pointed out that at present M P s were free to express their views at any time in any medium except broadcasting, and argued that the Select Committee ought not to be tied in advance to support of the "mean and petty" principle of limitation The amendment was seconded by **Mr. Montgomery Hyde** (U U.) and supported by **Sir Robert Boothby** (C), a well-known political broadcaster Sir Robert criticized "attempts to make the B B.C the lackey of the party machines," which, he alleged, had formerly brought "great pressure to bear" on the Corporation and had succeeded in driving "unorthodox" political speakers off the air

Other Conservative speakers in favour of the amendment included **Mr. Julian Amery** and **Mr. Rhys-Davies,** whilst Labour supporters of the amendment included **Mr Edelman, Miss Elaine Burton, Mr. J. Hynd,** and **Mr. Michael Stewart.** The 14-day ban was also criticized by **Mr. Grimond** (Lib), who believed, however, that if there had to be a ban, it would be better imposed by a directive than by "a hole-in-corner arrangement between the party machines "

Mr. Donnelly's amendment was defeated on a free vote by 271 votes to 126, and the Government's motion agreed to without a further division.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Beveridge Committee Report, 11261 A.)**

B. UNITED STATES. — President Eisenhower's Christmas Message to the Peoples of Eastern Europe.

A Christmas message to the peoples of the East European countries from President Eisenhower was broadcast by Radio Free Europe, worded as follows: "I want you to know that the American people recognize the trials under which you are suffering; join you in your concern for the restoration of individual freedom and political liberty; and share your faith that right in the end will prevail to bring you once again among the free nations of the world."—(New York Times)

(Prev. rep. 14414 A.)

C. SCOTLAND. — Transfer of Scottish Road Powers.

An Order-in-Council was laid before Parliament on Dec. 30 under which the powers of the Minister of Transport and Civil Aviation relating to the construction, maintenance and management of roads, ferries and bridges in Scotland will be transferred to the Secretary of State for Scotland on April 1, 1956. Under this Order the Secretary of State will become responsible for all trunk roads in Scotland and for making grants to local highway authorities in respect of classified roads.

(The Scotsman, Edinburgh)

D. WESTERN GERMANY. — Defence Legislation. - Corrigendum.

In article 14567 A (German defence legislation) the beginning of the seventh paragraph in the first column of page 14569 should read: "During the Bundestag debate ..." and not "the Bundesrat debate ..."—(Ed. K.C.A.)

A. UNITED KINGDOM. — National Parks and Nature Reserves. - Designation of Yorkshire Dales, Exmoor, Northumberland, and Brecon Beacons National Parks. - The Queen Elizabeth Forest Park. - The Cairngorm, Cader Idris, and other Nature Reserves.

Developments during the past two years in connexion with the establishment of National Parks, Forest Parks, and Nature Reserves are summarized below.

National Parks, etc.

Yorkshire Dales An Order designating the Yorkshire Dales as a national park was signed by Sir Patrick Duff (then chairman of the National Parks Commission) on Dec 7, 1953, and was confirmed by Mr. Harold Macmillan (then Minister of Housing and Local Government) on Oct. 13, 1954. The park (the seventh to be designated) covers an area of 680 square miles in the North and West Ridings of Yorkshire, it stretches from north of Skipton to Swaledale and from Sedbergh to the outskirts of Richmond, and corresponds broadly with the proposals of the Hobhouse Committee It includes within its boundaries Bolton Abbey, Gardale Scar, Ingleborough, Whernside, and Penyghent.

Exmoor. A Designating Order for the Exmoor National Park was signed by Sir Patrick Duff on Jan 27, 1954, and confirmed by Mr. Macmillan on Oct 18, 1954. The park covers an area of 265 square miles, including the whole of Exmoor and the wooded coastline from Minehead through Porlock and Lynmouth to Combe Martin The Quantock Hills are not included in the park, which otherwise corresponds with the Hobhouse Committee's proposals

Northumberland. A Designating Order for the Northumberland National Park was signed on behalf of the National Parks Commission on Sept 20, 1955. The park covers most of the upland country of Northumberland from the Cheviot Hills in the north to the Roman Wall in the south

Brecon Beacons. The Brecon Beacons Designating Order, signed on Sept. 22, 1955, covered 515 square miles in the counties of Breconshire, Carmarthenshire, and Monmouthshire from Abergavenny in the east to Llandilo in the west. The area includes the Brecon Beacons, the Black Mountains, the cathedral city of Brecon, Hay-on-Wye, and Llanthony Abbey.

Pembrokeshire Coastal Footpath. The Minister of Housing and Local Government approved proposals on July 16, 1953, submitted by the National Parks Commission, for a footpath along the Pembrokeshire coast from the county boundary at Amroth to St. Dogmaels The path, about 167 miles long, will lie almost entirely within the Pembrokeshire National Park.

"Offa's Dyke" Footpath. On Oct 27, 1955, Mr Sandys (Minister of Housing and Local Government) approved the Commission's proposals for a long-distance path from the north to the south of Wales running mainly along the line of Offa's Dyke. The path, about 168 miles in length, will run from Prestatyn (Flintshire) to Chepstow (Monmouthshire), passing through or near Llangollen, Oswestry, Hay-on-Wye, and Monmouth. Between Prestatyn and the Vale of Llangollen it will run along the Clwydian range, will then follow Offa's Dyke through the border country between England and Wales, and in Herefordshire will leave the Dyke and pass through the moorlands on the eastern edge of the Black Mountains

Forest Parks.

Scotland. The Forestry Commissioners announced on June 2, 1954, that, in order to provide "a suitable commemoration in Scotland of Coronation Year," they had arranged for an area of nearly 41,500 acres in the Trossachs to become a national forest park The area —to be named the Queen Elizabeth Forest Park—will extend from the headwaters of the Forth at Loch Vennachar to the shores of Loch Lomond, and will include Ben Lomond, Loch Ard Forest, and some of the most beautiful parts of the Trossachs

Border Area. On Sept 20, 1955, the Commissioners announced that they intended to create a national forest park—to be known as the Border Forest Park—from a number of forested areas lying immediately to the west of the new Northumberland Park, including Kielder Forest (Northumberland), Kershope Forest (Cumberland), and Newcastleton and Wauchope Forests (Roxburghshire).

Nature Reserves.

The director-general of the Nature Conservancy (Mr. E. M. Nicholson) announced on July 9, 1954, that an area of about 62 square miles in the Cairngorm mountains (Scotland) had been designated as a nature reserve, with the primary object of safeguarding characteristic Highland wild life.

The area of the reserve—described by Mr Nicholson as "much the largest in Britain, and probably the largest in Western Europe, except for a nature reserve in Switzerland"—includes four mountains (Ben Macdhui, Braeriach, Cairntoul, and Cairngorm) over 4,000 feet high, and is the home of golden eagles, red and roe deer, wild cats, and over 200 species of flowering plants. Mr. Nicholson added that the programme of scientific investigations for the reserve would probably include the regeneration of the native Scots pine; the ecology of mountain birds, plants, and insects; and high-altitude meteorology.

The more important Nature Reserves designated by the Conservancy since 1953 are listed below:

(1) Blean Woods, near Canterbury. About 76 acres, the haunt of the rare heath fritillery butterfly.

(2) Monk's Wood, Huntingdonshire. About 275 acres, noteworthy for rare plants and insects

(3) Tentsmuir Point, Taymouth, Fife. About 92 acres used as a breeding place by terns, and also much used by migratory birds

(4) Scolt Head Island, Norfolk coast 1,628 acres of dunes and marsh on which it is intended to carry out researches into the use of grass to consolidate mud-flats into sea-resisting embankments as a precaution against floods

(5) Orfordness and Havergate Island, Suffolk coast About 500 acres used by avocets as a breeding ground

(6) Barnfield, Kent Site of the discovery of the Swanscombe skull and other prehistoric relics

(7) Old Winchester Hill, Hampshire About 140 acres of chalk grassland studded with trees of great horticultural interest

(8) Woodwalton Fen, Huntingdonshire About 500 acres of fenland

(9) Huntspill, near Bridgwater, Somerset Over 6,000 acres of mudflats and foreshore, used for experiments in the use of grass to check coastal erosion, and a favourite wintering ground for wildfowl.

(10) Castor Highlands, near Peterborough About 105 acres of heath and woodland particularly rich in butterflies and other insects

(11) Cwm Idwal, near Snowdon, Caernarvonshire. About 984 acres, forming the first Nature Reserve in Wales; a natural amphitheatre of great botanical, geological, and scenic interest, with flora of Arctic-Alpine type dating from the Ice Age

(12) The Axmouth - Lyme Regis Undercliffs, on the Devon - Dorset coast A coastal strip of 5½ miles covering the most important landslip area in England.

(13) The Cader Idris Reserve, in the south of the Snowdonia National Park (see 11301 C) About 969 acres (to be increased later to over 2,500 acres) of mountain scenery, including the peak of Cader Idris itself Of great geological interest, with clearly-marked strata of volcanic laval, igneous rocks, and fossil-bearing slates

(14) Cors Tregaron, near Aberystwyth Described as "the best actively growing raised bog in England and Wales," and the haunt of the very rare polecat Extent 15,000 acres.

(15) Newborough Warren and the neighbouring promontory of Ynys Llanddwyn, southern Anglesey. A well-known bird sanctuary, with interesting flora, 283 acres, intended to be increased to about 3,800 acres

(16) Wychwood Forest, Oxfordshire The remnant (647 acres) of a Royal Forest owned by the Crown from the Norman Conquest to the early 19th century, intended to be treated as a permanent forest, regenerating naturally.

(17) Hales Wood, near Saffron Walden, Essex A small area for the preservation of the oxlip, which in Britain grows only in this area

(18) Tring Reservoirs, Hertfordshire - Buckinghamshire border. A small area of great ornithological importance.

(19) Hermaness (island of Unst) and Noss Island. These two areas in the Shetlands, measuring 1,071 acres and 774 acres, will be maintained as a bird sanctuary

(20) Roundsey Wood, near Grange-over-Sands (Lancs) An area of 287 acres in the south of the Lake District; intended to serve as an outdoor laboratory for the Conservancy's research workers at Grange-over-Sands

[Nos. 1-2 were designated on July 2, 1953; 3-8 on March 10, 1954; 9-10 on June 15, 1954, 11 on Nov 24, 1954; 12 on March 16, 1955; 13-15 on June 4, 1955; 16-18 on July 28, 1955; and 19-20 on Sept 26, 1955.]

It was announced on March 2, 1954, that Lord Strang (formerly Permanent Under-Secretary, Foreign Office) had been appointed chairman of the National Parks Commission in place of Sir Patrick Duff, retiring.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 12455 C.)**

B. UNITED STATES. — 1956 Presidential Election. - Mr. Stevenson and Senator Kefauver to seek Democratic Nomination. - 1955 State and Local Elections.

Mr. Adlai Stevenson, the former Governor of Illinois and Democratic candidate in the 1952 presidential election, formally announced on Nov. 15 that he would seek the Democratic nomination in the 1956 presidential election. Senator Estes Kefauver (Tennessee), who was defeated by Mr. Stevenson for the 1952 Democratic nomination, announced on Dec. 16 that he also would seek the Democratic nomination in 1956. On Dec. 8 Senator Knowland of California, the Republican leader in the Senate, had stated that unless President Eisenhower announced by the end of January that he intended to seek a second term as President, he would offer himself as a candidate for the Republican nomination.

Elections were held on Nov. 8 for four State Governorships and for a number of State legislatures, mayoralities of cities and towns, and minor offices throughout the country. Although polling was generally light, and although the elections were mostly fought on local issues, a certain swing to the Democrats was observed. This was most noticeable in the State of Indiana —where many towns elected Democratic mayors for the first time in over 20 years—and in the Democratic gain of the mayoralty of Philadelphia.—(New York Times - New York Herald Tribune) **(Prev. rep. 1954 Elections, 13881 A; 1952 Presidential Elections, 12553 A; 12667 A.)**

A. SUDAN. — Declaration of Independence by Parliament. - Resignation of Governor-General.

The Sudanese House of Representatives adopted unanimously four resolutions on Dec. 19 declaring the Sudan a sovereign independent republic, providing for the election of a Constituent Assembly and of a five-man committee to exercise the powers of the Head of State, and promising full consideration to Southern demands for a federal Constitution. The wording of the resolutions—which, by agreement between the parties, were moved by back-benchers from both sides of the House—was as follows :

(1) " That an address be presented to the Governor-General in the following terms : ' We, the members of the House of Representatives in Parliament assembled, declare in the name of the Sudanese people that the Sudan has become a fully independent sovereign State, and request your Excellency to ask the two condominium Powers [i.e. Britain and Egypt] to recognize the declaration forthwith '

(2) " In view of the fact that the creation of a Sudanese Head of State is a necessary consequence of recognition of the independence of the Sudan, the House is of the opinion that a committee of five Sudanese should be elected by Parliament to exercise the powers of the Head of State under the temporary Constitution to be enacted by the present Parliament, until such a Head is elected in accordance with the provisions of the final Constitution of the Sudan, that the chairmanship of the committee should be by monthly rotation ; and that the committee should fix its own rules of procedure "

(3) " That the House is of the opinion that an elected Constituent Assembly should be set up to draft and approve the final Constitution of the Sudan and electoral laws for future Parliaments "

(4) " That the House is of the opinion that the claims of the Southern members of Parliament for a federal Government for the three Southern provinces should be given full consideration by the Constituent Assembly "

The British and Egyptian Governments had previously (Dec. 3) signed documents amending the 1953 agreement on the Sudan so that the country's future status might be decided by a national plebiscite, as had been proposed by the Sudanese Parliament on August 29.

A supplementary agreement for the establishment of an international commission to supervise both the plebiscite and elections for a Constituent Assembly was signed at the same time, and joint invitations were handed two days later to the Cairo envoys of the seven countries which, it had been agreed, should be represented on the commission. The Sudanese Cabinet, however, protested to the British and Egyptian Governments on Dec 11 that it had not been consulted on the procedure for Sudanese self-determination ; demanded representation on the plebiscite commission ; and rejected the commission's proposed terms of reference.

The British Foreign Office announced on Dec. 12 that the Governor-General of the Sudan, Sir Knox Helm, wished to resign for personal reasons ; that H.M. Government were prepared to accept his resignation, and did not propose to nominate another British candidate in his place, and that the British and Egyptian Governments were in consultation on " the steps to be taken in regard to the post of Governor-General, having in mind the requirements of the Anglo-Egyptian agreement that there should be a free and neutral atmosphere during the rest of the period of self-determination " Sir Knox Helm's resignation was also subsequently accepted by the Egyptian Government.

The National Unionist Party proposed on Dec. 14 that a commission of three, consisting of a Government supporter, an Opposition nominee, and a Southern representative, should be appointed to fulfil the functions of Head of State, this suggestion was accepted by the Opposition parties, on condition that the commission also included two Independents The proposal to appoint a commission of five to act as Head of State was incorporated in the above resolutions which were adopted by the House of Representatives on Dec. 19

The Sudanese Prime Minister, Mr. Azhari, stated on Dec. 15 that his Government had completed its first two tasks, the Sudanization of the Administration and the evacuation of foreign troops, and that it only remained for Parliament to proclaim the country's complete independence. The suggestion that the decision on the country's future should be taken, not by a Constituent Assembly or through a plebiscite, but by Parliament, had previously been put forward by Mr. Azhari on Oct. 18, and was approved on Dec. 18 by the joint parliamentary committee which had been considering the question. Following the Sudanese Parliament's resolution of Dec. 19, statements were issued on the same day by the British and Egyptian Governments welcoming its decision, and announcing that the two Governments were in consultation on the formal steps necessary to put the resolution into effect.

Sayed Ali el-Mirghani, the leader of the Khatmia sect, and Sayed Abdel Rahman el-Mahdi, leader of the Ansar sect, issued a joint statement on Dec. 3 calling on Sudanese politicians to work for the immediate creation of an all-party Government. The statement caused considerable surprise, as the two leaders had been political opponents for many years, el-Mirghani being associated with the Ashigga Party and later with the National Unionists, and el-Mahdi with the Umma Party Since the National Unionists' decision in favour of complete independence, however, the differences between the two parties had largely disappeared, and demands had been put forward by the Opposition for the formation of an all-party Government during the period of transition Immediately after the publication of this statement, negotiations were opened for the creation of such a Government, but without immediate success

A Sudan Government spokesman announced on Dec. 19 that the state of emergency imposed after the mutiny in August had been lifted in the provinces of Upper Nile and Bahr-el-Ghazal.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Sudan, 14559 A.)

B. GERMANY. — Return of Dr. John from Eastern to Western Germany.

It was officially announced in Bonn on Dec. 13 that Dr. Otto John (the former head of the Federal Office for the Protection of the Constitution, who had defected to East Berlin in July 1954) had secretly returned to West Berlin on the previous day. The announcement said that Dr. John had " placed himself at the disposal of the security group of the Federal Criminal Office," and that his examination by the investigating judge had been opened. It was reported in the Press that Dr. John had been flown immediately to Western Germany, where he was being detained for further interrogation.

Although no details were officially given of Dr. John's escape to West Berlin, the Berlin Correspondent of the Copenhagen paper *Berlingske Tidende* (Hr Henrik Bonde-Henriksen) revealed that he had driven Dr John from the Humboldt University in Unter den Linden to West Berlin At the university Dr. John had been able to disappear amongst the students and evade his security escort, and had then been driven straight to Tempelhof aerodrome in the American sector of the city.

The official East German News Agency (ADN) announced Dr. John's return to West Berlin in the following terms " Dr John, former president of the Bonn Office for the Protection of the Constitution, who was granted asylum in the German Democratic Republic on July 20, 1954, has left the German Democratic Republic Dr. John had repeatedly stated that he intended to conduct the fight against neo-Fascism in Western Germany."

Dr. John's reappearance in West Berlin coincided with a meeting of the special Bundestag committee investigating his flight in July 1954, at which Dr Schroder, the Federal Minister of the Interior, had reiterated his earlier view that Dr John had not gone to East Berlin with traitorous intentions and that the theory of his abduction should not be rejected

Dr. John was formally arrested at Wiesbaden on Dec. 23. The Federal public prosecutor in Karlsruhe, Dr. Wiechmann, stated on the same day that a warrant for his arrest had been authorized on Dec. 12 but had not been immediately enforced because Dr. John had voluntarily placed himself in custody. There was, however, " strong suspicion " that he had maintained treasonable connexions, and also a fear that he might flee abroad to avoid a possible trial ; the order for his arrest had therefore been executed to make sure that he would be available to stand trial if the investigating judge decided that there was a charge against him.—(Frankfurter Allgemeine Zeitung - Der Tagesspiegel, Berlin) **(Prev. rep. 13851 A.)**

C. UNITED KINGDOM. — National Debt.

A White Paper issued on Oct. 19, 1955, gave the total National Debt of the U.K. at March 31, 1955, as £26,933,696,186 —an increase of £350,663,424 over the total of £26,583,032,762 at March 31, 1954.

Of the total National Debt at March 31, 1955, £3,828,356,674 constituted Funded Debt, £11,614,000 was the estimated capital liability of Terminable Annuities, £5,246,600,000 represented the Floating Debt, £15,716,773,298 represented other internal Unfunded Debt, and £2,130,352,214 represented debt payable in external currencies (excluding debt arising out of the First World War). Total debt conversions effected in the year ended March 31, 1955, amounted to £1,407,514,690

During the year Stock totalling £35,000,000 was issued as compensation under the Coal Industry Nationalization Act, 1946, whilst £13,000,000 of Iron and Steel Stock, 1953, was transferred back to the Treasury and cancelled.—(Cmd. 9297)

(Prev. rep. National Debt, 13982 A.)

D. INDIA. — Establishment of Diplomatic Relations with Outer Mongolia.

It was announced in New Delhi on Dec. 23 that India had established diplomatic relations with Outer Mongolia ; that the Indian Ambassador in Peking (Mr. R. K. Nehru) would serve concurrently as Ambassador to Mongolia ; and that the Mongolian Ambassador in Peking would similarly serve as Ambassador to India as well as to the People's Republic of China.—(The Hindu, Madras - The Statesman, Calcutta)

A. SPORT. — Review of Sporting Events in 1955.

A review of the leading sporting events during 1955 is given below, covering cricket, association and rugby football, lawn tennis, rowing, and horse-racing.

Cricket.

County Championship. The County Championship was won by Surrey for the fourth successive year, the final championship table being as follows :

	P.	W	L	D	First innings lead in match: Tie	No dec.	L	D.	Pts
Points awarded	—	12	—	—	6	—	4	4	—
Surrey	28	23	5	0	0	0	2	0	284

Somerset	28	4	17	7	0	0	2	2	64

England v. Australia Test Matches. The M.C.C. touring team visited Australia during the winter of 1954-55 and played five Test matches, of which three were won by England, one by Australia, and one was drawn. England thus retained the "ashes," which she had regained in 1953 after 20 years (see 13316 A). Results of the Test matches were as follows :

First Test. Australia won by an innings and 154 runs. Scores : Australia 601 for 8 dec. (R. N. Harvey 162, A. Morris 153, R. Lindwall 64 not out), England 190 (T. E. Bailey 88, R. Lindwall 3–27, I. Johnson 3–46) and 257 (W. J. Edrich 88). Played at Brisbane.

Second Test. England won by 38 runs. Scores : England 154 (R. Archer 3–12) and 296 (P. B. H. May 104, M. C. Cowdrey 54), Australia 228 (F. Tyson 4–54, T. E. Bailey 4–59) and 184 (R. N. Harvey 92 not out, F. Tyson 6–85). Played at Sydney.

Third Test. England won by 128 runs. Scores : England 191 (M. C. Cowdrey 102, K. R. Miller 3–44, R. Archer 4–34) and 279 (P. B. H. May 91, W. Johnston 5–85); Australia 231 (J. B. Statham 5–60) and 111 (F. Tyson 7–77). Played at Melbourne.

Fourth Test. England won by five wickets. Scores : England 341 (L. Hutton 80, M. C. Cowdrey 79) and 97 for 5 wkts. (K. R. Miller 3–40); Australia 323 (L. Maddocks 69, T. E. Bailey 3–39) and 111 (R. Appleyard 3–13, J. B. Statham 3–38, F. Tyson 3–47). Played at Adelaide.

Fifth Test. Match drawn (play possible on only three days owing to rain). Scores : England 371 for 7 dec. (T. W. Graveney 111, D. Compton 84, P. B. H. May 79, T. E. Bailey 72); Australia 221 (C. McDonald 72, J. H. Wardle 5–79) and 118 for 6 wkts. Played at Sydney.

England v. New Zealand Test Matches. The M.C.C. touring side also played two Test matches in New Zealand, both of which were won. Results were as follows :

First Test. England won by eight wickets. Scores : England 209 for 8 dec. (J. R. Reid 4–36) and 49 for 2 wkts.; New Zealand 125 (B. Sutcliffe 74, J. B. Statham 4–24, F. Tyson 3–23) and 132 (F. Tyson 4–16). Played at Dunedin.

Second Test. England won by an innings and 20 runs. Scores : England 246 (L. Hutton 53, A. M. Moir 5–62); New Zealand 200 (J. R. Reid 73, J. B. Statham 4–28, R. Appleyard 3–38) and 26 (R. Appleyard 4–7, J. B. Statham 3–9). Played at Auckland. New Zealand's second innings score of 26 was the lowest in the history of Test match cricket.

The M.C.C. team which toured Australia and New Zealand was as follows : L. Hutton (Yorkshire) (capt.), P. B. H. May (Surrey) (vice-capt.), R. T. Simpson (Nottinghamshire), W. J. Edrich (Middlesex), T. E. Bailey (Essex), M. C. Cowdrey (Kent), D. C. S. Compton (Middlesex), A. V. Bedser (Surrey), T. G. Evans (Kent), J. H. Wardle (Yorkshire), J. B. Statham (Lancashire), T. W. Graveney (Gloucestershire), R. Appleyard (Yorkshire), J. E. McConnon (Glamorgan), P. J. Loader (Surrey), F. Tyson (Northamptonshire), K. V. Andrew (Northamptonshire), and J. V. Wilson (Yorkshire).

England v. South Africa Test Matches. The South African touring team visited England in the summer of 1955 and played five Tests, of which three were won by England and two by South Africa. Results were as follows :

First Test. England won by an innings and five runs. Scores : England 334 (D. Kenyon 87, P. B. H. May 83); South Africa 181 (D. J. McGlew 68, J. E. Cheetham 54, J. H. Wardle 4–24) and 148 (D. J. McGlew 51, F. Tyson 6–28). Played at Trent Bridge, Nottingham.

Second Test. England won by 71 runs. Scores : England 133 (P. Heine 5–60) and 353 (P. B. H. May 112, D. Compton 69, T. W. Graveney 60, H. J. Tayfield 5–80); South Africa 304 (R. A. McLean 142, H. J. Keith 57, J. H. Wardle 4–65) and 111 (J. B. Statham 5–39). Played at Lord's.

Third Test. South Africa won by three wickets. Scores : South Africa 521 for 8 dec. (J. H. B. Waite 113, P. L. Winslow 108, D. J. McGlew 104 not out, T. L. Goddard 62) and 145 for 7 wkts. (R. A. McLean 50, F. Tyson 3–53), England 284 (D. Compton 158) and 381 (P. B. H. May 117, D. Compton 71, M. C. Cowdrey 50, P. Heine 5–86). Played at Old Trafford, Manchester.

Fourth Test. South Africa won by 224 runs. Scores : South Africa 171 (P. Loader 4–52) and 500 (D. J. McGlew 133, W. R. Endean 116 not out, T. L. Goddard 74, H. J. Keith 73); England 191 (D. Compton 61, P. Heine 4–70, H. J. Tayfield 4–70) and 256 (P. B. H. May 97, T. L. Goddard 5–69, H. J. Tayfield 5–94). Played at Headingley, Leeds.

Fifth Test. England won by 92 runs. Scores : England 151 (T. L. Goddard 5–31) and 204 (P. B. H. May 89 not out, H. J. Tayfield 5–60); South Africa 112 (G. Lock 4–39) and 151 (J. H. B. Waite 60, J. Laker 5–56, G. Lock 4–62). Played at The Oval.

The South African touring side was as follows : J. Cheetham (Western Province) (capt.), J. McGlew (Natal) (vice-capt.), N. Adcock (Transvaal), C. Duckworth (Rhodesia), W. R. Endean (Transvaal), F. Fuller (Western Province), T. L. Goddard (Natal), P. Heine (Orange Free State), H. Keith (Natal), R. A. McLean (Natal), P. Mansell (Rhodesia), A. Murray (Eastern Province), V. Smith (Natal), H. J. Tayfield (Natal), J. H. B. Waite (Transvaal), P. L. Winslow (Transvaal).

University Match. The 111th University cricket match was drawn, the scores being as follows : Cambridge, 304 and 178 for 8 dec.; Oxford 170 and 230 for 6 wickets. Played at Lord's. Of the 111 University matches (which began in 1827) Cambridge have won 48 and Oxford 42, with 21 matches drawn.

Association Football.

Football League. League champions—Chelsea (for the first time in the club's history); runners-up—Wolverhampton Wanderers, promoted to Division I—Birmingham City and Luton Town; promoted to Division II—Barnsley (from Division III North) and Bristol City (from Division III South); relegated to Division II—Leicester City and Sheffield Wednesday; relegated to Division III—Derby County and Ipswich Town.

Scottish League. League champions—Aberdeen; runners-up—Glasgow Celtic; promoted to Division A—Airdrieonian and Dunfermline Athletic.

The two bottom clubs in Division A (Motherwell and Stirling Albion) were not relegated to Division B because the Scottish League was reorganized at the end of the season, as follows : Division A—18 clubs, comprising all the 16 clubs who were in the division during the 1954-55 season, plus the two promoted clubs; Division B—19 clubs, comprising all clubs in the division during the season (minus the two promoted teams) and five new clubs hitherto in Division C—Berwick Rangers, Dumbarton, East Stirlingshire, Montrose, and Stranraer. The former Division C was abolished.

International Championship. The International Championship was won by England, the final table being as follows :

	P.	W.	D.	L.	Goals F.	A.	Pts.
England	3	3	0	0	12	4	6
Scotland	3	1	1	1	5	9	3
Wales ..	3	1	0	2	5	6	2
Ireland ..	3	0	1	2	4	7	1

Results of the championship matches were as given below :

Ireland 0, England 2 (Belfast, Oct. 2).
Wales 0, Scotland 1 (Cardiff, Oct. 16).
Scotland 2, Ireland 2 (Hampden Park, Glasgow, Nov. 3).
England 3, Wales 2 (Wembley, Nov. 10).
England 7, Scotland 2 (Wembley, April 2).
Ireland 2, Wales 3 (Belfast, April 20).

International Matches against Foreign Countries. Matches were played by the home countries against Germany (the world champions), Hungary (the Olympic champions), Yugoslavia, Portugal, France, Spain, and Austria, results being as follows :

Wales 1, Yugoslavia 3 (Cardiff, Sept. 22.).
England 3, Germany 1 (Wembley, Dec. 1).
Scotland 2, Hungary 4 (Hampden Park, Glasgow, Dec. 8).
Scotland 3, Portugal 0 (Hampden Park, Glasgow, May 5).
France 1, England 0 (Paris, May 15).
Spain 1, England 1 (Madrid, May 18).
Yugoslavia 2, Scotland 2 (Belgrade, May 15).
Austria 1, Scotland 4 (Vienna, May 19).
Portugal 3, England 2 (Oporto, May 22).
Hungary 3, Scotland 1 (Budapest, May 29).

F.A. Cup. Won by Newcastle United, who beat Manchester City 3–1 at Wembley on May 7. By winning the Cup for the sixth time Newcastle equalled the record of Aston Villa and Blackburn Rovers.

Scottish Cup. Won by Clyde, who beat Glasgow Celtic 1–0 on April 27, after a 1–1 draw.

F.A. Amateur Cup. Won by Bishop Auckland, who beat Hendon 2–0 at Wembley on April 16 and thereby won the Amateur Cup for the eighth time.

Rugby Union Football.

International Championship. Won jointly by France and Wales, the final table being as follows .

	P.	W	D.	L.	Points F	A.	Pts.
{ France	4	3	0	1	47	28	6
{ Wales	4	3	0	1	48	28	6
Scotland	4	2	0	2	32	35	4
England	4	1	1	2	24	31	3
Ireland	4	0	1	3	15	44	1

Results of the championship matches were as given below :

France 15 points, Scotland nil (Paris, Jan 8).
Wales 3 points, England nil (Cardiff, Jan 22)
Ireland 3 points, France 5 points (Dublin, Jan 22)
Scotland 18 points, Wales 8 points (Edinburgh, Feb. 5).
Ireland 6 points, England 6 points (Dublin, Feb. 12)
England 9 points, France 16 points (Twickenham, Feb 26).
Scotland 12 points, Ireland 3 points (Edinburgh, Feb. 26).
Wales 21 points, Ireland 3 points (Cardiff, March 12)
England 9 points, Scotland 6 points (Twickenham, March 19).
France 11 points, Wales 16 points (Paris, March 26)

Internationals with South Africa. A British Isles touring side (the " British Lions "), drawn from England, Scotland, Wales, and Ireland, toured South Africa during the autumn of 1955 Four international matches were played with the following results

South Africa 22 points, British Isles 23 points (Johannesburg, Aug 6)
South Africa 25 points, British Isles 9 points (Cape Town, Aug 20)
South Africa 6 points, British Isles, 9 points (Pretoria, Sept 3)
South Africa 22 points, British Isles 8 points (Port Elizabeth, Sept 24)

Although South Africa maintained her record of not having lost an international series since 1896, the British Isles succeeded in sharing the series The last occasion on which South Africa had shared a series was in 1928, against New Zealand The " Lions " played 24 matches during their South African tour, with the following result—won 18, drawn 1, lost 5, points for 418, points against 271.

County Championship. The County Championship for 1954-55 was won by Lancashire, who beat Middlesex by 14 points to 8 points.

University Match. Cambridge beat Oxford by three points to nil at Twickenham on Dec. 7, 1954.

Lawn Tennis.

Wimbledon Championships. The Wimbledon Championships ended on July 2, the winners being as follows

Men's Singles—T. Trabert (U.S.A.) beat K Nielsen (Denmark) 6–3, 7–5, 6–1

Women's Singles—Miss L. Brough (U.S A) beat Mrs. J. Fleitz (U.S.A.) 7–5, 8–6.

Men's Doubles—R N Hartwig and L. A Hoad (Australia) beat N A. Fraser and K. R Rosewall (Australia) 7–5, 6–4, 6–3

Women's Doubles—Miss A Mortimer and Miss J A. Shilcock (Great Britain) beat Miss S J Bloomer and Miss P E Ward (Great Britain) 7–5, 6–1.

Mixed Doubles—V. Seixas and Miss D Hart (U S A.) beat E. Morea (Argentina) and Miss L. Brough (U.S.A) 8–6, 2–6, 6–3.

Davis Cup. Australia regained the Davis Cup from the United States by winning all five matches in the challenge round, played in New York on Aug 26-28. Results were as follows . K. R. Rosewall (Australia) beat V. Seixas (U S.A.) 6–3, 10–8, 4–6, 6–2 ; L Hoad (Australia) beat T Trabert (U S A.) 4–6, 6–3, 6–3, 8–6 ; L. Hoad beat V. Seixas 7–9, 6–1, 6–4, 6–4 , K R Rosewall beat H. Richardson (U.S.A.) 6–4, 3–6, 6–1, 6–4 ; L. Hoad and R. Hartwig beat V. Seixas and T Trabert 12–14, 6–4, 6–3, 3–6, 7–5. Australia and the U S A. met in the challenge round for the 12th successive year

Australia, the winners of the North American zone, beat Italy, the winners of the European zone, and thus qualified to meet the United States in the challenge round

Rowing.

Henley Royal Regatta. The Royal Regatta ended on July 2, the winners of the various trophies being as follows ·

Grand Challenge Cup—University of Pennsylvania (U S A) beat Vancouver R C. (Canada) by one-third of a length in 6 min 56 sec.

Ladies' Plate—Queens' College, Cambridge, beat Lady Margaret, Cambridge A by 1½ lengths in 7 min. 26 sec

Princess Elizabeth Cup—Shrewsbury School beat Oundle School by eight feet in 7 min. 34 sec.

Thames Cup—Massachusetts Institute of Technology (U S.A.) beat Royal Air Force R.C. by two-thirds of a length in 7 min. 21 sec.

Stewards' Cup—Krylia Sovietov (U.S.S R.) beat Leander Club by three lengths in 7 min. 40 sec.

Visitors' Cup—Trinity Hall, Cambridge beat Lady Margaret, Cambridge A by 2¼ lengths in 7 min. 58 sec.

Wyfold Cup—Thames R.C beat Kettering R.C. by 1½ lengths in 7 min. 51 sec.

Silver Goblets—I. Buldakov and V. Ivanov (U.S.S.R) beat J. A. Gobbo and C. G. Davidge (Leander Club) by four lengths in 8 min 30 sec.

Double Sculls—G Zhilin and I. Emchuk (U.S.S.R.) beat H Vollmer and T. Keller (Switzerland) by half a length in 7 min. 55 sec

Diamond Sculls—T. Kocerka (Poland) beat S. C. Rand (Royal Air Force R.C.) by 1¼ lengths in 8 min. 33 sec

University Boat Race. In the 101st University boat race, rowed on March 26, Cambridge beat Oxford by 16 lengths in 19 min. 10 sec. The margin was the second largest in the history of the boat race, being exceeded only by Cambridge's 20-lengths' win in 1900. Cambridge have won 55 races and Oxford 45, with one dead heat

Horse Racing.

The results of the five " classic " races and the Grand National were as follows :

The Derby. Madame Volterra's *Phil Drake* (F. Palmer) beat *Panaslipper* by 1½ lengths, with *Acropolis* third. Run at Epsom on May 25.

The Oaks. Lady Zia Wernher's *Meld* (W. Carr) beat *Ark Royal* by six lengths, with *Reel In* third. Run at Epsom on May 27.

St. Leger. Lady Zia Wernher's *Meld* (W. Carr) beat *Nucleus* by three-quarters of a length, with *Beau Prince* third. Run at Doncaster on Sept 7.

1,000 Guineas. Lady Zia Wernher's *Meld* (W. Carr) beat *Aberlady* by two lengths, with *Feria* third. Run at Newmarket on April 29.

2,000 Guineas. Mr David Robinson's *Our Babu* (D Smith) beat *Tamerlane* by a neck, with *Klairon* third Run at Newmarket on April 27

Grand National. Mrs W. H. Welman's *Quare Times* (P Taaffe) beat *Tudor Line* by 12 lengths, with *Cary's Cottage* third Run at Aintree on March 26

(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times - New York Times - Cape Times - Australian News and Information Bureau) **(Prev. rep. 13961 A.)**

A. UNITED KINGDOM. — New Company for Production of Synthetic Rubber in Britain.

The Dunlop Rubber Company announced on Nov. 18 the forthcoming creation of a new company, the International Synthetic Rubber Co. Ltd , to make " general purpose " synthetic rubber on a considerable scale for the first time in Britain.

It was stated that the new company would have an initial capital of £100 in £1 shares, to be increased later (subject to the consent of the Capital Issues Committee) to £7,000,000, with provision for raising a further £2,000,000 if necessary The company's ordinary share capital would probably be £4,000,000, and firms who had already agreed to subscribe included—in addition to Dunlop's—the Goodyear Tyre and Rubber Co (Great Britain), the Firestone Tyre and Rubber Co , and the Michelin Tyre Co Other tyre manufacturers would be invited to participate. Production was expected to start in 1958, and it was hoped that the initial output would be about 50,000 tons of synthetic rubber annually

It was pointed out in the Press that the Dunlop Rubber Company had recently begun building a new synthetic rubber plant, to cost £500,000, at Fort Dunlop (Birmingham), but that this project aimed at the production of only about 2,000 tons of new synthetic rubber for experimental purposes, and was not intended for the manufacture of " general purpose " synthetic rubber on a commercial scale.—(Times - Daily Telegraph - Financial Times) **(Prev. rep. Synthetic Rubber, World Production, 14283 C.)**

B. SWITZERLAND. — New Federal President.

Dr. Markus Feldmann (58), head of the Department of Justice and Police in the Swiss Federal Council (i.e. the Government), was elected on Dec. 15 as President of the Swiss Confederation for 1956. He is a member of the Farmers', Traders' and Citizens' Party and a former editor of the *Neue Berner Zeitung*.

Prior to electing the new President, the Federal Assembly (the two Houses of the Swiss Parliament meeting in joint session) re-elected the seven members of the Federal Council for a further four-year term, as required by the Constitution after the election of a new National Council. The Government consists of three Radical Democrats, three Catholic Conservatives, and one member of the Farmers', Traders' and Citizens' Party.

Because of their gains in the recent general elections, which made them the strongest party in the National Council, the Social Democrats had claimed two seats in the Federal Council, but the coalition parties took the view that any decision on this proposal would have to be deferred until a vacancy arose in the Government.—(Neue Zurcher Zeitung)

(Prev. rep. President, 13999 E ; Elections, 14558 C.)

C. CANADA. — Immigration Policy. - Further Extension of Assisted Passage Scheme.

The Canadian Government and the Commonwealth Migration Council in London announced on Dec. 16 (*a*) that the assisted passage scheme, hitherto applicable only to working heads of families, would be extended to wives and children ; (*b*) that migrants already settled in Canada could apply for assisted passages in order to bring their relatives over from Britain ; and (*c*) that the repayment of passage loans, hitherto made in monthly instalments over two years, would be spread over a longer period. It was stated that the concessions would take effect immediately, and would apply to European immigrants as well as to those from Britain.—(Daily Telegraph - Manchester Guardian) **(Prev. rep. Immigration. 14484 C.)**

A. SOUTH AFRICA. — Election of New Senate. - Protests by United Party.

Following the dissolution of the old South African Senate on Nov. 4, the electoral colleges met in each of the four provinces and in South-West Africa on Nov. 25 to elect 67 new members to the enlarged Senate, in accordance with the terms of the Senate Act passed by Parliament in June. The voting by the electoral colleges, however, was a mere formality, as the Senate Act laid down that all the Senate seats in each province should go to the party which was in a majority in that province; the effective selection of candidates had therefore taken place within the party caucuses.

The Nationalist Party accordingly took all the 27 seats for the Transvaal, the 22 seats for the Cape, the eight seats for the Orange Free State, and the two seats for South-West Africa, whilst the United Party took the eight Natal seats. The four Natives' Representatives (who normally vote with the United Party) were unaffected by the election, whilst another 18 members—four for each province and two for South-West Africa—were nominated by the Government on Dec. 6, all being Nationalists.

Of the 89 members in the new Senate, therefore, 77 will be Nationalist supporters and 12 will support the Opposition. As a result, the Nationalists will be able to rely on 171 votes in a joint sitting of the two Houses of Parliament (against 77 for the Opposition), five more than the two-thirds majority required to amend the "entrenched clauses" of the South Africa Act and remove the Cape Coloured votes from the common electoral roll.

Among the Nationalist Senators elected were a number of former Senators, including Dr H. F. Verwoerd (Minister of Native Affairs), Mr J de Klerk (Minister of Labour), and Mr. C. A van Niekerk (President of the former Senate) Three former M.P.'s were also elected—Mr J. H Grobler, Mr. J. S Labuschagne (both former members of the Afrikaner Party), and Mr J. D H. V Verster A very large number of Nationalist Party candidates sought nomination, each of whom (in accordance with a recently adopted party rule) was required to contribute a nomination fee of £20 to the party's funds. There were 156 candidates for the 27 Transvaal seats alone, but the number of candidates in the other provinces was not disclosed. The 18 nominated Senators included one woman, Mrs M D J Koster, of Port Elizabeth, the first woman in South Africa to become a senator.

The United Party in Natal had decided before the election to nominate only five candidates for the new Senate, leaving the other three seats to which it was entitled for representatives from each of the other three provinces. Of the eight U.P. Senators elected, five were former Senators. Dr Colin Steyn (leader of the United Party in the Orange Free State), who had been elected to the Senate in December 1954 in succession to Mr. G. Heaton Nicholls (see 14036 A), had stated on Nov. 11 that he had declined an offer to stand for the new Senate as he was temporarily retiring from active politics on medical advice.

When the electoral colleges met on Nov. 25, heated exchanges over the method of election to the new Senate took place between United Party and Nationalist members both in Cape Town and in Pretoria. At the Pretoria meeting the U.P. members, led by the party's leader, Mr. Strauss, left the chamber *en bloc* after the chairman of the electoral college had refused to allow speeches in support of nominations on the ground that they would make the proceedings unduly protracted.

The Parliamentary leader of the Labour Party, Mr. Hepple, had announced on Nov 16 that his party would take no part in the elections, and that no Labour M P. would participate in any joint sitting of the two Houses which the Government might arrange during the next session because "we do not recognize the new Senate as a constituent element of Parliament" Mr. Bailey Bekker, M P., leader of the Conservative Party, announced on Nov. 22 that his party also would take no part in the election.

Mr. Strauss issued a statement on Nov. 26 in which he asserted that the Nationalists were embarking on "a revolution of nihilistic destruction," and expressed the conviction that they would "destroy themselves in the process."

"History shows," he declared, "that the control of the legislative body, of the courts, of the electoral rolls, and of the army have failed to keep dictators and enemies of the people in power once the just wrath of citizens has been aroused to a determined purpose. We are nearing that point The hour of truth for South Africa is at hand. The way now lies open to those who have succeeded by their excess, and they have already cast their eyes on other objectives—our courts, our rule of law, and our parliamentary system Soon a helpless minority is to be robbed of franchise rights it has enjoyed for more than a century. No one knows yet which language or racial group may be the next target.

"The days that lie ahead will make great calls on our courage and steadfastness of purpose. .. Apathy and minor dissensions must not be allowed to sap our energies or to delay the fulfilment of our purpose. The United Party is proud to lead the battle on the political front. We shall continue to fight the present Senate, and the evil that may flow from it, with all the legal and constitutional means at our disposal We shall, if so advised by counsel, fight it before the highest tribunal in the land. We shall contest this measure and what may flow from it both in Parliament and outside .."

Protest meetings were staged throughout the Union on Nov. 25 by members of the Women's Defence of the Constitution League, who wore black sashes in mourning for the "death" of the South African constitution. Members of the League had become increasingly active since the passing of the Senate Act, and, in addition to standing in "silent vigil" outside the Union Buildings in Pretoria, had staged many protest processions in a number of cities.—(Cape Times - State Information Department, Pretoria) **(Prev. rep. 14353 A.)**

B. UNITED KINGDOM. — The Queen's Christmas Broadcast to the Commonwealth and Empire.

Her Majesty the Queen broadcast the following Christmas message to the Commonwealth and Empire from Sandringham on Dec. 25.

" . For my husband and myself and for our children the year that is passing has added to our store of happy memories We have spent most of it in this country, and we have enjoyed seeing many parts of the British Isles which we had not visited before. Now a new year will soon be upon us, and we are looking forward to seeing something of Nigeria, that great country in Equatorial Africa where more than 30,000,000 of my people have their homes

"For them and for all of us each New Year is an adventure into the unknown. Year by year, new secrets of nature are being revealed to us by science—secrets of immense power for good or evil, according to their use These discoveries resolve some of our problems, but make others deeper and more immediate A hundred years ago our knowledge of the world's surface was by no means complete; today most of the blanks have been filled in. Our new explorations are into new territories of scientific knowledge and into the unknown regions of human behaviour We have still to solve the problem of living peacefully together as peoples and as nations

"We shall need the faith and determination of our forebears when they crossed uncharted seas into the hidden interiors of Africa and Australia to guide us on our journeys into the undiscovered realms of the human spirit. In the words of our Poet Laureate [Mr. John Masefield]

> 'Though you have conquered Earth and charted Sea
> And planned the courses of all Stars that be
> Adventure on, more wonders are in Thee,
> Adventure on, for from the littlest clue
> Has come whatever worth man ever knew;
> The next to lighten all men may be you'

"We must adventure on if we are to make the world a better place. All my peoples of the Commonwealth and Empire have their part to play in this voyage of discovery. We travel all together, just as the Maori tribes sailed all together into the mysterious South Pacific to find New Zealand.

"There are certain spiritual values which inspire all of us. We try to express them in our devotion to freedom, which means respect for the individual and equality before the law. Parliamentary government is also a part of this heritage We believe in the conception of a Government and Opposition and the right to criticize and defend. All these things are part of the natural life of our free Commonwealth.

"Great opportunities lie before us Indeed, a large part of the world looks to the Commonwealth for a lead. We have already gone far towards discovering for ourselves how different nations from north and south, from east and west, can live together in a friendly brotherhood, pooling the resources of each for the benefit of all. Every one of us can also help in this great adventure. For just as the Commonwealth is made up of different nations, so those nations are made up of individuals. The greater the enterprise, the more important our personal contribution.

"The Christmas message to each of us is indivisible; there can be no 'peace on earth' without 'good will toward men.' Scientists talk of 'chain reaction'—of power releasing yet more power. This principle must be most true when it is applied to the greatest power of all · the power of love. My grandfather, King George V, in one of his broadcasts when I was a little girl, called upon his peoples in these words: 'Let each of you be ready and proud to give to his country the service of his work, his mind, and his heart' That is surely the first step to set in motion the 'chain reaction' of the powers of light, to illuminate the new age ahead of us.

"And the second step is this · To understand with sympathy the point of view of others within our own countries and in the Commonwealth, as well as those outside it. In this way we can bring our unlimited spiritual resources to bear upon the world.

"As this Christmas passes, and time resumes its march, let us resolve that the spirit of Christmas shall stay with us as we journey into the unknown year that lies ahead."

The Queen's forthcoming visit to Nigeria—referred to in her Christmas broadcast—had been announced on Nov. 28. Together with the Duke of Edinburgh, she will leave London on Jan. 27, 1956, for an 18-day tour of the Colony.

The quotation in the Queen's broadcast was from the Poet Laureate's poem *The Wanderer of Liverpool*.—(Times)

DECEMBER 31, 1955—JANUARY 7, 1956

A. SOVIET UNION - WESTERN POWERS - INDIA - PAKISTAN. — World Reactions to Speeches of Soviet Leaders during Asian Tour. - British and U.S. Criticisms. - U.S.-Portuguese Statement on Goa. - Pakistani Denunciations of Soviet References to Kashmir and "Pakhtoonistan." - Indian Press Criticisms of Soviet Leaders' Statements. - Mr. Nehru's Reaffirmation of India's Policy of Neutrality and Non-alignment.

Reactions to the speeches and declarations made by Marshal Bulganin and M. Khrushchov during their recent tour of India, Burma, and Afghanistan are described below.

Reactions in Britain.

Following Marshal Bulganin's speech on Nov. 21 to the Indian Parliament, the British Foreign Office spokesman (Mr. Peter Matthews) issued a statement on Nov. 22 describing the Soviet Premier's references to the situation in Germany as "thoroughly hypocritical." The spokesman said:

"The fact that there is a disunited Germany is due exclusively to Soviet interference in the affairs of Germany, without which the East German regime would not have been set up and would not continue today to exist. If Marshal Bulganin were sincere in believing that the problem of German unity could be solved by leaving that problem to the Germans themselves, then we should be in entire agreement with him. What the Government cannot accept is that a body of men in Pankow [the Berlin suburb which is the seat of the East German regime], who have no mandate whatever from the people of Germany, should be allowed to veto the unification of Germany

"Soviet propaganda has sought to represent that the obstacle to German reunification is the adherence of the German Federal Government to NATO and the Western European Union. But Mr Molotov made it plain that, in the Soviet view, German unity could only be achieved if what Mr. Macmillan called at Geneva 'the odious system at present existing in Eastern Germany' was maintained, and provided that an all-German Government was peace-loving in character As is well known, the Soviet Government only considers that Communist regimes are fully entitled to be regarded as peace-loving. The point of view expressed by Marshal Bulganin seems to be thoroughly hypocritical"

Sir George Young (head of the Foreign Office News Department) replied on Dec. 2 and Dec. 7 to M. Khrushchov's allegations, made in Rangoon, that the British regarded the Burmese as "savages" and that Britain, with other Western Powers, bore responsibility for the Second World War by having sought to "push Hitler to the East."

After saying that it was "ludicrous" to suggest that the British regarded the Burmese as "savages," Sir George referred to M. Khrushchov's claim that Russia was the only country fighting colonialism. He recalled in this connexion a speech made at the Bandung Conference by the Prime Minister of Ceylon (Sir John Kotelawala) in which the latter had enumerated the Soviet "satellite" countries and had asked "Are not these colonies as much as any of the colonial territories in Africa or Asia? If we are united in our opposition to colonialism, should it not be our duty openly to declare our opposition to Soviet colonialism as much as to Western imperialism?"

As regards M. Khrushchov's reference to the alleged responsibility of the Western Powers for the Second World War, Sir George Young remarked that this allegation was substantially the same as that put forward by M. Molotov at the Berlin conference of 1954. He recalled that Sir Anthony Eden had replied to it at the time in the following words: "It is really fantastic to suppose that Mr. Chamberlain was in any way responsible for Hitler's attack on Poland, to which Britain had given a guarantee. The Government of which Mr. Chamberlain was head gave the guarantee to Poland openly and honourably It was in fact this guarantee which resulted in the declaration of war by Britain and France on Sept. 3, 1939"

In addition, Sir George Young recalled that Mr. Dulles, at the Berlin conference, had quoted a speech made by M. Molotov to the Supreme Soviet on Oct. 31, 1939, in which he said that it was "not only senseless but criminal to wage a war for the destruction of Hitlerism camouflaged as a fight for democracy."

The Foreign Office spokesman's use of the expression "thoroughly hypocritical," in relation to Marshal Bulganin's speech to the Indian Parliament, led to a Soviet protest to Britain on Nov. 29. The Soviet Chargé d'Affaires in London called at the Foreign Office on that date to "draw attention to the fact that expressions were permitted . . . by a representative of the British Foreign Office which are incompatible with the nature of the relations existing between our countries."

The matter was raised in the House of Commons on Nov. 29 by Mr. Arthur Henderson (Lab), who asked the Prime Minister whether he would take steps to ensure that "official pronouncements containing personal criticisms of heads of Governments" were made at ministerial level. Sir Anthony Eden replied that it was "certainly desirable that important statements on behalf of the Government should not be made without proper authority," and that Ministers were already aware of this. It had been announced on the previous day that Sir George Young, or his deputy, would henceforward make official statements on behalf of the Foreign Office.

Reactions in the U.S.A. - U.S.-Portuguese Statement on Goa.

A joint statement was issued in Washington on Dec. 2 by Mr. Dulles and the Portuguese Foreign Minister, Dr. Paulo Cunha (then on an official visit to the U.S.A.), which said that they had discussed "various statements attributed to the Soviet rulers now visiting Asia," including "allegations concerning the Portuguese provinces in the Far East." Although no specific reference was made to the support expressed by Marshal Bulganin and M. Khrushchov for Indian sovereignty over Goa, the Dulles-Cunha statement accused Marshal Bulganin and M. Khrushchov of attempting to "foment hatred between the East and West."

At a press conference on Dec. 6, Mr Dulles said that the speeches of Marshal Bulganin and M. Khrushchov during their Asian tour showed "no great solicitude for a relaxation of tension with the West" As regards his discussions with Dr. Cunha, he stressed that the joint statement had taken no position on the merits of the Goa question, but had expressed the mutual concern of the U S A and Portugal at the Soviet leaders' attempts to "whip up prejudice and hate in a situation that needs to be dealt with in a spirit of calm." Asked whether the U S.A. considered Goa to be a province of Portugal, Mr. Dulles replied: "As far as I know, all the world regards it as a Portuguese province. It has been Portuguese for about 400 years."

Mr. Nehru (the Prime Minister of India) announced on Dec. 22 that a Note had been sent to the U.S. Government in connexion with the joint statement by Mr. Dulles and Dr. Cunha referring to "the Portuguese provinces in the Far East." It was stated in Washington on Dec. 29 that the U.S. Government had replied to the Indian Government's request for a "clarification" of the Dulles-Cunha statement.

Dr. Cunha, at a press conference during a visit to Ottawa, said on Dec. 12 that Portugal would fight India, if necessary, to retain Goa. He added: "I hope we are not going to have war, but if my hope is unfounded . . . Portugal is going to defend Goa by force with all her power."

Reactions in Pakistan.

The Prime Minister of Pakistan (Chaudhri Mohammad Ali) issued the following statement on Dec. 11 in reply to the remarks made by Marshal Bulganin and M. Khrushchov during their visit to Kashmir:

"In a statement in Srinagar, Marshal Bulganin reportedly said that Kashmir was part of Northern India and the Kashmiris part of the Indian people Mr. Khrushchov went even further. He reportedly said that Kashmir was part of India and that the Kashmiris had themselves decided to become part of India.

"These are extraordinary statements Coming from leaders of a country which denounces colonialism and is a member of the Security Council, which has resolved that Kashmir's accession to Pakistan or India shall be decided by a free plebiscite, they must have surprised all those who cherish freedom and the right of self-determination for all peoples. The people of Kashmir have not been allowed to exercise that right The State is under the occupation of the Indian Army. A plebiscite has not been held. Kashmir's leaders who ask for a plebiscite are being ruthlessly suppressed and jailed by an Indian puppet regime which depends for its existence on the support, not of the people of Kashmir, but of Indian bayonets. How then could it possibly be claimed that the people of Kashmir had decided to become part of India?

"In an attempt to justify this attitude towards the Kashmir dispute, Mr. Khrushchov is reported to have mentioned Pakistan's membership of the Baghdad Pact. He charged that the pact was not created in the interest of peace but with a view to building American military bases in Pakistan close to Soviet territory. These charges are wholly baseless. We have repeatedly made it clear that the Baghdad Pact is purely a defensive arrangement It is not directed against any country whatsoever Nor has Pakistan any intention of allowing any country to establish bases in the country or to use its territory for any aggressive purposes Pakistan has no aggressive designs against any country, least of all the Soviet Union. By joining the pact, Pakistan aims solely at strengthening the collective security of this region and at promoting its stability in the interest of world peace. This surely is a right which every country must enjoy, and in fact does enjoy, under the U.N. Charter to which the U.S S.R. also subscribes. It is surprising that such an act should cause apprehension in the minds of the Soviet leaders and that they should have seized on it as a justification for their present attitude to the Kashmir dispute.

"Mr. Khrushchov has said that the question of Kashmir is a matter for the people of Kashmir to decide for themselves. This is precisely why the Security Council resolved that the question of the accession of the State to India or Pakistan should be decided by a plebiscite under U.N. auspices. Mr. Khrushchov also said that Kashmir should not become a toy in the hands of imperialist forces. We wholly agree. But, judging by the statements of Messrs. Bulganin and Khrushchov, it would seem that the Soviet leaders are now bent on making Kashmir a toy in a far more dangerous game which is bound, not only to aggravate discord between Pakistan and India, but also to heighten world tension. . . ."

Similar statements deploring the remarks made by Marshal Bulganin and M. Khrushchov in Kashmir were issued by the Pakistani Foreign Minister, Mr. Hamidul Haq Choudhury, and the Leader of the Opposition, Mr. H. S. Suhrawardy. A Pakistan Foreign Office spokesman denied on Dec. 12 M. Khrushchov's assertion that Pakistan had attempted to persuade the Soviet leaders not to visit Kashmir and Afghanistan. He said that the Pakistan Foreign Office had merely conveyed its thoughts on the subject to the Soviet Chargé d'Affaires in Karachi "verbally," and had expressed the hope that, as the U.S.S.R.'s attitude towards Pakistan's disputes with India and Afghanistan had so far been one of strict neutrality, "the Russian leaders would not say or do anything that would detract from that attitude."

The Foreign Minister of Pakistan referred on Dec. 17 to Marshal Bulganin's support for the "Pakhtoonistan stunt" during his visit to Afghanistan.

Mr. Hamidul Haq Choudhury commented that "while Bulganin is prepared to give the right of self-determination to the Frontier tribesmen, who are part and parcel of the State of Pakistan and who never wanted it, he denies the same right to the people of Kashmir who are struggling for it." After accusing Marshal Bulganin of trying "to set India and Pakistan at loggerheads," and also of trying "to eliminate all chances of the Afghans taking a reasonable attitude towards Pakistan," the Foreign Minister declared that Soviet tactics were aimed at "bringing this whole area under the spell of the cold war."

Indian Press Comment.

Several of India's leading newspapers and journals criticized the speeches made by Marshal Bulganin and M. Khrushchov during their tour of India and Burma. Extracts are given below from *The Statesman* (Calcutta), the *Times of India* (Bombay), the *Hindustan Standard* (New Delhi), and the *Eastern Economist* (New Delhi):

The Statesman. ". . The Russian leaders' visit was in return for that paid by the Prime Ministers of India and Burma to their country. Yet matters have so turned out that it has become an international issue, so much so that ordinary people may well ask what has happened to the much publicized 'spirit of Geneva' manifested at the 'summit' conference. . . Not the slightest breath of criticism could reasonably be directed against anything that Mr. Nehru or U Nu said during their tour of Russia. It is unfortunate that as much cannot be said of statements attributed to Mr Khrushchov. Some of his references to Britain and the U.S A., as reported, have been strongly resented in those countries, a fact all the more regrettable because they were made in a country detached from the Power blocs and seeking, as Mr. Nehru said at Calcutta, to be friendly with all nations and avoiding hatred, violence and hostility. When the peoples of the world are longing for genuine amity among nations and their leaders are avowedly striving for this, to harp on alleged injuries in the past is wrong; others can do the same, and there is no end to the process. It is the future that counts. . . .

"There is, after all, nothing new in Communist bloc accusations against the West. But suddenly, out of the blue, Mr. Dulles thought fit to intervene with a statement, issued jointly with the Portuguese Foreign Minister, referring to Goa in terms which the people of India rightly resent. . . No amount of legalistic clarification by Mr. Dulles can excuse the impropriety of this statement. The Portuguese have no business to be in Goa or on any other Indian territory. Talk about Portuguese 'provinces' in the Far East is nonsense. The figurative explosion at Washington was preceded by an actual one of a thermo-nuclear nature somewhere in Russia—surely an inappropriate accompaniment of a goodwill tour in a country which has strong views on this subject This was not cause and effect, but there seems to be a chain of developments which can only be regarded as lamentable. It now comes to this, that leaders of Great Powers need to exercise more restraint in their language and actions. . . ."

Times of India. The newspaper published an article in connexion with the visit of Marshal Bulganin and M. Khrushchov to Bombay which said: "The visit of our Russian guests, while it has helped to heighten the permutations and combinations of international politics, carried its own warnings to us. . . . By all means let us return courtesy with courtesy, but not to the point of letting the guest edge the host out of his own mansion. When our own Parliament is converted into a pulpit from where foreign guests, however highly placed and honoured, attack countries with whom we have no basic quarrels, it is time to be more than slightly wary. India's position in the Commonwealth gives her a status of peculiar vantage from which both Britain and India derive advantages, and which in a sense lends an authoritative stamp to our policy of independence. There can be no doubt that what Moscow is now engaged in is a manoeuvre to undermine, isolate, and outflank Western influence in Asia. . . ."

The same newspaper also commented as follows on M. Khrushchov's remarks in Rangoon. "To accuse the British . . of having treated the Burmese as 'barbarians' can hardly be described as subtle, and is noteworthy even by the sledgehammer standards which the Russians have imported into world affairs. Khrushchov displayed abysmal ignorance of the Asian mind. . . . Moscow has yet to learn the first lesson of Bandung—that in no circumstances will independent Asian Powers allow themselves to deteriorate into cheap, unprincipled anti-Western agitators."

Hindustan Standard. An editorial in this newspaper deplored the manner in which M Khrushchov had "abruptly introduced" his reference to the Soviet hydrogen bomb during his visit to Bangalore. After declaring that India was "not interested in knowing whether the Soviet Union or the United States has bigger and better hydrogen bombs," it added: "Mr Khrushchov's frank and forthright words were no doubt addressed to the United States and her allies. . The occasion of his H-bomb speech nevertheless would appear to most of our people ill-chosen. The Soviet leaders have come among us on a goodwill mission, and whatever complaints they may have against other Powers are not of any direct concern to us. If we accept the Soviets' friendship that does not mean that we accept or endorse all that the Soviet Union does and stands for"

Eastern Economist. A leading article in this journal (Dec. 16) contrasted the apparently differing conceptions of *Panch Sila* (the "five principles" of peaceful co-existence) held by India and the Soviet Union, and, *inter alia*, drew attention to a remark by M. Khrushchov (at a press conference on Dec. 14 before leaving India) in which he had said that the Cominform would remain in existence.

". . There are many Indians," wrote the *Eastern Economist*, "and this applies to Ministers of the Government as well as to many Members of the Legislature, who hold the view that our Russian guests greatly exceeded propriety. . . . It is necessary that . . it should be made clear that Indian foreign policy was by no means affected by these pronouncements, and remains as friendly to the West as it is to our new-found friends . . The particular association of the U.S.S.R. with Indian views on colonialism, with special reference to Goa, and with the definite statement on Kashmir that it is a portion of India, will be reckoned as Russian inducements for us to ride with them on the Volga—that is, blandly to give them a *quid pro quo* Are there no dangerous strings attached? . .

"We still have substantial independence on major issues of foreign policy For example, the mere fact that we have signed an agreement with a reference to 'the Geneva spirit' by no means debars us from asserting that the failure of the last Geneva conference was as much a result of Soviet obstinacy as it was of hesitation in the Free World. Again, no Indian will wish to decry President Eisenhower's spacious air-inspection proposal which the Russians have rejected Thirdly, we dislike U S S.R. hydrogen bombs—one of which was unwisely detonated whilst our visitors were in India—as much as any other lethal atomic weapons Finally, the interpretation of *Panch Sila* in India is obviously different from that of the Soviet Union. In the Soviet Union it would appear that peaceful co-existence can be an active instrument of propaganda. The Cominform, Mr. Khrushchov said, would continue in existence as a source of information In other words, the propaganda battle is still on. India would never concede that the existence of the Cominform for this purpose is consistent with an honest interpretation of *Panch Sila*, it means that while we cannot criticize totalitarianism, the totalitarians can hurl all their thunder against democracy.

"Thus . . there are vital differences between the attitudes of minds of the Russian and Indian Prime Ministers, although they are signatories to the same statement. It is necessary that both we in India and our friends in the Free World should appreciate that the construction of the words of the common statement are less important than the intangible, but nonetheless real, differences in the minds of the two Prime Ministers. . . ."

Mr. Nehru on India's Neutrality Policy.

Mr. Nehru, in a speech at Coimbatore on Dec. 22, expressed India's determination to pursue her own independent policy "internally in the domestic sphere and externally in the international sphere." He added: "Controversies have arisen in other countries about the consequences of the visit of the Soviet leaders to India. They ask: Is India aligning herself with the Communist countries and the Soviet Union? Is she giving up her policy of non-alignment and neutrality? . . . People in many parts of the world seem to think that if you are friendly with one person, that means you are hostile and inimical to the other—as if you can only be friendly with one in order to be hostile to another. The area of friendship should not be confined by a wall of hostility. That is our national and international outlook, and that is the real basis of the policy of neutrality or non-alignment that India follows. . . . India has an individuality and soul, not of today but of the last 2,000 years. She has a mind of her own and a soul and spirit of her own. . . . She will pursue her own independent policy."—(The Statesman, Calcutta - The Hindu, Madras - Times of India, Bombay - Eastern Economist, New Delhi - Pakistan High Commissioner's Office, London - New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14603 A.)**

A. EGYPT. — Further Release by Britain of Blocked Sterling Balances.

It was announced in London and Cairo on Jan. 2 that Britain had released a further £20,000,000 of Egypt's blocked sterling balances in accordance with the agreement of Aug. 29, 1955.—(Financial Times) **(Prev. rep. 14420 B.)**

A. FRANCE. — M. Poujade's Tax-Resistance Movement. - Poujadists to contest General Election.

A movement aimed at encouraging small shop-keepers and tradesmen to refuse to pay their taxes until the Government had introduced certain fiscal reforms developed in many parts of France during 1954 and 1955, claiming a total membership of nearly 1,000,000 by the end of the latter year. It was directed by an organization, the Union for the Defence of Tradesmen and Artisans (*Union pour le défense des commerçants et artisans*, or U.D.C.A.), founded in 1953 by M. Pierre Poujade, a 34-year-old stationer and bookseller living in the small town of Saint-Céré, in the Lot *département* of central France.

During March, 1955, when the Finance Bill was being debated by the National Assembly, the Poujadist movement attempted to bring strong pressure upon the Government, and also upon individual deputies, to secure a revision of fiscal policy, and, in particular, to secure the repeal of two provisions of previous Finance Laws which were strongly opposed by the U.D C.A.: (*a*) a provision which authorized "mobile squads" of tax inspectors to examine the books of shopkeepers and others suspected of tax evasion, and (*b*) another provision which imposed penalties upon persons obstructing or impeding tax-collectors and inspectors in the performance of their duties. Although M. Faure (the Prime Minister) stressed that the Government would not submit to any outside pressure, he nevertheless announced during the Budget debate that two concessions would be made to meet legitimate grievances: (*a*) the "mobile squads" would in future only investigate the books of establishments with a turnover of more than 60,000,000 francs (about £60,000) a year; (*b*) the regulation imposing penalties for obstructing tax-collectors in the performance of their duty would be amended to prevent abuses. The first-mentioned concession implied that the smaller shopkeepers—of whom there are about 1,200,000, forming the backbone of the Poujadist movement—would in future be free from visits by "mobile squads" of tax inspectors.

During August and September, 1955, a number of disturbances, several of a violent character, occurred in various parts of France—at Chartres (where the police had to use tear-gas to restore order), in the Vendée, in the Bouches-du-Rhône, and elsewhere—when local Poujadists forcibly resisted visits by tax-collectors and other officials, refused to pay their taxes or social security contributions, and broke up meetings addressed by Cabinet Ministers. A meeting addressed by M. Bourgès-Maunoury (the Minister of the Interior) in the Aveyron *département* had to be abandoned after the Minister was howled down by Poujadist demonstrators. The agitation became particularly acute after M. Poujade had issued a call to his supporters (on Aug. 29) to refuse to pay their annual "turnover" tax for the current year, and had threatened "reprisals" against any member of his movement who defied the ban. Such "reprisals," he announced, would take the form of a boycott of the offender or of refusal to help "blacklegs" who were in trouble with the authorities for non-payment of taxes.

On Sept. 28 the Paris public prosecutor issued a summons against M. Poujade and other leaders of the U.D.C.A. on a charge of inciting people to refuse to pay taxes. The decision to take legal action against the Poujadist movement had been taken by the French Council of Ministers on the previous day on the proposal of the Minister of Finance.

Six months earlier, on March 21, 1955, it had been announced in Paris that judicial inquiries had been instituted against "X" (a traditional terminology of French legal procedure) for inciting people to refuse to pay their taxes The examining magistrate was specifically asked to determine the authorship of an anonymous pamphlet, published at Romarantin (central France), urging collective resistance to tax-collection. [The inquiries were instituted under a law of 1839 which laid down maximum penalties of two years' imprisonment and heavy fines for organizing resistance to tax-collection.] Although this inquiry was obviously directed against M. Poujade, no further action was taken for several months as the U.D.C.A. remained generally quiet during the spring and summer.

At a press conference on Sept. 30, M. Poujade said that he welcomed the Government's decision to take proceedings against him, since "a good trial would present an excellent platform for stating our views." He declared that the U.D.C.A. would continue its demonstrations whenever a Minister appeared in public until the Government recognized the organization as representing the interests of small tradesmen and artisans, and agreed to negotiate with it for a settlement of fiscal grievances. When questioned by the examining magistrate on Oct. 5, M. Poujade accepted full responsibility for the U.D.C.A.'s activities, and admitted that he had urged shopkeepers and tradesmen to refuse to pay taxes. He emphasized, however, that he had never approved of acts of violence towards officials and policemen, and declared that he had sent strict instructions to his supporters to refrain from such acts.

During October and November, 1955, the police raided the premises of the U D.C.A. in Paris and in a number of provincial centres, including Limoges (the headquarters of the movement's directing committee), Marseilles, Nice, Montpellier, Clermont-Ferrand Beauvais, Orléans, Bourges, Cahors Albi, and M. Poujade's home town of Saint-Céré. Many documents were seized in these searches.

At a congress of the U.D.C.A., held on Nov. 8-10 at Saint-Céré it was decided that the Poujadist movement would present candidates in the forthcoming general elections in all *départements* where the organization had local offices. M. Poujade subsequently announced that he personally would not stand for election, and declared that his movement "has for its exclusive goal the satisfaction of the economic demands of the shopkeepers, artisans and peasants, and, in particular, the struggle against excessive taxation."

The electoral programme of the U.D.C.A. was concentrated almost entirely on the movement's economic and financial demands, and made little or no mention of political issues. Apart from its anti-taxation policy, the programme also demanded the replacement of the National Assembly by a "States-General" (*Etats-Généraux*) representative of all classes and sections of the community; the conversion of the Council of the Republic into an economic chamber; the abolition of the Assembly of the French Union; the amalgamation of Ministries; reductions in State expenditure; the dismissal of officials engaged in economic supervision, price-fixing, etc.; and economies in the nationalized industries.

All Poujadist candidates were required to take an oath in the following terms: "I swear to work for the establishment of a States-General with all my responsibility, honour and faith. If I am elected, I solemnly pledge myself not to take up a position on any subject which has not been approved in advance by the central directing committee. If I betray this oath, I agree to submit in my own person to the physical and moral punishment reserved for traitors. . . ."

No clear definition of what the Poujadists meant by a "States-General" was contained in the electoral programme. From various statements made by M. Poujade, however, it seemed that the conception was analogous to that of the pre-war Fascist "corporate State"—a Chamber based on economic, professional, and other interests, and not on political representation. Although M. Poujade denied that he was a Fascist, and insisted that his movement was "neither Right, Left, nor Centre," he made a number of statements in which, *inter alia*, he denounced the weaknesses of the parliamentary regime and the confusion of the party system, bitterly attacked France's present and post-war leaders, and declared that he would like to see them "beheaded" or "brought to trial before a high court" In particular, he denounced the existing National Assembly as being completely out of touch with the people's needs, and demanded its replacement by a "States-General" to which all trades, professions, and classes would elect representatives, present their grievances, and decide upon a solution of important problems in the interests of all.

A split in the Poujadist movement occurred on Nov. 22, 1955, when some 60 leading members of the U.D.C.A., headed by its secretary-general (M. Francis Bos, a friend of M. Poujade from boyhood), decided to secede from the organization in protest against the increasingly "authoritarian" attitude of M. Poujade, his alleged misuse of the U.D.C.A.'s funds for personal purposes, and against various aspects of his policy, particularly his advocacy of a States-General and his demand for the replacement of existing republican institutions by a new regime.

Eight Poujadist candidates were returned *en bloc* at elections for the Paris Chamber of Commerce, held on Dec. 8, 1955. [The elections were for one-third of the members of the Chamber of Commerce and for the category of *commerçants* (businessmen).] Similar successes were obtained by Poujadist lists in Chamber of Commerce elections held in other centres, including Marseilles, Montpellier and Perpignan. (Le Monde, Paris)

B. CAMBODIA - JAPAN. — Friendship Treaty.

A treaty of friendship pledging "eternal peace" between Japan and Cambodia was signed in Tokio on Dec. 9 by Prince Norodom Sihanouk, the Cambodian Prime Minister, and Mr. Shigemitsu, the Japanese Foreign Minister. It also provided for mutual technical co-operation and for the expansion of economic and cultural relations.—(Japanese Embassy, London)

(Prev. rep. 14062 C.)

C. WESTERN GERMANY. — Admission to Economic Commission for Europe.

The U.N. Economic and Social Council decided on Dec. 15 to admit the German Federal Republic to the Economic Commission for Europe. The voting was 16 to two (the Soviet Union and Czechoslovakia).—(New York Herald Tribune)

(Prev. rep. E.C.E. Membership, 13538 C.)

A. INDIA. — Reactions to States Reorganization Commission's Report. - The Bombay Riots.

The Indian Home Minister, Pandit Pant, gave details in the Council of States on Nov. 21 of the Government's proposed time-table for the implementation of the decisions to be taken on the States Reorganization Commission's report. He stated that a conference of Chief Ministers held in Delhi on Oct. 22-23 had already settled certain procedural matters; that the Chief Ministers had given their preliminary opinions; and that the State Governments were expected to communicate their views on the Commission's recommendations to the Central Government by the end of November, after which the State Legislatures would be consulted. The report would be placed before Parliament during the current session, and it was proposed that legislation for implementing the reorganization scheme should be passed before the end of May 1956. This would enable the new units to be established on or before Oct. 1, 1956, and general elections to be held early in 1957 as scheduled.

The Congress Working Committee, meeting on Nov. 8-9, had previously approved most of the Commission's recommendations, but had put forward alternative proposals on the future of Bombay and the Telengana area of Hyderabad (see below). A sub-committee consisting of Mr. Nehru (the Prime Minister), Mr. Dhebar (president of Congress), Dr. Azad (the Education Minister), and Pandit Pant was set up to reach decisions on the problems of the Punjab, the proposed Karnataka State, and the various border issues that had been raised.

Developments in certain States arising out of the Commission's report are summarized below.

Bombay. The Maharashtra Pradesh Congress Committee unanimously rejected on Oct 21 both the Commission's proposals for a bilingual Bombay State and the suggestion for three separate States of Bombay City, Maharashtra, and Gujarat which had been put forward by the national Congress leaders during the discussions on Oct. 17-19 (see 14488 A), with the proviso that Bombay should have the option after five years of deciding whether to join the Maharashtra State or to remain a separate unit. As a compromise, the Committee proposed the formation of a State consisting of all the Marathi- and Gujarati-speaking areas, with Bombay as its capital, from which the Gujarati areas would be free to secede after five years This proposal, however, was rejected by both the Bombay City and the Gujarat Congress parties.

The Congress Working Committee decided on Nov 9 in favour of the formation of three separate States of Bombay City, Maharashtra (comprising the Marathi-speaking areas of Bombay State, Hyderabad, and Madhya Pradesh), and Gujarat (comprising Saurashtra, Kutch, and the Gujarati-speaking areas of Bombay State). Whilst the Bombay Pradesh Congress Committee endorsed this decision on Nov. 19, the Maharashtra Pradesh Congress Committee adopted on Nov 27 a resolution urging that it should be reconsidered.

Agitation by the influential *Samyukta Maharashtra Parishad* (United Maharashtra Conference) against the Congress Working Committee's decision was followed by disorders in Bombay City, culminating in serious rioting on Nov. 21. Crowds of demonstrators attempting to march on the Council Hall (seat of the State Legislature) on Nov. 18 were broken up by the police, who used *lathis* and tear-gas and made over 100 arrests, whilst on Nov 20 Mr. Morarji Desai (the Chief Minister of Bombay) and other Congress leaders were stoned by hooligans while addressing a public meeting in support of the Working Committee's proposals. Following an appeal for a one-day *hartal* issued by the Communist and Praja Socialist parties, large numbers of industrial, transport, and dock workers came out on strike on Nov. 21. In the northern (industrial) areas of the city the mob stoned or set fire to those buses and trams which continued to run, forced most schools and colleges to close down, and burned down a police post. Large crowds subsequently attempted to march on the Council Hall, where the State Legislature was debating a resolution by the Chief Minister supporting the reorganization of the existing State of Bombay in accordance with the Congress Working Committee's proposals; when the demonstrators became violent, attacking buses, cars, police vehicles, and public property, and stoning the police, a battle ensued in which the police opened fire. During the various incidents 15 demonstrators were killed, 266 people injured (94 detained in hospital) and 155 arrested, whilst 49 policemen were also wounded, mostly as a result of stone-throwing. Material damage included the destruction of eight buses by fire, serious damage to 15 tram-cars, and slighter damage to 160 buses, as well as damage to police-stations and other public property.

On Nov. 22, when calm had been restored, the State Legislature decided to adjourn its debate on the Chief Minister's motion *sine die* The Revenue Minister (Mr. Hiray) explained that this action was in no way prompted by any "fear, weakness, or pressure arising out of the disorders or hooliganism," but was meant to "give all sides concerned more time to reconsider the whole position."

Discussions on the future of Bombay City were held between Mr. Desai and Mr. Shankarrao Deo (president of the *Samyukta Maharashtra Parishad*) on Dec 28, and between Mr. Nehru (who flew specially to Bombay) and Mr. Desai on Dec. 29. On Dec. 30 Mr. Desai resumed his talks with Mr. Deo, the secretary of the Gujerat Pradesh Congress Committee (Mr. Thakorbhai Desai) and another prominent Gujerat Congress leader (Mr. Jeevanji Desai) being present at these discussions. Later the same day Mr. Deo had talks with Mr. S. K. Patil (president of the Bombay Pradesh Congress Committee). Earlier, on Dec. 24, the Congress Working Committee had decided to leave the final decision in respect of Bombay to the special sub-committee consisting of Mr. Nehru, Pandit Pant, Mr. Dhebar, and Dr. Azad

Punjab. Discussions between Mr. Nehru and Master Tara Singh, the Sikh leader, took place in Delhi on Oct. 24 and Nov. 23 Between their two meetings Mr. Nehru paid a visit to Amritsar on Nov. 11, and was enthusiastically welcomed by the Sikh community. In a speech of welcome Master Tara Singh emphasized that the Sikhs were "Indians first and last," and that there had never been any question of establishing a separate Sikh State.

Vindhya Pradesh. An agitation against the proposed incorporation of the State in Madhya Pradesh was launched in Vindhya Pradesh during October with the support of the Praja Socialists, the right-wing *Ram Rajya Parishad*, and other Opposition parties. While the report was being discussed in the State Legislature at Rewa on Nov. 23, about 100 demonstrators broke into the building, stoned the members, assaulted the Finance Minister (Mr. Manav), and withdrew only after the Speaker had adjourned the House *sine die*. The Vindhya Pradesh Ministry unanimously accepted the State Reorganization Commission's proposal, but decided to urge the Central Government to establish a university, a bench of the High Court, and important State offices in Vindhya Pradesh.

Madhya Bharat. The general council of the Madhya Bharat Pradesh Congress Committee adopted on Oct. 21 a resolution opposing the proposed incorporation of the State in Madhya Pradesh, and advocating the union of Madhya Bharat and Bhopal. The resolution was supported by Mr. Jain and Mr. Sharma, the respective Chief Ministers of Madhya Bharat and Bhopal. The Congress Working Committee, however, decided on Nov. 9 in favour of the amalgamation of Vindhya Pradesh, Madhya Bharat, and Bhopal with the Hindi-speaking areas of Madhya Pradesh, whilst rejecting the States Reorganization Commission's recommendation that Jubbulpore should become the State capital.

Hyderabad and Andhra. The Congress Working Committee adopted on Nov. 9 a resolution recommending that the Telengana area of Hyderabad should be attached to Andhra, subject to the wishes of the people concerned, to form a single Telugu-speaking State (Visalandhra) Whilst the Andhra Assembly voted in favour of the formation of Visalandhra on Nov. 26, opinion was divided inside the Hyderabad Congress Party; one section led by Mr Ramakrishna Rao (the Chief Minister of Hyderabad) advocated immediate union with Andhra, provided that the city of Hyderabad became the State capital, but another led by Mr. Narasing Rao (president of the Hyderabad Congress) supported the Commission's recommendation that a decision should be postponed until 1961.

Mysore. The sub-committee appointed by the Congress Working Committee adopted on Nov. 19 a resolution stating that the inclusion of Mysore in the proposed Karnataka State would be "in the best interests of the people of Mysore and of the country as a whole" The Mysore Legislative Assembly, after a nine-day debate, adopted on Dec. 1 a resolution, moved by the Chief Minister (Mr. Hanumanthaiya), approving the incorporation of Mysore in Karnataka on condition that the new State should be called Mysore and that it should include the whole of the Bellary district, part of which the Commission had proposed should be transferred to Andhra. The resolution was passed by 57 votes to three, with over 30 abstentions. Of the three Ministers who had previously opposed the Commission's recommendations for the incorporation of Mysore in Karnataka (see 14488 A), Mr. Chenniah and Mr. Manjappa voted for the resolution and Mr. Ramachandra Rao abstained.

Madras and Travancore-Cochin. The Madras Legislative Assembly adopted on Nov. 24 a resolution proposing that the largely Tamil-speaking areas of Devicolam and Permeedu should be transferred from Travancore-Cochin to Madras, in addition to the five Tamil-speaking *taluks* the transfer of which had been recommended by the Commission. The Travancore-Cochin Legislative Assembly, on the other hand, rejected on the same day (by 90 votes to 14) a resolution for the transfer of Devicolam and Permeedu to Madras, and adopted another in favour of the inclusion of the whole of Travancore-Cochin in the proposed Kerala State by a majority of 12. The Congress and Praja Socialists opposed the former resolution and supported the latter, whilst the Communists voted against both resolutions.

A proposal put forward by the Congress Working Committee on Nov. 9 that the Laccadive and Amindive Islands (which the Commission had recommended should be included in Kerala) should become a Centrally-administered territory was approved on Nov. 24 by both the Madras and Travancore-Cochin Legislatures.

The Constitution (Fifth Amendment) Bill was passed by the Council of States on Dec. 15 by 162 votes to nil, having been previously passed by the House of the People. One of its principal provisions was an amendment to Article 3 of the Constitution enabling the President to prescribe the period for the expression of views by the Legislatures of the States affected by the proposed reorganization, and thus to ensure that those Legislatures had a reasonable opportunity of stating their views before the Bill implementing the reorganization proposals was debated by the Indian Parliament.

A. NORTH ATLANTIC TREATY ORGANIZATION. — Meetings of North Atlantic Council and Defence Ministers. - Reaffirmation of NATO Alliance. - Statements on Growing Strength of Soviet Armed Forces. - Co-ordination of NATO Air Defence and New Communications System in European Command. - Other Developments. - Field-Marshal Montgomery's Proposal for Centralization of Political and Military Authority.

A meeting of the North Atlantic Council, attended by the Foreign, Defence, and Finance Ministers of the 15 member-countries of NATO, took place in Paris on Dec. 15-16 under the chairmanship of Dr. Gudmundsson, the Icelandic Foreign Minister. The following communiqué was issued:

I.

"The Council examined and assessed the present international situation.

It unanimously welcomed the vigour with which the three Western Ministers had presented to the second Geneva Conference the proposals already outlined at previous meetings of the North Atlantic Council. These proposals aimed at the reunification of Germany through free elections, left the unified German Government free to choose its own foreign policy; and offered a security pact to the U.S.S.R.

The Council noted with regret:

(1) that the U.S S.R. had repudiated the proposal to negotiate on the reunification of Germany through free elections, in spite of the directive agreed at the first Geneva Conference;

(2) that the U.S S.R was opposed to any effective system for the control of armaments, including the air inspection plan proposed by President Eisenhower;

(3) that the U.S S R had given proof of its fear and hostility with regard to the free exchange of information between the peoples of the Soviet Union and the free world.

The Council declared that the negative outcome of the Geneva Conference had in no way halted the efforts of the North Atlantic Powers to secure the reunification of Germany in freedom, such reunification continuing to be held by them as an essential condition for the establishment of a just and lasting peace

The Council reaffirmed that they consider the Government of the Federal Republic as the only German Government freely and legitimately constituted, and therefore entitled to speak for Germany as the representative of the German people in international affairs It stressed once again that the security and welfare of Berlin should be considered as essential elements of the peace of the free world in the present international situation, and it urged the importance of consulting further within NATO on the question of German reunification and on the situation in Berlin.

The Council also reviewed recent provocative moves and declarations by the Soviet Union regarding the Middle East and Asia They recognized that these tactics, coupled with a continued increase in Soviet military capability, created new problems and a new challenge to the Free World.

II.

Following a report by the Secretary-General on the work and activities of the Organization in the last eight months, the Council discussed future defence planning of NATO. It considered the Annual Review Report for 1955 and approved force goals for 1956, 1957, and 1958. The Council welcomed the German Federal Republic's participation for the first time in the NATO Annual Review, adopted procedures designed to give new impulse and direction to the future defence planning of the Alliance and to ensure even closer co-operation in this field; expressed the firm determination of all member governments to see the Atlantic forces equipped with the most modern weapons, and noted with satisfaction that substantial progress could be achieved in this respect as a result of the valuable assistance of the United States, the United Kingdom, and Canada.

The Council devoted major attention to improving the arrangements for air defence and warning in Europe. It accepted recommendations for the reorganization and closer co-ordination of air defence in NATO European countries, so as to integrate further NATO activities in this vital field. The Council also received a report on a new type of communications system for air defence and warning. The U.S.A. offered to finance a pilot project for this new system.

III.

The Council recognized that recent developments in the international situation made it more necessary than ever to have closer co-operation between the members of the Alliance, as envisaged in Article 2 of the Treaty They decided to instruct the Permanent Council to examine and implement all measures conducive to this end. [A resolution calling on the North Atlantic Council to study measures for aiding under-developed member countries—envisaged in Article 2 of the treaty—had been presented by the Italian Foreign Minister, Dr. Martino, and adopted by the Council.]

IV.

In concluding its work, the Council declared that the North Atlantic Treaty Organization remains the essential foundation of the security of the 15 associated nations. Such association is in direct contrast to the obsolete system under which isolated nations are in danger of being subjugated, one by one, by despotic groups such as the Soviet bloc."

In addition to the communiqué, the following details of the Council's deliberations were made public:

Air Defence System.

General Gruenther (Supreme Allied Commander, Europe) announced on Dec. 15 that the North Atlantic Council had approved his proposal for a co-ordinated air defence and radar warning system, under his authority, for the whole of Western Europe, including Britain. Air defence would be divided into four regions: (1) North, covering Norway and Denmark, with headquarters at Oslo; (2) Central, covering the Low Countries, Germany and France, with headquarters at Fontainebleau; (3) Southern, covering Italy, Greece, Turkey and the Mediterranean, with headquarters at Naples; (4) the United Kingdom. General Gruenther emphasized, however, that he had neither asked for nor been given any new powers of command, and that his authority to co-ordinate did not mean that the air defence units of the various countries could be "switched about" by him.

Hitherto (General Gruenther explained) air defence had been a national responsibility except in the Central area, where Supreme Headquarters had command Air defence, however, was the least effective part of the Allied Command in Europe, and the decision now taken represented "the first step in an important process of evolution" "We did not want to cut across national sensibilities at the first step," he added; "this is a big change which is sufficient at this time." It meant that Supreme Headquarters could now co-ordinate such matters as the siting of radar installations to produce an integrated system, whereas hitherto each country had sited them according to its own plans, which were not always in the best interests of European air defence

General Gruenther also announced that, in order to make the new air defence scheme effective, there would be a new system of communications based on "ionospheric scatter" and "tropospheric scatter"—a method newly developed in the U.S.A. and now being made available to NATO.

The Supreme Commander pointed out that Supreme Headquarters' present communications system was subject to jamming, could not always be used quickly in emergency, and often depended on a large number of relay stations. The new system, however, was not susceptible to jamming, was almost 100 per cent reliable, and would require only 250 men for its operation in the whole of Western Europe. By means of "tropospheric scatter," beam frequencies of 100 to 5,000 megacycles could pass messages in short "hops" of up to 250 miles a time, whilst by "ionospheric scatter" messages could be passed in "hops" of 600 to 1,300 miles. Such messages could not be jammed because they depended on the reflection of radio waves from particular points in the ionosphere and troposphere.

The U S Government had offered to finance two pilot projects with the new system—one using "tropospheric scatter" in Norway, and the other using "ionospheric scatter" to provide a link between Paris, Naples, and Izmir (Turkey). If these pilot projects were successful —as the experts were certain they would be—a complete network would be created in Europe covering all the critical parts of SHAPE communications which had to be at instant readiness Work on this project would begin in 1957, and its cost—to be financed on the same basis as other NATO infrastructure projects—would be only £15,000,000 The new system would be fully manned at all times and would be under military control

General Gruenther said that no decision had yet been taken on the type of radar and other equipment to be used. This would be settled after further research at the Air Defence Technical Centre which had been set up during the year at The Hague.

Military Committee's Report.

The report of the Military Committee, which was presented to the Council on Dec. 15 by General Dallis (Greece), pointed out that the military threat to the North Atlantic Alliance was "greater than at any previous time." There had been a great improvement in the quality of the Soviet Air Force, and Soviet long-range aircraft could now reach "any part of the NATO area."

The report added that weapons "in the megaton class" [i.e. hydrogen bombs] were no longer the exclusive possession of the West, and stressed that there was no sign of any slackening in the Soviet Union's effort to develop its military strength. The recently-announced reduction of the Soviet forces by 640,000 men had "in no way significantly diminished" the combat capacity of the Soviet Union, whose armed forces were better equipped than ever before. The Soviet Army remained at about 175 divisions, which, like the NATO armies, were being trained and reorganized to fit them for atomic warfare and for mobility and dispersion. The armies of the "satellite" countries had also increased in number and quality. The Soviet Navy had new cruisers, submarines, and destroyers, and its minelaying capacity was being greatly enlarged.

Review of Force Goals.

The North Atlantic Council decided that defence expenditures in 1956 would be neither substantially larger nor smaller than in 1955. Total defence expenditures in 1955, as forecast, are shown in the following table (released by NATO on Dec. 16), comparison being given with actual expenditure from 1949 to 1954 (the figures covering the years 1949-1953 are revised from earlier estimates):

	Currency Unit	Actual 1949	1950	1951	1952	1953	Forecast 1954	1955
Belgium	Belg. francs (million)	7,653	8,256	13,387	19,965	19,815	19,925	18,589
Canada	Canadian $ (million)	372	495	1,220	1,875	1,970	1,771	1,973
Denmark	Kroner (million)	360	359	475	676	889	885	971
France	Francs ('000 millions)	479	559	881	1,253	1,387	1,171	1,097
German Federal Republic (*a*)	DM. (millions)	..	..	..	..	..	..	..
Greece	Drachmae ('000 millions)	1,630	1,971	2,615	2,655	2,767	3,428	3,809
Italy	Lire ('000 millions)	301	353	457	521	480	543	549
Luxemburg	Lux francs (millions)	112	170	264	436	488	566	640
Netherlands	Guilders (millions)	680	901	1,060	1,253	1,330	1,583	1,800
Norway	Kroner (millions)	370	357	572	831	1,067	1,141	1,000
Portugal	Escudos (millions)	1,419	1,516	1,553	1,691	1,975	2,100	2,392
Turkey	£T. (millions)	721	693	763	860	1,026	1,123	1,241
United Kingdom	£ Sterling (millions)	779	849	1,149	1,561	1,684	1,570	1,639
United States	U.S. $ (millions)	13,580	14,559	33,398	47,852	49,621	42,780	40,548
Total NATO Europe (*b*)	U.S. $ (millions)	4,830	5,413	7,581	10,191	11,006	10,313	10,393
North America	U.S. $ (millions)	13,952	15,054	34,618	49,727	51,591	44,551	42,521
Total NATO (*b*)	U.S. $ (millions)	18,782	20,467	42,199	59,918	62,597	54,864	52,914

(*a*) Not available.—The German Federal Republic, through occupation and support costs, has been contributing to the defence budgets of NATO countries and is budgeting funds for its own troops. Nevertheless, in the short time which has elapsed since the accession of the Federal Republic to NATO, it has not been possible to establish defence expenditure figures which would compare with those of other countries and apply to the same periods of time

(*b*) Excludes expenditures of the German Federal Republic.

Note. The figures given in the table are based on the NATO definition of defence expenditures and represent payments actually made or to be made in the course of the calendar year 1955. There may be considerable divergency between these figures and those given in national budgets because the national classification of expenditures for budgetary purposes never coincides exactly with the NATO definition, and because certain countries, under their national budgetary procedures (which differ from country to country), include large sums which will in reality be used to cover expenditures spread over a number of years.

The figures relating to the U.S.A. and Canada include expenditures on special military support, direct forces support, and on the purchase of military items to be delivered to European NATO countries in the form of "end-item aid." The value of these items has not been included in the defence expenditures of the European NATO countries.

Guided Missiles.

The North Atlantic Council accepted an offer by the British Minister of Defence (then Mr. Selwyn Lloyd) to make information on the development of guided missiles available to other NATO countries, and to help with the training of technicians in guided missiles. The U.S. Secretary of Defence (Mr. Charles Wilson) announced that the U.S.A. would also be willing to supply information to Allied countries on "lines of development" of guided missiles, but would not be able to make actual missiles available.

The British offer led to a misunderstanding on the part of the Netherlands Defence Minister, Hr. Staf, who said at a press conference on Dec. 16 that "the time is not far ahead when guided missiles will be made available to us," and who indicated that the smaller NATO countries could expect financial help from Britain for the supply of these missiles. A British spokesman, however, subsequently denied that the British offer included the supply of actual weapons, and pointed out that it included the training of technicians on general aspects of guided missiles; their principles and basic techniques; access to certain development centres in the U.K., the supply of certain research and development facilities, assistance in the development of various kinds of instruments; and advice on planning facilities. Full details of the information to be made available by Britain would be given to the NATO Permanent Council, and any NATO nation would be able to take advantage of the offer,

New Tactical Air Force.

The Council approved the creation of a Fifth Allied Tactical Air Force which, it was announced, would come into operation on Jan. 1, 1956, with headquarters at Vicenza (Italy). It would be under the command of Allied Air Forces, Southern Europe; would include Italian, French, Greek, American, and Turkish personnel; and would co-operate with the newly-created Southern European Task Force (see below).

The December session of the North Atlantic Council had been preceded by one on Oct. 25 at which M. Pinay, Mr. Macmillan, and Mr. Dulles had discussed with the Foreign Ministers of the other NATO countries the "plans and positions" which they would present at the Geneva Conference of Foreign Ministers, and at which the other Ministers had expressed their agreement with the general positions outlined (see 14537 A),

Meetings of Defence Ministers.

The Defence Ministers of the NATO countries had met in Paris on Oct. 10-12 as a preliminary to the full ministerial meeting in December.

The communiqué issued on Oct. 12 said that the meeting of Defence Ministers had been "primarily for the exchange of information," and that they had heard statements on the strategic situation and NATO's defensive arrangements from General Sir John Whiteley (U.K., chairman of the Standing Group), Generals Collins (U.S.A.) and Valluy (France), the other two members of that Group, General Gruenther, Admiral Jerauld Wright (Supreme Commander, Atlantic), Admiral of the Fleet Sir George Creasey (C.-in-C., Channel Command), Air Chief Marshal Sir John Boothman (Allied Maritime Air C.-in-C., Channel Command), and General Partridge (U.S.A.), representing the Canada-U.S. Regional Planning Group.

General Whiteley was reported to have given details about the military strength of the Soviet Union on the lines mentioned in the report of the Military Committee (see above). He said that although he did not believe that the Soviet Union wanted war, and would seek to avoid one so long as there was an adequate deterrent in the West, she was now in an era of "demonstrative technological progress and achievement" to a much greater extent than had been foreseen a few years ago. He also mentioned that the last May Day air display in Moscow had shown that the Russians had solved the problems of mass-producing jet and turbo-jet fighters and bombers.

Admiral Wright was reported to have said that the Soviet Union was building, as fast as her economy would allow, an "iron ring" of submarines, cruisers, destroyers, and other attack vessels to separate the U.S.A. from Europe. He stressed that the Soviet Navy was now the second largest in the world, and had more submarines than all the other nations of the world put together. Unlike the NATO naval forces, which were partly in reserve or in "mothballs," the Soviet Navy was completely equipped and armed, always fully manned, and ready for sea at any moment. He envisaged no possible reductions in NATO's naval forces, as any levelling-off would mean that the balance would go increasingly in favour of the U.S.S.R.

General Partridge spoke on the complete co-operation between the Canadian and U.S. military authorities and on the work being done to establish a line of defence and anti-aircraft warning system in the north of the American Continent (see 14235 B).

General Gruenther dwelt on the need to reorganize air defence, on the lines of his proposals later adopted by the North Atlantic Council. He stressed that although the NATO forces had made good progress, both qualitatively and quantitatively, they were inferior to what had been planned, and declared that it was indispensable for member-countries to intensify their efforts as regards air, naval, and ground forces. In reply to a question, General Gruenther described the effect upon SHAPE of the withdrawal of French forces from Europe to North Africa as "harmful," because it tended to weaken the already "thin" numbers of troops. He recalled, however, that France had remedied the situation by calling up 64,000 reservists, and that other measures were being envisaged by the French Government to counteract any weakness in the North Atlantic Command. He added that although Morocco was not under his command, the situation there ought to be looked at "with understanding" because "any military deterioration in this sector would represent a supplementary danger for the Atlantic Command."

Other recent developments in connexion with NATO are described below.

Military Appointments.

Military Committee. General Mancinelli (Italy) became chairman of the Military Committee of NATO in mid-December, in succession to Lt.-General Pallis (Greece). [The chairmanship of the Committee rotates annually in alphabetical order among member-countries.]

On Oct. 24 it was announced in London that Admiral Sir Michael Denny (C.-in-C, Home Fleet) would succeed General Sir John Whiteley as British representative on the Standing Group of the Military Committee and chairman of the British Joint Services Mission in Washington, as from July 1956.

Staff Posts. The British War Office announced the appointment of Brigadier J. N. Carter as Assistant Chief of Staff at SHAPE on July 18, with the temporary rank of brigadier-general.

The appointment of General Paul Allard (France) as Deputy Chief of Staff for Plans and Operations at SHAPE was announced by General Gruenther on Aug. 10.

Central European Command. Air Chief Marshal Sir George Mills assumed command of Allied Air Forces, Central Europe, on Jan. 4, 1956, in succession to Air Chief Marshal Sir Basil Embry, who retired on Dec. 31.

Naval Commands. The appointment of Air Vice-Marshal Sir Bryan Reynolds as Allied Maritime Air C.-in-C., Channel Command, and Air C.-in-C., Eastern Atlantic Area of Supreme Allied Command, Atlantic, was announced by SHAPE on Nov. 11. Sir Bryan Reynolds will succeed Air Chief Marshal Sir John Boothman, and in addition to his NATO commands will also become Air Officer C.-in-C., R.A.F. Coastal Command.

Defence College. Lt.-General Clovis E. Byers (U.S.A.) assumed the appointment of Commandant of the NATO Defence College in Paris on Nov. 15. General Byers, who had been Deputy Commandant of the U.S. National War College in Washington, succeeded Air Marshal Lawrence Darvall (Britain) on completion of the latter's two-year term of duty.

Civilian Appointments.

It was announced by the Ministry of Defence in London on Sept. 12 that Mr. H. A. Sargeaunt, scientific adviser to the British Army Council, had been appointed assistant to Dr. H. P. Robertson (U.S.A.), scientific adviser to General Gruenther.

New Task Force.

A new NATO defence unit—the Southern European Task Force (SETAF)—was officially inaugurated on Oct. 25. The force comprises the former U.S. occupation troops in Austria (numbering about 5,500 men) and has its headquarters at Vicenza, northern Italy

Despatch of Further U.S. Guided-Missile Units.

It was announced in Washington on Dec. 22 that six guided-missile battalions armed with *Corporal* missiles would be sent to Europe early in 1956 to strengthen West European defences. The *Corporal*, which has a range of well over 50 miles, is a development of the German V-2 and can be fitted with a conventional or an atomic warhead. The European Command of the U.S. Army already has one *Corporal* battalion and several *Honest John* rocket batteries, as well as six atomic cannon battalions consisting of three batteries of two cannon each.

Position of Greece.

In view of the anti-Greek riots which had taken place in Istanbul and Izmir on Sept. 6, 1955 (see 14424 A), the new Greek Government of M. Karamanlis announced on Oct 11 that the Greek armed forces would not take part in NATO manoeuvres in the Eastern Mediterranean which were to be held during that month, and that the Greek battalion in Korea would be recalled as soon as possible. It was stated that these measures had been taken as a protest against the "passive attitude" of NATO after the anti-Greek incidents in Turkey, and that Greece's attitude would remain unchanged until the Turkish Government gave moral and material satisfaction.

Loan of Canadian Warships to Norway.

NATO H.Q. announced on Nov. 28 that, following discussions between the Chiefs of Naval Staff of the Royal Canadian Navy and the Royal Norwegian Navy, arrangements were being made by Canada to lend Norway three 2,360-ton frigates—the *Penetang*, *Prestonian*, and *Toronto*—to strengthen Norway's anti-submarine defences. They will be delivered in March 1956.

Fellowship and Scholarship Programme.

The North Atlantic Council announced on Oct. 27 that it had approved detailed arrangements for the NATO fellowship and scholarship programme agreed upon in July 1955, in implementation of Article 2 of the North Atlantic Treaty. A total of 13,500,000 French francs would be set aside for 1956-57, and there would be two categories of awards: (1) NATO research fellowships, to be awarded to established scholars for a period of a few months, and (2) long-term scholarships, to be awarded to younger scholars for the 1956-57 academic year. The programme is designed to promote the study of historical, political, constitutional, legal, social, cultural, linguistic, economic, and strategic problems relating to the common heritage and historical experience of the Atlantic countries, as well as the present needs and future development of the North Atlantic community.

It was stated that a select committee to choose candidates had been formed under the chairmanship of Mr. Wilgress (Canadian permanent representative to NATO, and chairman of the NATO committee on information and cultural relations), the other members being Dr. James B. Conant (U.S. Ambassador in Bonn, and formerly President of Harvard University); M. Robert Marjolin (Professor at Nancy University, and formerly Secretary-General of the O.E.E.C.); Dr. Alberto Tarchiani (a former Italian Ambassador in Washington); and Mr. H. U. Willink (Master of Magdalene College, Cambridge).

New Italian Fighter.

An agreement was signed on June 2, 1955, under which the U.S.A. agreed to provide military aid for the construction by the Fiat works in Turin of three prototypes of a new light jet fighter, the *Frat G-91*. A further agreement was signed on Dec. 7 between the Bristol Aeroplane Company and the Fiat Motor Company for the installation of Bristol *Orpheus* jet engines in the *Frat G-91*, and giving the Fiat company the exclusive rights to make and sell in Italy any turbo-jet engine of Bristol design.

Belgian Contribution to NATO.

The Belgian Minister of Defence announced on March 2, 1955, that Belgium had undertaken to keep three Army divisions at 77 per cent of strength at the disposal of NATO during 1955. Because of the fall in the Belgian birth-rate, however, she would be able in 1956 to keep only three divisions at 55 per cent of strength; for this reason it had been decided to organize two divisions at adequate strength, and one division as a reserve which in an emergency could be placed at the disposal of NATO within a fortnight.

Cost of German Defence.

The German answer to the questionnaire sent out annually by NATO to all its members was handed over in Paris on Aug. 31, 1955, after it had been approved by the Federal Government. One of the features of the report was the contention of Dr. Schäffer, the Federal Minister of Finance, that a net West German defence contribution of more than 9,000,000,000 DM. a year would "endanger the financial order and monetary stability" of the Federal Republic.

It was, however, reported from Bonn on Oct. 12 that the report had been returned by the NATO review committee, which had criticized it as incomplete and inadequate and as having failed to take into account the normal factors for computing a member-country's capacity to pay. This criticism was said to have been based principally on the conclusion that whilst the Ministry of Finance had obtained a grant of 9,000,000,000 DM. from Parliament for rearmament, only a small fraction of this amount would actually be spent in 1956, since virtually nothing had so far been done about raising the German armed forces. The committee also pointed out that it was unlikely that most of the 9,000,000,000 DM. Defence Budget would be spent in 1957, and it was suggested that the Federal Government should bear these facts in mind and review its position.

Lord Montgomery's Proposal for Unified Defence System.

Speaking on "Organization for War in Modern Times" to the Royal United Service Institution in London on Oct. 12, Field-Marshal Lord Montgomery urged that there should be a single political authority for the direction of war, with its seat in North America, and a supreme military authority for its military direction and to control world-wide air operations.

The first object of Western strategy, Lord Montgomery said, must be to win command of the air, which could not be done unless the Western air forces were organized and controlled as a single weapon. The economics of defence demanded closer integration, and eventually unification, of the three Services. Because of the increased tempo of modern war, the side that could execute its plans the most effectively from the beginning would gain the advantage. To destroy the enemy air forces, the air war must be directed and timed as part of a great single campaign, and the Western alliance must have the means of centrally controlling all moves in it.

The supreme military authority which he proposed would allocate the Western air forces (taking into account their countries of origin and logistics) to subordinate air commanders, who would each have reconnaissance, strike, and logistic support forces under them. The strike forces would be composed of bomber, fighter-bomber, and fighter-interceptor units and would also be responsible for air defence. In this way the whole weight of Western air power could be applied quickly to the right targets.

The supreme military authority would control air operations, either through some agency within its own organization or, preferably, through a commander appointed for the purpose—preferably an American, since the U.S.A. had the only large strategic air force in the Western alliance. For the initial air battle all air forces would come under the direct control of this authority; when the West had won control of the air, the air commanders could be put under the Supreme Commanders. [At present there are two Supreme Commands, Europe and the Atlantic; Lord Montgomery urged the creation of three more—Pacific, Middle East, and South-East Asia.]

Continuing, Lord Montgomery said that the bigger nations could prepare for both unlimited nuclear war and limited conventional war only by working on the principle of economy of force. But at the present time each Service tried to be self-contained, and in a large measure succeeded. Armies and navies saw in air power a way of concentrating great fire-power for their particular tasks, and the cry went up for air forces to support armies and air forces to support navies. "This, surely, is not the way to use the decisive instrument of warfare," he said. "We want to release the air forces from bondage and forge them into one mighty weapon. Instead, in the struggle between the Services there is duplication and wastage.

"Our objective," said Lord Montgomery, "must be to bring the three Services more closely together, so that unification will be possible without confusion. . . . One difficulty is the intermingling of functions in modern war. Armies require the support of air forces; air forces require protection of their bases; both are served by navies bringing fuel, food, and ammunition, and often able to participate in the land-air battle with naval aircraft. . . . To integrate the three [Services] more closely, a new type of senior officer, trained to be completely inter-Service from his earliest days, should gradually be produced. Cadet colleges, staff colleges, and so on might well be combined now."

Lord Montgomery criticized what he called the "committee system of management" found in London, where the professional side of defence was run by committees, boards, and councils. Instead, he suggested:

(i) A Minister of Defence with real power of decision and responsible for air, sea, and land forces, and also for civil defence.

(ii) An Under-Secretary in each Service Ministry to direct the Services in accordance with the instructions of the Minister of Defence.

(iii) A Chief of Staff of the armed forces as professional adviser to the Minister. He would issue orders to the Service chiefs on defence matters and have power of decision in case of disagreements.

(iv) A Chief of Staff of each Service who would be the sole professional adviser to his Under-Secretary.

Only in this way, Lord Montgomery thought, could the Minister of Defence get true and unbiased advice, and only when he had the power of decision would the "Service empires" disappear.

Lord Montgomery emphasized the importance of the Royal Navy, which might well play a definite part in saving Britain from complete disaster after a heavy surprise attack. To control the seas, navies must have their own aircraft, for which some form of floating airfield was necessary; with the progress in vertical take-off and landings, however, something smaller and cheaper should be designed than the present aircraft-carrier.

The development of guided missiles and rockets, Lord Montgomery thought, would lead to the recasting of the present organization of tactical air forces, which were highly vulnerable so long as they were tied to long, easily distinguishable, concrete runways in forward areas. "We must enable our aircraft to be launched without the use of large airfields, and to use pierced steel-plating airstrips in fields throughout the countryside. The tactical air forces ought to be freed from their role in air defence, their primary task being to disrupt enemy land movement. All bombing and ground-attack aircraft must carry the nuclear weapon, which today many of them cannot do."

For armies, Lord Montgomery suggested the formation of "standard" divisions and the abolition of the infantry and armoured divisions as at present existing. The "standard" divisions would be composed of three groups of infantry, tanks, and artillery, able to fight both mobile or static battles. A detailed investigation was needed into the size, role, tasks, and organization of reserve armies in the European theatre.

As regards logistics, Lord Montgomery declared: "We shall be fighting the air war at 700 knots or more But we still have a logistic system that moves at 15 knots." Air transport on a gigantic scale was needed, and the "tremendous administrative tail the Allies had to drag across Europe in World War II" must be cut down. He also criticized as "archaic" the present mobilization system, which he described as based on the old concept of a "nation in arms," with adequate warning of war and time to mobilize This concept, however, was no longer practical against a background of nuclear warfare. A sound civil defence organization was also vital, and must be under military direction and control.

Agreement on New NATO Headquarters.

An agreement making available to NATO a site in the Boulevard Lannes (near the Porte Dauphine on the edge of the Bois de Boulogne) for the construction of its new headquarters building in Paris was signed on Dec. 20 by Lord Ismay, the Prefect of the Seine Department, and the chairman of the Paris Municipal Council. The building will be constructed according to designs by M. Jacques Carlu (Inspector-General of Civil Monuments in France, and an eminent French architect) and is expected to be ready in 1957. Its cost will be $6,500,000, of which 40 per cent will be contributed by the United States.

Dr. Kristinn Gudmundsson, the Icelandic Foreign Minister, assumed the chairmanship of NATO for the year 1955-56 on Sept. 26, succeeding M. Stephanopoulos (Greece).

A. EGYPT. — Aswan High Dam Project. - U.S. and British Offer to assist in Financing of Initial Stage.

Following a visit to the United States by the Egyptian Minister of Finance (Dr. Abdel Moneim el-Kaissouni) it was announced in Washington on Dec. 17, 1955, that the U.S.A. and Britain would give Egypt financial support in the construction of the first stage of the proposed High Dam at Aswan. Subject to approval by their respective Parliaments, they would also be prepared to "consider sympathetically in the light of then existing circumstances further support towards financing the later stages [of the Aswan Dam project] to supplement World Bank financing." No official statement was made about the amount of the British and U.S. offer, but it was unofficially reported that the U.S.A. would contribute $56,000,000, whilst Britain would provide $14,000,000 in the form of additional releases from Egypt's blocked sterling balances.

An offer of Soviet financial assistance in the construction of the Aswan Dam had been made to the Egyptian Government in October last (see 14486 B).

The Aswan Dam project, the completion of which is estimated to take 15-18 years, envisages the construction of a main dam 365 feet high and three miles long to form a lake with an area of some 750 square miles. Irrigation projects would convert 700,000 acres of intermittently irrigated land to dependable irrigation, and would open an additional 1,300,000 acres to irrigation for the first time. In addition, a power station at the dam would have a generating capacity of 750,000 kilowatts, almost half as much again as the present total installed capacity of Egypt.

An agreement had been signed in Cairo on Oct. 30 by the Egyptian Government and the British firm of Sir Alexander Gibb and Partners under which the latter undertook to act as consulting engineers for the Aswam Dam project. Dr. Mohammed Selim, secretary-general of the National Production Council, stated on Oct. 6 (when a preliminary agreement with Sir Alexander Gibb and Partners was signed) that an international body of consultants would be retained as a "higher body" than Sir Alexander Gill and Partners, as Egypt wanted to "draw on experience from all over the world."

B. JAPAN. — New Cabinet formed by Mr. Hatoyama.

Following the merger of the Democratic and Liberal parties as the Liberal Democratic Party (see 14351 A), the Japanese Prime Minister, Mr. Hatoyama, reconstituted his Cabinet on Nov. 22 and presented it to the Emperor. The new administration—the third headed by Mr. Hatoyama—was drawn solely from the Liberal Democratic Party (which has an overall majority in Parliament) and contained ten new Ministers, its membership being as follows:

Mr. Ichiro Hatoyama ..	Prime Minister.
Mr. Mamoru Shigemitsu	Deputy Premier and Foreign Minister.
*Mr. Ryozo Makino	Justice.
Mr. Hisato Ichimada	Finance.
*Mr. Ichiro Kiyose	Education.
*Mr. Eizo Kobayashi .	Welfare.
Mr. Ichiro Kono ..	Agriculture and Forestry.
Mr. Tanzan Ishibashi .	Industry and International Trade
*Mr. Shinji Yoshino	Transport.
*Mr. Isamu Murakami .	Postal Services.
*Mr. Tadao Kuraishi ..	Labour.
*Mr. Motoharu Baba ..	Construction.
*Mr. Naka Funada ..	Minister of State and Director-General of the Defence Board.
Mr. Tatsunosuki Takasaki	Minister of State and Director-General of the Economic Planning Board.
*Mr. Masataka Ota .	Minister of State and Director-General of the Local Autonomy Board.
Mr. Tadao Oasa	Minister of State and Chairman of the National Public Safety Commission.
*Mr. Matsutaro Shoriki ..	Minister of State and Director-General of the Hokkaido Development Board.
Mr. Ryutaro Nemoto .	Chief Cabinet Secretary.

* New Ministers.

The new Ministers of Justice and Education (Mr. Makino and Mr. Kiyose) have both been members of the House of Representatives since 1920, and are both lawyers. Mr. Kobayashi, an engineer, has been Vice-Minister for Commerce and Industry. Mr. Yoshino was Minister of Commerce and Industry in Prince Konoye's Cabinet of 1937; he was "purged" after the war but subsequently "de-purged" and re-entered public life. Mr. Murakami, chairman of the Board of Directors of the Yamato Construction Company, is a former deputy secretary-general of the Liberal Party. Mr Kuraishi, formerly chairman of the Diet Policy Committee of the Liberal Party, led a Japanese parliamentary delegation to the U.S.A. and the Philippines in 1951. Mr. Baba has been a member of the House of Representatives since 1936, and was chairman of its Legal Committee before entering the Cabinet. Mr. Funada, a former Deputy Mayor of Tokio, was a prominent member of the *Seiyukai* party before the war, and held several important Government posts. Mr. Shoriki, proprietor of the newspaper *Yomuri Shimbun*, was an advisor to the Koiso Cabinet during the war. Mr. Ota was formerly vice-president of the newspaper *Hochi Shimbun* and a leading member of the *Seiyukai* party; he was "purged" after the war, subsequently "de-purged," and entered Parliament as a Liberal in 1952.

Mr. Shigemitsu, Mr. Ichimada, Mr. Kono, Mr. Ishibashi, Mr. Takasaki, Mr. Oasa, and Mr. Nemoto retained their former portfolios, in addition to the Prime Minister himself.

In presenting his new Government to the House of Representatives, Mr. Hatoyama said that it would have three principal goals: "(1) Overall reform of the Government's administrative structure in line with the special conditions of the country; (2) complete revision of the tax structure with a view to making the tax burden more bearable for the people; (3) revision of the Constitution so as to make it accord with the status of an independent nation."

Mr. Hatoyama welcomed the emergence of a two-party political system as "a happy development for the advancement of democracy and parliamentary government in our country." He added: "While it goes without saying that democratic government is based on the will of the majority, it is also important that the minority be treated in such a way as to be assured of respect for its position. Standing on the basis of the support of an absolute majority party, the new Cabinet pledges itself to abide by this principle by listening with respect to the views of the minority party and by being constantly attentive to the voice of the people on all matters. . . ."

Mr. Hatoyama was re-elected Prime Minister by the House of Representatives on the same day (Nov. 22), receiving 288 votes against 150 for Mr. Suzuki, chairman of the Socialist Party. In the House of Councillors Mr. Hatoyama received 149 votes and Mr. Suzuki 64.—(Japanese Embassy, London)

A. KENYA. — Continued Decline in Mau Mau Activities. - Relaxation of Conscription and Security Measures. - Ban on New African Political Organization. - Government Changes.

The security situation in Kenya continued to improve in the last three months of 1955, Mau Mau activities being almost entirely confined to thefts of cattle. Security forces maintained their pressure against the remaining terrorists, who were estimated to number not more than 3,000 and to be confined mainly to the slopes of the Aberdare range and Mount Kenya. A field intelligence officer (James McNab) was killed on Nov. 10 while leading an attack against a terrorist gang, whilst on Oct. 21 another British intelligence officer (Donald Bellingham) had been shot in error by loyal Africans when leading a patrol disguised as a Kikuyu. In view of the improved situation the Kenya Government announced on Dec. 15 that the period of compulsory national service in the Colony would be reduced after Jan. 1, 1956, from two years to 18 months, though the Government would reserve the right to retain for two years men regarded as operationally essential.

Casualty figures of Mau Mau and of the security forces since the start of the emergency are given below, together with other recent developments.

Casualty Figures. Statistics published in Nairobi on Jan. 1, 1956, showed that 10,173 Mau Mau terrorists had been killed, 2,274 had been captured, and 2,124 had surrendered since the beginning of the emergency (October 1952). In the same period the security forces had lost 57 Europeans, three Asians, and 512 Africans killed The number of civilians killed totalled 32 Europeans, 24 Asians, and 291 Africans. It was estimated in the report that not more than 20 gang leaders of importance were still at large

A detailed statement on the Government's rehabilitation programme for Mau Mau detainees, published on Oct. 19, 1955, showed that just under 62,000 Mau Mau were in custody at the end of September. Some 10,000 had already been released by that date, and it was hoped to increase the release rate from the existing level of about 1,000 a month.

Temporary Suspension of Death Penalty for Unlawful Possession of Ammunition. Amendments to the emergency regulations concerning the possession of firearms and ammunition were published in the Kenya official Gazette on Dec. 28, 1955. They provided that, for a trial period of three months from Jan. 1, 1956, the penalty for unlawful possession of ammunition in circumstances such as to raise a reasonable presumption that it was intended to be used in a manner prejudicial to the public safety or to the maintenance of order was to be reduced from death to life imprisonment, whilst the penalty for a similar offence committed in other circumstances would be reduced from life imprisonment to 10 years.

Banning of African Political Organization. Following the relaxation in June 1955 of the total prohibition of African political associations, which had been in force since the beginning of the emergency, a new African political organization, known as the Kenya African National Congress, was formed at a meeting of many tribes in Nairobi on Dec. 18. The president of the organization, Mr C. M. Argwings-Kodhek (a Nairobi African lawyer), said that it would have an African and not a tribal flavour, and that its policy would be "slightly left of centre." The declared aims of the new body were "to promote political organizations among Africans in Kenya and cultivate in them political and civic awakening and consciousness," and "to cultivate mutual relations with other political organizations in Kenya."

On Dec. 21, however, the Minister for African Affairs (Mr. Windley) announced that the Kenya Government would not permit the registration of the Kenya African National Congress. He explained that the proposals for the organization went beyond and infringed the Government's published policy, which was intended to encourage the formation of African political associations on a district but not on a colony-wide basis. Previous experience had shown that the colony-wide type of organization had been used in the past to further the aims of terrorists, and at the present time, with gangs still at large, the Government could not accept such an organization. In the existing conditions, therefore, the Government could not permit any Kikuyu, Embu, or Meru to join political associations, and permission to hold further meetings to discuss a similar project would be refused. Mr. Windley also stated that the name of the proposed new organization was not acceptable to the Government.

Increased Sentences on European Officials. Two former inspectors of the Kenya Police, A. P. Fuller and O. D. Waters, who had been sentenced on Sept. 1 to 18 months' hard labour on charges of causing grievous bodily harm to an African prisoner who had died in their custody (see 14423 A), had their sentences increased to 3½ years by the Kenya Supreme Court on Oct. 21 on the grounds that their earlier sentences were inadequate. Chief Justice Sir Kenneth O'Connor, giving the court's decision, said that "the cruelty inflicted on a helpless prisoner was not an isolated act or done in hot blood," but was "a deliberate, protracted, relentless course of conduct continued over five days."

On Oct. 14 the Supreme Court had set aside a fine of £10 imposed on the third man accused in the case (Mr. W. R. Bosch) and substituted for it a sentence of six months' imprisonment with hard labour. A fourth man charged in the case, Mr. G. P. Coppen, who had been fined £25 for his part in the affair, had since left Kenya.

Mr. Lennox-Boyd, the British Colonial Secretary, answering questions on the case in the House of Commons on Oct. 26, said that he and the Governor had been "greatly disturbed" by the case, which had occurred at a time when a marked improvement had appeared in the control and discipline of the security forces. He was satisfied, however, after a detailed examination of all the circumstances, that this was an isolated case and not symptomatic of a general disregard of lawful procedures by the Kenya police force. He did not consider, therefore, that an independent inquiry was required.

Mr. D. L. Blunt, a former Director of Agriculture in Kenya, was appointed Minister of Forest Development, Game, and Fisheries in the Kenya Government on Sept. 30, 1955, in succession to Major (now Sir) F. W. Cavendish-Bentinck, the newly appointed Speaker. Mr. J. J. Adie was appointed Minister for Education, Labour, and Lands on Sept. 19, but was succeeded on Dec. 6 by Mr. W. F. Coutts.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14423 A.)**

B. UNITED KINGDOM. — Capital Issues in 1955.

New capital issues in the U.K. in 1955 amounted to £567,192,000, as compared with £471,130,000 in 1954. Of the 1955 total, £525,101,000 (92.6 per cent) was for the home market, £39,941,000 (7 per cent) for Commonwealth and Empire countries, and £2,150,000 (0.4 per cent) for foreign countries.

Issues in respect of the home market were divided into the following categories: Public Bodies, £305,725,000; Production, £165,482,000; Trade, £13,375,000; Transport, £11,715,000; and Finance, £28,804,000 Classified by industrial and other groups, the total of all capital issues (home and overseas) was divided as follows: Governments, £17,513,000; Local Authorities, £8,805,000, Public Boards, £296,920,000; Railways, nil, Gas and Water, £5,052,000; Electric Light and Power, £3,480,000; Telegraph and Telephone, £2,868,000; Road Transport, £50,000; Shipping, Canals and Docks, £11,665,000, Banking, Insurance, Investment and Finance, £37,536,0000; Property, £1,010,000; Coal, Iron, Steel and Engineering, £11,763,000; Motors and Aircraft, £1,143,000; Mining, £8,706,000; Oil, nil; Tea, Coffee and Rubber, £50,000; Breweries and Distilleries, £4,614,000; Miscellaneous, £156,018,000.

The above figures exclude all borrowings by the British Government; shares issued to vendors; allotments arising from the capitalization of reserve funds and undivided profits; sales of already issued securities which add nothing to the capital resources of the company whose securities have been offered; issues in replacement of securities previously held in the United Kingdom; and private placings for which no market quotations are obtained.—(Midland Bank Ltd.) **(14293 E.)**

C. PAKISTAN. — Expansion of East Pakistan Cabinet.

The Provincial Ministry of East Pakistan was expanded on Sept. 7 to a total membership of 14. Based on a coalition of the *Krishak Sramik* party (K.S.P.), the *Nizam-e-Islam*, dissidents of the Awami League (Dissident A.L.), the Congress Party, and the Scheduled Caste Federation, its composition was as follows (new Ministers marked by asterisk):

Mr. Abu Hussain Sarkar (K.S.P.)—Chief Minister and Home Affairs, including General Administration, Prisons, Transport, and Jute, Mr Ashrafuddin Ahmed Chaudhry (*Nizam-e-Islam*)—Education; Mr Abdus Salam Khan (Dissident A.L.)—Communications, Buildings and Irrigation; Mr. Hashim-uddin Ahmed (K.S.P.)—Agriculture and Relief; Mr. Syed Azizul Huq (K.S.P.)—Commerce, Labour, and Industry; Mr. Syed Mustaghausul Huq* (Dissident A.L.)—Revenue; Mr Ghyasuddin Ahmed Chaudhri* (K.S.P.)—Local Self-Government and Registration; Mr. Latif Hosain* (K.S.P.)—Food and Fisheries; Mr. Mahmudunnabi Chaudhri* (K.S.P.)—Public Relations; Mr. Nasir-uddin Ahmed Chaudhri* (*Nizam-e-Islam*)—Judicial and Legislature; Mr. A. M. Zahoorul Huq* (Dissident A.L.)—Medical and Public Health; Mr. Basanta Kumar Das* (Congress)—Finance; Mr. Sarat Chandra Nazumdar* (Congress-Scheduled Caste)—Co-operatives; and Mr. Madhusudhan Sarkar* (Scheduled Caste Federation)—Excise and Forests.

The Ministry comprised six members of the *Krishak Sramik* party, three of the Dissident Awami League, two of the *Nizam-e-Islam*, and three of the Congress Party or Scheduled Caste Federation.—(Pakistan High Commissioner's Office, London) **(Prev. rep. 14273 C.)**

D. CHINA. — Adoption of Horizontal Script.

As from Jan. 1, 1956, all Chinese newspapers appeared with characters printed horizontally, instead of in vertical form, and reading from left to right. The reform was the first instalment of a comprehensive linguistic project which had been decided upon in October last, and which will include the simplification of Chinese characters; the promotion of the Peking form of pronunciation throughout the whole of China; and, ultimately, the adoption of an alphabetic script for written Chinese.

(Times - New York Times)

A. NORTHERN IRELAND. — Unemployment Situation. - Discussions between N.I. and British Ministers. - Appointment and Membership of Development Council to advise on Industrial Promotion.

The Government of Northern Ireland announced on Sept. 27, 1955, that Lord Chandos, chairman of Associated Electrical Industries, Ltd. and (as Mr. Oliver Lyttelton) a former British Colonial Secretary, had accepted an invitation to become chairman of a new development council to assist the N.I. Government to promote new industries and to reduce unemployment in Northern Ireland.

The creation of such a council had been foreshadowed by Major Lloyd-George (the British Home Secretary) on May 5, following a meeting which took place on Feb. 26 with a group of Northern Ireland Ministers comprising Mr. Brian Maginness (acting Prime Minister), Mr. Ivan Neill (Minister of Labour and National Insurance), and Lord Glentoran (Minister of Commerce and Industry). Major Lloyd-George's statement was made in the course of a House of Commons debate on the employment position in Northern Ireland.

Mr. Robens (a former Labour Minister of Labour and National Service), who opened the debate, said that since 1945 unemployment figures for Northern Ireland had fluctuated between 28,000 and 60,000, the present figure being 36,000, or 7.7 per cent of the working population. He pointed out that the position would have been worse but for the fact that 21,000 persons had emigrated to Canada since 1951, and called for a " drastic programme " of public works and the setting up of a development corporation with the primary task of co-ordinating efforts to deal with unemployment, but having powers to borrow and lend money, as well as to carry on business itself if it thought fit.

Major Lloyd-George, in reply, stated that the N.I. Government, in an effort to provide more employment, had spent £5,000,000 since 1945 on new factories, besides over £1,000,000 on grants and £500,000 on loans to new firms settling in Northern Ireland. However, although about 26,000 new jobs had thus been provided and " encouraging " progress been made in inducing firms to come to Northern Ireland, there was an undoubted need for increased expenditure on social investment, particularly on housing, schools, and hospitals. As regards the immediate situation, the Home Secretary pointed out that harbour works to the value of £2,000,000 would be carried out at Belfast. Furthermore, in an attempt to alleviate the situation in the aircraft industry caused by the cancellation of military orders, the Ministry of Supply had arranged with the English Electric Company to sub-contract to Short Brothers and Harland (Belfast) the construction of additional *Canberras*, whilst Bristol Aircraft Ltd. had placed orders with Shorts for a further seven *Britannias*. In addition, the Admiralty had arranged for the aircraft-carrier H.M.S. *Perseus* to be refitted at Belfast, thereby providing work for 500-600 men for 12 months.

After careful consideration, and after consulting the N.I. Government, the British Government had come to the conclusion that a development corporation with executive powers would not be desirable in Northern Ireland, where there were strong arguments against dividing responsibility and multiplying executive functions. The two Governments had agreed, however, that there should be set up without delay an advisory development council, including representatives of both sides of industry from Britain and Northern Ireland, to advise the N I. Government on ways of promoting further economic development. The appointment of the council would not in any way derogate from the general responsibility of the N.I. Government, and it would be for that Government to carry into effect such of the council's recommendations as it might approve. Major Lloyd-George added that the British Government had promised the N.I. Government its support " in whatever way seemed most appropriate in the light of the recommendations adopted by Northern Ireland," not excluding the provision of any supplementary finance required to give them effect.

The comparatively heavy incidence of unemployment in Northern Ireland (which, at the time, averaged 8-10 per cent as compared with less than 2 per cent in Great Britain) had led to representations calling for urgent measures to alleviate the situation being made to the British Government in November, 1954, both by a deputation of Ulster Unionist M.P.s and by a mission of three Labour M.P.s who had previously visited Northern Ireland.

The Labour M.P.s concerned—Mr. Robens, Mr. Callaghan (a former Parliamentary Secretary to the Admiralty), and Mr. Bottomley (a former Secretary for Overseas Trade)—called in their memorandum to the Home Secretary for (1) a vigorous plan of economic expansion, financed by grants and low-interest loans; (2) the construction at Belfast of a new drydock able to take the largest ships afloat; (3) the setting-up of a textile development council; (4) greater use of existing facilities for aircraft production; (5) the expansion of workers' training facilities.

The first meeting of the Northern Ireland Development Council took place on Nov. 24, 1955. Its membership (apart from Lord Chandos, the chairman) had been announced on Nov. 1 as follows:

Mr. James Crawford, general president, National Union of Boot and Shoe Operatives, and member of the T.U.C. General Council; Mr. H J. Curlis, district organizer, National Union of General and Municipal Workers; Captain R. C. M. Duckworth, R.N., Colonel S. G. Haughton, chairman of John Kelly, Ltd., Belfast, coal importers and shipowners; Mr. S. C. Leslie, head of the Information Division, H.M. Treasury; Sir Ewart Smith, a director of Imperial Chemical Industries Ltd.; Mr. W. J. P. Webber, general secretary, Transport Salaried Staffs Association, and a member of the T.U.C General Council.

It was announced on Sept. 29, 1955, that the British Thomson-Houston Co. Ltd. (a subsidiary of Associated Electrical Industries Ltd., of which Lord Chandos is chairman) would build at Larne (Co. Antrim) the largest steam-turbine works in Europe. The project, expected to be completed by 1957 at a cost of £8,000,000, will give employment to 3,200 persons. (Belfast Telegraph - Northern Whig, Belfast - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14393 E.)**

B. NORWAY - SOVIET UNION. — Norwegian Labour Party rejects M. Khrushchov's Proposal for Closer Contact with Soviet Communist Party.

It was reported on Dec. 10 by *Arbeiderbladet*, the organ of the Norwegian Labour Party, that during the recent visit to Moscow of Hr. Gerhardsen, the Norwegian Prime Minister, M. Khrushchov had enquired about the possibility of establishing closer contact between the Norwegian Labour Party and the Soviet Communist Party, and had suggested that delegations should be exchanged between the two parties and their related organizations. After consideration of the proposal by the central executive of the Norwegian Labour Party, however, Hr. Gerhardsen, in his capacity as party chairman, had informed M. Khrushchov that his party was unable to accept it.

" The Communist Party of the Soviet Union and the Norwegian Labour Party," Hr. Gerhardsen's letter said, " have very different views about many basic political questions, and there is therefore no basis for party co-operation between them. In so far as the Communist Party's proposal represents a desire for greater mutual understanding between the countries in the East and West, we welcome it with pleasure."

A suggestion in Hr. Gerhardsen's letter that reciprocal visits of Norwegian Labour and Soviet journalists would make " a worthwhile contribution to mutual understanding " was subsequently accepted by M. Khrushchov.—(Arbeiderbladet, Oslo - Royal Norwegian Embassy, London) **(Prev. rep. 14586 C.)**

C. WALES. — New Functions for Welsh Office.

The Minister of Housing and Local Government (Mr. Sandys) informed Welsh local authorities on Dec. 30 that all local government functions relating to Wales and Monmouthshire would in future be exercised through the Ministry's Welsh Office at Cathays Park, Cardiff, except where such arrangements presented serious difficulties.

The only Welsh affairs which would continue to be dealt with from Whitehall would be district audits (with the exception of appeals), Exchequer grants under the Local Government Act, 1948, statistical returns, superannuation of local government employees, rating and valuation, and the administration of certain works regulation Acts.

A Ministry official explained that the transfer of these functions completed a process that had been going on for some time. When the Welsh Office was set up in 1951 it assumed all the responsibilities for local government, housing, water supply, etc., which had previously been carried out by the Welsh Board of Health.—(Times - Manchester Guardian) **(14597 B.)**

D. SOVIET UNION - UNITED STATES —Publication of U.S. Magazine to be resumed in the U.S.S.R.

It was announced in Moscow on Dec. 23 that the Soviet Government had agreed to a proposal by the U.S. Government that the Russian-language magazine *Amerika* should again be published and distributed in the Soviet Union by the U.S. Embassy in Moscow. The magazine was founded in 1945 but suspended publication in 1952, when the U.S. Embassy said that it had reason to believe that it was not reaching the general public. The magazine will be edited and printed in the U.S.A. and will concentrate on cultural and other non-political subjects. (New York Herald Tribune) **(Prev. rep. 12382 B.)**

E. NEW ZEALAND - UNITED KINGDOM. — Reciprocal Social Security Agreement.

An agreement for a reciprocal social security scheme between the U.K. and New Zealand was signed in Wellington on Dec. 20 and will come into operation on April 1, 1956. It covered the payment of retirement and widows' pensions and made benefits at the current rate available to British people emigrating to New Zealand and to New Zealanders living in the United Kingdom—(Directorate of Information Services, Wellington) **(Prev. rep. U.K.-Australian Agreement, 12967 F.)**

A. UNITED KINGDOM. — The New Year Honours.

The New Year Honours List was published on Jan. 1, the principal awards being set out below:

Barons. Colonel J. J. Astor, chairman of the Times Publishing Company, lately chairman of the Press Council, and Conservative M.P. for Dover from 1922 to 1945, Sir Raymond Evershed, Master of the Rolls; the Most Rev Dr Cyril Garbett, Archbishop of York and Primate of England, Sir Frederick Godber, chairman of the Shell Transport and Trading Co Ltd

[The Archbishop of York, Dr. Garbett, died on Dec. 31, 1955, the day before the Honours List was published. The barony will not be created, its publication in the Honours List being due to the fact that it had been approved by the Queen before Dr. Garbett's death]

Baronets. Sir Hubert Houldsworth, Q.C., chairman of the National Coal Board; Colonel J. R. H. Hutchison, M.P. (Conservative, Glasgow, Scotstoun), for political and public services; Colonel Charles Ponsonby, chairman of the Royal Empire Society, formerly Conservative M.P. for Sevenoaks (1935-50), for political and public services.

Companions of Honour. Viscount Cecil of Chelwood (91), for public services, Sir John Kotelawala, Prime Minister of Ceylon; Mr. Arthur Waley, for services to the study of Chinese literature.

[Viscount (Robert) Cecil of Chelwood was President of the League of Nations Union from 1923 to 1945, and received the Nobel Peace Prize in 1937. He was Conservative M P. for East Marylebone from 1906-10 and Independent Conservative M P for Hitchin from 1911-23, and held the successive posts of Parliamentary Under-Secretary for Foreign Affairs (1915-16), Minister of Blockade (1916-18), Assistant Secretary of State for Foreign Affairs (1918), Lord Privy Seal (1923-24) and Chancellor of the Duchy of Lancaster (1924-27)]

Knights Bachelor. Dr. Eric Ashby, President and Vice-Chancellor of Queen's University, Belfast, Mr. J. G. Banks, Lord Provost of Edinburgh; Major A. H Bibby, for political and public services in Lancashire and Cheshire; Major Reginald Bullin, chairman, Portsmouth Local Employment Committee and Disablement Advisory Committee, vice-president of the Magistrates' Association, Mr. Charles Connell, chairman, Charles Connell & Co Ltd (shipbuilders), Glasgow; Judge Edgar T. Dale, County Court Judge; Mr Henry Dalton, Assistant Commissioner, Metropolitan Police; Colonel Alan Gomme-Duncan, M.P. (Conservative, Perth and East Perthshire), for political and public services; Colonel Bartle Edwards, chairman of Norfolk County Council; Lieut.-Colonel Fordham Flower, chairman, Executive Council, Shakespeare Memorial Theatre, Stratford-on-Avon, Mr Leslie Ford, general manager, Port of London Authority; Alderman Harry Hardy, for political and public services in the West Riding of Yorkshire; Mr R. G Hawtrey, the economist; Mr. Frank Higginson, secretary, Imperial War Graves Commission, Dr. Eric James, High Master of Manchester Grammar School, Mr. H. F. H. Jones, deputy chairman, Gas Council, Brigadier A. H. Killick, secretary, Royal Institute of Chartered Surveyors; Professor Hersch Lauterpacht, Q.C., British judge of the International Court of Justice, lately Whewell Professor of International Law at Cambridge; Mr. William Lyons, chairman and managing director, Jaguar Cars Ltd., Coventry, Mr G M McNaughton, Chief Engineer, Ministry of Housing and Local Government; Mr. Walter Mercer, Professor of Orthopaedic Surgery, University of Edinburgh, and President of the Royal College of Surgeons, Edinburgh, Mr. Victor Negus, consulting surgeon, King's College Hospital, London; Dr George North, the Registrar-General; Mr. Tom O'Brien, M P. (Labour, Nottingham West), member of the General Council of the T.U C. and general secretary of the National Association of Theatrical and Kine Employees; Dr. A. G Pugsley, Professor of Civil Engineering, University of Bristol; Brigadier R. H. Rayner, formerly Conservative M.P. for Totnes (1934-55), for political and public services; Mr. W. W. F. Shepherd, for political and public services in Cheshire; Brigadier E. O. Skaife, for political and public services in Wales; Colonel C. F. Stern, for services to horticulture; Mr. John Stewart, chairman of Wages Councils, Mr. A. R. Astley Weston, Legal Adviser and Solicitor, Ministry of Agriculture, Fisheries, and Food, Professor Solly Zuckerman, deputy chairman, Advisory Council on Scientific Policy.

Other recipients of knighthoods, apart from those enumerated above, included the following:

Foreign Office List. Mr. Charles Empson, H.M. Ambassador in Santiago; Brigadier Richard Gambier-Parry, Director of Communications, Foreign Office; Mr. W. H. T. Luce, lately Adviser on External and Constitutional Affairs, Sudan Government; Mr. J. W. Nicholls, H M. Ambassador in Tel-Aviv; Mr. F B. A. Rundell, H.M. Consul-General at New York, Mr. W. J. Sullivan, H.M. Ambassador in Mexico City.

Commonwealth of Australia List. Mr. J. V. H. Best, formerly Federal President of the Australian Dental Association, for public services; Mr. R. J. F Boyer, chairman of the Australian Broadcasting Commission, for public services; Mr A. S. Brown, Secretary of the Prime Minister's Department, Canberra, and Secretary to the Cabinet, Mr. J. R. McGregor, for services to the Australian wool industry, Mr. A. S. Mitchell, of Melbourne, for public services to the Commonwealth of Australia; Mr. F. B. Phillips, Chief Judge of the Supreme Court of Papua and New Guinea; Lieut.-General Henry Wells, Chief of the Australian General Staff.

New Zealand List. Mr. W W. Mulholland, of Canterbury, for services to farming in New Zealand; Mr. Thomas Clifton Webb, Q.C., New Zealand High Commissioner in London.

Ceylon List. Mr. R. S. E. Gunewardene, the Ceylonese Ambassador in Washington.

Commonwealth Relations Office List. Judge G. C. Ligertwood, of the Supreme Court of South Australia; Mr. Malcolm McIntosh, Minister of Works and Minister of Marine, South Australian Government; Mr. F P. Selleck, Lord Mayor of Melbourne; Professor S. McM. Wadham, Professor of Agriculture, University of Melbourne, for public services.

Colonial Office List. Kamil Mohamed Ariff bin Kadir Mustan, for public services in Penang, Malaya; Dr. Paul Boffa (formerly Minister of Health and Social Services in Dr. Borg Olivier's Cabinet), for public services in Malta; Mr. J. E. Carberry, Chief Justice of Jamaica; Major F. W. Cavendish-Bentinck, Speaker of the Kenya Legislative Council, for public services in Kenya, Mr. J. H. M. de Comarmond, Chief Justice of the High Courts of Lagos and the Southern Cameroons; Mr. Gordon Hadow, Deputy Governor of the Gold Coast; Mr. J. D. Harford, Governor of St. Helena; Mr. J. B. Hutchinson, Director, Empire Cotton Growing Corporation's Research Station, Uganda; Mr. Ragnar Hyne, Chief Justice of Fiji; Mr. T. P F. McNeice, chairman of the Committee on Local Government, Singapore; Dr. S. L. Ayodeji Manuwa, Chief Medical Adviser to the Federal Government, Nigeria; Mr. Theodore Pike, Governor of British Somaliland; Mr R. Evelyn Turnbull, Governor of North Borneo; Mr D C. Watherston, Chief Secretary, Federation of Malaya

Royal Navy List, Army List, and Royal Air Force List. Recipients of knighthoods in the armed forces included Vice-Admiral W. W. Davis, Vice-Admiral M. H. Elliott, Vice-Admiral C. F. W Norris, Rear-Admiral L. E Rebbeck (retd), Lieut.-General R A. Hull, Lieut-General B. C. H. Kimmins, Lieut-General Horatius Murray, Acting Air Marshal Lawrence Darvall, Air Vice-Marshal L. J. V. Bates, and Air Vice-Marshal Douglas Macfadyen.

Royal Victorian Order. Recipients of the K C.V O. included Professor A. E. Richardson, the President of the Royal Academy.

D.B.E. Awards. The D.B.E was conferred upon the Countess of Albemarle, chairman of the Development Commission; Miss Margot Fonteyn, *prima ballerina* of the Sadlers Wells Ballet (Miss Fonteyn is the wife of the Panamanian Ambassador in London, Dr. Roberto de Arias), Mrs. Kathleen Lonsdale, Professor of Chemistry and head of the Department of Crystallography, University College, London, and Mrs. Lucile Sayers, for political and public services

The D.B E. was also conferred upon Mrs Grace Hilda Ross, Minister for the Welfare of Women and Children in the New Zealand Cabinet. The award was announced in the New Zealand List.

C.B.E. Awards. Recipients of the C.B.E. included Group-Captain Douglas Bader, the legless fighter "ace," for services to the disabled; Mr. Vernon Bartlett, the journalist and broadcaster; Mr. Rudolf Bing, manager of the Metropolitan Opera, New York, formerly artistic director of the Edinburgh Festival and manager of the Glyndebourne Opera; Miss Agatha Christie (Mrs Max Mallowan), the writer of detective stories; Mr. L. P. Hartley, the novelist and critic, Dr. R. T Jenkins, the Welsh historian; Mr. Paul Scofield, the Shakespearean actor; Sir Osbert Sitwell, the author and poet; and Miss C. V. Wedgwood, the historian.

The following titles were taken by the new barons created in the Birthday Honours of June 1955 (see 14252 A) and by the two recipients of baronies in the governmental reorganization of April last (see 14129 A, page 14132):

Mr. Ralph Assheton, formerly Conservative M.P. for the City of London, Rushcliffe, and Blackburn West—Lord Clitheroe; Sir Geoffrey Heyworth, chairman of Unilever Ltd—Lord Heyworth; Mr. Malcolm McCorquodale, formerly Conservative M.P. for Epsom and Sowerby—Lord McCorquodale of Newton, Sir Arnold McNair, Q.C., formerly President of the International Court of Justice—Lord McNair; Mr. Henry Strauss, Q.C., formerly Parliamentary Secretary to the Board of Trade—Lord Conesford; Commander T. D. Galbraith, Minister of State, Scottish Office—Lord Strathclyde.

Viscount Swinton, who received an earldom on relinquishing the post of Commonwealth Relations Secretary in April last, took the title of the Earl of Swinton.

Lord Iveagh was invested with the Order of the Garter (K.G.) on June 18, 1955, and Lord Bilsland and Lord Crawford and Balcarres were invested with the Order of the Thistle (K.T.) on July 4. A baronetcy was conferred on Sir Seymour Howard in November last on his retirement from the office of Lord Mayor of London.—(Times - Daily Telegraph)

(Prev. rep. Birthday Honours, 14252 A.)

B. SPEED-BOAT RACING. — New World Record.

Mr. Donald Campbell, of Britain, broke his own world water-speed record on Nov. 16 when his jet-powered speedboat *Bluebird* set up a new record by averaging 216.2 m.p.h. on two runs over a measured kilometre on Lake Mead, Nevada, U.S.A. Mr. Campbell achieved a speed of 239.5 m.p.h. on the first run and of 193 m.p.h. on the second run.
(Times - New York Times) **(Prev. rep. 14338 E.)**

C. UNITED KINGDOM. — November Trade Figures.

Imports into the United Kingdom in November totalled £341,500,000, exports £262,200,000, and re-exports £10,000,000, the adverse visible balance for the month thus amounting to £69,300,000. (Board of Trade Journal) **(Prev. rep. 14562 G.)**

A. TURKEY.—New Cabinet formed by M. Menderes. - Democratic Party's Criticisms of Government's Economic Policy.

M. Menderes submitted his resignation to President Bayar on Nov. 29, following a stormy meeting of the parliamentary group of the Democratic Party during which all the members of his Cabinet had resigned. The dispute arose out of strong criticisms of the Government's economic policy, and demands by a number of Democratic deputies for a parliamentary debate on the economic situation. During the meeting several deputies accused Ministers of having placed the country in a precarious economic position, emphasizing in this connexion the growing inflation, the constant rise in the cost of living, the shortage of certain goods, and the unbalanced state of Turkey's foreign trade. Several Ministers, including M. Polatkan (the Finance Minister), M. Yircali (the Minister of Commerce and Industry), and M. Zorlu (the Deputy Premier) were also accused of alleged irregular practices in the granting of import licences and the issue of foreign exchange permits. M. Menderes, who was himself given a vote of confidence by the parliamentary group, eventually suggested that those Ministers who had ceased to enjoy the party's confidence should resign.

Press reports from Ankara pointed out that, in addition to the deterioration in the economic situation, the secession of a number of leading Democratic deputies at the time of the party's National Congress (see 14549 A) had caused increasing perturbation in the ranks of the party.

President Bayar immediately asked M. Menderes to form a new Cabinet, and on Dec. 9 the membership of the new Government—the fourth headed by M. Menderes since 1950—was announced as follows:

*M. Adnan Menderes ..	Prime Minister and Acting Minister of Defence.
M. Cemil Bengü	Ministers of State.
M. Semi Ergin	
*M. Emin Kalafat	
*M. Celâl Yardimci ..	
M. Huseyin Avni Goktürk	Justice.
*M. Ethem Menderes ..	Interior.
*Professor Fuat Koprulu ..	Foreign Affairs.
*M. Nedim Ökmen ..	Finance.
M. Ahmet Özel	Education.
*M. Muammer Çavusoglu ..	Public Works.
*M. Fahrettin Ulas .	Commerce.
M. Nafiz Korez	Health.
M. Hadi Husmen	Customs and Monopolies.
M. Esat Budakoglu ..	Agriculture.
M. Arif Demirer	Communications.
M. Mümtaz Tarhan ..	Labour.
*M. Samet Agaoglu ..	Industrial Development.

* Member of previous Cabinet.

Of the 18 Ministers, nine were members of the previous Government, but only M. Ethem Menderes and M. Agaoglu retained their former portfolios, whilst Professor Köprülü returned to the Ministry of Foreign Affairs, which he had headed from May 1950 until April 1955. The new Ministers were MM. Bengu, Ergin, Göktürk, Özel, Körez, Hüsmen, Budakoglu, Demirer, and Tarhan

The new Government's statement of policy was approved by the parliamentary group of the Democratic Party on Dec. 14 by 343 votes to 37, with seven abstentions, and by the Grand National Assembly in the early hours of Dec. 17, when, after a long debate, the Assembly passed a vote of confidence by 390 votes to 58. All the Opposition parties—the People's Party, the National Party, and the newly-formed Freedom Party—voted against the Government, whilst 50 to 60 Democrats were reported to have abstained.

In the economic field the Government proposed to continue economic development projects already begun but not to start new projects, and to take measures to reduce Turkey's adverse trade balance. The programme also announced the formation of a High Economic Council to co-ordinate economic affairs, the setting-up of a new Ministry of Industry, Minerals, and Power, and drastic measures to combat corruption and profiteering.

In the political sphere the Government proposed to amend the Constitution to improve the working of the country's political institutions; to repeal some of the Press laws enacted during the past 18 months, and, in particular, to amend the law so as to enable journalists accused of libel in matters of public interest to plead justification (the denial of this right was one of the principal reasons for the recent split in the Democratic Party); to repeal also the amendments to the electoral law passed in 1954; and to introduce other amendments to that law ensuring free voting at elections.

It was announced on Dec. 20 that the Defence portfolio had been provisionally transferred by the Prime Minister to M. Ergin, Minister of State, who consequently became acting Minister of National Defence.

The parliamentary group of the Democratic Party decided on Dec. 21, by 360 votes to 20, to demand a parliamentary inquiry into the conduct of M. Zorlu, M. Yircali, and M. Polatkan in connexion with the allegations about malpractices in the issuing of import licences and foreign exchange permits under the previous Government. The motion had been opposed by M. Menderes, who suggested that a parliamentary inquiry should be held by the new Government prior to any further proceedings; his proposal, however, was overruled.

On Dec. 15 the disciplinary committee of the Democratic Party decided that M. Mukerrem Sarol, the former Minister of State in charge of Press affairs, and a member of the party's directing committee, should be temporarily suspended from acting service in the party pending the next party congress. The directing committee had previously passed a motion to bring M. Sarol before the disciplinary committee on charges of having been guilty of "irregular practices" and of having caused dissension within the party.—(Turkish Embassy, London - Times - Manchester Guardian - Le Monde, Paris)

(Prev. rep. 14549 A.)

B. SUDAN.—Proclamation of Independence. - Ending of Anglo-Egyptian Condominium.

The world's youngest nation, the "independent and democratic republic of the Sudan," was officially proclaimed in Khartoum on Jan. 1, 1956, on which date the Anglo-Egyptian condominium (established in 1898) came to an end after 57 years. At the same time the former office of Governor-General was abolished, and the powers of Head of State were formally assumed by a five-man Council of State consisting of Mr. Ahmed Mohamed Yasin (nominated by the National Unionists), the Speaker of the Senate; Mr. Dardiri Mohamed Osman (nominated by the united Opposition parties), a member of the former Governor-General's Commission; Mr. Siricio Iro (of the Liberal Party), representing the southern Sudan; and Senator Ahmed Mohamed Salah and Mr. Abdel Fattah el-Moghrabi, the two independent members.

The formal proclamation of Sudanese independence took place at the Governor-General's Residency, the ceremony being attended by the leaders of the Government and Opposition parties, the leaders of the two religious sects (Sayed Abdel Rahman el-Mahdi and Sayed Ali el-Mirghani), and representatives of foreign Powers. The British and Egyptian Governments were represented by Mr. Dodds-Parker (Parliamentary Under-Secretary for Foreign Affairs) and Miralai Abdel Fatteh Hussein, who, on behalf of their Governments, formally presented documents recognizing the independence of the Sudan and the ending of the former Anglo-Egyptian condominium.

Mr. Ismail Azhari, the Prime Minister of the Sudan, gave an address in which he said that there was "no occasion in the history of the Sudan and its people greater than this, when the country has attained its full independence and sovereignty." He added: "If this day marks the end of our struggle for independence, it is also the beginning of our task of building our future progress. Our people were determined to achieve their independence; they are even more determined to maintain it." After Mr. Azhari had thanked Britain and Egypt for fulfilling their pledges to the Sudan, he and the Leader of the Opposition formally hauled down the British and Egyptian flags and hoisted in their place the new Sudanese flag—a horizontally-striped tricolour of blue, yellow and green, symbolizing respectively the Nile, the desert, and agriculture.

Apart from Britain and Egypt, nine countries announced their formal recognition of the Republic of the Sudan on Jan. 1—the United States, Belgium, Ethiopia, India, Iraq, the Lebanon, Pakistan, South Africa, and the Yemen. Congratulatory messages were sent to the Council of State by H.M. Queen Elizabeth II, President Eisenhower, Sir Anthony Eden, Mr. Nehru, and other Heads of State and statesmen. (Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Sudan, 14609 A.)

Note. The Sudan has an area of nearly 1,000,000 square miles, being bounded on the north by Egypt, on the east by the Red Sea and Ethiopia, on the south by Kenya, Uganda, and the Belgian Congo, and on the west by French Equatorial Africa and Libya. The population, nearly 9,000,000, is of Arab, Negro, and Nubian (mixed Arab-Negro) blood, with a small foreign element. The principal exports are cotton and ground-nuts, and the principal grain-crop millet, the staple food. Much livestock (camels, sheep, goats, horses) is owned by the nomadic Arab and Negro tribes. The only two towns of appreciable size are Khartoum, the capital (about 87,000) and Omdurman (over 130,000). The principal ports are Suakin and Port Sudan.—(Ed. K.C.A.)

JANUARY 7—14, 1956

A. FRANCE. — The General Elections.

General elections for a new National Assembly were held on Jan. 2 throughout Metropolitan France and the oversea departments and territories. As explained on page 14582 (end of first column) the elections in Algeria were postponed.

The total number of deputies elected in Metropolitan France was 544, whilst 50 were elected in the oversea departments and territories—a total of 594. The National Assembly will be brought up to its full strength of 626 by the subsequent election of 30 deputies for Algeria and of two more deputies for the oversea territories—one for New Caledonia, where the elections will take place on Jan. 8, and another for French Oceania, where they will be held on Jan. 29.

Tabulated results of the elections are given below, showing (1) the results for Metropolitan France (544 seats); (2) the results for the oversea territories and departments (50 seats), excluding the two results still outstanding; and (3) the overall total for Metropolitan France and the oversea departments and territories (594 seats).

Results for Metropolitan France.

Party gains and losses were as follows:

	Seats (1956)	Seats (1951)	Gains (+) or losses (—)
Communists and *progressistes*	145	93	+52
Socialists	88	94	— 6
Modérés (Independents, Independent *Paysans*, A.R.S.)	94	125	—31
Radicals, R.G.R., U.D.S.R.	71	82	—11
M.R.P. (Popular Republicans)	71	85	—14
Poujadists (U.D.C.A.)	52	—	+52
Social Republicans (Gaullists)	16	57	—41
Various Left-wing groups	4	6	— 2
Rassemblement National	3	—	+ 3

Abbreviations. R.G.R.—*Rassemblement des gauches républicaines;* U.D.S.R.—*Union démocratique et socialiste de la Résistance*; M.R.P.—*Mouvement Républicain Populaire*; A.R.S.—*Action républicaine et sociale* (Dissident Gaullists); U.D.C.A.—*Union pour la défense des commerçants et artisans.*

The Independents are also known as Independent Republicans.

The figures given below show the votes cast for the various parties, gains and losses of votes compared with 1951 (the last general election), and the approximate percentage of votes received in both elections:

	Votes	Gain or loss	Percentage of votes (1956)	Percentage of votes (1951)
Communists and *progressistes*	5,492,332	+ 481,074	25.6	25.9
Socialists	3,187,890	+ 465,457	15.0	14.9
Modérés	3,085,576	+ 760,144	14.1	12.3
Radicals, R.G.R., U.D.S.R.	2,852,567	+ 866,941	13.6	11.2
M.R.P.	2,355,873	+ 38,106	10.6	12.8
Poujadists	2,608,481	—	12.1	—
Social Republicans (Gaullists)	911,450	—3,068,987	4.2	20.4
Various Left-wing groups	354,919	+ 313,584	1.6	0.1
Rassemblement National	335,486	—	1.5	—

The figures given above were those officially issued by the French Ministry of the Interior.

The electorate in Metropolitan France totalled 26,871,688 (of whom 53 per cent were women), an increase of over 2,300,000 since the general election of 1951—attributable to the natural increase of the population by about 300,000 a year, improved methods of electoral registration, and naturalizations among the fairly large immigrant population. Nearly 21,800,000 voters (82.2 per cent of the electorate) went to the polls, voting being heavy in all areas and reaching 90 per cent in some parts of France. Abstentions numbered over 4,500,000 (17.2 per cent, the lowest since the war and comparing with 19.8 per cent in 1951). Over 670,000 ballot papers were spoiled.

Results for Oversea Departments and Territories.

KANSAS CITY PUBLIC LIBRARY FEB 9 1956

	Seats 1956	Seats 1951	Gains (+) or losses (—)
Overseas Independents	9	14	— 5
*Rassemblement Democratique Africain**	9	3	+ 6
Socialists	6	8	— 2
Social Republicans (Gaullists)	6	8	— 2
Communists	5	4	+ 1
U.D.S.R.	4	7	— 3
R.G.R.	3	1	+ 2
Paysans and Ind. *Paysans*	2	3	— 1
M.R.P.	1	2	— 1
Others	5	—	+ 5

* Affiliated to the U.D.S.R.

The elections took place in the oversea *départements* of Martinique, Guadeloupe, Réunion, and French Guiana, and in the following *territoires d'outre-mer*—Senegal, Dahomey, the Cameroons, Togo, Mauritania, Upper Volta, the Ivory Coast, French Sudan, Middle Congo, Gaboon, Ubangui-Chari, Chad, French Guinea, Niger, French Somaliland, Madagascar, St. Pierre and Miquelon, and the Comoro Islands. As explained above, New Caledonia and French Oceania (Tahiti, etc.) will also go to the polls.

Overall Results for Metropolitan France and Oversea Departments and Territories.

With the exception of the 30 Algerian deputies still to be elected, and the two results outstanding from the *territoires d'outre-mer*, the membership of the new National Assembly will therefore be as follows:

Communists and *progressistes*	150
Modérés (Independents, Ind. *Paysans*, A.R.S.)	96
Socialists	94
*Radicals, R.G.R., U.D.S.R.	87
M.R.P. (Popular Republicans)	72
Poujadists (U.D.C.A.)	52
Social Republicans (Gaullists)	22
Overseas Independents	9
Various Left-wing groups	6
Various Overseas groups	5
Rassemblement National (right-wing)	3

* Including the *Rassemblement Démocratique Africain.*

[Although the first official statistics gave the Communist representation as 151, this was not borne out by analysis of the results, and the figure was subsequently amended. The final party affiliations will not become known until the new National Assembly meets. They will be described in a subsequent article.—*Ed. K.C.A.*]

Analysis of Election Results.

The principal features of the election were the large gains made by the Communists, who became the strongest party in the National Assembly, and the success of M. Poujade's *Union pour la défense des commerçants et artisans* (see 14615 A), which obtained 52 seats on its first appearance at the polls. The Socialists, *Modérés*, Radicals, M.R.P., and Overseas Independents all returned fewer deputies than in 1951, but nevertheless command a combined total of 358 votes in the new Assembly. The most severe setback was suffered by the Social Republicans (Gaullists), who lost over 3,000,000 votes —most of which apparently went to the Poujadists.

Communist Party. Although the Communists gained 52 seats in Metropolitan France and polled nearly half a million votes more than in 1951, their percentage of the total poll was slightly smaller than at the last general election. As explained on page 14579 (second column), the Communist Party was considerably under-represented in the last National Assembly in proportion to its strength in the country as a whole. The returns showed that the Communists had regained most of the seats which they had lost in 1951 through electoral alliances between the Socialists and the Centre parties. The biggest Communist gains were made in the eastern and north-eastern industrial areas. The party lost seats, however, in the rural areas south of the Loire.

All prominent leaders of the party were re-elected (many in the Seine department, comprising Paris and its environs), including M. Maurice Thorez, the party leader (Seine), M. Jacques Duclos (Seine), M. Marcel Cachin (Seine), M. Kriegel-Valrimont (Meurthe-et-Moselle), M. Waldeck-Rochet (Saône-et-Loire), Mme. Vaillant-Couturier (Seine), Mlle. Jeannette Vermeersch (Mme. Thorez) (Seine), M. Laurent Casanova (Seine-et-Marne), M. Florimond Bonte (Seine), M. Etienne Fajon (Seine) and M. François Billoux (Bouches-du-Rhône).

New Communist members included M. Dreyfus-Schmidt, a former mayor of Belfort, who won a seat in the *département* of Belfort from M. Schmittlein, the leader of the Social Republican (Gaullist) parliamentary group in the former National Assembly.

Socialist Party. The Socialists, like the Communists, increased their total vote by nearly half a million, and also increased their proportion of the total poll, but nevertheless returned six fewer members than in the former Assembly. The returns showed, however, that the party had recovered its electoral strength in many parts of France after an almost uninterrupted decline since the war. A noteworthy feature of the elections was the considerable increase in the Socialist vote in the industrial *départements* of Nord and Pas-de-Calais, and also in eastern and western France.

All prominent party leaders were re-elected, including M. Guy Mollet, its secretary-general (Pas-de-Calais), M. Robert Lacoste, vice-president of the National Assembly (Dordogne), M. Jules Moch (Hérault), M. Daniel Mayer (Seine), M. André Le Troquer (Seine), M. Félix Gouin (Bouches-du-Rhône), M. Marcel Naegelen (Basses-Alpes), M. P.-O. Lapie (Meurthe-et-Moselle), M. Edouard Depreux (Seine), M. Jean Meunier (Indre-et-Loire), M. Eugène Thomas (Nord), M. Tanguy-Prigent (Finistère), M. Minjoz, mayor of Besançon (Doubs), and M. Ségelle, mayor of Orléans (Loiret).

M. Paul Ramadier, the veteran Socialist statesman and post-war Prime Minister, was elected in the Aveyron *département*. He had lost his seat in the 1951 elections.

"Moderate" Parties. The *modérés*—politically the "Right-Centre" groups—comprised the Independents (also known as Independent Republicans), Independent *Paysans*, and Dissident Gaullists (A.R.S.), who in many *départements* presented joint lists. Though returning 31 fewer deputies than in 1931, the combined votes of these parties rose by over three-quarters of a million, while their proportion of the total vote increased by nearly two per cent.

Prominent Independents and Dissident Gaullists re-elected included M. Antoine Pinay, the Foreign Minister and leader of the Independents (Loire), M. Paul Reynaud, the former Prime Minister (Nord), M. Jacquinot (Meuse), M. Pierre Montel (Rhône), M. Edmond Barrachin (Seine), M. Frédéric-Dupont (Seine), M Jacques Féron, president of the Paris Municipal Council (Seine) and M. Pierre July (Eure-et-Loir). MM. Jacquinot, Montel, Barrachin, Frédéric-Dupont, Féron and July were returned on joint Independent-A.R.S. lists, and MM. Pinay and Reynaud as Independents.

Leading members of the Independent *Paysan* group re-elected included M. Jean Sourbet, Minister of Agriculture (Gironde), M Joseph Laniel, a former Prime Minister (Calvados), M. Emmanuel Temple (Aveyron) and M. Camille Laurens (Cantal).

Among Dissident Gaullists who failed to secure re-election was General Billotte, the Minister of National Defence, who was defeated in the Côte-d'Or *département*. Several prominent Independent *Paysans* also failed to secure re-election, including M. Chamant, State Secretary for Foreign Affairs, M. Chastellain, a former Minister, and M. Ramarony, who lost their seats in the departments of Yonne, Seine-Maritime, and Gironde respectively.

Radical Party and Associates. The "Left-Centre" parties—Radicals, R.G.R., and U.D.S.R.—lost 11 seats in Metropolitan France, but nevertheless increased their votes by over 860,000, their proportion of the total rising by 2.4 per cent. M. Mendès-France headed the poll in the Eure department with 59,787 votes—22,000 more than in 1951. M Edgar Faure, the Prime Minister and leader of the R.G.R., who was expelled from the Radical Party in December (see page 14581, end of second column), headed the poll in the Jura department (for which he sought re-election on a joint R.G.R.-Independent list) with 39,195 votes—13,000 more than in 1951 That section of the Radical Party led by M. Mendès-France (the so-called *Mendèsistes*) polled particularly well in the Paris area.

Other prominent Radical, R.G.R and U D.S.R. members re-elected included M. Edouard Herriot, the veteran Radical statesman and mayor of Lyons (Rhône), M. Henri Queuille (Corrèze), M. Bourgès-Maunoury, Minister of the Interior (Haute-Garonne), M. André Marie (Seine-Maritime), M. Edouard Daladier (Vaucluse), M. Laforest, State Secretary to the *Présidence du Conseil* (Dordogne), M. André Morice, Minister of Commerce and Industry (Loire-Inférieure), M. Jean Masson (Haute-Marne), M. Bonnefous (Seine-et-Oise), M. André Maroselli (Haute-Saône), M Bernard Lafay, Minister of Public Health (Seine), Maître de Moro-Giafferri (Seine), M René Pleven (Côtes-du-Nord) and M. François Mitterrand (Nièvre).

New Radical deputies included M. Georges Bonnet, the pre-war Foreign Minister (elected in Dordogne), and M. Anxionnaz, secretary-general of the Radical Party, who was returned for the Marne department and who sat in the National Assembly before 1951.

M Martinaud-Déplat (Radical), a former Minister of Justice, lost his seat in the Bouches-du-Rhône department, whilst M Claudius-Petit (U.D.S.R.), a former Minister of Reconstruction, was defeated in the Loire department.

M.R.P. The M.R.P.—the Catholic "centre" party, or Popular Republicans—lost 14 seats in Metropolitan France, their proportion of the total vote declining by 2.2 per cent. Although they gained some seats in the eastern *départements*, they lost ground in other areas, notably in the Paris region and in the Rhône valley.

Among the M.R.P. leaders, M. Georges Bidault was re-elected for the Loire department, though with 60,000 fewer votes than in 1951. Other prominent M.R.P. members re-elected included M. Pierre Pflimlin, Minister of Finance (Bas-Rhin), M. Pierre Schneiter, president of the National Assembly (Marne), M. Pierre-Henri Teitgen, Minister for *France d'outre-mer* (Ille-et-Vilaine), M. Robert Schuman, the former Foreign Minister (Moselle), M. Paul Coste-Floret (Hérault), M. André Colin (Finistère), M Maurice Schumann (Nord), M. François de Menthon (Haute-Savoie), and M Paul Bacon (Seine). New M.R.P. deputies included M. Joseph Rey, mayor of Colmar (Haut-Rhin).
